Defer Re O/H

Having considered the contents of the submission dated/received 14/12/24 from Mauricio Goffe I recommend that section 131 of the Planning and Development Act, 2000 ~~be~~ not be invoked at this stage for the following reason(s):
no in 1380

Section 131 not to be invoked at this stage.

☒

Section 131 to be invoked — allow 2/4 weeks for reply.

Reference case number:
314485

Dear An Bord Pleanála

I would like to appeal the above case and make some points in relation to the below draft decision.

An Bord Pleanála has made a draft decision under section 37R of the Planning & Development Act, 2000 (as amended) in relation to appeals which were made to An Bord Pleanála against the decision made on 8th August 2022 by Fingal County Council, bearing the above planning reference number which decision was to grant permission with conditions to DAA plc for a proposal described in the original application which was lodged on 18th December 2020.

Some of the major changes the DAA want are -

- 1. Day hours change from 7am - 11pm to new times of 6am & midnight.**
- 2. Removal of night-time movement cap (65 flights per night) to basically Unlimited Flights.**
Seems like DAA want a noise quota system too WITHOUT a limit.
- 3. Retention of the deviated flightpaths currently being used which is not the approved flightpath from 2007 planning permission.**

Points I implore you to consider as follows:

Introduction

The Inspector's Report has rightly concluded that the adverse impact of the Relevant Action on the surrounding communities would be too severe to justify granting permission. The proposal's projected increase in night-time activity would result in significant additional awakenings, which are well-documented to cause substantial health and well-being consequences, including increased risks of cardiovascular disease, mental health disorders, and sleep-related cognitive impairments. These impacts underscore the urgent need for stringent controls to protect affected communities.

Given these findings, it is essential that any current or future expansion of airport activity during night-time hours be strictly limited by a movement cap of 13,000 annual night-time flights, as proposed. However, the severity of the projected health and environmental impacts suggests that a complete ban on night-time flights may ultimately be necessary to ensure the well-being of affected communities. Night-time operations present unacceptable risks to health and quality of life, and the evidence strongly supports minimising or eliminating such activity to meet public health and sustainability goals.

Without such measures, the application should have been refused outright by the planning authorities, as the adverse impacts clearly outweigh any potential benefits. Therefore, the application must now be rejected to protect the integrity of the planning process, uphold public health standards, and ensure that the needs of the local community are prioritised over operational convenience.

The following expanded summary highlights the inadequacies of the DAA application, the breaches of planning conditions, and the need for a comprehensive approach to managing night-time flights, which includes the retention of the movement cap as an immediate measure and consideration of a full ban on night-time operations to safeguard public health and community welfare.

1.0 Inadequacy of DAA Application and Necessity of Movement Limit

❑ Failure to Address Noise Impacts:

- The Dublin Airport Authority (DAA) application fails to assess or mitigate the adverse effects of nighttime noise adequately.
- Average metrics like % Highly Sleep Disturbed (HSD) and L_{night} fail to capture acute impacts such as awakenings, which have immediate and long-term health consequences.

❑ Health Implications of Nighttime Noise:

- Chronic sleep disruption contributes to cardiovascular disease, mental health disorders, and reduced cognitive performance.
- The WHO highlights that even one additional awakening per night represents a significant adverse health impact, ignored in the DAA's proposals.

❑ Projected Impacts:

- The inspector has defined that more than 1 additional awakening per night as a result of aircraft noise is a significant adverse impact.
- The inspector has concluded “in conjunction with the board's independent acoustic expert that the information contained in the RD and the RA does not adequately demonstrate consideration of all measures necessary to ensure the increase in flights during the nighttime hours would prevent a significant negative impact on the existing population.”

