Breedon
Villeagh
Co Cork.

To whome It may concern!

Please know that I am completely opposed to the building of this proposed "Substation" at Knocknagappagh Villeagh. I'm informed the chosen site is what is commonly known as "Cronins Bogs" a place well known for flooding at all times of the year. The Hydrogaly of the area would be completely upset & would cause untold misery on the local population. The proposed site is also close to one of the most important ring forts in east Cork and might I add who knows what Arkological merit would be lost to the area. Also the visual impact of this horrible building would certainly be an eyesore on our beautiful landscape. The Proposed Substation would be a huge fire risk to the area & to the people for numerous miles around. We have had no public consultation on this project & are being totally ignored by the people who should care the most. I have many many more concerns about this proposal! Know that I do not want this in my area. We just want to enjoy our beautiful Countryside. Yours Sincerely

Roger Greene.
