| Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022 Case Reference Number NA29N.314724 - Residents of 33 Dartmouth Road - Submission to Metrolink Railway Order application |              |          |                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
|                                                                                                                                                                                                 |              |          | (4) continued                  | <p>When the Project is operational, car mode share will decrease, with a reduction of up to approximately 830 car trips to and from the zones surrounding Charlemont Station over the 12hr period in 2065. In overall terms, the Charlemont Station will provide for improvements to the public transport network resulting in decreases in private car usage/trips, increases in public transport usages and will facilitate walking and cycling to the station, without significantly impacting on the operation of the road network in the area.</p> <p>The section of MetroLink route between St Stephen's Green and Charlemont Stations contributes significantly to the overall benefits of the scheme. It serves a significant area of the south city of Dublin and offers enhanced access from the local area to the city centre and a direct connection to Dublin Airport. It serves key trip attractors including residential areas and offices / workplace locations, with high passenger boarding and alighting figures in the peak hours. During the morning peak, at Charlemont station the flows include 1,800 passengers alighting, 2,300 boarding and 1,229 passengers alighting, 2,276 boarding during the evening peak. The passenger numbers contribute significantly to the overall benefits of the scheme and the effect of these benefits outweigh the additional costs that are associated with the delivery and operation of the section from St Stephen's Green to Charlemont station.</p> <p>As a result the Charlemont Station interchange provides for increased passenger utilisation of the MetroLink system, thereby increasing the benefits delivered by the Project, reflected by an improved Project Benefit Cost Ration (BCR). It should be noted that the Charlemont station is not proposed as a "city centre hub" as suggested. This station will function as an interchange with the Luas Green Line and a continuation of the through transport corridor rather than a terminus.</p> <p>TII would also note that that infrastructure is not being duplicated given the capacity of the Luas south from St. Stephen's Green is restricted due to on-street running. There is a limit to the potential of the Luas to provide additional capacity in the on-street non-segregated section of the Luas Green Line from Charlemont northwards through the city centre. The nature of this route and the fact that it currently crosses several road junctions (Adelaide Road, Harcourt Street / Hatch Street upper and Harcourt Street / St Stephen's Green south) limit the service to a maximum of 24 trams per hour per direction. The projected demand for this section would require a higher frequency of up to 30 trams per hour and this demand cannot be met with on-street systems (Luas / bus). The interchange between Luas and MetroLink proposed at Charlemont will provide the necessary capacity to address the demand on this corridor and reduce overall travel time for passengers</p> <p>As noted above, there is also high passenger demand forecast for a Metrolink station at Charlemont, including from the Ranelagh area, which would be lost if St. Stephen's Green was the MetroLink southern interchange station. The additional fare revenues collected by the Charlemont Station interchange increase the benefits delivered by the Project, reflected by an improved Project Benefit Cost Ration (BCR).</p> <p>By extending MetroLink to Charlemont it provides for future proofing of the Green Line, bypassing the capacity constrained Luas on-street running section, and ensures potential future connectivity options are enabled, either to the Green Line or for extensions of the metro.</p> |

                                                                                          |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| 5                                                                                                                                                                                               | 2.2. Lack of Justifiable Rationale for the Southern partial extension of the Metrolink Project |          | <p>However, through several consultations it became clear that the megaproject was not a realistic prospect at this point in time.....</p> <p>At this point, the NTA/TII should have recognised the need to rethink the megaproject into a revised Metro North project that took in Tara Street in its new alignment, with a City Centre Hub that provided maximum interchange with all modes of transport and multiple options for future extensions to the south. Analysis of the optimal city centre hub should have been the top priority.</p> <p>The NTA/TII, however, never adapted its thinking and continued to design the megaproject but proposed, in the Preferred Route, that it would split the single project into two phases separated by 20 to 30 years. This approach would effectively lock-in the replacement of the Luas Green line as the only future southern option, despite the technical issues raised during two rounds of consultations. Understandably, the government has not accepted that the same project can have an interlude of several decades and instead approved a "public transport service between Swords, Dublin Airport and Dublin city centre" (Metrolink Non-Technical Summary p.3 of the EIAR; our emphasis).</p> <p>The NTA/TII has never undertaken a city centre terminus study with appropriate criteria and has persisted in proposing phase 1 of the megaproject in the current Rail Order Application.</p> <p>The NTA/TII approach makes a farce of the consultation process<sup>1</sup>. So determined is the NTA/TII to pursue the megaproject and lock-in the Luas Green Line Replacement for the future, that it arranged for the unauthorized development of the Charlemont Station Box to be constructed in advance of the Rail Order Application, i.e. without the required planning permission<sup>2</sup>. This fixes the alignment at Charlemont with profound implications for both the north and south of the built Station Box. It also significantly curtails the scope for An Bord Pleanala to consider alternatives both for the current Rail Order Application and for the future.</p> | <p>While the submission addresses these points on the merits below, these are matters of strategic planning policy that were settled by the NTA's GDA Transport Strategy 2022-2042. While the Board is not required to comply with the Transport Strategy, it is one of the most important policies in the planning hierarchy and entitled to very significant weight.</p> <p>It is important to recognise that MetroLink has not been designed intentionally with a city transport hub, but with key points of interchange including the Park &amp; Ride at Estuary, Dublin Airport, Glasnevin and Tara Street with DART, and the Luas Green Line at Charlemont. As outlined in Chapter 3, the proposed Project is part of a wider integrated transport network that also includes for BusConnects and DART+ which are all included under Project Ireland 2040. Together, these projects will result in a reliable, sustainable, affordable, integrated public transport network that will support the economy, help Ireland meet its climate change targets in line with Climate Action Plan 2021 and make Dublin a more liveable and sustainable city. Whilst MetroLink is a standalone project that is not dependent on any other projects for its delivery or effective operation, it is nonetheless a critical part of the proposed integrated transport network for the Greater Dublin Area. The proposed Charlemont Station should be considered with that in mind.</p> <p>As a result of the significant disruption predicted during the construction phase of MetroLink along the Luas Green Line, NTA/TII identified an alternative solution, and thus adapted its thinking, to provide additional capacity to meet the predicted Luas demand. This was identified and consulted on as part of the non-statutory consultation on the Preferred Route in March 2019 and is reflected by the proposal for a station at Charlemont in the GDA Transport Strategy 2022-2042, the rationale for which is explained by response (4) above.</p> <p>It is not accurate to say "government has not accepted that the same project can have an interlude of several decades and instead approved a "public transport service between Swords, Dublin Airport and Dublin city centre". The connection from St Stephens Green to Charlemont / Ranelagh is supported by the current Transport Strategy for Greater Dublin Area (2022-2042). The Transport Strategies were prepared by the National Transport Authority, scrutinised by the Joint Oireachtas Committee on Transport and approved by the Minister for Transport. It notes in section 12.3.2, "Charlemont offers the optimal location for the primary interchange with the Green Line in response to growing demand in the longer term and is an appropriate location to facilitate any potential future metro extensions to serve the south west, south or south east of the city region should sufficient demand arise." TII therefore do not agree that the proposed Charlemont Station has "profound implications for both the north and south of the built Station Box" or that it "curtails the scope for An Bord Pleanála to consider alternatives both for the current Rail Order Application and for the future." noting also that a proposed station at Charlemont is in accordance with government policy.</p> <p>Arising from the decision to postpone the future upgrade of the Green Line to metro services, it is being argued that Charlemont station effectively becomes a terminus station in the short to medium term. In this regard, it is true to say that the Metrolink trains will terminate and turn back at Charlemont station, however the public transport service offering for passengers does not terminate, it transfers from Metrolink to Luas as part of the integrated transport network.</p> <p>The terminus station for MetroLink is located at Estuary where all of the activities normally associated with a terminus (train sideways, backup control centre and maintenance facilities) take place. At this location the high capacity public transport offering terminates and the public transport offering transfers to a completely different mode, i.e. Bus. The environmental effect of the Metrolink terminus are accordingly assessed in the EIAR. Charlemont Station does not have the associated infrastructure and services associated with a terminus location and in fact has more in common with a "system turn back location". Charlemont Station is located within an area of high public transport accessibility, linking with the Luas Green Line which offers reasonably similar levels of services and frequency for journeys to and from the south of Dublin. As such, public transport service offering is not considered to terminate, but transfers onto the similar service offered by the Luas Green Line, forming part of a transport corridor running from Cherrywood to Estuary. The associated environmental impacts for the turnback and station at Charlemont have been fully assessed in the EIAR, and TII would further note a number of route options were considered in the process of identifying the Emerging Preferred Route (EPR) before the MetroLink Preferred Route was selected.</p> <p>Charlemont station itself was chosen on the basis of its interchange potential with Luas, as well as local bus services, as outlined above. The section of the line between St Stephen's Green and Charlemont generates considerable benefits for the scheme in terms of increased patronage. The fact that the Charlemont Station is now being referred to and considered as a "terminus station" rather than an interchange station, does not increase the environmental impacts the station has on its local environment, in terms of passenger demand, airborne noise. vibration and other environmental effects.</p> |

| Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022 Case Reference Number NA29N.314724 - Residents of 33 Dartmouth Road - Submission to Metrolink Railway Order application |              |          |                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
|                                                                                                                                                                                                 |              |          | (5) continued                  | <p>The station box at Charlemont allows for a future tie into the Luas Green Line should it be determined in the future that through running metro services to Sandyford is the required solution to address the public transport needs to the south of the city. It is incorrect to say station box location was fixed by the Charlemont Development. The preferred route for MetroLink was published in March 2019 following a comprehensive route options study. The preferred route was based on the emerging preferred route for the scheme which included a station at Charlemont. The Charlemont Metro Enabling Works were constructed to enable the Charlemont Development to proceed whilst simultaneously ensuring there was an option available to construct a station at Charlemont that avoided unnecessary demolition, took advantage of an available site, provided infrastructure that is integrated with planned development rather than necessitating later changes and retrospective adjustments to a new development or even possible demolition of the new development, whilst providing protected provision for the future extension of the scheme south, if required. It is also important to recognise that the station location at Charlemont is influenced by available vacant land and thus avoids unnecessary demolition.</p> <p>All options remain open to the Board in relation to this location. The critical factor in favour of the station at this location are the policy decisions and supporting analysis outlined above and not the permitted enabling works.</p> <p>TII rejects the assertion that the inclusion of the MetroLink Enabling Works at Two Grand Parade has prejudiced the EIA process. There were no "neutral" alternatives available to ABP when it made a decision on the application for permission for Two Grand Parade. It had three options, all of which had significant consequences for proper planning and sustainable development and the environment:</p> <p>*grant permission without the roof slab, which would have required TII to demolish Two Grand Parade or another development in this area to deliver a Metro station in the location that was emerging from the contemporary optioneering reports;<br/>*refuse permission for Two Grand Parade, sterilising the site a frustrating the zoning objective for the site<br/>*grant permission with the roof slab, securing the zoning objective and leaving open the option of a station at this location.</p> <p>The Board opted for the third option having regard to submissions from the NTA and revised designs from the developer. That decisions was challenged by way of judicial review, but the judicial review was withdrawn. The objections now raised attack the validity of that decision, which is prohibited by Section 50 of the Planning and Development Act 2000.</p> <p>The MetroLink enabling works constructed as part of the Hines development was included in the planning application for the Hines Development and has the benefit of planning permission which was granted in April 2019.</p> <p>It is correct that the ""Preferred Route Public Consultation Feedback Report" was published after the dates for RO submissions" , however the report does not form part of the Railway Order Application documents and has been published to provide a gernal overview of the submissions recieved during the non statutory public consulation phase with submitters free to refer to this document during at any evidence they are invited to make at the Railway Order Oral Hearing.</p> |

| Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022 Case Reference Number NA29N.314724 - Residents of 33 Dartmouth Road - Submission to Metrolink Railway Order application |                                                                                                                                                         |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| 6                                                                                                                                                                                               | 2.3. The Option to Replace the Luas Green Line in the Future is Highly Uncertain                                                                        | 5        | <p>In the Rail Order Application, the NTA/TII argues in justification of the station at Charlemont that "a Green Line run-through connection will remain a likely option for the future" and that the decision to do so has been "deferred" (although this is stated without any required policy decision). Appendix A7.9 p31.</p> <p>This is not the case. No decision to replace the Luas Green Line has been made so it is not "deferred", and it cannot be viewed as the "likely" option for the future for the following reasons:</p> <p>a) It is not government policy (up to the period ending 2042)</p> <p>b) An above ground metro will segregate established communities and is highly problematic from a planning permission perspective</p> <p>c) It would close all services on the Luas Green Line for many years during replacement works causing very significant disruption to transport</p> <p>d) It does not provide any new rail infrastructure to other areas of Dublin especially to the south west</p> <p>e) It does not create a city centre hub capable of interconnecting with the multiple modes of transport that are part of the Draft Transport Strategy for the Greater Dublin Area up to 2042</p> | Please refer to responses (5) and (6) above that explains the 2022-2042 GDA Strategy approach for possible future extensions of metro. The technical points noted by the observation would be addressed as part of any future project, but noting any future extension of the metro falls outside of the scope of the MetroLink project.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| 7                                                                                                                                                                                               | f) It cannibalises the existing Luas Green Line infrastructure and replaces it with a service that is inferior in many respects from what exists today: | 6        | <p>If the Luas Green Line was to be replaced by a run through connection of the Metro, it would result in the degradation of certain very important aspects of the current Green Line service.</p> <p>The figure to the left shows the current Luas Green Line in green and the proposed Metro run through in red.</p> <p>Passengers originating south of Ranelagh will no longer have a direct rail access to the Grafton Street side of St Stephens Green, Dawson Street or Westmoreland Street but must use a 'double level' interchange with the Luas Green Line at Charlemont (coming from the metro below ground to street level and then up to the Luas stop elevated above the Canal) or walk from St Stephens Green East, Tara Street or O'Connell Street.</p> <p>From the south, this pulls the rail service east and away from the main centres of attraction, thereby diminishing the quality of the current service provided by the Luas Green Line.</p>                                                                                                                                                                                                                                                             | There is no cannibalisation or replacement of the existing Luas Green Line. Responses (4) and (5) above explain the rationale for MetroLink extending to Charlemont, noting that the section of MetroLink route between St Stephen's Green and Charlemont Stations contributes significantly to the overall benefits of the scheme, and that the existing Luas Green Line capacity between St Stephen's Green and Charlemont is restricted due to on-street running.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 8                                                                                                                                                                                               | g) It would also result in an unjustifiable over-development of rail infrastructure                                                                     | 6        | <p>g) It would also result in an unjustifiable over-development of rail infrastructure in very condensed and already well serviced area and perpetuate the high cost and strategic weaknesses already identified in the JASPERS and MPAG reports; see below.</p> <p>The figure to the left shows that if the Luas Green Line was to be replaced by Metro, it would result in the over-development of rail infrastructure within the 700m distance between the Canal and Ranelagh Village. So in a distance less than two lengths of St Stephen's Green, there would be:</p> <ul style="list-style-type: none"><li>• 2 Underground Metro Stations and</li><li>• 2 Elevated Luas Stops.</li></ul> <p>Even with this further duplication between St Stephens Green and Ranelagh, there would be no good quality interchange at St. Stephens Green (which has the potential to be a 'single level' connection between the street level Luas and the mezzanine level of Metro). Instead, the NTA/TII proposes that the 'double level' interchange at Charlemont is the "optimal" possible from the entire spending on duplication of infrastructure in the area.</p>                                                                   | <p>Response (4) above has addressed why MetroLink is not duplicating infrastructure and the benefits it delivers. Responses (4) and (5) have addressed why a MetroLink station is proposed at Charlemont.</p> <p>If the scheme were to terminate at St Stephen's Green, it would be inconsistent with the GDA Transport Strategy 2022-2042 to locate the terminus at Charlemont.</p> <p>It is acknowledged that passengers wishing to interchange between Luas and MetroLink at the St. Stephen's Green station will have a 500m-walk along a route either through St Stephen's Green Park or along the footpath north of the park. The interchange time is calculated at 7.58 minutes. However, the interchange arrangements at Charlemont provide for a significantly better connection with Luas compared to St. Stephens Green Station, where the interchange time is calculated at 2.9 minutes. Interchange times and routes are detailed in Appendix A7.9 (Terminus Station at Charlemont compared to St. Stephen's Green).</p> |

| Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022 Case Reference Number NA29N.314724 - Residents of 33 Dartmouth Road - Submission to Metrolink Railway Order application |                                              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |  |
| 9                                                                                                                                                                                               | 2.4. A City Centre Transport Hub Is Required | 6        | <p>The case for the proposed replacement of the Luas Green Line to Metro Standard, however, is not clear. It was not successful in obtaining government approval and failed to get community support from two rounds of consultations. It cannibalises the existing Luas Green Line resulting in the closure of all services for several years during replacement works, the DART line already services communities in close proximity to the east of the alignment, it does not contribute to providing transport solutions to the south west and the segregation of established communities is hugely problematic.</p> <p>Put simply, for the next 2-3 decades, the solution for the north of Dublin is an underground metro spine to the city centre and to the south is multiple modes transport radiating out in spokes from a city centre hub. Such a hub has previously been identified in the approved Metro North project as St Stephens Green and a new study is required to establish if this is still the case. To future proof our transport policy, the current the focus must be on the creating a city centre hub that can connect with multiple modes of transport now and provide the maximum choice of options for the future. To extend down one spoke, decades in advance of a required decision, is not justified and puts at risk €650m of public money and limits future transport options.</p> <p>Not only was a City Centre Hub Terminus study never undertaken, the closest to it (the March 2017 Luas Tie-In Study) is now totally irrelevant from a tie-in perspective (none of the options were used or re-evaluated), and is also redundant from a policy perspective (no Luas Green Line replacement is part of the subject Rail Order Application). Furthermore, the alignment that has already been built is not justified or supported by any other analysis provided in the Rail Order Application.</p> <p>Clearly this leaves a fatal gap in the preparation and documentation of the Rail Order Application.</p> | <p>TII do not agree that there is a "fatal gap" in the Railway Order application. Responses (4) and (5) above explain the rationale and justification for a proposed station at Charlemont.</p> <p>Further TII would note:</p> <p>There is no MetroLink proposal to replace the Luas Green Line with metro, and there is no duplication of infrastructure (see response (4) above)</p> <p>As noted above, MetroLink has government approval, as reflected by the 2022-2042 GDA Strategy that includes consideration of possible future extension of metro to the south (see response (5) above).</p> <p>There is no proposed cannibalisation of the Luas Green Line (see response (7) above).</p> <p>The principle of a "city centre hub" is covered by response (5) above.</p> |  |
| 10                                                                                                                                                                                              | Concluding statement                         | 7        | <p>In summary, it is the view of us as owners of 33 Dartmouth Road that An Bord Pleanála should not be granting permission for the Metrolink Railway Owner. Therefore we request the following amendments:</p> <p>I. Omit from the Railway Order the section from Tara Street Station to Charlemont Station and associated onward tunnel extension and intervention tunnel</p> <p>II. Require the submission of a railway order for a section from Tara Street Station to St. Stephens Green which would effectively provide for a terminal hub station which can effectively integrate with the Luas Green Line and future DART underground.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | <p>The above responses to the observations made explain why TII do not consider it is correct or appropriate that the MetroLink alignment south of the proposed Tara Station should be omitted, and also demonstrates why the proposed Charlemont Station has been selected by TII as the preferred interchange with the Luas Green Line</p> <p>A scheme which terminates at Tara Street would not be consistent with the Transport Strategy for Greater Dublin Area (2022-2042). In addition any decision to terminate the scheme at Tara will significantly impact on the overall viability and benefits of scheme.</p>                                                                                                                                                       |  |
| 11                                                                                                                                                                                              | Compliance with Policy                       | 7        | <p>It is not transport policy to extend metro to the south at any time prior to 2042. The section of the subject Rail Order Application between St. Stephen's Green and Charlemont represents the first section of such a southern extension and effectively locks-in the replacement of the Luas Green Line. Building south of St. Stephen's Green is premature and is a leftover from a now defunct concept of Metrolink as a Swords to Sandyford megaproject. The NTA/TII has failed to adapt the Rail Order Application to the reality that such a megaproject is not a policy objective at this point in time and it is premature to expensively lock-in decisions about Metro South 2-3 decades in advance of any requirement to do so.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | <p>As explained by response (5), the proposed Charlemont Station does not preclude future extension to the south west, south or south east of the city region should sufficient demand arise.</p> <p>Building south of St Stephen's Green is not premature, the reasons for proposing a station at Charlemont are explained by response (4), while response (5) explains how MetroLink has been designed to integrate with the wider transport network.</p>                                                                                                                                                                                                                                                                                                                     |  |

| Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022 Case Reference Number NA29N.314724 - Residents of 33 Dartmouth Road - Submission to Metrolink Railway Order application |                                                                                       |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 12                                                                                                                                                                                              | Strategic Need and Business Case                                                      | 8        | <p>The entire project business case is flawed when it is based on the proposed southern terminus that lies outside current transport policy. This fact is recognized in both the JASPERS independent review and the MPAG Review, which identifies the section of the project south of St. Stephen's Green as 'strategically weak' and that it duplicates other fixed rail services. Surprisingly, the final Business Case did not address these concerns. As this section is probably one of the most expensive parts of the project (1km of tunnel and 1 station for €650m), its removal from scheme is likely to substantially increase the probability of the project successfully getting through the next stages of the government approvals process. Furthermore, the JASPAR review concludes that the connection to Ranelagh could feasibly be deferred until there is clarity on the future of the Luas Green Line and this would bring the project back in line with current transport policy.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | <p>There is no duplication of infrastructure between St Stephen's Green to Charlemont for the reasons set out by response (4) above, noting that the section of MetroLink between St Stephen's Green and Charlemont makes a significant positive contribution to the Business Case, rather than a negative contribution as suggested by the observation.</p> <p>TII would also note that in July 2022, the Government granted Approval in Principle to the NTA to enable the submission of a railway order application by TII to An Bord Pleanála in respect of the MetroLink project (Decision Gate 1). This approval was granted after the Preliminary Business Case (PBC) had undergone significant scrutiny and challenge by bodies that are independent of TII, including DoT and DPER review (including independent review by JASPERS and the Major Projects Advisory Group (MPAG)) of the PBC around timeline, costs and benefits that were updated to inform the Government decision.</p> <p>For the avoidance of doubt, An Bord Pleanála's functions relate only to the consistency of the project with proper planning and sustainable development and consideration of its impacts on the environment (including EIA and AA). They do not extend to considering the merits of the financial approvals or business case for the project.</p> |
| 13                                                                                                                                                                                              | City Centre Hub Location & Prejudicing Options for Expansion of the Transport Network | 8        | <p>While a metro south extension is not part of current transport policy, even if it were to be considered at some stage in the future, the starting point for an extension should be St. Stephens Green and not Charlemont. The section of the Luas Green Line from St. Stephens Green to Charlemont is already one of the existing spokes radiating out from the hub of St. Stephens Green. Therefore, this duplicating section of the proposed MetroLink project represents an upfront payment of €650m towards a single future option, that is the replacement of the Luas Green Line. Once a metro section is built to Charlemont, it will deny other potential routes, such as to the south-west, the opportunity to build a successful business case as it forces increased costs of connecting from Charlemont and bypasses the opportunity of addressing unserved areas closer to the St Stephens Green Hub. This effectively "locks-in" the Green Line Replacement 2-3 decades in advance of any requirement.</p> <p>In addition, any future underground tunnelled solution (i.e. an option other than the Luas Green Line replacement) would start boring from the south and therefore there is no advantage tunnelling to Charlemont now (which the NTA/TII claims is an "appropriate" location for these other options). Such a new tunnel could be aligned all the way to St Stephen's Green; however, this would create a €650m stranded asset/ white elephant at Charlemont and would be a costly negative to overcome in any business case. Moreover, any overground rail or road solution on the south (other than the Luas Green Line replacement) could not interchange at Charlemont because its location is so constrained and incapable of further transport mode connections.</p> <p>Charlemont is in a residential area not a city centre location. It can only interchange with the Luas Green Line and has no scope for adequate connectivity with other modes of transport, such as other proposed light rail, bus services and road transport. It is simply not suitable as a Key Transport Interchange to serve Dublin city centre.</p> | <p>Responses (4) and (5) explain the rationale for a proposed station at Charlemont, why there is no duplication of infrastructure between St Stephen's Green and Charlemont, and a station at Charlemont does not preclude future extension to the south west, south or south east of the city region should sufficient demand arise.</p> <p>It is not correct to say Charlemont only enables an interchange with the Luas Green Line. The MetroLink system is designed, as borne out by our transport analysis, in an integrated manner so that people travelling from the area south of Dublin to access locations north of Charlemont, such as Dublin Airport, Mater, Swords etc. will utilise public transport to interchange with the MetroLink, or will walk or cycle to access their local station. It should also be noted that the proposed station is within a 5-minute walk distance of the Bus Connects proposed A Spine and E Spine routes. The system is not designed to encourage people to drive to stations and TII actively discourage people from doing so other than the Park &amp; Ride station at Estuary.</p>                                                                                                                                                                                                                  |

| Submission No.                                                                                                                                                                                  |                                                |          | 043                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| 14                                                                                                                                                                                              | Flawed Assessment of Alternative South Termini | 8        | <p>The Rail Order Application contains a deeply flawed rationale in the consideration of alternative terminus locations to the south. The "decision... not to upgrade the Luas Green Line to Metro" should have resulted in NTA/TII demoting the importance of the "Charlemont (tie in with Luas Green Line)". The alignment choices "to determine the most appropriate termination location for the MetroLink project" should have investigated three options: St Stephen's Green West, St Stephen's Green East and Charlemont. St Stephen's Green West becomes a viable option once the NTA/TII's self-imposed constraint of forcing a connection to a Luas Green Line tie-in location is removed. Indeed, a carefully designed St Stephen's Green termination point (West or a more connected version of East or a hybrid) would provide a superior interchange with the Luas Green Line and maximise the scope for future southern extension routes (including the possible replacement of the Luas Green Line option). The fact that St Stephen's Green was never properly evaluated as a terminus option shows that the EIAR is deeply flawed and inadequate.</p> | <p>We address the substance of this submission below, but as a preliminary point these are all matters of strategic transport policy that have been settled by the NTA's GDA Transport Strategy 2022-2042.</p> <p>A number of route options were considered in the process of identifying the Emerging Preferred Route (EPR). While not anticipated to be the final station, these route options included potential station locations on St. Stephen's Green West. As outlined by EIAR Chapter 3 (Background to the MetroLink Project) one of the key objectives of the Project is the integration of it with the wider transport network that also includes for BusConnects and DART+ which are all included under Project Ireland 2040. Together, these projects will result in a reliable, sustainable, affordable, integrated public transport network that will support the economy, help Ireland meet its climate change targets in line with Climate Action Plan 2023 and make Dublin a more liveable and sustainable city. A station at Tara Street provides good interchange opportunities, serves important key trip attractors in the study area with high potential passenger trips. This option also takes a direct and short route through areas of high demand in the centre of the study area.</p> <p>A station on St Stephen's Green West is not preferred for several reasons:</p> <p>If a station was placed on St Stephen's Green West, the alignment between the proposed Tara Station and a station on St Stephen's Green West would result in an undesirable horizontal reverse curve and an alignment greater than 1000m long that would necessitate an intermediate intervention shaft located somewhere between these stations to comply with the MetroLink Fire Strategy. Additional construction would be required to provide such a facility, similar in size to the proposed Albert College Park Intervention shaft. This could feasibly be situated in the Trinity College Dublin sports grounds.</p> <p>TII note that it is Government policy to provide a station and interchange with the Luas Green Line at Charlemont, as set out by the GDA Transport Strategy 2022 – 2042. Should a station be placed on St Stephen's Green West, the alignment between a station located here and the proposed Charlemont Station would also result in an undesirable horizontal reverse curve and an alignment that is greater than 1000m long, and would thus again require an intervention shaft similar to the proposed Albert College Park Intervention shaft to be provided. This would be expected to result in significant demolition and redevelopment in an existing built-up area.</p> <p>In both cases, compared to the proposed alignment that runs much more directly between Tara, St Stephen's Green and Charlemont, the additional length of tunnel and the addition of two intervention shafts generated by locating a station on St Stephen's Green West is uneconomic in comparison.</p> <p>As a potential station location, St Stephen's Green West itself is a very constrained location due to the presence of buildings, Luas and St Stephen's Green Park. Maintaining the operation of the Luas during station construction would be complex and challenging with significant disruption expected, whilst the impacts on St Stephen's Green Park would be greater for a station in this location compared to the proposed location on St Stephen's Green East. This would be the result of; the likely need to place more of the station in the Park compared to the proposed station on St Stephen's Green East; it would impact an area of the Park that has greater amenity value than St Stephen's Green East due to the nearby Park entrance adjacent to the southern end of Grafton Street, and there would be a risk of impacting the existing Park lake.</p> <p>In summary, an alignment that links the proposed Tara, St Stephen's Green East and Charlemont stations is a more direct and economic alignment, does not require additional intervention infrastructure, avoids a complex engineering interface with the Luas Green Line, impacts the Park less and has less potential for disruption during the construction phase.</p> <p>It is acknowledged that passengers wishing to interchange between Luas and MetroLink at the St. Stephen's Green station will have a 500m-walk along a route either through St Stephen's Green Park or along the footpath north of the park. The interchange time is calculated at 7.58 minutes. However, the interchange arrangements at Charlemont provide for a significantly better connection with Luas compared to St. Stephens Green Station, where the interchange time is calculated at 2.9 minutes. Interchange times and routes are detailed in Appendix A7.9 (Terminus Station at Charlemont compared to St. Stephen's Green).</p> <p>Responses (4) and (5) explain the rationale for a proposed station at Charlemont, and does not support the observation "that the EIAR is deeply flawed and inadequate".</p> |

| Submission No.                                                                                                                                                                                  |                                                           |          | 043                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| 15                                                                                                                                                                                              | No Studies to Support the Proposed Alignment to the South | 8        | <p>A vital component of the Rail Order Application is the consideration of alternative alignments for the south end of the Metrolink line. The Applicant did undertake a detailed consideration of potential tie-ins with the Luas Green Line and a Preferred Option (Option 4 (b) was selected in the March 2017 study.</p> <p>However, as will be described below, NTA/TII has procured to complete the construction of an alternative design of the Charlemont Station Box which delivers a very significantly different alignment to that proposed in the Tie-in study and in the March 2019 "Preferred Route" consultation. Very importantly the implications of the built alignment are both to the north and south of Charlemont. Notably to the north the more easterly alignment has very strongly influenced the Applicant not to consider station options on St. Stephens Green West where the optimal interchange with the Luas Green Line would occur. The resulting alignment to the south of Charlemont shifts to the west and rules out the preferred "in- line" tie-in with the Luas Green Line and will cause significantly increased demolition of houses in the Ranelagh area.</p> <p>Not only is the March 2017 Luas Tie-In Study now totally irrelevant from a tie-in perspective (none of the options were used or re-evaluated), it is also redundant from a policy perspective (no Luas Green Line replacement is part of the subject Rail Order Application). Furthermore, the alignment that has already been built is not justified or supported by any other analysis provided in the Rail Order Application.</p> <p>Clearly this leaves a fatal gap in the preparation and documentation of the Rail Order Application. The fundamental and essential study that should have replaced the Luas Tie-In Study is a city-centre terminus study that uses appropriate criteria (that are significantly different from those used in the Tie-in study). Such a study, however, was never undertaken by the Applicant. In fact, the Rail Order Application provides no studies to support the proposed (already built) alignment to the south.</p> <p>Obviously by building the alignment prior to making a Rail Order Application, NTA/TII has denied An Bord Pleanala the opportunity to consider alternatives through the planning process for the current Rail Order Application.</p> | <p>While TII addresses the substance of this point below, this is a strategic transport policy issues that has been settled by the NTA's GDA Transport Strategy 2022-2042.</p> <p>TII do not agree "NTA/TII has procured to complete the construction of an alternative design of the Charlemont Station Box which delivers a very significantly different alignment to that proposed in the Tie-in study and in the March 2019 "Preferred Route" consultation". The station design is in affect a modification to the preferred Green Line Tie Option 4B which was modified as result of the postponement of the upgrade of the Green Line to metro standard.</p> <p>Further TII do not agree that the proposed location of Charlemont Station has significant impacts north and south. Response (14) above explains why a station on St Stephen's Green West is not proposed noting that this is not determined by the proposed location of Charlemont Station.</p> <p>Regards south of the Charlemont, as previously noted, Charlemont does not preclude future extension of the metro to the south, south-east or south-west should sufficient demand arise. There is also no basis to suggest there will be an increased demolition of houses, if in the future, the metro was extended south, this does not mean that inevitably open cut construction will be required or demolition of property will be necessary. It is possible that in the event of a tunnel being constructed to connect to Charlemont Station that this would be undertaken from a site further south, as noted elsewhere in the submission.</p> <p>The observation that "no Luas Green Line replacement is part of the subject Rail Order Application" is correct, and as previously noted, the proposed Charlemont Station is supported by the current Transport Strategy for Greater Dublin Area (2022-2042). The Transport Strategies were prepared by the National Transport Authority, scrutinised by the Joint Oireachtas Committee on Transport and approved by the Minister for Transport.</p> <p>Responses (4) and (5) explain the reasons for a proposed station at Charlemont. TII would note that the Charlemont Metro Enabling Works were constructed to enable the Charlemont Development to proceed whilst simultaneously ensuring there was an option available to construct a station at Charlemont that avoided unnecessary demolition, took advantage of an available site, provided infrastructure that is integrated with planned development rather than necessitating later changes and retrospective adjustments to a new development or even possible demolition of the new development, whilst providing protected provision for the future extension of the scheme south, if required. However while it was appropriate and sensible to make provision for MetroLink for the reasons stated, it is for An Bord Pleanála to consider the Railway Order application, and TII do not assume that simply because permission was granted for these MetroLink Enabling Works, that it means an Enforceable Railway Order will be granted.</p> |

