At a meeting held on 09/01/2019, the Board considered:

- the submissions made in relation to the proposed development,
- the report of the Inspector, and
- the documents and submissions on file.

The Board decided to approve the proposed road development without modifications generally in accordance with the Inspector’s recommendation, for the following reasons and considerations, and subject to the conditions set out below.

**REASONS AND CONSIDERATIONS**

In coming to its decision, the Board had regard to the following:

(c) the European, national, regional and local strategic road policies and objectives, inclusive of those set out in National Planning Framework, Smarter Travel – A Sustainable Transport Future, the Regional Planning Guidelines for the West Region 2010-2022 and the Roscommon County Development Plan 2014-2020,

(d) the scheme constituting a key transportation element for the improvement of the N5 National Primary Road

(e) the design, layout and alignment of the proposed road development,
(f) the range of proposed mitigation measures set out in the submitted environmental impact assessment report, Natura impact statement, and Schedule of Commitments, and

(g) the submissions made in relation to the application and the report and recommendation of the Inspector including the report of its appointed consultant hydrogeologist.

Appropriate Assessment:

The Board agreed with and adopted the screening assessment carried out and conclusions reached in the Inspector’s report that Annaghmore Lough (Roscommon) SAC (site code 001626), Bellanagare Bog SAC (site code 000592), Bellanagare Bog SPA (site code 004105), Cloonshanville Bog SAC (site code 000614), Lough Forbes Complex SAC (site code 001818) and Lough Gara SPA (site code 004048) are the only European Sites in respect of which the proposed road development has the potential to have a significant effect.

The Board considered the Natura impact statement and associated documentation submitted with the application for approval, the mitigation measures contained therein, the submissions and observations on file, and the Inspector’s assessment. Including the report of its appointed hydrogeologist. The Board completed an appropriate assessment of the implications of the proposed road development for the affected European Sites, namely Annaghmore Lough (Roscommon) SAC (site code 001626), Bellanagare Bog SAC (site code 000592), Bellanagare Bog SPA (site code 004105) (site code 004105), Cloonshanville Bog SAC (site code 000614), Lough Forbes Complex SAC (site code 001818) and Lough Gara SPA (site code 004048) in view of the sites’ conservation objectives. The Board considered that the information before it was adequate to allow the carrying out of an appropriate assessment.

In completing the appropriate assessment, the Board considered, in particular, the following:
i. the likely direct and indirect impacts arising from the proposed road development both individually or in combination with other plans or projects,

ii. the mitigation measures which are included as part of the current proposal, and

iii. the conservation objectives for the European Sites.

In completing the appropriate assessment, the Board accepted and adopted the appropriate assessment carried out in the Inspector’s report in respect of the potential effects of the proposed road development on the aforementioned European Sites, having regard to the sites’ conservation objectives.

In overall conclusion, the Board was satisfied that the proposed road development, by itself or in combination with other plans or projects, would not adversely affect the integrity of the European Sites, in view of the sites’ conservation objectives.

**Environmental Impact Assessment:**

The Board completed an environmental impact assessment of the proposed development, taking into account:

(a) the nature, scale and extent of the proposed development;

(b) the environmental impact assessment report and associated documentation submitted in support of the application;

(c) the submissions from the local authority, the observers and prescribed bodies in the course of the application, and

(d) the Inspector’s report including the report of its appointed consultant hydrogeologist.

The Board agreed with the summary and examination, set out in the Inspector’s report, of the information contained in the environmental impact assessment report and associated documentation submitted by the applicant and submissions made in the course of the application. The Board is satisfied that the Inspector’s report sets out how these were addressed in the examination and recommendation and are incorporated into the Board’s decision.
The Board considered that the environmental impact assessment report, supported by the documentation submitted by the local authority, provided information which is reasonable and sufficient to allow the Board to reach a reasoned conclusion on the significant effects of the proposed road development on the environment, taking into account current knowledge and methods of assessment. The Board is satisfied that the information contained in the EIAR is up to date and complies with the provisions of EU Directive 2014/52/EU amending Directive 2011/92/EU. The Board considered that the main significant direct and indirect effects of the proposed development on the environment are, and would be mitigated as follows:

- **Risk of pollution of ground and surface water** during the construction and operational phases. The impacts would be mitigated by measures within a Construction Erosion and Sediment Control Plan and adherence to best practice construction measures and incorporation of appropriate drainage facilities as set out in mitigation measures 6.1-6.14 and mitigation measures 7.1 to 7.107.8 (sic).

