AIE397	09/07/2026	323780	I wish to make a request under the European Communities (Access to Information on the Environment) Regulations 2007 to 2018 for access to environmental information held by or for An Coimisiún Pleanála ("ACP") concerning Ballinlee Wind Farm, ACP Case Reference 323780. I request the following records: Records concerning NPWS / DAU All records concerning the National Parks and Wildlife Service ("NPWS")/ DAU in relation to Ballinlee Wind Farm, including: (a) all communications and engagement between ACP and NPWS and/or the DAU during the pre-application consultation process and following the lodgement of the planning application with ACP; and (b) all internal ACP records concerning NPWS /DAU, including records concerning consultation, engagement, referrals, submissions, observations, advice, and whether NPWS /DAU should be invited or requested to provide a submission, observations or advice. This includes correspondence, emails and attachments, letters, records of meetings and telephone calls, internal notes, memoranda, instructions, submissions, observations, advice, requests for information and responses. (c) records referring to the pre-application (scoping) NPWS/ DAU advice and whether it was considered during the application 2. ACP letter dated 19 June 2026 All records relating to the letter dated 19 June 2026 issued by ACP seeking a submission from NPWS/DAU in respect of Ballinlee Wind Farm, including: (a) records relating to the preparation, review, approval, issue and publication of the letter; (b) all internal communications, notes, instructions and records concerning the letter; (c) all records concerning how and when it was determined that the letter had been issued in error, the reasons or basis for that determination, and the decision or instruction to remove the letter from the ACP website; (d) all communications with NPWS /DAU concerning the letter, including its status, any notification that it had been issued in error, and any request to disregard the letter or take no further action; and 3. Records also referring to Garrane Wind Farm For the avoidance of doubt, where any record falling within the scope of this request also refers to, discusses or concerns Garrane Wind Farm, ACP Case Reference 323635, I request the record in full. Such records should not be excluded from the scope of this request solely because they concern or refer to both Ballinlee Wind Farm and Garrane Wind Farm. I would prefer to receive the records electronically. Where any information is withheld, in whole or in part, I request that the relevant provision of the AIE Regulations relied upon and the reasons for refusal be provided. Where only part of a record is considered exempt, I request access to the remainder of the record.	Part Granted	04/08/2026	Yes	Upheld

AIE398	10/07/2026	323635	I wish to make a request under the European Communities (Access to Information on the Environment) Regulations 2007 to 2018 for access to environmental information held by or for An Coimisiún Pleanála ("ACP") concerning Garrane Wind Farm, ACP Case Reference 323635. I request the following records: 1. ACP letter to DAU dated 19 June 2026 All records relating to the letter dated 19 June 2026 issued by ACP seeking a submission from NPWS/DAU in respect of Garrane Wind Farm, including: (a) records relating to the preparation, review, approval, issue and publication of the letter; (b) all internal communications, notes, instructions and records concerning the letter; (c) all records concerning how and when it was determined that the letter had been issued in error, the reasons or basis for that determination, and the decision or instruction to remove the letter from the ACP website; (d) all communications with NPWS /DAU concerning the letter, including its status, any notification that it had been issued in error, and any request to disregard the letter or take no further action; and 2. Records also referring to Ballinlee Wind Farm For the avoidance of doubt, where any record falling within the scope of this request also refers to, discusses or concerns Ballinlee Wind Farm, ACP Case Reference 323780, I request the record in full. Such records should not be excluded from the scope of this request solely because they concern or refer to both Garrane Wind Farm and Ballinlee Wind Farm.	Granted	31/07/2026	Yes	Upheld
AIE399	24/07/2026	N/A	Can you please confirm the required set back for a 150-meter wind turbine to a residence.	Dealt with Outside	n/a	n/a	n/a

AIE400	02/08/2026	N/A	what has been done since 10 February 2026 in response to Commission Decision (EU) 2026/836, notified under document C(2026) 919 and called Decision 2026/836 below, and in particular whether the reassessment it calls for has begun. Please quote our reference NRTG/2026/hvz in any response. An Coimisiún Pleanála decided the North Runway relevant action on 16 July 2025, imposing the annual night movement cap of 35,672 alongside the noise quota scheme and the amended runway hours. Ireland notified those operating restrictions to the European Commission on 8 August 2025, under the reference Ares(2025)6514967. Decision 2026/836 records An Coimisiún Pleanála as "the appeal body for the purpose of Article 4(1) of Regulation (EU) No 598/2014", and records that it was An Coimisiún Pleanála which answered the European Commission's questions by letter of 8 December 2025, stating that the only measures taken into account were those the airport had proposed in its planning application. It therefore both took the decision under review and corresponded