

My name is James Wade and I live in Clonsilla. I am 12 years old and I go to St Francis Senior School in Clonsilla.

We and my friends from school wrote out our worries about the sewerage plant being built.

My worry is that there are loads of young children in North Dublin that will be growing up with that smell. Their childhood will be ruined. Also the smell everyday when you go to work or out with your friends. You won't be able to go on walk on the beach or the park without blocking your nose because of the smell. There's also a summer camp in the local park and kids won't want to go to it. They don't want to have to smell the sewerage. School yards will also be effected and that's when schools don't get sports done.

I am handing in the worries my friends have.

Thank you.
