## Observation details

5. Please describe the grounds of your observation (planning reasons and arguments). You can type or write them in the space below or you can attach them separately.

I have lived in the Wotton for my whole life (45 years). There has always been some airplane noise as we live near an airport however they would have always been high in the sky and having taken off the original runway flown out a few miles towards Blanchardstown and crossed the Wotton heading back towards their destination. The noise from these flights was barely noticeable.

When I built my own house in 2006 just 200 meters from the house I grew up in, there was no talk of airport noise no special insulation or sound proofing required. When the airport got planning permission for the new runway, there was no consultation for the Wotton as we were too far away and the flight paths being considered would be nowhere near the neighbourhood. If there was any indication that the planes would be flying directly over my house I would have been involved in the consultation process.

Then in August 2022 only the day before the new runway opened there was still no indication of what was about to come. From that point, suddenly, airplane noise became an everyday occurrence with large planes flying directly overhead at c 2000ft, rattling the windows and forcing me to stop mid sentence if speaking. As my wife and I work from home, this is causing considerable disruption to both our working days as well.

Since the adjusted of the SIDs in February, my house now lies almost directly under the 30 degree straight out route which means the frequency of the planes and the constant interruption to my daily life has only increased. According to the Airports own documents this should be planes heading to the Iberian peninsula but it includes a lot of transatlantic flights. The noise of these planes can be heard throughout the house. It is having a massive impact on daily life even with the limited hours the new runway is being used for.

5. Please describe the grounds of your observation (planning reasons and arguments). You can type or write them in the space below or you can attach them separately.

The changes proposed by DAA to remove nighttime caps and extend daytime hours would only exacerbate the issues currently experienced. The DAA should be using flightpaths aligned to the original planning permission and restore the tranquil country living that I have always known and which I was never given an opportunity to object to losing.

An oral hearing is absolutely necessary given the gravity of the situation.

## Supporting materials

6. If you wish, you can include supporting materials with your observation.
