**An Bord Pleanála Reference: ABP-310466-21**

Good afternoon,  
Please see attached and below a reply from Ms. Trish Smullen and Dr Clare Glanville (Senior Geologist) on behalf of Geological Survey Ireland (a division of the Department of Environment, Climate and Communication) for the subject below. Please forward an acknowledgement of receipt to [CorporateSupport.Unit@decc.gov.ie](mailto:CorporateSupport.Unit@decc.gov.ie) at your earliest convenience.

Regards,  
Enda Brady,

**Subject:** Request for electronic copy of notice for ABP 310466-21

Good afternoon,

Corporate Support Unit received the attached hard copy correspondence in relation to a quarry development at Windmillhill, Rathcoole, Co.Dublin (ref : ABP-310466-21). The offices of the Department of Environment, Climate and Communications are still closed due to the Covid 19 pandemic restrictions and we are unable to access complete hard copy notices. Could you please forward an electronic copy of this notice to [CorporateSupport.Unit@decc.gov.ie](mailto:CorporateSupport.Unit@decc.gov.ie) at your earliest convenience.

Thank you for your assistance.

Regards,  
Enda Brady,  
Corporate Support Unit.

**Re: Quarry development at Windmillhill Rathcoole, Co.Dublin - application for substitute consent**

**Your Ref: ABP-310461-21**  
**Our Ref: 21/295a**

Dear Sir/Madam,

Geological Survey Ireland is the national earth science agency and is a division of the Department of the Environment, Climate and Communications. We provide independent geological information and advice and gather various data for that purpose. Please see our [website](#) for data availability. Use of our data or maps should be attributed correctly to 'Geological Survey Ireland'.

With reference to your letter dated the 16 July 2021, concerning application for substitute consent for the quarry development at Windmillhill Rathcoole, Co. Dublin, Geological Survey Ireland would like to make the following observations and comments in relation to geoheritage and other more general aspects.

We are pleased to see use of our Bedrock, Quaternary, Subsoil, Groundwater Aquifer, Vulnerability, Recharge, Source Protection Zones, Historical Groundwater Flooding, Landslide Susceptibility, Geoheritage, Aggregate Potential and Historical Quarries maps and datasets within the Remedial EIAR (rEIAR), by Golder Associates Ireland Limited.

#### **Geoheritage**

Geological Survey Ireland is in partnership with the National Parks and Wildlife Service (NPWS, Department of Housing, Local Government and Heritage), to identify and select important geological and geomorphological sites throughout the country for designation as geological NHAs (Natural Heritage Areas). This is addressed by the Geoheritage Programme of Geological Survey Ireland, under 16 different geological themes, in which the minimum number of scientifically significant sites that best represent the theme are rigorously selected by a panel of theme experts.

County Geological Sites (CGSs), as adopted under the National Heritage Plan, include additional sites that may also be of national importance, but which were not selected as the very best examples for NHA designation. All geological heritage sites identified by Geological Survey Ireland are categorised as CGS pending any further NHA designation by NPWS. CGSs are now routinely included in County Development Plans and in the GIS of planning departments, to ensure the recognition and appropriate protection of geological heritage within the planning system. CGSs can be viewed online under the Geological Heritage tab on the online [Map Viewer](#).

The audit for South County Dublin was carried out in 2014. The full report details can be found [here](#). **Our records show that there are no CGSs in the vicinity of the quarry development.**

#### **Other Comments**

We would encourage An Bord Pleanála to use our online datasets that may be of use in assessing planning applications and for assessing Environmental Assessment Impact Reports (EIAR). Further information on our Geoheritage, Bedrock, Subsoils, Groundwater, Landslide Susceptibility and Minerals datasets can be found on the online [Map Viewer](#). Please find attached a list of our current publicly available data sets that should be considered where appropriate.

I hope that these comments are of assistance, and if we can be of any further help, please do not hesitate to contact me Clare Glanville, or my colleague Trish Smullen at [GSIPlanning@gsi.ie](mailto:GSIPlanning@gsi.ie).

Yours sincerely,

Clare Glanville
