| MetroLink Submission: On behalf of ACRA and Ballymun Road North Residents (Barry Conway ACRA Deputy Chair & Jim Deignan) |              |          |                                                                                                                                                                                                                                                                                                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| 1                                                                                                                        | Context      | 6        | While broadly supportive of the MetroLink Scheme, the respondent believes that the station is in the wrong location... because<br>This section of Ballymun Road is an already heavily utilized area and one of the busiest throughfares to and from Dublin City Centre. An alternative location was proposed in Albert College Park. | <p>TII appreciates the submission and the sharing of concerns/observations related to the Collins Avenue Station. We have reviewed the submission and provided response for the observations/concerns raised in detail below.</p> <p>As outlined in EIAR Chapter 7, Consideration of Alternative, section 7.7.10.7, the assessment undertaken for the Emerging Preferred Route (EPR) identified a preferred route option including the proposed station location in front of Our Lady of Victories (OLV) Church.</p> <p>This location for the station provides a number of advantages when compared to other location options, including Albert College Park: (1) It allows the Project to achieve a core project objective of providing public transport that is integrated in the existing and future proposed transport network, providing for interchange between bus routes both on Collins Avenue and on Glasnevin Road. A station location further south at the northern section of Albert College Park would not provide a good level of interchange as there would be over 500m separating potential bus stop locations on Collins Avenue and the MetroLink station. (2) The proposed Collins Avenue Station will have a significant catchment area, noting the analysis undertaken at the Emerging Preferred Route (EPR) stage identified this route option had the highest potential passenger numbers when compared with other route options. (3) During the construction phase, the location of a station within the frontage to Our Lady of Victories means that traffic disruption to Dublin would be reduced when compared to the location of a station within the road corridor (partially or fully).</p> <p>Further transport assessment during preliminary design development indicated that DCU remains a large contributor to the station usage with the station location as proposed by the church.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| 2                                                                                                                        | Context      | 7        | Positioning of the Collins Avenue Station: the proposed selected area for the station is more complex, more disruptive, more expensive, more dangerous than the original Metro North station. Furthermore, the latter would be better placed to service DCU.                                                                         | Please refer to response (1) above.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| 3                                                                                                                        | Context      | 7        | Highly Sensitive Receptors: High Proportion of elderly and special needs residents as well as primary school children will be unfairly impacted by placing the station at the proposed location for a period of 10 to 12 years.                                                                                                      | <p>It is acknowledged that in the absence of effective mitigation measures, there is potential for impacts on sensitive receptors at this location. As outlined in Table 11.60 of EIAR Chapter 11, Population &amp; Land Use sensitive locations here includes facilities which are delivering education, health, religious, community and medical services to the local communities in Ballymun, Santry and North Glasnevin. However, measures to mitigate and monitor impacts as a result of construction activity are detailed in relevant EIAR technical chapters, in the Construction Environmental Management Plan (CEMP) and summarised in Chapter 31. Mitigation measures and commitments of relevance to the local population here will be used to ensure that any impacts here are not significant. These measures include the following:</p> <p>Full implementation of the range of dust minimisation measures detailed in the mitigation section of Chapter 16 (Air Quality);</p> <p>Full implementation of the range of noise minimisation measures detailed in mitigation section of Chapter 13 (Airborne Noise &amp; Vibration) and Chapter 14 (Ground borne Noise &amp; Vibration);</p> <p>Ensure all construction activities are appropriately located so as to limit impacts and reduce the footprint of construction activities where possible to avoid and/or minimise impacts;</p> <p>All construction areas will be suitably fenced, screened and monitored so that access to the sites will be limited to authorised personnel in the interest of public health and safety;</p> <p>Full implementation of the range of mobility and traffic management measures including Scheme Traffic Management Plan as detailed in mitigation section of Chapter 9 (Traffic &amp; Transport);</p> <p>Alternative access arrangements (or diversions) will be put in place at the relevant locations and appropriate temporary signage will be put in place on roads, footpaths or cycleways that will be temporarily affected by the construction works. This signage will be monitored to ensure that it guides local residents, commercial activities and visitors to the temporary access arrangements in place that facilitate access to homes and businesses;</p> <p>Provide for safe pedestrian and cyclist access, egress and movement at points of entry and exit of construction vehicles at all sites. Tactile and audible signals for those with visual impairments should be integrated to ensure equitable access for all users;</p> |

