ABP-317795-23

The submissions on this file and the Inspector's report were considered at a Board meeting held on 29/05/2024.

The Board decided to grant permission generally in accordance with the Inspector's recommendation, for the following reasons and considerations, and subject to the following conditions.

Reasons and Considerations

Having regard to the nature of the proposed development which involves the restoration and partial change of use of the Mechanics Institute (Protected Structure RPS Ref 3147), the city centre zoning of the site, the pattern and character of development in the area, it is considered that, subject to compliance with the conditions set out below, the proposed development would respect the protected structure status of the property as well as the conservation status of the wider area in accordance with Objective EH O50 and Objective EH O53 of the Limerick Development Plan 2022-2028, and would not seriously injure the residential amenities of the area. The proposed development would, therefore, be in accordance with the proper planning and sustainable development of the area.

Conditions

1. The development shall be carried out and completed in accordance with the plans and particulars lodged with the application, on the 25th day of May 2023 as may otherwise be required in order to comply with the following conditions. Where such conditions require details to be agreed with the planning authority, the developer shall agree such details in writing with the planning authority prior to commencement of development and the development shall be carried out and completed in accordance with the agreed particulars.

Reason: In the interest of clarity.

2. (a) A conservation expert shall be employed to manage, monitor and implement the works on the site and to ensure adequate protection of the retained and historic fabric during the works. In this regard, all permitted works shall be designed to cause minimum interference to the retained building and facades structure and/or fabric.
- (b) All repair works to the protected structure shall be carried out in accordance with best conservation practice as detailed in the application and the Architectural Heritage Protection Guidelines for Planning Authorities issued by the Department of Arts, Heritage and the Gaeltacht in 2011. The repair works shall retain the maximum amount of surviving historic fabric in situ, including structural elements, plasterwork (plain and decorative) and joinery and shall be designed to cause minimum interference to the building structure and/or fabric. Items that have to be removed for repair shall be recorded prior to removal, catalogued and numbered to allow for authentic re-instatement.
- (c) All existing original features, including interior and exterior fittings/features, joinery, plasterwork, features (including cornices and ceiling mouldings) staircases including balusters, handrail and skirting boards, shall be protected during the course of refurbishment.

Reason: To ensure that the integrity of the retained structures is maintained and that the structures are protected from unnecessary damage or loss of fabric.

3. Prior to commencement of development, detailed structural drawings and a construction methodology statement (including the results of detailed structural surveys of the protected structure and all building facades to be retained) indicating the means proposed to ensure the protection of the structural stability and fabric of all these retained structures shall be submitted to and agreed in writing with the planning authority.

Reason: In the interest of preserving the architectural integrity and heritage value of the retained structures.

4. Site development and building works shall be carried out only between the hours of 0800 to 1900 Mondays to Fridays and between 0800 and 1400 on Saturdays, and not at all on Sundays and public holidays. Deviation from these times will only be allowed in exceptional circumstances where prior written approval has been received from the planning authority.

Reason: In order to safeguard the residential amenities of property in the vicinity.

5. The construction of the development shall be managed in accordance with a Construction Management Plan, which shall be submitted to, and agreed in writing with, the planning authority prior to the commencement of development. This plan shall provide details of intended construction practice for the development, including hours of working, noise management measures and off-site disposal of construction/demolition waste.

Reason: In the interests of public safety and residential amenity.

6. Prior to the commencement of development, the developer or any agent acting on its behalf, shall prepare a Resource Waste Management Plan (RWMP) as set out in the EPA's Best Practice Guidelines for the Preparation of Resource and Waste Management Plans for Construction and Demolition Projects (2021) including demonstration of proposals to adhere to best practice and protocols. The RWMP shall include specific proposals as to how the RWMP will be measured and monitored for effectiveness; these details shall be placed on the file and retained as part of the public record. The RWMP must be submitted to the planning authority for written agreement prior to the commencement of development. All records (including for waste and all

resources) pursuant to the agreed RWMP shall be made available for inspection at the site office at all times.

Reason: In the interest of sustainable waste management.

7. A plan containing details for the management of waste (and, in particular, recyclable materials) within the development, including the provision of facilities for the storage, separation and collection of the waste and, in particular, recyclable materials and for the ongoing operation of these facilities shall be submitted to, and agreed in writing with, the planning authority prior to commencement of development. Thereafter, the waste shall be managed in accordance with the agreed plan.

Reason: In the interest of residential amenity, and to ensure the provision of adequate refuse storage.

8. The hours of operation shall be between 10:00 hours and 16:00 hours Monday to Friday and between 11:00 hours and 13:00 hours on Saturday or otherwise as agreed with the planning authority. Deviation from these times shall only be allowed in exceptional circumstances.

Reason: In the interest of the residential amenities of property in the vicinity.
