

**OBSERVATIONS FOR BARRINGTON TOWERS
BRENNANSTOWN ROAD
DUBLIN 18**

SHD CASE NO 313281

OBSERVATIONS MADE BY:

**ELIZABETH PILKINGTON
10 CABINTEELY CLOSE
DUBLIN 18**

My observations are as follows:

- **The building of these structures will have a hugely negative impact on the setting of local heritage sites ie Barrington Towers (a protected structure) & the Brennanstown Dolmen which is a 5,500-year-old National Monument.**
- **10 storey buildings are inappropriate structures to be so close to a National Monument.**
- **Are there any views of the valley from these buildings? It is highly unlikely.**
- **The light, noise & disturbance to the Glendruid Valley Woodlands would be detrimental to wildlife.**
- **As a resident who has lived in the area for over 30 years it has become very clear that we are losing all our green areas.**
- **It is beginning to feel like living in a concrete jungle.**
- **This will have a huge impact on future generations**
- **The infrastructure is inadequate for cars, bicycles & pedestrians.**
- **This is not urban planning but developers squeezing as much as they can into a small area.**

15th May 2022.
