**Board Order  
PL 10.248773**

---

## **Planning and Development Acts 2000 to 2017**

**Planning Authority: Kilkenny County Council**

**Planning Register Reference Number: 17/231**

**Appeal** by Thomas Deady of Clasharoe, Mooncoin, County Kilkenny against the decision made on the 1<sup>st</sup> day of June, 2017 by Kilkenny County Council to grant subject to conditions a permission to Pat Silke care of Martin Holden of Coolmore, Knocktopher, County Kilkenny in accordance with plans and particulars lodged with the said Council.

**Proposed Development:** Retention of slatted tank and part of construction of shed and permission for completion of shed, including all necessary site works at Clasharoe, Carrigeen, Mooncoin, County Kilkenny.

## **Decision**

**GRANT permission for the above proposed development in accordance with the said plans and particulars based on the reasons and considerations under and subject to the conditions set out below.**

## **Matters Considered**

In making its decision, the Board had regard to those matters to which, by virtue of the Planning and Development Acts and Regulations made thereunder, it was required to have regard. Such matters included any submissions and observations received by it in accordance with statutory provisions.

## **Reasons and Considerations**

Having regard to the historic use of the site for farming and related purposes, it is considered that, subject to compliance with the conditions set out below, the development proposed for retention and the proposed development would not seriously injure the amenities of the area and would not be prejudicial to public health. The development proposed for retention and the proposed development would, therefore, be in accordance with the proper planning and sustainable development of the area.

## **Conditions**

1. The development shall be carried out, completed and retained in accordance with the plans and particulars lodged with the application, except as may otherwise be required in order to comply with the following conditions. Where such conditions require details to be agreed with the planning authority, the developer shall agree such details in writing with the planning authority prior to commencement of development and the development shall be carried out, completed and retained in accordance with the agreed particulars.

**Reason:** In the interest of clarity.

2. The development shall be undertaken in accordance with the requirements of the European Union (Good Agricultural Practice for Protection of Waters) Regulations, 2014, as amended. In particular, the development shall be undertaken so as to minimise the generation of soiled water. In addition, the design, capacity and structural integrity of storage facilities shall prevent run-off or seepage therefrom.

**Reason:** In the interest of preventing pollution to surface/ground waters and ensuring the appropriate completion of the works.

3. Water supply and drainage arrangements for the site, including the disposal of surface and soiled water, shall comply with the requirements of the planning authority for such works and services. In this regard-
  - (a) uncontaminated surface water run-off shall be disposed of directly in a sealed system, and
  - (b) all soiled waters shall be directed to a storage tank. Drainage details shall be submitted to, and agreed in writing with, the planning authority prior to commencement of development.

**Reason:** In the interests of environmental protection and public health.

4. The slatted shed shall be used only in strict accordance with a management schedule which shall be submitted to, and agreed in writing with, the planning authority prior to commencement of development. The management schedule shall be in accordance with the European Union (Good Agricultural Practice for Protection of Waters) Regulations, 2014, as amended, and shall provide at least for the following:

- (1) Details of the number and types of animals to be housed.
- (2) The arrangements for the collection, storage and disposal of slurry.
- (3) Arrangements for the cleansing of the buildings and structures (including the public road, where relevant).

**Reason:** In order to avoid pollution and to protect residential amenity.

5. All foul effluent and slurry generated by the proposed development and in the farmyard shall be conveyed through properly constructed channels to the proposed and existing storage facilities and no effluent or slurry shall discharge or be allowed to discharge to any stream, river or watercourse, or to the public road.

**Reason:** In the interest of public health.

6. All uncontaminated roof water from buildings and clean yard water shall be separately collected and discharged in a sealed system to existing drains, streams or adequate soakpits and shall not discharge or be allowed to discharge to the foul effluent drains, foul effluent and slurry storage tanks or to the public road.

**Reason:** In order to ensure that the capacity of effluent and storage tanks is reserved for their specific purposes.

7. Slurry generated by the proposed development shall be disposed of by spreading on land, or by other means acceptable in writing to the planning authority. The location, rate and time of spreading (including prohibited times for spreading) and the buffer zones to be applied shall be in accordance with the requirements of the European Union (Good Agricultural Practice for Protection of Waters) Regulations, 2014, as amended.

**Reason:** To ensure the satisfactory disposal of waste material, in the interest of amenity, public health and to prevent pollution of watercourses.

8. The developer shall pay to the planning authority a financial contribution in respect of public infrastructure and facilities benefiting development in the area of the planning authority that is provided or intended to be provided by or on behalf of the authority in accordance with the terms of the Development Contribution Scheme made under section 48 of the Planning and Development Act 2000, as amended. The contribution shall be paid prior to the commencement of development or in such phased payments as the planning authority may facilitate and shall be subject to any applicable indexation provisions of the Scheme at the time of payment. Details of the application of the terms of the Scheme shall be agreed between the planning authority and the developer or, in default of such agreement, the matter shall be referred to An Bord Pleanála to determine the proper application of the terms of the Scheme.

**Reason:** It is a requirement of the Planning and Development Act 2000, as amended, that a condition requiring a contribution in accordance with the Development Contribution Scheme made under section 48 of the Act be applied to the permission.
