Board Direction
BD-009695-21
ABP-310534-21

The submissions on this file and the Inspector's report were considered at a Board meeting held on 20/12/2021.

The Board decided to grant permission generally in accordance with the Inspector's recommendation, for the following reasons and considerations, and subject to the following conditions.

Reasons and Considerations

Having regard to the land-use zoning objectives for the site, as set out in the Dublin City Development Plan 2016-2022, to the nature, layout, scale and design of the proposed development and the existing pattern of development in the vicinity, it is considered that, subject to compliance with the conditions set out below, the proposed development would appropriately reintroduce residential uses onto this inner-city site, would not adversely impact on the architectural heritage of the area, including the character of setting of Protected Structures and the Mountjoy Square Architectural Conservation Area, would be acceptable in terms of design, height, layout and scale of development, would provide a suitable level of accommodation and amenity for future occupants, would not seriously injure the amenities of the area or of property in the vicinity and would comply with the provisions of the Dublin City Development Plan 2016-2022, the Sustainable Urban Housing: Design Standards for New Apartments – Guidelines for Planning Authorities (Department of Housing, Planning and Local Government, 2020) and the Architectural Heritage Protection: Guidelines for Planning Authorities (Department of Arts, Heritage and the

Gaeltacht, 2011). The proposed development would, therefore, be in accordance with the proper planning and sustainable development of the area.

Conditions

1. The development shall be carried out and completed in accordance with the plans and particulars lodged with the application, as amended by the further plans and particulars submitted to the Planning Authority on the 29th day of April 2021, except as may otherwise be required in order to comply with the following conditions. Where such conditions require details to be agreed with the planning authority, the developer shall agree such details in writing with the planning authority prior to commencement of development and the development shall be carried out and completed in accordance with the agreed particulars.

Reason: In the interest of clarity.

2. The proposed development shall be amended as follows:
 - (a) the proposed mews building shall be repositioned by a further 0.12m southwest into the site to provide for a 1.79m-wide footpath along Fitzgibbon Lane and a unified building line with the rear of the adjoining property to the southeast;
 - (b) all surviving historic doors to the Protected Structure shall be reused within their original opes, except for the historic door at third-floor level. Where doors are to be blocked, these shall be retained in situ, locked and upgraded to provide 30min fire resistance rather than being concealed,
 - (c) revised internal layout to the second-floor of the Protected Structure to retain and protect the historic door leading to the living room area,
 - (d) revised internal layout for the proposed bedrooms at third-floor in the Protected Structure to rationalise the location of the bedroom doors and regularise the shape of the respective proposed bedrooms.

Revised drawings showing compliance with these requirements shall be submitted to, and agreed in writing with, the planning authority prior to commencement of development.

Reason: In the interests of visual amenity, to ensure that the integrity of the retained structure is maintained and to comply with the standards of the Dublin City Development Plan 2016-2022 relating to mews developments.

3. (a) A conservation expert shall be employed to manage, monitor and implement the works on the site and to ensure adequate protection of the retained and historic fabric during the works. In this regard, all permitted works shall be designed to cause minimum interference to the retained building and facades structure and/or fabric.

b) All repair works to the protected structure shall be carried out in accordance with best conservation practice as detailed in the application and the Architectural Heritage Protection Guidelines for Planning Authorities issued by the Department of Arts, Heritage and the Gaeltacht in 2011. The repair works shall retain the maximum amount of surviving historic fabric in situ, including structural elements, plasterwork (plain and decorative) and joinery and shall be designed to cause minimum interference to the building structure and/or fabric. Items that have to be removed for repair shall be recorded prior to removal, catalogued and numbered to allow for authentic re-instatement.

(c) All existing original features, including interior and exterior fittings/features, joinery, plasterwork, features, including cornices and ceiling mouldings, staircases, including balustrades, handrail and skirting boards, where indicated for retention, shall be protected during the course of refurbishment.

Reason: To ensure that the integrity of the retained structure is maintained and that the structure is protected from unnecessary damage or loss of fabric.

4. Each apartment shall be used as a single dwelling unit only and shall not be sub-divided in any manner or used as two or more separate habitable units.

Reason: In the interests of sustainable development and proper planning.

5. Details of the materials, colours and textures of all the external finishes to the proposed mews buildings and the landscaped communal open space shall be submitted to, and agreed in writing with, the planning authority prior to commencement of development.

Reason: In the interest of visual amenity.

6. No additional development shall take place above roof parapet level, including lift motor enclosures, air handling equipment, storage tanks, ducts or other external plant, telecommunication aerials, antennas or equipment, unless authorised by a further grant of planning permission.

Reason: To protect the residential amenity of property in the vicinity and the visual amenity of the area.

7. Prior to commencement of development, the developer shall enter into water and/or waste water connection agreement(s) with Irish Water.

Reason: In the interest of public health.

8. Drainage arrangements, including the attenuation and disposal of surface water, shall comply with the requirements of the planning authority for such works and services.

Reason: In the interest of public health and to ensure a satisfactory standard of development.

9. Proposals for a naming and numbering scheme and associated signage shall be submitted to, and agreed in writing with, the planning authority prior to commencement of development. Thereafter, all signs, and apartment numbers, shall be provided in accordance with the agreed scheme. The proposed name shall be based on local historical or topographical features, or other alternatives acceptable to the planning authority. No advertisements/marketing signage relating to the name of the development shall be erected until the developer has obtained the planning authority's written agreement to the proposed name.

Reason: In the interest of urban legibility and to ensure the use of locally appropriate placenames for new residential areas.

10. The management and maintenance of the proposed development following its completion shall be the responsibility of a legally-constituted management company. A management scheme providing adequate measures for the future maintenance of communal areas shall be submitted to, and agreed in writing with, the planning authority prior to commencement of development.