| Submission No.                                                                                                                                                                                  |                                                                                                     |          | 043                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |  |

| Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022 Case Reference Number NA29N.314724 - Residents of 33 Dartmouth Road - Submission to Metrolink Railway Order application |                                                                                                     |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |  |
| 16                                                                                                                                                                                              | Charlemont Station Box work are not described in the Rail Order Application (EIA Project Splitting) | 9        | The enabling works and construction of the station box at Charlemont, which have already been undertaken, are not described in the Application as forming part of the subject Rail Order. Under the EIA Directive, an EIA must consider the direct, indirect and cumulative effects of all aspects of the development. On this point alone, the entirety of the Rail Order Application is legally unsafe.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | <p>The MetroLink enabling works constructed as part of the Hines development was included in the planning application for the Hines Development and has the benefit of planning permission which was granted in April 2019.</p> <p>There is no inconsistency with the EIA Directive. All options remain open to the Board in relation to this location. The critical factor in favour of the station at this location are the policy decisions and supporting analysis outlined above and not the permitted enabling works.</p> <p>TII rejects the assertion that the inclusion of the MetroLink Enabling Works at Two Grand Parade has prejudiced the EIA process. There were no "neutral" alternatives available to ABP when it made a decision on the application for permission for Two Grand Parade. It had three options, all of which had significant consequences for proper planning and sustainable development and the environment:</p> <p>*grant permission without the roof slab, which would have required TII to demolish Two Grand Parade or another development in this area to deliver a Metro station in the location that was emerging from the contemporary optioneering reports;</p> <p>*refuse permission for Two Grand Parade, sterilising the site a frustrating the zoning objective for the site</p> <p>*grant permission with the roof slab, securing the zoning objective and leaving open the option of a station at this location.</p> <p>The Board opted for the third option having regard to submissions from the NTA and revised designs from the developer. That decisions was challenged by way of judicial review, but the judicial review was withdrawn. The objections now raised attack the validity of that decision, which is prohibited by Section 50 of the Planning and Development Act 2000.</p> <p>The Hines (Grand Parade Property Trading Co. development) and Metrolink construction works required for Charlemont Station are presented in Appendix A5.3 Construction Sequence Report. As presented in EIAR Chapter 30 the cumulative potential of the Charlemont works has been assessed.</p> |  |
| 17                                                                                                                                                                                              | Charlemont Station Box Not Permitted/ Unauthorised Development                                      | 9        | <p>The current Railway Order and associated EIAR acknowledges that the enabling works including the construction of the Station Box at Charlemont has already occurred. TII appear to suggest that these works were permitted under the planning permission for the Office building at 2 Grand Parade. That commercial office development required normal planning permission to be obtained under the Planning and Development Act 2000. However, the Metro Station Box works are "railway works" and cannot be granted permission under that Act. Instead, they require a separate application for, and grant of, a Railway Order under the Transport (Railway Infrastructure) Act 2001. No Railway Order was obtained for the Charlemont Metro Station Box and therefore these railway works were not authorised and could not be lawfully undertaken.</p> <p>Moreover, the Charlemont Station Box is an unauthorised development that also required an EIA and as such, under legislation, the Board is compelled to refuse to consider any application for its retention. Clearly Charlemont Station is an integral part of the Metrolink proposal and the subject Rail Order Application. The Board, therefore, cannot grant the current Rail Order as to do so would a) facilitate the circumvention of the EIA Directive by the splitting of projects and b) amount to a retention permission which it is compelled to refuse. Effectively, Charlemont Station cannot be considered as usable for the Metrolink project because it will remain legally unsafe.</p> | <p>The MetroLink enabling works constructed as part of the Hines development was included in the planning application for the Hines Development and has the benefit of planning permission which was granted in April 2019.</p> <p>The observer is mistaken in submitting that railway works can only be authorised by railway order. The definition of "railway works" in the Transport (Railway Infrastructure) Act 2001 is broad and intended to facilitate comprehensive applications for consent for railways. They are defined as any works required for the purposes of a railway or any part of a railway, including works ancillary to the purposes aforesaid such as parking by buses or by persons using vehicles who intend to complete their journey by railway, and relocation of utilities, and in this definition "works" includes any act or operation of construction, excavation, tunnelling, demolition, extension, alteration, reinstatement, reconstruction, making good, repair or renewal. If the observer's submission were true, Irish Rail and TII would have apply for a railway order to provide for basic development like provision of parking for their railways and developers of land in proximity to railways would have to apply for a railway order to include in their designs elements of the development to protect the integrity of the developers works and the railway.</p> <p>The 2001 Act does state "The construction of railway works, the subject of an application for a railway order under this Part, shall not be undertaken unless the Board has granted an order under section 43." This narrow prohibition allows the baseline to be fixed at the date of the railway undertakings application for consent without the wider undesirable consequences outlined above.</p>                                                                                                                                                                                                                                                                                                                   |  |

| Submission No.                                                                                                                                                                                  |                                                                       |          | 043                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

| Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022 Case Reference Number NA29N.314724 - Residents of 33 Dartmouth Road - Submission to Metrolink Railway Order application |                                                                       |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| 18                                                                                                                                                                                              | Implications of the Locked-in Alignment of the Charlemont Station Box | 9        | <p>In the March 2019 consultation on the "Preferred Route", the proposed alignment for the Luas Green Line "Tie-in" was to be an "in-line" connection. This consultation allowed the public to understand and comment on the implications of the proposal. Since that consultation, NTA/TII reached an agreement (in private) with the developer of the new office building at 2 Grand Parade for a design of the Charlemont Station Box. Construction of this Station Box commenced, without a Rail Order, in April 2021 and was completed in the first quarter of 2022. This design and alignment of this station box is very significantly different to the proposal in the Preferred Route consultation. No notice was made to the public of the proposed changes and there was no opportunity for affected parties to make comment.</p> <p>In the event of a future Luas tie-in, which the NTA/TII says "will remain a likely option for the future", the implications of the now locked-in (built) station alignment are profound. It will result in the demolition of houses on Mander's Terrace, Charleston Road and will require the demolition of 11 houses and 24 apartments on Oakley Road. None of these houses and apartments would be demolished under the earlier design that was presented in the Preferred Route Consultation.</p> <p>Not only was no notice given to affected parties, but the implications of the new alignment are now known to the Applicant and yet it is not presented in the EIAR of the Rail Order Application. Case law has clearly established that an EIAR must "...take account, as far as practically possible, of potential later phases...". The EIAR is again inadequate and disingenuous in not presenting the known facts.</p> | Please refer to response (15) above in relation to the design and location of Charlemont Station.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| 19                                                                                                                                                                                              | Inadequacy of the Rail Order Application and Scheme Detail            | 10       | <p>Overall, we consider the detail of the Railway Order Application to be inadequate. These inadequacies are considered throughout this submission and in the other two CDCG submissions (especially in relation to issues such as Vehicular Traffic and Parking, Proposed Traffic Measures, Pedestrian Traffic, Drop-off, Noise, Disturbance, and Impact upon Amenities in the Vicinity of Charlemont Station). The lack of detail is in no small part due to the procurement method adopted by the Applicant, which is a 'design and build'. The first component is 'design' which should be undertaken prior to submission for a Railway Order consent. By following a 'design and build' approach NTA/TII is failing to provide the required level of detail under which a Rail Order could be granted by An Bord Pleanala (ABP).</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | <p>TII do not agree the EIAR is inadequate and have responded to the individual observations made in this submission, as well as all other submissions received.</p> <p>The assessment undertaken in the EIAR is undertaken in line with best practice and is in line with all relevant guidelines and policy requirements. Neither this submission nor the other submissions referred to have identified any guidelines or best practice that have been overlooked in the assessment. It should be noted that a full and very detailed assessment of traffic is provided in Chapter 9 of the EIAR and the associated appendices where potential effects on traffic, pedestrian movements, cycling, public transport and parking is presented for both the construction and operational phases. In terms of potential noise impacts there are two chapters (Chapter 13 and 14) presenting a detailed analysis of airborne and groundborne noise effects on sensitive receptors respectively for the construction and operational phases. The effects on "amenity" are assessed for the construction phase are assessed in a number of chapters (including Chapter 10 Human Health, Chapter 11 Population and Land Use, Chapters 13 &amp; 14 (Noise and Vibration) and Chapter 27 Landscape.</p> <p>There is no connection between the selected procurement method and the level of design for the Railway Order application. The level of design undertaken is appropriate for a Railway Order application, noting that the design to inform the Railway Order application has been developed to Preliminary Design level. This Preliminary Design provides the required level of detail to inform the EIAR, and the level of design presented and used to inform the EIAR is consistent with previous successful Railway Order applications and best practice guidelines.</p> |
| 20                                                                                                                                                                                              | Summary statement                                                     | 10       | <p>In summary, it is the view of us as owners of 33 Dartmouth Road that An Bord Pleanála should not be granting permission for the Metrolink Railway Owner. Therefore we request the following amendments:</p> <p>I. Omit from the Railway Order the section from Tara Street Station to Charlemont Station and associated onward tunnel extension and intervention tunnel</p> <p>ii. Require the submission of a railway order for a section from Tara Street Station to St. Stephen's Green which would effectively provide for a terminal hub station which can effectively integrate with the Luas Green Line and future DART underground.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | Please refer to response (10) above.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

| Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022 Case Reference Number NA29N.314724 - Residents of 33 Dartmouth Road - Submission to Metrolink Railway Order application |                                                                                             |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |  |
| 21                                                                                                                                                                                              | 3.2. Main Issues raised in the CDCG Dartmouth Road Submission 2<br><br>Policy and Procedure | 11       | <ul style="list-style-type: none"><li>Specifically the Charlemont station should not form part of the rail order as it will severely and demonstrably adversely affect the residential amenities of the Dartmouth Road residents both during the construction phase and the operational phase.</li></ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | <p>The above responses to the observations made explain why TII do not consider it is correct or appropriate that the MetroLink alignment south of the proposed Tara Station should be omitted, and also demonstrates why the proposed Charlemont Station has been selected by TII as the preferred interchange with the Luas Green Line.</p> <p>TII understand your particular concerns regards the proximity of 33 Dartmouth Road to the construction of the proposed Charlemont Station, and while TII are of the view that the construction environmental impacts can be mitigated, relocation is an available option during peak construction. TII are available to discuss this option if that is something the property owner would like to explore and consider.</p> <p>During the operational phase, no significant residual negative impacts are anticipated on the Population and Land or from noise, vibration or other emissions and nuisances considered as part of the assessment of impacts on Population. Use from the operation of the proposed Project, following the incorporation of the mitigation measures into the design of the proposed Project and implementation on an ongoing basis throughout the lifecycle. The residual effects that will arise during operation will be permanent and positive as detailed in EIAR Chapter 11, section 11.1.1.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |  |
| 22                                                                                                                                                                                              | 3.2. Main Issues raised in the CDCG Dartmouth Road Submission 2<br><br>Policy and Procedure | 11       | <ul style="list-style-type: none"><li>The reliance on an element of the railway works in the form of the station box previously constructed as part of the office development fundamentally prejudices the entire process and is non-compliant with the EIA Directive.</li><li>As is described in detail in the CDCG General Area Submission, the Charlemont Station Box is an unauthorised development that also required an EIA. Clearly Charlemont Station is an integral part of the Metrolink proposal and the subject Rail Order Application. The Board, therefore, cannot grant the current Rail Order as to do so would a) facilitate the circumvention of the EIA Directive by the splitting of projects and b) amount to a retention permission which it is compelled to refuse. Effectively, Charlemont Station cannot be considered as usable for the Metrolink project because it will remain legally unsafe.</li></ul> | <p>Please refer to responses (5), (15), (16) and (17).</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |  |
| 23                                                                                                                                                                                              | 3.2. Main Issues raised in the CDCG Dartmouth Road Submission 2<br><br>Policy and Procedure | 11       | The documentation and in particular the drawings submitted are misleading and do not illustrate the relationship between the proposed station works and the houses on the southern side of Dartmouth Road. The deep construction required immediately adjacent to residential houses is wholly inappropriate and will result in a very severe loss of amenity and devaluation of property.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | <p>TII disagree that the documentation and drawings submitted are misleading and do not illustrate the relationship between the proposed station works and the houses on the southern side of Dartmouth Road. Drawing ML1-JAI-SRD-ROUT_XX-DR-Z-02090 (Structures Details Book 2 of 3) shows the outline of the underground station, property Drawing ML-P 307 0-A (Property Details, Book 2 of 2) also shows the footprint of the station in relation to surrounding property, as does Alignment drawing ML1-JAI-ARD-ROUT_XX-DR-Y-03096 (Alignment Details Book 2 of 2). Regards drawing ML1-JAI-SRD-ROUT_XX-DR-Y-02096, the relationship of the section shown to Dartmouth Road is a function of where the long section has been taken and is therefore correct.</p> <p>Neither do TII agree that deep construction adjacent to the residential houses is inappropriate and would also note the environmental impacts have been carefully considered. TII would also note that while TII are of the view that the construction environmental impacts can be mitigated, relocation is an available option for Dartmouth Road residents immediately adjacent to the construction site during peak construction. TII are available to discuss this option if that is something the property owner would like to explore and consider.</p> <p>Regards loss of amenity during construction, Dartmouth Road will be closed between Dartmouth Place and Dartmouth Square West during the enabling works and main works but diversions will be put in place for local access, including deliveries, emergency services, bin collection, and pedestrian access maintained to property. The impacts on parking will be monitored during construction to reinstate any disrupted areas as soon as practicable. On completion of construction, parking will be reinstated.</p> <p>TII are of the view that the proposed development will have a long term positive affect in terms of property value. There is evidence to suggest that property values will in fact increase in close proximity to public transport infrastructure and that local residents will greatly benefit from having a world class metro system providing access to the city centre, airport and north city at their door step.</p> |  |

|                                                                                                                                                                                                 |                                                                                             |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                                      |

| Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022 Case Reference Number NA29N.314724 - Residents of 33 Dartmouth Road - Submission to Metrolink Railway Order application |                                                                                             |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                                      |
| 24                                                                                                                                                                                              | 3.2. Main Issues raised in the CDCG Dartmouth Road Submission 2<br><br>Policy and Procedure | 11       | <ul style="list-style-type: none"><li>• The lack of detail in the Rail Order documentation is in no small part due to the procurement method adopted by the Applicant, which is a 'design and build'. The first component is 'design' which should be undertaken prior to submission for a Railway Order consent. By following a 'design and build' approach NTA/TII is failing to provide the required level of detail under which a) affected residents can adequately understand the implications of the proposals and b) a Rail Order could be granted by An Bord Pleanála (ABP).</li></ul> | Please refer to response (19) above. |

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| 25                                                                                                                                                                                              | Inadequate EIAR | 11       | <ul style="list-style-type: none"><li>• Noise and vibration impact assessment have been deferred until after consent is issued.</li><li>• The impacts of construction noise and vibrations on internal dwelling environments has not been assessed.</li><li>• There has been no night-time impact assessment of construction noise.</li><li>• The blasting impacts of tunnelling directly under the houses on Dartmouth Road has not been assessed in terms of amenities, noise, vibration and human health.</li></ul> | <ul style="list-style-type: none"><li>• Noise and vibration assessments have not been deferred until after an enforceable railway order is granted. The EIAR presents a comprehensive and detailed assessment of both groundborne and airborne noise and vibration in Chapter 13 and 14 of the EIAR based upon the best available information at this stage of the project. The assessments includes for predictive modelling in order to identify the potential impacts on sensitive receptors during both the construction phase and the operational phase. Where necessary, mitigation measures are proposed to reduce any identified effects. Section 13.2.5.1.3 simply identifies that further assessment will be required as the project develops, and allowing for any amendmments to the design, to ensure that the proposed construction and operation of the proposed Project is in line with that presented in the EIAR and any requirements of an enforceable Railway Order. It is also of note that environmental monitoring will be undertaken that will demonstrate that works are being undertaken within environmental limits.</li><li>• The assessment undertaken in EIAR is in line with best practice and with all relevant guidelines and policy requirements as laid out in EIAR Chapter 13 Airborne Noise and Vibration, section 13.2.2. The assessment of noise levels at building facades is normal for this type of analysis as the assessment criteria generated from best practice guidance all refers to noise levels at building facades.</li><li>• Night-time noise has been assessed. The Proposed Working Hours are outlined in EIAR Chapter 5, MetroLink Construction Phase, section 5.2.4. Standard working hours will generally be the norm for all above ground works i.e Monday to Friday 07:00 to 19:00 and Saturday 07:00 to 13:00. Only tunnelling and other works underground will be undertaken 24 hours a day. The only exception to this is the requirement for work above ground outside standard working hours for exceptional events such as concrete pours, and abnormal deliveries. In the exceptional event these are necessary, the contractor will engage with the local community and local authority before such works are undertaken.</li></ul> <p>All planned night-time work activities will have to be undertaken, controlled and mitigated under the detailed Construction Environmental Management Plan to maintain impacts below the agreed construction noise thresholds. Examples of mitigation measures that can be used to reduce impact are detailed within Chapter 13, section 13.6, including the use of enclosure structures for planned activities outside of the standard working hours.</p> <p>The rationale for 24/7 working on activities such as Mechanical Electrical Power (MEP) installation, TBM strip out, and tunnel clean and track laying, is that they can be managed underground without causing disturbance at night. While activities below ground are progressed on a 24/7 basis, site level activities such as deliveries etc will be limited to standard working hours (Chapter 5, Section 5.5.17.3 refers).</p> <p>Owing to the nature of the sprayed concrete intervention tunnel construction and to ensure a safe and stable method of excavation, the sprayed concrete intervention tunnel construction will be undertaken 24 hours per day, seven days per week. The groundborne noise and vibration arising from mechanical excavation of the tunnel will not exceed threshold limits. During night-time support works at the surface, an acoustically clad steel framed building will be used within the compound to control airborne noise breakout to surrounding sensitive properties. All concrete to support the sprayed concrete tunnel lining operation will be batched on site within the acoustic enclosure and will not require night-time delivery.</p> <p>The predicted level of groundborne noise during TBM passage is 49 dB LASmax at 33 Dartmouth Road which is above the 45 dB LASmax threshold, resulting in a significant impact on the occupants of this address for the relatively short 2-week duration of the TBM passage. Unfortunately there are no effective methods available to reduce groundborne noise from TBMs at source and therefore the principal mitigation measure is advance consultation and engagement to inform residents of the timing of the TBM passing to allow building occupants to prepare for the temporary elevated noise levels.</p> <p>Therefore with the exception of some temporary disturbance (c. 2 weeks) resulting from the TBM passing. All other activities are not predicted to cause significant impact at night.</p> <p>As outlined in Transport Infrastructure Ireland (TII) Airborne and Groundborne Noise Mitigation Policy (Appendix A14.6) there is a process in place whereby further mitigation measures can be implemented at individual properties should this be merited.</p> <ul style="list-style-type: none"><li>• TII confirm that the intervention tunnel will not be constructed using drill and blast.</li></ul> |

| Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022 Case Reference Number NA29N.314724 - Residents of 33 Dartmouth Road - Submission to Metrolink Railway Order application |                 |          |                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| 26                                                                                                                                                                                              | Inadequate EIAR | 11       | <ul style="list-style-type: none"><li>• A traffic impact assessment of local junctions has not been undertaken.</li></ul>                                                                                                                                                   | <p>This statement is incorrect. As presented in Appendix A9.5 Scheme Traffic Management Plan, analysis has been undertaken to assess the impact of the traffic management measures on the local road network surrounding Charlemont Station, following a 2-stage assessment process as identified in section 2.4. At the local level the following parameters have been used to assess impacts on general traffic and on pedestrians:</p> <ul style="list-style-type: none"><li>* Increase in walking distance/quality of service for pedestrians (through removal of footpath, reduction of quality of service, removal of a pedestrian crossing or relocation of crossing by more than 100m);</li><li>* Increase in driver delays at junctions;</li><li>* Changes in traffic flows on surrounding streets; and,</li><li>* Additional distance travelled due to diversions.</li></ul> <p>Local traffic impacts have been assessed against key performance indicators, including the removal of one or more lanes of traffic, increase in traffic flow of +10% (PCUs), where there is predicted to be a permanent increase in journey length of 500m, or a new signalised junction. Local modelling undertaken at this location indicates that the increased volume of traffic on Grand Parade and Northbrook Road does not translate into any significant increase in driver delay. The largest increase in driver delay of 12 seconds is registered on the westbound approach on Grand Parade to the Ranelagh Road signalised junction.</p> |
| 27                                                                                                                                                                                              | Inadequate EIAR | 11       | <ul style="list-style-type: none"><li>• The EIAR fails to properly assess the settlement impacts of the tunnelling upon the houses on Dartmouth Road and there may be settlement of between 35mm and 45 mm which would severely affect these protected buildings.</li></ul> | <p>The EIAR has assessed the impact of settlement on the houses on Dartmouth Road. EIAR Appendix 5.17 refers. The settlement predicted for the buildings directly over the tunnel are of up to 45mm as stated. The Phase 2 assessment of the damage for these buildings is "Slight" - please refer building B151 (32 Dartmouth Road) in table 5-2 of that appendix.</p> <p>The protected nature of a building does not alter the classification of damage from slight to moderate as stated. The protected buildings along Dartmouth Road, within the zone of influence of the works, will be subject to a further Stage 3 refined assessment (despite the impact only being assessed as 'slight') to take account of final design and construction methodology details, most likely utilising advanced numerical modelling techniques and further surveys of the building. The results of this refined assessment typically show that earlier assessments are conservative and overestimate the likely impact of construction generated ground movements.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| 28                                                                                                                                                                                              | Inadequate EIAR | 11       | <ul style="list-style-type: none"><li>• The hydrogeological impact assessment is inadequate as it has not been based upon local bore hole logs and no local impact assessment has been undertaken around the Charlemont station.</li></ul>                                  | <p>TII have undertaken localised and specific groundwater modelling, and TII can also confirm that hydrogeological information along the line of the underground elements has been collected.</p> <p>Please refer to Figure 19.6 of the EIAR which identifies the location of a boreholes at Charlemont. Pump tests were undertaken here and groundwater samples were taken (from 3 boreholes here) and analysed in order to inform the baseline conditions presented in the EIAR. Furthermore calculations were undertaken to estimate the effects of excavations on the groundwater for every station including Charlemont (refer to Table 19.35 Table 19.41 and Charlemont subsection under section 19.5.3.6.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |

| 29                                                                                                                                                                                              | Inadequate EIAR | 11       | <ul style="list-style-type: none"><li>• The impact of ventilation systems has not been assessed.</li></ul>                                                                   | <p>EIAR Chapter 13, Airborne Noise and Vibration, section 13.5.3.2 of the EIAR discusses noise from fixed plant, such as extract fans and ventilation systems. All plant associated with ventilation are housed within back of house plant rooms below ground level within the stations and hence will not generate any measurable airborne noise emissions at ground level. The key potential noise source relates to breakout noise from ventilation shafts and grilles at surface level. The assessment shows that without mitigation there are potential significant noise impacts from surface grills.</p> <p>As detailed in Chapter 13 (Airborne Noise and Vibration), the specific noise level from ventilation systems will be calculated as part of the further design development. Specifically, the operational noise level from each shaft and surface grill will be calculated to the nearest sensitive areas to each and specific attenuation designed for each system to not exceed the relevant design criteria for each location. As part of the design development of the station plant and ventilation systems, the background noise level at the nearest and most exposed NSLs to each fixed item of plant will be determined for day and night-time periods. This data will be used to establish the magnitude above which the operational plants items operate above in accordance with the methodology described in 13.2.5.2.4. All baseline noise values will be confirmed prior to the selection and design of the operational plant items through updated baseline noise surveys. The final airborne noise impact at sensitive receptors is very sensitive to small changes in the final construction and design of the ventilation systems. As a result, modelled impacts and mitigation will have to be updated in parallel with the detailed design. Section 13.6.2.3 outlines the detailed considerations that will be included in the design to ensure that the ventilation systems do not exceed limits as per BS 4142, including:</p> <ul style="list-style-type: none"><li>• Reduction of induct flow rates;</li><li>• Reduction of elements in the airflow;</li><li>• In duct attenuators;</li><li>• Orientation of grilles and louvres away from sensitive receptors;</li><li>• Acoustic louvres; and</li><li>• Anti-vibration mountings and couplings will be incorporated into the design to control vibration.</li></ul> <p>Once the project moves into the next phase of design development then the detailed design of each shaft and surface grill will include measurements of background and ambient noise at the closest noise sensitive receptors to each of these fixed items of plant, this data will be used to establish a noise threshold level in accordance with BS 4142 and BS 5228, that each item of plant must be below, with bespoke noise mitigation at each location.</p> |
| 30                                                                                                                                                                                              | Inadequate EIAR | 11       | <ul style="list-style-type: none"><li>• The ground borne vibration/noise impacts of the train operations upon the houses of Dartmouth Road have not been assessed.</li></ul> | <p>This statement is incorrect. EIAR Appendix A14.5, Groundborne Noise and Vibration and Blasting Modelling Results, Section 14.4 AZ4 Northwood to Charlemont, presents the predicted vibration levels during railway operation for sensitive receptors. The predicted groundborne noise at 33 Dartmouth Road is 28 dB LASmax, which is below the threshold level of 40 dB LASmax, indicating no significant impact during railway operation. The predicted VDV (Vibration Dose Value is a parameter that combines the magnitude of vibration and the time for which it occurs) during railway operation is 0.005 ms-1.75 (VDV day) and 0.003ms-1.75 (VDV night). Both of these values are well below the VDV Threshold Levels of 0.8ms-1.75 (VDV day) and 0.4ms-1.75 (VDV night) indicating no significant impact for the building or for residents of this address.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

| 31                                                                                                                                                                                              | Construction Phase | 11       | <ul style="list-style-type: none"><li>• The construction noise impact assessment is wholly inadequate as it fails to consider the internal noise impact over a 9 year period, defers assessments to the design and construction stage, fails to properly assess night time impacts, incorrectly categorises impacts as very significant as opposed profound.</li></ul>                                                                                                                                     | <p>The assessments presented in Chapter 13 and Chapter 14 of the EIAR are undertaken in line with best practice and all relevant guidelines and policy requirements as laid out in Section 13.2.2 of the EIAR. The assessment has not been deferred until the detailed design stage and the observer has not identified any aspect of best practice or any relevant guidelines or policy which has not been applied in the assessment. The assessment of noise levels at building facades is normal for this type of analysis as the assessment criteria generated from best practice guidance all refers to noise levels at building facades.</p> <p>EIAR Chapter 2, Methodology used in Preparation of the EIAR provides the details of the durations of effect utilised in the analysis throughout the EIAR. The assessment in EIAR Chapter 13 has noise and vibration impacts over shorter durations to reflect the duration of the actual activity i.e. excessive noise effects resulting from the construction will not last 9 years, but will last as long as the "noisy activity" lasts.</p> <p>In EIAR Chapter 5, MetroLink Construction Phase, Table 5.5, the proposed working hours for this site are outlined. The assessments presented in Chapters 13 and 14 are based on these proposed working hours with no works proposed above ground occurring during the night time. As outlined in Table 5.5 of the EIAR, there will be underground works during the night time period and these have been assessed in both Chapter 13 and 14. Chapter 13 assesses potential impacts associated with the operation of plant above ground only i.e. ventilation fans at the surface to facilitate this work, while Chapter 14 covers the potential impacts associated with underground works.</p> <p>TII do not agree that impacts are incorrectly categorised as very significant rather than profound. EIAR Chapter 13, section 13.2.6 outlines the appraisal methodology and along with Tables 13.12, 13.13 and 13.14 shows 'very significant' rather than 'profound' is the correct categorisation.</p> |
| 32                                                                                                                                                                                              | Construction Phase | 11       | <ul style="list-style-type: none"><li>• Construction vibration impact assessment fails to assess the evacuation tunnel. This element of the project is likely to have a significant effect upon the Dartmouth Road residents. It will not be possible to meet airborne noise condition limits that may be reasonably set by An Bord Pleanala.</li><li>• Construction of the Intervention tunnel will give rise to significant noise and disturbance, 24/7 during the period of its construction.</li></ul> | <p>An assessment of the mechanical excavation of the evacuation tunnel and intervention tunnel has been carried out, and is included within Chapter 14 of the EIAR. The assessment of groundborne noise and vibration from mechanical excavation for a number of representative receptors is presented in Table 14.31 and Table 14.33, with predictions for a greater number of receptors in the area presented in Appendix 14.5 Groundborne Noise and Vibration Blasting Modelling Results.</p> <p>Owing to the nature of the tunnelling works and to ensure a safe and stable method of excavation, the sprayed concrete tunnel construction will be undertaken 24 hours per day, seven days per week. As noted in Chapter 5 (MetroLink Construction Phase), where reasonably practicable, material will be stockpiled within the relevant main construction compound for removal during standard working hours. If activities require work outside the hours set out in Table 5.4, an approval will be sought from the relevant Local Authority for these on a case-by-case basis. It is proposed that during night-time support works, an acoustically clad steel framed building will be used within the compound to control airborne noise breakout to surrounding sensitive properties.</p> <p>The reference to Drill and Blasting of the intervention tunnel is included in section 14.11 is in-correct. It should refer to mechanical excavation as the principal form of excavation, which as identified in Chapter 14 of the EIAR will not have a significant impact on overlying properties.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

| 33                                                                                                                                                                                              | Construction Phase | 12       | <ul style="list-style-type: none"><li>• The construction phase on Dartmouth Road, assuming no delays, will last 8.5 years (102 months). This is a medium- term effect which has not been properly considered in the EIAR. This may be termed "medium-term" from a broad community perspective, but in the lives of the residents of Dartmouth Road the impact is profound. Especially when the cumulative effect of the ongoing construction of the Office Building at 2 Grand Parade that will last for 4-5 years is considered. The residents of Dartmouth Road will have to endure almost a decade and a half of major scale construction within metres of their houses in an area zoned as residential.</li></ul> | <p>As outlined in EIAR Appendix A5.2 Construction Programme Including Tunnel Elements, the proposed construction period will progress at this site for 8.5 years, with some minor advance works prior to that as part of the development at Two Grand Parade, as noted in Chapter 4 (Description of the MetroLink Project). TII are of the view, as demonstrated by the detailed EIAR submitted that the environmental impacts have been carefully assessed and mitigation measures proposed where necessary. As detailed in the relevant environmental chapters and the Outline Construction Environmental Management Plan (CEMP) in Appendix A5.1, a significant suite of mitigation measures and monitoring has been proposed to mitigate the effects of this construction period so far as possible.</p> <p>As noted in Chapter 5 (MetroLink Construction Phase), the activities described and impacts anticipated are intended to represent the likely most significant environmental impacts for the construction work to be undertaken along the alignment (i.e. a reasonable worst case scenario). Therefore, it is possible that there will be durations of the programme where impacts will be less than those described. Additionally, the total duration of construction at this location will not consist entirely of 'major scale construction'. This overall construction duration of 102 months consists of access (1 month), enabling works (13 months), civils (71 months) and fit out, T&amp;C and restoration (9 months).</p> <p>TII would also note that while TII are of the view that the construction environmental impacts can be mitigated, relocation is an available option for Dartmouth Road residents immediately adjacent to the construction site during peak construction. TII are available to discuss this option if that is something the property owner would like to explore and consider.</p> |  |
| 34                                                                                                                                                                                              | Construction Phase | 12       | <ul style="list-style-type: none"><li>• The hours of construction proposed include 12 hour working days and significant element of 24 hour working during certain periods of the contract.</li></ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | <p>Proposed Working Hours are outlined in Section 5.2.4 of Chapter 5 of the EIAR. Standard working hours will generally be the norm for all above ground works i.e. Monday to Friday 07:00 to 19:00 and Saturday 07:00 to 13:00. Only tunnelling (please see response (25) above) and other works underground will be undertaken 24 hours a day. The assessments presented in Chapters 13 and 14 are based on these proposed working hours with no works proposed above ground occurring during the night time. As outlined in Table 5.5 of the EIAR, there will be underground works during the night time period and these have been assessed in both Chapter 13 and 14. Chapter 13 assesses potential impacts associated with the operation of plant above ground only i.e. ventilation fans at the surface to facilitate this work, while Chapter 14 covers the potential impacts associated with underground works. The only exception to this is the requirement for other noisy work above ground outside standard working hours for events such as concrete pours, abnormal deliveries etc. TII and their Contractor will engage with the local community and local authority to advise of any such upcoming events such as this, and will do there best to minimise any such occurrence so far as practicable.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |  |

