ABP-311872-21

The submissions on this file and the Inspector's report were considered at a Board meeting held on 01/02/2023.

The Board decided to grant permission generally in accordance with the Inspector's recommendation, for the following reasons and considerations, and subject to the following conditions.

Reasons and Considerations

Having regard to the location of the site within Skibbereen town centre, the provisions of the Cork County Development Plan 2022-2028, including in particular Objective SK-X-01 which seeks to support the redevelopment of this site for a variety of mixed uses, including those that are proposed in the change of use development, involving the re-use of the existing buildings and preservation of the prominent setting of this site, to the wider policies and objectives of the current Development Plan for the area which seek to reuse vacant properties and to the layout, scale and design of the proposed development, it is considered that, subject to compliance with the conditions set out below, the proposed development would be in accordance with the provisions of the Cork County Development Plan 2022 - 2028, would not adversely impact on the setting of adjoining protected structures, and would be acceptable in terms of pedestrian, cyclist and traffic safety. The proposed development would, therefore, be in accordance with the proper planning and sustainable development of the area.

Conditions

1. The development shall be carried out and completed in accordance with the plans and particulars lodged with the application, except as may otherwise be required in order to comply with the following conditions. Where such conditions require details to be agreed with the planning authority, the developer shall agree such details in writing with the planning authority prior to commencement of development and the development shall be carried out and completed in accordance with the agreed particulars.

Reason: In the interest of clarity.

2. Details showing the provision of 20 number sheltered bicycle spaces on the site shall be submitted to, and agreed in writing with, the planning authority prior to commencement of development.

Reason: In the interest of encouraging the use of sustainable modes of transport.

3. Prior to the opening of the development, a Mobility Management Strategy shall be submitted to, and agreed in writing with, the planning authority. This shall provide for incentives to encourage the use of public transport, cycling, walking and car-pooling by staff employed in the development and to reduce and regulate the extent of parking. The mobility strategy shall be prepared and implemented by the management company for all units within the development.

Reason: In the interest of encouraging the use of sustainable modes of transport.

4. Water supply and drainage arrangements within the specific site to which the change of use development is proposed, including the attenuation and disposal

of surface water, shall comply with the requirements of the planning authority for such works and services.

Reason: In the interest of public health.

5. The developer shall enter into water and/or wastewater connection agreement(s) with Irish Water prior to the commencement of development, if required.

Reason: In the interest of public health.

6. The site shall be landscaped in accordance with a comprehensive scheme of landscaping, details of which shall be submitted to, and agreed in writing with, the planning authority prior to commencement of development. This scheme shall include the following:

- (a) Contoured drawings to scale of not less than [1:500] showing –
 - (i) a survey of all existing trees and hedging plants on the site, their variety, size, age and condition, together with proposals for their conservation or removal, and
 - (ii) any hard landscaping works, including car parking layout, enclosed areas, lighting and outdoor seating, specifying surfacing materials.
- (b) Specifications for mounding, levelling, cultivation and other operations associated with plant and grass establishment.
- (c) A timescale for implementation, which shall provide for the planting to be completed before the buildings are first made available for occupation.

Any plants which die, are removed or become seriously damaged or diseased, within a period of five years from the completion of the development, shall be replaced within the next planting season with others of similar size and species, unless otherwise agreed in writing with the planning authority.

Reason: In order to screen the development and assimilate it into the surrounding rural landscape, in the interest of visual amenity.

7. Site development and building works shall be carried out only between the hours of 0700 and 1900 from Mondays to Fridays inclusive, between 0800 and 1400 hours on Saturdays and not at all on Sundays and public holidays. Deviation from these times will only be allowed in exceptional circumstances where prior written approval has been received from the planning authority.

Reason: In order to safeguard the residential amenities of property in the vicinity.

8. A plan containing details for the management of waste (and, in particular, recyclable materials) within the development, including the provision of facilities for the storage, separation and collection of the waste and recyclable materials shall be submitted to, and agreed in writing with, the planning authority prior to commencement of development. Thereafter, the waste shall be managed in accordance with the agreed plan.

Reason: To provide for the appropriate management of waste and, in particular recyclable materials, in the interest of protecting the environment.

9. The developer shall pay to the planning authority a financial contribution in respect of public infrastructure and facilities benefiting development in the area

of the planning authority that is provided or intended to be provided by or on behalf of the authority in accordance with the terms of the Development Contribution Scheme made under section 48 of the Planning and Development Act 2000, as amended, which may allow for the payment of a reduced contribution or no contribution in certain circumstances, in accordance with the provisions of the scheme. The contribution shall be paid prior to commencement of development or in such phased payments as the planning authority may facilitate and shall be subject to any applicable indexation provisions of the Scheme at the time of payment. Details of the application of the terms of the Scheme shall be agreed between the planning authority and the developer or, in default of such agreement, the matter shall be referred to An Bord Pleanála to determine the proper application of the terms of the Scheme.

Reason: It is considered reasonable that the payment of a contribution, in accordance with the Development Contribution Scheme made under section 48 of the Act, should be made in respect of public infrastructure and facilities benefiting development in the area of the planning authority and that is provided, or that is intended will be provided, by or on behalf of the local authority.

Board Member

Patricia Calleary
