ABP-309161-21

The submissions on this file and the Inspector's report were considered at a Board meeting held on 11/05/2021.

The Board decided to grant permission generally in accordance with the Inspector's recommendation, for the following reasons and considerations, and subject to the following conditions.

Reasons and Considerations

Having regard to the established agricultural use of the site, the nature, scale and extent of the proposed development, the nature of the receiving environment, the pattern of development in the vicinity and the relevant provisions of the Donegal County Development Plan 2018-2024, it is considered that, subject to compliance with the conditions set out below, the proposed development would not seriously injure the amenities of the area or of property in the vicinity, would not be prejudicial to public health and would constitute an acceptable use at this location. The development proposed would, therefore, be in accordance with the proper planning and sustainable development of the area.

Conditions

1. The proposed development shall be carried out and completed in accordance with the plans and particulars lodged with the application, except as may otherwise be required in order to comply with the following conditions. Where such conditions require details to be agreed with the planning authority, the

developer shall agree such details in writing with the planning authority prior to commencement of development and the development shall be carried out and completed in accordance with the agreed particulars.

Reason: In the interest of clarity.

2. The slatted shed shall be used only in strict accordance with a management schedule which shall be submitted to, and agreed in writing with, the planning authority prior to commencement of development. The management schedule shall be in accordance with the European Union (Good Agricultural Practice for Protection of Waters) (Amendment) Regulations, 2017, as amended, and shall provide at least for the following:

- (1) Details of the number of animals to be housed.
- (2) The arrangements for the collection, storage and disposal of slurry.
- (3) Arrangements for the cleansing of the buildings and structures (including the public road, where relevant).

Reason: In order to avoid pollution and to protect residential amenity.

3. Water supply and drainage arrangements for the site, including the disposal of surface and soiled water, shall comply with the requirements of the planning authority for such works and services. In this regard-
 - (a) uncontaminated surface water run-off shall be disposed of directly in a sealed system, and
 - (b) all soiled waters shall be directed to a storage tank. Drainage details shall be submitted to, and agreed in writing with, the planning authority prior to commencement of development.

Reason: In the interests of environmental protection and public health.

4. All uncontaminated roof water from the building and clean yard water shall be separately collected and discharged in a sealed system to existing drains or adequate soakpits and shall not discharge or be allowed to discharge to the foul effluent drains, foul effluent and slurry storage tanks or to the public road.

Reason: In order to ensure that the capacity of effluent and storage tanks is reserved for their specific purposes.

5. All foul effluent and slurry generated by the proposed development and in the farmyard shall be conveyed through properly constructed channels to the

proposed and existing storage facilities and no effluent or slurry shall discharge or be allowed to discharge to any stream, river or watercourse, or to the public road.

Reason: In the interest of public health.

6. Slurry generated by the proposed development shall be disposed of by spreading on land, or by other means acceptable in writing to the planning authority. The location, rate and time of spreading (including prohibited times for spreading) and the buffer zones to be applied shall be in accordance with the requirements of the European Union (Good Agricultural Practice for Protection of Waters) (Amendment) Regulations, 2017, as amended.

Reason: To ensure the satisfactory disposal of waste material, in the interests of amenity, public health and to prevent pollution of watercourses.

7. Site development and building works shall be carried out only between the hours of 0700 to 1800 Mondays to Fridays inclusive, between 0800 to 1400 hours on Saturdays and not at all on Sundays and public holidays. Deviated from these times will only be allowed in exceptional circumstances where prior written approval has been received from the planning authority.

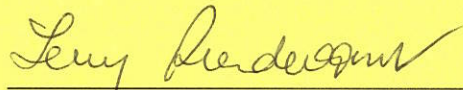

Reason: In order to safeguard the amenities of property in the vicinity.

8. The developer shall pay to the planning authority a financial contribution in respect of public infrastructure and facilities benefiting development in the area of the planning authority that is provided or intended to be provided by or on behalf of the authority in accordance with the terms of the Development Contribution Scheme made under section 48 of the Planning and Development Act 2000. The contribution shall be paid within one month of this Order or in such phased payments as the planning authority may facilitate and shall be subject to any applicable indexation provisions of the Scheme at the time of payment. Details of the application of the terms of the Scheme shall be agreed between the planning authority and the developer or, in default of such agreement, the matter shall be referred to the Board to determine the proper application of the terms of the Scheme.

Reason: It is a requirement of the Planning and Development Act 2000 that a condition requiring a contribution in accordance with the Development

Contribution Scheme made under section 48 of the Act be applied to the permission.

Board Member

Terry Prendergast
