Re: Greater Dublin Drainage Project consisting of a new wastewater treatment plant, sludge hub centre, orbital sewer, outfall pipeline and regional biosolids storage facility
Townlands of Clonshagh, Dubber and Newtown, County Fingal and Dublin City

Dear Madam

An Bord Pleanála has received your recent submission in relation to the above mentioned proposed development and will take it into consideration in its determination of the matter. A receipt for the fee lodged is enclosed.

The Board will revert to you in due course with regard to the matter.

Please be advised that copies of all submissions / observations received in relation to the application will be made available for public inspection at the offices of Dublin City Council and Fingal County Council and at the offices of An Bord Pleanála when they have been processed by the Board.

More detailed information in relation to strategic infrastructure development can be viewed on the Board's website: www.pleanala.ie.

If you have any queries in the meantime please contact the undersigned officer of the Board. Please quote the above mentioned An Bord Pleanála reference number in any correspondence or telephone contact with the Board.

Yours faithfully,

Kieran Somers
Executive Officer

REF: ABP301908-18. Greater Dublin Drainage project in Clonshaugh

Dear Sir / Madam,

The attached 8202 signatories wish to strongly object to the proposed plans of Irish Water and Fingal County Council to build a sewage plant along the grounds of the N32 / R139 in Clonshaugh.

Despite over 14,000 signatures from local residents and surrounding areas submitted to Fingal County Council and Irish Water in 2013 objecting to the sewage plant in Clonshaugh they have ploughed ahead with their plans.
As there has been no major publicity about the plant over the last number of years, residents thought this nightmare had gone away. We now find ourselves in a race against time to save our community and our environment.

Irish Water have had over four years to carry out their investigations using professional engineers, where as we the public who do not have a background in engineering have seven weeks to try and understand the technical reports and put in our submissions / objections. Schools are closed how are they supposed to voice their submissions / objections?
Where is the fairness in that?

AN BORD PLEANÁLA
Received: 17/08/18
Fee: €50 cash
Receipt No:

Environment:

- Bats and their roosts are protected by Irish and EU law because all species have declined and some are threatened or endangered. We note that there were bat findings on the proposed site and along the route for the orbital pipe from the Jacobs report.
- Irish Water proposes to pipe the waste water into the Irish Sea through Baldoyle and Portmarnock. The Jacobs report admits that the southern outfall pipeline which would come from Clonshaugh site to release effluent into the sea is a bad option. The report states the other two sites are still feasible and that the Northern outfall at Lusk would be less damaging to the environment. The outfall from Clonshaugh will end at Ireland's eye, Rockabill to Dalkey Island which is a special area of conservation.
- Baldoyle Bay is also a Special Protection Area and protected under EU Law. It is host to a selection of species protected under EU Law such as Brent Geese, Ringed Plover, Bar-tailed Godwit, Shelduck, Golden Plover and Grey Plover.
- The wetland habitats contained within Baldoyle Bay SPA are identified of conservation importance for non-breeding (wintering) migratory waterbirds. Therefore the wetland habitats are considered to be an additional Special Conservation Interest and are protected by the EU habitats directive.
- Brent geese protected under EU law also land in Priorswood Park and neighbouring areas during winter months. I have attached a picture of the Brent Geese in Priorswood Park. These birds were also in the Park and in the green in Newbury of February 2018. This would suggest the area is a migration flight path for Brent Geese.
- Portmarnock beach also known as the velvet strand is the only blue flag beach we have. The beach is used by thousands every year and is a famous tourist destination.
- Due to the size of the plant if there is a failure it will release a huge amount of untreated waste into the Irish sea close to two special areas of conservation and destroy our beach. Dollymount beach is a prime example of how untreated waste water can destroy a beach. We cannot go into the water as we can physically see stools, baby's nappies and sanitary products floating in the water at times.
- There is such a risk for a major environmental disaster with a plant this size. The plant is designed to pump 3,600 litres of waste per second, if there is a system fail there will be no way of stopping it. The east coast will be destroyed. Take for example the plant in Balbriggan where there was recently an issue with raw sewage pumping into the sea for over 36 hours before anyone noticed. We need to protect our coastline, wildlife and seas from such a disaster.
- The waste water will only get second grade treatment; this will have a negative impact on marine life and damage our water quality. Also Ireland will be the only country to pump sewage into the sea at such a low grade treatment.
- If there is a pump failure the system is designed to fall back towards the Tolka River in Finglas. We cannot allow sewage be pumped into our rivers and lakes.
- The plant will attract flies, rodents and birds to our area
- Irish water advised there will be no odour from the plant. Residents near the Ringsend plant have suffered with this for years and it is only a fraction of the size of what is proposed for Clonshaugh so of course there is going to be an odour and it will be unbearable