| MetroLink Submission: On behalf of ACRA and Ballymun Road North Residents (Barry Conway ACRA Deputy Chair & Jim Deignan) |              |          |                                                                                                                                                                                                                                                                                                                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
|                                                                                                                          |              |          |                                                                                                                                                                                                                                                                                                                         | <p>Implement and monitor safe working practices, in accordance with the relevant legislation during construction to protect the workers and visitors to the construction sites;</p> <p>The contractor(s) will inform stakeholders of the general construction process/phasing in line with the TII Community Engagement Strategy to ensure local residents and businesses are fully informed on the nature and duration of construction works taking place in the vicinity. Where possible crime prevention through environmental design principles (e.g., adequate lighting in all areas, active and passive surveillance) should be incorporated given the duration of the Construction Phase;</p> <p>Advance notice will be given to the owners of all residential, commercial and community properties (including social infrastructure) before construction starts and in advance of any major planned disruptions of services or localised traffic management measures noting in particular residents and businesses affected by temporary construction works crossing roads and those located within 250m of the construction works;</p> <p>Community Relations Officers (CRO's) will be employed during the construction of the proposed Project and contact details will be provided on the proposed Project website so that stakeholders and communities can make contact as required. The CRO's will be responsible for maintaining open, transparent and positive relationship with members of the public, local businesses, groups and organisations affected by the works. Specifically, the CRO's will work closely with Transport Infrastructure Ireland and the appointed contractors to ensure that all effort to address public concerns are made, and to ensure that information on the nature and duration of all works is provided; and</p> <p>Reinstatement of all land as quickly as possible following construction so as to expedite any local disruption and return to existing surface land uses that can be used by the surrounding residents, businesses and communities.</p> <p>See EIAR Chapter 11, Population and Land Use, section 11.6.1.2 detailing construction activity mitigations for the population in general.</p> |
| 4                                                                                                                        | Context      | 7        | <p>Unconvinced by the need for such a large station with associated architecture:<br/>Preference is for a more low-key station similar to most cities like London, Paris, New York rather than a large brightly lit footprint attracting unwelcome attention and undesirable characters and anti-social behaviours.</p> | <p>Common architectural design principles have been developed for the proposed project across all locations in order to provide a robust and authentic design with a strong metropolitan identity, unique and sympathetic to Dublin. As outlined in EIAR Chapter 4, Description of the MetroLink Project, Section 4.17.4.2, the specific urban design principles for Collins Avenue Station are to:<br/>Integrate grilles and hatches required for the station with the planting proposals;<br/>Consider the relationship between the station and the entrance to Our Lady of Victories Infants School;<br/>Provide raised table junction and shared space, and<br/>Preserve the main axis of Our Lady of Victories Church.</p> <p>The landscape design will have future planting and swales to manage surface water sustainably, verge planting to direct pedestrians and cyclists, and a new plaza to integrate the street with the proposed Project and its architectural features as well as linking the church with the adjacent new transport infrastructure. The existing baseline, potential impacts on landscape quality and views, and mitigation proposals are described in Chapter 27 (Landscape &amp; Visual).</p> <p>The design ensures the church will remain visible and identifiable from the road so that it can retain its local landmark tatus. Whilst the proposed built elements of the station will be evident, clear views to the church from the road and the residential properties beyond are maintained but softened by the proposed intervening planting. Views from the front of the church confirm the retention of the existing formality but within a more decorative contemporary garden. The improved quality of paving materials being employed accentuates that formal axis to the front of the church.</p> <p>Overall, the potential effects on the visual environment and on visual amenity during the Operational Phase will be moderate and positive.</p>                                                                                                                                                                                                                                                           |