In so far as there are any constraints at this location, they are due to the construction of the principal development at Two Grand Parade, not the incorporation of a roof slab to facilitate the construction of a station. The incorporation of a roof slab reduces constraints in this area, promoting the objectives of the EIA Directive. The only alternative with fewer constraints would have been if ABP had refused permission for Two Grand Parade, sterilising the site and frustrating the achievement of the zoning objective (which is set out in a Development Plan that had been subject to SEA).</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |  |

| Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022 Case Reference Number NA29N.314724 - Residents of 33 Dartmouth Road - Submission to Metrolink Railway Order application |                    |          |                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| 36                                                                                                                                                                                              | Construction Phase | 12       | <ul style="list-style-type: none"><li>Additional traffic will be generated during construction and the rediverting of traffic will have an adverse effect upon the local road network. HGV traffic on quiet residential roads will have a severe impact upon amenities.</li></ul> | <p>Appendix A9.5 Scheme Traffic Management Plan details the proposed HGV routing associated with the construction works at Charlemont Station. Routing from the site is mainly via the R111 and R110, and routing to the site is via the R810 and R110. Alternative routing options via the R110/Kildare Road and the R110/R811 are also considered, all of which are part of the regional road network. Only when the full closure on Dartmouth Road is in place will construction traffic route via Dartmouth Road. Local modelling undertaken at this location indicates that the increased volume of traffic on Grand Parade and Northbrook Road does not translate into any significant increase in driver delay. The longest delay occurs eastbound on Dartmouth Road during the AM peak of 14 seconds.</p> <p>Model outputs indicate that there will be a moderate increase in HGV movements during construction at this location. The most significant increase, of just over 2%, will be in both directions along Ranelagh Road/Charlemont Street, which is part of the regional road network. Elsewhere in the area, including local residential streets, increases are significantly lower.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| 37                                                                                                                                                                                              | Construction Phase | 12       | <ul style="list-style-type: none"><li>No local traffic modelling has been undertaken as part of the assessment and the impact upon pedestrians has not been properly assessed.</li></ul>                                                                                          | <p>This statement is incorrect, both local traffic modelling and the impact upon pedestrians has been assessed. EIAR Appendix A9.5 Scheme Traffic Management Plan presents the analysis undertaken to assess the impact of the traffic management measures on the local road network surrounding the proposed Charlemont Station during the construction phase. At the local level the following parameters have been used to assess impacts on general traffic and on pedestrians:</p> <ul style="list-style-type: none"><li>Increase in walking distance/quality of service for pedestrians (through removal of footpath, reduction of quality of service, removal of a pedestrian crossing or relocation of crossing by more than 100m);</li><li>Increase in driver delays at junctions;</li><li>Changes in traffic flows on surrounding streets; and,</li><li>Additional distance travelled due to diversions.</li></ul> <p>The analysis undertaken at this location indicates that the increased volume of traffic on Grand Parade and Northbrook Road does not translate into any significant increase in driver delay. The largest increase in driver delay of 12 seconds is registered on the westbound approach on Grand Parade to the Ranelagh Road signalised junction.</p> <p>During the construction phase, pedestrians will experience a reduction in quality of pedestrian infrastructure and space. The construction site boundary will encroach upon footways in the local area, including the northern side of Dartmouth Road, and the southern side of Grand Parade. However, a temporary signalised crossing will be provided west of the Luas to maintain pedestrian access to and from the Stop. Whilst there are partial closures on Dartmouth Road and Grand Parade, pedestrian movements will be maintained on appropriately sized footways through the area.</p> |
| 38                                                                                                                                                                                              | Construction Phase | 12       | There will be a severe impact upon human health which has not been properly assessed.                                                                                                                                                                                             | <p>It is not correct to say "There will a severe impact upon human health which has not been properly assessed." EIAR Chapter 10, Human Health has identified that there may some residual effects after mitigation measures due to the noise and vibration arising from mechanical excavation, TBM advancement and proposed blasting resulting in "annoyance to users, but no health effects".</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

| Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022 Case Reference Number NA29N.314724 - Residents of 33 Dartmouth Road - Submission to Metrolink Railway Order application |                 |          |                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| 39                                                                                                                                                                                              | Amenity Impacts | 12       | <ul style="list-style-type: none"><li>• The operation of the trains and associated ventilation systems has the potential to adversely affect the amenities of the residents and has not been properly assessed</li></ul>       | <p>TII have assessed the impact of the trains and ventilation system and do not predict that amenity will be significantly impacted.</p> <p>With regards to the noise of operating rail infrastructure, EIAR Chapters 13 and 14 present a comprehensive and detailed assessment of operational airborne and groundborne noise and vibration. No residual noise impacts are identified at this location during operation. The calculated rail noise levels across the proposed Project are not significant in terms of any widespread community disturbance and result in a not significant to slight impact when added to the prevailing noise environment.</p> <p>EIAR Chapter 13, sections 13.2.3.2 and 13.5.3.2.3 recognise that ventilation systems if not designed and mitigated effectively are potential noise sources. Section 13.6.2.3 outlines the detailed considerations that will be included in the design to ensure that the ventilation systems do not exceed limits as per BS 4142, including:</p> <ul style="list-style-type: none"><li>• Reduction of induct flow rates;</li><li>• Reduction of elements in the airflow;</li><li>• In duct attenuators;</li><li>• Orientation of grilles and louvres away from sensitive receptors;</li><li>• Acoustic louvres; and</li><li>• Anti-vibration mountings and couplings will be incorporated into the design to control vibration.</li></ul> <p>Measures to mitigate noise from the use of public address systems is also detailed in Chapter 13 (sections 13.5.3.2.4 and 13.6.2.4). Best practice design principles will be employed to minimise noise breakout at the surface from these systems via escalators, lift shafts and stairwells.</p> <p>Mechanical elements associated with escalators are housed below ground and are fully enclosed. The operation of escalators will not generate any notable noise sources during operation and will not be audible above the prevailing noise environment.</p> <p>As noted above, with regards to stations entrances, these are transient areas for passengers entering and exiting the station. These activities are not the source of significant noise generation and form part of the existing soundscape in the existing prevailing environment. It is acknowledged footfall numbers will increase in the vicinity of the station entrance, however this activity does not translate to significant noise impacts.</p> <p>Finally, noise levels arising from the station during the operational phase will be required to adhere to limits to ensure that there are no significant effects.</p> |
| 40                                                                                                                                                                                              | Amenity Impacts | 12       | <ul style="list-style-type: none"><li>• The post completion permanent arrangement will result in significant rat running between Ranelagh Road and Grand Parade to the detriment of the residents on Dartmouth Road.</li></ul> | <p>As presented in EIAR Chapter 4, Description of the MetroLink Project, the internal street between Grand Parade and Dartmouth Road will have barriered and controlled access, be speed restricted and traffic calmed, and be treated as a shared vehicular pedestrian space. This will prevent it from being used as a "rat-run".</p> <p>It is also of note that the modelling data shows there will be significant growth in public transport usage in trips to and from the city centre area, resulting in an increase of up to 43,000 public transport trips over the 12hr day. There will be a corresponding reduction of over 14,000 car trips along the alignment from Northwood to Charlemont, reducing demand on the road network. The provided interchange with the Luas Green Line at this location is also anticipated to reduce vehicle demand from the south of the city (via Ranelagh).</p> <p>During the operational phase, Dartmouth Road will have a new pedestrian crossing, one of which is located towards Ranelagh Road. The provision of this crossing will also act as a traffic calming measure on Dartmouth Road, deterring its use as a rat run.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

| Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022 Case Reference Number NA29N.314724 - Residents of 33 Dartmouth Road - Submission to Metrolink Railway Order application |                      |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| 41                                                                                                                                                                                              | Amenity Impacts      | 12       | <ul style="list-style-type: none"><li>• The overall impact of the both the construction and operational phases of the project, in terms of noise, vibration, visual impacts, traffic, HGV movement, construction activity, operational emissions, anti-social behaviour and general activity around the station will be such as to severely and permanently adversely affect the residential amenities of the residents listed in this submission. The impacts will be so severe as to evidently be in material contravention of the Dublin City Development Plan zoning objective for the area, which is Z2: "to protect and/or improve the amenities of residential conservation areas."</li></ul> | <p>The impacts of the proposed project, both during the construction and operational phase have been assessed in the EIAR that accompanies the Railway Order, with mitigation measures proposed where necessary and practicable, to ensure impacts are within acceptable limits, noting that there will be a temporary groundborne noise significant impact when the TBM passes for approximately 2 weeks.</p> <p>While TII are of the view that the construction environmental impacts can be mitigated, relocation is an available option for Dartmouth Road residents immediately adjacent to the construction site during peak construction. TII are available to discuss this option if that is something the property owner would like to explore and consider. As noted in Chapter 5 (MetroLink Construction Phase), the activities described and impacts anticipated are intended to represent the likely most significant environmental impacts for the construction work to be undertaken along the alignment (i.e. a reasonable worst case scenario). Therefore, it is possible that there will be durations of the programme where impacts will be less than those described. Additionally, the total duration of construction at this location will not consist entirely of 'major scale construction', as suggested in observation item (33). This overall construction duration of 102 months consists of access (1 month), enabling works (13 months), civils (71 months) and fit out, T&amp;C and restoration (9 months).</p> <p>The above responses have also addressed in summary the impacts raised by this observation with the exception of anti-social behaviour. In this regard, the interchange will certainly increase the number of people passing through the area, however it is important to note that people will be using MetroLink, similar to Luas as a transport hub, moving quickly in and out of the area. The station will not be a destination attracting people to remain in the area. Further, TII have deliberately designed the Station with minimum set down space (with the exception of a drop-off on Grand Parade for persons of restricted mobility only) or room for taxi ranks so that it does not encourage the Station to be used as a terminus.</p> <p>Regards the reference to the Z2 zoning objective. The zoning under the Dublin City Development Plan 2022 - 2027 for the residential properties in question is "Z2 Residential Neighbourhoods (Conservation Areas)" with an objective to "protect them from unsuitable new developments or works that would have a negative impact on the amenity or architectural quality of the area (See Table 3.11 of the submitted Planning Report). As outlined in Section 4.5.18.6 of the Planning Report, the element of the Project within the Z2 zoning area will affect a below ground area only and as such, with the proposed mitigation, will not have the kinds of negative impacts that the zoning objective seeks to protected against. The majority of the proposed Charlemont Station and all above ground elements are located within the lands zoned Z5 with the objective "To provide for the creation and protection of enterprise and facilitate opportunities for employment creation". The Station has been designed so that it is integrated with the proposed redevelopment of this site by a third party development, and as such, demonstrates that the proposed Project is consistent with the zoning objective. The MetroLink station design does not result in any segregation of the area, with no surface barriers or walls proposed.</p> |

| 43                                                                                                                                                                                              | Concluding statement | 12       | <p>In summary, it is the view of us as owners of 33 Dartmouth Road that An Bord Pleanála should not be granting permission for the Metrolink Railway Owner. Therefore we request the following amendments:</p> <p>I. Omit from the Railway Order the section from Tara Street Station to Charlemont Station and associated onward tunnel extension and intervention tunnel</p> <p>ii. Require the submission of a railway order for a section from Tara Street Station to St. Stephen's Green which would effectively provide for a terminal hub station which can effectively integrate with the Luas Green Line and future DART underground.</p>                                                   | <p>Please refer to responses (4) and (10) above.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

| Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022 Case Reference Number NA29N.314724 - Residents of 33 Dartmouth Road - Submission to Metrolink Railway Order application |                                                                                                                                                 |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |  |
| 44                                                                                                                                                                                              | 4. Cumulative Impact of Metrolink proposal on Residents of 33 Dartmouth Road<br><br>Construction phase impacts, issues and planning remediation | 13       | <p>The diagram below is a visual manifestation of the Construction phase proposal sought by the Applicant, NTA/TII. This phase of the project is proposed to run for 102 months or ~9 years and with usual expected project delays will reach in over 10 years.</p> <p>We find such a proposal both inhumane and oppressive. To expect residents to have to endure living in a Construction compound for over 10 years with the associated noise, dirt, vibrations, disturbance, risk to property foundations, risk to personal safety and mental health is untenable.</p> <p>An Bord Pleanala has a responsibility to immediately reject such an absurd proposal.</p> | <p>TII would like to assure you that at no time will the safety of this property and its occupants be placed at risk, noting that the construction of the station will be monitored, including surrounding ground and building movements, with predetermined trigger levels aligned with action plans to ensure movements do not exceed acceptable levels.</p> <p>A 4m high hoarding will be in place for the duration of the works so that your property is segregated from the construction compound, noting that this hoarding will be moved back to the other side of Dartmouth Road upon the re-opening of Dartmouth Road after an estimated period of 30 months on completion of station piling and roof slab construction.</p> <p>As outlined in EIAR Appendix A5.2 Construction Programme Including Tunnel Elements, the proposed construction period will progress at this site for 8.5 years, with some minor advance works in advance of that. TII are of the view, as demonstrated by the detailed EIAR submitted that the environmental impacts have been carefully assessed and mitigation measures proposed where necessary. As detailed in the relevant environmental chapters and the Outline Construction Environmental Management Plan (CEMP) in Appendix A5.1, a significant suite of mitigation measures and monitoring has been proposed to mitigate the effects of this construction period so far as possible.</p> <p>TII would also note that while TII are of the view that the construction environmental impacts can be mitigated, relocation is an available option for Dartmouth Road residents immediately adjacent to the construction site during peak construction. TII are available to discuss this option if that is something the property owner would like to explore and consider. As noted in Chapter 5 (MetroLink Construction Phase), the activities described and impacts anticipated are intended to represent the likely most significant environmental impacts for the construction work to be undertaken along the alignment (i.e. a reasonable worst case scenario). Therefore, it is possible that there will be durations of the programme where impacts will be less than those described. Additionally, the total duration of construction at this location will not consist entirely of 'major scale construction', as suggested in observation item (33). This overall construction duration of 102 months consists of access (1 month), enabling works (13 months), civils (71 months) and fit out, T&amp;C and restoration (9 months).</p> |  |

Dartmouth Road closure for 102 months ~9years                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | <p>Dartmouth Road will not be closed for 9 years. The closure will take place in two stages, the total duration of which is 4 years, noting the first closure of 18 months will be partial .</p> <p>1. Partial closure of Dartmouth Road to enable utilities to be diverted. Subject to Statutory Undertaker approvals (ESB, Eircom etc.) This process is estimated to take up to 18 months, while access is maintained along Dartmouth Road via a proposed single lane closure.</p> <p>2. Full closure. Once the utilities have been diverted, the road is then shut to through traffic (pedestrian access is maintained) and is estimated to take up to 30 months to complete the piling, and roof slab of the station. The utilities and road will then be reinstated and the road reopened.</p> <p>Diversions will be put in place for local access, including deliveries, emergency services, bin collection, and pedestrian access maintained to all properties. The impacts on parking will be monitored during construction to reinstate any disrupted areas as soon as practicable. On completion of construction and reopening of Dartmouth Road, parking will be reinstated.</p> <p>During the closure of Dartmouth Road, approximately 30 on street parking spaces will be lost during the main works, however there will be no impact to on-street loading bays. EIAR Chapter 5, MetroLink Construction Phase specifies the 5 residential properties that will be impacted during the works. The closure will be monitored to determine if it is required at all points, or if the spaces can be temporarily reinstated temporarily throughout the works. Once the construction works are complete and Charlemont Station is operational, the remaining on-street spaces will be fully reinstated.</p> <p>As outlined in Appendix A5.1 Outline Construction Environmental Management Plan, the contractor(s) will be required to maintain emergency access routes throughout the construction phase. These will be developed in consultation with the emergency services and documented as part of the detailed CEMP(s). All required diversions will be appropriately signed, and a comprehensive publicity and information campaign will take place prior to the Commencement of works to minimise the severity of the impact.</p>                                                                                                                                                                                                                                                   |  |

| Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022 Case Reference Number NA29N.314724 - Residents of 33 Dartmouth Road - Submission to Metrolink Railway Order application |                                                                            |          |                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| 46                                                                                                                                                                                              | CONSTRUCTION PHASE<br><br>IMPACTS ON OWNERS-RESIDENTS OF 33 DARTMOUTH ROAD | 14       | 2. Hoarding placed 1M in front of our property at a height of 6.4M for ~9 years                                             | <p>TII confirm the proposed hoarding at the southern boundary of the site is 4m rather than 6.4m stated by the observation. This is presented in Chapter 13 (Airborne Noise and Vibration) section 13.6.1.2.4. Whilst Chapter 5 (MetroLink Construction Phase) does refer to an 'additional 4m tall noise screen' at select locations such as Charlemont, this is instead of the standard 2.4m hoarding, and not in addition to. The hoarding will only be there for the period of the full road closure, estimated to be 30 months, and will then be stepped back to the other sider of the road when Dartmouth Road is reopened.</p> <p>As previously noted, while TII are of the view that the construction environmental impacts can be mitigated, relocation is an available option for Dartmouth Road residents immediately adjacent to the construction site during peak construction. TII are available to discuss this option if that is something the property owner would like to explore and consider. As noted in Chapter 5 (MetroLink Construction Phase), the activities described and impacts anticipated are intended to represent the likely most significant environmental impacts for the construction work to be undertaken along the alignment (i.e. a reasonable worst case scenario). Therefore, it is possible that there will be durations of the programme where impacts will be less than those described. Additionally, the total duration of construction at this location will not consist entirely of 'major scale construction', as suggested in observation item (33). This overall construction duration of 102 months consists of access (1 month), enabling works (13 months), civils (71 months) and fit out, T&amp;C and restoration (9 months).</p> |

Traffic during Construction phase.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | <p>The EIAR has assessed the impact of construction traffic. TII modelling shows there will not be significant volumes of additional site traffic.</p> <p>Appendix A9.5 Scheme Traffic Management Plan details the proposed HGV routing associated with the construction works at Charlemont Station. Routing from the site is mainly via the R111 and R110, and routing to the site is via the R810 and R110. Alternative routing options via the R110/Kildare Road and the R110/R811 are also considered, all of which are part of the regional road network. Only when the full closure on Dartmouth Road is in place will construction traffic route via Dartmouth Road. Local modelling undertaken at this location indicates that the increased volume of traffic on Grand Parade and Northbrook Road does not translate into any significant increase in driver delay. The longest delay occurs eastbound on Dartmouth Road during the AM peak of 14 seconds.</p> <p>Model outputs indicate that there will be a moderate increase in HGV movements during construction at this location. The most significant increase, of just over 2%, will be in both directions along Ranelagh Road/Charlemont Street, which is part of the regional road network. Elsewhere in the area, including local residential streets, increases are significantly lower.</p> <p>Please also refer to response (45) above.</p> |

Parking for residents of Dartmouth Road                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | <p>TII can confirm parking will be removed for approximately 4 years for the reasons explained by response (45) above, rather than the 9 years stated by the observation.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| 51                                                                                                                                                                                              | CONSTRUCTION PHASE<br><br>IMPACTS ON OWNERS-RESIDENTS OF 33 DARTMOUTH ROAD         | 14       | The overall impact of the Construction phase of the project, in terms of noise, vibration, visual impacts, traffic, HGV movement, construction activity, around the Construction site will be such as to severely and permanently adversely affect the residential amenities of us the owners - residents of 33 Dartmouth Road. The impacts will be so severe as to evidently be in material contravention of the Dublin City Development Plan zoning objective for the area, which is Z2: "to protect and/or improve the amenities of residential conservation areas." | <p>Please refer to response (41) above.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 52                                                                                                                                                                                              | OPERATIONAL PHASE<br>PHASE<br><br>IMPACTS ON OWNERS-RESIDENTS OF 33 DARTMOUTH ROAD | 15       | 1. Placing a major Station entrance opposite our house                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | <p>TII do not agree that a profound impact will be experienced as a result of the location of the southern entrance.</p> <p>Stations entrances are transient areas for passengers entering and exiting the station. These activities are not the source of significant noise generation and form part of the existing soundscape in the existing prevailing environment. It is acknowledged footfall numbers will increase in the vicinity of the station entrance, however this activity does not translate to significant noise impacts.</p> <p>There will be no profound loss of amenity as a result of the proposed southern station entrance or the station, and as per the responses above, TII are of the view that the proposed development will have a long term positive affect in terms of property value. There is strong evidence to suggest that property values will in fact increase in close proximity to public transport infrastructure and that local residents will greatly benefit from having a world class metro system providing access to the city centre, airport and north city at their door step.</p>                                                                                                                                                                                                                                                                                |

| Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022 Case Reference Number NA29N.314724 - Residents of 33 Dartmouth Road - Submission to Metrolink Railway Order application |                                                                                 |          |                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 53                                                                                                                                                                                              | OPERATIONAL PHASE PHASE<br><br>IMPACTS ON OWNERS-RESIDENTS OF 33 DARTMOUTH ROAD | 15       | 1. Traffic volumes given congested canal entrance will drive all traffic onto Dartmouth Road. | <p>Transport modelling undertaken by TII does not show there will be a profound increase in traffic volumes.</p> <p>The MetroLink forms part of an integrated public transport network. The system is designed in an integrated manner so that people travelling from the area south of Dublin to access locations north of Charlemont, such as Dublin Airport, Mater, Swords etc. will utilise public transport to interchange with the MetroLink, or will walk or cycle to access their local station. The system is not designed to encourage people to drive to stations within the City and TII actively discourage people from doing so other than the Park &amp; Ride station at Estuary.</p> <p>As presented in Appendix A9.2-B Traffic and Transportation Assessment Charlemont Station, when the Project is in place, there will be changes to mode share in the individual zones surrounding the Project. There is a reduction of approximately 830 car trips to and from the zones surrounding Charlemont Station (including Dartmouth Road) over the 12hr period in Scenario A 2065. In Scenario B 2065, there is a reduction of 410 car trips over 12hr period when the Project is in place. Car mode share will reduce by up to 5 percentage points in the zones surrounding Charlemont Station, including the Dartmouth Road area.</p> <p>In overall terms, the Charlemont Station will provide for improvements to the public transport network resulting in decreases in private car usage/trips, increases in public transport usages and will facilitate walking and cycling to the station, without significantly impacting on the operation of the road network in the area.</p> |

Anti social behaviour with 19 hrs per day 365 days a year major metro axis 10M from our family home.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | <p>The risk of anti-social behaviour has also been considered by the Project and is addressed by EIAR Chapter 6, MetroLink Operations and Maintenance. Section 6.6.5.8 specifically addresses how this will be managed, including how the architectural and urban realm design is designed to discourage anti-social behaviour, for example through the attractive setting, use of public lighting, open sight-lines, and avoidance of areas where individuals and groups of people can hide. As detailed in Chapter 4 (Description of MetroLink Project) at Charlemont, a landscape avenue of trees and low-level planting will segregate pedestrians from the road, creating a safer environment for pedestrian movement in this area. Additionally, the landscape design here consists of pockets of planting and strategically placed mature trees to integrate and soften the human experience within this zone. CCTV will also be installed throughout the MetroLink system, including at station entrances and the public realm to provide general security and surveillance of all the public areas subject to GDPR and Data Protection Impact Assessment. TII would also note Charlemont Station has been deliberately designed without drop-off (with the exception of a drop only for persons of restricted mobility on Grand Parade) and taxi pick-up areas.</p> <p>TII would also note that while the interchange will certainly increase the number of people passing through the area, it is important to note that people will be using MetroLink, similar to Luas as a transport hub, moving quickly in and out of the area. The station will not be a destination attracting people to remain in the area.</p> |
| 58                                                                                                                                                                                              | OPERATIONAL PHASE PHASE<br><br>IMPACTS ON OWNERS-RESIDENTS OF 33 DARTMOUTH ROAD | 15       | The overall impact of the Operational phases of the project, in terms of noise, vibration, visual impacts, traffic, operational emissions, light pollution, anti-social behaviour and general activity around the station will be such as to severely and permanently adversely affect the residential amenities of us the owners - residents of 33 Dartmouth Road. The impacts will be so severe as to evidently be in material contravention of the Dublin City Development Plan zoning objective for the area, which is Z2: "to protect and/or improve the amenities of residential conservation areas."                                           | Please refer to response (41) above.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| 59                                                                                                                                                                                              | OPERATIONAL PHASE PHASE<br><br>IMPACTS ON OWNERS-RESIDENTS OF 33 DARTMOUTH ROAD | 16       | <p>This submission supports the request made in the general area submission to omit from the Railway Order the section from Tara Street Station to Charlemont Station and associated onward tunnel extension and intervention tunnel.</p> <p>In addition to the strategic planning reasons for the omission of this section of MetroLink, this submission clearly highlights that the EIAR fails to adequately assess impact of the development upon the houses on Dartmouth Road. The project would seriously affect the residential and other amenities of the residents of Dartmouth Road both during the construction and operational phases.</p> | Please refer to response (10) above and response (60) below.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

| Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022 Case Reference Number NA29N.314724 - Residents of 33 Dartmouth Road - Submission to Metrolink Railway Order application |               |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| 60                                                                                                                                                                                              | 5. Conclusion | 16       | <p>The proposal to locate the City Centre terminus for a major transport interchange on a residential by-road off the heavily congested Canal is fundamentally flawed.</p> <p>The impact of such a proposal is a direct interference to our right to the peaceful enjoyment of our property at 33 Dartmouth Road and will result in a profound loss of amenity and property value during Construction and Operation phases.</p> <p>A proposal that subjects citizens to such profound loss of amenity by locking us into a Construction compound for a period of 10 years is inhumane.</p> <p>The Board has the responsibility to protect the integrity of planning in our City and to refuse strategically flawed projects that are wrong for the development of the City and also to safeguard residential zones and their associated amenities.</p> <p>The current Metrolink proposal in relation to the Charlemont Terminus is both strategically flawed and will profoundly damage our property and our residential community.</p> <p>We request to be given an opportunity to present to the Oral Hearing so that we can raise our concerns as listed in this Submission, and the CCG Dartmouth Road Submission and the CDCG General Community Submissions.</p> | <p>TII have responded to all the observations made by this submission and are of the view that the EIAR has correctly assessed the impacts of both the construction and operational phase, and proposed mitigation measures where necessary. TII do understand your particular concerns regards the proximity of 33 Dartmouth Road to the construction of the proposed Charlemont Station, and while TII are of the view that the construction environmental impacts can be mitigated, relocation is an available option during peak construction. As noted in Chapter 5 (MetroLink Construction Phase), the activities described and impacts anticipated are intended to represent the likely most significant environmental impacts for the construction work to be undertaken along the alignment (i.e. a reasonable worst case scenario). Therefore, it is possible that there will be durations of the programme where impacts will be less than those described. Additionally, the total duration of construction at this location will not consist entirely of 'major scale construction', as suggested in observation item (33). This overall construction duration of 102 months consists of access (1 month), enabling works (13 months), civils (71 months) and fit out, T&amp;C and restoration (9 months). TII are available to discuss this option if that is something the property owner would like to explore and consider, noting that the southern boundary to the site will only be close to the property for the period of the full Dartmouth Road closure, estimated to be 30 months, and will then be stepped back to the other sider of the road when Dartmouth Road is reopened.</p> <p>TII would further note, as evidenced by TII's responses to the observations raised by this submission, that there will not be any profound impacts during the operational phase.</p> <p>TII do not agree that the location of Charlemont Station is fundamentally flawed, noting the rationale for the proposed Charlemont Station is explained by responses (4) and (5) above, and is in accordance with the strategic planning set out by the 2022-2042 GDA Strategy approved by the NTA and Minister for Transport.</p> <p>With regards property value, as noted above, TII are of the view that the proposed development will have a long term positive affect in terms of property value.</p> |

| Letter Re: Submission on NC06F.302010 - Railway Order from Estuary to St. Stephen's Green, Dublin |              |          |                                                                                                                                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| 1                                                                                                 | Cover Letter | 1        | I welcome the construction of Metrolink as a transformative piece of infrastructure for Dublin. Metrolink represents a major modal shift towards sustainable transport. This investment must be pioneering in its sustainability, emphasis on active and low-carbon travel and commitment to achieving our climate goals as laid out in the 2021 Climate Action Plan. | <p>TII wish to thank you for taking the time to make this submission. Your positive support is gratefully appreciated. TII share your aspirations on sustainability and are committed to achieving the goals set out by the now 2023 Climate Action Plan and realising the Project to deliver the benefits that MetroLink will bring.</p> <p>As outlined in EIAR Chapter 3, Need for the Proposed Project, there is a significant focus on achieving the UN Sustainable Development Goals in national policy and this is central to the National Planning Framework to ensure that Ireland has a more sustainable future. The Environmental Protection Agency (EPA) Sustainable Transport Performance Measures (EPA 2011) highlights that sustainable transport is central to efforts to control greenhouse gas emissions, air pollution and environmental damage. The benefits of a sustainable transport system of which MetroLink is a key element extends beyond environmental considerations, delivering improvements in congestion, productivity, health and quality of life. EIAR Chapter 4, Project Description, section 4.6.3 outlines what sustainability means for the project. This includes delivering and operating an efficient, low carbon and climate-resilient metro system, which better connects passengers as part of an integrated transport system, unlocks regeneration opportunities, and enables compact growth for present and future generations, while also being designed to be responsive to future demand requirements. The Project design includes a number of sustainability initiatives in order to meet the project sustainability aims as outlined in TII’s Sustainability Implementation Plan and these are detailed in full in EIAR Chapter 4, Section 4.6.3.</p> <p>EIAR Chapter 17, Climate, focuses specifically on how the Project will mitigate and reduce carbon, including:</p> <ul style="list-style-type: none"><li>• Implement a whole-life Carbon Management Plan aligned to PAS 2080 (Green Construction Board 2016) to inform the design, build and operation of MetroLink utilising TII's Carbon Assessment Tool;</li><li>• Achieve Net Zero for operational energy by the design year, with a stretch aspiration to be close (&gt;80%) to Net Zero at start of operation through energy efficiency, innovation, green power purchases and offsetting residual emissions;</li><li>• Achieve a reduction in mains water use during operation through the use of rainwater harvesting, water re-use and efficiency systems and devices at all work sites, stations, and buildings. Wastewater from the vehicle washing plant will be treated and recycled in-situ to reduce water usage;</li><li>• Requiring operations to achieve high recycling rates with an aspiration to achieve zero waste directly to landfill;</li><li>• Mitigation measures to be applied to the power operational demand as metro systems offer an immediate opportunity for reducing energy requirements. This will be achieved on the proposed Project by the recycling of braking energy. When vehicles brake, their kinetic energy is converted into electricity and returned to the traction power line. The installation of reverse substations on the proposed Project system will offer the opportunity to reuse a portion of braking energy. Based on the inclusion of two reverse substations (at Dardistown and Charlemont) it is estimated that the system could potentially regenerate 0.119MW. This recovery equates to 0.6% of the energy needed to run the stations (19.58MW).</li></ul> <p>Further, MetroLink will address transport challenges within the Greater Dublin Area, including generating a modal shift away from private car use and help Ireland meet its climate change targets in line with Climate Action Plan 2021, and make Dublin a more liveable and sustainable city.</p> |

