Board Direction
BD-010977-22
ABP-312893-22

The submissions on this file and the Inspector's report were considered at a Board meeting held on 12/07/2022.

The Board decided to grant permission generally in accordance with the Inspector's recommendation, for the following reasons and considerations, and subject to the following conditions.

Reasons and Considerations

In coming to its decision, the Board had regard to the following:

- (a) the location of the site in the established urban area of Cork in an area zoned for residential development;
- (b) the policies and objectives of Cork County Development Plan 2014;
- (c) The Rebuilding Ireland Action Plan for Housing and Homelessness 2016 and Housing for All – A New Housing Plan for Ireland;
- (d) The Guidelines for Sustainable Residential Developments in Urban Areas and the accompanying Urban Design Manual – a Best Practice Guide, issued by the Department of the Environment, Heritage and Local Government in May 2009;
- (e) Urban Development and Building Heights Guidelines for Planning Authorities, prepared by the Department of Housing, Planning and Local Government in December 2018;
- (f) The Sustainable Urban Housing: Design Standards for New Apartments issued by the Department of the Environment, Community and Local Government 2020;

- (g) The Architectural Heritage Protection Guidelines for Planning Authorities;
- (h) Design Manual for Urban Roads and Streets (DMURS) issued by the Department of Transport, Tourism and Sport and the Department of the Environment, Community and Local Government in March 2013;
- (i) The nature, scale and design of the proposed development and the availability in the area of public transport and water services infrastructure;
- (j) The pattern of existing and permitted development in the area;
- (k) The planning history of the site and area;
- (l) The submitted NIS and potential effect upon European sites;
- (m) Section 37(b)(2) of the Planning and Development Act 2000, as amended, whereby the Board is not precluded from granting permission for a development which materially contravenes a Development Plan;
- (n) The submissions and observations received;
- (o) The Chief Executive Report from the Planning Authority and specifically the recommended reasons for refusal; and
- (p) The report of the inspector.

The Board considered that, subject to compliance with the conditions set out below, the proposed development would not seriously injure the residential or visual amenities of the area or of property in the vicinity, would be appropriate in context of surrounding uses and would otherwise be acceptable in terms of pedestrian and traffic safety and convenience. The proposed development would, therefore, be in accordance with the proper planning and sustainable development of the area.

Appropriate Assessment: Stage 1

The Board completed an Appropriate Assessment screening exercise in relation to the potential effects of the proposed development on designated European Sites, taking into account the nature, scale and location of the proposed development within a zoned and serviced urban area, the Natura Impact Statement Report

submitted with the application, the Inspector's report, and submissions on file. In completing the screening exercise, the Board adopted the report of the Inspector and concluded that, by itself or in combination with other development in the vicinity, the proposed development would not be likely to have an adverse effect on any European Site in view of the conservation objectives of such sites, other than Cork Harbour SPA, which is a European site where the likelihood of adverse effects could not be ruled out.

Appropriate Assessment: Stage 2

The Board considered the Natura Impact Statement and all other relevant submissions on the file and carried out an Appropriate Assessment of the implications of the proposed development on Cork Harbour SPA, in view of the sites conservation objectives. The Board considered that the information before it was adequate to allow the carrying out of an Appropriate Assessment.

In completing the appropriate assessment, the Board considered, in particular, the following:

- a) the site-specific conservation objectives for the European site,
- b) the likely direct and indirect impacts arising from the proposed development both individually or in combination with other plans or projects, and in particular the risk of impacts on water quality,
- c) the mitigation measures which are included as part of the current proposal.

In completing the Appropriate Assessment, the Board accepted and adopted the Appropriate Assessment carried out in the Inspector's report in respect of the potential effects of the proposed development on the aforementioned European Site, having regard to the site's conservation objectives.

In overall conclusion, the Board was satisfied that the proposed development, by itself or in combination with other plans or projects, would not adversely affect the integrity of the European Site in view of the site's conservation objectives. This conclusion is based on a complete assessment of all aspects of the proposed project and there is no reasonable scientific doubt as to the absence of adverse effects.

This conclusion is based on the measures identified to control the quality of surface water discharges which provide for the interception of silt and other contaminants prior to discharge from the site during construction and operational phases.

Environmental Impact Assessment Screening

The Board completed an environmental impact assessment screening of the proposed development and considered that the Environment Report submitted by the applicant, identifies and describes adequately the direct, indirect, secondary, and cumulative effects of the proposed development on the environment.

Having regard to: -

(a) the nature and scale of the proposed development, which is below the threshold in respect of Class 10(iv) of Part 2 of Schedule 5 of the Planning and Development Regulations 2001, as amended.

