**Board Order
ABP-312973-22**

Planning and Development Acts, 2000 to 2021

Planning Authority: Kildare County Council

Application by Kildare County Council for approval under section 177AE of the Planning and Development Act 2000, as amended, in accordance with plans and particulars, including a Natura Impact Statement, lodged with An Bord Pleanála on the 9th day of March, 2022.

Proposed Development: The construction of remediation works on Moone Bridge, County Kildare. The works will consist of:

- Replacement of soft grass verges with concrete rubbing strips.
- Installation of stainless-steel drainage integrated into concrete rubbing strip.
- De-vegetation of parapet/spandrel walls and repointing of joints as a result.
- Repair of missing/ damaged sections of the parapet wall and copping.
- De-vegetation and debris removal on embankments.
- All loose friable mortar of the arch barrel to be raked and repointed.
- Installation of fencing.
- Removal of material that has built up in the downstream riverbed.
- Installing reflective flexible bollards.

Decision

APPROVE the above proposed development based on the reasons and considerations under and subject to the conditions set out below.

Reasons and Considerations

In coming to its decision, the Board had regard to the following:

- (a) the EU Habitats Directive (92/43/EEC),
- (b) the Water Framework Directive (2000/60/EC),
- (c) the likely consequences for the environment and the proper planning and sustainable development of the area in which it is proposed to carry out the proposed development and the likely significant effects of the proposed development on a European Site,
- (d) the conservation objectives, qualifying interests and special conservation interests for the River Barrow and River Nore Special Area of Conservation (Site Code: 002162)
- (e) the policies and objectives of the current Kildare County Development Plan, 2017 – 2023,
- (f) the nature and extent of the proposed works as set out in the application for approval,
- (g) the information submitted in relation to the potential impacts on habitats, flora and fauna, including the Natura Impact Statement,
- (h) any submissions and observations received in relation to the proposed development, and
- (i) the report and recommendation of the person appointed by the Board to make a report and recommendation on the matter.

Appropriate Assessment:

The Board agreed with and adopted the screening assessment and conclusion carried out in the Inspector's report that the River Barrow and River Nore Special Area of Conservation (Site Code: 002162) is the only European Site for which there is a likelihood of significant effects.

The Board considered the Natura Impact Statement and all other relevant submissions and carried out an Appropriate Assessment of the implications of the proposal for River Barrow and River Nore Special Area of Conservation (Site Code: 002162). The Board considered that the information before it was adequate to allow the carrying out of an appropriate assessment.

In completing the assessment, the Board considered, in particular:

- i. the likely direct and indirect impacts arising from the proposal both individually or in combination with other plans or projects, specifically upon the River Barrow and River Nore Special Area of Conservation (Site Code: 002162),
- ii. the mitigation measures which are included as part of the current proposal,
- iii. the conservation objectives for the European Site, and
- iv. the views set out in submissions received.

In completing the appropriate assessment, the Board accepted and adopted the appropriate assessment carried out in the Inspector's report in respect of the potential effects of the proposed development on the integrity of the aforementioned European Site, having regard to the site's conservation objectives.

In overall conclusion, the Board was satisfied that the proposed development, by itself or in combination with other plans or projects, would not adversely affect the integrity of the European Site, in view of the Site's conservation objectives.

Proper Planning and Sustainable Development/Likely effects on the environment:

It is considered that, subject to compliance with the conditions set out below, the proposed development would not have significant negative effects on the environment or the community in the vicinity, would not give rise to a risk of pollution, would not be detrimental to the amenities of the area, would not adversely impact on the cultural, archaeological and built heritage of the area and would not interfere with the existing land uses in the area. The proposed development would, therefore, be in accordance with the proper planning and sustainable development of the area.

CONDITIONS

1. The proposed development shall be carried out and completed in accordance with the plans and particulars lodged with the application, except as may otherwise be required in order to comply with the following conditions. Where any mitigation measures set out in the Natura Impact Statement or any conditions of approval require further details to be prepared by or on behalf of the local authority, these details shall be placed on the file and retained as part of the public record.

Reason: In the interest of clarity and the proper planning and sustainable development of the area and to ensure the protection of the environment.