| Letter Re: Submission on NC06F.302010 - Railway Order from Estuary to St. Stephen's Green, Dublin |                                                         |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |  |
| 2                                                                                                 | Pedestrian and Persons with Disabilities Infrastructure | 1        | <p>The Walk21 Conference on active travel this year in Dublin showed us what could be achieved regarding pedestrian infrastructure and catering for the needs of those with disabilities. Seamless pedestrian access and level access should be a priority where feasible, as well as well-designed, adequately sized and managed lifts where level changes are needed. Catering for the needs of persons with disabilities should be a key aspect of the project from the outset. Advice should be sought from disability organisations, as well as the Irish Centre for Universal Design and the Trinity Haus Project.</p> <p>1 . I welcome the new pedestrian crossing planned at the Swords Central stop and encourage a greater rollout of zebra crossings along the route, along with lower speed limits. Long and frequent pedestrian crossings are central to ensuring safety and accessibility.</p> <p>2. The notable footpath widening at Stephen’s Green East is welcome. Footpath widening must be prioritised. As a rule, half the width of a street in the city centre should be designated for pedestrian use.</p> <p>3. I am pleased to see the canopies featured in the Retained Cut Station design - offering a communal space for passengers as a meeting point.</p> <p>4. Funding provisions for pedestrian and cycling infrastructure must be integrated into the Metrolink project</p> | <p>Catering for persons with disabilities is a key requirement of the proposed Project, as set out in EIAR Chapter 6 Metrolink Operations and Maintenance, section 6.8.2 Access for All. The proposed Project has been designed on the principle of Access for All, which requires that the design has been developed to meet all legislative requirements relevant to accessibility including the Disability Act 2005 and in turn the Sectoral Plan for Accessible Transport under the Disability Act 2005 (DTTAS 2012). Specifically, for MetroLink, this includes station design to support wayfinding through the station, onto and use of the trains, and use of station facilities.</p> <p>To date, and as documented by EIAR Appendix A8.19 Meetings Register, a number of disability organisations have been consulted, including Fighting Blindness, National Council for the Blind of Ireland (NCBI), Irish Wheelchair Association and National Disability Authority (NDA), as well as consultation with the Irish Senior Citizens Group, residential property/landowners and resident associations, families with disabled members and the Luas User Group.</p> <p>TII has been in contact with the Irish Centre for Universal Design and the Trinity Haus Project and will continue to work with this and other bodies as the scheme progresses through the construction and operations phases.</p> <p>Thank you for the supportive comments in relation to footpath widening, new crossings and public space offered by the MetroLink stations. TII will continue to work with the local authorities and the NTA to integrate pedestrian and cycling infrastructure with the Metrolink and the wider receiving environment.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |  |
| 3                                                                                                 | Cycling Infrastructure                                  | 2        | <p>Metrolink must be developed in tandem with active modes of transport. The following suggestions are made for cycling infrastructure:</p> <p>1.Cycle lanes near planned metro stops should be safe and segregated from heavy traffic by planting, level changes and road markings, rather than unsightly plastic bollards.</p> <p>2. Segregation of pedestrians and cyclists will encourage active modes of transport. A place-making approach involving segregated space for pedestrians, cyclists and public transport should be implemented where possible.</p> <p>3. It is important to provide adequate cycling parking at metro-stations to meet demand, as much at grade as feasible.</p> <p>4. The cycling infrastructure on the R108 Ballymun Road should be reinstated and improved</p> <p>5. Adequate provisions should be made on Metrolink carriages for along bicycles and emobility devices along with integration to existing bike-sharing schemes across the city. The approach taken on Danish commuter trains that have bicycle storage with flip up seats that can accommodate bikes or seated passengers depending on demand should be used.</p>                                                                                                                                                                                                                                      | <p>The MetroLink Project is not being developed in isolation and will provide significant benefits not only to those who choose to use it, but also to other transport network users, by reducing the demand for road space and creating the opportunity for the road transport system to achieve optimum levels of efficiency and effectiveness. As outlined in EIAR Chapter 3, the proposed Project is part of an integrated transport network that also includes for BusConnects and DART+ which are all included under Project Ireland 2040. Together, these projects will result in a reliable, sustainable, affordable, integrated public transport network that will support the economy, help Ireland meet its climate change targets in line with Climate Action Plan 2023, and make Dublin a more liveable and sustainable city. Whilst MetroLink is a standalone project that is not dependent on any other projects for its delivery or effective operation, it is nonetheless a critical part of the proposed integrated transport network for the Greater Dublin Area.</p> <p>With regards the five particular observations:</p> <p>1. The design and delivery of cycle lanes near Metro stations will be undertaken in accordance with the relevant design standards so that they are safe to use.</p> <p>2. Where possible segregation of space has been incorporated within the design.</p> <p>3. There will be a need for high density cycle parking into the future to accommodate demand from the Project, as well as demand from the general increase in cycling forecasted within the City. Our analysis, detailed in the EIAR Appendix A4.1, Methodology for Potential Cycle Demand, indicates that the demand for cycle parking facilities at specific stations will exceed the amount of cycle parking facilities that TII can physically accommodate at each station site. Where our analysis indicates a shortfall in cycle parking spaces, TII, NTA, DCC and FCC have committed the implementation of a multi-agency approach to ensure that the required number of cycling parking spaces are provided city wide by opening year. This will be achieved through a combination of appropriately located mobility hubs, e-bike stations and cycle parking facilities to meet forecasted demand and ensure effective cycle connectivity at every station.</p> <p>4. The proposed Project includes the reinstatement of cycle infrastructure along the R108, as shown on the Railway Order Plans\Drawings, Alignment Details Book 2 of 2 Dublin City Council. The cycle infrastructure proposed is to the same standard as that proposed for the BusConnects corridor design and is therefore an improvement to the current facilities along the R108.</p> <p>5. MetroLink Station and Rolling Stock is designed to accommodate bicycle and e mobility devices. A decision as to whether in practice such devices will be allowed on to carriages is subject to the establishment of an appropriate policy in this regard. TII are aware of the advantages and disadvantages associated with allowing such devices on public transport and careful consideration is required before a policy is established, adopted and implemented.</p> |  |

| Submission No.                                                                                    |                                               |          | 044                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| 4                                                                                                 | Integration with other Public Transport Modes | 2        | <p>1. Metrolink provides significant opportunities to improve bus, commuter rail, Luas and DART connectivity. Each station should maximise the possibilities for inter-modal journeys with easy to follow transfers where appropriate.</p> <p>2. During the construction process, there should be constant communication and integration between the Metro project and developing proposals for other forms of public transport.</p> <p>3. It may be appropriate to put in place a public transport users group to advice on, and assist in the successful delivery of the project.</p> <p>4. It may also be appropriate to put in place a project lead member charged with the integration of transport modes.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | <p>1. As detailed in EIAR Chapter 6, MetroLink Operations and Maintenance, the proposed Project has been designed to ensure maximum interchange with other modes of transport, specifically more sustainable modes of transport such as walking, cycling and public transport. All operational stations will have pedestrian and cycle access, with bus stops located either adjacent to or within the site to facilitate integration with MetroLink. Interchange with Luas and rail/DART has been a key consideration for station locations, as presented in EIAR Chapter 7, Consideration of Alternatives.</p> <p>2. EIAR Chapter 30 details the cumulative impacts of interaction between other projects and MetroLink. Significant consultation has taken place to date with BusConnects and Irish Rail, among others, as detailed in EIAR Chapter 8, Consultation. TII will maintain this engagement throughout the design phase (note once designs are finalised for construction and construction is underway there will be limited opportunity for change). Through coordination with the NTA, TII will ensure communication and integration between MetroLink and developing proposals for other forms of public transport.</p> <p>3. TII support the establishment of public transport user group to advise on the successful deleivery of the proposed Project, however it will be for the NTA, with its wider public transport remit, to establish such a group.</p> <p>4. This putting in place of a project lead member charged with the integration of transport modes falls outside the remit of TII and is a matter for the NTA, with their wider public transport remit.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| 5                                                                                                 | Vehicular Infrastructure                      | 2        | <p>The Metrolink project is an opportunity for a modal shift away from car-centricity and towards public transport. As is noted in the Environment Impact Assessment Report, Inrix has ranked Dublin the fifth worst city globally for time spent in traffic. (Those these surveys tend to focus only on car-based journeys). The benefits of a modal change span from increased social cohesion, lower levels of obesity and a reduction in transport emissions. On this matter:</p> <p>1 . With much of the route following the Ballymun Road and other main arteries across the city, there is an opportunity to provide state-of-the-art walking and cycling infrastructure and redesign carriageway sections and junctions to optimise this.</p> <p>2. The scheme should provide for passengers coming from outside the Greater Dublin Area i.e. the Dublin-Belfast Corridor to alight at Donabate Railway Station and reach Estuary in a timely fashion to continue their journey with Metrolink. Increased frequency on the 33B bus service can help provide this or the provision of a new shuttle service. This could aid in reducing long-distance commutes as sprawl reaches further areas outside the existing Greater Dublin Area.</p> <p>3. The presumption must be against increased road capacity with any road maintenance or new interventions attributed to the Metrolink project possibly leading to induced demand</p> <p>4. The provision of electric vehicle charging points at the Estuary Park &amp; Ride is welcome. Electric Vehicle provision including charging and pro-cabling must exceed the requirements in the proposed AFIR Directive.</p> <p>5. Kiss-and-Ride facilities that allow car drivers to drop off intending Metro passengers should be provided for beside the proposed stations.</p> <p>6. It may be appropriate to provide for car-sharing facilities at or adjacent to the proposed stations.</p> <p>7. If Park and Ride Facilities are provided, they should form part of mixed-use transport infrastructure with frontage development and other uses at, or above the proposed parking sites as part of an urban design and place making strategy.</p> | <p>MetroLink will generate a modal shift away from private car use and help Ireland meet its climate change targets in line with Climate Action Plan 2023. In response to the specific observations made:</p> <p>1. MetroLink includes the reinstatement or improvement of walking and cycling infrastructure within the scope and remit of the Project. The BusConnects project also includes the provision of improved walking and cycling infrastructure, a redesigned carriageway, and redesigned junctions along the Ballymun Road. TII and MetroLink will liaise and integrate with the BusConnects Project.</p> <p>2. MetroLink provides for the Dublin-Belfast corridor through the Park &amp; Ride at Estuary that includes provision for interchange with bus services. As part of the ongoing service planning reviews by the NTA, the local bus services around Swords and to the north are regularly reviewed. These reviews will consider options to revise services/increase frequencies and provide new services to improve the overall public transport offering, including new and developing opportunities provided by the MetroLink project.</p> <p>3. The EIAR transport assessments show a reduction in road use with MetroLink in operation.</p> <p>4. The proposed design includes for approximately 23% of the car parking spaces (694 spaces) with EV charging points installed. This is above the minimum 20% required by current legislation. The design of the P&amp;R at Estuary will allow this provision to increase in line with demand and any further changes required with the proposed AFIR Directive.</p> <p>5. MetroLink will form part of an integrated public transport network and patrons will use the public transport network, walking and cycling to access the stations. The provision of drop-off facilities has been considered during the design process with such facilities only provided at locations that are less likely to encourage unnecessary short journey car trips in the local area.</p> <p>6. TII will consider car sharing opportunities as part of the detail design of car parking areas provided by the Project, and will liaise with the relevant local authority in relation to the potential provision of car-sharing facilities in the wider receiving environment.</p> <p>7. The proposed Park &amp; Ride and Estuary Station have been designed to facilitate connection to the zoned Metro Economic Corridor lands to the west and north at Lissenhall and incorporate appropriate hard and soft landscaping. The Station will form a destination node for the future residents and workers in the area, centred on the station entrance. Access to the Station is provided for vehicles, buses and for pedestrians and cyclists. Pedestrian and cyclist access is segregated from vehicular traffic routes to the station and Park &amp; Ride building to provide safe and conducive access. The Park &amp; Ride building is set back from the Swords Western Distributor Road and a landscape strategy has been developed to soften the visual impact of the building when viewed from the north. TII are therefore of the view that the structure will provide an appropriate frontage development to the Lissenhall lands along the section of the Swords Western Distributor Road included in the proposed Project.</p> |

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 6                                                                                                 | Spatial Planning and Land Use | 3        | <p>The Metrolink allows us to envisage a Dublin well connected by active / sustainable travel modes - fostering an appropriate environment for transit-oriented development of medium to high density. The following is proposed:</p> <p>1. Improved land-use strategies around Metrolink stops to reduce long-distance travel journeys should be a priority, with much potential for the development of new housing in the North Inner City in particular. A place-sensitive approach to higher density, well-designed development is required.</p> <p>2. Operate under a presumption of at least six-floor height at well-served locations, as it is wasteful to allow one-storey developments along a quality route such as this. The airspace above stations should be utilised for development.</p> <p>3. It may be appropriate to develop over stations using the 'air rights' associated with same as these stations by design will be well-served by public transport.</p> <p>4. In new developments, adequate green, open or wild space should be an integral part of any scheme.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | <p>1. Metrolink has been developed to support the principles of transit-oriented development and to facilitate the development of higher-density, well-connected places at each of the station locations. The delivery of MetroLink provides an impetus to the introduction of future land-use and transport policies, by Fingal County Council and Dublin City Council, that respond to the enhanced accessibility and potential capacity of the areas in its vicinity. The comments made regards housing strategies are noted and understood but fall outside of the remit of TII and are a matter for the Local Authority.</p> <p>2&amp;3. Opportunities for oversite development and adjacent site development potentially exist at a number of key scheme locations. Whilst such development does not form part of this Railway Order Application, TII are in consultation with a number of parties directly affected by the works who have expressed interest in promoting such future developments of residual properties at these locations.</p> <p>4. The design of the stations allows for soil and growth substrate above the infrastructure so that planting can be considered and implemented as part of the proposed Project. This planting ranges from large mature trees to blocks of shrub planting and SuDS (Sustainable Drainage Systems) elements as part of the design. The individual identity of each station is enhanced and defined by a feature tree or a feature group of trees and the nature of the associated planting. The planting palette is inspired by its setting in the landscape, for example by the nearby estuary and coastal planting.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| 7                                                                                                 | Other Issues                  | 3        | <p>Beyond these five overarching themes, some other issues arise</p> <p>1. I hope that in the outlined plan to reduce carbon emissions during the Construction Phase of the project that there will be a move to specify green, low-carbon concrete</p> <p>2. I am pleased to see the emphasis on integration with the built environment - hoping that lessons have been learnt from the garish 'Luashenge' phenomenon of unplanned utility boxes. I note the integration of the Albert Park air duct in particular and hope this approach will feature elsewhere. Utility cabinets should be considered from the offset and fully integrated into the design.</p> <p>3. There should be a concerted move away from the excessive signage seen on the Luas Red Line - as seen particularly between the Four Courts and Jervis Street stops.</p> <p>4. Lighting should be sensitively designed, and should be designed to ensure the safety of all, particularly women and girls. It should also ensure that light is not projected upwards to avoid interference with the 'night sky' and should decrease in brightness later at night if there are no people present.</p> <p>5. Operating hours seem to exclude 1am to 5:30am. To ensure a thriving night-time economy and reflecting the progress made by Minister Catherine Martin on the matter, services should be provided on a 24 hour / 7 days a week / 365 days a year basis.</p> <p>6. The range of active mobility and sustainability challenges present are such that one individual should be assigned responsibility for climate action and to whom concerns can be brought. Given the building activity due to commence, better use of our existing assets is the most environmentally friendly approach. Where existing infrastructure can be repurposed or retrofitted, it should be done.</p> | <p>In response to the observations made:</p> <p>1. TII will implement a whole-life Carbon Management Plan aligned to PAS 2080 (Green Construction Board 2016) to inform the detailed design, build and operation of MetroLink. The use of low carbon concrete as well as other low carbon materials and products will be a key consideration which will inform the development of all procurement documents and tender requirememts.</p> <p>2. Integration with the existing urban environment is a key objective of the architectural design, that not only considers the proposed MetroLink structures as a whole, but also individual items such as lifts (passenger and fire fighting) and surface penetrations to accommodate ventilation. Your particular comment regards utility cabinets is noted and TII provide the assurance that the architectural design is designed to minimise the impact on the existing urban realm.</p> <p>3. Signage will be consistent across the proposed Project and fit-for-purpose whilst also being cognisant of its environment. There is a balance to be struck with how signage is integrated with the existing urban realm whilst also providing clear and sufficient wayfinding to stations. This balance will be carefully considered during the detailed design phase.</p> <p>4. EIAR Chapter 4, Description of the MetroLink Project, section 4.12.8.3 explains the approach taken to lighting, including that "The additional benefit of LED compared to traditional light sources is the enhanced control of light spill and reduced direct upward light, which helps reduce light spill beyond the roads and pedestrian areas wherever possible in compliance with the Institute of Lighting Profession GN01 Guidance Notes for the Reduction of Obtrusive Light document". With regards to the wider issue of security, this is addressed by EIAR Chapter 6, MetroLink Operations and Maintenance, section 6.6.5.8, including the architectural and urban realm design is designed to discourage anti-social behaviour, for example through the attractive setting, use of public lighting, open sight-lines, and avoidance of areas where individuals and groups of people can hide.</p> <p>5. As set out by EIAR Chapter 6, MetroLink Operations and Maintenance, section 6.4.3, "It is anticipated that services will operate between 05:30 and 00:30, every day". At this time there is no economic justification for a service running 24 hours day, 7 days a week, however as with any transport system, the future development and needs for serving the Dublin population may change in time, and this would be considered if such a situation arose requiring extended MetroLink operating hours.</p> <p>6. Post receipt of an enforceable railway order, TII will establish a lead represenative within the project team which will be tasked with ensuring besdt practice and compliance with active mobility. sustainailty and Client Action. A key objective of the MetroLink delivery, and which is reflected by the submitted EIAR, is the management of environmental impacts and their mitigation, which will also include the modification, adaptation and repurposing of existing infrastructure where practicable. T</p> |

|                                                                                                                                                           |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| 1                                                                                                                                                         | Letter       | 1        | <p>I would like to register my strong opposition to the proposed MetroLink route through/under The Court Apartments, Dalcassian Downs, Dublin 11, where I live.</p> <p>The proposed MetroLink route will take the green area/car park of The Court Apartments. This area will become a construction site. The proximity of this construction site to the apartments, especially block 19-30, will cause significant disruption to the residents of The Court. There will be significant levels of noise and dust that will affect the residents of The Court Apartments, in addition hoardings will be put up that will block light from these apartments, especially those apartments situated on the ground floor, including the apartment I live in. There are also plans for large tanks or silos to be placed in the construction site which will further block light from the apartments.</p> <p>The proximity of the building site to The Court Apartments will make it difficult to tolerate living in many of the apartments affected by the proposed construction, including where I live. In particular it is reasonable to assume that the noise levels, lack of light and dust will have a negative effect on the health and well-being of those living in The Court Apartments. I am concerned that it will negatively impact the mental health and respiratory health of inhabitants in particular. I am also concerned about the effect of the building site on air quality within and around the apartments.</p> | <p>TII thank you for your submission and acknowledge that there will undoubtedly be impacts on the residents of The Court Apartments, Dalcassian Downs, due to the proximity of the Glasnevin Station to these properties.</p> <p>Noise and Light<br/>EIAR Appendix 14.5 Groundborne Noise and Vibration and Blasting Results presents the predicted noise and vibration levels during TBM Passage for various sensitive receptors. The predicted groundborne noise during TBM passage beneath the building 19-36 The Court Apartments is 49 dB LASmax, which is above the Threshold Level of 45 dB, resulting in a significant impact for occupants for the limited duration of TBM passage. The predicted groundborne vibration during TBM passage beneath the building 19-36 The Court Apartments is 0.263 ms-1.75 VDV (Vibration Dose Value is a parameter that combines the magnitude of vibration and the time for which it occurs) which is below the threshold of 0.8 ms-1.75 VDV for sensitive uses such as residential buildings. There is therefore no significant impact for groundborne vibration expected at this location.</p> <p>Unfortunately, there are no effective methods available to reduce groundborne noise or vibration from the TBM at source, but noting that the duration of this impact will be temporary and of the order of up to two-weeks as the TBM passes. TII will undertake advanced consultation and stakeholder engagement to prepare people for the passing of the TBM and ensure the timing of these impacts are known.</p> <p>EIAR Chapter 13, Airborne Noise and Vibration includes an assessment of airborne noise and vibration from the construction of nearby Glasnevin Station. Chapter 13 presents the predicted airborne noise impacts, including Table 13.62 which summarizes the noise impacts from the construction of Glasnevin Station. This includes receptor The Court Apartments, Dalcassian Downs in the location of this plot of land where the predicted impact is Significant to Very Significant impact during each of the work phases.</p> <p>TII's contractor(s) will prepare a Construction Noise and Vibration Management Plan (CNVMP) for the proposed Project as referred to in EIAR Appendix A5.1, Outline Construction Environmental Management Plan (CEMP). The CNVMP will be a live document and will include a full monitoring and auditing programme which will be agreed with the Local Authorities prior to the commencement of the Construction Phase, including predetermined monitoring trigger levels to ensure noise and vibration limits are not breached, noting that it is not possible to mitigate TBM groundborne noise and vibration at source. Table 6.2: Noise and Vibration Measures of the Outline CEMP outlines the monitoring programme requirements.</p> <p>The Transport Infrastructure Ireland (TII) Airborne Noise and Ground-borne Noise Mitigation Policy (Appendix A14.6 of EIAR Chapter 14) also sets out the construction noise insulation and temporary rehousing measures to be implemented where required.</p> <p>As identified in EIAR Chapter 13 (Airborne Noise&amp; Vibration), the key principals relating to noise mitigation will be applied across all construction areas for the proposed Project (including where noise levels are exceeded at Dalcassian Downs):<br/>* Noise control at Source: Selection of quiet plant, site layout, attenuation at source, operational control (hours and periods);<br/>* Noise Control along Pathway: Localized screening to plant items on site, enclosures, site buildings, site hoarding and noise barriers; and<br/>* Noise Control at Receiver: Noise Insulation (NI) and Temporary Rehousing (TRH).</p> <p>It is acknowledged that the proximity of hoardings, and presence of construction vehicles on site will have the effect of reducing light to these properties and as such TII will be engaging with the owners and occupiers of the effected properties to arrive at appropriate alternative arrangements to mitigate these construction phase effects.</p> |

| Submission No.                                                                                                                                            |              |          | 045                                                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| Letter Re: Railway Order Application - Metro North: Estuary through Swords, Dublin Airport, Ballymun, Glasnevin and City Centre to Charlemont, Co. Dublin |              |          |                                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
|                                                                                                                                                           |              |          | (1) continued                                                       | <p>Dust and Air Quality</p> <p>The TII Guidance document 'Guidelines for the Treatment of Air Quality During the Planning and Construction of NAtional Road Schemes' (TII, 2011) details the methodology for determining air quality impact significance criteria for road schemes in Ireland. The significance criteria are based on PM10 and NO2 as these pollutants are most likely to exceed the annual mean limit values (40µg/m3). However, the criteria have also been applied to the predicted annual PM2.5 concentrations for the purpose of this assessment.</p> <p>In order to ensure that no dust nuisance occurs, a series of measures will be implemented, these have been detailed in Appendix A16.4 Dust Management Plan (associated with Chapter 16 Air Quality). In summary, the measures which will be implemented will include:</p> <ul style="list-style-type: none"><li>* Material handling systems and site stockpiling of materials will be designed and laid out to minimize exposure to wind. Water misting or sprays will be used as required if particularly dusty activities are necessary during dry or windy periods;</li><li>* Any blasting will be completed by specialized contractors with a specific blasting dust management plan;</li><li>* Liaison with local authorities and community groups;</li><li>* Hoarding will be provided around the construction compounds; and</li><li>* It is anticipated that methods of collecting rainwater and recycling for general site use, will be adopted where practical. Requirements for dewatering installations at deep station and tunnel portals can also provide a valuable source of water for general site use.</li></ul> <p>In terms of dust generation there is potential for significant dust generation at Glasnevin as outlined in Table 16.44 of Chapter 16 (Air Quality), if not mitigated. However Section 16.6.1 of Chapter 16 (Air Quality) and the Construction Environmental Management Plan outlines measures that will be undertaken to manage the effects of the generation dust. Consistent implementation of good dust mitigation practices will ensure that the impact from construction dust is not significant. The measures include the preparation of an Air Quality Management Plan for eah worksite. The plans will include an inventory and timetable of activities which may give rise to emissions or dust; alert levels; alert system to be used (including notification process); details of control measures; details of dust monitoring arrangements, including the location of sensitive receptors, monitoring locations, and monitoring equipment to be used; and, details of the air quality reporting requirements.</p> <p>Human Health</p> <p>Potential impacts to Human Health are presented in Chapter 10 of the EIAR. The Construction Phase of the Air Quality assessment, as detailed in Chapter 16 (Air Quality), identifies a generally negligible or slight negative impact on air quality in the vicinity of the proposed project during the Construction Phase post mitigation. No exceedances of air quality standards are predicted, therefore, no significant adverse human health impacts are predicted. Sensitive receptors such as Mater Hospital, Northwood Nursing Home, Tara Winthrop Clinic and DCC Assisted Living have been assessed in recognition of the presence of vulnerable patients who may have decreased immune systems. At Mater Hospital, High Efficiency Particulate Air filters are present on windows and ventilation systems, and therefore in addition to the construction mitigation measures outlined above in relation to air quality, it is not anticipated that there will be any impact on human health as a result of the construction activity. Similarly, it is not anticipated that there will be any human health impact at the other identifed sensitve receptors.</p> <p>As detailed in Chapter 10 (Human Health), human psychological impacts are very complex and not easily predicted. There is no simple methodology to predict effects in groups of people, often the most efficient way of predicting future psychological impacts is by looking at what has happened in similar projects. One relevant example is the recent construction of the Elizabeth Line in London. A Pubmed search was conducted to determine if this project was associated with adverse psycological impacts and there is no publication suggesting that this is the case. Potential psychological effects are not equally distributed, and must be balanced against the positive psycholoical impacts of teh Operational Phase and the benefits and convenience to residents of the area given the proximity to the proposed MetroLink stations. Whilst there is a traffic management plan proposed for the Construction Phase (with the proposed temporary traffic management measures assessed in Appendix A9.5 Scheme Traffic Management Plan), there may be delays in what are already busy streets and roads as outlined in Chapter 9 (Traffic &amp; Transport). This may lead to annoyance in some drivers which may precipitate complaints. However, annoyance is not in itself a human health effect. On balance there is no reason to predict significant adverse effects on human health from a psychological perspective.</p> |

| Letter Re: Railway Order Application - Metro North: Estuary through Swords, Dublin Airport, Ballymun, Glasnevin and City Centre to Charlemont, Co. Dublin |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| 2                                                                                                                                                         | Letter       | 1        | <p>In addition, the loss of the car park and green area (lawn and trees) will affect the quality of life of those living in the apartments. The green area is a community space where people relax and socialize, in particular over the summer months. The loss of this space is not to be underestimated.</p> <p>In summary, due to loss of light, noise and air pollutant levels, loss of our green space and car park, I am strongly opposed to the proposed MetroLink route as pertains to The Court Apartments, Dalcassian Downs.</p> | <p>As stated in Chapter 27 (The Landscape) the largest part of the open space and car park attached to the southern end of the Dalcassian Downs residential estate, will be part of the construction works area and the majority of the existing mature trees and shrubs will be removed as part of the works.</p> <p>It is acknowledged that reducing parking within areas of the estate will mean that people may need to walk further from their cars to their apartments.TII are working with DCC to identify alternative car parking spaces and will continue to liaise with residents.</p> <p>During construction of the proposed Project, a total of 23.46ha of open space lies within the Project Boundary of which 11.77ha will be acquired temporarily to accommodate construction compounds and construction activities (including enabling works, demolition, excavations, traffic diversions, station and route construction as well as tunnelling). It is recognised that the green space at Dalcassian Downs is a community space, however, there will be approximately 533 ha of remaining green space available within the Study Area which may be used an alternative during this period. The impact on open space is therefore considered to be a negative, slight, medium-term impact at the regional and local level during construction of the proposed Project.</p> <p>Please refer to response item (1) above in relation to the predicted impacts on light, noise and dust/air quality at The Court Apartments, Dalcassian Downs as a result of the construction of the Glasnevin Station.</p> |