(b) the location of the site on lands zoned residential under the Blarney and Macroom Local Area Plan where residential and creche are permitted uses.

(c) The pattern of development in surrounding area.

(d) The availability of mains water and wastewater services to serve the proposed development, via extension of the network.

(e) the location of the development outside of any sensitive location specified in article 299(C)(1)(v) of the Planning and Development Regulations 2001 (as amended).

(f) The guidance set out in the "Environmental Impact Assessment (EIA) Guidance for Consent Authorities regarding Sub-threshold Development", issued by the Department of the Environment, Heritage and Local Government (2003).

(f) The criteria set out in Schedule 7 of the Planning and Development Regulations 2001 (as amended); and

(g) The features and measures proposed by the applicant envisaged to avoid or prevent what might otherwise be significant effects on the environment, including measures identified in the Natura Impact Statement, Ecological Impact Assessment,

Construction and Environmental Management Plan, Transport Assessment Report, Engineering Services Report, and SUDS Strategy Report.

The Board concluded that, by reason of the nature, scale and location of the subject site, the proposed development would not be likely to have significant effects on the environment. The Board decided, therefore, that an environmental impact assessment report for the proposed development was not necessary in this case.

Conclusions on Proper Planning and Sustainable Development

The Board considered that, subject to compliance with the conditions set out below, that the proposed development would constitute an acceptable quantum and density of development in this accessible urban location, would not seriously injure the residential or visual amenities of the area, would be acceptable in terms of urban design, height, scale, mass, and would be acceptable in terms of pedestrian and traffic safety. The proposed development would, therefore, be in accordance with the proper planning and sustainable development of the area. In coming to this conclusion, specific regard was had to the Chief Executive Report from the Planning Authority and particularly the recommended reasons for refusal, which were addressed in detail in the Inspector's Report and considered in full by the Board.

The Board considered that, while a grant of permission for the proposed Strategic Housing Development would not materially contravene a zoning objective of the statutory plans for the area, a grant of permission could materially contravene The Cork County Development Plan 2014 and Blarney and Macroom Local Area Plan 2017 in relation to the density. Specifically, in relation to the site-specific zoning objective BL-R-03 under the Local Area Plan, for medium B density residential development. A medium B density is defined in objective HOU 4-1 of the Cork County Development Plan as being within the range of 12-25 units/hectare. The proposed development has a density of 35 units/hectare.

The Board considers that, having regard to the provisions of section 37(2) of the Planning and Development Act 2000, as amended, the grant of permission in material contravention of the County Development and Local Area Plans would be justified for the following reasons and considerations.

In relation to section 37(2)(b) (i) of the Planning and Development Act 2000 (as amended):

The strategic nature of the site for the delivery of housing in Blarney, in light of the characteristics of the site and the context of national planning policy documents and guidelines which promote compact growth. Including Rebuilding Ireland, An Action Plan for Housing and Homelessness and Project Ireland 2040 – National Planning Framework and Equal Housing for All.

In relation to section 37(2)(b) (iii) of the Planning and Development Act 2000 (as amended):

Permission for the development should be granted having regard to Section 28 guidelines, with specific regard to the conformity of the proposed development density with the standards set down for 'edge of centre sites' in the Sustainable Residential Development Guidelines (Section 6.11) and within the range of 20-35 dwellings per hectare. The subject site also demonstrates the characteristics of a Peripheral and/or Less Accessible Urban Location under the Apartment Guidelines, where densities of less than 45 units per hectare are considered to be acceptable, being situated a short walking distance to the centre of Blarney and bus stops. National planning policy and guidelines also promote increased housing delivery on appropriate sites, including Rebuilding Ireland, An Action Plan for Housing and Homelessness and Project Ireland 2040 – National Planning Framework and specifically NPO 1b and NPO 3a.

Conditions

1. The development shall be carried out and completed in accordance with the plans and particulars lodged with the application, except as may otherwise be required in order to comply with the following conditions. Where such conditions require details to be agreed with the planning authority, the developer shall agree such details in writing with the planning authority prior to commencement of development, or as otherwise stipulated by conditions hereunder, and the development shall be carried out and completed in accordance with the agreed particulars. In default of agreement the matter(s) in dispute shall be referred to An Bord Pleanála for determination.

Reason: In the interest of clarity.

2. Apartment Blocks 1 and 2 shall be omitted and any proposed development of this portion of the site for residential use shall be the subject of a separate application for planning permission.

Reason: It is considered that the proposed internal layout and associated aspect of apartment numbers 2, 7, 12, 17, 22 and 27 and the positioning of the blocks proximate to the southern boundary of the site, would lead to a substandard form of residential amenity for future occupants.

