Date	20-12-24

Introduction

The Inspector's Report has rightly concluded that the adverse impact of the Relevant Action on the surrounding communities would be too severe to justify granting permission. The proposal's projected increase in night-time activity would result in significant additional awakenings, which are well-documented to cause substantial health and well-being consequences, including increased risks of cardiovascular disease, mental health disorders, and sleep-related cognitive impairments. These impacts underscore the urgent need for stringent controls to protect affected communities.

Given these findings, it is essential that any current or future expansion of airport activity during night-time hours be strictly limited by a movement cap of 13,000 annual night-time flights, as proposed. However, the severity of the projected health and environmental impacts suggests that a complete ban on night-time flights may ultimately be necessary to ensure the well-being of affected communities. Night-time operations present unacceptable risks to health and quality of life, and the evidence strongly supports minimising or eliminating such activity to meet public health and sustainability goals.

Without such measures, the application should have been refused outright by the planning authorities, as the adverse impacts clearly outweigh any potential benefits. Therefore, the application must now be rejected to protect the integrity of the planning process, uphold public health standards, and ensure that the needs of the local community are prioritised over operational convenience.

Introduction

The Inspector's Report has rightly concluded that the adverse impact of the Relevant Action on the surrounding communities would be too severe to justify granting permission. The proposal's projected increase in night-time activity would result in significant additional awakenings, which are well-documented to cause substantial health and well-being consequences, including increased risks of cardiovascular disease, mental health disorders, and sleep-related cognitive impairments. These impacts underscore the urgent need for stringent controls to protect affected communities.

Given these findings, it is essential that any current or future expansion of airport activity during night-time hours be strictly limited by a movement cap of 13,000 annual night-time flights, as proposed. However, the severity of the projected health and environmental impacts suggests that a complete ban on night-time flights may ultimately be necessary to ensure the well-being of affected communities. Night-time operations present unacceptable risks to health and quality of life, and the evidence strongly supports minimising or eliminating such activity to meet public health and sustainability goals.

Without such measures, the application should have been refused outright by the planning authorities, as the adverse impacts clearly outweigh any potential benefits. Therefore, the application must now be rejected to protect the integrity of the planning process, uphold public health standards, and ensure that the needs of the local community are prioritised over operational convenience.

The following expanded summary highlights the inadequacies of the DAA application, the breaches of planning conditions, and the need for a comprehensive approach to managing night-time flights, which includes the retention of the movement cap as an immediate measure and consideration of a full ban on night-time operations to safeguard public health and community welfare.

1.0 Inadequacy of DAA Application and Necessity of Movement Limit

- **Failure to Address Noise Impacts:**
 - The Dublin Airport Authority (DAA) application fails to assess or mitigate the adverse effects of nighttime noise adequately.
 - Average metrics like % Highly Sleep Disturbed (HSD) and L_{night} fail to capture acute impacts such as awakenings, which have immediate and long-term health consequences.
- **Health Implications of Nighttime Noise:**
 - Chronic sleep disruption contributes to cardiovascular disease, mental health disorders, and reduced cognitive performance.
 - The WHO highlights that even one additional awakening per night represents a significant adverse health impact, ignored in the DAA's proposals.
- **Projected Impacts:**
 - The inspector has defined that more than 1 additional awakening per night as a result of aircraft noise is a significant adverse impact.
 - The inspector has concluded "in conjunction with the board's independent acoustic expert that the information contained in the RD and the RA does not adequately demonstrate consideration of all measures necessary to ensure

the increase in flights during the nighttime hours would prevent a significant negative impact on the existing population.”

