PLANNING AND DEVELOPMENT ACTS 2000 TO 2011

## Roscommon County

**Planning Register Reference Number: 12/442**

An Bord Pleanála Reference Number: PL 20.241659

**APPEAL** by Meteor Mobile Communications Limited care of Tiger International of BSM Building, Parkmore Business Park West, Galway in relation to the application by Roscommon County Council of the terms of the Development Contribution Scheme made for the area in respect of condition number 10 of its decision made on the 14<sup>th</sup> day of February, 2013.

**PROPOSED DEVELOPMENT:** Continuance of use of an existing 30 metres high lattice support structure carrying GSM telecommunications equipment (total height including dishes 31.15 metres), associated equipment container and palisade fencing as previously granted under local authority register reference number PD/08/54 at Sheegorey Townland, Boyle, County Roscommon which forms part of the cellular digital and broadband communications network.

## **DECISION**

**The Board, in accordance with section 48 of the Planning and Development Act, 2000, as amended by section 30 of the Planning and Development Act, 2010, considered, based on the reasons and considerations set out below, that the terms of the Development Contribution Scheme for the area had not been properly applied in respect of condition number 10 and directs the said Council under subsection (10) (b) of section 48 of the 2000 Act, to REMOVE condition number 10 and the reason therefor.**

## **REASONS AND CONSIDERATIONS**

The Roscommon County Council Development Contributions Scheme 2008 provides for a development contribution to be charged in respect of the development of communication masts. In this case, the mast has already been constructed (under planning register reference number PD/01/1725, An Bord Pleanála appeal reference number PL 20.130134), and retention of the mast was permitted under planning register reference number PD/08/54 and the relevant development contribution has been paid. Having regard to development contributions as a charge to defray the cost of public infrastructure and services related to the carrying out of development, it is considered that the Development Contributions Scheme does not provide for the payment of repeated contributions in respect of the same mast, in the absence of a particular provision to this effect. Furthermore, the Board considered that it would not be a reasonable interpretation of the Development Contribution Scheme, which relates to the development of a communications mast, to require additional payments for retention, arising out of a condition of a previous permission requiring that the mast be reviewed after five years, to take account of changes to technology or design in the interim. The Board, therefore, considered that the terms of the General Development Contribution Scheme have not been properly applied, and that condition number 10 should be removed.

## **MATTERS CONSIDERED**

In making its decision, the Board had regard to those matters to which, by virtue of the Planning and Development Acts and Regulations made thereunder, it was required to have regard. Such matters included any submissions and observations received by it in accordance with statutory provisions.