3. The mitigation measures contained in the Natura Impact Statement which was submitted with the application shall be implemented in full.

Reason: In the interest of clarity and the proper planning and sustainable development of the area and to ensure the protection of the Cork Harbour SPA.

4. The mitigation measures contained in the Ecological Impact Assessment which was submitted with the application shall be implemented in full.

Reason: In the interest of clarity and the proper planning and sustainable development of the area and ensure protection of the receiving environment.

5. Provide to the commencement of development full details as follows shall be submitted to and agreed in writing with the planning authority:
- (a) The division of the private garden area for apartment building types 3D and 2E between the individual units within each block;
 - (c) Complete specification of the proposed cut-off swale along the northern boundary to conform with the Planning Authority standards for such work;
 - (d) Complete specification of works relating to the new culvert, including maintenance details;
 - (e) Complete specification of attenuation details to conform with the Planning Authority standards for such work;
 - (f) Complete specification of pedestrian, road and surface works and signage along Sunberry Drive and at/in the vicinity of the junction of Sunberry Drive and the R617.

Reason: In the interests of residential amenity, traffic and pedestrian safety.

6. The site shall be landscaped (and earthworks carried out) in accordance with the detailed comprehensive scheme of landscaping, which accompanied the application submitted, unless otherwise agreed in writing with, the planning authority prior to commencement of development.

Reason: In the interest of residential and visual amenity.

7. The areas of public open space and the northern portion of the site as shown on the lodged plans shall be reserved for such use and shall be soiled, seeded, and landscaped in accordance with the landscape scheme submitted to An Bord Pleanála with this application, unless otherwise agreed in writing with the planning authority. This work shall be completed before any of the dwellings are made available for occupation and shall be maintained as public open space by the developer until taken in charge by the local authority or management company.

Reason: In order to ensure the satisfactory development of the public open space areas, and their continued use for this purpose.

8. Full details of a schedule of tree planting in the form of groups (of appropriate species) within the wildflower meadow area within the northern part of the overall site, shall be submitted to, and agreed in writing with, the planning authority, prior to commencement of development.

Reason: In the interest of landscape and visual amenity.

9. (a) Prior to commencement of development, all trees, groups of trees, hedging and shrubs which are to be retained shall be enclosed within stout fences not less than 1.5 metres in height. This protective fencing shall enclose an area covered by the crown spread of the branches, or at minimum a radius of two metres from the trunk of the tree or the centre of the shrub, and to a distance of two metres on each side of the hedge for its full length, and shall be maintained until the development has been completed.
(b) No construction equipment, machinery or materials shall be brought onto the site for the purpose of the development until all the trees which are to be retained have been protected by this fencing. No work is shall be carried out within the area enclosed by the fencing and, in particular, there shall be no parking of vehicles, placing of site huts, storage compounds or topsoil heaps, storage of oil, chemicals or other substances, and no lighting of fires, over the root spread of any tree to be retained.
(c) Excavations in preparation for foundations and drainage, and all works above ground level in the immediate vicinity of any tree, shall be carried out under the supervision of a specialist arborist, in a manner that will ensure that all major roots are protected and all branches are retained.
(d) No trench, embankment or pipe run shall be located within three metres of any trees, shrubs or hedging which are to be retained on the site.

Reason: To protect trees and planting during the construction period in the interest of visual amenity.

10. Details of the materials, colours and textures of all the external finishes to the proposed dwellings/buildings shall be as submitted with the application, unless otherwise agreed in writing with, the planning authority prior to commencement of development. In default of agreement the matter(s) in dispute shall be referred to An Bord Pleanála for determination.

Reason: In the interest of visual amenity.

11. Proposals for an estate/street name, house numbering scheme and associated signage shall be submitted to, and agreed in writing with, the planning authority prior to commencement of development. Thereafter, all estate and street signs, and house numbers, shall be provided in accordance with the agreed scheme. The proposed name(s) shall be based on local historical or topographical features, or other alternatives acceptable to the planning authority. No advertisements/marketing signage relating to the name(s) of the development shall be erected until the developer has obtained the planning authority's written agreement to the proposed name(s).

Reason: In the interest of urban legibility and to ensure the use of locally appropriate place names for new residential areas.

12. All service cables associated with the proposed development (such as electrical, telecommunications and communal television) shall be located underground. Ducting shall be provided by the developer to facilitate the provision of broadband infrastructure within the proposed development.

Reason: In the interests of visual and residential amenity.