- **Insulation Limitations:**
 - Insulation measures cannot fully mitigate nighttime noise due to factors like open windows, low-frequency noise, and peak noise events.
 - The WHO average insulation value of 21 dB assumes windows are open 20% of the year, making insulation less effective.
 - The introduction of a new insulation criteria of 80dB L_{ASMax} is welcomed, however, without a detailed set of maps indicating who qualifies for this the decision is incomplete.
 - Furthermore, the grant value of €20,000 is considered inadequate to fully insulate those homes that qualify. Comparisons to other EU countries are incomplete and do acknowledge the fact that construction costs in Ireland and particularly Dublin are close to the highest in the EU.
 - It is fundamentally wrong that anybody who is so significantly affected by the negative impacts of noise from the proposed development should have to carry the cost of any mitigation works needed.
 - The scheme should be redesigned to cover the full cost of insulation.
- **Necessity of the Movement Limit:**
 - The movement cap of 13,000 nighttime flights is critical to reducing noise impacts and protecting public health.
 - Without this cap, noise exposure levels will rise significantly, endangering the well-being of nearby residents.
- **Conclusion on Permission:**
 - The permission should be denied due to the DAA's insufficient noise mitigation measures and failure to address core public health risks.

2.0 Unauthorised Flight Paths and Breach of Planning Conditions

- **Deviation from Approved Flight Paths:**
 - The DAA has implemented flight paths that deviate significantly from those approved in the Environmental Impact Statement (EIS).
 - These unauthorised deviations expose previously unaffected areas to significant noise impacts, creating unassessed risks.
- **Failure to Seek Updated Permissions:**
 - The deviations breach Condition 1 of the planning permission, which requires adherence to the originally assessed flight paths.
 - No updated Environmental Impact Assessment (EIA) or planning application has been submitted for these changes.
- **Community Impacts:**
 - Affected communities have experienced noise levels without proper consultation or mitigation measures.
 - Local schools have been impacted.
 - The impact has been devastating for communities with families now feeling like they have no option but to sell their homes.
 - Trust in the DAA has been severely eroded due to a lack of transparency and accountability.
- **Legal and Procedural Concerns:**
 - The unauthorised flight paths undermine the planning system's integrity, setting a dangerous precedent for future projects.

- Granting permission under these conditions violates planning laws and obligations under the EIA Directive.
- **Conclusion on Permission:**
 - Permission should be unequivocally denied until unauthorised flight paths cease and comprehensive reassessments are completed.

3.0 Right of Appeal in the Aircraft Noise Act 2019

- **Legal Framework:**
 - Section 10 of the Aircraft Noise Act permits appeals of Regulatory Decisions (RDs) by relevant persons who participated in the consultation process.
 - SMTW (St. Margaret's The Ward Residents Group) qualifies as a relevant person under this framework.
- **Inappropriate Refusal of Appeal:**
 - SMTW's appeal against noise-related RDs was inappropriately denied by An Bord Pleanála, despite clear legislative provisions supporting it.
 - Denial of appeal prevents critical scrutiny of noise mitigation measures and exacerbates community disenfranchisement.
- **Importance of Appeals:**
 - Appeals are vital for maintaining transparency, ensuring accountability, and balancing airport operations with community welfare.
- **Conclusion:**
 - Denying appeals undermines public trust and violates the Aircraft Noise Act's intent to provide affected parties a voice.

4.0 Noise Quota System in the Fingal Development Plan

- **Policy Objectives:**
 - Objective DA016 supports a Noise Quota System (NQS) to reduce aircraft noise impacts, particularly during nighttime operations.
 - The policy prioritizes community health, sustainability, and the use of quieter aircraft.
- **Challenges in Implementation:**
 - Without a cap on nighttime flights, cumulative noise impacts will persist despite efforts to incentivize quieter aircraft.
 - Current plans increase noise exposure above 2019 levels, violating noise abatement objectives.
- **Recommendations:**
 - Enforce a movement limit alongside the NQS to ensure it effectively reduces noise disturbances.
 - Align the system with best practices observed at major European airports.

