PLANNING AND DEVELOPMENT ACTS 2000 TO 2015

Limerick City and County

Planning Register Reference Number: 15/740

An Bord Pleanála Reference Number: PL 91.245818

APPEAL by Dan, Catherine and James Conway of Raheen, Grange, Kilmallock, County Limerick against the decision made on the 2nd day of November, 2015 by Limerick City and County Council to grant subject to conditions a permission to Tom Casey care of Barry O'Connor of Boherageela, Meanus, Kilmallock, County Limerick in accordance with plans and particulars lodged with the said Council.

PROPOSED DEVELOPMENT: Construction of an agricultural slatted shed, ancillary feed passages and all ancillary site works at Raheen, Grange, Bruff, Kilmallock, County Limerick.

DECISION

GRANT permission for the above proposed development in accordance with the said plans and particulars based on the reasons and considerations under and subject to the conditions set out below.

MATTERS CONSIDERED

In making its decision, the Board had regard to those matters to which, by virtue of the Planning and Development Acts and Regulations made thereunder, it was required to have regard. Such matters included any submissions and observations received by it in accordance with statutory provisions.

REASONS AND CONSIDERATIONS

Having regard to the location of the proposed development within an established farmyard and to its nature and scale, it is considered that, subject to compliance with the conditions set out below, the proposed development would be an appropriate land use in this rural and agricultural area, would not seriously injure the amenities of the area or of property in the vicinity, and would not give rise to risk of pollution. The proposed development would, therefore, be in accordance with the proper planning and sustainable development of the area.

The Board agreed with the Planning Inspector's conclusions that no issues arise in regard to Appropriate Assessment in respect of the proposed development.

CONDITIONS

1. The development shall be carried out and completed in accordance with the plans and particulars lodged with the application, as amended by the further plans and particulars received by An Bord Pleanála on the 21st day of December, 2015, except as may otherwise be required in order to comply with the following conditions. Where such conditions require details to be agreed with the planning authority, the developer shall agree such details in writing with the planning authority prior to commencement of development and the development shall be carried out and completed in accordance with the agreed particulars.

Reason: In the interest of clarity.

2. Water supply and drainage arrangements for the site, including the disposal of surface and soiled water, shall comply with the requirements of the planning authority for such works and services. In this regard-
 - (a) uncontaminated surface water run-off shall be disposed of directly in a sealed system, and
 - (b) all soiled waters shall be directed to a storage tank. Drainage details shall be submitted to, and agreed in writing with, the planning authority prior to commencement of development.

Reason: In the interest of environmental protection and public health.

3. All uncontaminated roof water from buildings and clean yard water shall be separately collected and discharged in a sealed system to existing drains, streams or adequate soakpits and shall not discharge or be allowed to discharge to the foul effluent drains, foul effluent and slurry storage tanks or to the public road.

Reason: In order to ensure that the capacity of effluent and storage tanks is reserved for their specific purposes.

4. All foul effluent and slurry generated by the proposed development and in the farmyard shall be conveyed through properly constructed channels to the proposed and existing storage facilities and no effluent or slurry shall discharge or be allowed to discharge to any stream, river or watercourse, or to the public road.

Reason: In the interest of public health.

5. The slatted shed shall be used only in strict accordance with a management schedule which shall be submitted to, and agreed in writing with, the planning authority prior to commencement of development. The management schedule shall be in accordance with the European Communities (Good Agricultural Practice for Protection of Waters) Regulations, 2014, as amended, and shall provide at least for the following:

- (1) Details of the number and types of animals to be housed.
- (2) The arrangements for the collection, storage and disposal of slurry.
- (3) Arrangements for the cleansing of the buildings and structures (including the public road, where relevant).

Reason: In order to avoid pollution and to protect residential amenity.

6. A minimum of 18 weeks storage shall be provided in the underground storage tank. Prior to commencement of development, details showing how it is intended to comply with this requirement shall be submitted to, and agreed in writing with, the planning authority.

Reason: In the interest of environmental protection and public health.

7. Slurry generated by the proposed development shall be disposed of by spreading on land, or by other means acceptable in writing to the planning authority. The location, rate and time of spreading (including prohibited times for spreading) and the buffer zones to be applied shall be in accordance with the requirements of the European Communities (Good Agricultural Practice for the Protection of Waters) Regulations, 2014, as amended.

Reason: To ensure the satisfactory disposal of waste material, in the interest of amenity, public health and to prevent pollution of watercourses.

8. Prior to commencement of development, details of the materials, colours and textures of all the external finishes to the proposed development shall be submitted to, and agreed in writing with, the planning authority.

Reason: In the interest of orderly development and the visual amenities of the area.
