

Planning and Development Acts 2000 to 2018

Planning Authority: Wicklow County Council

Planning Register Reference Number: 18/334

Appeal by Thomas and Philomena Kinnane of The Chestnuts, Church Hill, Wicklow against the decision made on the 27th day of June, 2018 by Wicklow County Council to grant subject to conditions a permission to the Board of Management Glebe National School care of Ronan Rose Roberts Architects of Morton Lane, Wicklow in accordance with plans and particulars lodged with the said Council.

Proposed Development: Removal of two existing prefabricated temporary classroom buildings at front of school, relocation of front vehicle and pedestrian entrance gates and front boundary walls, removal of tree and walled planter and alterations to on-street parking, construction of two-storey classroom extension at front of school, changes to front playground and associated site works at Glebe National School, Church Hill, Wicklow.

Decision

GRANT permission for the above proposed development in accordance with the said plans and particulars based on the reasons and considerations under and subject to the conditions set out below.

Matters Considered

In making its decision, the Board had regard to those matters to which, by virtue of the Planning and Development Acts and Regulations made thereunder, it was required to have regard. Such matters included any submissions and observations received by it in accordance with statutory provisions.

Reasons and Considerations

The appeal site is within an area zoned 'CE' for community and educational uses. Having regard to the long-standing establishment of a school on the site, the recent planning history of the site, the location close to the main amenities of Wicklow Town Centre, and the design and layout of the proposed development, it is considered that, subject to compliance with the conditions set out below, the proposed development, which is considered not to represent an intensification of use of the site, would be in accordance with the zoning objectives for the area, would not seriously injure the amenities of the area and would be acceptable in terms of traffic safety and convenience. The proposed development would, therefore, be in accordance with the proper planning and sustainable development of the area.

Conditions

1. The development shall be carried out and completed in accordance with the plans and particulars lodged with the application, as amended by the further plans and particulars submitted on the 7th day of June, 2018, except as may otherwise be required in order to comply with the following conditions. Where such conditions require details to be agreed with the planning authority, the developer shall agree such details in writing with the planning authority prior to commencement of development and the development shall be carried out and completed in accordance with the agreed particulars.

Reason: In the interest of clarity.

2. Details of the materials, colours and textures of all the external finishes to the proposed building shall be submitted to, and agreed in writing with, the planning authority prior to commencement of development.

Reason: In the interest of visual amenity.

3. The developer shall facilitate the archaeological appraisal of the site and shall provide for the preservation, recording and protection of archaeological materials or features which may exist within the site. In this regard, the developer shall:
 - (a) notify the planning authority in writing at least four weeks prior to the commencement of any site operation (including hydrological and geotechnical investigations) relating to the proposed development, and
 - (b) employ a suitably-qualified archaeologist prior to the commencement of development. The archaeologist shall assess the site and monitor all site development works.

The assessment shall address the following issues:

- (i) the nature and location of archaeological material on the site, and
- (ii) the impact of the proposed development on such archaeological material.

A report, containing the results of the assessment, shall be submitted to the planning authority and, arising from this assessment, the developer shall agree in writing with the planning authority details regarding any further archaeological requirements (including, if necessary, archaeological excavation) prior to commencement of construction works.

In default of agreement on any of these requirements, the matter shall be referred to An Bord Pleanála for determination.

Reason: In order to conserve the archaeological heritage of the area and to secure the preservation (in-situ or by record) and protection of any archaeological remains that may exist within the site.

4. Water supply and drainage arrangements, including the attenuation and disposal of surface water, shall comply with the requirements of the planning authority for such works and services.

Reason: In the interest of public health.

5. The construction of the development shall be managed in accordance with a Construction Management Plan, which shall be submitted to, and agreed in writing with, the planning authority prior to commencement of development. This plan shall provide details of intended construction practice for the development, including hours of working, noise management measures and off-site disposal of construction/demolition waste.

Reason: In the interests of public safety and residential amenity.

6. Before the new entrance is brought into use, the existing entrance shall be permanently close off by the erection of a boundary, matching the existing boundary in height, design, construction and finish.

Reason: In the interests of visual amenity and safety.