| MetroLink Submission: On behalf of ACRA and Ballymun Road North Residents (Barry Conway ACRA Deputy Chair & Jim Deignan) |              |          |                                                                                                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |  |
| 5                                                                                                                        | Context      | 7        | Albert College Residents will have no or restricted access to Ballymun Road.                                                                                                                                                                                                                                                     | <p>As noted in Chapter 09 (Traffic and Transport) and Appendix A9.5 Scheme Traffic Management Plan, during all phases of the Enabling Works, the existing right turn from Ballymun Road to Albert College Court will be banned. This will require the vehicles accessing this area to route via Collins Avenue and Albert College Park. While the exact diversion routing will vary depending on the vehicle origin/destination, the most direct version is approximately 750m and as a worst-case scenario (during the PM peak period) will result in a journey time increase of 5 minutes. The diversion is illustrated in Appendix A9.5 of the EIAR.</p> <p>During both Phase 1 and Phase 2 of the Main Works, the closure of the Ballymun Road and Albert College Court junction is necessary due to the construction of the site footprint. Alternative access for residents in Albert College Grove/Court/Avenue/Court and Lawn, will be provided from the existing Collins Avenue Extension to the north of the site. The diversion is illustrated in Appendix A9.5 of the EIAR.</p> <p>Prior to implementation, all traffic management measures will be agreed with Dublin City Council (DCC) and where relevant, consultation with An Garda Síochána and other statutory stakeholders will be undertaken. Where detour routes are required, these will be kept as short as possible and detour signage will be clear and easy to understand. (See EIAR Appendix A5.1. Outline CEMP section 1.3)</p> <p>A summary of Mitigation Measures for the Construction Phase are presented in Table 9.147 of the EIAR Chapter 9 (Traffic &amp; Transport). The mitigation measure for Ballymun Road for traffic is to monitor if closure is required at all points, or if it can be reinstated temporarily throughout the works; and to coordinate spoil removal to minimize cumulative impact of HGV routing, Construction vehicles will be controlled in terms of the hours for operation (i.e. construction traffic may be prohibited during periods of very heavy traffic) to minimise disruption.</p> |  |
| 6                                                                                                                        | Context      | 8        | Proposed use of the OLV church grounds as a car park for school drops and the impact it will have on Albert College residents.                                                                                                                                                                                                   | MetroLink has no specific proposals to provide school drop off parking at Our Lady of Victories church during either the construction or operational phase.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |  |
| 7                                                                                                                        | Context      | 8        | Traffic Management: Grave Concerns about the access on a temporary and permanent basis to the immediate area.                                                                                                                                                                                                                    | <p>Please refer to response (5) above having regard to the construction phase. Chapter 9 Traffic and Transport and the associated appendices presents a comprehensive overview of the potential effects of the proposed project during the construction and operational phase. Table 9.141 of the EIAR identifies that based on traffic modelling undertaken there will not be long term significant impact on the road network at this location up to 2065. In the worst case scenario, there is predicted to be a small increase in traffic up to 2065 (maximum of 500 AADT).</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |  |
| 8                                                                                                                        | Context      | 8        | Scepticism about the bus interchange being relevant: one of the reasons given for the choice of this location is its relevance with the bus interchange. In our view there is no material difference between modes of transport based on station location. TII have provided no evidence at all of this being a material factor. | <p>As outlined in EIAR Chapter 7, Consideration of Alternative, section 7.7.10.7, the assessment undertaken for the Emerging Preferred Route (EPR) identified a preferred route option including the proposed station location in front of Our Lady of Victories (OLV) Church. This location for the station provides a number of advantages when compared to other location options, including Albert College Park as outlined EIAR Chapter 7, Consideration of Alternative, section 7.7.10.7. It allows the Project to achieve a core project objective of providing public transport that is integrated in the existing and future proposed transport network, providing for interchange between bus routes both on Collins Avenue and on Glasnevin Road. Such bus routes include the N4 (Point Village to Blanchardstown Shopping Centre) bus route, the 104 (Clontarf to DCU) and 220 (Lady's Well Road to DCU) bus routes. A station location further south at the northern section of Albert College Park would not provide a good level of interchange as there would be over 500m separating potential bus stop locations on Collins Avenue and the MetroLink station which would reduce the number of passengers willing to interchange with bus routes. Appendix A9.2-C Collins Avenue station outlines the predicted number of passengers for this station including details of the estimated number of public transport Interchange The proposed Collins Avenue Station will have a significant catchment area, noting the analysis undertaken at the Emerging Preferred Route (EPR) stage identified this route option had the highest potential passenger numbers when compared with other route options.</p>                                                                                                                                                                                                                                                                                                                                                                              |  |