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| Letter Re: Railway (MetroLink-Estuary to Charlemont via Dublin Airport) Order 2022 |                               |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| 1                                                                                  | Observations of CLG Na Fianna | 3        | <p>The works on the St Mobhi Road site will severely impact on local residents and a number of active sporting and educational institutions including Na Fianna, Scoil Mobhí, Scoil Chaitríona and Whitehall College. Recognising the intensity of use of the site and its impact on such large numbers of users we suggest that a condition of the granting of the RPO should stipulate that the full traffic and health and safety plans for this site are prepared in conjunction with the stakeholders in the direct vicinity. The stakeholder group should include a representative of each educational institution, each sporting group and a residents representative.</p> | <p>The concern regarding works on the St Mobhi Road site are understood. The EIAR has fully assessed the potential impacts on the local population in the area of Mobhi Road, as summarised below:</p> <p>Chapter 9 - traffic and transport impact assessment and proposed mitigation measures. Section 9.7.1.2 includes for a Scheme Traffic Management Plan (STMP) to manage traffic movements during the construction phase to ensure traffic congestions is minimised. The Plan will include measures such as the establishment of Local Community forums which will cover areas local to each station where stakeholders will have an opportunity to inform the traffic management element of the project. Other measures include the control of construction vehicles in terms of their hours of operation and restrictions on vehicle size and weight.</p> <p>Chapter 10 - human health impact assessment and proposed mitigation measures. This chapter has identified that on the implementation of mitigation measures as summarised here, the works may cause annoyance, but no residual effect on health is predicted.</p> <p>Chapter 13 - airborne noise and vibration impact assessment and proposed mitigation measures. The Construction Environmental Management Plan (CEMP) (EIAR Appendix A5.1), outlines the measures that will be implemented to manage noise and vibration during the construction phase, including:</p> <p>oNoise control at Source: Selection of quiet plant, site layout optimisation, attenuation at source, operational control (hours and periods); and</p> <p>oNoise Control along Pathway: Localised screening to plant items on site, enclosures, site buildings, site hoarding and noise barriers.</p> <p>Chapter 16 - dust and other air quality emissions impact assessment and proposed mitigation measures. The potential risk from dust emissions has been reviewed for the critical activities at each of the construction areas. The CEMP (EIAR Appendix A5.1) will be used to manage the construction phase dust emissions. In addition, before commencing works, an Air Quality Management Plan shall be prepared and submitted in advance to the relevant planning authority. The plan will include all appropriate dust and emissions mitigation measures including for asbestos and aspergillus, applicable to the circumstances of the relevant site, based on the local authority requirements and industry best practices. The plan will be developed by the Contractor and for each worksite shall include:</p> <p>oAn inventory and timetable of activities which may give rise to emissions or dust;</p> <p>oAlert levels and system to be used (including notification process);</p> <p>oDetails of control measures;</p> <p>oDetails of dust monitoring arrangements, including the location of sensitive receptors, monitoring locations, and monitoring equipment to be used; and</p> <p>oDetails of the air quality reporting requirements.</p> <p>The types of measures that will be implemented to manage dust will include the following:</p> <ul style="list-style-type: none"><li>•Material handling systems and site stockpiling of materials will be designed and laid out to minimise exposure to wind. Water misting or sprays will be used as required if particularly dusty activities are necessary during dry or windy periods;</li><li>•Any blasting will be completed by specialised contractors with a specific blasting dust management plan;</li><li>•Liaison with local authorities and community groups;</li><li>•Hoarding will be provided around the construction compounds; and</li><li>•It is anticipated that methods of collecting rainwater and recycling for general site use, will be adopted where practical. Requirements for dewatering installations at deep station and tunnel portals can also provide a valuable source of water for general site use.</li></ul> <p>As outlined in EIAR Chapter 8 (Consultation), consultation will continue throughout the construction period to ensure that the public, stakeholders and interested bodies are informed of progress on the construction of the proposed Project and to allow for members of the public to correspond with the project team. TII will maintain engagement with relevant stakeholders at this location during the process of finalising temporary traffic management plans and relevant sections of the health and safety management plan.</p> |

| Submission No.                                                                     |                               |          | 046                                                                                                                                                                                                                                                                                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |

| Letter Re: Railway (MetroLink-Estuary to Charlemont via Dublin Airport) Order 2022 |                               |          |                                                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| 2                                                                                  | Observations of CLG Na Fianna | 3        | Prior to construction a process of monitoring and dealing with issues arising should be agreed. In the event of recurring breaches of safety/traffic plans a process should be agreed for an independent form of adjudication to deal with any substantive unresolved issues encountered during construction. | <p>TII will ensure that process and procedures are in place so that the risk of a breach is minimised. All potential environmental impacts will be monitored to ensure they remain within the stipulated limits of the granted Railway Order. Typically, monitoring will comprise of a "traffic light" systems of trigger levels that will provide a warning should trends be indicating a possible breach of Railway Order limits. A Monitoring Action Plan (MAP) will set out predetermined actions should a trigger be reached that will minimise the risk of Railway Order specified limits being breached. In the event of a breach, an investigation will be undertaken, and lessons learnt acted upon to avoid a repeat. Any breach of safety will be taken extremely seriously, and for which a temporary stand down will be safely implemented until such a time it is deemed work can safely resume.</p> <p>As outlined in the EIAR and summarised by Response (1) above, a number of mitigation measures will be implemented in order to reduce the impacts of the construction phase.</p> <p>All temporary traffic management plans will be developed and reviewed by the Scheme Traffic Management Coordinator in advance of implementation. All temporary traffic management schemes will be monitored on a daily basis to ensure compliance. Significant non compliance with an approved temporary traffic management scheme will result in the suspension of works until such time that the scheme is brought into compliance.</p> <p>All safety accidents and incidents will be dealt with in accordance with the Safety, Health and Welfare Act 2005, the Safety, Health and Welfare at Work (General Application) Regulations 2016 and the project's Health and Safety Management System, and the HSA notified accordingly and as such TII do not see the requirement for independent adjudication in respect of Safety/Traffic management plans.</p> |
| 3                                                                                  | Observations of CLG Na Fianna | 3        | In addition to the site works on St Mobhí Road we wish to clarify that the construction works as outlined in the RPO will not disrupt the use of public facilities enjoyed by Na Fianna in the public park of Albert College.                                                                                 | <p>In order to ensure full functionality of the facility during the construction phase some of the pitches have been slightly relocated and realigned within the existing confines of Albert College Park to avoid any loss of amenity, for details see Railway Order Plans\Drawings, Alignment Details Book2 of 2, Dublin City Council, Plan Drawing Nos ML-RO 304 F-G and ML-RO 304 G-H. Works to the pitches will be carried out in agreement with the stakeholders concerned so as to minimise any disruption to sporting fixtures.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| 4                                                                                  | Observations of CLG Na Fianna | 3        | In relation to the site of Collinstown Lane - we wish to ensure that all enabling works are conducted in such a manner as to minimise impact on the community based activities on this site.                                                                                                                  | <p>As identified in Chapter 11 (Population and Land Use), the pitches currently being used by CLG Na Fianna would be modified to accommodate the requirement to divert the existing open drain/river to the south of the grounds, which will result in the loss of land and impact one existing pitch. To mitigate this impact, this pitch will be rotated by 90°. The existing juvenile pitch will be relocated to the south west of the site and made larger.</p> <p>TII will continue to engage with DAA and CLG Na Fianna throughout the works so as to ensure that disruption to playing and training activities is minimised. It should be noted that the playing facilities will be enhanced through provision of additional pitch draining and flood lighting.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

| Observation on a Strategic Infrastructure Development Application - Railway (Metrolink - Estuary to Charlemont via Dublin Airport) Order [2022] |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| 1                                                                                                                                               | 5. Grounds   | 3        | I would like to make an observation regarding the siting of the St. Stephens Green Station: namely the cut and cover works for the station location, as the project does not seem to have balanced the full range of factors that should have been taken into account. It is troubling that any part of Dublin’s best loved park could ever be considered as suitable for a major cut and cover project for the station while alongside lies an adjacent wide roadway (St. Stephens Green East) with capacity for the station, its entrances and structures, allowing for a successful and complete re-instatement after the works. | <p>TII wish to thank you for your submission, and acknowledge your concerns around the protection of St. Stephen's Green. Appendix A7.3 St. Stephen's Green Report presents the alternative station locations that were considered and assessed as part of the decision-making process. Following the identification of St. Stephen's Green East as the best general location for a MetroLink station, a further multi-disciplinary analysis was undertaken to identify the optimum location for a station at St. Stephen's Green East having regard to Engineering, Environmental and Economy criteria. Seven potential locations were assessed having regard to the importance of St. Stephen's Green Park as an historical public park, the architectural heritage of the area, the importance of the transport corridor on St. Stephen's Green East, the presence of multiple utilities underneath the roadway on St. Stephen's Green East, and the requirement for an intervention shaft between the St. Stephen's Green Station and Tara Street in the event that the distance between these stations is greater than 1,000m.</p> <p>The long term impacts on St. Stephen's Green Park are significantly less for Location 5 as the main surface elements of the proposed station are largely located outside of the current extent of St. Stephen's Green Park. Furthermore, the preferred location allows for the long-term impacts of the station to be significantly mitigated by replanting trees and other vegetation, and the reinstatement of existing elements of architectural heritage. The overall construction phase impacts are reduced by avoiding the requirement for an intervention shaft, significant utility diversions and retaining transport and traffic movements on St. Stephen's Green East during the construction phase.</p> |
| 2                                                                                                                                               | 5. Grounds   | 3        | While the potential of the proposal is positive in its increased ease of access to St Stephens Green and potential for urban upgrades associated with the works, it throws this opportunity away by not sufficiently acknowledging how outstanding the urban purlieus of this corner of Dublin actually is.                                                                                                                                                                                                                                                                                                                         | <p>Please refer to response item (1) above in relation to the identification of the preferred station location.</p> <p>TII disagree with the statement regarding sufficient acknowledgement. Chapter 27 (The Landscape) of the EIAR considers the landscape and visual impact of the project and outlines the significance of St Stephen's Green. The proposals for the Project aim to reinstate the existing landscape faithfully as far as is practicable within the constraints which are known to apply. It is feasible to do this, however, as has been set out, it is not feasible to imbue the replacement planting with the level of maturity, the ‘weight’ or the ‘volume’ of the existing tree planting which needs to be removed. This aspect of this approach to restoration of the Park edge will take time. It may be acknowledged that the proposed works can apply a level of mitigation which would go some way to reinstating the disturbed part of ‘the Green’, however, beyond any potential for reinstatement, replacement or restoration, it would be difficult to offset impacts on the maturity and wholeness of this place.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| 3                                                                                                                                               | 5. Grounds   | 3        | It’s an architecturally ingenious park entrance as much as a sculpture, uncluttered and spare, it is a dignified set piece read against the greenery and huge tree canopies behind. That is a successful urban composition. There is really nothing convincing in its proposed re-located position, rendered impotent of function and pushed back out of the way.                                                                                                                                                                                                                                                                   | <p>With regard to the architectural significance of the entrance, Chapter 25 (Archaeology &amp; Cultural Heritage) of the EIAR identifies that any negative impacts would be offset by an improvement to the current setting and appreciation of the Wolfe Tone monument. The monument would be relocated further into the park, retaining the monument’s historic setting and allowing greater and safer appreciation of the monument as a sculpture, rather than as a barrier. The existing railings and footpath floor finishes will also be preserved. Following mitigation, Chapter 26 (Architectural Heritage) of the EIAR states that “There will be no direct or indirect impacts on architectural heritage during Operational Phase in this section of the study area”.</p> <p>To ensure mitigation is appropriate, the contractor(s) will appoint Consultant Conservation Architects to implement required preservation.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

| Observation on a Strategic Infrastructure Development Application - Railway (Metrolink - Estuary to Charlemont via Dublin Airport) Order [2022] |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| 4                                                                                                                                               | 5. Grounds   | 4        | In the planning report seven options are considered for this station and then in varying degrees dismissed for practical reasons. The impression given is that in certain circumstances anticipated construction problems for Metrolink are more importantly avoided than detailed consideration of the final urban outcome                                                                                                                                                                                                                                                                                                           | <p>Please refer to response item (1) in relation to the identification of the preferred location, supported by Appendix A7.3 St. Stephen's Green Report.</p> <p>The decision to locate St Stephen's Green station box at the preferred location has considered Engineering and Environmental factors, as well as Economy criteria. However, following concerns raised by the Office of Public Work and the Department of Culture Heritage and the Gaeltacht (DCHG)) with regard to potential for direct impacts on St Stephen’s Green, TII undertook further analysis to identify the feasibility of constructing a station fully located outside of the area of St Stephen’s Green Park.</p> <p>The summary of the options considered and analysed for the location of St. Stephens Green station box together with reference to supporting reports are available in Chapter 7: Consideration of Alternatives, section 7.7.10.10 St Stephen’s Green and supporting appendices.</p> <p>The key findings of the analysis completed were that Station Location 5 (the proposed location) remained the preferred station location for the following reasons:</p> <ul style="list-style-type: none"><li>* A station located entirely outside of St Stephen’s Green Park would cost 67% more to build than the preferred station location;</li><li>* The complexity of the alternative construction methodology and the necessity to carry out extensive utility diversions would increase the overall construction programme of between 15 months and 27 months when compared to the preferred station location;</li><li>* The proximity of buildings to the construction area for the option wholly within St Stephen’s Green East would make it very likely that these buildings would need to be vacated for much of the construction period. This would not be required for the preferred station location;</li><li>* The station location wholly within St Stephen’s Green East will require the diversion of a significant number of critical utilities including a major Victorian sewer and a major ESB cable route. This diversion work would result in extensive disruption to services while this work will be undertaken. This disruption would be largely avoided by progressing with the preferred station location;</li><li>* The closure of St Stephens Green East and Hume Street during the Construction Phase would require the diversion of traffic, pedestrians and public transport for a number of years. These impacts would be avoided by progressing with the preferred station location;</li></ul> <p>TII consider that the above factors, combined with the mitigation proposed for the impacts on architectural and landscape importance, demonstrate that a number of considerations have contributed to the decision making around location of the station box.</p> |
| 5                                                                                                                                               | 5. Grounds   | 4        | These are not insurmountable issues and the protected structure reason highly questionable. It just seems that it is never stated how important St. Stephens Green is, although perhaps this would take up an entire volume and in arguing that a little damage at one side is really nothing. A well-presented section should be provided by the applicant to include the east side from the houses and basements westwards through the park boundary, showing the entire width of the wide road and double pavement outside the park which would really be a telling drawing to combat the main concerns for pushing into the park. | Please refer to response item (4) above in relation to the decision on the location of the St Stephen's Green Station.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

| Observation on a Strategic Infrastructure Development Application - Railway (Metrolink - Estuary to Charlemont via Dublin Airport) Order [2022] |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| 6                                                                                                                                               | 5. Grounds   | 5        | The felling of trees for such projects is usually understated and in a “cut and cover” project, there are overhanging branches and adjoining roots of retained trees impacted so the neat little box is rarely the actual damage zone.                                                                                                                                                                                                                                                                                   | <p>Please refer to response item (2) in relation to the proposed mitigations to landscape, visual impacts, architectural heritage.</p> <p>Mitigation measures will be implemented during construction and operation to minimise the effects of habitat loss and habitat degradation on biodiversity including trees and their root structures. These mitigation measures can be seen in Sections 15.5.1.2 and 15.5.2.2 of Chapter 15 (Biodiversity).</p> <p>TII acknowledge the importance of the landscape and sense of place with regard to St Stephen's Green Park. Chapter 27 (The Landscape) details that once the reinstatement works are completed the negative effects of construction will be partially moderated, however the edge of the park along the section of required works, will appear rather raw, small-scaled and immature, especially when directly compared with the remaining untouched sections. These contrasts will reduce over time, though it may take a significant period before they may be described as imperceptible.</p> <p>However, the mitigation proposed ensures the station box will be deep enough to guarantee the relocation of trees above, integrating the station with the park setting over time. The preferred station location will have an impact on approximately 5% of the area of St Stephen’s Green during the Construction Phase, however once the station is constructed, with the reinstatement of all railings, monuments, street furniture and paving stones, only 0.21% of the park area will be directly impacted. And as stated above, The contractor(s) will appoint Consultant Conservation Architects to implement required preservation of in situ works.</p> |
| 7                                                                                                                                               | 5. Grounds   | 5        | Changes to hydrology locally can be detrimental to mature trees.                                                                                                                                                                                                                                                                                                                                                                                                                                                         | <p>All stations feature surface drainage systems which are sustainable. Wherever possible surface drainage is conducted to swales/infiltration trenches (as appropriate) which are also integrated into the soft landscape proposals, the impact on mature trees has been considered.</p> <p>Further information in relation to Hydrology and Hydrogeology impacts and assessments is available in Chapter 19 Hydrogeology, specifically section 19.5.3 Construction Phase Impact Assessment and section 19.5.4 Operational Phase Impact Assessment.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 8                                                                                                                                               | 5. Grounds   | 5        | The imbalance to the composition of the canopy within the park will be a very damaging outcome, it will be an obvious visual and ecological negative and one that can only recover over generations.                                                                                                                                                                                                                                                                                                                     | Please refer to response item (6) above in relation to the mitigations proposed for landscape, visual impacts and biodiversity.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| 9                                                                                                                                               | 5. Grounds   | 5        | The park is regular on plan and in every way as one looks at it, so it has to become clear in the future to anybody looking to admire it or if walking through it, that some traumatic negative event has occurred to unbalance the beautiful composition.                                                                                                                                                                                                                                                               | Please refer to response item (6) above in relation to the mitigations proposed for landscape, visual impacts and biodiversity.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| 10                                                                                                                                              | 5. Grounds   | 5        | The tree canopy cover exceeds its boundary, offering canopy covered sidewalks externally alongside the outer rows of limes and at every season one is stuck by how lucky we are to inherit such a place. While the buildings are more intact and regular on the east side of the green than any other, the significance of its canopy reading as a beautiful counterpoint and balance to them is even more intensely experienced, a sublime effect that could be lost for generations if current preoccupations prevail. | Please refer to response item (6) above in relation to the mitigations proposed for landscape, visual impacts and biodiversity.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

| 1                                                                                                             | Statement                                                                        | 1        | The College and Wainsfort Residents Association submission wholly relates to that portion of the proposed Metro Link beyond the station located at St Stephen's Green East. For the avoidance of any doubt we are fully supportive of the project from Estuary to St Stephen's Green, which we consider is long overdue.                                                                                                                                                                                                                                                                                                                        | TII notes and appreciates the observer's overall endorsement of the MetroLink Project with the exception of the section of the alignment south of the proposed St Stephen's Green Station. We have reviewed the observer's submission and responded to the observations made below.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| 2                                                                                                             | Submission                                                                       | 2        | We submit that Bord Pleanala should defer the authorisation of the section of MetroLink beyond the St Stephen's Green station, other than to create a turning section similar in length to that which is currently proposed for Manders Terrace. Reasons as follows:<br><br>1 . Failure to consider an alternative routing of the terminus notably towards Rathmines.<br>2. Limitations of Charlemont terminus for radial extensions onwards to south city.<br>3. Potential Environmental benefits for south city consequential from pause for exploration of alternative extension route.<br>4. Poor access to Charlemont from Rathmines Road. | Please refer to responses (3) to (7) below.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| 3                                                                                                             | 1. Failure to consider an alternative routing of the terminus towards Rathmines: | 2        | We would submit that the Rathmines or Portobello area would be a far more suitable location for a terminus but TII has wholly failed to consider this. This became relevant once the destination for a southern terminus was to be in or in the vicinity of the south inner city, rather than Sandyford.                                                                                                                                                                                                                                                                                                                                        | <p>The reasons for proposing a station at Charlemont are explained below.</p> <p>The connection from St Stephens Green to Charlemont / Ranelagh is supported by the previous Transport Strategy for Greater Dublin Area (2016-2035) and the current Transport Strategy for Greater Dublin Area (2022-2042). The latter considers a range of options for the onward extension of MetroLink to meet the demand for travel over the period of the strategy. This includes consideration of the need for the upgrade of the Luas Green Line to the Metro with a Metro extension to Dublin south west, south or south east. Whilst the strategy envisages that further extensions will be delivered after 2042, a MetroLink which terminates at Charlemont allows for the possible extension of the Metro in all the above directions.</p> <p>The proximity of the Metro to the Luas line at Charlemont provides for a positive customer experience for all users with short interchange distance and due to the proximity, clear wayfinding and high visibility of the interchange. The interchange arrangements at Charlemont provide for significantly better interchange arrangements compared to an alternative interchange at St Stephen's Green Station. Passengers wishing to interchange between Luas and the Metro at an alternative St Stephen's Green terminus would face a 500m-walk along a route either through St Stephen's Green park or along the footpath north of the park, which adds significantly to the time for interchange and therefore the overall journey time for passengers and a less positive customer experience for all interchange users. This passenger experience would be reduced further for those with mobility or visual impairments as well as those travelling to/from the airport with luggage.</p> <p>The section of MetroLink route between St Stephen's Green and Charlemont Stations contributes significantly to the overall benefits of the scheme. It serves a significant area of the south city of Dublin and offers enhanced access from the local area to the city centre and a direct connection to Dublin Airport. It serves key trip attractors including residential areas and offices / workplace locations, with high passenger boarding and alighting figures in the peak hours. During the morning peak, at Charlemont Station the flows include 1,800 passengers alighting, 2,300 boarding and 1,229 passengers alighting, 2,276 boarding during the evening peak. The passenger numbers contribute significantly to the overall benefits of the scheme and the effect of these benefits outweigh the additional costs that are associated with the delivery and operation of the section from St Stephen's Green to Charlemont Station. Further information is available in Chapter 7: Consideration of the Alternatives, section 7.7.8 MetroLink Southern Terminus Location.</p> |

Dublin |                                                                                    |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |              |
|                                                                                                               |                                                                                    |          | (3) continued                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | <p>The location of the interchange at Charlemont does not preclude onward extension south. An interchange at Charlemont is supported by policy including the Dublin City Development Plan 2022 - 2028 and the Transport Strategy for the Greater Dublin Area. As noted by the GDA Transport Strategy 2022-2042, section 12.3.2, "Charlemont offers the optimal location for the primary interchange with the Green Line in response to growing demand in the longer term and is an appropriate location to facilitate any potential future metro extensions to serve the south west, south or south east of the city region should sufficient demand arise."</p> <p>By extending MetroLink to Charlemont it provides for future proofing of the Green Line, bypassing the capacity constrained Luas on-street running section, and ensures potential future connectivity options are enabled, either to the Green Line or for extensions of the Metro.</p> <p>The Charlemont Station interchange provides for increased passenger utilisation of the MetroLink system, thereby increasing the benefits delivered by the Project, reflected by an improved Project Benefit Cost Ration (BCR).</p> <p>TII would further note that the GDA Transport Strategy 2022-2042 (published in January 2023), section 12.3.8 Additional Luas Lines Post-2042, states that the analysis undertaken for the Transport Strategy indicates that a number of corridors in the GDA will, in the longer term, generate travel demand above that which can be catered for by higher capacity bus systems and are likely to require upgrading to light rail in the period after 2042. The planning and design work associated with this longer term framework can commence during the strategy period.</p> <p>Future Metro services to the south of Charlemont do not form part of the Metrolink scheme as presented under the Railway Order. TII's role is to deliver Metrolink as supported by the Transport Strategy for Greater Dublin Area (2022-2042) and Dublin City Development Plan 2022-2028. The connection from St Stephens Green to Charlemont / Ranelagh is supported by the current Transport Strategy. The Transport Strategies were prepared by the National Transport Authority, scrutinised by the Joint Oireachtas Committee on Transport, and approved by the Minister for Transport. It notes in section 12.3.2, "Charlemont offers the optimal location for the primary interchange with the Green Line in response to growing demand in the longer term and is an appropriate location to facilitate any potential future metro extensions to serve the southwest, south or southeast of the city region should sufficient demand arise."</p> |              |
| 4                                                                                                             | 1. Failure to consider an alternative routing of the terminus towards Rathmines:   | 2        | <p>Rathmines Road under BusConnects will have four 'A' services and a number 80, 81 and 82 with an aggregate frequency of 33 per hour peak time in each direction. A terminus for MetroLink in Rathmines or Portobello would offer superb bus connectivity and would connect much of the south west city.</p> <p>We note that in the context of the preparation of the Greater Dublin Area Transport Plan 2022-2042, the National Transport Authority did a feasibility study entitled Metro to Knocklyon. We don't regard this as having been, in any way, adequate to fully assess the matter.</p> <p>We would request that a proper/comprehensive feasibility study be done to assess the options for the south west city.</p> <p>We do not believe that any progress can be made in assessing the alternative option unless a proper assessment of metro to the south west city is done.</p>                                                                                                 | <p>The reasons for proposing a station at Charlemont are explained by response (3) above, including why a station is not preferred at Portobello, Rathmines or Harold's Cross.</p> <p>It is also of note that the proposed route alignment from Estuary to Charlemont is consistent and compliant with the GDA Transport Strategy 2022-2042 (published in January 2023) in which it states that the south city terminus at Charlemont offers the optimal location for interchange with the Luas Green Line in response to growing demand in the longer term and is an appropriate location to facilitate any potential future Metro extensions to serve the south west, south or south east of the city region should sufficient demand arise.</p> <p>The NTA feasibility study referred to does not form part of this Railway Order Application.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |              |
| 5                                                                                                             | 2. Limitations of Charlemont terminus for radial extensions onwards to south city. | 3        | <p>It would seem, that the longer term intent is, that the MetroLink line be extended into the south city area. There are statements on this by various persons including NTA senior executives and the Minister. There are three alternatives posed:</p> <p>a. South west city towards Tallaght,</p> <p>b. Continuing on the existing Luas line or</p> <p>c. Heading south east towards UCD and Sandyford.</p> <p>We believe that if the tunnel is bored as far as Manders Terrace, this seriously compromises the ability for an extension to serve important communities.</p> <p>In particular we find it difficult to see how MetroLink could be extended to include relatively inner city suburbs such as Portobello, Lr. Rathmines, and Harold's Cross.</p> <p>We would submit that proper planning requires a proper evaluation of the options for extension and that it is not consistent with proper planning to permit a station at Charlemont which would compromise the options.</p> | Please refer to response (4) above.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |              |

Dublin |                                                                                                                |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |  |
| 6                                                                                                             | 3. Potential Environmental benefits for south city from pause for explaoration of alternative extension route. | 3        | <p>We believe that a metro extension would result in huge environmental benefits. In the area we live in which is not well served by buses the opportunity to have a metro close by would allow people to use a metro link passing close by would allow people to use a metro to get to the city and further northside without having to use their cars and in a timely manner.</p> <p>There is a push to take cars away from the centre but if the bus service is inadequate and we have seen many issues with ghost buses a metrolink would give people more guaranteed mode of transport and also much quicker than any bus service. The environmental impact of less cars on the road is what governments want to achieve.</p> <p>Our area will become a rat run for cars if the Templeogue Rd effectively become bus only.</p> <p>By extending MetroLink out towards Tallaght and outlying areas it would also mean less cars heading into our area for rat runs to get into Terenure .</p> <p>At certain times of the day there is gridlock in the Wainsfort area and this is before the proposed bus connects route which will make it even worse. The number of roads that cars can use to access Terenure will be reduced substantially and even with the new proposed bus corridors there won't be enough capacity to take all the extra passengers .</p> <p>If the powers that be want to be serious to reduce cars and therefore emissions then a Metro Link to the Southside to include Rathmines, Terenure, Templeogue, Knocklyon, Firhouse and parts of Tallaght has to be considered and a proper feasibility study should be undertaken before permission is granted to go past St Stephens Green.</p> | <p>As noted by the responses above and in accordance with the GDA Transport Strategy 2022-2042 (published in January 2023) a future Metro extension south is not precluded.</p> <p>The reasons for proposing a station at Charlemont are explained by response (3), including why the proposed line should be extended beyond St Stephen's Green.</p> <p>TII would also note (EIAR Chapter 3), MetroLink will divert 6.8 million car trips per annum in the early years, growing to 12 million per annum by 2045.</p> <p>As referred to in response (3) above, the future extentions to Metro services do not form part of this Railway Order Application.</p>                                                                               |  |
| 7                                                                                                             | 4. Poor access to Charlemont from Rathmines Road.                                                              | 4        | <p>As we note above there will be numerous buses (33 per hour peak in each direction) on Rathmines Road once BusConnects is implemented. Therefore, we think it is very likely that a lot of passengers will alight at Portobello Bridge and walk across to the MetroLink, particularly if they want to access parts of the North city or the airport, quite likely with luggage.</p> <p>There is no thought given in the TII plans to the route such people will walk/take, but we suspect it would be on both sides of Canal Road and Grand Parade. The Railway Order plan contains no proposals for a proper infrastructure to facilitate this.</p> <p>However, the most obvious solution to this problem is to have a terminus closer to Rathmines Road.</p> <p>We submits that Bord Pleanala should defer the authorisation of the section of MetroLink beyond the St Stephen's Green station, other than to create a turning section similar in length to that which is currently proposed for Manders Terrace.</p> <p>It would be premature to constrain the available options by allowing MetroLink to proceed beyond St Stephens Green to Charlemont / Manders Terrace.</p> <p>“What had the outside reviewers have to say about continuing to Charlemont/Manders Terrace?”</p> <p>Jaspers: "The connection to Ranelagh could feasibly be deferred until there is clarity on the future of the Green Line (subject to an improved understanding of how this could physically be delivered in a scenario with Metro operational)"</p>                                                                                                                                                                           | <p>The scope of the MetroLink project does not include the improvement or modification of the wider transport network.</p> <p>The above responses explain why TII does not consider it is correct or appropriate that the MetroLink alignment south of St Stephen’s Green should be omitted, and also demonstrates why the proposed Charlemont Station has been selected by TII as the preferred interchange with the Luas Green Line.</p> <p>A scheme which terminates at St Stephen’s Green would not be consistent with the Transport Strategy for Greater Dublin Area (2022-2042). In addition any decision to terminate the scheme at St Stephen’s Green will significantly impact on the overall viability and benefits of scheme.</p> |  |

| Letter Re: Railway Order Application- MetroLink: Estuary through Swords, Dublin Airport, Ballymun, Glasnevin and City Centre to Charlemont, Co. Dublin |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| 1                                                                                                                                                      | Cover Letter | 1        | <p>With reference to the proposed project the Commission for Railway Regulation (CRR) makes the following observations for your consideration for the project;</p> <p>1. Notification of your decision is required to the railway organisation, namely TII (Transport Infrastructure Ireland).</p> <p>2. Observations or issues raised by TII should be addressed.</p> <p>3. If permission is granted, the party undertaking the work should consult with TII regarding road- rail interfaces on access routes which may have increased flow or abnormal loads during the construction phase and upon completion of the project.</p> | <p>Addressing each of the three points in turn, TII note:</p> <p>1. Planning decisions will be notified by An Bord Pleanála to TII.</p> <p>2. TII will address all observations and issues raised by third parties as part of the consultation and oral hearing process. TII is confident that any observations or issues raised by TII throughout the planning process will be considered by An Bord Pleanála.</p> <p>3. The EIAR does assess the impact of the Project on traffic, both during construction and upon completion of the project when it is in operation, including the consideration of abnormal loads. EIAR Chapters; 5 Construction, 6 Operations and Maintenance and, more specifically, 9 Traffic and Transport refer. The party undertaking the work will be an organisation contracted by TII and therefore by default will be required to consult with TII regarding all aspects of the Project, including where access routes to and from MetroLink work areas potentially interact with heavy or light rail systems. TII, and their contractors when appointed, are engaging, and will continue to engage actively with Iarnród Éireann and with the Luas operator throughout the development and delivery of the Project.</p> <p>While not referred to in the submission, the Project will be regulated by the CRR under the Railway Safety Act 2005 which requires safety approvals from the CRR for the construction, commissioning and operation of the Project, including independent scrutiny of detailed safety cases, risk assessments and hazard management plans.</p> |

| Re: Railway (MetroLink - Estuary to Charlemont via Dublin Airport) Order 2022 Case Reference Number NA29N.314724 |                     |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                                                                                                                                                                 |
| 1                                                                                                                | Letter introduction | 1        | <p>Firstly, we are in favour of the broad aim of the Metrolink project to connect Dublin's city centre to the airport. However, as a resident living in the Dartmouth/Charlemont area, we wish to set out a number of observations for the Board regarding the proposal to locate the Terminus station at Charlemont-Dartmouth.</p> <p>Our family home is in the midst of the community where the Terminus station is proposed to be located. It is directly adjacent the proposed metro construction site, which is estimated to be in operation about us for nearly a decade. We live here with our four young children.</p> | <p>Thank you for taking the time to make a submission and your overall endorsement of the MetroLink Project. We have reviewed your submission and responded to the observations made below.</p> |