2. The mitigation and monitoring measures outlined in the plans and particulars relating to the proposed development, including those set out in the Natura Impact Statement shall be implemented in full or as may be required in order to comply with the following conditions. Prior to the commencement of development, details of a time schedule for implementation of mitigation measures and associated monitoring shall be

prepared by the local authority and placed on file and retained as part of the public record.

Reason: In the interest of protecting the environment, the protection of European Sites and in the interest of public health.

3. Prior to the commencement of development, details of measures to protect fisheries and water quality of the river systems shall be outlined and placed on file. Full regard shall be had to Inland Fisheries Ireland's published guidelines for construction works near waterways (Guidelines on Protection of Fisheries during Construction Works in and Adjacent to Waters, 2016). A programme of water quality monitoring shall be prepared in consultation with the contractor, the local authority and relevant statutory agencies and the programme shall be implemented thereafter.

Reason: In the interest of the protecting of receiving water quality, fisheries and aquatic habitats.

4. Prior to the commencement of development, the local authority, or any agent acting on its behalf, shall prepare in consultation with the relevant statutory agencies, a Construction Environmental Management Plan and a Water Management Plan incorporating all mitigation measures indicated in the Natura Impact Statement and a demonstration of proposals to adhere to best practice and protocols.

Reason: In the interest of protecting the environment, the landscape, European Sites, and sensitive receptors and in the interest of public health.

5. The local authority and any agent acting on its behalf shall ensure that all plant and machinery used during the works should be thoroughly cleaned and washed before delivery to the site and upon removal from the site to prevent the spread of hazardous invasive species and pathogens.

Reason: In the interest of the proper planning and sustainable development of the area and to ensure the protection of the European Sites.

6. The construction of the development shall be managed in accordance with a Construction Management Plan, which shall be placed on the file and retained as part of the public record. This plan shall provide details of intended construction practice for the development, including:

- (a) location of the site and materials compound(s) including area(s) identified for the storage of construction refuse,
- (b) location of areas for construction site offices and staff facilities,
- (c) details of site security fencing and hoardings,
- (d) details of the timing and routing of construction traffic to and from the construction site,
- (e) measures to prevent the spillage or deposit of clay, rubble or other debris on the public road network,
- (f) alternative arrangements to be put in place for pedestrians and vehicles in the case of the closure of any public road or footpath during the course of site development works,
- (g) details of appropriate mitigation measures for noise, dust and vibration, and monitoring of such levels,
- (h) containment of all construction-related fuel and oil within specially constructed bunds to ensure that fuel spillages are fully contained,
- (i) off-site disposal of construction/demolition waste and details of how it is proposed to manage excavated soil, and

(j) means to ensure that surface water run-off is controlled such that no silt or other pollutants enter local surface water sewers or drains.

A record of daily checks that the works are being undertaken in accordance with the Construction Management Plan shall be kept for inspection by the local authority.

Reason: In the interest of amenities, public health and safety.

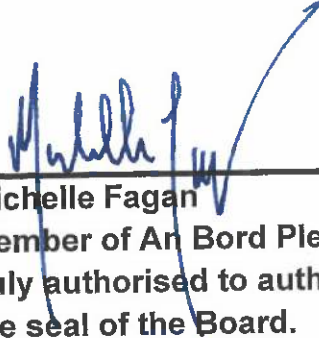

7. The local authority and any agent acting on its behalf shall facilitate the preservation, recording, protection or removal of archaeological materials or features that may exist within the site. A suitably qualified archaeologist shall be appointed by the local authority to oversee the site set-up and construction of the proposed development and the archaeologist shall be present on site during construction works. An Underwater Archaeological Impact Assessment shall be carried out in advance of works commencing and shall be placed on the file and retained as part of the public record.

Reason: In order to conserve the archaeological heritage of the site and to secure the preservation and protection of any remains that may exist within the site.

8. A suitably qualified ecologist shall be retained by the local authority to oversee the site set up and construction of the proposed development and implementation of mitigation measures relating to ecology set out in the Natura Impact Statement. The ecologist shall be present during site construction works and shall ensure that the bridge is surveyed for bats prior to commencement of works and that vegetation removal shall not take place during the bird breeding season. Upon completion of works, an ecological report of the site works shall be prepared by the appointed ecologist to be kept on file as part of the public record.

Reason: In the interest of nature conservation and the protection of terrestrial and aquatic biodiversity.