5.0 Night Flight Restrictions in Europe and Implications for Dublin

- **European Comparisons:**
 - Major airports like Schiphol, Heathrow, and Frankfurt enforce strict caps or curfews on nighttime flights.
 - Dublin's proposed 31,755 annual nighttime flights far exceed these airports' limits relative to passenger numbers.
- **Health and Environmental Alignment:**
 - European airports prioritize reducing noise exposure to mitigate sleep disruption, cardiovascular risks, and stress.

- Adopting the 13,000-flight cap aligns Dublin with international best practices, ensuring proportional and sustainable operations.
- **Conclusion:**
 - The proposed number of flights is disproportionate and poses unacceptable health and environmental risks.
 - Without the movement limit the Noise Abatement Objective (NAO) set by ANCA for Dublin Airport cannot be fully achieved.

6.0 Inadequacy of Insulation in Mitigating Aircraft Noise-Induced Awakenings

- **Technical Limitations of Insulation:**
 - Insulation does not address critical noise issues, such as low-frequency noise penetration and sharp peaks triggering awakenings.
 - Dormer-style housing near the airport is particularly susceptible to noise, rendering insulation largely ineffective.
- **Existing Schemes Are Insufficient:**
 - Residential Noise Insulation Scheme (RNIS) and Home Sound Insulation Program (HSIP) do not meet modern health protection standards.
 - Insulation is unsuitable for nighttime impacts and cannot substitute for operational restrictions like movement caps.
- **Alternative Mitigation Measures:**
 - Voluntary purchase schemes for residents in high-noise zones should be expanded to address the most severe impacts effectively.
- **Conclusion:**
 - Insulation alone cannot mitigate nighttime noise impacts; operational restrictions must remain central to mitigation strategies.

7.0 Health and Environmental Impacts

- **Noise-Induced Health Risks:**
 - Chronic exposure to nighttime aircraft noise increases the risks of cardiovascular disease, hypertension, and mental health issues.
 - Children's cognitive development is adversely affected, impairing memory, learning, and overall performance.
- **Economic Costs:**
 - Health-related costs, including healthcare expenses and reduced productivity, are substantial and long-term.
 - For example, Brussels Airport's health cost analysis suggests similar impacts at Dublin could reach €750m annually.
- **Population Exposed:**
 - The DAA analysis has not used the correct population datasets in determining the impacts. This underestimates the impact on the communities around the airport.
- **Public Health Submissions:**
 - Evidence from health agencies emphasizes that noise-induced sleep disturbance is a significant environmental health risk.
 - Ignoring these risks contravenes principles of sustainable development and public health protection.

8.0 Other Environmental Impacts

- **Use of Outdated Surveys:**
 - The Appropriate Assessment (AA) relied on outdated ecological surveys that do not accurately reflect current environmental conditions.
 - Failure to update surveys undermines the validity of the assessment and risks overlooking critical impacts on local habitats and species.
- **No AA on Full North Runway Development:**
 - The AA did not assess the full scope of the North Runway development, focusing only on limited aspects of the proposal.
 - Significant components of the development were excluded, leaving major potential impacts unexamined.
- **No Cumulative or In-Combination Assessment:**
 - The AA failed to consider cumulative impacts arising from the interaction of the North Runway with other existing and planned projects in the vicinity.
 - The absence of an in-combination assessment violates key legal requirements and risks underestimating the overall environmental impact of the development.
- **Non-Compliance with Legal and Regulatory Standards:**
 - The failure to provide an accurate, comprehensive, and up-to-date AA breaches obligations under the EU Habitats Directive.
 - The planning process has been compromised by this omission, exposing the development to potential legal challenges.
- **Potential Environmental Risks:**
 - The lack of thorough assessment could lead to significant unmitigated impacts on protected habitats and species, including cumulative degradation of local ecosystems.

