ABP-319354-24

The submissions on this file and the Inspector's report were considered at a Board meeting held on 18/12/2024.

The Board decided to grant permission generally in accordance with the Inspector's recommendation, for the following reasons and considerations, and subject to the following conditions.

Reasons and Considerations

Having regard to the policy and objectives as set out in the Tipperary County Development Plan 2022-2028 in respect of rural residential development, the nature, scale and design of the proposed development, and the pattern of existing and permitted development in the area, it is considered that, subject to compliance with the conditions set out below, the proposed development would not seriously injure the residential or visual amenities of the area or of property in the vicinity, would respect the existing visual character of the area, and would be acceptable in terms of traffic safety and convenience. The proposed development would, therefore, be in accordance with the proper planning and sustainable development of the area.

Conditions

1. The proposed development shall be carried out and completed in accordance with the plans and particulars lodged with the application, as amended by further plans and particulars received by the planning authority on the 4th day

of January, 2024 and on the 8th day of February, 2024, except as may otherwise be required in order to comply with the following conditions. Where such conditions require details to be agreed with the planning authority, the developer shall agree such details in writing with the planning authority prior to commencement of development and the proposed development shall be carried out and completed in accordance with the agreed particulars.

Reason: In the interest of clarity.

2. (a) The proposed dwelling, when completed, shall be first occupied as a place of permanent residence by the applicant, members of the applicant's immediate family or their heirs, and shall remain so occupied for a period of at least seven years thereafter unless consent is granted by the planning authority for its occupation by other persons who belong to the same category of housing need as the applicant. Prior to commencement of development, the applicant shall enter into a written agreement with the planning authority under section 47 of the Planning and Development Act 2000, as amended, to this effect.
- (b) Within two months of the occupation of the proposed dwelling, the applicant shall submit to the planning authority a written statement of confirmation of the first occupation of the dwelling in accordance with paragraph (a) and the date of such occupation.

This condition shall not affect the sale of the dwelling by a mortgagee in possession or the occupation of the dwelling by any person deriving title from such a sale.

Reason: To ensure that the proposed house is used to meet the applicant's stated housing needs and that development in this rural area is appropriately restricted to meeting essential local need in the interest of the proper planning and sustainable development of the area.

3. (a) The roadside boundary shall be set back behind the required sight triangle. The sight triangle shall be taken from a point 2.4 metres back from the road edge at the centre of the proposed access to a point as per

depicted on drawings submitted in both directions at the nearside road edge. The sight triangle shall be achieved prior to further construction on site.

- (b) Where the roadside hedge is removed a new roadside boundary hedge shall be constructed. The new roadside boundary shall be composed of an earthen bank to a consolidated height of 1.2 metres that shall be planted with shrubs suitable for hedging and common to the locality (e.g. holly, hawthorn, blackthorn, ash, elder, bramble etc.). All landscaping and planting shall take place in the first planting season following occupation of the dwelling.
- (c) Alternatively, the new front boundary fence shall be of stone and sod, stone-faced masonry or dry stonewall. The stone used shall be indigenous to the area. The wall shall not be more than 1.2 metres in height over road level. A post and rail type fence shall not be permitted.
- (d) The area between the new road fence and the road carriageway shall be trimmed and rolled level with the carriageway, top soiled, seeded with grass and, thereafter, maintained without obstruction, trim and tidy.

Reason: In the interest of traffic safety and in the interest of visual amenity.

- 4. (a) The proposed wastewater treatment and disposal system shall be located, constructed and maintained in accordance with the details submitted to the planning authority and in accordance with the requirements of the document entitled "Code of Practice - Wastewater Treatment and Disposal Systems Serving Single Houses (p.e. ≤ 10)" – Environmental Protection Agency, 2021. Arrangements in relation to the ongoing maintenance of the system shall be submitted to, and agreed in writing with, the planning authority prior to commencement of development.

- (b) Within three months of the first occupation of the dwelling, the developer shall submit a report from a suitably qualified professional with professional indemnity insurance certifying that the proprietary effluent treatment system has been installed and commissioned in accordance with the approved details and is working in a satisfactory manner in accordance with the standards set out in the EPA document.

Reason: In the interest of public health.

- 5. (a) All surface water generated within the site boundaries shall be collected and disposed of within the curtilage of the site. No surface water from roofs, paved areas or otherwise shall discharge onto the public road or adjoining properties.
- (b) The access driveway to the proposed development shall be provided with adequately sized pipes or ducts to ensure that no interference will be caused to existing roadside drainage. Surface water shall be discharged to soakways and/or sustainable urban drainage methods within the site to be agreed in writing with the planning authority.

Reason: In the interest of traffic safety and to prevent pollution.

- 6. Water supply and drainage arrangements, including the attenuation and disposal of surface water, shall comply with the requirements of the planning authority for such works and services.

Reason: In the interest of public health.

- 7. Details of the materials, colours and textures of all the external finishes to the proposed development shall be submitted to, and agreed in writing with, the planning authority prior to commencement of development.

Reason: In the interest of visual amenity.

- 8. All service cables associated with the proposed development (such as electrical, telecommunications and communal television) shall be located

underground. Ducting shall be provided by the developer to facilitate the provision of broadband infrastructure within the proposed development. All existing over ground cables shall be relocated underground as part of the site development works.

Reason: In the interest of visual and residential amenity.

9. The site shall be landscaped in accordance with a comprehensive scheme of landscaping, details of which shall be submitted to, and agreed in writing with, the planning authority prior to commencement of development. This scheme shall include the following:

(a) Specifications for mounding, levelling, cultivation and other operations associated with plant and grass establishment.

(b) Proposals for the protection of all existing and new planting for the duration of construction works on site, together with proposals for adequate protection of new planting from damage until established.

(c) A timescale for implementation, including details of phasing, which shall provide for the planting to be completed before the dwelling is first made available for occupation.

Reason: In order to screen the development and assimilate it into the surrounding urban landscape, in the interest of visual amenity.

10. Site development and building works shall be carried out only between the hours of 0700 to 1900 Mondays to Fridays, inclusive, between 0800 to 1400 hours on Saturdays and not at all on Sundays or public holidays. Deviation from these times shall only be allowed in exceptional circumstances where prior written approval has been received from the planning authority.

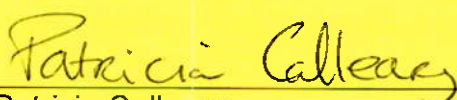

Reason: In order to safeguard the residential amenities of property in the vicinity.

11. The developer shall pay to the planning authority a financial contribution in respect of public infrastructure and facilities benefiting development in the area of the planning authority that is provided or intended to be provided by or on behalf of the authority in accordance with the terms of the Development

Contribution Scheme made under section 48 of the Planning and Development Act 2000, as amended. The contribution shall be paid prior to the commencement of development or in such phased payments as the planning authority may facilitate and shall be subject to any applicable indexation provisions of the Scheme at the time of payment. Details of the application of the terms of the Scheme shall be agreed between the planning authority and the developer or, in default of such agreement, the matter shall be referred to An Bord Pleanála to determine the proper application of the terms of the Scheme.

Reason: It is a requirement of the Planning and Development Act 2000, as amended, that a condition requiring a contribution in accordance with the Development Contribution Scheme made under section 48 of the Act be applied to the permission.
