I wish to formally object to planning being granted under the SHD scheme.

The proposed development is situated at the Old Whitechurch Rd and adjoining kilbarry, This development is to comprise of 319 units ,a creche and a riverwalk way.

The size and scale of this development will totally detract from the skyline and area in general

The proposed development is on lands where toxic waste was dumped a number of yrs ago and I think this needs further investigation.

The infrastructure is insufficient for this development as another proposed development will be coming on stream shortly and will also exit on to an already busy road .

In fact this is only 1 of 4 developments in our area ! This will result in massive volumes of traffic, noise poloution and emissions , we do not currently have a bus service and future bus corridors have not included our area .

I would request a careful review in relation to this application as I deem the circumstances to warrant further consideration .

Thank you for taking the time to consider our objection/ submission and I hope all concerns can be addressed

Kind regards

James and Linda Condron