Impact on residents, businesses and sensory receptors:

- This plant if built will give a whole new meaning to "neighbours from hell" for the 10,500 residents and businesses of Baskin, Clonshaugh, Priorswood, Moatview, Belcamp, Darndale, Caragh Park, Bonnybrook, Kilmore, Northern Cross, Belmayne, Clarehall to name a few. Many other communites will be effected by the downwind from the proposed sewage plant such as Burnell, Newtown, Belmayne, Clongriffin, Ayrfield, Donaghmede, Baldoyle, Sutton and Portmarnock. Tens of thousands of people will be affected by the sewage plant.
- The selected site in Clonshaugh is a green belt area
- The plant will have a terrible impact on Anovocare Nursing home and St Michaels House, we should be protecting the elderly and vulnerable not dumping a super sized sewage plant on their door. How are they supposed to enjoy the environment and fresh air when this plant will be directly across the other side of the road from their buildings?
- Craobh Chiaran GAA club and the AUL are big sports clubs used by many from the area and further afield, how will teams be able to play their games in amongst the smell and pollution of the plant?
- The Clayton Hotel and The Hilton Hotel bring a lot of tourism to the area which is greatly needed. Tourists will not want to book these hotels to stay beside a huge sewage plant. Clonshaugh is beside the airport which brings in millions of tourists every year. Do we really want people landing in our country and the first thing they are met with is the smell of a sewage plant? We should be encouraging people to come to our country not turn them off.
- Circle K and the many neighbouring shops provide jobs for local people. We think that these businesses are going to suffer greatly at the hands of the sewage plant as again we nor other visitors to the area will want to eat in a restaurant beside a sewage plant or stand around in the foul stench getting fuel.
- Beaumont Hospital and the several schools we have in our area will be negatively impacted. What about the childrens break times in their school yard? The livelihood of the Jones family will be destroyed by locating the plant on their farmland and will seriously threaten that of neighbouring farmers. The traveller's homes Cara Park are directly across the road from the proposed plant. The travellers have resided on this site for years.
- Belcamp / Priorswood Park is directly opposite the proposed sewage plant. The park is the heart of our community and is used by thousands of residents. The park has two playgrounds, a golf course, tennis courts, football pitches and the yearly summer camps are held here. Football leagues are held in the park and teams come from everywhere for matches. The summer camps run every July and are attended by hundreds of children. When the weather is warm patients from St Michaels House are brought to the park by staff for fresh air. The park is used daily by residents. Tourists from The Clayton Hotel also use the park, especially during the summer time you will meet tourists in the park. Brent geese protected under EU law also land in this park and neighbouring areas during winter months.
- If the plant is built on the proposed site the park will no longer be an amenity that can be used by residents or tourists and will have a devastating impact on our lives.
- Gannon Homes are currently building hundreds of houses and apartments on the same grounds as the proposed plant. What about the people who will buy these homes and have huge mortgages to end up living next door to Ireland's biggest toilet.

AN BORD PLEANÁLA
TIME DATED 17 AUG 2018 FROM
LDG-

Impact on Traffic:

- The Clonshaugh Road is the main connecting road to the R139 and M50. During peaks times when people are commuting to and from work the traffic on the Clonshaugh Road is bumper to bumper. The queue to get onto the N32 from the Clonshaugh road can be back as far as Northside Shopping Centre and vice versa when coming home. When we can eventually get onto the N32 we then have the queue to get onto the M50. The plans for the proposed sewage plant include 26 tanker trucks travelling to and from the plant day and night carrying raw sewage from septic tanks. The road does not have the capacity for this volume of traffic and is too narrow for such large trucks.
- The proposed plant is also directly under the main flight path for Dublin Airport. Due to our areas proximity to the coastline the presence of a sewage plant would attract a huge volume of seagulls in the area which would present a bird hazard and safety risk to aviation.

