ABP-301327-18

The submissions on this file and the Inspector's report were considered at a Board meeting held on 10/09/2018.

The Board decided to grant permission generally in accordance with the Inspector's recommendation, for the following reasons and considerations, and subject to the following conditions.

Reasons and Considerations

Having regard to the design, appearance of the proposed extensions, and the pattern of development in the vicinity, it is considered that, subject to compliance with conditions below, the development proposed would not adversely impact on the character and setting of the Protected Structure on the appeal site, would not seriously injure the visual amenities of the area or residential amenities of property in the vicinity and would not adversely impact on the character of the Residential Conservation Area. The proposed development, therefore, would be in accordance with the proper planning and sustainable development of the area

Conditions

1. The development shall be carried out and completed in accordance with the plans and particulars lodged with the application, except as may otherwise be required in order to comply with the following conditions. Where such conditions require details to be agreed with the planning authority, the developer shall agree such details in writing with the planning

authority prior to commencement of development and the development shall be carried out and completed in accordance with the agreed particulars.

Reason: In the interest of clarity.

2. a) An accredited Conservation Architect shall be employed to manage, monitor and implement the works on the site and to ensure adequate protection of the retained and historic fabric during the works. In this regard, all permitted works shall be designed to cause minimum interference to the retained building and facades structure and/or fabric.

(b) All repair works to the protected structure shall be carried out in accordance with best conservation practice as detailed in the application and the Architectural Heritage Protection Guidelines for Planning Authorities issued by the Department of Arts, Heritage and the Gaeltacht in 2011. The repair works shall retain the maximum amount of surviving historic fabric in situ, including structural elements, plasterwork (plain and decorative) and joinery and shall be designed to cause minimum interference to the building structure and/or fabric. Items that have to be removed for repair shall be recorded prior to removal, catalogued and numbered to allow for authentic re-instatement.

Reason: To ensure that the integrity of the Protected Structure is maintained and that the structure is protected from unnecessary damage or loss of fabric.

3. Water supply and drainage arrangements, including the disposal of surface water, shall comply with the requirements of the planning authority for such works and services.

Reason: In the interest of public health.

4. Site development and building works shall be carried out only between the hours of 0800 to 1800 Mondays to Fridays inclusive, between 0800 to 1400 hours on Saturdays and not at all on Sundays and public holidays. Deviation from these times will only be allowed in exceptional

circumstances where prior written approval has been received from the planning authority.

Reason: In order to safeguard the residential amenities of property in the vicinity.
