The submissions on this file and the Inspector's report were considered at a Board meeting held on 15/03/2022.

The Board decided to refuse permission, generally in accordance with the Inspector's recommendation, for the following reasons and considerations.

Reasons and Considerations

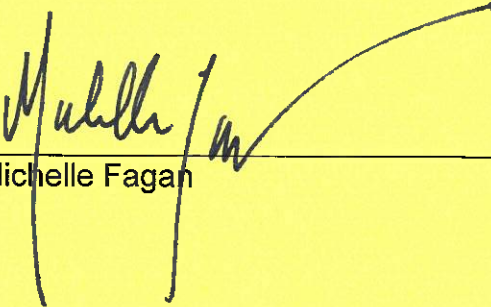

Having regard to:

- The location of the site within a rural area under urban influence in accordance with Sustainable Rural Housing Guidelines for Planning Authorities published by the Department of the Environment, Heritage and Local Government 2005
- National Policy Objective 19 of the National Planning Framework (February 2018) which, for rural areas under urban influence, seeks to facilitate the provision of single housing in the countryside based on the core consideration of demonstrable economic or social need to live in a rural area, having regard to the viability or smaller towns and rural settlements
- The location of the proposed development on land within the greenbelt zoning objective under the Fingal Development plan 2017-2023
- The rural settlement strategy provisions of the Fingal County Development Plan 2017-2023, specifically paragraph (iii) of Table RF03 in Objective RF39, which applies to a person who is an immediate member of a rural family who has not been granted permission for a rural dwelling, since the 19th October 1999, and is considered to have a need to reside adjacent to the family home by reason of that person's exceptional health circumstances

It is considered that the applicants do not come within the scope of either the economic or social housing need criteria set out in the overarching National Guidelines or the relevant Local Housing Need Qualifying Criteria of the Development Plan.

The proposed development, in the absence of any identified locally based need for the house at this location, would result in a haphazard and unsustainable form of development in an unserviced area, would contribute to the encroachment of random rural development in the area and would mitigate against the preservation of the rural environment and the efficient provision of public services and infrastructure and undermine the settlement strategy set out in the development plan. The proposed development would, therefore, be contrary to the proper planning and sustainable development of the area.