13. Prior to the commencement of any house or duplex unit in the development as permitted, the applicant or any person with an interest in the land shall enter into an agreement with the planning authority (such agreement must specify the number and location of each house or duplex unit), pursuant to Section 47 of the Planning and Development Act 2000, that restricts all houses and duplex units permitted, to first occupation by individual purchasers i.e. those not being a corporate entity, and/or by those eligible for

the occupation of social and/or affordable housing, including cost rental housing.

Reason: To restrict new housing development to use by persons of a particular class or description in order to ensure an adequate choice and supply of housing, including affordable housing, in the common good.

14. Prior to commencement of development, the applicant or other person with an interest in the land to which the application relates shall enter into an agreement in writing with the planning authority in relation to the provision of housing in accordance with the requirements of section 94(4) and section 96(2) and (3) (Part V) of the Planning and Development Act 2000, as amended, unless an exemption certificate shall have been applied for and been granted under section 97 of the Act, as amended. Where such an agreement is not reached within eight weeks from the date of this order, the matter in dispute (other than a matter to which section 96(7) applies) may be referred by the planning authority or any other prospective party to the agreement to An Bord Pleanála for determination.

Reason: To comply with the requirements of Part V of the Planning and Development Act 2000, as amended, and of the housing strategy in the development plan of the area.

15. The developer shall enter into water and wastewater connection agreement(s) with Irish Water, prior to commencement of development.

Reason: In the interest of public health.

16. The internal road network serving the proposed development, including turning bays, junctions, parking areas, footpaths and kerbs, and the underground car park shall be in accordance with the detailed construction standards of the planning authority for such works and design standards

outlined in DMURS. In default of agreement the matter(s) in dispute shall be referred to An Bord Pleanála for determination.

Reason: In the interest of amenity and of traffic and pedestrian safety.

17. A minimum of 10% of all communal car parking spaces should be provided with functioning EV charging stations/points, and ducting shall be provided for all remaining car parking spaces, including in-curtilage spaces, facilitating the installation of EV charging points/stations at a later date. Where proposals relating to the installation of EV ducting and charging stations/points has not been submitted with the application, in accordance with the above noted requirements, such proposals shall be submitted and agreed in writing with the Planning Authority prior to the occupation of the development.

Reason: To provide for and/or future proof the development such as would facilitate the use of Electric Vehicles.

18. Electric charging facilities shall be provided for cycle parking and proposals shall be submitted to and agreed in writing with the planning authority prior to the occupation of the development.

Reason: In the interest of sustainable transportation.

19. (a) The car parking facilities hereby permitted shall be reserved solely to serve the proposed development. Residential spaces shall not be utilised for any other purpose, including for use in association with any other uses of the development hereby permitted, unless the subject of a separate grant of planning permission.

(b) Prior to the occupation of the development, a Parking Management Plan shall be prepared for the development and shall be submitted to and agreed in writing with the planning authority. This plan shall provide for the permanent

retention of the designated residential parking spaces and shall indicate how these and other spaces within the development shall be assigned, segregated by use and how the car park shall be continually managed.

Reason: To ensure that adequate parking facilities are permanently available to serve the proposed residential units (and the remaining development).

20. The management and maintenance of the proposed development following its completion shall be the responsibility of a legally constituted management company, or by the local authority in the event of the development being taken in charge. Detailed proposals in this regard shall be submitted to, and agreed in writing with, the planning authority prior to occupation of the development.

Reason: To ensure the satisfactory completion and maintenance of this development.

21. Drainage arrangements including the attenuation and disposal of surface water, shall comply with the requirements of the planning authority for such works and services.

Reason: In the interest of public health.

22. The development shall be carried out on a phased basis, in accordance with a phasing scheme submitted with the planning application, (unless otherwise agreed in writing with the planning authority/An Bord Pleanála prior to commencement of any development.)

Reason: To ensure the timely provision of services, for the benefit of the occupants of the proposed dwellings.

23. Public lighting shall be provided in accordance with a scheme, which shall include lighting along pedestrian routes through open spaces details of which shall be submitted to, and agreed in writing with, the planning authority prior to commencement of development/installation of lighting. Such lighting shall be provided prior to the making available for occupation of any house, and should be reflect recommendations in the Ecological Impact Assessment with

the application.

Reason: In the interests of amenity and public safety.

24. The construction of the development shall be managed in accordance with a Construction Management Plan, which shall be submitted to, and agreed in writing with, the planning authority prior to commencement of development. This plan shall provide details of intended construction practice for the development, including, noise management measures and off-site disposal of construction/demolition waste.

Reason: In the interests of public safety and residential amenity.