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| 2                                                                                                                | Point 1      | 1        | 1. Charlemont is the incorrect strategic location for a Terminus hub and spoke system as it is too far out along the Luas Green Line spoke and would prejudice future options for integration of networks and services. | <p>TII do not agree that Charlemont is the incorrect location for an interchange with the Luas Green Line or that it prejudices future options for integration with the wider transport network for the reasons set out below.</p> <p>The Board is required to have regard to the likely consequences for proper planning and sustainable development in the area in which it is proposed to carry out railway works (section 43(1) of the 2001 Act) and as such the following matters are relevant.</p> <p>The connection from St Stephens Green to Charlemont / Ranelagh is supported by the current Transport Strategy for Greater Dublin Area (2022-2042). The Transport Strategies were prepared by the National Transport Authority, scrutinised by the Joint Oireachtas Committee on Transport and approved by the Minister for Transport. It notes in section 12.3.2, "Charlemont offers the optimal location for the primary interchange with the Green Line in response to growing demand in the longer term and is an appropriate location to facilitate any potential future metro extensions to serve the south west, south or south east of the city region should sufficient demand arise."</p> <p>The Transport Strategy is "a consideration material to the proper planning and sustainable development of the area or areas in question." Development Plans are required to be consistent with the Transport Strategy. The Dublin City Development Plan 2022-2028 envisages this station at Charlemon in policy SMT22 "To support the expeditious delivery of key sustainable transport projects so as to provide an integrated public transport network with efficient interchange between transport modes, serving the existing and future needs of the city and region and to support the integration of existing public transport infrastructure with other transport modes. In particular the following projects subject to environmental requirements and appropriate planning consents being obtained: ... MetroLink from Charlemont to Swords".</p> <p>Accordingly, the location of the Charlemont station was a strategic decision made at the highest levels of transport and land use planning and such is fully consistent with the proper planning and sustainable development of the area.</p> <p>The current Transport Strategy considers a range of options for the onward extension of MetroLink to meet the demand for travel over the period of the strategy. This includes consideration of the need for the upgrade of the Luas Green Line to metro with a metro extension to Dublin south west, south or south east. Whilst the strategy envisages that further extensions will be delivered after 2042, MetroLink which terminates at Charlemont allows for the possible extension of the metro in all any of the above directions.</p> <p>The proximity of the metro to the Luas line at Charlemont provides for a positive customer experience for all users with short interchange distance and due to the proximity, clear wayfinding and high visibility of the interchange. The interchange arrangements at Charlemont provide for significantly better interchange arrangements compared to an interchange at St Stephen's Green Station.</p> <p>The detailed analysis done for the Railway Order application further confirms that the section of MetroLink route between St Stephen's Green and Charlemont Stations contributes significantly to the overall benefits of the scheme. It serves a significant area of the south city of Dublin and offers enhanced access from the local area to the city centre and a direct connection to Dublin Airport. It serves key trip attractors including residential areas and offices / workplace locations, with high passenger boarding and alighting figures in the peak hours. During the morning peak, at Charlemont station the flows include 1,800 passengers alighting, 2,300 boarding and 1,229 passengers alighting, 2,276 boarding during the evening peak. The passenger numbers contribute significantly to the overall benefits of the scheme and the effect of these benefits outweigh the additional costs that are associated with the delivery and operation of the section from St Stephen's Green to Charlemont station. Further information is available in Chapter 7: Consideration of the Alternatives, section 7.7.8 MetroLink Southern Terminus Location.</p> <p>The location of the interchange at Charlemont does not preclude onward extension south. An interchange at Charlemont is supported by policy including the Dublin City Development Plan 2022 - 2028 and the Transport Strategy for the Greater Dublin Area.</p> <p>By extending MetroLink to Charlemont it provides for future proofing of the Green Line, bypassing the capacity constrained Luas on-street running section, and ensures potential future connectivity options are enabled, either to the Green Line or for extensions of the metro.</p> <p>The Charlemont Station interchange provides for increased passenger utilisation of the MetroLink system, thereby increasing the benefits delivered by the Project, reflected by an improved Project Benefit Cost Ration (BCR).</p> |

| Submission No.                                                                                                   |              |          | 051                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| 3                                                                                                                | Point 1      | 1        | <p>Point 1 continued - St. Stephens Green is the most appropriate location as it provides for interchange with bus, Luas and future DART underground. The project incorrectly dismisses St. Stephens Green West as an appropriate terminal station. It only considers St. Stephens Green East and Charlemont. No Study has been completed by NTA/TII as part of the entire Metrolink project on the optimal location for a City centre terminus, which strikes us as an incomprehensible omission of an obviously relevant and necessary study. It is difficult to see why there should be a metro stop on St Stephen's Green East, far away from Grafton Street, and also contradictorily why the LUAS interconnection cannot take place there if its location on the east is not otherwise a difficulty.</p> | <p>TII do not agree that St Stephen's Green is the most appropriate interchange location for the reasons set out by response (2) above.</p> <p>It is not correct to say that the Project "only considers St. Stephens Green East and Charlemont." A number of route options were considered in the process of identifying the Emerging Preferred Route (EPR). These route options included potential station locations on St. Stephen's Green West, close to Grafton Street. St. Stephen's Green West was ruled out as the alignment between the proposed Tara Station and a station on St Stephen's Green West would result in an undesirable horizontal reverse curve and an alignment greater than a 1000m long that would necessitate an intermediate intervention shaft located somewhere between these stations to comply with the MetroLink Fire Strategy. Further, as a potential station location, St Stephen's Green West itself is a very constrained location due to the presence of buildings, Luas and St Stephen's Green Park. Maintaining the Luas operational during station construction would be complex and challenging with significant disruption expected, whilst the impacts on St Stephen's Green Park would be greater for a station in this location compared to the proposed location on St Stephen's Green East. This would be the result of; the likely need to place more of the station in the Park compared to the proposed station on St Stephen's Green East; it would impact an area of the Park that has greater amenity value than St Stephen's Green East due to the nearby Park entrance adjacent to the southern end of Grafton Street, and there would be a risk of impacting the existing Park lake. In summary, an alignment that links the proposed Tara, St Stephen's Green East and Charlemont stations is a more direct and economic alignment, does not require additional intervention infrastructure, avoids a complex engineering interface with the Luas Green Line, impacts the Park less and has less potential for disruption during the construction phase.</p> <p>As outlined by EIAR Chapter 3, Background to the MetroLink Project, one of the key objectives of the Project is the integration of it with the wider transport network that also includes for BusConnects and DART+ which are all included under Project Ireland 2040. Together, these projects will result in a reliable, sustainable, affordable, integrated public transport network that will support the economy, help Ireland meet its climate change targets in line with Climate Action Plan 2023 and make Dublin a more liveable and sustainable city.</p> <p>Arising from the decision to postpone the future upgrade of the Green Line to metro services, it is being argued that Charlemont station effectively becomes a terminus station in the short to medium term. In this regard, it is true to say that the Metrolink trains will terminate and turn back at Charlemont station, however the public transport service offering for passengers does not terminate, it transfers from Metrolink to LUAS as part of the integrated transport network.</p> <p>The terminus station for MetroLink is located at Estuary where all of the activities normally associated with a terminus (train sideways, car-parking etc) take place. At this location the high capacity public transport offering terminates and the public transport offering transfers to a completely different mode, i.e. Bus or car . The environmental effect of the Metrolink terminus are accordingly assessed in the EIAR. Charlemont Station does not have the associated infrastructure and services associated with a terminus location and in fact has more in common with a "system turn back location". Charlemont Station is located within an area of high public transport accessibility, linking with the Luas Green Line which offers reasonably similar levels of services and frequency for journeys to and from the south of Dublin. As such, public transport service offering is not considered to terminate, but transfers onto the similar service offered by the Luas Green Line, forming part of a transport corridor running from Cherrywood to Estuary. The associated environmental impacts for the turnback and station at Charlemont have been fully assessed in the EIAR.</p> <p>Charlemont station itself was chosen on the basis of its interchange potential with Luas, as well as local bus services, as outlined above. The section of the line between St Stephen's Green and Charlemont generates considerable benefits for the scheme in terms of increased patronage as detailed in response item (2) above. Operationally, the Station will see people moving quickly in and out of the area, noting that it will act as an interchange, and has been deliberately designed with minimum set down space or room for taxis so that it does not encourage the Station to be used as a terminus. All operational environmental impacts are mitigated so they are not significant, while the impact on amenity will be permanent and positive.</p> <p>The proposed route alignment from Estuary to Charlemont is consistent and compliant with the GDA Transport Strategy 2022-2042 (published in January 2023) in which states that the south city terminus at Charlemont offers the optimal location for interchange with the Green Line in response to growing demand in the longer term and is an appropriate location to facilitate any potential future metro extensions to serve the south west, south or south east of the city region should sufficient demand arise.</p> <p>Detail studies have been carried by NTA as part of the development strategy, including:</p> <ul style="list-style-type: none"><li>* DART Tunnel Route Options and Feasibility</li><li>* Luas Lucan Feasibility Study</li><li>* Metro to Knocklyon Feasibility Study</li><li>* Metro UCD to Sandyford Feasibility Report</li><li>* Navan Rail Line Assessment Report</li></ul> |

| Re: Railway (MetroLink - Estuary to Charlemont via Dublin Airport) Order 2022 Case Reference Number NA29N.314724 |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 4                                                                                                                | Point 2      | 1        | 2. Expensive Duplication of Rail infrastructure - The inclusion of an expensive and costly section between St. Stephens Green and Charlemont is strategically weak and duplicates the existing Luas Green Line services. NTA's cost estimate for this 1km section at €650M is an expensive unnecessary duplication and significant investment that deprives other parts of Dublin that are in immediate need of rail infrastructure to support housing and urban development. Bringing the terminus to Charlemont rules out the development of the metro to parts of the South city not covered by light rail. This is a very shortsighted development. Keeping the terminus at St. Stephens Green at least allows for the possibility of proper expansion. | <p>The Board is not responsible for any decisions in relation to the funding the Project. It is solely responsible for assessing whether the Project is consistent with proper planning and sustainable development and that its effects on the environment are acceptable.</p> <p>The responsibility for funding the Project lies with the NTA, the Government and ultimately the Oireachtas. It has received all necessary approvals, including under the Public Spending Code for the making of a Railway Order. It will undergo further scrutiny and approvals, including under the Public Spending Code, before it is funded. It is not appropriate for the Board to make findings in relation to value-for-money that are outside its statutory functions and would cut across those arrangements. Members of the public are entitled to make representations to their TDs in relation to the value-for-money of any element of the Project.</p> <p>In any event, TII do not agree with this statement for the reasons set out by response (2) above, noting that infrastructure is not being duplicated given the capacity of the Luas south from St. Stephen's Green is restricted due to on-street running.</p> <p>There is a limit to the potential of the Luas to provide additional capacity in the on-street non-segregated section of the Luas Green Line from Charlemont northwards through the city centre. The nature of this route and the fact that it currently crosses several road junctions (Adelaide Road, Harcourt Street / Hatch Street upper and Harcourt Street / St Stephen's Green south) limit the service to a maximum of 24 trams per hour per direction. The projected demand for this section would require a higher frequency of up to 30 trams per hour and this demand cannot be met with on-street systems (Luas / bus). The interchange between Luas and MetroLink proposed at Charlemont will provide the necessary capacity to address the demand on this corridor and reduce overall travel time for passengers</p> <p>There is also high passenger demand forecast for a Metrolink station at Charlemont, including from the Ranelagh area, which would be lost if St. Stephen's Green was the MetroLink southern interchange station. The additional fare revenues collected by the Charlemont Station interchange increase the benefits delivered by the Project, reflected by an improved Project Benefit Cost Ration (BCR).</p> <p>Further, to ensure that public investment delivers value for money, the Public Spending Code sets out requirements for the evaluation, planning and management of public investment. The preparation of a Business Case is a key element of meeting these requirements. The Public Spending Code requires that both the Preliminary Business Case and Final Business Case for public investment projects are published.</p> <p>In July 2022, the Government granted Approval in Principle to the NTA to enable the submission of a railway order application by TII to An Bord Pleanála in respect of the MetroLink project (Decision Gate 1). This approval was granted after the Preliminary Business Case (PBC) had undergone significant scrutiny and challenge by bodies that are independent of TII, including DoT and DPER review (including independent review by JASPERS and the Major Projects Advisory Group (MPAG)) of the PBC around timeline, costs and benefits that were updated to inform the Government decision.</p> <p>With regards the observation that "Charlemont rules out the development of the metro to parts of the South city not covered by light rail", TII do not agree and would further note that the proposed route alignment from Estuary to Charlemont is consistent and compliant with the GDA Transport Strategy 2022-2042 (published in January 2023) which states that the south city terminus at Charlemont offers the optimal location for interchange with the Green Line in response to growing demand in the longer term and is an appropriate location to facilitate any potential future metro extensions to serve the south west, south or south east of the city region should sufficient demand arise.</p> |
| 5                                                                                                                | Point 3      | 2        | 3. The station box at Charlemont, as constructed in 2021/22 by the Developer Hines, does not have the benefit of planning permission and has not been part of the EIA undertaken for this project. Processing the current Railway Order application, which is reliant on these preliminary and now constructed works, is legally unsafe and contravenes the provisions of the EIA Directive. A considered legal opinion has been prepared on this important issue and has been submitted to An Bord Pleanala as an Appendix in the community submission and the contents thereof are adopted by us.                                                                                                                                                         | The MetroLink enabling works constructed as part of the Hines development was included in the planning application for the Hines Development and has the benefit of planning permission which was granted in April 2019.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| Re: Railway (MetroLink - Estuary to Charlemont via Dublin Airport) Order 2022 Case Reference Number NA29N.314724 |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 6                                                                                                                | Point 4      | 2        | 4. The station box at Charlemont will result in only one possible future tie in with the Luas Green Line to the south, which would result in an option that was previously dismissed as part of the Tie-In study from March 2017. No alternatives to the station box at Charlemont were considered as it had been fixed through the design of the overhead Hines Grand Parade commercial development. The implications of this new alignment is very significant on our wider community as it will involve top down construction that will only be possible when many houses on Manders Terrace, Oakley Road and Charleston road are demolished. | <p>The station box at Charlemont allows for a future tie into the Luas Green Line should it be determined in the future that through running metro services to Sandyford is the required solution to address the public transport needs to the south of the city. It is incorrect to say that the current proposal is based on an option that was previously dismissed as part of the March 2017 Green Line tie in study. The station design is in affect a modification to the preferred Green Line Tie Option 4B which was modified as result of the postponement of the upgrade of the Green Line to metro standard.</p> <p>The station box location was not fixed by the Charlemont Development. The preferred route for MetroLink was published in March 2019 following a comprehensive route options study. The preferred route was based on the emerging preferred route for the scheme which included a station at Charlemont. The Charlemont Metro Enabling Works were constructed to enable the Charlemont Development to proceed whilst simultaneously ensuring there was an option available to construct a station at Charlemont that avoided unnecessary demolition, took advantage of an available site, provided infrastructure that is integrated with planned development rather than necessitating later changes and retrospective adjustments to a new development or even possible demolition of the new development, whilst providing protected provision for the future extension of the scheme south, if required.</p> <p>It is also important to recognise that the station location at Charlemont is influenced by available vacant land and thus avoids unnecessary demolition.</p> <p>The submission seeks to portray the construction of the Metro Enabling Works as prejudicial to future decisions on proper planning and sustainable development of the area. It implies that the counterfactual would have had no effect on such decisions. That is not the case. There was a planning conflict between the EPR and the Grand Parade Development at the time the latter development was proposed. There was no resolution to that conflict that was free of implications for future decisions on the proper planning and sustainable development of the area. The Board could have refused permission for the Grand Parade Development, inevitably creating a underutilised and potentially vacant and idle site in a commercial hub location. The Board could have granted permission with no provision to facilitate a station at this location, resulting in a requirement for the railway order to provide for the demolition of a new office building. The Board's actual decision was reasonable and lawful in seeking to minimise the prejudice to an important office development and a critical piece of national infrastructure. It was also not particularly restrictive of future decisions in relation to the proper planning and sustainable development of the area. Of the three options open at the date of the Grand Parade planning application, two remain open: the Board can still require changes to the station design that require the demolition of the commercial building and it can grant an order that avoids demolition by using the Metro Enabling Works.</p> <p>It is agreed that the short-term implications for local residents will be significant as the scheme progresses through the construction stage, however the EIAR assesses the environmental impacts of the construction phase and commits to the implementation of appropriate mitigation measures that reduce the environmental impacts to not significant. The same is true of the operations phase for the project. TII will work closely with local residents to ensure the required mitigation measures are put in place.</p> <p>If in the future, the metro was extended south, this does not mean that inevitably open cut construction will be required or demolition of property will be necessary. In designing an extension, the promoter will seek to reduce the requirement for demolition by looking for tunnel launch sites at the southern extent of the scheme and, if one can be identified, driving the Tunnel Boring Machine northwards ultimately connecting into the existing tunnel. In that case, even if the new alignment were under the properties identified in the submission, the tunnel underneath them would be constructed by the Tunnel Boring Machine without the need for above ground works.</p> |
| 7                                                                                                                | Point 5      | 2        | 5. The Environmental Impact Assessment Report is inadequate in relation the description of development, alternatives, transport assessment, noise and the cumulative effects of the development on the Charlemont-Dartmouth Community. For a project of this size, scale, investment to date, it is inadequate to propose a Railway Order with so many important studies and analysis missing.                                                                                                                                                                                                                                                   | <p>TII do not agree that the Environmental Impact Assessment is deficient, inadequate or missing information. The Railway Order application comprises a very detailed environmental impact assessment that has identified and assessed the potential environmental impacts of MetroLink and proposed mitigations for these impacts where necessary. TII would also draw attention to the detailed project description, construction phase description and operational phase description provided in EIAR Chapters 4 and 5 and 6, and EIAR Chapter 7 and associated appendices that present details of alternatives considered. EIAR Chapter 9 and appendices provides a detailed analysis of transport and traffic effects, and EIAR Chapters 13 Airborne Noise &amp; Vibration, and 14 Groundborne Noise &amp; Vibration provide a detailed assessment of potential noise and vibration effects, while Chapter 29 outlines the assessment of interactions between various environmental aspects, and Chapter 30 covers the cumulative impacts with other projects. This assessment is carried out for the full length of the alignment including relative to potential significant effects on the Charlemont-Dartmouth Community.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

| Submission No.                                                                                                   |              |          | 051                                                                                                                                                           | | Re: Railway (MetroLink - Estuary to Charlemont via Dublin Airport) Order 2022 Case Reference Number NA29N.314724 |              |          |                                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| 8                                                                                                                | Point 6      | 2        | 6. The development would result in noise and disturbance during the construction and operational phases and would result in a loss of amenities for the area. | <p>The EIAR presents a comprehensive and detailed assessment of both groundborne and airborne noise and vibration in Chapter 13 and 14 of the EIAR. The assessments include predictive modelling in order to identify the potential impacts on all sensitive receptors during both the construction phase and the operational phase.</p> <p><b>Noise and disturbance during construction:</b></p> <p>No profound impacts have been identified for residents and mitigation measures proposed will be effective at reducing the impacts on these properties and in general terms impacts will be associated with the construction phase only. Significant mitigation is proposed to include 4m high noise barriers and further proposed mitigation in line with the Airborne and Groundborne Noise Mitigation Policy. On the implementation of these measures the residual impacts of airborne noise are predicted to be moderate.</p> <p>Chapter 14 of the EIAR assesses groundborne noise and vibration, with EIAR Appendix A14.5 Groundborne Noise and Vibration and Blasting Modelling Results presenting predicted groundborne noise and vibration levels during below ground construction. During TBM passage the predicted level of groundborne noise will be above the 45 dB LASmax threshold for a number of receptors above the runnel alignment, resulting in a significant impact on the building occupants during the relatively short 2-week duration of the TBM passage at a given location. The predicted vibration levels for TBM passage are well below human response thresholds during both day and night-time periods.</p> <p>Unfortunately there are no effective methods are available to reduce groundborne noise from TBMs at source. The principal mitigation measures aimed at minimising impacts are to give advance notice to residents of the timing of the TBM passage. In addition TII will accept and consider applications for additional measures on a case-by case basis, in accordance with its Noise and Vibration Mitigation Policy (see Appendix A14.6).</p> <p><b>Noise and disturbance during operation:</b></p> <p>No residual noise impacts are identified at this location during operation. The calculated rail noise levels across the proposed Project are not significant in terms of any widespread community disturbance and results in a not significant impact when added to the prevailing noise environment.</p> <p><b>Loss of amenity during construction:</b></p> <p>EIAR Chapter 11, Population &amp; Land Use provides an assessment of effects on community amenity during construction and operation, which relates to the interaction of impacts on air quality; visual amenity; traffic and transport; and noise and vibration.</p> <p>At this location during construction as outlined in Section 11.5.2 of Chapter 11, no impacts are identified on the retail sector or community and social infrastructure (e.g. schools or hospitals). Any severance/disruption to transport will be limited by site mitigation measures such as alternative routes, reducing impacts to not significant.</p> <p><b>Loss of amenity during operation:</b></p> <p>No significant residual negative impacts are anticipated on the Population and Land Use from the operation of the proposed Project, following the incorporation of the mitigation measures into the design of the proposed Project and implementation on an ongoing basis throughout the lifecycle. The residual effects that will arise during operation will be permanent and positive as detailed in EIAR Chapter 11, section 11.1.1.</p> <p>The zoning under the Dublin City Development Plan 2022 - 2027 for the residential properties in question is "Z2 Residential Neighbourhoods (Conservation Areas)" with an objective to "protect them from unsuitable new developments or works that would have a negative impact on the amenity or architectural quality of the area (See Table 3.11 of the submitted Planning Report). As outlined in Section 4.5.18.6 of the Planning Report, the element of the Project within the Z2 zoning area will affect a below ground area only and as such will not compromise the land use objective for the lands overhead. The majority of the proposed Charlemont Station and all above ground elements are located within the lands zoned Z5 with the objective “To provide for the creation and protection of enterprise and facilitate opportunities for employment creation”. The Station has been designed so that it is integrated with the proposed redevelopment of this site by a third party development, and as such, demonstrates that the proposed Project is consistent with the zoning objective. The MetroLink station design does not result in any segregation of the area, with no surface barriers or walls proposed.</p> |

| Re: Railway (MetroLink - Estuary to Charlemont via Dublin Airport) Order 2022 Case Reference Number NA29N.314724 |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| 9                                                                                                                | Point 6      | 2        | <p>Point 6 continued - The Traffic Study for the local Charlemont area is wholly inadequate as it omitted the modelling of the impact of Airport users coming to the only Dublin South Metrolink station at Charlemont. The Traffic Study uses a strategic, generalised regional model that does not take local factors into account.</p> <p>Extract from observation 7) The EIA did not properly assess the impact of additional local traffic volumes, rather they used a generalised regional model that does not take local factors into account. A key local factor at a Terminus station in Charlemont that runs to the Airport is the huge volume of anticipated airport users from Dublin South and greater Dublin/Leinster that will come to Charlemont via car or taxi with baggage for onward destination to the airport. Grand Parade and the residential area around Charlemont-Dartmouth can not sustain the significant additional traffic volumes associated with this development.</p> | <p>The MetroLink forms part of an integrated public transport network. The system is designed in an integrated manner so that people travelling from the area south of Dublin to access locations north of Charlemont, such as Dublin Airport, Mater, Swords etc. will utilise public transport to interchange with the MetroLink, or will walk or cycle to access their local station. The system is not designed to encourage people to drive to stations within the City and TII actively discourage people from doing so other than the Park &amp; Ride station at Estuary. TII therefore do not agree with the observation that there will be a “huge volume of anticipated airport users from Dublin South and greater Dublin/Leinster that will come to Charlemont via car or taxi with luggage for onward destination to the airport” as this is not borne out by our transport analysis.</p> <p>The Transport Assessment for MetroLink includes for people travelling to/from Dublin Airport from all areas within the extents of the GDA area, therefore it is incorrect to say "The Traffic Study for the local Charlemont area is wholly inadequate as it omitted the modelling of the impact of Airport users coming to the only Dublin South Metrolink station at Charlemont”.</p> <p>The NTA's Eastern regional Model (ERM) incorporates a wide range of data sources, including demographic data, land use data, transportation network data, and travel survey data. The system is designed to model a variety of transportation modes, including private vehicles, public transit, walking, and cycling, and to simulate the interactions between these modes. The ERM model has been validated and calibrated using a range of localised data sources to ensure that the model can accurately represent the transport network, these include public transport and vehicle counts from the canal cordon counts. The outputs from the model have been combined with local survey data to undertake the more localised modelling, such as the pedestrian impact assessments, or the local traffic signals. This does not support the observations made “The Traffic Study uses a strategic, generalised regional model that does not take local factors into account.” or “The EIA did not properly assess the impact of additional local traffic volumes, rather they used a generalised regional model that does not take local factors into account.”</p> <p>Regards the observation there will be a "huge volume of anticipated airport users from Dublin South and greater Dublin/Leinster that will come to Charlemont via car or taxi with luggage for onward destination to the airport. Grand Parade and the residential area around Charlemont-Dartmouth cannot sustain the significant additional traffic volumes associated with this development", this is covered by response (10) below.</p> |

| 10                                                                                                               | Point 7      | 2        | 7. The development would have an adverse impact upon traffic during the construction and operational phase, and it has not been properly designed and there is poor integration with other modes of transport. Pedestrian movements in and around the station would be difficult. Grand parade is an already heavily congested orbital route. | <p>The MetroLink is designed to form part of an integrated public transport network with Charlemont selected as the preferred interchange location in order to maximise the potential interchange with the existing Luas Green Line. In overall terms, Charlemont Station will provide for improvements to the public transport network resulting in decreases in private car usage/trips, increases in public transport usages and will facilitate walking and cycling to the station, without significantly impacting on the operation of the road network in the area.</p> <p>Construction Phase:</p> <p>EIAR Appendix A9.5 Scheme Traffic Management Plan presents the analysis undertaken to assess the impact of the traffic management measures on the local road network surrounding the proposed Charlemont Station during the construction phase. At the local level the following parameters have been used to assess impacts on general traffic and on pedestrians:</p> <ul style="list-style-type: none"><li>• Increase in walking distance/quality of service for pedestrians (through removal of footpath, reduction of quality of service, removal of a pedestrian crossing or relocation of crossing by more than 100m);</li><li>• Increase in driver delays at junctions;</li><li>• Changes in traffic flows on surrounding streets; and,</li><li>• Additional distance travelled due to diversions.</li></ul> <p>The analysis undertaken at this location indicates that the increased volume of traffic on Grand Parade and Northbrook Road does not translate into any significant increase in driver delay. The largest increase in driver delay of 12 seconds is registered on the westbound approach on Grand Parade to the Ranelagh Road signalised junction.</p> <p>During the construction phase, pedestrians will experience a reduction in quality of pedestrian infrastructure and space. The construction site boundary will encroach upon footways in the local area, including the northern side of Dartmouth Road, and the southern side of Grand Parade. However, a temporary signalised crossing will be provided west of the Luas to maintain pedestrian access to and from the Stop. Whilst there are partial closures on Dartmouth Road and Grand Parade, pedestrian movements will be maintained on appropriately sized footways through the area.</p> <p>With particular regard to cycle safety, as part of the traffic assessment presented in EIAR Appendix A9.5 Scheme Traffic Management Plan, the impact on cycle safety has been considered. A two-stage screening assessment methodology has been adopted, ensuring that any reduction in quality of service for cyclists (by one level or more) has been captured, with remedial measures including the temporary installation of cycle ways where appropriate, to minimise the impact on cyclists. Where the existing level of service cannot be maintained in the vicinity of the construction sites, alternative routes will be designated to minimise the risk to vulnerable users. As such, the traffic management measures have been designed in line with the hierarchy of road users identified in the GDA Transport Strategy, giving highest preference to pedestrians and cyclists. Prior to implementation, all traffic management measures will be agreed with DCC, and where relevant, consultation with An Garda Síochána and other statutory stakeholders will be undertaken to ensure the safety of users.</p> |

|                                                                                                                  |              |          | (10) continued                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | <p>Operational Phase:</p> <p>A microsimulation VisWalk model has been developed for the immediate area surrounding Charlemont Station during the operational phase. The model covers the full extent of the publicly accessible station area, including the immediate vicinity of the station entrance at street level, the Luas stop and nearby junctions at Charlemont Bridge. In order to accommodate the forecast demand from the proposed Charlemont Station, a new staircase with 2.4m stair width is proposed at the south east corner of Charlemont Luas stop. An elevator will also be provided at this location. Both are sized for MetroLink to Luas, and Luas to MetroLink passenger numbers.</p> <p>In addition, it is proposed that the pedestrian crossing on R111 Grand Parade will be repositioned to the front of the building being developed by Hines. With this infrastructure in place, the model indicates that the R111 Grand Parade will have an acceptable level of service overall, with some reductions in service seen at the pedestrian crossing where pedestrians are required to wait for a green phase at the signals. Overall, it is considered that the model displays an acceptable level of network performance.</p> <p>The proposed pedestrian crossing on Grand Parade will have minimal impact on the traffic flow along Grand Parade and can be programmed to operate in sync with the existing signalised junction at Grand Parade /Charlemont Street to maintain the flow of traffic movements. When the Project is operational, car mode share will decrease, with a reduction of up to approximately 830 car tips to and from the zones surrounding Charlemont Station over the 12hr period in 2065. In overall terms, the Charlemont Station will provide for improvements to the public transport network resulting in decreases in private car usage/trips, increases in public transport usages and will facilitate walking and cycling to the station, without significantly impacting on the operation of the road network in the area.</p> <p>Furthermore, TII have deliberately designed the Station with minimum set down space (with the exception of a drop-off on Grand Parade for persons of restricted mobility only) or room for taxi ranks so that it does not encourage the Station to be used for a significant volume of car or taxi trips.</p> |
| 11                                                                                                               | Point 8      | 2        | 8. The development will have an obvious adverse impact upon our home and daily life and will also diminish property values as our house will be practically unsalable during the very disruptive construction at the Charlemont site phase estimated to last nearly a decade. As an adjacent house, there will be a long term and permanent adverse impact upon our home from the noise of the operating rail infrastructure, vents, PA systems, escalators and large traffic volumes- vehicular and pedestrian using the station 19 hours per day. The adverse impact also extends to the loss of amenity for the wider community changing our quiet residential neighbourhood into a noisy, busy, congested major transport hub. This residential neighbourhood is a very unsuitable location for a metro terminus and for one of the main construction sites to be used for the whole Metrolink project. | <p>Response (8) above outlines the predicted environmental impacts with regards to noise and vibration, and amenity, while responses (9) and (10) summarise the assessed traffic and pedestrian impacts, noting that there are no predicted significant impacts when the proposed mitigation measures are implemented. TII would note that as explained by response (10) above that in overall terms Charlemont Station will provide for improvements to the public transport network resulting in decreases in private car usage/trips.</p> <p>TII do not agree that the development will have a long term and permanent negative affect. In fact there is evidence to suggest that property values will in fact increase in close proximity to public transport infrastructure and that local residents will greatly benefit from having a world class metro system providing access to the city centre, airport and north city at their door step.</p> <p>TII would also like to confirm that the site for the construction of the proposed Charlemont Station will not be used for the whole MetroLink project, but confined to the construction of the proposed station and intervention / evacuation tunnel south of the Station.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

| Re: Railway (MetroLink - Estuary to Charlemont via Dublin Airport) Order 2022 Case Reference Number NA29N.314724 |              |          |                                                                                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| 12                                                                                                               | Point 9      | 3        | 9. In particular we are concerned about possible settlement and subsidence to our house caused during construction, a matter not properly addressed in the supporting documents. The large terminus construction site is directly beside our home as we have a real and legitimate concern about structural damage. | <p>The approach taken by TII for assessing the impact of construction generated ground movements reflects the industry standard three-phased ground movement impact assessment process that is undertaken on tunnelling and underground projects around the world, that includes Channel Tunnel Rail Link (CTRL), Dublin Port Tunnel, Crossrail and High Speed 2.</p> <p>EIAR Appendix A 5.17 Building Damage Report, covers the assessed impacts of construction generated ground movements and settlement and includes for the assessed impact on the houses on Dartmouth Square West. EIAR Appendix 5.17 refers. The settlement predicted for the houses along Dartmouth Square West vary up to a maximum of 25 to 30mm. The Phase 2 assessment of the damage for these buildings is "Slight" (an explanation for which can be found in Table 4-4), please refer to building B150 (15 Dartmouth Square West) in table 5-2 of the appendix.</p> <p>As your property is a designated Protected Structure, it has been designated as “special”, and hence a further Phase 3 refined assessment, despite the impact only being assessed as ‘slight’ will be undertaken that will take account of final design and construction methodology details most likely utilising advanced numerical modelling techniques and further surveys of the building. The results of this refined assessment typically show that earlier assessments are conservative and overestimate the likely impact of construction generated ground movements.</p> <p>Monitoring instrumentation will also be installed to monitor the performance of the works and potential environmental impacts, including those discussed above to ensure that acceptable limits are not breached. TII would also draw attention to The Property Owner Protection Scheme (POPS), as committed to by TII, which allows residential property owners to register with TII if their residential property is within thirty (30) metres of the edge of the MetroLink alignment or fifty (50) metres of station structures. The POPS comprises condition surveys of residential properties along the route of the proposed Project. The purpose of the condition surveys is to ascertain the condition of the properties before, during (if deemed necessary), and after the completion of the proposed Project to determine whether there has been any deterioration of any of the properties surveyed and whether same may be attributable to the proposed Project, and subsequently to recommend repairs as appropriate. Condition survey data gathered pre and post construction, and possibly during construction, will be used to assist the property owner and TII in swift and accurate verification of any property damage claims which may be received from property owners. The POPS is designed to cater for / address repair work which may be necessary for any damage (attributable to the proposed Project) to a qualifying residential property up to a threshold of €45,000. The POPS will be introduced by TII through public consultation and will be formally advised to eligible property owners by the Public Relations Department.</p> <p>Further information on POPS is available in Chapter 11 (Population &amp; Land Use). Useful information can also be found in the MetroLink Frequently Asked Questions document which can be found online at: <a href="https://www.metrolink.ie/en/your-property/property-owners-protection-scheme/">https://www.metrolink.ie/en/your-property/property-owners-protection-scheme/</a> , and this is where useful updates will be made available as the proposed Project progresses.</p> |

| Re: Railway (MetroLink - Estuary to Charlemont via Dublin Airport) Order 2022 Case Reference Number NA29N.314724 |                      |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 13                                                                                                               | Point 10             | 3        | 10. The substantial disruption that will be caused by noise and vibrations has not been properly or adequately assessed, and we refer in this regard to the Submission put in on behalf of us and our neighbours on Dartmouth Square West. The near decade long construction phase at the Charlemont site allows for significant works between 7 am - 7pm, with obvious significant disruption to our home life.                                                                                                                     | <p>As set out in response (8) above, potential airborne noise impacts identified due to airborne noise &amp; vibration are presented in Chapter 13.</p> <p>Proposed mitigation includes 4m high noise barriers, with 7m high barriers along the eastern boundary, and further proposed mitigation in line with the Airborne and Ground borne Noise Mitigation Policy at 10 &amp; 11 Dartmouth Square. On the implementation of these measures the residual impacts are predicted to be moderate.</p> <p>Potential groundborne noise and vibration impacts are presented in Chapter 14, with a significant adverse impact identified for residents during the relatively short duration of TBM passage, as explained by response (8) above.</p> <p>As outlined in Transport Infrastructure Ireland (TII) Airborne and Groundborne Noise Mitigation Policy (Appendix A14.6) there is a process proposed whereby further mitigation measures including temporary relocation can be implemented at individual properties should this be merited</p> <p>The proposed working hours for the construction phase of the proposed Project (as per Section 5.2.4 of Chapter 5 of the EIAR) will be for all above ground works to progress Monday to Friday 07:00 to 19:00 and Saturday 07:00 to 13:00. There will additionally be a period of 24/7 working below ground to enable the construction of the sprayed concrete lined tunnel, with the associated above ground support activities enclosed within a sound insulated acoustic enclosure as discussed in Section 13.6.1.2.4 of the EIAR.</p> <p>As discussed in the response to point 8 and outlined in Section 11.5.2 of Chapter 11, no residual impacts in terms of loss of amenity are identified on the community or retail sector and social infrastructure (e.g. schools or hospitals).</p> |
| 14                                                                                                               | Requested Amendments | 3        | <p>Requested amendment to An Bord Pleanala</p> <p>We request the following amendments:</p> <p>1. Omit from the Railway Order the section from Tara Street Station to Charlemont Station and associated onward tunnel extension and intervention tunnel</p> <p>2. Require the submission of a railway order for a section from Tara Street Station to St. Stephens Green which would effectively provide for a terminal hub station that can integrate with the Luas Green Line, multiple bus routes and future DART underground.</p> | <p>The above responses to the observations made explain why TII do not consider it is correct or appropriate that the MetroLink alignment south of the proposed Tara Station should be omitted, and also demonstrates why the proposed Charlemont Station has been selected by TII as the preferred interchange with the Luas Green Line</p> <p>A scheme which terminates at Tara Street would not be consistent with the Transport Strategy for Greater Dublin Area (2022-2042) and would be a material contravention of the Dublin City Development Plan 2022-2027. In addition any decision to terminate the scheme at Tara will significantly impact on the overall viability and benefits of scheme.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