9.0 Recommendations and Final Position

- **Cease Unauthorised Flight Paths:**
 - Immediately halt unauthorised deviations and revert to the flight paths approved under the original EIS.
 - Conduct a new EIA to assess the impacts of any proposed deviations.
- **Retain Movement Limit:**
 - Maintain the cap of 13,000 nighttime flights to prevent further degradation of community health and well-being.
 - Implement the Noise Quota System to incentivize quieter aircraft and ensure proportional operations.
- **Refuse Permission:**
 - Granting permission under these circumstances undermines planning integrity and public trust.
 - Upholding planning law and ensuring transparent, evidence-based assessments are essential for future airport operations.

To whom it may concern

It should be unacceptable for An Bord Pleanála to accept and use new updated noise contours from the daa that affect people's lives so dramatically in this process. It should have been done properly through Fingal Co Council/ANCA before planning permission was granted. The 2007 planning condition documentation includes flight path assumptions which are completely different to the ones currently being used today, and now, they have added our home into contours at this late stage on an assumed acceptance of their illegal, unauthorised flightpaths (See map identifying our home attached).

I attended a meeting with ANCA in November 2021, where I was shown maps of noise contours which my home was not identified as requiring noise insulation. Now in your Draft Decision is a map showing our home in the Eligibility Contour and we received a letter from the daa dated the same day as this draft decision 11th September 2024 wanting us to take part in their initial scoping exercise (Please see letter from daa attached). Why are they allowed to continually jump ahead of the process. It feels like we are being bullied, considering the fact that An Bord Pleanála have not yet made a decision.

I have been logging complaints (approx. 4000, see log attached) to the daa as far back as 2021. It has all fallen on deaf ears. I have attached some of the results which highlights the planes leaving the environmental flight paths early and they just get sent to the IAA for further investigation. I have never received an outcome of any of the investigations. See attached Noise Complaint Responses.

The Noise Preferential Corridors are now wider, and they appear to be free to go wherever they want affecting such a large population.

Our lives have been changed beyond recognition since the opening of the North Runway. We have lost our gardens which we once enjoyed and loved, we can no longer bare to be in them. The noise of each plane penetrates through the whole house where there is no escape. Woken by the pounding of my heart to the extreme sounds of planes at 7am through the peace and quiet we once lived in. Our weekend sleep-in no longer exists as each passing plane affects us. I no longer go to bed before 11pm so that I am not woken by the planes and cannot go back to sleep. For this reason, I feel our health should be taken seriously and by allowing two extended hours from 5:59am to 00:00 of unrestricted flights should not happen. See attached recorded 80db over our home taken by daa monitor which is currently in our garden.

Privacy, I find it very upsetting each time I go outside the house to carry out chores as I know I can be seen from the planes as they go over, it is a total invasion of our once private home and garden. We have been stripped of our privacy. Not to mention the flashing of dark shadows through the kitchen in the summer.

In relation to the grant of €20,000 towards insulation, it is a huge insult under the current circumstances, as the cost of replacement windows and doors to make our whole house soundproof from planes is way in excess of this (see quotation attached), not to mention the cost of trying to sound proof our dormer bungalow in order to sleep.

Air quality, extended number of hours and flights over an 18-hour daily period over our home and no air quality monitors in the area to record all the extra pollution. This needs to be monitored. I no longer feel safe to walk on the roads where we live as I know there must be extra microscopic particles that can be inhaled deep into our lungs and reach our blood stream. Why is so much extra pollution and emissions being allowed, when we are all being told to reduce them?

This should not be granted as:

- Daa operating divergent flight paths on the North Runway for westerly operation contravening the 2007 planning permission for the North Runway.
- daa currently in breach of the 32 million passenger cap.
- daa currently in breach of the condition 5 of 2007 planning permission not to have more than 65 flight at night.
- daa currently in breach of Condition 10 of 2007 planning permission not reporting on noise from the North Runway and not producing complete reports.
- Noise contours not to be trusted, now different to what permission was granted for.

The distress, upset and never-ending daily reminder of the injustice being carried out by the daa's breach of planning permission of the flight paths and now the extension of flights over us for a longer period of time suggests to me that we are nothing more than collateral damage by a 100% state owned body that is simply ignoring the law.