25. Construction and demolition waste shall be managed in accordance with a construction waste and demolition management plan, which shall be submitted to, and agreed in writing with, the planning authority prior to commencement of development. This plan shall be prepared in accordance with the "Best Practice Guidelines on the Preparation of Waste Management Plans for Construction and Demolition Projects", published by the Department of the Environment, Heritage and Local Government in July 2006. The plan shall include details of waste to be generated during site clearance and construction phases, and details of the methods and locations to be employed for the prevention, minimisation, recovery and disposal of this material in accordance with the provision of the Waste Management Plan for the Region in which the site is situated.

Reason: In the interest of sustainable waste management.

26. Site development and building works shall be carried out only between the hours of 0700 to 1900 Mondays to Fridays inclusive, between the hours of 0800 to 1400 Saturdays and not at all on Sundays and public holidays. Deviation from these times will only be allowed in exceptional circumstances where prior written approval has been received from the planning authority.

Reason: In order to safeguard the residential amenities of property in the vicinity.

27. The developer shall facilitate the preservation, recording and protection of archaeological materials or features that may exist within the site. In this regard, the developer shall -

(a) notify the planning authority in writing at least four weeks prior to the commencement of any site operation (including hydrological and geotechnical investigations) relating to the proposed development,

(b) employ a suitably-qualified archaeologist who shall monitor all site investigations and other excavation works, and

(c) provide arrangements, acceptable to the planning authority, for the recording and for the removal of any archaeological material which the authority considers appropriate to remove.

In default of agreement on any of these requirements, the matter shall be referred to An Bord Pleanála for determination.

Reason: In order to conserve the archaeological heritage of the site and to secure the preservation and protection of any remains that may exist within the site.

28. Prior to commencement of development, the developer shall lodge with the planning authority a cash deposit, a bond of an insurance company, or other security to secure the provision and satisfactory completion and maintenance until taken in charge by the local authority of roads, footpaths, watermains, drains, public open space and other services required in connection with the development, coupled with an agreement empowering the local authority to apply such security or part thereof to the satisfactory completion or maintenance of any part of the development. The form and amount of the security shall be as agreed between the planning authority and the developer or, in default of agreement, shall be referred to An Bord Pleanála for determination.

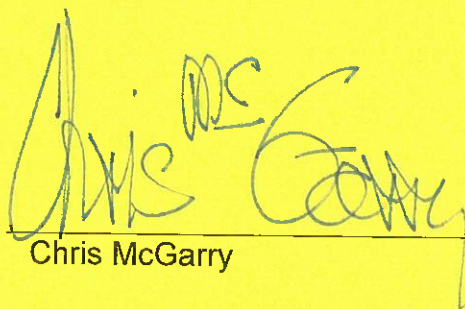

Reason: To ensure the satisfactory completion and maintenance of the development until taken in charge.

29. The developer shall pay to the planning authority a financial contribution in respect of public infrastructure and facilities benefiting development in the area of the planning authority that is provided or intended to be provided by or on behalf of the authority in accordance with the terms of the Development Contribution Scheme made under section 48 of the Planning and Development Act 2000, as amended. The contribution shall be paid prior to commencement of development or in such phased payments as the planning authority may facilitate and shall be subject to any applicable indexation provisions of the Scheme at the time of payment. Details of the application of the terms of the Scheme shall be agreed between the planning authority and the developer or, in default of such agreement, the matter shall be referred to An Bord Pleanála to determine the proper application of the terms of the Scheme.

Reason: It is a requirement of the Planning and Development Act 2000, as amended, that a condition requiring a contribution in accordance with the Development Contribution Scheme made under section 48 of the Act be applied to the permission.

Note: the Board considered the totality of the documentation submitted with the application, including the commentary of the planning authority and the description of the applicant as to the ratio of dual aspect apartments within Blocks 1 and 2, as well as the assessment of this issue by the Inspector. The Board determined that a significant number of the apartments are in effect single aspect and furthermore six of these are north facing. Notwithstanding that these apartments face towards an area of open space, it was considered by the Board that as a design exercise on a greenfield site these apartments would constitute a substandard form of residential amenity at this location, where alternative improved options could be achieved. In addition, the Board considered that the positioning of the apartment blocks proximate to the southern site boundary and to the neighbouring treeline, meant that amenity within some of the apartments, including a number that are in effect, single aspect apartments, would be sub-optimal. In this regard, it was determined that these apartment blocks should be omitted from the permitted scheme. However, the siting of some form of residential development at this portion of the site is considered by the Board to be acceptable in principle, subject to the full scrutiny of a separate planning application exercise.

Board Member

Chris McGarry