directly with the European Commission about it. The European Commission decided on 10 February 2026 that the restrictions "do not fully follow the process set out in Regulation (EU) No 598/2014, insofar as Ireland has not considered other measures than operating restrictions in accordance with Article 5(3) of that Regulation", and that "Ireland shall examine this Decision and inform the Commission of their intentions before introducing those operating restrictions at Dublin Airport". The decision to be examined in that passage is Decision 2026/836 itself, and the body to be informed is the European Commission. Article 2 addresses Decision 2026/836 to the Republic of Ireland. Article 5(3) requires reduction of noise at source, land-use planning and management, and noise abatement operational procedures to be weighed before an operating restriction is applied. Nearly six months on, nothing has been published about what An Coimisiún Pleanála intends to do. The Irish Aviation Authority's Winter 2026 coordination parameters decision (30 April 2026) records that "it is unclear how ACP intends to move forward following the European Commission's assessment", that An Coimisiún Pleanála "has not yet confirmed the introduction" of the noise quota scheme, and that in consequence neither the original Condition 5 nor the replacement quota scheme could be reflected in the Winter 2026 parameters. Whether the reassessment has started is the single fact that determines whether the current deferral has an end date, and no one outside the process knows it. The information sought is environmental information: it concerns measures and activities affecting noise, a factor affecting the elements of the environment, and the administration of the noise assessment for Dublin Airport. Aircraft noise over inhabited areas is the subject matter throughout. I request the following records held by or for An Coimisiún Pleanála, dating from 10 February 2026 to the date this request is processed. Correspondence between An Coimisiún Pleanála and the European Commission concerning Decision 2026/836, in either direction, including any communication informing the European Commission of An Coimisiún Pleanála's intentions. Correspondence between An Coimisiún Pleanála and any Government Department, the Permanent Representation of Ireland to the European Union, Fingal County Council in its statutory role as the Aircraft Noise Competent Authority under the Aircraft Noise (Dublin Airport) Regulation Act 2019, or daa plc, concerning the response to Decision 2026/836, including any record of how responsibility for responding has been allocated between them. Records of any assessment or reassessment, begun or completed, of measures other than operating restrictions for Dublin Airport under Article 5(3), including any consideration of noise abatement operational procedures under Article 5(3)(c). Departure and arrival route design falls within that category. Any terms of reference, scoping note, instruction, tender or commission for such an assessment, and any record identifying who is to carry it out and by when. Any record of a decision or view that An Coimisiún Pleanála will not itself carry out such an assessment, or that the matter falls to another body, together with the reasons. Records identifying the date on which the operating restrictions are anticipated to be introduced, and any record addressing the fresh notice required under Article 8(1) of Regulation (EU) No 598/2014 before they can be introduced. Any legal advice held on the effect of Decision 2026/836, limited to its existence, date, author and instructing party. I do not seek the content of any such advice, so that legal professional privilege need not be engaged. Statement of absence. If no record responsive to any of items 1 to 7 exists, a statement to that effect is requested for each item separately. Absence is itself the information	Time Extended	n/a	Yes	n/a
--------	------------	-----	--	---------------	-----	-----	-----

AIE401	06/08/2026	217429	I wish to make a request under the European Communities (Access to Information on the Environment) Regulations 2007–2018 (AIE Regulations). This request relates to Planning Register Reference F04A/1755 and An Bord Pleanála Reference PL06F.217429, specifically Condition 10 of the planning permission for the North Runway at Dublin Airport. Condition 10 states: "The Voluntary Dwelling Purchase Scheme shall be reviewed every three years, or at such other intervals as may be agreed with the planning authority, following consultation with the local community, having regard to changing circumstances and experience gained in the operation of the scheme. Any proposed amendments to the scheme shall be agreed in writing with the planning authority." I request copies of the following environmental information from 2007 to the present: 1) All reviews of the Voluntary Dwelling Purchase Scheme undertaken pursuant to Condition 10. 2) Any reports, assessments, evaluations or recommendations prepared as part of those reviews. 3) All correspondence between Fingal County Council and daa (formerly Dublin Airport Authority) concerning the review, operation or amendment of the Voluntary Dwelling Purchase Scheme. 4) Records of consultations with the local community undertaken as part of the Condition 10 review process. 5) Any records demonstrating the Planning Authority's agreement in writing to amendments to the scheme, as required by Condition 10. 6) Any internal memoranda, briefing notes, file notes or meeting minutes relating to the implementation or monitoring of Condition 10. 