Board Direction
PL91.248430

The submissions on this file and the Inspector's report were considered at a Board meeting held on 3rd October 2017.

The Board decided to grant permission generally in accordance with the Inspector's recommendation, for the following reasons and considerations, and subject to the following conditions.

Reasons and Considerations

Having regard to the zoning of the site for District Centre uses in the current Limerick City Development Plan, to the mix of uses and pattern of development in the area and to the access and parking provision set out in the application, it is considered that, subject to compliance with the conditions set out below, the proposed development would not seriously injure the amenities of the area or of property in the vicinity, would be acceptable in terms of pedestrian and traffic safety, would not be prejudicial to public health, and would be in accordance with the provisions of the Limerick City Development Plan. The proposed development would, therefore, be in accordance with the proper planning and sustainable development of the area.

Conditions

1. The development shall be carried out and completed in accordance with the plans and particulars lodged with the application, as amended by the further plans and particulars submitted on the 30th day of March 2017,

except as may otherwise be required in order to comply with the following conditions. Where such conditions require details to be agreed with the planning authority, the developer shall agree such details in writing with the planning authority prior to commencement of development and the development shall be carried out and completed in accordance with the agreed particulars.

Reason: In the interest of clarity.

2. Water supply and drainage arrangements, including the attenuation and disposal of surface water, shall comply with the requirements of the planning authority for such works and services.

Reason: In the interest of public health.

3. The construction of the development shall be managed in accordance with a Construction Management Plan, which shall be submitted to, and agreed in writing with, the planning authority prior to commencement of development. This plan shall provide details of intended construction practice for the development, including hours of working, noise management measures and off-site disposal of construction/demolition waste.

Reason: In the interest of public safety and residential amenity.

4. Details of the materials, colours and textures of all the external finishes to the proposed development, including the windows, canopies and doors, shall be submitted to, and agreed in writing with, the planning authority prior to commencement of development.

Reason: In the interest of the visual amenities of the area.

5. No advertisement or advertisement structure other than those shown on the drawings submitted with the application shall be erected or displayed

on the building or within the curtilage of the site in such a manner as to be visible from outside the building, unless authorised by a further grant of planning permission.

Reason: In the interest of visual amenity and to protect the residential amenities of the area.

6. The hours of operation, including service deliveries, shall be between 0800 hours and 2300 hours on any day.

Reason: In the interest of the amenities of the area.

7. Litter in the vicinity of the premises shall be controlled in accordance with a scheme of litter control which shall be submitted to, and agreed in writing with, the planning authority prior to commencement of development. This scheme shall include the provision of litter bins and refuse storage facilities.

Reason: In the interest of visual amenity.

8. The developer shall control odour emissions from the premises in accordance with measures, including extract duct details, which shall be submitted to, and agreed in writing with, the planning authority prior to commencement of development.

Reason: In the interest of public health and to protect the amenities of the area.

9. A plan containing details for the management of waste/recyclable materials within the development, including the provision of facilities for the storage, separation and collection of the waste/recyclable materials including waste oil and for the ongoing operation of these facilities shall be submitted to, and agreed in writing with, the planning authority prior to commencement of

development. Thereafter, the waste shall be managed in accordance with the agreed plan.

Reason: To provide for the appropriate management of waste/recyclable materials in the interest of protecting the environment.

10. The developer shall pay to the planning authority a financial contribution in respect of public infrastructure and facilities benefiting development in the area of the planning authority that is provided or intended to be provided by or on behalf of the authority in accordance with the terms of the Development Contribution Scheme made under section 48 of the Planning and Development Act 2000, as amended. The contribution shall be paid prior to commencement of development or in such phased payments as the planning authority may facilitate and shall be subject to any applicable indexation provisions of the Scheme at the time of payment. Details of the application of the terms of the Scheme shall be agreed between the planning authority and the developer or, in default of such agreement, the matter shall be referred to An Bord Pleanála to determine the proper application of the terms of the Scheme.

Reason: It is a requirement of the Planning and Development Act 2000, as amended, that a condition requiring a contribution in accordance with the Development Contribution Scheme made under section 48 of the Act be applied to the permission

Board Member

Date: 4th October 2017