Reason: To provide for the satisfactory future maintenance of this development in the interest of residential amenity.

11. The construction of the development shall be managed in accordance with a Construction & Environmental Management Plan, which shall be submitted to, and agreed in writing with the planning authority prior to commencement of development. This plan shall provide, inter alia, details and location of the proposed construction compound(s), details of intended construction practice for the development, including hours of working, noise and dust management measures, measures to prevent the spillage or deposit of clay, rubble or other debris on the public road network, details of arrangements for routes for construction traffic, parking during the construction phase, and off-site disposal of construction/demolition waste.

Reason: In the interests of public safety and residential amenity.

12. Site development and building works shall be carried out only between the hours of 0700 to 1900 Mondays to Fridays inclusive, between 0800 to 1400 hours on Saturdays and not at all on Sundays and public holidays. Deviation from these times will only be allowed in exceptional circumstances where prior written approval has been received from the planning authority.

Reason: In order to safeguard the residential amenities of property in the vicinity.

13. A plan containing details for the management of waste (and, in particular, recyclable materials) within the development, including the provision of facilities for the storage, separation and collection of the waste and, in particular, recyclable materials and for the ongoing operation of these facilities shall be submitted to, and agreed in writing with, the planning authority prior to commencement of development. Thereafter, the waste shall be managed in accordance with the agreed plan.

Reason: To provide for the appropriate management of waste and, in particular recyclable materials, in the interest of protecting the environment.

14. The developer shall facilitate the preservation, recording and protection of archaeological materials or features that may exist within the site. In this regard, the developer shall -

- (a) notify the planning authority in writing at least four weeks prior to the commencement of any site operation (including hydrological and geotechnical investigations) relating to the proposed development,
- (b) employ a suitably-qualified archaeologist who shall monitor all site investigations and other excavation works, and
- (c) provide arrangements, acceptable to the planning authority, for the recording and for the removal of any archaeological material which the authority considers appropriate to remove.

In default of agreement on any of these requirements, the matter shall be referred to An Bord Pleanála for determination.

Reason: In order to conserve the archaeological heritage of the site and to secure the preservation and protection of any remains that may exist within the site.

15. Prior to commencement of development, the applicant or other person with an interest in the land to which the application relates shall enter into an agreement in writing with the planning authority in relation to the provision of housing in accordance with the requirements of section 94(4) and section 96(2) and (3) (Part V) of the Planning and Development Act 2000, as amended, unless an exemption certificate shall have been applied for and been granted under section 97 of the Act, as amended. Where such an agreement is not reached within eight weeks from the date of this order, the matter in dispute (other than a matter to which section 96(7) applies) may be referred by the planning authority or any other prospective party to the agreement to An Bord Pleanála for determination.

Reason: To comply with the requirements of Part V of the Planning and Development Act 2000, as amended, and of the housing strategy in the development plan of the area.

16. Prior to commencement of development, the developer shall lodge with the planning authority a cash deposit, a bond of an insurance company, or other security to secure the provision and satisfactory completion of roads, footpaths, watermains, drains, open space and other services required in connection with the development, coupled with an agreement empowering the

local authority to apply such security or part thereof to the satisfactory completion of any part of the development. The form and amount of the security shall be as agreed between the planning authority and the developer or, in default of agreement, shall be referred to An Bord Pleanála for determination.

Reason: To ensure the satisfactory completion of the development.

17. The developer shall pay to the Planning Authority a financial contribution in respect of public infrastructure and facilities benefiting development in the area of the Planning Authority that is provided or intended to be provided by or on behalf of the authority in accordance with the terms of the Development Contribution Scheme made under section 48 of the Planning and Development Act 2000, as amended. The contribution shall be paid prior to commencement of development or in such phased payments as the Planning Authority may facilitate and shall be subject to any applicable indexation provisions of the Scheme at the time of payment. Details of the application of the terms of the Scheme shall be agreed between the Planning Authority and the developer or, in default of such agreement, the matter shall be referred to An Bord Pleanála to determine the proper application of the terms of the Scheme.

Reason: It is a requirement of the Planning and Development Act 2000, as amended, that a condition requiring a contribution in accordance with the Development Contribution Scheme made under section 48 of the Act be applied to the permission.

18. The developer shall pay to the planning authority a financial contribution in respect of Luas Cross City project (St. Stephen's Green to Broombridge Line), in accordance with the terms of the Supplementary Development Contribution Scheme made by the planning authority under section 49 of the Planning and Development Act 2000, as amended. The contribution shall be paid prior to commencement of development or in such phased payments as the planning authority may facilitate and shall be subject to any applicable indexation provisions of the Scheme at the time of payment. Details of the application of the terms of the Scheme shall be agreed between the planning authority and

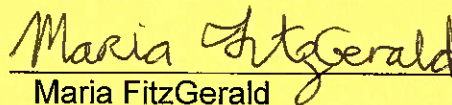

the developer or, in default of such agreement, the matter shall be referred to An Bord Pleanála to determine the proper application of the terms of the Scheme.

Reason: It is a requirement of the Planning and Development Act 2000, as amended, that a condition requiring a contribution in accordance with the Supplementary Development Contribution Scheme made under section 49 of the Act be applied to the permission.

Note: In deciding to omit Condition 2 (c) to reposition the proposed bathrooms as recommended by the Planning Authority and the Planning Inspector, the board considered that the impact of this condition would result in a substandard layout for the proposed apartments and furthermore considered that, notwithstanding the omission of this condition, the legibility of the floor plan/chimney breast of the original structure was generally retained.

Copy of Board Direction to issue with Board order.
