**BD-001788-18**  
**ABP-302210-18**

The submissions on this file and the Inspector's report were considered at a Board meeting held on 28/11/2018.

The Board decided to grant permission generally in accordance with the Inspector's recommendation, for the following reasons and considerations, and subject to the following conditions.

### **Reasons and Considerations**

Having regard to the policies and objectives of the Cork County Development Plan 2014 – 2020, it is considered that, subject to conditions, the proposed development would be acceptable in land use terms, be compliant with Policy Objective EE 8-1 of the development plan, would not seriously injure the residential and visual amenities of the area and would, therefore be in accordance with the proper planning and sustainable development of the area.

### **Conditions**

1. The development shall be carried out and completed in accordance with the plans and particulars lodged with the application, as amended by the further plans and particulars submitted on the 18<sup>th</sup> day of June 2018, except as may otherwise be required in order to comply with the following conditions. Where such conditions require details to be agreed with the planning authority, the developer shall agree such details in writing with the planning authority prior to commencement of development and the

development shall be carried out and completed in accordance with the agreed particulars.

**Reason:** In the interest of clarity.

2. Revised drawings showing details of water supply arrangements for the proposed cubicle house and details of the colour of the finishes to the proposed cubicle house shall be submitted to, and agreed in writing with, the planning authority prior to commencement of development.

**Reason:** In the interest of orderly and well-planned development.

3. The site shall be landscaped in accordance with a comprehensive scheme of landscaping, details of which shall be submitted to, and agreed in writing with, the planning authority prior to commencement of development. This scheme shall include the following:

(a) A plan to scale of not less than 1:500 showing the species, variety, number, size and locations of all proposed trees and shrubs which shall comprise predominantly native species such as mountain ash, birch, willow, sycamore, pine, oak, hawthorn, holly, hazel, beech or alder and which shall not include prunus species.

(b) A timescale for implementation.

All planting shall be adequately protected from damage until established.

Any plants which die, are removed or become seriously damaged or diseased, within a period of five years from the completion of the development, shall be replaced within the next planting season with others of similar size and species, unless otherwise agreed in writing with the planning authority.

**Reason:** In the interest of visual amenity

4. The slatted shed shall be used only in strict accordance with a management schedule which shall be submitted to and agreed in writing with the planning authority, prior to commencement of development. The management schedule shall be in accordance with the European Union (Good Agricultural Practice for Protection of Waters) (Amendment) Regulations, 2018, and shall provide at least for the following:

(1) Details of the number and types of animals to be housed.

(2) The arrangements for the collection, storage and disposal of slurry.

(3) Arrangements for the cleansing of the buildings and structures.

**Reason:** In order to avoid pollution and to protect residential amenity.

5. All foul effluent and slurry generated by the proposed development and in the farmyard shall be conveyed through properly constructed channels to the proposed and existing storage facilities and no effluent or slurry shall discharge or be allowed to discharge to any stream, river or watercourse, or to the public road.

**Reason:** In the interest of public health.

6. All uncontaminated roof water from buildings and clean yard water shall be separately collected and discharged in a sealed system to existing drains, streams or adequate soak pits and shall not discharge or be allowed to discharge to the foul effluent drains, foul effluent and slurry storage tanks or to the public road.

**Reason:** In order to ensure that the capacity of effluent and storage tanks

is reserved for their specific purposes.

7. Slurry generated by the proposed development shall be disposed of by spreading on land, or by other means acceptable in writing to the planning authority. The location, rate and time of spreading (including prohibited times for spreading) and the buffer zones to be applied shall be in accordance with the requirements of the European Union (Good Agricultural Practice for Protection of Waters) (Amendment) Regulations, 2018.

**Reason:** To ensure the satisfactory disposal of waste material, in the interest of amenity, public health and to prevent pollution of watercourses.

8. A minimum of 16 weeks storage shall be provided in the underground storage tanks. Prior to commencement of development, details showing how it is intended to comply with this requirement shall be submitted to and agreed in writing with the planning authority.

**Reason:** In the interest of environmental protection and public health.

9. The construction of the development shall be managed in accordance with a Construction Management Plan, which shall be submitted to, and agreed in writing with, the planning authority prior to commencement of development. This plan shall provide details of intended construction practice for the development, including hours of working, noise management measures, off-site disposal of construction/demolition waste, and measures to ensure that no polluting material or contaminated surface water enters groundwater, any watercourse, or any public road.

**Reason:** In the interests of public safety and residential amenity.