Health:

The proposed sewage plant will undermine the quality of life for thousands of local residents and have a huge impact on our health.

A wastewater treatment plant due to its working conditions is considered as a major source of aerosols. Atmospheric emissions and liquid effluent can also be hazardous to human health. Emitted bacteria can be transported over considerable distances by wind. The potential health hazards related to WTP aerosols include respiratory symptoms, digestive symptoms, headache, unusual tiredness, concentration difficulties and skin diseases. The transferring of waste from tanker trucks to the sludge hub will without doubt leave particles airborne.

Also chemicals used within the plant can be harmful to human health, Methane, Hydrogen Sulfide, Ammonia, Chorline and Chlorine Dioxide.

Irish Water said there will be no odour from the sewage plant. Then then admitted they will be opening vents at different times throughout the day to release the build-up of gases. What do they think is going to come out of the vents? How do they expect people to live in a lingering smell of human waste? The odour will be worse in the summer months especially when the humidity is high.

There is a case study available online that was carried out in Greece on the effects of living near a waste water treatment plant.

The link is https://www.hindawi.com/journals/jeph/2016/8467023/

Here is an abstract from their findings:

In accordance with these studies, we recorded increased odds for the inhabitants who lived near the WTP to develop neurological and myoskeletal symptoms at 3.37 and 1.98 times, respectively. Moreover, sewage workers and those who live in the vicinity of a WTP have higher morbidity with intestinal and respiratory system illnesses. In order to ensure public health, health of workers, and good quality of life, it is necessary to determine the composition and concentration of microorganisms in the air. Skin contact, ingestion, and inhalation are the three major routes of exposure to airborne particles. Microorganisms that are associated with intestinal infections such as Salmonella spp. and enteric viruses are thought to be transmitted through inhalation.

- In the local environment, we won't be able to do simple things like sit out our back gardens in the summer, hang out our clothes on the line, have a barbeque, bring the children to the park or go about our daily chores due to the foul smell.

Irish Water and Fingal County Council have very much kept the residents of Clonshaugh and surrounding areas in the dark regarding plans for the sewage plant and drip fed information when asked. Any meetings that were held took place at times when people were in work or collecting their children from school. They were not held at a convenient time such as evenings or weekends.

Still as of today so many people in Clonshaugh, Darndale, Moatview and other neighbouring areas are completely unaware of these plans. The planning permission was sought at a very convenient time when the government is on summer holidays and a lot of people from the area are also away and not here to object.

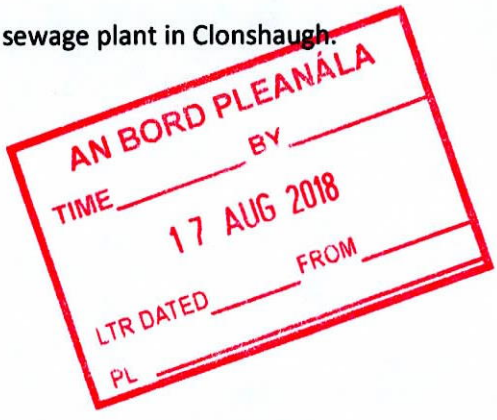
Neither our area nor that of the surrounding areas of the proposed plant will be serviced by the plant. Fingal County Council has pushed the plant as far out of their area to the border as they can. It is literally on the borderline of Dublin City Council. Clonshaugh is yet again a dumping ground for projects other areas do not want. It is completely unfair to expect the residents of Clonshaugh and surrounding areas to put up with the pollution from this plant and live the rest of their lives in an unhealthy and smelly environment. We have paid a lot of money for our homes and are happy where we live. The majority of people do not have the money to get up and move somewhere else to avoid what is possibly coming down the line nor should we have to.

These plans have caused considerable stress and anxiety for residents.

While we understand the need for investment in our waste water treatment system we do not think a plant four times the size of Croke Park is suitable to be put in amongst any residential area. A number of smaller plants should be built in the areas they are servicing. If Irish Water and Fingal County Council think a plant this size is needed then they should find a site away from a densely populated area to build this and pump it out to sea where there will be no effect on special conservation areas. There are plenty of green spaces in Fingal to build such a plant that would not be a burden on a community. Please remember as per the Jacobs Tobin report the other two sites at Annsbrook and Newtowncorduff remain an option. The only benefit of building the sewage plant in Clonshaugh to Irish Water is cost. Surely the environmental damage to our area and coastline and the health problems of thousands should far outweigh any capital costs benefit.