❑ Insulation Limitations:

- Insulation measures cannot fully mitigate nighttime noise due to factors like open windows, low-frequency noise, and peak noise events.
- The WHO average insulation value of 21 dB assumes windows are open 20% of the year, making insulation less effective.
- The introduction of a new insulation criteria of 80dB L_{A5Max} is welcomed, however, without a detailed set of maps indicating who qualifies for this the decision is incomplete.
- Furthermore, the grant value of €20,000 is considered inadequate to fully insulate those homes that qualify. Comparisons to other EU countries are incomplete and do acknowledge the fact that construction costs in Ireland and particularly Dublin are close to the highest in the EU.
- It is fundamentally wrong that anybody who is so significantly affected by the negative impacts of noise from the proposed development should have to carry the cost of any mitigation works needed.
- The scheme should be redesigned to cover the full cost of insulation.
- ▣ **Necessity of the Movement Limit:**
 - The movement cap of 13,000 nighttime flights is critical to reducing noise impacts and protecting public health.
 - Without this cap, noise exposure levels will rise significantly, endangering the well-being of nearby residents.
- ▣ **Conclusion on Permission:**
 - The permission should be denied due to the DAA's insufficient noise mitigation measures and failure to address core public health risks.

2.0 Unauthorised Flight Paths and Breach of Planning Conditions

- ▣ **Deviation from Approved Flight Paths:**
 - The DAA has implemented flight paths that deviate significantly from those approved in the Environmental Impact Statement (EIS).
 - These unauthorised deviations expose previously unaffected areas to significant noise impacts, creating unassessed risks.
- ▣ **Failure to Seek Updated Permissions:**
 - The deviations breach Condition 1 of the planning permission, which requires adherence to the originally assessed flight paths.
 - No updated Environmental Impact Assessment (EIA) or planning application has been submitted for these changes.
- ▣ **Community Impacts:**
 - Affected communities have experienced noise levels without proper consultation or mitigation measures.
 - Trust in the DAA has been severely eroded due to a lack of transparency and accountability.
- ▣ **Legal and Procedural Concerns:**
 - The unauthorised flight paths undermine the planning system's integrity, setting a dangerous precedent for future projects.

- Granting permission under these conditions violates planning laws and obligations under the EIA Directive.
- ▣ **Conclusion on Permission:**
 - Permission should be unequivocally denied until unauthorised flight paths cease and comprehensive reassessments are completed.

3.0 Right of Appeal in the Aircraft Noise Act 2019

- ▣ **Legal Framework:**
 - Section 10 of the Aircraft Noise Act permits appeals of Regulatory Decisions (RDs) by relevant persons who participated in the consultation process.
 - SMTW (St. Margaret's The Ward Residents Group) qualifies as a relevant person under this framework.
- ▣ **Inappropriate Refusal of Appeal:**
 - SMTW's appeal against noise-related RDs was inappropriately denied by An Bord Pleanála, despite clear legislative provisions supporting it.
 - Denial of appeal prevents critical scrutiny of noise mitigation measures and exacerbates community disenfranchisement.
- ▣ **Importance of Appeals:**
 - Appeals are vital for maintaining transparency, ensuring accountability, and balancing airport operations with community welfare.
- ▣ **Conclusion:**
 - Denying appeals undermines public trust and violates the Aircraft Noise Act's intent to provide affected parties a voice.

4.0 Noise Quota System in the Fingal Development Plan

- ▣ **Policy Objectives:**
 - Objective DAO16 supports a Noise Quota System (NQS) to reduce aircraft noise impacts, particularly during nighttime operations.
 - The policy prioritizes community health, sustainability, and the use of quieter aircraft.
- ▣ **Challenges in Implementation:**
 - Without a cap on nighttime flights, cumulative noise impacts will persist despite efforts to incentivize quieter aircraft.
 - Current plans increase noise exposure above 2019 levels, violating noise abatement objectives.
- ▣ **Recommendations:**
 - Enforce a movement limit alongside the NQS to ensure it effectively reduces noise disturbances.
 - Align the system with best practices observed at major European airports.

5.0 Night Flight Restrictions in Europe and Implications for Dublin

- ▣ **European Comparisons:**

- Major airports like Schiphol, Heathrow, and Frankfurt enforce strict caps or curfews on nighttime flights.
- Dublin's proposed 31,755 annual nighttime flights far exceed these airports' limits relative to passenger numbers.
- ❑ **Health and Environmental Alignment:**
 - European airports prioritize reducing noise exposure to mitigate sleep disruption, cardiovascular risks, and stress.
 - Adopting the 13,000-flight cap aligns Dublin with international best practices, ensuring proportional and sustainable operations.
- ❑ **Conclusion:**
 - The proposed number of flights is disproportionate and poses unacceptable health and environmental risks.
 - Without the movement limit the Noise Abatement Objective (NAO) set by ANCA for Dublin Airport cannot be fully achieved.