|                                                                                                                          |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| 9                                                                                                                        | Context      | 8        | Bus Connects Project propose reducing existing north bound three lanes of traffic to two lanes, one of which will be a bus lane thereby putting further pressure under existing road network. There appears to be no joined up thinking between TII and the NTA regarding Metrolink and Bus Connects.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | As outlined above in response to Item 7, there is not predicted to be significant impacts on traffic at this location in any of the scenarios assessed up to 2065. The future street level layout at Collins Avenue includes a realignment of the current road layout with a reduction from two lanes to one northbound lane for vehicular traffic on the R108 Ballymun Road to the immediate west of the station. Southbound, the existing road layout of two vehicular traffic lanes, will be maintained. It is critical to understand that the scenarios assessed in Chapter 9 Traffic and Transport of the EIAR include for alterations to the road network to accommodate Bus Connects. The key driver behind both of these projects is to offer commuters and others high quality alternatives to the use of cars, thereby reducing the level of traffic congestion overall.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| 10                                                                                                                       | Context      | 8        | <p>A very wide cohort of the local and wider community will be negatively impacted by the construction of proposed station location including:</p> <ul style="list-style-type: none"><li>•Our Lady of Victories Boy and Girls primary Schools</li><li>•Senior Citizens living in Albert College Court</li><li>•Our Lady of Victories Church</li><li>•Residents in the immediate vicinity of the station location</li><li>•Thousands of daily Motorists and Commuters to and from Dublin City</li></ul> <p>Some of the fundamental issues resulting from these concerns include:</p> <ul style="list-style-type: none"><li>•Safety of access to and from the schools</li><li>•Potential Permanent eviction of elderly residents living in Albert College Court</li><li>•Albert College Estate access or Cui De Sac creation</li><li>•Diversion of Utilities adding at least 2 additional years to the build</li><li>•Traffic Chaos making accessibility to the immediate community impossible</li><li>•Station Excavation and Construction creating an unliveable environment for all in the immediate vicinity of the proposed station</li><li>•Air Quality will be significantly impacted during construction</li><li>•Construction Dust, Noise, Vibration</li><li>•Operational Noise, Security, Vibration</li><li>•Flooding Water Table exposures</li></ul> | <p>Safety of Access</p> <p>EIAR Appendix A9.5 Scheme Traffic Management Plan outlines an assessment of potential impacts on traffic, pedestrian movements, cycle networks and public transport. Section 7.4 of the STMP deal directly with Collins Avenue Station with Tables 7.35 and 7.41 outlining the potential impacts on vulnerable road users including pedestrians and cyclists with no significant impacts predicted for any stage of the works. This is because foot path and cycleway routes will be maintained with a signal controlled junction to allow safe access across the roadway at this location. Prior to the implementation of traffic management measures, these will be agreed with DCC, and where relevant, consultation with An Garda Síochána and other statutory stakeholders will be undertaken to ensure the safety of users. All proposed traffic management plans will be finalised by the appointed contractor, and an updated Scheme Traffic Management Plan will be prepared. (See EIAR Appendix A5.1. Outline CEMP section 1.3)</p> <p>Potential Permanent eviction of elderly residents living in Albert College Court</p> <p>Information regarding relocation and financial compensation related to the proposed Project is provided in Chapter 11 (Population &amp; Land Use) and Chapter 21 (Land Take) of the EIAR. TII do not foresee any requirement to "evict" elderly residents in the Albert College Court complex for the following reasons: (1) Vehicular and pedestrian access to these properties will be retained at all times during the construction phase with diversions in place (Refer to Table 9.90 and Table 9.91 of Chapter 9 of the EIAR). (2) As outlined in Section 10.5.1.2 of Chapter 10 of the EIAR, airborne noise levels at Albert College Court will be below significance criteria once noise barriers are put in place. (3) As outlined in Table 10.14 of Chapter 10, there will be moderate to significant impacts during the progression of the TBM resulting from ground borne noise and vibration. However this impact will be for such a short duration that it will not require residents to move out permanently (eviction). No other ground borne noise and vibration impacts are predicted during the construction phase. From an air quality perspective as outlined in Table 16.46 there is no potential for significant health impacts arising from dust emissions during the construction phase.