ABP-320716-24

The submissions on this file and the Inspector's report were considered at a Board meeting held on 11/02/2025.

The Board decided to grant permission generally in accordance with the Inspector's recommendation, for the following reasons and considerations, and subject to the following conditions.

Reasons and Considerations

Having regard to the provisions of the Wexford County Development Plan 2022-2028, the totality of documents submitted, the planning history including permitted development under planning register reference number 2023/1277, and the nature and scale of the development, it is considered that, subject to compliance with the conditions set out below, the proposed development would not seriously injure the residential amenities of the area, would not result in traffic hazard and would not unduly impact the visual amenities of the area. The proposed development would therefore be in accordance with the proper planning and sustainable development of the area.

Conditions

1. The development shall be carried out and completed in accordance with the plans and particulars lodged with the application, except as may otherwise be required in order to comply with the following conditions. Where such

conditions require details to be agreed with the planning authority, the developer shall agree such details in writing with the planning authority prior to commencement of development and the development shall be carried out and completed in accordance with the agreed particulars.

Reason: In the interest of clarity.

2. Apart from any departures specifically authorised by this permission, the development shall comply with the conditions of the parent permission planning register reference number 2023/1277 unless the conditions set out hereunder specify otherwise. This permission shall expire on the same date as the parent permission.

Reason: In the interest of clarity and to ensure that the overall development is carried out in accordance with the previous permission(s).

3. (a) The wastewater treatment system hereby permitted shall be installed in accordance with the recommendations included within the site characterisation report submitted with this application and shall be in accordance with the standards set out in the document entitled "Code of Practice - Domestic Waste Water Treatment Systems (Population Equivalent ≤ 10)" – Environmental Protection Agency, 2021.

(b) Treated effluent from the septic tank/ wastewater treatment system shall be discharged to a percolation area/ polishing filter which shall be provided in accordance with the standards set out in the document entitled "Code of Practice - Domestic Waste Water Treatment Systems (Population Equivalent ≤ 10)" – Environmental Protection Agency, 2021.

(c) Within three months of the first occupation of the dwelling, the developer shall submit a report to the planning authority from a suitably qualified person (with professional indemnity insurance) certifying that the septic tank/ wastewater treatment system and associated works is constructed and operating in accordance with the standards set out in the Environmental Protection Agency document referred to above.

Reason: In the interest of public health and to prevent water pollution.

4. Prior to commencement of works, the developer shall submit to, and agree in writing with the planning authority, a Construction Management Plan, which shall be adhered to during construction. This plan shall provide details of intended construction practice for the development, including hours of working, noise and dust management measures and off-site disposal of construction/demolition waste.

Reason: In the interest of public safety and amenity.

5. The developer shall pay to the planning authority a financial contribution in respect of public infrastructure and facilities benefiting development in the area of the planning authority that is provided or intended to be provided by or on behalf of the authority in accordance with the terms of the Development Contribution Scheme made under section 48 of the Planning and Development Act 2000, as amended. The contribution shall be paid prior to commencement of development or in such phased payments as the planning authority may facilitate and shall be subject to any applicable indexation provisions of the Scheme at the time of payment. Details of the application of the terms of the Scheme shall be agreed between the planning authority and the developer or, in default of such agreement, the matter shall be referred to An Bord Pleanála to determine the proper application of the terms of the Scheme.

Reason: It is a requirement of the Planning and Development Act 2000, as amended, that a condition requiring a contribution in accordance with the

Development Contribution Scheme made under section 48 of the Act be applied to the permission.

6. Final details of the colours and materials of the external plaster, metal cladding and timber cladding shall be submitted to, and agreed in writing with, the planning authority prior to commencement of development.

Reason: In the interest of visual amenity and to ensure an appropriate high standard of development.