6.0 Inadequacy of Insulation in Mitigating Aircraft Noise-Induced Awakenings

- ❑ **Technical Limitations of Insulation:**
 - Insulation does not address critical noise issues, such as low-frequency noise penetration and sharp peaks triggering awakenings.
 - Dormer-style housing near the airport is particularly susceptible to noise, rendering insulation largely ineffective.
- ❑ **Existing Schemes Are Insufficient:**
 - Residential Noise Insulation Scheme (RNIS) and Home Sound Insulation Program (HSIP) do not meet modern health protection standards.
 - Insulation is unsuitable for nighttime impacts and cannot substitute for operational restrictions like movement caps.
- ❑ **Alternative Mitigation Measures:**
 - Voluntary purchase schemes for residents in high-noise zones should be expanded to address the most severe impacts effectively.
- ❑ **Conclusion:**
 - Insulation alone cannot mitigate nighttime noise impacts; operational restrictions must remain central to mitigation strategies.

7.0 Health and Environmental Impacts

- ❑ **Noise-Induced Health Risks:**
 - Chronic exposure to nighttime aircraft noise increases the risks of cardiovascular disease, hypertension, and mental health issues.
 - Children's cognitive development is adversely affected, impairing memory, learning, and overall performance.
- ❑ **Economic Costs:**
 - Health-related costs, including healthcare expenses and reduced productivity, are substantial and long-term.

- For example, Brussels Airport's health cost analysis suggests similar impacts at Dublin could reach €750m annually.

❑ **Population Exposed:**

- The DAA analysis has not used the correct population datasets in determining the impacts. This underestimates the impact on the communities around the airport.

❑ **Public Health Submissions:**

- Evidence from health agencies emphasizes that noise-induced sleep disturbance is a significant environmental health risk.
- Ignoring these risks contravenes principles of sustainable development and public health protection.

8.0 Other Environmental Impacts

❑ **Use of Outdated Surveys:**

- The Appropriate Assessment (AA) relied on outdated ecological surveys that do not accurately reflect current environmental conditions.
- Failure to update surveys undermines the validity of the assessment and risks overlooking critical impacts on local habitats and species.

❑ **No AA on Full North Runway Development:**

- The AA did not assess the full scope of the North Runway development, focusing only on limited aspects of the proposal.
- Significant components of the development were excluded, leaving major potential impacts unexamined.

❑ **No Cumulative or In-Combination Assessment:**

- The AA failed to consider cumulative impacts arising from the interaction of the North Runway with other existing and planned projects in the vicinity.
- The absence of an in-combination assessment violates key legal requirements and risks underestimating the overall environmental impact of the development.

❑ **Non-Compliance with Legal and Regulatory Standards:**

- The failure to provide an accurate, comprehensive, and up-to-date AA breaches obligations under the EU Habitats Directive.
- The planning process has been compromised by this omission, exposing the development to potential legal challenges.

❑ **Potential Environmental Risks:**

- The lack of thorough assessment could lead to significant unmitigated impacts on protected habitats and species, including cumulative degradation of local ecosystems.

9.0 Recommendations and Final Position

❑ **Cease Unauthorised Flight Paths:**

- Immediately halt unauthorised deviations and revert to the flight paths approved under the original EIS.

- Conduct a new EIA to assess the impacts of any proposed deviations.
- ◻ **Retain Movement Limit:**
 - Maintain the cap of 13,000 nighttime flights to prevent further degradation of community health and well-being.
 - Implement the Noise Quota System to incentivize quieter aircraft and ensure proportional operations.
- ◻ **Refuse Permission:**
 - Granting permission under these circumstances undermines planning integrity and public trust.
 - Upholding planning law and ensuring transparent, evidence-based assessments are essential for future airport operations.

I am trying to protect my husband, our children, friends & neighbours who reside here. If these changes are approved, they will be detrimental to all our communities across Fingal and Meath and most especially to our health and wellbeing.

Yours Sincerely,
Mairead O'Keeffe