</p> <p>Albert College Estate access or Cul De Sac creation and Traffic Chaos making accessibility to the immediate community impossible. Please refer to response (5) above which responds to access arrangements to Albert College Estate during the construction phase. Chapter 11 of the EIAR</p> <p>Diversion of Utilities adding at least 2 additional years to the build</p> <p>Chapter 22 of the EIAR assesses the impact of the proposed Project on Infrastructure and Utilities during the construction phase, with mitigation measures proposed where required. Construction works required to divert utilities have been detailed in Chapter 5 (MetroLink Construction Phase) and Appendix A5.2 Construction Programme including Tunnel Elements. Where there is interaction between the proposed Project and existing infrastructure, the locations of the interactions have been identified and planned for, and therefore the potential for service disruption is limited.</p> <p>Utility diversions and any required strengthening works will most likely be undertaken as part of the Enabling Works, prior to commencement of the Main Civil Works and are included in the construction programme (Refer to Section 5.2.2 of Chapter 5). In some cases, planned service disruptions will be required to facilitate the connection of existing services to the newly diverted services. In such cases, consultation with and cognisance of the requirements of those premises served by the utility will be taken in determining the type, duration and phasing of the planned disruption. The duration of service interruption will be agreed with the relevant utility provider, in accordance with their service level/business requirements, however in most cases the duration of disruption should be no more than a number of hours.</p> <p>A typical construction methodology for the diversion of utilities is provided in Section 5.4.10 of EIAR Chapter 5, MetroLink Construction Phase.</p> |

| MetroLink Submission: On behalf of ACRA and Ballymun Road North Residents (Barry Conway ACRA Deputy Chair & Jim Deignan) |              |                |                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
|                                                                                                                          |              | (10) continued |                                                                               | <p>Station Excavation and Construction</p> <p>As detailed in EIAR Chapter 5, MetroLink Construction Phase, the programme for the construction of the proposed Project has been optimised to minimise the duration of the Construction Phase in order to lessen the duration of potential environment impacts, while ensuring that the areas surrounding the work sites remain operational and functional. Work will run concurrently at all MetroLink site locations to ensure the Project is delivered in an effective and timely manner.</p> <p>Potential impacts associated with the construction phase activities of the proposed Project on the residences and businesses are addressed in Chapter 11 (Population &amp; Land Use) of the EIAR, with mitigation measures proposed where required. The main Collins Avenue Station construction site will be on the east side of R108 Ballymun Road. This will give rise to inconveniences and disturbances affecting activities and services at a localised level and Ballymun Road in particular. This includes potential noise and vibration impacts from construction activities as detailed in Chapter 13 (Airborne Noise &amp; Vibration) and Chapter 14 (Ground borne Noise &amp; Vibration), disturbances to the local road network as detailed in Chapter 9 (Traffic &amp; Transport), and dust risk as detailed in Chapter 16 (Air Quality).</p> <p>Measures to mitigate and monitor these impacts as a result of construction activity across the proposed Project are detailed in the relevant EIAR chapters and summarised in Chapter 31 (Summaries of the Route Wide Mitigation &amp; Monitoring Proposed).</p> <p>Additionally, the appointed contractor will prepare detailed design and construction methodologies in the form of a detailed Construction Environmental Management Plan (CEMP) to ensure all environmental impacts are managed and mitigated. A draft CEMP is included in Appendix A5.1 of the EIAR that will be developed further by the appointed contractors and updated to reflect the conditions of the Railway Order, where an Enforceable Railway Order is granted. This detailed CEMP will be provided to DCC for consultation and approval in advance of any construction works on site. Monitoring instrumentation will also be used throughout the works to monitor potential environmental impacts, including those discussed above to ensure that acceptable limits are not breached.</p> <p>Air Quality</p> <p>EIAR Chapter 16, Air Quality, assesses the likely effects of the Project on Air Quality during the construction phase with mitigation measures proposed where required. Air Quality during the construction phase will be impacted by traffic and dust emissions resulting from construction activities at the Collins Avenue Station site from Earthworks, Construction and Trackout (Maximum Daily HGV Movements).</p> <p>Once mitigation measures are implemented as outlined in Chapter 16 Air Quality, Section 16.6.1 Construction Phase fugitive emissions of dust are not predicted to be significant and pose no nuisance, human health. The air dispersion modelling assessment for the Construction Phase identifies a generally negligible or beneficial effect on air quality in the vicinity of the proposed Project. Therefore, overall, it is considered that the residual effects are Neutral, Not Significant and Medium-Term.</p> <p>Before commencing relevant works, an Air Quality Management Plan will be prepared and submitted for approval to the relevant local authority, in this case DCC. The plan will include all appropriate dust and emissions mitigation measures applicable to the circumstances of the relevant site as outlined in the Appendix 16.4 Dust Management Plan. A specific plan will be developed by the contractor for each worksite, including Collins Avenue Station.</p> |

