ABP-321391-24

The submissions on this file and the Inspector's report were considered at a Board meeting held on 17/04/2025.

The Board decided to allow the appeal generally in accordance with the Inspector's recommendation, for the following reasons and considerations, and subject to the following conditions.

Reasons and Considerations

Having regard to the provisions of section 254 of the Planning & Development Act, 2000 (as amended); the *Fingal County Development Plan 2023-2029* and the 'Telecommunications Antennae and Support Structures Guidelines for Planning Authorities (1996) (as updated by Circular Letters PL 07/12 and PL11/2020, respectively); it is considered that, subject to compliance with the conditions set out below, the proposed development would not seriously injure the amenities of the area or result in a significant negative residential or visual impact on the surrounding vicinity. The proposed development would, therefore, be in accordance with the proper planning and sustainable development of the area.

Conditions

1. The development shall be carried out and completed in accordance with the plans and particulars lodged with the application except as may otherwise be required in order to comply with the following conditions. Where such conditions require details to be agreed with the planning authority, the developer shall

agree such details in writing with the planning authority prior to commencement of development and the development shall be carried out and completed in accordance with the agreed particulars.

Reason: In the interest of clarity.

2. a) This licence shall apply for a period of three years from the date of this Order. The telecommunications structure and related ancillary structures shall then be removed unless, prior to the end of the period, continuance shall have been granted for their retention for a further period.

-
- b) The site shall be reinstated on removal of the telecommunications structure and ancillary structures. Details relating to the removal and reinstatement shall be submitted to, and agreed in writing with, the planning authority at least one month before the date of expiry of this licence.

Reason: To enable the impact of the development to be re-assessed, having regard to changes in technology and design during the specified period.

-
-
3. In the event of the licence for the telecommunications structure and ancillary structures expiring, the structures shall be removed, and the site shall be reinstated within three months of their removal. Details regarding the removal of the structures and the reinstatement of the site shall be submitted to, and agreed in writing, within one months of the structures ceasing to operate, and the site shall be reinstated in accordance with details submitted to the planning authority at the expense of the operator.

Reason: In the interest of the visual amenities of the area.

Environmental Impact Consideration

The Board considered that the development is a project for the purposes of the Environmental Impact Assessment Directive. However, the Board concluded that the proposed development does not fall within a class of development set out in Part 1 or Part 2 of Schedule 5 to the Planning and Development Regulations 2001, as amended, and therefore no preliminary examination, screening for Environmental Impact Assessment, or Environmental Impact Assessment is required.'

Board Member

Marie O'Connor
