Observation details

5. Please describe the grounds of your observation (planning reasons and arguments). You can type or write them in the space below or you can attach them separately.

We are not second class citizens because we live near Dublin airport which has expanded ignoring Fingal County Council regulations in regards to flights and flight numbers. NOISE
D.A.A. knowingly breached these regulations. ~~and~~ I foresee no possibility that they will be compliant with regulations in the future - they are not to be trusted!
W.H.O guidelines are being breached!
Consistent health studies have demonstrated the detrimental effects of noise pollution especially at night affecting blood pressure, mental health etc.
With hybrid working - not more people working from home. There should be not more monitoring stations of noise and emissions pollution.

Section 5 continued.

Emissions: What are the health issues that local people are being exposed to. Local community health services need Regional Health services should be making available health forms and criteria assessed. pneumonia, cardiovascular symptoms, mental health etc. Because of increased riskier destructions ^{this} may lead to vector born diseases expanding and spreading easier.

As a community, we have always understood the symbiotic relationships between community and the airport, but we have now reached a level of damage and disruption to the local communities that is against basic human rights and exposes North County Dublin to conditions that would NOT be tolerated in other First World countries. There is a strong likelihood that D.A.A will attempt to manipulate night time information so a noise quota system will be unacceptable.

Expansion of Dublin Airport will make unhabitable the Northside of Dublin