| Submission No.                                                                                                           |                       |          | 001                                                                                                                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| MetroLink Submission: On behalf of ACRA and Ballymun Road North Residents (Barry Conway ACRA Deputy Chair & Jim Deignan) |                       |          |                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
|                                                                                                                          |                       |          | (10) continued                                                                                                                                | <p>Construction Noise and Vibration</p> <p>Potential impacts associated with airborne noise and vibration during the construction and operational phase of MetroLink are addressed in EIAR Chapter 13, Airborne Noise &amp; Vibration, with mitigation measures proposed where required. EIAR Chapter 14, Ground-borne Noise and Vibration includes the specific control measures proposed across the Project to control vibration sources with the potential to result in disturbance to building occupants or building damage.</p> <p>The assessment of airborne noise and vibration during the construction of Collins Avenue Station includes the consideration of a number of receptors on Ballymun Road including Our Lady of Victories Church, schools and residential properties. Section 13.7.1.1.4 outlines the residual impacts once mitigation measures outlined in 13.6.1 of the chapter are implemented. This section outlines that impacts at all stages of the works except piling works will not be significant (following mitigation). Moderate to significant impacts are predicted at the adjacent church during piling works. This would impact the church only if occupied. The standard working daytime hours are planned for this compound with no evening or Sunday construction activities during which the majority of mass services would be held. Furthermore, TII will work with the church in order to ensure that any planned church activities are not disturbed by excessive noise during this period. Further details of management measures to control airborne noise, are set out in the Construction Environmental Management Plan (CEMP), a draft of which is included in EIAR Appendix A5.1. Should an Enforceable Railway Order be granted, prior to the commencement of any construction works, the CEMP will be updated to include conditions arising from a granted railway order. There is no published statutory Irish guidance relating to the maximum permissible noise level that may be generated during the Construction Phase of a project, however the works will be required to take specific noise abatement measures to the extent required and comply with the recommendations of BS 5228-1 (BSI 2014a). The specific noise mitigation measures (as outlined in Section 13.6.1 of the EIAR) will include the selection of quiet plant, the use of noise control measures at source, restriction of working hours and the use of a 4m high noise screening barrier on the North, East and southern boundaries of the works site.</p> <p>Furthermore, the Transport Infrastructure Ireland (TII) Airborne Noise and Ground-borne Noise Mitigation Policy (Appendix A14.6 of EIAR Chapter 14) sets out a procedure for identifying construction noise insulation and temporary rehousing measures to be implemented, if required.</p> <p>Ground borne Noise and Vibration</p> <p>During TBM passage at Collins Avenue Station, there is a predicted noise value of LASmax slightly below 50dB. Receptors within 65m of the tunnel centreline will experience significant ground borne noise for a period of up to two weeks as the TBM passes. A summary of the residual impacts from tunnel boring is presented in table 14.49 (EIAR chapter 14), which predicts significant temporary residual impacts for noise and vibration at Scoil and tSeachtar, Our Lady of Victories and Albert College Court during tunnel boring. Unfortunately, there are no effective methods available to reduce ground borne noise or vibration from the TBM at source, but noting that the duration of this impact will be temporary and of the order of up to two-weeks as the TBM passes. TII will undertake advanced consultation and stakeholder engagement to prepare people for the passing of the TBM.</p> <p>Flooding</p> <p>The main construction site at Collins Avenue Station is located 1,700m from the Tolka River. Table 18.16 of EIAR Chapter 18, Hydrology, presents the construction and contractor compound sites and bulk fuel storage with subsoil storage involved in the proposed Project. Furthermore, the table provides a summary of the construction and compound sites along the full route together with the planned discharge point (surface water/storm sewer) and the estimated daily rate of discharge to that receiving feature. None of the planned construction or compound sites are located immediately within areas which have potential for fluvial or coastal flooding. Although there is a risk of pluvial flooding all along the proposed route due to insufficient capacity in the existing surface water network. However, it should be noted that the proposed MetroLink station has been designed to incorporate SuDS in the design which means that there will be no increase in runoff due to the proposed project. (Refer to Appendix A18.5 Flood Risk Assessment).</p> |
| 11                                                                                                                       | Albert College Estate | 9        | Approximately 90% of residents voted for a station location in Albert College Park, with the remainder in favour of a location at the Church. | Please refer to response 1 above.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