If this plant is built here in Clonshaugh it will be detrimental to our area. It will cause utter devastation for our residents and on our community as a whole.

We plead with you not to grant permission for the building of this sewage plant in Clonshaugh.



Kind Regards

Therese Doyle

**** URGENT NOTICE ****

Closing date for obejctions against the Giant Sewerage Plant in Clonshaugh is Friday 17th August 2018.

A lot of people think that because they don't live in Clonshaugh or near the proposed site they will not be affected by this. The smell from the plant is going to affect everyone on the North side of Dublin. Have you ever smelled Bewleys Coffee factory in your area?

- Irish water has applied for planning permission to build a sewerage plant 4 times bigger than Croke Park and 65 foot high between the Clayton Hotel and Bewleys Coffee factory.
- Sewerage from Kildare, Clonee, Dunboyne, Trim, Dunshaughlin, Rathoath, Ashbourne, James Connelly memorial Hospital Blanchardstown and some parts of Dublin will be pumped into Clonshaugh. No houses from our area or surroundings areas will be serviced by the plant. We are only getting the pollution and smell.
- Plant will treat waste for over three quarter of a million people
- Vents will be opened to release gases at different times of the day, and remember this will be over 4 times the size of Croke Park so imagine how bad the smell will be
- The day the plant opens 13 tanker trucks will be delivering sewerage from septic tanks from homes and businesses that are not on the piped system to the sludge hub, this will increase to 26 per day by the end of the first month. We don't know if this number will increase further yet. All of this is coming up the N32/R139. When they are transferring the sewerage into the hub sewerage particles will naturally be airborne which will make the smell in the area even worse, not to mention we will be inhaling it.
- Waste will be pumped into the Irish Sea through Baldoyle and Portmarnock to Ireland's eye, approx. 6 miles from the shore. Waste will only be second grade treated, which is a basic treatment one step away from raw sewerage
- Portmarnock beach is the only Blue flag beach we have, what is pumped out will wash back to shore with the tides. The beach will be destroyed.
- If this plant goes ahead we will not be able to enjoy simple things like sitting in our gardens, hanging out our clothes, use our park, and open windows in our homes. BBQs will be a thing of the past. Most importantly, children will be greatly affected with summer camps, playground areas, football pitches and playing outdoors in general.
- Fine Gaels Eoghan Murphy is the minister over Irish Water. Please write / email him and voice your concerns, eoghan.murphy@oir.ie
- If you wish to send your own personal objection to An Bord Pleanala, this needs to be

received into their office before Friday 17th August. The fee is €50.00.

- We will cover the fee for all signatures we collect and personally hand deliver them into An Bord Pleanala

Meath, Lusk and Rush got this plant moved from their area by getting together and protesting.

Please make the time to object, if we don't make enough noise and show that each and every one of us do not want this in our area we are going to be in a lot of shit!

REMEMBER THE PLANT WILL NOT SERVICE ANY OF OUR HOMES

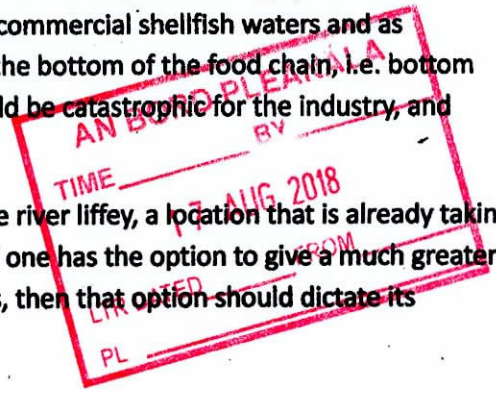
(1) I feel that many of the locations selected for study proved viable from a technical point of view, certainly any one of the last three would meet all the requirements. I therefore also feel, the location Clonshaugh, has been chosen for the prime reason that it is on the very edge of the Fingal area of control. This location will disturb the least amount of people in the Fingal area and therefore will for your council, have smaller political fallout or electoral consequence. Yes you will deeply upset some of your people but not that many! On a project of this scale a couple of kilometres of pipe work, one way or the other, is of little consequence, so I am not inclined to buy into the argument that it was selected because of the shorter pipe runs.

