The submissions on this file and the Inspector's report were considered at a Board meeting held on 29/05/2024.

The Board concurred with the Inspector that the development is a project for the purposes of the EIA Directive. However, the Board concluded that the proposed development does not fall within a class of development set out in Part 1 or Part 2 of Schedule 5 to the Planning and Development Regulations 2001, as amended, and therefore no preliminary examination, screening for EIA or EIA is required.

The Board decided to grant permission, for the following reasons and considerations, and subject to the following conditions.

Having regard to:

- a) the national strategy regarding the provision of mobile communications services,
- b) the guidelines relating to telecommunications antennae and support structures which were issued by the Department of the Environment and Local Government to planning authorities in July, 1996, as updated by Circular Letter PL/07/12 issued by the Department of the Environment, Community and Local Government on the 19th day of October, 2012,
- c) the policy of the planning authority, as set out in the Cork County Development Plan 2022 – 2028, to support the provision of telecommunications infrastructure, and
- d) the nature and scale of the proposed telecommunications support structure,

it is considered that subject to compliance with the conditions set out below, the proposed development would not be visually intrusive or seriously injurious to the amenities of the area or the residential amenities of properties in the vicinity, would not be prejudicial to public health and, would be in accordance with the proper planning and sustainable development of the area.

Conditions

1.	<p>The development shall be carried out and completed in accordance with the plans and particulars lodged with the application as amended by the further plans and particulars submitted as amended by correspondence of 19th February 2024, except as may otherwise be required in order to comply with the following conditions. Where such conditions require details to be agreed with the planning authority, the developer shall agree such details in writing with the planning authority prior to commencement of development and the development shall be carried out and completed in accordance with the agreed particulars.</p> <p>Reason: In the interest of clarity</p>
2.	<p>(a) In the event of the proposed structure becoming obsolete and being decommissioned, the developers shall, at their own expense, remove the mast, antenna and ancillary structures and equipment.</p> <p>(b) The site shall be reinstated on removal of the telecommunications structure and ancillary structures. Details relating to the removal and reinstatement shall be submitted to and agreed in writing with the planning authority at least one month before the removal of the telecommunications structure and ancillary structures and the work shall be completed within three months of the planning authority's approval in writing of these details.</p> <p>Reason: In the interest of orderly development.</p>
3.	<p>The transmitter power output, antenna type and mounting configuration shall be in accordance with the details submitted with this application and, notwithstanding the provisions of the Planning and Development</p>

	<p>Regulations 2001, and any statutory provision amending or replacing them, shall not be altered without a prior grant of planning permission.</p> <p>Reason: To clarify the nature and extent of the permitted development to which this permission relates and to facilitate a full assessment of any future alterations</p>
4.	<p>No advertisement or advertisement structure shall be erected or displayed on the proposed structure or its appendages or within the curtilage of the site without a prior grant of planning permission.</p> <p>Reason: In the interest of the visual amenities of the area.</p>
5.	<p>The developer shall pay to the planning authority a financial contribution in respect of public infrastructure and facilities benefiting development in the area of the planning authority that is provided or intended to be provided by or on behalf of the authority in accordance with the terms of the Development Contribution Scheme made under section 48 of the Planning and Development Act 2000, as amended. The contribution shall be paid prior to commencement of development or in such phased payments as the planning authority may facilitate and shall be subject to any applicable indexation provisions of the Scheme at the time of payment. Details of the application of the terms of the Scheme shall be agreed between the planning authority and the developer or, in default of such agreement, the matter shall be referred to An Bord Pleanála to determine the proper application of the terms of the Scheme.</p> <p>Reason: It is a requirement of the Planning and Development Act 2000, as amended, that a condition requiring a contribution in accordance with the Development Contribution Scheme made under section 48 of the Act be applied to the permission</p>

In deciding not to accept the Inspector's recommendation to refuse permission, the Board considered that the mitigation measures proposed by the applicant on the 19th February 2024, gave the Board sufficient comfort that any negative impacts were

necessary for the continued provision of service at this site where an established use is accepted.
