

Address letter to Navan Road Community Council

We note that people from Navan Road including many OAP's are already excluded, or finding it very difficult to access our newly Post Office if trying to negotiate current footbridge. I am trying to get some form of transport for them to travel from Navan Road area. Current footbridge has approx 28/29 steps each side and proposed new bridge will have approx 47 or 48 steps each side. This Will effectively cut off their access to this vital local service.