Grainne & Michael McFadden, Kilcoskan, The Ward, Co Dublin, D11 PY92

Dear Grainne O'Dowd

Re: Proposed Residential Sound Insulation Grant Scheme

We recently contacted you about an opportunity to undertake scoping works for Dublin Airport's proposed Residential Sound Insulation Grant Scheme (RSIGS). As we have not yet heard from you, we wanted to remind you of your eligibility for this initial scoping exercise.

As you may be aware, daa lodged a “Relevant Action” planning application in 2020 seeking to amend and replace two planning conditions associated with North Runway. As part of this application an insulation grant scheme has been proposed. If approved, the Scheme will provide financial assistance to eligible property owners in the form of a €20,000 grant which can be put towards the cost of noise insulation measures in the bedrooms of eligible properties. Your property has been potentially identified as an eligible property under this proposed Scheme. This will be confirmed once An Bord Pleanála (ABP) decision is received.

Whilst Fingal County Council has issued a notification to grant planning permission for daa's application, it is still considered to be a live application and is currently under appeal with An Bord Pleanála. Whilst we have no indication of what the outcome will be from this appeals process, we do have to carefully consider how we would deliver the Residential Sound Insulation Grant Scheme (RSIGS) as efficiently and effectively for all eligible homeowners if it is approved in its current format.

We are therefore seeking to undertake scoping works over the coming months, to assess the potential uptake of the Scheme and the magnitude of works that would have to be carried out. In order to do this, we are inviting the first 200 eligible homeowners to participate in this initial scoping exercise. This would consist of a non-invasive survey being conducted and a bespoke Statement of Need being issued, which will outline the measures required to improve the sound performance of your home. The survey work will be undertaken free of charge by daa appointed acousticians and contractors and would take approximately two hours to complete.

This invitation to participate in this initial scoping exercise is being extended to the first 200 properties and is completely voluntary. If you are outside this initial scoping exercise, then you may not be contacted. If you choose not to participate in this exercise or are not contacted, it will not preclude you from involvement in the Scheme in the future if approved.

To re-iterate, the decision from An Bord Pleanála relating to the Relevant Action application, of which the RSIGS is a part of, has not been approved at the time of writing. If the application is refused in the future, then daa will need to consider the impact of same on the proposed RSIGS.

If you do wish to participate, please complete the form overleaf and return it to our office, by post or e-mail. Your engagement would be appreciated and would result in accelerating the delivery of your property if the scheme was to be approved.

Following receipt of the completed form, daa appointed specialist consultants, will make direct contact with you to organise a convenient date on which to undertake the survey.

In the interim, please feel free to contact me, via email, if you have any questions on the above.

Yours sincerely

The Noise Insulation Team
Level 1 Cloghran House
Corballis Way
Dublin Airport
Co. Dublin
K67 F3X2

Email: insulation@dublinairport.com

5.3 In the event that a property owner wishes to appoint their own competent contractor, the Applicant will provide a specification for the works. The property owner must provide a written quotation from their competent contractor for approval of both the identity of the contractor and the quotation by the Applicant. Following approval, the property owner shall be responsible for managing the works and making payments to their contractor and the provisions of and schedule as agreed by the planning authority shall be deemed to be amended accordingly. Upon completion of the works, the Applicant will carry out an inspection and issue payment to the property owner. Where works are not carried out in accordance with the approved specification, payment will not be made by the Applicant. Where works are not carried out in accordance with the approved specification, payment will not be made by the Applicant. The Applicant must act reasonably in the approvals process, but if the Applicant does not approve of the contractor or the quotation, payment will not be made by the Applicant.

Reason: To account for the impact of noise from individual aircraft movements from, any change in flight paths, and assessed in terms of the maximum noise level at a receptor during the fly-by. Also, to mitigate the impact of aircraft night-time noise as a result of the use of the Airport's runways

Peter Mullan

Member of An Bord Pleanála

duly authorised to authenticate
the seal of the Board.