| MetroLink Submission: On behalf of ACRA and Ballymun Road North Residents (Barry Conway ACRA Deputy Chair & Jim Deignan) |                                                                       |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| 12                                                                                                                       | Albert College Estate                                                 | 9        | Exiting the estate is extremely difficult in the mornings with very high levels of traffic on both Collins Avenue and Ballymun Road. It has become worse recently with the changes at Griffith Avenue, traffic can be at a standstill at numerous random times during the day and every day of the week. Further lane reduction will have an extremely negative effect on the ability of residents to access their property. Therefore, should the station location not be moved, we would insist that TII examine alternative options along with the residents of the Albert College Estate for a temporary ‘resident-only’ exit of the estate onto the Ballymun Road and ask that the Inspector includes this as a Condition of the Railway Order.                                                               | Please see response to Item 9 above with regard to predicted long term impacts on local traffic during the operational phase. The outputs of the traffic modelling undertaken to inform the EIAR does not support the assertion that further lane reductions will have an extremely negative effect on traffic. (See EIAR Appendix A9.2 Overall Traffic and Transport Assessment). It is important to note that the implementation of both MetroLink and Bus Connects will provide an alternative to the use of cars and therefore result in a reduction in car usage along the alignment. Nonetheless, TII are keen to explore with residents all opportunities to mitigate potential impacts on Albert College Estate (in dialogue with DCC).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| 13                                                                                                                       | Our Lady of Victories School                                          | 10       | Alternative car park proposal: If this church location is to go ahead, the only practical alternative parking space available in the area for school drop off would be on the land beside Ballymun Library. This would leave the parents and kids within a 5-minute walk to the schools, and they would only have to cross one major junction, similar to the proposal of TII.                                                                                                                                                                                                                                                                                                                                                                                                                                     | It is acknowledged that parking for school drop offs will be more restricted in the immediate vicinity of the schools during the construction phase. However it is important to state that although parents and students may need to walk a little further, there will be no additional safety risk in place and all road crossings will be fully signalised as currently is the case.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| 14                                                                                                                       | Our Lady of Victories School                                          | 12       | We believe that TII did not sufficiently contemplate the impact (Air Quality, Dust, Noise & Vibration, Traffic etc) on the schools as part of the review process and it is clear that their proposed location for the station will create very devastating and serious quality of life issues for the school going population.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | Please refer to responses 3,5, 7 and 10 above.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| 15                                                                                                                       | Senior Citizens in Albert College Court Assisted Living Accommodation | 13       | The main concerns are threefold:<br><br>1. The major scale and the resultant noise and vibration caused by the excavation equipment that will be deployed to insert the station diaphragm walls which are in very close proximity to these houses.<br><br>2. The extreme proximity of the periphery of the construction site compound located at the main entrance of Albert Court on the church side of the complex. The current compliment of allocated street parking spaces for these residents will be subsumed into the construction site further increasing access issues for these residents.<br><br>3. The very close location of the site exit point where trucks carrying removed spoil from the excavation will leave (up to 20 per day) the site is again uncomfortably close to these housing units. | Please refer to responses 3, 5, 7 and 10 above.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| 16                                                                                                                       | Our Lady of Victories Church                                          | 15       | Potential for structural damage to church.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | Buildings and Infrastructure - A comprehensive Settlement Assessment has been undertaken to determine the potential impacts that construction of the proposed Project will have on sensitive receptors such as buildings and infrastructure from the advance of the TBM. The ground movement predictions and the building damage assessment methodology adopted for MetroLink is based on the approach adopted in most tunnel projects around the world, including London Crossrail and High Speed 2 in England. This is described in EIAR Section 5.4.11 (Ground Settlement Monitoring and Mitigation Works).<br><br>EIAR Appendix A 5.17 Building Damage Report, covers the assessed impacts of construction generated ground movements and settlement on property. Table 5.2 of this report shows that Our Lady of Victories Church has been assessed as falling within the 'Slight' category. The building risk categories shown in Table 4.3 of the aforementioned report and the "slight damage" category is described as "Cracks easily filled. Redecorating probably required".<br><br>EIAR Chapter 14, Ground borne Noise and Vibration, presents predicted vibration levels arising from mechanical excavation and blasting. In all cases vibration levels will be maintained within limits that do not cause damage to property. |