(2) I feel that the argument for not up-grading the existing W.W.T.Plants rather than the building of such a very large U.W.W.T.P. so close to a large centre of population (a population it will not serve) is not a valid argument from an engineering point of view.(It is argued that multiple outfalls would be more damaging to the environment) but they do not have to have multiple outfalls, one way or another they will have to pipe all the effluent from all the areas served over an extensive network of piped drains ! (This will be raw untreated material and subject to blockages!) Much the same pipe network could be used to pipe treated effluent from a collection of smaller and or upgraded plants (less prone to blockages) to a facility capable of applying tertiary treatment before sending it to a marine outfall. There may be a counter argument about cost, but remember this is about a development for the long term future; cost should not be an argument for not giving proper consideration to other possible solutions.

(3) We are also being asked to consider this proposal without knowing what engineering is being proposed for this facility, other than the general statement "it will be to the best international standards" I am sorry but I do not trust the politics of this country. I want to know what class of equipment will be installed!! After all a car is a car, but the question is will it be a 1920s modal T Ford, or a 2018 Rolls Royce. The argument that you cannot design the plant until you have the site is bogus. You know the type and size of facility your planning and the site requirements, so irrespective of which site you pick there is no reason for your not having a full set of plans, along with a list of the critical mechanical / electrical plant you intend to install along with the specifications, and a clear statement as to the method of such selection. How will the site be managed? What level of computerisation will be installed? How many staff? Will it be staffed on a 24 hour bases? What methods of odour control do you intend to use? Do you intend to install Tertiary treatment? If so what type? UV/ chemical?

---

(4) I also have serious concerns about the proposed location of the marine outfall which if it goes ahead will be just to the northeast of Howth head. This outflow will be from a plant serving up to 700,000 P.E. and will be capable of expansion. This outfall will be close to commercial shellfish waters and as everyone knows shellfish are termed crustaceans and are at the bottom of the food chain, i.e. bottom feeders. If anything were to go wrong the consequences would be catastrophic for the industry, and could pose a serious risk to human health.



Also within a short distance of this outfall is the estuary of the river liffey, a location that is already taking a serious outflow from an U.W.W.T.P. at Ringsend, I feel that if one has the option to give a much greater separation of the outflow from two very large U.W.W.T.Plants, then that option should dictate its location.

Comments: Portmarnock beach is the only one on the east coast to have been given a blue and green flag. If this plant goes ahead with the proposed treatment of sewerage it will destroy sealife and cause an environmental disaster. Initially we were told that the water would be given tertiary treatment and clean enough to drink..now only secondary treatment is being proposed. As part of a group of year round sea swimmer, one of many who use the beach regularly for health and recreation purposes, we will also be at risk

from poluted water. Also, residents in Swords have had major problems with smells emitting from the plant there which is smaller than the proposed plant. Therefore it is more than likely that all of north Dublin will be affected by air pollution if this goes ahead.

86. Name: Breda doyle 4 clonshaugh meadow (tdoyle@dsg.ie) on 2018-07-11 19:19:55
Comments: This is a highly populated area. We have childrens schools and and a hospital not even 10 minutes from where they are planning to put this monster sewerage plant. What about the environment and the health of everyone in the area !! I hope the government realise its not acceptable to put this in the middle of a residential area. Why dont they put it where they live and see how they get on.

100. Name: Noel Doyle Clonshaugh Meadow (noeldoyle5151@gmail.com) on 2018-07-11 20:19:
Comments: I don't want this in our area. It will destroy our environment and our health. Minister James Reilly kicked this up the road to us from rush because he promised he would not let the plant be built in rush when he got into government. As his newspaper article said "not in my back garden". Well we don't want it in ours. Where are all the TDs we voted in, they should be representing us and helping to put a stop to it.

---

218. Name: Tony Mc Gowan (tony.t.mcgowan@gmail.com) on 2018-07-16 11:40:26
Comments: This should not be given the go a head, NO RISK ASSESSMENT, remember what happened in Scotland, BEACHES DESTROYED. Why should sewerage from Meath and Kildare be pumped to coolock, when there is a lot of land free in these counties,AS for the smell, it will be horrendous,you just have to go to shankill to smell the sewerage.

