Observation details

5. Please describe the grounds of your observation (planning reasons and arguments). You can type or write them in the space below or you can attach them separately.

The so called 'permitted' noise zones in the daa's observation do not match the Environmental Impact Statement for the original permission acceptance of the relevant action by ABP and thus retention of the flightpaths would set a precedent that ABP conditions (which reflected community concerns) should be ignored if inconvenient.

- The daa are breaching the passenger cap
- daa are consistently breaching the 65 movements cap per night, having increased night flights since the original planning permission was given in 2007.
- daa are not using the flightpaths they used in their 2007 planning permission. Again they should have anticipated the necessity of complying with ICAO procedures for operating Parallel Runways (2004)

Other European cities are imposing night curfews at their airports and also limiting tourism to sustainable numbers.

Given the potential impact of Climate Change especially driven by upper atmosphere burning of fossil fuels, daa should be limited in their development

The economic benefits of daa need to be ~~balanced~~ ^{balanced} with the negative effects on the local population. Annualising noise impacts does not lessen the effects

- 5 Please describe the grounds of your observation (planning reason and arguments). You can type or write them in the space below or you can attach them separately.

Section 5 continued.

While IAA has a noise reporting helpline there is nothing to show that a report results in anything.

Unlimited night flights using pure noise quota system is only going to cause more noise exposure. It doesn't make sense given how severe the current noise situation is.

Given that the original application went to an oral hearing where local residents and stakeholders could voice concerns it may be useful to have another oral hearing on this application. Many more residents are now impacted by airport noise due to the extensive expansion of housing in Bungal and Meath.

Supporting materials

6. If you wish, you can include supporting materials with your observation.

Supporting materials include:
