Observation details

5. Please describe the grounds of your observation (planning reasons and arguments). You can type or write them in the space below or you can attach them separately.

My areas of observation and concerns are as follows:

- The permitted Noise Zones in their recent submission is totally different to the Environmental impact statement for the permission already granted in 2007.
- The negative effects on the environment are massive and we have one of the worst records in the world in terms of GHG emissions.
- The Daa are not using the flights paths used in their 2007 Planning Permission. It is clear from the recently submitted applications from the Daa, that they have used the current flight paths for their drawings instead of the permitted noise zones from the original planning permission in 2007. If this was permitted then a precedent would be set that if the Daa don't like the conditions then they can ignore them and do what is more convenient. Their future projections are not valid because they are not based on their 2007 Planning permission.
- The Daa are in breach of the passenger Cap in 2019 and will likely breach it again this year
- The Daa consistently breach the 65 movement cap per night.
- Excessive aircraft noise causes serious negative health effects and illnesses.
- Extending day hours with unlimited night flights using a pure noise quota system will cause serious sleep disruption during the night and this will have negative impact on residents' mental and physical health.