Comments: Terrible place locate a dumping ground - 1. You should not put a dumping ground so near to residents, it can be toxic and will ruin the area. 2. Near the airport, the smell will waft and disgust travellers, you should never try ruin our tourism. First impression of people visiting will be the gross smell. Great idea. 3. It should be in a remote area that effects no one! Does no one have a clue how to run things in there at all. First this and now the buses

326. Name: Orna O Beirne (ornaobeirne@hotmail.com) on 2018-08-03 18:04:09
Comments: The fear for the impact this will have on our health and also the natural

habitat we enjoy here in Portmarnock. Also fears we leakage from the proposed plant into the sea. Mother Earth is suffering due to the abuse that have been inflicted on her, more needs to be done to protect her - this is our home and we need to take action now to protect what we can, rather than leave it for our children and grandchildren to deal with in the future to come.

Comments:

---

398. Name: Pamela Sullivan (pamela.sullivan76@gmail.com) on 2018-08-09 14:40:38
Comments: In addition to all the points noted, this site is located in a densely populated area, which is growing with a large amount of housing construction continuing. It is also in very close proximity to schools, a hospital, nursing and care homes. On top of this, it is close to the country's international airport. I'm sure the state does not want the smell of raw sewerage to be the first impression visitors to our country have. As such, this proposed site is most likely the most unsuitable place in the country to build such a plant.

448. Name: Lena Strzelczyk (lenastrxelczyk@gmail.com) on 2018-08-09 20:30:20
Comments: I strongly object to the giant waste water treatment plant being build in Clonshaugh ! I believe the plant will seriously affect the quality of life of not only people living in the area but also other Dublin residents. Portmarnock beach, near which the waste is planned to be pumped to, is a popular destination for many people living in the neighborhood as well as those living in the city centre. In fact I chose to buy my house in Clongriffin due to its proximity to the Portmarnock beach. I have moved to the area only recently but I visited Portmarnock beach long before and it was always busy with families enjoying their Sundays by the seaside, children playing at the beach, local teenagers playing volleyball at the beach, the elderly enjoying walks along the coastline. And this all is going to be destroyed. In addition, the gases produced by the plant will be a health hazard to all people living in the nearby areas.

Comments: I object to the building of this plant under the following
1. the plant is located too close to a densely populated area with many schools in the vicinity.
2. Irish water has already been criticised by the EPA for not treating sewage properly and allowing raw sewage into the sea. (The European Commission is taking Ireland to the European Court of Justice because of ongoing failure to ensure that waste water is adequately collected and treated. "It is essential that Irish Water completes all infrastructure and operational improvements needed to bring Ireland into compliance," the EPA says.)
4. The increase in traffic caused by the trucks will put increasing pressure on an already

717. Name: kayleigh crilly (kayleighcrilly@gmail.com) on 2018-08-10 12:15:48
Comments: the idea of building such a plant in a residential area. another example of how our government is abour profit, not people. There is plenty of areas in ireland that are not built up residential areas that would not be so greatly affected. i think this one needs to go back to the blue prints !

724. Name: Chelsie Crowe (chelsiec933@hotmail.com) on 2018-08-10 12:20:23
Comments: We do not want a sewage plant in our area. Especially because it doesn't even serve our area. We do not want this disgusting air pollution in our community preventing kids from going out to play, people hanging out their washing and just the general stink that this plant will produce. Build it in an area that it serves

836. Name: Antoinette Bolger (antoinettebolger@yahoo.com) on 2018-08-10 13:52:39
Comments: I object on grounds of grounds. environmental impact it will have on local wildlife.

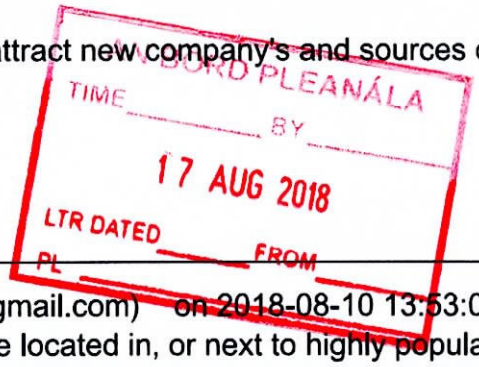
The close proximity to schools, local services, local amenities, and people's homes.

The devaluation of property within the area

Air quality within area, and potential health problems cause by poor air quality.

The impact this plant will have on area to attract new company's and sources of employment to the area.