- **Impact on population and human health** as a result of noise during the construction and operational phases of the development. The contractor will be obliged to take specific noise abatement measures and comply with the recommendations of BS 5228-1:2009+A1:2014 Code of Practice for Noise and Vibration Control on Construction and Open Site – Noise and the European Communities (Noise Emission by Equipment for Use Outdoors) Regulations 2001 as set out Mitigation No.9.1. The contractor will also be required to comply with specific requirements with respect to vibration and blasting as set out in Mitigations No. 9.2 – 9.5. In terms of the operational phase mitigation measures will be required at 11 properties in the form of acoustic barriers and/or earth bunds as detailed in Mitigation Nos. 9.9 & 9.10.

- **Landscape and Visual Impacts** will arise from the proposed road development. Landscape mitigation proposals shall take full account of the approaches and principles set out in A Guide to Landscape Treatments for National Road Schemes in Ireland with planting and landscaping to be carried out in accordance with mitigation nos. 8.1 to 8.18.
• The proposed development would give rise to significant impacts on Material Assets and Land including agricultural and non-agricultural land arising from the compulsory acquisition of land to allow for the development. Impact on businesses from loss of passing trade will also arise. The TII/NRA’s Code of Practice Guide to Process and Code of Practice for National Toad Project Planning and Acquisition of Property for National Roads will be adhered to and the mitigation measures with regard to timing of works, consultation with property owners, restoration of access, boundary treatment, drainage and services will be carried out in accordance with mitigation Nos. 13.1 to 13.5 and 14.1 to 14.6.

• The proposed development would have potentially significant positive effects on Population and Human Health in terms of the increased benefits in terms of shorter journey times and reduction in traffic hazard. The removal of through traffic from the towns and villages along the existing N5 will assist in the improvement of connectivity, reduction of severance, and improvement in noise, air and overall amenity.

• The proposed development would have potentially significant positive effects on Cultural Heritage by the removal of substantial levels of traffic along the N5 which will also assist in improving the setting and context of Rathcroghan archaeological complex.

The Board completed an environmental impact assessment in relation to the proposed development and concluded that, subject to the implementation of the mitigation measures referred to above, and other measures set out in the Schedule of Commitments submitted to the oral hearing on the 10th day of October, 2018, including proposed monitoring as appropriate, subject to compliance with the conditions set out below, the effects on the environment of the proposed development, by itself and in combination with other development in the vicinity, would be acceptable. In doing so, the Board adopted the report and conclusions of the Inspector.
Proper Planning and Sustainable Development

It is considered that the proposed road development would accord with European, national, regional and local planning and that it is acceptable in respect of its likely effects on the environment and its likely consequences for the proper planning and sustainable development of the area.

CONDITIONS

1. The proposed development shall be carried out and completed in accordance with the plans and particulars, including the mitigation measures specified in the EIAR, lodged with the application to An Bord Pleanála on 20th day of December, 2017, as amended by the plans and particulars lodged with An Board Pleanala on the 7th day of June 2018 and at the oral hearing held on the 9th and 10th days of October, 2018, except as may otherwise be required in order to comply with the following conditions. Where such conditions require details to be prepared by the local authority, these details shall be placed on file prior to commencement of development and retained as part of the public record.

   **Reason:** In the interest of clarity and the proper planning and sustainable development of the area and to ensure the protection of the environment.

2. All mitigation measures identified in the EIAR and the Schedule of Environmental Commitments submitted by the local authority to the oral hearing on the 10th day of October 2018, shall be implemented in full as part of the proposed road development or as may be required in order to comply with the following conditions. The local authority or any agent acting on its behalf shall appoint a person with appropriate ecological and construction expertise as an environmental manager to ensure that the mitigation measures identified in the EIAR are implemented in full.

   **Reason:** In the interest of clarity and to protect the environment during the construction and operational phases of the development.
3. Prior to commencement of development, the local authority, or any agent acting on its behalf, shall prepare a Construction Management Plan (CMP) generally in accordance with the commitments set out in the EIAR and the Schedule of Environmental Commitments submitted by the local authority to the oral hearing on the 10th day of October 2018. The CMP shall include specific proposals as to how the CMP will be measured and monitored for effectiveness, and it shall be on file prior to the commencement of development and retained as part of the public record.

**Reason:** In the interest of protecting the environment and in the interest of public health.

4. Prior to commencement of development, the local authority, or any agent acting on its behalf, shall prepare an Environmental Operating Plan (EOP) generally in accordance with the commitments set out in the EIAR and the Schedule of Environmental Commitments submitted by the local authority to the oral hearing on the 10th day of October 2018. The EOP shall include specific proposals as to how the EOP will be measured and monitored for effectiveness, and it shall be on file prior to the commencement of development and retained as part of the public record.

**Reason:** In the interest of protecting the environment and in the interest of public health.

**Board Member**