Dublin |                                                                            |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| 1                                                                                                                                                        | Introduction                                                               | 1        | While land required for the purposes of transport services may be included in a Railway Order application, Section 130 of the Transport Act 1944 precludes the compulsory acquisition of such land without the previous consent of the Minister for Transport.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | TII is aware of the provisions of Section 130 of the Transport Act 1944 which precludes the compulsory acquisition of such land, under certain circumstances, without the previous consent of the Minister for Transport. As is normal practice Transport Infrastructure Ireland will enter into an agreement with CIE and its subsidiaries, Iarnród Éireann and Dublin Bus, at the appropriate time, that addresses and deals with any and all land consideration requirements and which allows for any such consents to be made available on receipt of an Enforceable Railway Order.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 2                                                                                                                                                        | Lands at Proposed Glasnevin Station, Dublin 9                              | 1        | <p>The TII proposals include permanent and temporary compulsory acquisitions of existing operational railway lines to enable inter alia construction of the Metrolink Glasnevin Station. CIÉ supports the submission made by Iarnród Éireann to An Bord Pleanála on the Metrolink application.</p> <p>CIÉ and Iarnród Éireann will continue to work with TII with a view to facilitating access to the required CIÉ lands whilst ensuring that the proposed impacts on Iarnród Éireann services are agreed in advance of any works commencing at this location.</p>                                                                                                                                                                                                                                                                                                                                                                                               | CIÉ support of the submission made by Iarnród Éireann to An Bord Pleanála with regard to the Metrolink Railway Order application is noted and understood. TII have responded to all the matters raised by Iarnród Éireann's submission and will continue to engage with the objective of reaching agreement on the proposed impacts to Iarnród Éireann in advance of any works commencing at the proposed MetroLink Glasnevin station location.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| 3                                                                                                                                                        | Dublin Bus HQ Building S9-60 O' Connell Street Upper/Henry Place, Dublin 1 | 1        | The proposed compulsory property acquisitions include permanent acquisitions of a significant portion of the Dublin Bus office headquarter facility. No. 60 O'Connell Street Upper is included on the Dublin City Council Record of Protected Structures (RPS Ref. No. 6028). CIÉ and Dublin Bus have had ongoing and extensive engagement with TII in relation to this matter and will continue to work with TII with a view to providing access to the required Dublin Bus occupied land and buildings.                                                                                                                                                                                                                                                                                                                                                                                                                                                         | TII confirms that extensive engagement is ongoing with CIE and Dublin Bus regarding the properties at No.'s 59 / 60 O'Connell Street Upper and the permanent land requirements necessary for the construction and operation of MetroLink in this location and is committed to reaching an appropriate agreement in advance of any works commencing.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| 4                                                                                                                                                        | Curzon House, 35 Lower Abbey Street, Dublin 1                              | 2        | The proposed compulsory acquisition relates to substratum beneath 35 Lower Abbey Street, which is a CIÉ owned three storey over basement building accommodating a Spar retail unit at ground floor and CIÉ Tours, CIÉ: Sustainability Department and CIÉ Group Property Management in the office accommodation overhead. No. 35 Abbey Street Lower is included on the Dublin City Council Record of Protected Structures (RPS Ref. No. 7). The building was built in c. 1825 and, with the exception of the front facade, was destroyed in 1916 and rebuilt in c. 1920. Given the significant age of the building and the functions carried out therein, CIÉ requires that the anticipated environmental impacts resulting from the Metrolink construction and operation including noise, vibration and ground movement will have the necessary mitigation measures applied to ensure that all such impacts are kept within the TII recommended threshold levels. | <p>TII confirms that the EIAR has assessed the anticipated environmental impacts from MetroLink construction and operation, including noise, vibration and ground movement. The results of this assessment are summarised below.</p> <p><u>Ground Movement</u></p> <p>The approach to ground movement and building damage assessment follows the industry standard three-phased ground movement impact assessment process that is undertaken on tunnelling and underground projects around the world, that includes Channel Tunnel Rail Link (CTRL), Dublin Port Tunnel, Crossrail and High Speed 2. The MetroLink tunnel has been assessed beneath this property at the depth and on the alignment proposed. TII are satisfied that the assessed movements will not lead to structural damage to this property.</p> <p>In EIAR Appendix A 5.17, Building Damage Report, the staged assessment process is detailed. Given this building has a basement and is a Protected Structure it is designated as a "Special" building. Therefore, this building will be further assessed (Phase 3) at the detailed design stage to verify the impacts. Currently, the building is assessed at Damage Category 2 or below (see section 4.3.2 of Appendix 5.17 for details).</p> <p>The Phase 3 assessment will take account of final design and construction methodology details. For the Phase 3 assessment, the building will be subject to detailed assessment on an individual basis. A detailed survey will be carried out as part of the Phase 3 assessment to provide the necessary additional information to inform this detailed analysis of how the individual elements of the building would be affected by the predicted ground movements. The method and extent of the detailed analysis will be determined and may include a more sophisticated semi-empirical or a detailed soil-structure interaction using finite element modelling methods. The results of this refined assessment typically show that earlier assessments are conservative and overestimate the likely impact of construction generated ground movements. Any monitoring and or mitigations would be detailed at this point, noting that additional mitigations are unlikely given the result of the current analysis undertaken.</p> |

Dublin |                                                                                      |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
|                                                                                                                                                          |                                                                                      |          | (4) continued                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | <p><u>Noise and Vibration (N&amp;V)</u><br/>EIAR Appendix 14.5, Groundborne Noise and Vibration Blasting Modelling Results, presents the predicted groundborne noise and vibration levels during the construction and operational phase of the Project for the building.</p> <p><u>N&amp;V Construction</u><br/>The predicted level of groundborne noise during TBM passage is 50 dB LASmax, which is above the 45 dB LASmax threshold, resulting in a significant impact on building occupants.</p> <p>The predicted level of groundborne vibration during TBM passage is 0.273 ms-1.75, which is lower than the VDV (Vibration Dose Value is a parameter that combines the magnitude of vibration and the time for which it occurs) Threshold Level of 1.0 ms-1.75, resulting in a not significant impact on the building.</p> <p>Unfortunately, there are no effective methods available to reduce groundborne noise from the TBM at source, but noting that the duration of this impact will be of the order of up to two-weeks as the TBM passes. TII will liaise with CIÉ to ensure the timing of these impacts are known and the building occupants are prepared for the passage of the TBM and resultant elevated noise levels.</p> <p><u>N&amp;V Operation</u><br/>The predicted level of groundborne noise during the railway operation is 35 dB LASmax, which is below the 40 dB LASmax threshold, resulting in a not significant impact on the occupants of the building.</p> <p>The predicted level of groundborne vibration during the railway operation is 0.009 ms-1.75, much lower than the VDV Threshold Level for these buildings of 0.8 ms-1.75, resulting in a not significant impact on the building.</p> <p><u>Monitoring</u><br/>Monitoring instrumentation will also be used throughout the works to monitor potential environmental impacts, including those discussed above to ensure that acceptable limits are not breached, noting that groundborne noise generated by the TBM will be of a temporary limited duration that will be managed through close liaison with CIÉ. TII also confirm they will continue to liaise with CIÉ to ensure disruption is kept to a minimum. Finally, in the event of any damage occurring that is attributable to MetroLink works, this will be repaired at no cost to the property owner.</p> |
| 5                                                                                                                                                        | Land at Tara 2-16 Tara Street/Poolbeg Street/ Luke Street, Dublin 2                  | 2        | <p>The proposed compulsory acquisitions include substratum land beneath a CIÉ owned site at 2-16 Tara Street which includes frontage onto Poolbeg Street. CIÉ has entered into an Agreement for Lease with Tanat Limited relative to planned commercial development on the site and Tanat Limited may make its own separate submission to An Bord Pleanála in this respect.</p> <p>The proposed acquisitions also include portions of Iarnród Éireann's track support structures including the Poolbeg Street/Luke Street bridge. CIÉ supports the submission made by Iarnród Éireann to An Bord Pleanála on the Metrolink application.</p> <p>CIÉ and Iarnród Éireann will continue to work with TII with a view to reaching agreement on the items raised in the Iarnród Éireann submission in order that access to the required CIÉ lands for MetroLink construction and operation can be facilitated.</p> | <p>TII is in discussions with CIE regarding the substratum lands, and any other lands CIE has a legal interest in at this location, and is cognisant of the provisions of Section 130 of the Transport Act 1944 which precludes the compulsory acquisition of such land, under certain circumstances, without the previous consent of the Minister for Transport. As is normal practice Transport Infrastructure Ireland will enter into an agreement with CIE and its subsidiaries, Iarnród Éireann and Dublin Bus, at the appropriate time, that addresses and deals with any and all land consideration requirements and which allows for any such consents to be made available on receipt of an Enforceable Railway Order.</p> <p>TII is available to discuss the proposed development by Tanat Limited and will work collaboratively to ensure that the proposed development can proceed without adversely impacting the delivery of the MetroLink Scheme.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

| RE: RAILWAY (METROLINK-ESTUARY TO CHARLEMONT VIA DUBLIN AIRPORT) ORDER 2022, PROPERTY: 15-18 EARLSFORT TERRACE, DUBLIN 2 |                                                       |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| 1                                                                                                                        | Submission 1                                          | 1 and 2  | <p>The subject properties (15-18 Earlsfort Terrace) comprise four mid-terraced four storey over basement period buildings. The architecture of the building's was influenced by Gothic Revival style and 17 and 18 Earlsfort Terrace are listed as Protected Structures (RPS No. 2420 &amp; 2421) in Dublin City Council's Record of Protected Structures.</p> <p>The route selection including horizontal alignment, vertical alignment and depth of MetroLink below ground in the area between Chainage 18+900 and Chainage 19+100 should be reviewed by NTA / TII to satisfy themselves and to ensure that:</p> <p>1. MetroLink does not cause structural damage to the foundations supporting our client's properties.</p> <p>2. MetroLink does not cause structural damage to our client's properties at the basement level.</p> <p>3. MetroLink does not cause damage to the historic brickwork, ornate detailing and fragile finishes of our client's properties and protected structures.</p> <p>4. MetroLink provides the necessary vertical and/or horizontal clearance between the existing basements and the tunnels.</p> | <p>On the MetroLink Project, the approach to ground movement and building damage assessment follows the industry standard three-phased ground movement impact assessment process that is undertaken on tunnelling and underground projects around the world, that includes Channel Tunnel Rail Link (CTRL), Dublin Port Tunnel, Crossrail and High Speed 2. The MetroLink tunnel has been assessed going under these properties at the depth and on the alignment proposed and TII are satisfied that the assessed movements will not lead to structural damage to these properties.</p> <p>EIAR Appendix A5.17, Building Damage Report, covers the assessed impacts of construction generated ground movements and settlement on property. Table 5-2 of this report shows that the buildings have been assessed as falling within the "Negligible damage" category (the lowest assessed impact), an explanation for which can be found in Table 4-4 of the aforementioned report. TII can also confirm that the assessment has taken into account the presence of the basements as noted.</p> <p>TII does recognise the importance of the buildings listed in your submission and hence they have been designated as “special”, and hence a further Stage 3 refined assessment, despite the impact only being assessed as 'Negligible', will be undertaken that will take account of final design and construction methodology details most likely utilising advanced numerical modelling techniques and further surveys of the building. This commitment is detailed in section 4.5. of Appendix A5.17 Building Damage Report. The results of this refined assessment typically show that earlier assessments are conservative and overestimate the likely impact of construction generated ground movements.</p> |
| 2                                                                                                                        | Submission 2 (also repeated in section 'Submission 3' | 2        | <p>We note that drawing ML1-JAI-EIAROUT- XX-DR-Y-13038 (a copy is attached to this submission) does not identify any potential receivers in the area of our client's properties, therefore essentially ignoring potential damage to our client's properties.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | <p>TII would like to assure you that the potential for your client's properties to be impacted by Metrolink works has not been overlooked as evidenced by response (1) above with regards to the assessed impact of construction generated ground movements.</p> <p>Drawing ML1-JAI-EIA-ROUT-XX-DR-Y-13038 presents the receptors considered in the assessment of airborne noise during construction works at the overground sites, where the closest receptors are modelled.</p> <p>As set out by EIAR Chapter 13 Airborne Noise &amp; Vibration, 13.2.3.1 Study Area Construction Phase, from an airborne noise and vibration aspect, the key study areas during the Construction Phase are the sensitive environments surrounding surface construction compounds. Depending on the sources in question and the local area under consideration, the study area extends out to between 50m and 300m from the proposed construction works. The buildings noted by this submission are located outside the 20 dBLamax contour line for the closest compound and therefore as a result no significant impact in terms of Airborne Noise and Vibration is predicted.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| 3                                                                                                                        | Submission 2                                          | 2        | <p>1. Metrolink has assessed the “Groundborne Noise from Tunnel Boring Machine” and presents its findings on drawing no. ML1-JAI-EIA-ROUT-XX-DR-Y-14009 (a copy is attached to this submission). This drawing indicates MetroLink will generate an additional 50db directly under the location of our client's properties which is unacceptable.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | <p>Appendix 14.5 Groundborne Noise and Vibration Blasting Modelling Results presents predicted groundborne noise and vibration levels during the construction and operation phase of the Project for all numbers 15-18 Earlsfort Terrace. Number 15 Earlsfort Terrace is closest to the tunnel alignment, and the prediction of groundborne noise during TBM passage for this building is 50 dB LASmax, which is above the 45 dB LASmax threshold, resulting a significant impact on the buildings operation for the limited duration of circa 2 weeks as the TBM passes. Unfortunately there are no effective methods available to reduce groundborne noise from TBMs at source and therefore the principal mitigation measure is advance consultation and engagement, to inform owners and tenants of the timing of the TBM passing to allow building occupants to prepare for the temporary elevated noise levels. As such, TII will consult with Core Capital in advance of the commencement of construction works.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| 4                                                                                                                        | Submission 2                                          | 2        | <p>2. Metrolink has assessed the predicted “Settlement” and presents its findings on drawing no. ML1-JAIEIA- ROUT-XX-DR-Y-21149 (a copy is attached to this submission). This drawing indicates MetroLink will be causing a 35mm settlement directly under the location of our client's properties which is unacceptable. Settlements of this magnitude cannot be accommodated by the building's structure and could cause damage to foundations; basement; superstructure; façade and internal finishes.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | <p>Please refer to response (1) above, noting that the settlement contours referred to by the observation were used to assess the potential impact of construction generated ground movements on the properties concerned. The assessment undertaken indicates that there will be a 'negligible' impact on settlement and ground movements at this property.</p> <p>TII do not intend to put in place a Property Owners Protection Scheme for Commercial Properties along the MetroLink route. To protect commercial properties, TII contractors appointed to carry out the works will, with the agreement of the owners of such properties, commission chartered building surveyors to carry out a precondition survey of commercial properties. In the event that it is determined that damage has occurred, TII's contractor will be required to commission a follow up survey to confirm the extent of the damage and confirm if the damage has been caused by MetroLink works. Where property damage is confirmed to have been caused by MetroLink works the property concerned will have recourse to MetroLink project insurances.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

| Submission No.                                                                                                           |              |          | 053                                                                                                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

| 5                                                                                                                        | Submission 3 | 2        | 1. Metrolink has assessed the "Groundborne Noise from Operation" and presented its findings on drawing no. ML1-JAI-EIA-ROUT-XX-DR-Y-14041 (a copy is attached to this submission). This drawing indicates MetroLink will be generating an additional 35db directly under the location of our client's properties which is unacceptable. | <p>Appendix 14.5 Groundborne Noise and Vibration Blasting Modelling Results presents predicted groundborne noise and vibration levels during the construction and operation phase of the project for all numbers 15-18 Earlsfort Terrace. Number 15 Earlsfort Terrace is closest to the tunnel alignment, and the predictions for this building during operation are as follows:</p> <ul style="list-style-type: none"><li>• The predicted level of groundborne noise during the railway operation for 15 Earlsfort Terrace is 36 dB LASmax, which is below the 40 dB LASmax threshold.</li><li>• The predicted level of groundborne vibration during the railway operation for 15 Earlsfort Terrace is 0.01 ms-1.75, much lower than the VDV (Vibration Dose Value is a parameter that combines the magnitude of vibration and the time for which it occurs) threshold of 0.8 ms-1.75.</li></ul> <p>As a result, no impact in excess of the relevant thresholds is predicted for these buildings as a result of MetroLink operation.</p> |
| 6                                                                                                                        | Summary      | 3        | In summary, our client requests that the route of the proposed MetroLink tunnels are diverted away from their current proposed location (under our client's properties) to either below the public carriageway or buildings that will not be damaged or compromised by the presence of the tunnels located under.                       | The alignment has been designed to connect the proposed St Stephen's Green Station to Charlemont Station. Based on the environmental impact assessment undertaken by TII there is not a need for the alignment to be adjusted, noting the predicted impact of construction generated ground movements is classed as "Negligible" (see response (1) above), and there is a only short period of temporary disturbance to building occupants in the region of 2 weeks as the TBM passes.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

| 1                                                                                                                                                    | Observations - Project Cost                       | 3 and 4  | <p>It is still unclear whether this will stay in full public ownership or if a PPP (public private partnership) contract may be signed with a private operator/s? as some of these PPP's have not worked out very well for the taxpayer, with shortfall in projected use and profit made, being subject of contract clauses. An Agreement governing traffic growth on the M3 and Limerick Tunnel, guaranteed the Government will pay if traffic growth doesn't reach it and that the taxpayer should pick up the bill for shortfalls. It would be my fear because Metrolink will be obsolete transport technology by the 2030's and unfavoured by the general public that its use may not hit expected or projected passenger numbers and any shortfall in expected profit or repayment of bonds and funding will be expected to be paid by the taxpayer.</p> <p>It would be my opinion that this €250 million on consultants should be written off as a bad learning experience and that future projects should not be conducted or financed in this manor, as the NTA/TII clearly lacks the experience to deliver such a project and should never have been financed by the taxpayer and instead expenses for plans or proposals should be paid for by competition by the expected contract deliverers.</p> | <p>The Procurement Strategy for MetroLink does not form part of this Railway Order Application.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| 2                                                                                                                                                    | Observations -Obsolete technology                 | 5        | <p>What this means is how people travel in the 2030's will be drastically different to today and the speed of adoption of these advancements in transport could be exponential. Instead of travelling to Dublin Airport by rail, you may be travelling by passenger drone, eVtol in the air or Autonomous RoboTaxi on the ground and these may be a more desirable form of travel than disjointed public transport and underground rail. This may cause adverse reactions on projected passenger numbers travelling on Metrolink making its commercial viability questionable with Dublin Airport being one of its major justifications for the project.</p> <p>In fact Dublin Airports own passenger numbers may decline significantly in the 2030's with the emergence of smaller electric aviation aircraft that can take off and land from anywhere in the country no longer needing passengers to travel to Dublin airport at all, for the majority of short haul travel and the IAA, EU and UNECE global regulators are currently making the rules for deployment of these technologies.</p>                                                                                                                                                                                                            | <p>The need for the Project is presented in detail in Chapter 3 (Background to the MetroLink Project). Chapter 7 (Consideration of Alternatives) also presents details on the consideration of alternative technologies for the Project. Passenger demand on MetroLink has been modelled for the years 2035 Opening Year, Opening Year + 15 Years, and Opening Year +30 Years to determine the long term viability. TII will continue to monitor emerging alternative technologies, and the potential impact these may have on passenger demand for MetroLink.</p> <p>As outlined in Appendix A9.4 Transport Modelling Report, in order to ensure that the Project can operate efficiently and deliver benefits into the future, forecasts have determined the likely future levels of demand on Dublin's transport system. The existing and committed public transport provisions do not serve the existing or future demand in the key nodes of Dublin Airport and Swords, with many public transport services operating at or over capacity by 2035. These forecasts have been based on planning datasheets from the NTA which forecast population, employment and education growth across the region. Whilst there is a degree of risk associated with making these predictions, they are projected in coordination with the Regional Assemblies and the Local Authorities to incorporate their housing and growth priorities. In addition, forecasts at Dublin Airport are based on the central growth forecast from the DTTAS report 'Review of Capacity Needs at Ireland's State Airports' and the Central Statistics Office (CSO) 2016-2019 Aviation Stats' TAM05, which outlines forecast passenger growth at Dublin Airport to 2050 for Low, Central and High growth scenarios.</p> |
| 3                                                                                                                                                    | Observations - Alternative technological proposal | 6 to 12  | <p>One of the alternative proposals by myself is to copy of what is currently under construction in Las Vegas by a company called The Boring Company using underground smaller affordable vehicle tunnels and Autonomous RoboTaxis.</p> <p>One of the disadvantages of a Metro is that they are notoriously expensive to build per km and require large station blocks, these are extremely disruptive, time consuming and labour intensive to construct and many in other cities have had unforeseen delays on completion dates. The Boring Company's solution avoids these pitfalls with smaller tunnels and smaller stations or no need for stations at all with entrances into the tunnel network from street level for direct door to door service.</p> <p>This solutions was brought to the attention of the National Transport Authority at a number of public consultations and meeting with public reps. Unfortunately I did seek an FOI to verify this and included it in submission but no records of questions asked at meetings were kept the by NTA.</p>                                                                                                                                                                                                                                        | <p>TII have no comment to make on discussions between the submitter and NTA, or any proposals made at those meetings.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

| 5                                                                                                                                                    | Observations - Construction consequences      | 13       | There will be a number of unpalatable consequences from the construction of this Metro proposal including a number homes need to be vacated and demolished, along with a community leisure centre and a historical landmark.                                                                                                                                                                                                                                                                    | <p>The EIAR has assessed the impacts of both the construction and operation of MetroLink. As detailed in Chapter 11 (Population and Land Use), the proposed Project will require the acquisition of numerous land and property interests in both public and private ownership including a range of residential and commercial properties that are occupied. A Land Acquisition Strategy (LAS) has been prepared by TII which sets out the arrangements proposed for the provision of information and assistance to the residential owners / occupiers of land and property subject to compulsory purchase for the delivery of MetroLink. The LAS establishes the arrangements in place for communication and engagement with all affected parties, the assistance and supports that will be available to residential and commercial property owners including on acquisition and relocation. Details regarding the Land Acquisition Strategy can be found in section 21.6.1.3 of Chapter 21 (Land Take), with the document publicly available at the following website: <a href="https://www.metrolink.ie/en/your-property/land-acquisition-strategy/">https://www.metrolink.ie/en/your-property/land-acquisition-strategy/</a></p> <p>TII will continue to work with DCC in relation to the development of an alternative sports and recreational facility to replace the Markiewicz leisure centre and intends to fund the alternative. However, TII does not have control over that development, which is part of DCC's function to provide public sport and recreational facilities in its function area. DCC may or may not be in a position to deliver it in parallel with the MetroLink project. Accordingly, the Board should assess the MetroLink project on the basis that the alternative may not be available. The impact would then be significant, but nonetheless one that would not outweigh the strategic scale long term benefits that MetroLink will deliver.</p> |
| 6                                                                                                                                                    | Observations - Health effects                 | 13       | One of the developing worries regards underground rail is the potential health effects of the air pollution on underground Metros. Heavy rail in general has some emerging health concerns that the Irish authorities are still only beginning to investigate and become aware of. With the most significant being noise pollution and its long term health effects, this project proposes to link up with other heavy rail as a core principle of its interconnectedness.                      | <p>Potential impacts to air quality as a result of the Project have been assessed and presented in Chapter 16 (Air Quality), with Chapter 10 (Human Health) detailing potential health impacts and benefits associated with the Project. Modal shift from road transport to MetroLink has the potential to reduce air pollution health risks in the city centre. Extensive assessments have been undertaken as part of the EIAR process to understand the potential impacts of air quality on the communities and mitigation measures have been developed to manage identified impacts. These measures will include the establishment of an air quality baseline, and implementation of measures in collaboration with other key stakeholders as required to ensure air quality and noise limits are adhered to.</p> <p>The MetroLink design will respect passenger comfort and will implement mitigation measures to mitigate potential noise and vibration impacts to ensure limits are adhered to during both the construction and operational phases.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 7                                                                                                                                                    | Observations - Unrealistic behavioural change | 14       | There seems to be an ideological lack of understanding of why a majority of the general public does not use or will not use public transport and the expectations that delivery of this project will encourage people out of private cars and on to it may be unrealistic and the behavioural change will not be realised to justify the proposal going ahead especially with the coming advancements in transport technology and alternative options such as on-demand door-to-door RoboTaxis. | <p>Please refer to response item 2. As detailed in Chapter 9 (Traffic and Transport), the baseline modal split for trips within the Greater Dublin Area (as informed by relevant planning documents) indicates that 66% of trips from Fingal/Dublin Fringe to the City Centre are made by public transport. Similarly, for trips within the Canal Cordon into Dublin City Centre, over 53% are made by public transport (bus, rail and Luas), demonstrating the current behaviours of the population within the Greater Dublin Area. Extensive transport modelling has been undertaken to determine passenger demand on the project. The model has indicated that there will be significant growth in public transport usage in trips to and from zones around the alignment, with a corresponding reduction in private car trips.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

| 1                                                                                                                                                             | Cover Letter | 1        | <p>For more than 20 years, the lack of adequate public transport infrastructure in Dublin has resulted in strong reliance in car-based commuting and hours of frustration for those with no other public transport option but infrequent buses trying to navigate inadequate bus lanes. The estimated 1.4m population by 2040 will dramatically further increase the need for transport to and through the city. Car-based commuting will continue to increase traffic congestion, noise emissions and air pollution and will make reaching our legal commitments of achieving net zero carbon emissions by 2050 within the tranport sector will be impossible.</p> <p>The introduction of the Luas has been transformative for those lucky enough to live close to it but its limited range means it is only the saviour of the few, and of very limited use to residents in the north of the city.</p> <p>It is unthinkable for a capital city as prosperous as Dublin not to have a rapid rail link between the airport and the city centre and the Metrolink proposal is a well thought through solution to this need. It also has the potential to transform transport into the city for north side residents served by the line. While the current plan does not yet guarantee a connection south from Charlemont to link with or replace the green Luas, we hope this bridge will be crossed successfully in the future.</p> | <p>TII wish to thank you for taking the time to make this submission. Your positive support is gratefully appreciated, and for the reasons you have set out, TII are committed to realising the MetroLink Project to address the challenges highlighted and to deliver the benefits that MetroLink will bring.</p> |

| Letter Re: Railway Order Application- Metro North: Estuary through Swords, Dublin Airport, Ballymun, Glasnevin and City Centre to Charlemont, Co. Dublin |                |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| 1                                                                                                                                                        | Introduction   | 3        | With reference to your email received on the 17 October 2022, concerning the Draft railway order for Metrolink project (Estuary to Charlemont via Dublin Airport), Geological Survey Ireland would encourage use of and reference to our datasets. Please find attached a list of our publicly available datasets that may be useful to the environmental assessment and planning process. We recommend that you review this list and refer to any datasets you consider relevant to your assessment. The remainder of this letter and following sections provide more detail on some of these datasets.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | TII thank GSI for the provision of links to datasets covering Geoheritage; Groundwater; Geological Mapping; Geotechnical Database Resources; Natural Resources (Minerals / Aggregates); Geochemistry of soils, surface waters and sediments; and, Geophysical data, together with associated guidelines.<br><br>TII confirm that relevant data has been used to inform the EIAR and is referenced including Chapter 18: Hydrology, Chapter 19: Hydrogeology and Chapter 20: Soils and Geology. TII will also use this data to inform the development of the design and delivery of MetroLink.                                                                                                                                                 |
| 2                                                                                                                                                        | Other Comments | 6        | Should development go ahead, all other factors considered, Geological Survey Ireland would much appreciate a copy of reports detailing any site investigations carried out. Should any significant bedrock cuttings be created, we would ask that they will be designed to remain visible as rock exposure rather than covered with soil and vegetated, in accordance with safety guidelines and engineering constraints. In areas where natural exposures are few, or deeply weathered, this measure would permit on-going improvement of geological knowledge of the subsurface and could be included as additional sites of the geoheritage dataset, if appropriate. Alternatively, we ask that a digital photographic record of significant new excavations could be provided. Potential visits from Geological Survey Ireland to personally document exposures could also be arranged.<br><br>The data would be added to Geological Survey Ireland's national database of site investigation boreholes, implemented to provide a better service to the civil engineering sector. Data can be sent to the Geological Mapping Unit, at mailto: GeologicalMappingInfo(g)gsi.ie, 01-678 2795. | TII confirm that all designs and construction will be undertaken in accordance with technical guidance and standards, and industry best practice.<br><br>TII concur that the MetroLink proposed scheme presents a huge opportunity to significantly increase the knowledge database with respect to geological / geotechnical records and commit to the provision of the ground investigation data collected on behalf of TII. Furthermore, TII would welcome GSI visits to the works once underway. TII will seek to schedule a coordination meeting in advance of the commencement of construction to further explore any synergies, including discussion around any particular aspects of record keeping that may be of assistance to GSI. |