7) Any compliance assessments, monitoring records or enforcement records concerning compliance with Condition 10. 8) Any documents recording decisions that no review was required, or explaining why a review was not undertaken at any three-year interval. If any of the requested information is held by another public authority, I would be grateful if this request could be transferred to the appropriate authority in accordance with Regulation 7 of the AIE Regulations, and that I be notified of the transfer. I request that the information be provided electronically where possible. <i>If none of this request is refused, I request that the response be provided to be clearly identified with reference to the relevant provisions of the AIE Regulations, together with</i>	Transferred	03/09/2026	n/a	n/a
--------	------------	--------	--	-------------	------------	-----	-----

AIE402	10/08/2026	N/A	I am seeking environmental information concerning renewable-energy spatial planning and cumulative solar development in County Kerry, particularly the Trieneragh/Lacka West area. Please provide: 1.The renewable-energy and solar-energy spatial information supplied by Kerry County Council to the Department of Climate, Energy and the Environment for the purposes of RED III Article 15b national territory mapping. 2.Any map, GIS layer or other record showing whether Trieneragh/Lacka West was identified as an area suitable or potentially suitable for large-scale solar development. 3.Records showing the criteria used by Kerry County Council to identify areas considered suitable for solar development. 4.Any assessment undertaken by Kerry County Council of the landscape capacity of North Kerry to accommodate large-scale solar development. 5.Any assessment of the cumulative environmental or landscape effects of existing, permitted, proposed or potential solar developments in North Kerry. 6.A list or spatial dataset of solar-energy developments which have been: - o permitted; - o refused; - o appealed; - o withdrawn; - o or are currently under consideration, - within County Kerry, preferably identifying location and approximate generation capacity or site area where available. 7.Any assessment of the cumulative acreage or generating capacity of solar developments in North Kerry. 8.Any methodology, threshold or policy used by Kerry County Council to determine when the concentration of renewable-energy developments in a particular geographical area may become excessive or constitute a cumulative landscape impact. 9.Records concerning the treatment of productive agricultural land in the assessment of large-scale solar developments. 10.Records concerning any assessment of the availability of alternative land types, including degraded, previously developed or non-agricultural land, for renewable-energy development. 11.All environmental assessments, landscape assessments, GIS analysis or internal reports relating to renewable-energy capacity or spatial suitability in the area surrounding Trieneragh, Lacka West, Knockanure and Listowel. 12.Records concerning any correspondence between Kerry County Council and the Department of Climate, Energy and the Environment regarding RED III implementation and Renewables Acceleration Areas. 13.Records concerning any correspondence between Kerry County Council and An Coimisiún Pleanála concerning the assessment of large-scale solar developments or the application of RED III. I would particularly like to understand the objective spatial-planning basis upon which a large-scale solar development at Lacka West/Trieneragh would be considered appropriate, including its relationship with other renewable-energy developments in North Kerry.	Part Granted	04/09/2026	n/a	n/a
AIE403	10/08/2026	N/A	I am seeking environmental information concerning the assessment of large-scale solar photovoltaic developments and renewable-energy projects by An Coimisiún Pleanála. Specifically, I request: 1.Records identifying the national planning policies, guidance and criteria currently used by the Commission when determining large-scale solar developments. 2.Records concerning how the Commission applies RED III Articles 15b–15d when determining renewable-energy applications or appeals. 3.Records concerning how the Commission assesses the cumulative landscape and environmental effects of multiple solar developments in the same geographical area. 4.Any methodology, guidance or threshold used to determine landscape capacity for large-scale solar development. 5.Any methodology, guidance or threshold used to assess cumulative solar development or potential saturation. 6.Records concerning the assessment of productive agricultural land in large-scale solar applications. 7.Records concerning the assessment of alternative locations or alternative land types when considering large-scale solar development. 8.Records concerning how the Commission approaches applications for large-scale solar development in circumstances where there is no completed national solar-specific planning statement or national solar spatial plan. 9.Copies of recent decisions concerning large-scale solar developments where the local planning authority had refused permission and the Commission subsequently granted permission on appeal. 10.Records identifying any internal guidance or procedures concerning the interaction between national renewable-energy policy and county development-plan policies relating to landscape, residential amenity, agricultural land and cumulative development. I am seeking this information to understand how the statutory planning system ensures that renewable-energy development is assessed in an objective, transparent and nationally consistent manner.	Refused - Article 7(5) records do not exist.	04/09/2026	n/a	n/a

