Hi There, I wish to make the following observation on the above file. The applicant has not shown in its traffic management plan a reasonable solution to,
1. The increase in traffic volumes in line with the felling of forestry to accommodate the proposed development with normal day to day traffic.
2. The combined effect of the neighbouring development in the proposed Oatfield windfarm.
3. The effect of both these developments with the Broadford wastewater scheme due to commence in 2027 making no reference in any shape or form to this soon to commence development.
4. There is no reference made to to the increase in road traffic numbers, diversions or otherwise in relation the grid connection works that will take place before during or after the knockshanvo development and or the combined or individual effects of the grid connection development from the proposed neighbouring Oatfield windfarm either.

Regards

Jim Fitzgerald,
Oatfield,
Sixmilebridge,
Co.Clare.
