The submissions on this file and the Inspector's report were considered at a Board meeting held on 12/12/2019.

The Board decided to grant permission generally in accordance with the Inspector's recommendation, for the following reasons and considerations, and subject to the following conditions.

Reasons and Considerations

Having regard to the provisions of the Dun Laoghaire-Rathdown County Development Plan 2016 - 2022 and the zoning for residential purposes, to the location of the site in an established urban area and to the nature, form, scale and design of the proposed development, it is considered that, subject to compliance with the conditions set out below, the proposed development would not seriously injure the residential or visual amenities of the area. The proposed development would, therefore, be in accordance with the proper planning and sustainable development of the area.

Conditions

1. The development shall be carried out and completed in accordance with the plans and particulars lodged with the application on the 13th of June 2019, except as may otherwise be required in order to comply with the following conditions. Where such conditions require details to be agreed with the planning authority, the developer shall agree such details in writing with the planning authority prior to commencement of development and the development shall be carried out and completed in accordance with the agreed particulars.

Reason: In the interest of clarity.

2. A full architectural survey of buildings proposed for demolition shall be carried out and shall be submitted to the planning authority prior to commencement of development. Archive standard drawings and a photographic survey shall be prepared in accordance with the requirements of the planning authority.

Reason: In order to facilitate the conservation, preservation and/or recording of the architectural heritage of the site.

3. All works to the protected structure, shall be carried out under the supervision of a qualified professional with specialised conservation expertise.

Reason: To secure the authentic preservation of this [protected] structure and to ensure that the proposed works are carried out in accordance with best conservation practice.

4. Water supply and drainage arrangements, including the disposal of surface water, shall comply with the requirements of the planning authority for such works and services.

Reason: In the interest of public health and to ensure a proper standard of development.

5. Site development and building works shall be carried out only between the hours of 0800 to 1900 Mondays to Fridays inclusive, between 0800 to 1400 hours on Saturdays and not at all on Sundays and public holidays. Deviation from these times will only be allowed in exceptional circumstances where prior written approval has been received from the planning authority.

Reason: In order to safeguard the residential amenities of property in the vicinity.

Note: In deciding not to accept the inspector's recommendation to retain the round-headed window in the rear elevation to modify the width of the dormer , the Board was satisfied that the development as proposed would not injure the visual amenities of the area or the character of the Protected structure.
