

ABP 312615

P. A. Reg. Ref 21/363

Installation of seen antennas, two transmission dishes on supporting poles to include remote radio units (RRUs) ballast frame together with an associated equipment cabinet, cabling and site works at roof level.

Addendum to Inspector Report.

I refer to the observations of the planning authority on the first party appeal dated 25th February, 2022 which were brought to my attention today.

I note that the planning authority, further to review of the appeal, confirms that it considers that there is no new information, reasoning or justification within the appeal submission and that that the issues were given due consideration by the planning authority at application stage.

The planning authority in the submission also requests that the planning authority decision be upheld.

The planning authority's observations have been noted. I confirm that no changes to the assessment or to the recommendation for decision within the Inspector's report are proposed.

Jane Dennehy
Senior Planning Inspector
8th August, 2022.
