Board Direction
PL08.248266

The submissions on this file and the Inspector's report were considered at a Board meeting held on 30/09/2018.

The Board decided to refuse permission for the development proposed to be retained and for the proposed development, generally in accordance with the Inspector's recommendation, for the following reasons and considerations.

Reasons and Considerations

It is considered that the road network serving the quarry site does not have sufficient capacity to handle the traffic associated with the development proposed to be retained and the proposed development. The development proposed to be retained and the proposed development would therefore, endanger public safety by reason of traffic hazard and an obstruction to road users, and would consequently be contrary to the proper planning and sustainable development of the area.