AIE405	12/08/2026	500493	I wish to make a formal request for information under the European Communities (Access to Information on the Environment) Regulations 2007–2018, in relation to An Coimisiún Pleanála appeal case PL-500493-GY25, concerning Galway County Council Planning Authority Reference 2561412. This appeal relates to a proposed wind energy development which, by its nature and scale, has the potential to have a profound effect on the environment. I therefore consider the information requested to constitute environmental information for the purposes of the AIE Regulations. I am requesting the following information: 1. Please confirm whether Galway County Council made or furnished any submission, observations, response, report, correspondence or other representations to An Coimisiún Pleanála in connection with appeal case PL-500493-GY25. 2. If Galway County Council did make or furnish any such submission, observations, response, report, correspondence or representations, please provide a complete electronic copy of all such records. 3. Please provide the date on which each such record was received by An Coimisiún Pleanála and identify the Galway County Council department or section from which it originated, where this information is held. 4. Please also provide copies of any correspondence between An Coimisiún Pleanála and Galway County Council concerning the making, requesting, receipt or non-receipt of a submission or observations from the Planning Authority in this appeal. For the avoidance of doubt, this is a formal AIE request under the European Communities (Access to Information on the Environment) Regulations 2007–2018, rather than a general enquiry. If An Coimisiún Pleanála's position is that Galway County Council made no submission, observations, response or representations in relation to this appeal, I would ask that this be expressly confirmed in writing. I would appreciate confirmation by email that this AIE request has been received and registered.	Refused - Article 9(2)(c) case is still live	03/09/2026	Yes	Pending
AIE406	12/08/2026	N/A	Scheme: N6 Ballinasloe to Athlone Dual Carriageway (Roads and Transportation) Acquiring authority: Galway County Council (jointly with Roscommon County Council) Instrument: Compulsory Purchase Order No. 5 of 2005 Counties: Galway / Roscommon I do not have the Board's case reference number — I would be grateful if you could identify the file from the details above and let me know the reference for future correspondence. The records I am seeking from the confirmation file are: 1. The Inspector's report; 2. The Board Order / decision confirming the CPO (with or without modifications); 3. The record or transcript of the oral hearing, if one was held and a record is retained; and 4. The deposited CPO documents — in particular the Schedule / Book of Reference accompanying Deposit Map Sheet No. 13 of 13 (the Monksland, Athlone area). My interest is focused on a short section of the "Old Galway Road / Springwell Road" at Monksland, Co. Roscommon shown on Sheet 13. If retrieving or copying the full deposited documents is impractical, an extract would fully meet my needs — specifically the Book of Reference entries for ownership number 610a (parcels 610a.201 and 610a.202) and plot 607c.201, and the schedule descriptions of the rights of way to be extinguished shown on that sheet (references T1, T2, W2, W3 and U1). I am happy to receive scanned copies by email, to pay reasonable copying fees, or to inspect the file by appointment at your offices, whichever is most practical. If the file has been transferred elsewhere (for example to the National Archives), I would appreciate being redirected accordingly. I wish to request the following environmental information under the AIE Regulations (S.I. No. 133 of 2007, as amended). Please feel free to call me on 085 101 2114 if any clarification would help	Dealt with Outside AIE	13/08/2026	n/a	n/a
AIE 407	16/08/2026	323032	I am requesting copies of documents contained within the decided case file for: ABP-323032-25 (Louth County Council Ref. 2460340) Howe's Hill / Mullach Alainn, Knocknagoran, Omeath, Co. Louth. I am particularly seeking: - the complete Japanese Knotweed Management Plan; - all drawings and reports relating to Japanese Knotweed remediation; - ecological reports dealing with Japanese Knotweed; - any correspondence concerning the proposed remediation. Could you please advise whether these documents form part of the decided case file and, if so, please email them to me?	Dealt with Outside AIE	16/08/2026	n/a	n/a

