

## Board Direction

---

**Ref: PL08.244612**

The submissions on this file and the Inspector's report were considered at a Board meeting held on July 17<sup>th</sup> 2015.

The Board decided to grant permission generally in accordance with the Inspector's recommendation, for the following reasons, considerations and conditions.

### Reasons and Considerations

Having regard to the existing residential use on site, to the proposal to install a new sewage treatment unit on site, and to the size and design of the proposed extensions, it is considered that the proposed development, subject to compliance with the conditions set out below, would not seriously injure the amenities of the area or of property in the vicinity, would not be prejudicial to public health and would not be in material conflict with the overall provisions of the current Development Plan for the area. The proposed development would, therefore, be in accordance with the proper planning and sustainable development of the area.

### Conditions

1. The development shall be carried out and completed in accordance with the plans and particulars lodged with the application, except as may otherwise be required in order to comply with the following conditions. Where such conditions require details to be agreed with the planning authority, the developer shall agree such details in writing with the planning authority prior to commencement of development and the development shall be carried out and completed in accordance with the agreed particulars.

**Reason:** In the interest of clarity.

2. Details of the materials, colours and textures of all the external finishes to the proposed development shall be submitted to, and agreed in writing with, the planning authority prior to commencement of development.

**Reason:** In the interest of visual amenity.

3. Details of the roadside boundary wall and the new site entrance shall be submitted to, and agreed in writing with, the planning authority prior to commencement of development.

**Reason:** In the interest of visual amenity and traffic safety.

4. Water supply and drainage arrangements, including the disposal of surface water, shall comply with the requirements of the planning authority for such works and services.

**Reason:** In the interest of public health and to ensure a proper standard of development.

5. All service cables for the development, including electrical and telecommunications cables, shall be located underground throughout the site.

**Reason:** In the interest of visual amenity.

6. (a) The treatment plant and polishing filter shall be located, constructed and maintained in accordance with the details submitted to the planning authority, and in accordance with the requirements of the document entitled "Code of Practice - Wastewater Treatment and Disposal Systems Serving Single Houses (p.e. ≤ 10)" – Environmental Protection Agency, 2009. No system other than the type proposed in the submissions shall be installed unless agreed in writing with the planning authority.  
  
(b) Within three months of the installation of the effluent treatment system, the developer shall submit a report from a suitably qualified person with professional indemnity insurance certifying that the proprietary effluent treatment system has been installed and commissioned in accordance with the approved details and is working in a satisfactory manner and

that the polishing filter is constructed in accordance with the standards set out in the EPA document..

- (c) A maintenance contract for the treatment system shall be entered into and paid in advance for a minimum period of five years from the first occupancy of the development and thereafter shall be kept in place at all times. Signed and dated copies of the contract shall be submitted to the planning authority within four weeks of the installation.
- (d) Surface water soakways shall be located such that the drainage from the dwelling and paved areas of the site shall be diverted away from the location of the polishing filter.

**Reason:** In the interest of public health.

- 7. Construction and demolition waste shall be managed in accordance with a construction waste and demolition management plan, which shall be submitted to, and agreed in writing with, the planning authority prior to commencement of development. This plan shall be prepared in accordance with the “Best Practice Guidelines on the Preparation of Waste Management Plans for Construction and Demolition Projects”, published by the Department of the Environment, Heritage and Local Government in July, 2006.

**Reason:** In the interest of sustainable waste management.

- 8. The developer shall pay to the planning authority a financial contribution in respect of public infrastructure and facilities benefiting development in the area of the planning authority that is provided or intended to be provided by or on behalf of the authority in accordance with the terms of the Development Contribution Scheme made under section 48 of the Planning and Development Act 2000, as amended. The contribution shall be paid prior to commencement of development or in such phased payments as the planning authority may facilitate and shall be subject to any applicable indexation provisions of the Scheme at the time of payment. Details of the application of the terms of the Scheme shall be agreed between the planning authority and the developer or, in default of such agreement, the matter shall be referred to An Bord Pleanála to determine the proper application of the terms of the Scheme.

**Reason:** It is a requirement of the Planning and Development Act 2000, as amended, that a condition requiring a contribution in

accordance with the Development Contribution Scheme made under section 48 of the Act be applied to the permission.

Note: In reaching its decision, the Board noted the Appropriate Assessment screening report prepared by the planning authority and the Appropriate Assessment screening assessment carried out by the Inspector. It concurred with the analysis in these reports and assessments, and adopted the Inspector's conclusions in this regard. The Board was therefore satisfied, having regard to the nature and scale of the proposed development, and the established residential use of the site, that the proposed development, by itself or in combination with other plans or projects, would not be likely to have a significant effect on the Kerry Head Special Protection Area (site code 004189), in view of the site's conservation objectives.