| Submitted by Anthony Marston (MIPI, MRTPI), Marston Planning Consultancy, 23 Grange Park, Foxrock, Dublin 18, on behalf of Declan Ryan |                                                                           |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |  |
| 1                                                                                                                                      | Intro                                                                     | 1        | Our client owns and resides at no. 9 Harcourt Terrace which is a Protected Structure (RPS 3569, NIAH 5011 0470). Harcourt Terrace is the only formally composed Regency Terrace in the city. The ten houses on the western side of the terrace were laid out with single storey annexes separating the pairs of houses. No. 9 is located close to the end of the terrace near the Grand Canal, and includes a pedestrian link to its rear. The main basis of this submission is to ensure the Structural Integrity of our clients’ property is maintained both during the construction and the operation of the Proposed Development.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | TII acknowledge the architectural and historical significance of the property and recognise that the property is also designated as a protected structure. Hence the property has been included in the impact assessment and presented in the EIAR Chapter 26 (Architectural Heritage), Table 26.25: “BH-572 - 9 Harcourt Terrace - Three-storey, two-bay semi-detached house with rendered façade and with ionic pilasters at ground-floor level; single storey bay to side. - RPS 3569 DCC; NIAH 50110470”<br>According to the assessment there will be no direct or indirect impacts on architectural heritage during the Construction or Operational Phase of Metrolink.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |  |
| 2                                                                                                                                      | How will the Metro impact no. 9 Harcourt Terrace (a Protected Structure)? | 1        | <p>We note that the Metro tunnel alignment drawings (Drawing no. ML1-JAI-ARD-ROUT_XX-DR-Y-03095) (Plan Drawing no. ML-RO 306 E-O) indicate the extent of the Metro tunnel as passing under the front curtilage and entrance steps to our clients' property. Their property is located between the St. Stephens Green and Charlemont stations on the route. The cross-section AA on this same drawing, which is located at the footpath along the northern side of the Grand Canal, indicates the top of the Proposed Metro tunnel as being c. 18m below ground level. We note that the nearest cross section to this to the north, at Earlsfort Terrace, on Drawing no. ML1-JAI-ARD- ROUTXX-DR-Y-03094 (Plan Drawing no. ML-RO 306 D-E) also indicates the top of the Proposed Metro tunnel as being c. 18m below ground level. It is reasonable therefore to conclude that the top of the tunnel will pass c. 18m below the front of our clients' property.</p> <p>Their property is indicated as Property ML6E-U33 within the Property Detail mapping (Dublin City Council) on Drawing no. ML1-JAI-BOR-ROUT_XX-DR-Y-O1097 (Plan no. ML-P 306 E-O). The blue shading that indicates the extent of the proposed acquisition of substratum land indicates the majority of our clients' house as being within this area. Our client is significantly concerned about the legal implications of this matter, and on how this would impact upon the value of their property.</p> | <p>The substratum land take has been generated by creating a limit of deviation (LOD) ranging from 5 metres vertically upwards and 10 metres downwards to 15 metres laterally for the tunnel alignment. Substratum land take is shown on the Property Drawings submitted with the RO application and on Figure 21.1. of the EIAR Chapter 21 (Land Take). Rule 17 introduced by Section 48 of the Planning and Development (Strategic Infrastructure) Act 2006, states: ‘The value of any land lying 10 metres or more below the surface of that land shall be taken to be nil, unless it is shown to be of a greater value by the claimant’.</p> <p>For MetroLink project, the depth of tunnel will vary along the route but it is expected that the average depth will be approximately 24m from ground level to track level. In the vast majority of cases the subsoil can be acquired without affecting the above ground property. For 9 Harcourt Terrace property the following data are shown on the individualised property details plan (please refer to Plan drawing no. ML1-JAI-BOR-ROUT_XX-DR-Y-03779, ML6E-U33):</p> <ul style="list-style-type: none"><li>• Ground level to crown of tunnel (m) - 17.5;</li><li>• Ground level to track (m) – 24.2.</li></ul> <p>EIAR Chapter 21 (Land Take), Section 21.6.1.2, outlines the Compensation for Compulsory Purchase process. Under the Transport (Railway Infrastructure) Act 2001 (as amended) (the ‘Act’) upon commencement of the Railway Order (RO), TII will be authorised to acquire compulsorily any land or rights in, under or over land or any substratum of land specified in the RO, and, for that purpose, the RO shall have effect as if it were a compulsory purchase order (as referred to in Section 10(1) of the Local Government (No.2) Act 1960 (as inserted by Section 86 of the Housing Act, 1966) which has been duly made and confirmed) with modifications. Accordingly, TII is authorised to serve a notice to treat pursuant to the provisions of the Housing Act, 1966, including Section 79 thereof. TII also has the right to enter onto other lands for the purposes of carrying out the works permitted under the RO in certain circumstances. The acquisition of the various specified rights and interests in land and property, is necessary in order to ensure the delivery of the MetroLink project in its entirety. Further information can be obtained from the MetroLink Compulsory Purchase Order Guideline document (September 2022) which can be found on-line at: <a href="https://www.metrolink.ie/media/0jlpbyso/metrolink_cpoguideline_final_september-2022.pdf">https://www.metrolink.ie/media/0jlpbyso/metrolink_cpoguideline_final_september-2022.pdf</a></p> |  |
| 3                                                                                                                                      | How will the Metro impact no. 9 Harcourt Terrace (a Protected Structure)? | 2        | We note that the Environmental Impact Assessment Report (EIAR) (section 14.2.1.2) indicates that groundborne vibration from construction and operation of the proposed Project has the potential to have an adverse effect on nearby sensitive receptors, such as no. 9 Harcourt Terrace. We would consider that any residential property on the alignment, and where that property is a Protected Structure, should be considered as a highly sensitive receptor. We note with interest that Protected Structures are not identified or referenced within Chapter 14 given the potential for vibration to impact upon the structural integrity of such protected buildings of architectural importance.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | <p>The full noise and vibration levels experienced at the buildings potentially affected by the Metrolink construction and operation (including 9 Harcourt Terrace) are presented in Appendix 14.5 Groundborne Noise and Vibration Blasting Modelling Results.</p> <p>The assessment in Chapter 14 presents groundborne noise and vibration impacts on buildings and humans, with prediction results presented from a selection of representative receptors, during construction and operation.</p> <p>As stated in Chapter 14 tables 14.5 and 14.8 separate threshold levels were considered for Standard buildings vs Listed or potentially vulnerable buildings for blasting activities (Table 14.5) and for a range of buildings constructions, including protected and historic buildings, for construction vibration from sources other than blasting (Table 14.8).</p> <p>According to the assessment results presented in Appendix 14.5 for 9 Harcourt Terrace the calculated vibration levels are below the lowest threshold of 3mm/s for structural damage for any building type (Table 14.8) during TBM passage and also during operation of the Metrolink. The predicted level of vibration for blasting for 9 Harcourt Terrace is 0.9 mm/s, much lower than the 3mm/s threshold for vulnerable buildings, resulting in no impact on the building structure. Please see item 1, above with regard to the protected structure status and assessment.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |  |

| Submission No.                                                                                                                         |                                                                           |          | 057                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

| Submitted by Anthony Marston (MIPI, MRTPI), Marston Planning Consultancy, 23 Grange Park, Foxrock, Dublin 18, on behalf of Declan Ryan |                                                                           |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| 4                                                                                                                                      | How will the Metro impact no. 9 Harcourt Terrace (a Protected Structure)? | 2        | We would question the reasoning behind the EIAR stating that as the Tunnel Boring Machine (TBM) is moving through the lengthy construction process that its impacts are transitory, and should be considered with a lower threshold therefore. We note that the EIAR identifies the potential for the tunnel boring machine that will bore the tunnel under Harcourt Terrace has the potential to cause vibration and groundborne noise impacts within 100m of the under construction tunnel if not mitigated. The EIAR outlines that there is an inability to mitigate these noise and vibrations from the TBM at source.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | As stated in response (3) the vibration levels during TBM Passage will have no significant impact on 9 Harcourt Terrace building and will be for a very short duration.<br>Regarding groundborne noise impact during TBM Passage, as indicated in Appendix 14.5 the predicted level of groundborne noise during TBM Passage is 49dB, which is just above the Threshold Level of 45 dB presented in EIAR Chapter 14.2.1.1 Groundborne Noise - TBM advancement, resulting a significant impact on the buildings occupants for the limited duration (maximum 2 weeks) during TBM passage. Any potential impacts will be mitigated by way of clear communications with the property owner advising of the progression of the TBM for the short duration during which the occupants of the property could be effected.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| 5                                                                                                                                      | How will the Metro impact no. 9 Harcourt Terrace (a Protected Structure)? | 2        | <p>We note that Table 14.28 identifies that the predicted groundborne noise during the boring is predicted to have a noise impact of 49dB, which is above the indicated 45dB level that will have a High Adverse Magnitude of Significant Impact that according to the EIAR will be noticeable to all and disturbing over a number of days. The EIAR indicates that the groundborne vibration during the TBM passage is not considered to be significant. However, we note that this has not been considered having regard to the fact that our clients' property is a Protected Structure.</p> <p>We note that the extent and length of duration of the boring along the route within 100m of no. 9 Harcourt Terrace is unclear. The EIAR states only that it will occur for a very short period of days, and we would question this as a reliable basis for the assessment of the impact on our clients' property. The EIAR outlines that there are no effective methods to reduce groundborne noise or vibration at source. The only two mitigation measures appear to be solely based on temporary rehousing, or additional glazing, which would be inappropriate to be undertaken in relation to our client's Protected Structure.</p> | <p>Please refer to response (3) - the protected nature of your buildings is accounted for in the assessments.</p> <p>As noted in response item (4), the duration of the TBM passage will be for a number of days only, up to a maximum of two weeks.</p> <p>Unfortunately, there are no effective methods available to reduce groundborne noise or vibration from TBMs at source. The principal mitigation measures aimed at minimising impacts are as follows:</p> <ul style="list-style-type: none"><li>• Advance public consultation and stakeholder engagement can greatly reduce the significance of groundborne noise effects during construction, as building occupants would be prepared for the passage of the TBM and resultant elevated noise and vibration levels.</li><li>• TII will accept and consider applications for additional measures on a case-by case basis, in accordance with its Noise and Vibration Mitigation Policy (see Appendix A14.6).</li></ul> <p>Most building occupants will be able to tolerate the groundborne noise without issue, however it is recognised that some individuals may find its effect intolerable and will wish to vacate the property during the period of time it takes for the TBM to move away from their property. In these circumstances, mitigation may be required, on a case-by-case basis as set out in Appendix A14.6.</p> |
| 6                                                                                                                                      | How will the Metro impact no. 9 Harcourt Terrace (a Protected Structure)? | 3        | <p>Table 14.49 indicates the residual noise and vibration impact of the Proposed Development on no. 9 Harcourt Terrace. This is outlined as groundborne noise that will have a high adverse significant impact on the residential use of our clients' property for an undefined length of time. This from an EIAR perspective is defined as being a temporary impact, which is defined under the EPA guidelines as an effect that lasts for up to a year. Our client has profound concerns about the usability of their property during this length of construction period, and the impact of such a lengthy process on the structural stability and any potential damage of their property. The mitigation measures proposed fail to address these in any way.</p> <p>The predicted groundborne impacts during the operation of the Project are predicted to be not significant. However, due to the continual nature of the impact, and change to the environment in terms of vibrations and noise, must be considered as being negative in the context of no. 9 Harcourt Terrace.</p>                                                                                                                                                    | As stated above in response (4), the advancement of the TBM will affect the property for a very short duration up to a maximum of 2 weeks. During this period the TBM may be audible in the building, but the predicted noise levels are not sufficiently high to effect the usability of the building. As outlined in response (3) above, the level of vibration is low and will not affect the structural integrity of the building. As a result, no mitigation is required.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

| 7                                                                                                                                      | How will the Metro impact no. 9 Harcourt Terrace (a Protected Structure)? | 3        | <p>It is also notable that the airborne noise impacts will be occurring at the same time as the groundborne impacts and it is predicted that these will be moderate to significant during construction. The combination or cumulative impact of these issues, and other construction impacts, of adjacent works, will have a profound negative impact on the amenity and structural stability, and has the potential to cause damage to our clients' property.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | <p>The impact due to airborne noise presented in Chapter 13, Table 13.68 is the potential impact of construction works without any mitigation measures. Following this assessment, mitigation measures are proposed in line with the TII Airborne and Groundborne Noise Mitigation Policy including specific measure for the Charlemont Compound. These will include the use of 4m high construction site hoarding instead of standard 2.4 m high.</p> <p>Following these mitigation measures construction airborne noise levels at 9 Harcourt Terrace are expected to be below the threshold value of 65 dB (for more details please see Table 13.90 of the EIAR and Appendix 13.7 Construction Phase Modelling).</p> <p>With regard to structural integrity, EIAR Appendix A5.17, Building Damage Report, covers the assessed impacts of construction generated ground movements and settlement on property. The settlement contours calculated were used to undertake the buildings damage assessment. Please refer to building AB-40 in Table 5-4 of this appendix.</p> <p>Currently, the building is assessed at Damage category 1 - Very Slight. The damage categories are described in detail in section 4.3.2 of the EIAR Appendix A 5.17, Building Damage Report. All buildings will be subject to pre-construction surveys and post construction surveys and any building damage caused will be repaired by TII.</p> <p>It is also important to recognise that as your property is designated a 'special' building (designated protected structure) and hence will be further assessed (Phase 3) at the detailed design stage to verify the impacts. The Phase 3 assessment will take account of final design and construction methodology details. A detailed survey will be carried out as part of the Phase 3 assessment to provide the necessary additional information to inform this detailed analysis of how the individual elements of the building would be affected by the predicted ground movements. The method and extent of the detailed analysis will be determined on a case-by case basis and may include a more sophisticated semi-empirical or a detailed soil-structure interaction using finite element modelling methods. The results of this refined assessment typically show that earlier assessments are conservative and overestimate the likely impact of construction generated ground movements.</p> <p>Regarding architectural heritage please refer to response item (1) above.</p> |
| 8                                                                                                                                      | Conclusions                                                               | 3        | <p>We have set out under this submission our client's concerns relating to the impact on their property in terms of structural and other damage; and its structural integrity, and noise impacts that would negatively the amenity of the property during the construction and operation phase of the Proposed Development.</p> <p>We respectfully submit that the groundborne impacts, in combination with air borne impacts will be unacceptable during the construction process, and it is critical that appropriate mitigation is achieved that does not disenfranchise the enjoyment and structural integrity and setting of our clients' property, which is a Protected Structure. Our client is concerned that any significant construction activity, particularly where the alignment is immediately adjacent to, albeit under the Protected Structure, has the potential to cause long term irreversible and costly damage to the historic fabric and structural integrity of their property.</p> | <p>As stated above no significant impact is predicted on the building structural integrity.</p> <p>Furthermore, as 9 Harcourt Terrace building is a designated protected structure and, as referred to EIAR Chapter 26, where the built heritage structures are in the vicinity of the proposed tunnelling these buildings will be included in the Property Owner Protection Scheme (POPS), whereby they are to have condition surveys carried out prior to the commencement of tunnelling and again after completion. In those cases where the POPS survey identifies that damage has occurred as a result of the tunnelling works repairs are to be to be prepared in accordance with method statements prepared by the POPS Conservation Architects and approved where necessary by the MetroLink Project Conservation Architect (PCA). Further detail on the POPS process can be found in Chapter 26 (Architectural Heritage), Chapter 21 (Land Take) and Chapter 11 (Population &amp; Land Use) of the EIAR.</p> <p>The only identified noise impact on the building occupants is represented by the noise produced by the TBM Passage for a short duration of up to two weeks. It is important to note that this slight exceedance in noise levels will not affect the "usability" of the building. TII will liaise with the owner to ensure the timing of these impacts are known.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| 9                                                                                                                                      | Conclusions                                                               | 3        | <p>We submit that the proposed development has the potential to and noting from recent tree clearance activity within the site will have negative impacts on the Protected Structure which will be detrimental to the existing fabric thereof and is contrary to National conservation policy as well as the conservation policies of the Dublin City Development Plan relating to Protected Structures.</p> <p>It is critical that the Finalised Scheme will take into account the need to uphold residential amenity by way of noise and vibration impact, and seek to further mitigate the additional noise and vibration impacts and their potential impacts on our client's property in a manner that is appropriate for its status as a Protected Structure.</p>                                                                                                                                                                                                                                     | <p>Appropriate mitigations have been included in the EIAR to protect both the structural integrity and amenity of the property. Please refer to responses above.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |

| 1                                                                                 | Paragraph 1<br>Paragraph 2 | 1        | I wish to make an objection to the proposed Linear Park design for the Ashley Estate as part of the proposed R132 upgrade project included in the Metro North plans. My objections are based on overlooking, loss of privacy, loss of view, loss of security, road safety hazards, loitering and increased noise levels. | <p>Thank you for your submission and for sharing your concerns related to the MetroLink Project. We have reviewed the submission and provided responses below.</p> <p><b>Landscape Reinstatement</b><br/>The proposed horizontal route alignment along the eastern side of the R132 Swords Bypass would result in significantly reduced landscape and visual impacts when compared to the alternative elevated options. This proposal aligns with the Fingal County Council's R132 Connectivity plans (recently consented in 2022) under the Fingal Development Plan 2017 – 2023 (Draft Fingal Development Plan 2023-2029), recently consented in 2022.</p> <p>The aim of the proposed landscape design for access to Ashley Estate is to keep within the Local Landscape Character Area (LLCA), as per the above mentioned Development Plan.<br/>Further acknowledging your concerns, TII is committed to working with local resident's groups to address concerns that have been expressed in relation to the loss of green space and the impact on the current boundary wall and will continue engagement with these groups in advance of oral hearing.</p> <p><b>Traffic</b><br/>EIAR Chapter 03 (Background to the MetroLink Project) details the need for the Project, and illustrates the associated reduction in car trips when MetroLink is operational. Therefore, there will be reduced traffic volumes on the R132 as an attractive and efficient public transport option will be available.</p> <p><b>Antisocial Behaviour and Security:</b><br/>The planned outcome of the Metrolink architectural and urban realm design for this linear park is to discourage anti-social behaviour, through the attractive setting, use of public lighting, open sightlines, and avoidance of areas where individuals and groups of people can hide.</p> <p>Across the proposed MetroLink, Safety and Security is addressed by EIAR Chapter 6, MetroLink Operations and Maintenance. Section 6.6.5.8 specifically addresses managing the risk of "Vandalism or Anti-Social Behaviour on the Trains or within the Stations", and the wider chapter also addresses the broader design proposals for managing security challenges.</p> <p><b>Noise Levels</b><br/>TII understand the reasons for your concerns and would like to provide the assurance that the potential noise disturbance impact on your property as a result of the proximity of the proposed retained cut and cover section has been carefully assessed. This includes the impact of noise and vibrations from Construction activities and the operation of MetroLink both of which have been assessed and reported in the EIAR.</p> <p>In relation to airborne noise and vibration during construction phase, EIAR Chapter 13 Airborne Noise and Vibration, Table 13.39 summarises the predicted impact on 47 - 51 Ashley Avenue, without additional noise mitigation is Significant to Very Significant during some of the work phases. With the noise mitigations, detailed in section 13.6.1, the construction impacts are reduced to below significant.</p> <p>EIAR Chapter 14, Section 14.4.1.1 indicates that there are not predicted to be any significant Groundborne Noise and Vibration impacts for the Ashley Estate Buildings.</p> <p><b>Construction Phase Planning</b><br/>TII's appointed contractor will prepare a Construction Noise and Vibration Management Plan (CNVMP) for the proposed Project as referred to in EIAR Appendix A5.1, Outline Construction Environmental Management Plan (CEMP). The CNVMP will be a live document and will include a full monitoring and auditing programme which will be agreed with Fingal County Council prior to the commencement of the Construction Phase, including predetermined monitoring trigger levels to ensure noise and vibration limits are not breached. Table 6.2: Noise and Vibration Measures of the Outline CEMP outlines the monitoring programme requirements</p> |

| Submission No.                                                                    |              |          | 058                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

|                                                                                   |              |          | (1) continued                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | Operational Noise and Vibration<br>EIAR Chapters 13 and 14 present a comprehensive and detailed assessment of operational groundborne and airborne noise and vibration. No residual noise impacts are identified at this location during operation. The calculated rail noise levels across the proposed Project are not significant in terms of any widespread community disturbance and results in a not significant to slight impact when added to the prevailing noise environment. |
| 2                                                                                 | Paragraph 5  | 2        | Ashley is a mature, 40-year-old estate which is shielded from the R132 and we wish to remain so. Passive surveillance has never been a design consideration of the area of R132 in front of our homes or further north. Ashley already enjoys a very strong, tight-knit community atmosphere and does not experience anti-social behaviour.<br>Introducing a linear open park, with several openings to the R132 and low wall with railings would create the very problems we are trying to avoid and turn our private green area into a wide-open thoroughfare. | Please refer to Response (1) above in relation to Landscape Reinstatement.                                                                                                                                                                                                                                                                                                                                                                                                              |
| 3                                                                                 | Paragraph 6  | 3        | Ashley Ave residents will already be seriously impacted by construction of the Metro North which will pass under the Ashley green, less than 30M from our front doors, and to subject us to this linear park proposal which would see us lose our privacy, security and only usable green stretch of space, replaced instead with zig zag paths several openings directly on to a main road is extremely concerning.                                                                                                                                             | Please refer to Response (1) above in relation to operational traffic and security.<br>Please refer to Response (1) above in relation to Landscape Reinstatement.                                                                                                                                                                                                                                                                                                                       |
| 4                                                                                 | Paragraph 7  | 4        | ...we have stated from the beginning that we would like our green returned to its current state once tunnelling has been completed, with mature trees planted to provide privacy from passing traffic, double decker buses etc. Our support for the Metro North project will be withdrawn otherwise.                                                                                                                                                                                                                                                             | Please refer to response number (1) above on Landscape Reinstatement.                                                                                                                                                                                                                                                                                                                                                                                                                   |

Impact on 7 Fairfield Road, Glasnevin, Dublin 9. |              |          |                                                                                                                                                                                                                                                                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| 1                                                                                                        | Letter       | 1        | <p>I wish to object to the tunnel going underground under my property on the following grounds:</p> <ul style="list-style-type: none"><li>• Trespass into the subsoil under my property;</li><li>• Concern regarding the depth below ground level of the tunnel;</li></ul> | <p>Thank you for your submission and for sharing your observations with regards to the MetroLink project to which we have responded below. Substratum land take is shown on the Property Drawings submitted with the RO application and on Figure 21.1. Subject to a railway order being granted for the Scheme, TII will have the right to acquire the substratum land beneath this property for the purpose of constructing the Metrolink Scheme and as such can not be considered to be "trespassing" under the property concerned.</p> <p>TII acknowledge your concerns regarding the depth of the tunnel beneath your property. For the MetroLink project, the depth of tunnel will vary along the route but it is expected that the average depth will be approximately 24m from ground level to track level. In the vast majority of cases the subsoil can be acquired without affecting the above ground property. For 7 Fairfield Road the following data are shown on the individualised property details plan (please refer to Plan drawing no. ML1-JAI-BOR-ROUT_XX-DR-Y-03061, ML4L-U37):</p> <ul style="list-style-type: none"><li>•Ground level to crown of tunnel (m) - 11.8.</li><li>•Ground level to track (m) - 18.5.</li></ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| 2                                                                                                        | Letter       | 1        | <ul style="list-style-type: none"><li>• Significant and substantial vibration during construction;</li></ul>                                                                                                                                                               | <p>TII understand the reasons for your concerns and would like to provide the assurance that the potential disturbance impact on your property as a result of the proximity of the proposed tunnel and station has been carefully assessed. This includes the impact of noise and vibration from: the tunnel boring machine (TBM) and mechanical excavation; construction generated ground movements leading to settlement and possible building and property movement; and the operation of MetroLink. All of which have been assessed and reported in the EIAR and are summarised below.</p> <p>With exception of a temporary disturbance to occupants when the TBM passes your property, TII are predicting a 'not significant' impact to the building occupants and your building, or risk to the integrity of your house.</p> <p>Potential impacts associated with airborne noise and vibration during the construction phase of the proposed Project are addressed in Chapter 13 (Airborne Noise &amp; Vibration). As this location is in excess of approx. 400m from surface construction sites then no airborne noise or vibration impacts are expected.</p> <p>Chapter 14 considers Groundborne Noise and Vibration, the Appendix 14.5 Groundborne Noise and Vibration Blasting Modelling Results presents predicted groundborne noise and vibration levels during the construction and operation phase of the project for 7 Fairfield Road.</p> <p>* The predicted level of groundborne noise during TBM passage is 49 dB LASmax, which is above the 45 dB LASmax threshold, resulting in a significant impact on the building occupants.</p> <p>* The predicted level of groundborne vibration during TBM passage is 0.266 ms-1.75, which is lower than the VDV Threshold Level of 1.0 ms-1.75, resulting in a not significant impact on the building.</p> <p>Unfortunately, there are no effective methods are available to reduce groundborne noise from TBMs at source. The principal mitigation measures aimed at minimising impacts are as follows:</p> <ul style="list-style-type: none"><li>• Advance public consultation and stakeholder engagement can greatly reduce the significance of groundborne noise effects during construction, as building occupants would be prepared for the passage of the TBM and resultant elevated noise and vibration levels. See Appendix A5.1.</li><li>• TII will accept and consider applications for additional measures on a case-by case basis, in accordance with its Noise and Vibration Mitigation Policy (see Appendix A14.6).</li></ul> <p>The Transport Infrastructure Ireland (TII) Airborne Noise and Ground-borne Noise Mitigation Policy (Appendix A14.6 of Chapter 14) sets out the construction noise insulation and temporary rehousing measures to be implemented where required.</p> |

Impact on 7 Fairfield Road, Glasnevin, Dublin 9. |              |          |                                                                                                                                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| 3                                                                                                        | Letter       | 1        | <ul style="list-style-type: none"><li>• Danger of collapse as a result of excavation;</li></ul>                                                                      | <p>TII will undertake a comprehensive procurement programme to ensure that the design and build contractors are suitably competent, that tunnelling equipment is state of the art and that the assessment of the impacts of the tunnelling are robust. The works will be overseen by TII and independent professionals assuring the works are fit for purpose. Your property is not directly over the tunnel and hence the risk of collapse impacting you property is remote.</p> <p>A comprehensive Settlement Assessment has been undertaken to determine the potential impacts that construction of the proposed Project will have on sensitive receptors such as buildings and infrastructure from the advance of the TBM. The ground movement predictions and the building damage assessment methodology adopted for MetroLink is based on the approach adopted in most tunnel projects around the world, including London Crossrail and High Speed 2 in England. This is described in EIAR Section 5.4.11 (Ground Settlement Monitoring and Mitigation Works).</p> <p>The EIAR Appendix A 5.17 Building Damage Report, covers the assessed impacts of construction generated ground movements and settlement on property. Section 5.2 of this report sets out the rationale for the assessment of properties similar to yours. The results of the assessment provided in Table 5.2 shows that property Ref B - 158, as one of the representative properties on Fairfield Road selected similar to your property, has been assessed as falling within the '<i>Negligible</i>' category.</p>                                                                                                                                                                                                                                                                     |

| 6                                                                                                        | Letter       | 1        | <ul style="list-style-type: none"><li>• Impact on the environment and the heritage of my property which is over 100 years old; (7 Fairfield Rd, Glasnevin)</li></ul> | <p>The potential impacts associated with the construction phase activities of the proposed Project on the residences and businesses are addressed in Chapter 11 (Population &amp; Land Use) of the EIAR, with mitigation measures proposed where required. This includes potential noise and vibration impacts from construction activities as detailed in Chapter 13 (Airborne Noise &amp; Vibration) and Chapter 14 (Groundborne Noise &amp; Vibration), disturbances to the local road network as detailed in Chapter 9 (Traffic &amp; Transport), and dust risk as detailed in Chapter 16 (Air Quality).</p> <p>Please refer to response item (2) and (3) in relation to potential environmental impacts at your property.</p> <p>Please note that as there are no significant impacts predicted to the structure there is no heritage impact.</p> <p>A number of different forms of mitigation are specified, the most common of which, given the length of the tunnels to be bored, relates to the carrying out of condition surveys of buildings and other structures of architectural constraints in the proximity of the tunnel prior to and following the completion of the tunnels. This will be undertaken through the Property Owners Protection Scheme (POPS, refer to response item (10) below for more information) which will undertake condition surveys of private properties and other selected properties along the route of the proposed Project. The purpose of the condition surveys would be to ascertain the condition of the properties before, during (if deemed necessary), and after the completion of the proposed Project to determine whether there has been any deterioration of any of the properties surveyed and whether the same may be attributable to the proposed Project and it will recommend repairs as appropriate.</p> |

Impact on 7 Fairfield Road, Glasnevin, Dublin 9. |              |          |                                                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |
| 7                                                                                                        | Letter       | 1        | <ul style="list-style-type: none"><li>Area is quiet adequately serviced by public transport;</li></ul>                                                                                                                              | <p>The two stations nearest to your property are fundamental to improving transport links for Dublin and the local communities. Griffith Park Station will be accessed from the south off the existing access to Whitehall College of Further Education. The station will connect with bus routes on the R108 St Mobhi Road as well as walking and cycling routes. Glasnevin will be a major interchange station providing direct connections for passengers using MetroLink, the Western Commuter Line and the South-Western Commuter Line Iarnród Éireann services, local bus routes, walking and cycling.</p> <p>The EIAR Chapter 7 (Consideration of the Alternatives) describes the main alternatives considered at all stages of the MetroLink project development in order to clearly outline the decision-making process that has led to the proposed Project, including alternative route alignments and station location options.</p> <p>The need for the Project is clearly laid out in EIAR Chapter 3.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |  |

| 10                                                                                                       | Letter       | 1        | I reserve the right to submit further objections and I will be claiming substantial damages in respect of devaluations to my property. Please advise of the protection you have put in place to compensate and protect my position. | <p>Information regarding relocation and financial compensation related to the proposed Project is provided in Chapter 11 (Population &amp; Land Use) and Chapter 21 (Land Take) of the EIAR.</p> <p>The Property Owner Protection Scheme (POPS), committed to by TII, allows residential property owners to register with TII if their residential property is within thirty (30) metres of the edge of the MetroLink alignment or fifty (50) metres of station structures. The POPS comprises condition surveys of residential properties along the route of the proposed Project. The purpose of the condition surveys is to ascertain the condition of the properties before, during (if deemed necessary), and after the completion of the proposed Project to determine whether there has been any deterioration of any of the properties surveyed and whether same may be attributable to the proposed Project, and subsequently to recommend repairs as appropriate. Condition survey data gathered pre and post construction, and possibly during construction, will be used to assist the property owner and TII in swift and accurate verification of any property damage claims which may be received from property owners. The POPS is designed to cater for / address repair work which may be necessary for any damage (attributable to the proposed Project) to a qualifying residential property up to a threshold of €45,000. The POPS will be introduced by TII through public consultation and will be formally advised to eligible property owners by the Public Relations Department.</p> <p>Further information on POPS is available in Chapter 11 (Population &amp; Land Use). Useful information can also be found in the MetroLink Frequently Asked Questions document which can be found online at: <a href="https://www.metrolink.ie/en/your-property/property-owners-protection-scheme/">https://www.metrolink.ie/en/your-property/property-owners-protection-scheme/</a> , and this is where useful updates will be made available as the proposed Project progresses.</p> |  |
| 11                                                                                                       | Letter       | 1        | I wish to record there was no consultation with me regarding the rerouting of the Tunnel which shows lack of respect on your part.                                                                                                  | <p>Please be informed that TII have undertaken an extensive consultation across the route of MetroLink and has listened carefully to the concerns of stakeholders and the community, as documented by the EIAR Chapter 8, Consultation, as well as undertaking a detailed and an extensive Environmental Impact Assessment that identifies and addresses environmental concerns as evidenced by the submitted EIAR, including proposed mitigations to reduce potential environmental impacts, that accompanies the MetroLink RO application.</p> <p>As detailed in Chapter 21 (Land Take), following a review of the Emerging Preferred Route (EPR) and the issues raised during the EPR Consultation, the Preferred Route was determined. Consultation on the Preferred Route (and associated land take) took place over an eight-week period from 26 March 2019 to 21 May 2019. A total of 2,132 submissions were received by email, post and at consultation events. Further details on the consultation process can be found in Chapter 8 as above.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |  |