AIE 408	16/08/2026	322683	I am writing to follow up on my formal planning-enforcement correspondence of 26th November 2025 concerning the fencing at Prospect House/Howe's Hill/Mullach Alainn, Omeath, under UD/24/239 and ABP-322683-25. To the best of my knowledge, I have not received an acknowledgement, separate enforcement reference number or substantive response to my correspondence of 26th November 2025. The circumstances remain ongoing. The same physical fencing that was the subject of ABP-322683-25 remains in situ as of 16th August 2026, at approximately 1.8m to 2.5m in height. Importantly, Louth County Council confirmed during the ABP referral that the fencing subject to the Section 5 application was the fencing currently in situ, and that there was no dispute that the fencing exceeded 2 metres in height. On 18th November 2025, An Coimisiún Pleanála issued its decision in ABP-322683-25, determining that the erection of the approximately 1.8m and 2.5m fencing was development and was not exempted development. I therefore respectfully request that the Council confirm: the current status of enforcement file UD/24/239; whether a Planning Enforcement officer or other Council officer has inspected the site in relation to this matter since my correspondence of 26th November 2025; whether the existing fencing has the benefit of any subsequent planning permission, retention permission or other planning authorisation; what enforcement action, if any, has been taken in relation to the fencing; specifically, whether an Enforcement Notice under Section 154 was issued following the Section 152 Warning Letter issued under UD/24/239; and if the enforcement file has been closed, the date on which it was closed and the basis/reason for its closure. There is also now a Japanese knotweed issue directly affecting several of the houses between Nos. 1 and 6 Mullach Alainn, Omeath. Japanese knotweed from the affected site is currently encroaching over the existing fencing and onto/over the boundaries of several houses in Mullach Alainn. This is particularly relevant because the fencing considered in ABP-322683-25 was expressly described as fencing around a site affected by knotweed, with the stated purpose including knotweed spraying and removal works. The ABP documentation also records that the applicant described the fence as being required for knotweed spraying and removal works. I therefore also ask the Council to establish whether the Japanese Knotweed Management Plan associated with the subsequent planning permission for the site is being fully implemented, including the required mitigation and management measures. In particular, I ask that the Council consider whether the current encroachment of Japanese knotweed beyond the development site and across/over the boundaries of neighbouring residential properties is consistent with the requirements of the approved Japanese Knotweed Management Plan. I respectfully request that this issue also be considered as part of the Council's investigation and that it be referred to the appropriate planning/environmental enforcement officer if necessary. The relevant references are: UD/24/239 Louth County Council S5-2025-24 ABP-322683-25 Louth County Council 24/60340 ACP-323032-25 / PL15.323032I attach current dated photographs showing the existing fencing and the Japanese knotweed encroaching over the boundary of several of the houses in Mullach Alainn. Can you please confirm receipt of this email and provide me with the current status of UD/24/239, including any separate enforcement reference number, the current enforcement position, and details of any inspection or enforcement action undertaken to date?	Dealt with Outside AIE	16/08/2026	n/a	n/a
---------	------------	--------	---	------------------------	------------	-----	-----

AIE 409	19/08/2026	500143	I wish to make an additional request under the Access to Information on the Environment Regulations 2007–2018. I am seeking environmental and planning information held by Kerry County Council concerning the solar photovoltaic development proposed by Statkraft Ireland Limited across the townlands of Ballyline West, Coolkeragh and Kilgarvan, between Listowel and Ballylongford. The development was reported as being approximately 120 hectares, with proposed generation capacity of up to 70 MW, and Kerry County Council refused planning permission on grounds including visual impact, landscape character, the area's Visually Sensitive Area designation, inadequate separation from the public road, surface-water runoff/drainage and biodiversity. I request copies of the following records: 1.The full Kerry County Council planner's report relating to the Statkraft application. 2.The planning application reference number, decision notice and all stated reasons for refusal. 3.Any landscape and visual impact assessment, photomontages, landscape assessment or other visual-impact documentation considered by the Council. 4.Any records concerning the site's designation as a Visually Sensitive Area, including the specific policies or development-plan provisions relied upon in reaching the decision. 5.Any drainage, surface-water, flood-risk or hydrological assessments considered by the Council. 6.Any ecological, biodiversity or environmental assessments considered as part of the application. 7.Any assessment concerning the development's impact on the character of the rural landscape. 8.Any assessment concerning the proposed development's setback from public roads and the adequacy of the proposed setback. 9.Copies of submissions/observations from public authorities concerning landscape, drainage, biodiversity, roads or other environmental matters, subject to any applicable exemptions/redactions. 10.Any subsequent records concerning an appeal to An Coimisiún Pleanála, including the appeal reference, correspondence and Council response, if applicable. 11.Any records showing whether the Council's refusal was subsequently appealed, upheld, varied, overturned, withdrawn or otherwise disposed of. 12.Any records concerning the relationship between this development and other existing, permitted or proposed renewable-energy/solar developments in North Kerry, particularly where cumulative landscape or environmental effects were considered. Scope To assist with a focused search, this request concerns the specific Statkraft development described above and records held by Kerry County Council concerning its assessment and determination. The purpose of the request is to understand the objective planning and environmental considerations applied by Kerry County Council to a major solar development in North Kerry, particularly in relation to landscape character, Visually Sensitive Areas, visual impact, drainage, biodiversity and cumulative development.This information is relevant to understanding the consistency of the Council's assessment of large-scale solar developments within North Kerry. Please provide the relevant planning reference number if this is not already apparent from the Council's records.	Refused - Article 9(2)(c) Article 10(3) Article 8(a)(iv) Article 7(3)(a)(i)	09/09/2026	n/a	n/a