Risk of contamination of local water table.



---

837. Name: Ken Murray (contactkenmurray@gmail.com) on 2018-08-10 13:53:03
Comments: This kind of plant should not be located in, or next to highly populated areas. There is plenty of land with good motorway access in less populated areas that would be better suited.

AN BORD PLEANÁLA
TIME
17 AUG 2018
LTR DATED FROM
PL

937. Name: Darren Kelly (darkelly27@gmail.com) on 2018-08-10 15:24:36
Comments: we dont want this in our area

938. Name: Gerard doran (ger.doran0@gmail.com) on 2018-08-10 15:25:30
Comments: Don't let this happen theres enough things that stink living in dublin without adding this to the list

939. Name: Barbara Ryan (babsmryan@gmail.com) on 2018-08-10 15:26:08
Comments: This will affect people health and quality of life and should not be put on the northside of Dublin, if it is required for the country to function it then needs to go in a non residential area where it will not impact on citizens and their homes and the air we breath and most importantly the air our children breath !

940. Name: Julie (julzh90@gmail.com) on 2018-08-10 15:26:36
Comments: No way would I agree and not sign this petition to prevent it.

941. Name: Nicola Byrne (nicolabyrne2017@gmail.com) on 2018-08-10 15:30:29
Comments:

942. Name: Shane Carroll (shanecarroll87@gmail.com) on 2018-08-10 15:32:13
Comments: No way can you put a sewerage plant near residential housing

943. Name: Samantha O'Connor (soconnor750@gmail.com) on 2018-08-10 15:32:36
Comments: It is not suitable to have such a large sewerage plant situated in a highly populated area. Also from my understanding, the waste out pipe is just off portmarnock beach which is one of the most popular northside beaches.

Comments: These communities are already being affected by the new proposed bus routes, and now you want to drive trucks through our streets. We don't want the smell or the pollution. We want to sit in our gardens and open our windows to breathe in fresh air, not that foul smell. It's not even going to service any of the houses around the area. NO NO NO !!!!!! Build it in the areas its going to service. They wouldn't accept our sewerage in their areas

Comments:

1443. Name: Sinead finn (sineadd38@gmail.com) on 2018-08-11 08:26:40
Comments: Stand up and refuse this plant that is goin to destroy our neighborhood and stop our children from playing in the park due to smell.. we need to stop this

1444. Name: Charlotte McGowran (mcgowran320@gmail.com) on 2018-08-11 08:27:25
Comments: I strongly object to the proposed sewage plant in Cool ocker.

1445. Name: Tanya Gunnery (tanyagunnery1984@gmail.com) on 2018-08-11 08:27:55
Comments: Belcamp avenue

100% AGAINST the proposal of this sewerage plant

1446. Name: Martina lyons O neill (martiilyons@yahoo.com) on 2018-08-11 08:28:27
Comments: The impact of this on the area is too damaging.. the area already has it's on going issues with drugs, crime unemployment.we don't need to be living next door to a giant sewage plant too. Maybe a nice site could be found in malahide or portmarnock....surely there'd be no objections there...why not build a giant youth facility or playground instead.

1447. Name: Rachel leech (rachelleech@live.ie) on 2018-08-11 08:28:59
Comments: No thanks please

Comments: I was witness to the damage done to east wall, sandymount and ringsend with the installation of an incinerator.
Everything the residents worried about cane true...rodents. flies...smell...just disgusting. This cannot be allowed to continue in such a densely populated area.

Comments: This is beyond belief that someone would want to dump sewage to pollute an area like Lambay Island or Irelands Eye which are 2 beauty spots that attract a lot of tourists to Howth and Portmarnock. There is also a hotel beside the treatment plant that residents won't be able to open a window in. It's hard to imagine anywhere less suitable for this.

1920. Name: Karen Shannon Doyle (karenshannondoyle@gmail.com) on 2018-08-12 16:03:22
Comments: A sewage plant of this size is inhuman to all those living near and in

surrounding areas. Basically the whole of north Dublin. I worry about our future health if this goes ahead and the effect it will have on the value of our houses. They are bound to decrease in value. It will also effect tourism as I don't think anyone would want to stay in the hotels next to a sewage plant. Tourists getting off the plane are going to get a big whiff of shit as they walk down the steps of the airplane onto our so called Emerald Isle where I imagine they dreamed of lots of green fields and FRESH AIR. I think it is an absolute disgrace and insult that this is actually being considered. You wouldn't see it being put on the Southside of Dublin and why on earth are we taking on Fingal County Councils shit when it's nothing to do with us. We are under Dublin City Council.

