ABP-312128-21

The submissions on this file and the Inspector's report were considered at a Board meeting held on 11/05/2023.

The Board decided to grant permission generally in accordance with the Inspector's recommendation, for the following reasons and considerations, and subject to the following conditions.

Reasons and Considerations

Having regard to the designation of Duncannon as a Level 4 Village in the Wexford County Council Development Plan 2022-2028 and the proximity of the site to the village centre and associated communities facilities including the national school and the church, it is considered that, subject to compliance with the conditions set out below, the proposed development would be acceptable in terms of the policy requirements of the development plan, would not seriously injure the visual amenities of the area and would not be prejudicial to public health. The proposed development would, therefore, be in accordance with the proper planning and sustainable development of the area.

Appropriate Assessment

The Board completed an Appropriate Assessment screening exercise in relation to the potential effects of the proposed development on designated European Sites, taking into account the nature, scale and location of the proposed development, the Appropriate Assessment Screening submitted with the application, the Inspector's report, and submissions on file. In completing the screening exercise, the Board adopted the report of the Inspector dated 3rd March 2023 and concluded that, by itself or in combination with other

development in the vicinity, the proposed development would not be likely to have a significant effect on any European Site in view of the conservation objectives of such sites.

Conditions

1. The development shall be carried out and completed in accordance with the plans and particulars lodged with the application, except as may otherwise be required in order to comply with the following conditions. Where such conditions require details to be agreed with the planning authority, the developer shall agree such details in writing with the planning authority prior to commencement of development and the development shall be carried out and completed in accordance with the agreed particulars.

Reason: In the interest of clarity.

2. Details of the materials, colours and textures of all the external finishes to the proposed dwelling shall be submitted to, and agreed in writing with, the planning authority prior to commencement of development. Roof colour shall be blue-black, black, dark brown or dark grey in colour only unless otherwise agreed in writing with the Planning Authority prior to commencement of development.

Reason: In the interest of visual amenity.

3. The site shall be landscaped using only indigenous deciduous trees and hedging species in accordance with details which shall be submitted to and

agreed in writing with the planning authority prior to commencement of development. This scheme shall include the following:

- a) Retention of trees and hedges as indicated in the submitted site layout plan on 29th September 2021 and measures to ensure same,
- b) The establishment of a hedgerow along all boundaries.
- c) Any plants which die or are removed or become seriously damaged or diseased within a period of 5 years of the completion of the development shall be replaced within the next planting season with others of a similar size and species, unless otherwise agreed in writing with the planning authority.

Reason: In order to screen the development and assimilate it into the surrounding landscape in the interest of visual amenity.

4.

- (a) The treatment plant and polishing filter shall be located, constructed and maintained in accordance with requirements of the document entitled "Code of Practice - Wastewater Treatment and Disposal Systems Serving Single Houses (p.e. ≤ 10)" – Environmental Protection Agency, 2021. Details showing compliance with this requirement shall be submitted to and agreed in writing with the planning authority prior to commencement of development.
- (b) Certification by the system manufacturer that the system has been properly installed shall be submitted to the planning authority within four weeks of the installation of the system.

- (c) A maintenance contract for the treatment system shall be entered into and paid in advance for a minimum period of five years from the first occupancy of the dwellinghouse and thereafter shall be kept in place at all times. Signed and dated copies of the contract shall be submitted to, and agreed in writing with, the planning authority within four weeks of the installation.

- (d) Surface water soakways shall be located such that the drainage from the dwelling and paved areas of the site shall be diverted away from the location of the polishing filter.

- (e) Within three months of the first occupation of the dwelling, the developer shall submit a report from a suitably qualified person with professional indemnity insurance certifying that the proprietary effluent treatment system has been installed and commissioned in accordance with the approved details and is working in a satisfactory manner and that the polishing filter is constructed in accordance with the standards set out in the EPA document.

Reason: In the interests of public safety and residential amenity.

5. Water supply and disposal of surface water shall comply with the requirements of the planning authority for such works and services.

Reason: In the interest of public health.

6. Prior to commencement of development, the developer shall enter into water and/or wastewater connection agreement(s) with Irish Water.

Reason: In the interest of public health.

7. The developer shall pay to the planning authority a financial contribution in respect of public infrastructure and facilities benefiting development in the area of the planning authority that is provided or intended to be provided by or on behalf of the authority in accordance with the terms of the Development Contribution Scheme made under section 48 of the Planning and Development Act 2000, as amended. The contribution shall be paid prior to commencement of development or in such phased payments as the planning authority may facilitate and shall be subject to any applicable indexation provisions of the Scheme at the time of payment. Details of the application of the terms of the Scheme shall be agreed between the planning authority and the developer or, in default of such agreement, the matter shall be referred to An Bord Pleanála to determine the proper application of the terms of the Scheme.

Reason: It is a requirement of the Planning and Development Act 2000, as amended, that a condition requiring a contribution in accordance with the Development Contribution Scheme made under section 48 of the Act be applied to the permission.

Board Member

Mary Henchy