---------	------------	--------	--	--	------------	-----	-----

AIE410	27/08/2026	217429	I wish to make a request under the European Communities (Access to Information on the Environment) Regulations 2007–2018 for environmental information held by, or on behalf of, An Coimisiún Pleanála concerning the aircraft-noise mitigation measures associated with the North Runway at Dublin Airport. The relevant original planning references are: - Fingal County Council Ref. F04A/1755 - An Bord Pleanála Ref. PL06F.217429 I am particularly seeking information concerning the development and rationale for Conditions 9 and 10, the Voluntary Dwelling Purchase Scheme (VDPS), and the findings and recommendations of the Board's independent noise consultant, named individual. I am currently preparing a submission to the Aircraft Noise Competent Authority (ANCA) in relation to its current consultation, which closes on 3 September 2026. The matters below are directly relevant to that submission. I fully appreciate the normal statutory timeframe applicable to an AIE request. However, given the imminent consultation deadline, I would be extremely grateful if any of the key records identified below that are readily available could be provided before 3 September, even if the remainder of the request must be processed subsequently within the normal statutory timeframe. 1. Named Individual's assessment and recommendations I request copies of environmental information held by, or on behalf of, An Coimisiún Pleanála relating to named individual's consideration of aircraft-noise impacts and mitigation during the Board's assessment of the North Runway application, including: 1. Named Individual's full report or reports concerning noise associated with the North Runway application, including appendices, supporting documentation and any supplementary reports. 2. Any working papers, notes, memoranda, correspondence, oral-hearing notes or transcripts held by or for the Board which record his assessment of: - significant or residual aircraft-noise effects on residential properties; - the adequacy or inadequacy of the mitigation measures proposed by the applicant; - voluntary property purchase or acquisition; - relocation of residents; - noise insulation; - compensation or other mitigation for affected households; and - the extent to which residual significant noise effects would remain following the proposed mitigation. 3. Any specific recommendation made by named individual concerning a voluntary dwelling/property purchase scheme, including the intended purpose of such a scheme and any recommendation concerning: - eligibility;	Refused - Article 7(3)- records are publicly available	09/09/2026	IR	Pending
AIE411	01/09/2026	304799	Under the European Communities (Access to Information on the Environment) Regulations 2007–2018, I request a full copy of the 2019 Meath County Council planning application made to an An Coimisiún Pleanála - Case reference: JP17.304799, Frontlands Distributor Road, Kells, Co. Meath. This information request also includes An Coimisiún Pleanála's further information request, and all documentation presented by Meath County Council in response; also An Coimisiún Pleanála confirmation and date of permission granted, and expiry date of permission granted. ACP Case link: https://www.pleanala.ie/en-ie/case/304799 If any part of this request is considered too broad, I ask that the Department contact me under the duty to assist so that the request can be refined without excluding the core records. If access to any information is refused or redacted, please identify the specific record or part of the record withheld, the precise provision of the AIE Regulations relied upon, the reasons for applying that exception to the information concerned, and the public-interest considerations taken into account where applicable. Where only part of a record is exempt, please provide the remainder. I request the records in electronic form, preferably searchable PDF for documents and native electronic format for spreadsheets, GIS files, maps or other datasets where practicable. Where an email or other communication has attachments, please provide the attachments together with the parent communication.	Withdrawn	n/a	n/a	n/a

AIE412	03/09/2026	Planning Authority reference EUQY035	I request access under the European Communities (Access to Information on the Environment) Regulations to environmental information held by An Coimisiún Pleanála concerning Cloghanmore Quarry, Kinnitty, Co. Offaly, Planning Authority reference EUQY035, including records associated with QB19.QB0250 and 19.QV.0107, particularly environmental assessment, EIA, habitats screening, geological, ecological, water, restoration and remediation information.	Transferred	04/09/2026	n/a	n/a