---

2034. Name: John Mackin (j-mackin@hotmail.com) on 2018-08-13 07:27:21
Comments: This plant should not be located in this location. I object to this planning application.
It is too close to large residential areas and will cause illnesses through pollution.
Smells from the plant will affect a wide area including the airport and roads leading to it, not a good advertisement for tourists and business people using the airport. The smell from the treatment plant in Ringsend can be experienced regularly from Clontarf to Howth and inland to Donaghmede.
Dumping at sea will destroy the beaches at Malahide and Portmarnock (check the shells washed ashore from the scissorfish trawling)

2035. Name: Lorraine Killeen (lollybyrne@gmail.com) on 2018-08-13 07:29:23
Comments: Just trying to protect my children's future

2036. Name: Brian Ellison (brianellison1984@gmail.com) on 2018-08-13 07:31:22

Comments:

2037. Name: Lynda McLoughlin (mcloughlin.lynda@gmail.com) on 2018-08-13 07:38:31
Comments: The sewerage plant will have extreme repercussions for local residents - smell, polluted air, chemicals in the air. This will have an enormous negative impact on locals and local business!

Comments: There are enough issues in this area without adding this monstrosity! Think about the locals and build this in an area well away from thousands of residents!

Most importantly, The Baldoyle area is recognized as a wildlife protected area with birds sanctuaries. This will greatly affect it, and just for this reason alone should never be accepted

Comments:

2428. Name: Stephen Behan (stephen@uniroadfreight.com) on 2018-08-14 12:31:29
Comments: A plant such as this needs to be in a remote area not a highly populated one. To risk a hazard environment for people, especially Children, who play sports such as the various soccer and GAA clubs in the area, to be effected by this would be a disgrace. This planning permission should never have even been submitted let alone considered. Keep our Children safe.

Comments: NO way is this plant to go ahead, this could cause all sorts of diseases and disorders for residents living in close proximity of the plant! And Dublin city council will be held accountable if it goes ahead. Lawsuits ,, millions and millions of euro in lawsuits,, then the wild life will be affected in darndale park directly across from it. This would never go ahead in South Dublin 4

No to this huge sewage plant so close to highly populated areas (that it will not be servicing). This will have a huge affect on Northern Dublin which seems unfair when it is actually going to mainly service Kildare and Meath. Small plants to service local areas cannot be argued with as these things have to go somewhere but something 4 times the size of Croke Park in one place is madness. Even the people in the areas this plant will be servicing protested against having it in their area. Also this semi treated sewage being poured into the sea near Lambay will have a terrible affect on our coastlines. And the smell that surrounding areas will have to endure will be awful, as the people of Ringsend have already learned.

3253. Name: Emma Nolan (emman17@hotmail.com) on 2018-08-16 10:50:03
Comments: Portmarnock is one of the few blue flag beaches in Dublin. We cannot afford

to have it destroyed by sewage discharge pipe offshore, as the tide will bring in it's contents.
Baldoyle nature reserve is close to this also, Sewerage will likely harm the habitat of the birds. If an bord pleanaila won't build a bicycle path t the edge of this, why is it suitable to emit sewage beside it.
Areas of howth, Sutton, and Portmarnock are full of residents and tourists to Dublin year round. How is the effluents and smell of sewage going to affect the health of residents and the experience of tourists to the area? It will affect health, affect tourism, employment, environment to mention a few.
No to Plant in Coolock.

Comments: Is it not enough that we are going to have two flight paths polluting our community that government is prepared to pollute us further with a sewage treatment plant also?
This will add to the detrimental effect already suffered in our community from pollution.

Comments:

3386. Name: Clive Murray (cliv1murray@eircom.net) on 2018-08-16 12:18:49
Comments: This will have grave consequences for the living conditions of the local community. The smell will prevent people from doing normal activities like sitting out in their gardens due to the poor air quality. The blue flag beached of Portmarnock, Baldoyle and Howth will suffer serious consequences and the sheer size is too much of a potential enviromental hazard should a leak at the proposed plant occur.
