Addendum Report ABP-317722-23

My report of 8 November refers.

I note that the planning authority did respond to the appeal by way of a brief submission received by the Board on 30 August 2023.

The response confirms the decision of the planning authority. In this respect it refers the Board to the planning reports and internal reports and prescribed body reports and does not raise material issues.

There is no change to my recommendation.
