Observation details

5. Please describe the grounds of your observation (planning reasons and arguments). You can type or write them in the space below or you can attach them separately.

I fully support local community submissions as provided by The Ward, St Margarets and Forum Groups on my behalf. I am delighted that they had the ability to constructively gather a report and assessment on the issue on behalf of the communities at such short notice. Many others in the community do not understand how to object. An oral meeting should have been granted given the significance of the issue.

I am aghast at the current impact in the area and am concerned for my future here. Unfortunately, I have not had time to read the full report as provided by the DAA however it is clear to me that the original EIAR must stand and corrective action on this matter must take place as a matter of urgency for the community. Under no circumstances should ABP accept the RA application.

As an Economic graduate of UCD I would argue that governments are being hoodwinked as to the true financial benefit of airports to their respective countries. There is emerging evidence in the UK to support the latter. An overall strategic approach to airport planning must now begin to take place and must be set up at National Level. In the interim, Dublin's north runway should be discontinued until an investigation of the matter is complete, after all, did it not function up to its permitted limit of 32 M having only the south runway to operate from for several years.

5. Please describe the grounds of your observation (planning reasons and arguments). You can type or write them in the space below or you can attach them separately.

I recognise that ABP must follow planning in relation to their decision and needless to say the EIAR clearly demonstrates that there has been a major blunder with immense ramifications for the people, of which I am one, below.