Dated this 11th day of September, 2024.

Grainne

How are you. Sorcha asked to to send on the attached..

This is a base price standard Triple glazed in white.

TO achieve 38 decibel sound reduction ,the glass attached has to be used.
This has an extra cost the glass for the spec , the profile and the slider must be Aluminium

The total of the extra is approx. €11,000 incl vat. See breakdown below.

€5000.00 extra for acoustic glass -

New profile - C76 to take the extra specification on glass - €3000.00 extra

Change patio door to aluminum to take the extra specification on glass -
€3000.00 extra

Any questions just give us a ring

Kind Regards,
Sean Whelan

Mrs McFadden

grainne74mcfadden@gmail.com

Noise Complaint Reference: Dates, 19th, 20th & 21st November

Dear Mrs McFadden,

I am writing to you following your recent contact with us concerning aircraft noise disturbance in your area.

Your query specified that there was aircraft noise disturbance in your area from aircraft using Dublin Airport. I have now investigated your concerns on our noise and flight track monitoring system and have found that there were aircraft in your vicinity. Of the 14 aircraft movement which were the subject of your complaints, there was 1 track deviations. The departure aircraft in question left the Noise Preferential Route (NPR or environmental corridor) below the releasing altitude of 3,000ft (or 4,000ft when using the North Runway). All departure aircraft must follow the NPR until they reach the releasing altitude unless vectored by air traffic controller for safe separation of aircraft, weather avoidance or emergency.

The flight event will be shared to AirNav, our air navigation service provider, for further investigation. All aircraft arriving and departing Dublin Airport come under the direction of AirNav Ireland who provide air traffic control services in Ireland, and it is they who are responsible for the routing of aircraft. Nonetheless, we in Dublin Airport have regular meetings with the AirNav Ireland and operators to continuously review the track keeping of aircraft in the vicinity of the airport.

Your query has been logged in our noise database. All queries are reported on a monthly basis and are published on our airport website.

<https://www.dublinairport.com/corporate/corporate-social-responsibility/noise/airport-noise-noise-reports>

I can assure you that we take concerns regarding aircraft noise very seriously and strive to do all we can to minimise any adverse impact from airport operations on both the community and the environment. In that regard we welcome all feedback concerning aircraft noise.

For more information on aircraft noise at Dublin Airport, please visit <https://www.dublinairport.com/corporate/corporate-social-responsibility/noise>.

Yours sincerely,

Noise and Flight Track Monitoring Team

Noise Complaint Reference Detail: 44683

Dear Mrs McFadden,

I am writing to you following your complaint of the 29-Sep-22 concerning aircraft noise disturbance in your area.

Your complaint specified that there was aircraft noise disturbance in your area on the 28-Sep-22 at 15:14 from an aircraft using Dublin Airport.

I have now investigated your complaint on our noise and flight track monitoring system and have found that there was an aircraft in your vicinity on the date and time stated above. The aircraft in question departed Dublin Airport's Runway 28L and left the environmental corridor early by turning to the north. I have sent the file on this incident to the (IAA) for further investigation.

All aircraft arriving and departing Dublin Airport come under the direction of the Irish Aviation Authority (IAA) who provide air traffic control services in Ireland and it is they who are responsible for the routing of aircraft. Nonetheless, we in Dublin Airport have regular meetings with the Irish Aviation Authority to continuously review the

track keeping of aircraft in the vicinity of the airport. The IAA also licence Dublin Airport to operate 24 hours per day and therefore there is no cut off time for aircraft using Dublin Airport.

Your complaint has been logged in our noise database. I can assure you that we take concerns regarding aircraft noise very seriously and strive to do all we can to minimize any adverse impact on both the communities and the environment by the operation of Dublin Airport. In that regard we welcome all feedback concerning aircraft noise.

As soon as I have further information on your complaint I will contact you.

Yours sincerely

Ciaran Moore