Concern raised that this might lead to a permanent church closure.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | Please refer to responses (5, 6) above.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| 18                                                                                                                       | Residents on Upper Ballymun Road | 16        | Given the location of the construction site in such proximity to many properties, it will be necessary that TII must develop a Property Protection Scheme which would involve detailed condition surveys off all properties within a predefined zone and those owners would get a pre-agreed guarantee of protection from any damage.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | <p>The Property Owner Protection Scheme (POPS), committed to by TII, allows residential property owners to register with TII if their residential property is within thirty (30) metres of the edge of the MetroLink alignment or fifty (50) metres of station structures. The POPS comprises condition surveys of residential properties along the route of the proposed Project. The purpose of the condition surveys is to ascertain the condition of the properties before, during (if deemed necessary), and after the completion of the proposed Project to determine whether there has been any deterioration of any of the properties surveyed and whether same may be attributable to the proposed Project, and subsequently to recommend repairs as appropriate. Condition survey data gathered pre and post construction, and possibly during construction, will be used to assist the property owner and TII in swift and accurate verification of any property damage claims which may be received from property owners. The POPS is designed to cater for / address repair work which may be necessary for any damage (attributable to the proposed Project) to a qualifying residential property up to a threshold of €45,000. The POPS will be introduced by TII through public consultation and will be formally advised to eligible property owners by the Public Relations Department.</p> <p>Further information on POPS is available in Chapter 11 (Population &amp; Land Use). Useful information can also be found in the MetroLink Frequently Asked Questions document which can be found online at: <a href="https://www.metrolink.ie/en/your-property/property-owners-protection-scheme/">https://www.metrolink.ie/en/your-property/property-owners-protection-scheme/</a> , and this is where useful updates will be made available as the proposed Project progresses.</p> |
| 19                                                                                                                       | Residents on Upper Ballymun Road | 16        | There are already significant traffic management issues in the immediate vicinity of the proposed location, and it is one of the busiest routes to and from Dublin City. Grave concerns exist about the impact on traffic during construction. TII have not given any comfort on how this will be managed and how residents can comfortably continue to go to and from their properties.<br>There are also concerns relating to structural damage to the nearby residential properties caused because of heavy drilling, rock breaking and rock-blasting.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | Please refer to responses 5, 7, 10, 12 and 16 above.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| 20                                                                                                                       | Residents on Upper Ballymun Road | 16 and 17 | The increased levels of airborne dust generated by construction and excavation will be further exacerbated by the expected stagnation of bidirectional road traffic due to flow restrictions caused by lane closures, with an associated increase in traffic pollution caused by a buildup of exhaust fumes There will also be a higher density of heavy construction traffic and machinery in the area adding to the level of pollutants. This added to excessive construction noise and vibrations will seriously impact the residents living anything close a normal life.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | Please refer to responses (5, 10) above.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| 21                                                                                                                       | Residents on Upper Ballymun Road | 17        | Flooding is also a major issue in the area and this is most likely as a result of the River Wad, which is located underground to the rear of houses and near the schools on the Ballymun Road, being no longer able to take the run-off of surface water following any heavy rain downfalls/deluges.<br>We have real concerns that that the extremely high water-table coupled with a dig of at least 23m in depth in close proximity to the underground River Wad would cause a change in water flow direction thereof further undermining house foundations.<br><u>We do not believe that this flooding situation has received any proper consideration in the choice of station location.</u> Water table considerations must be studied to understand the possibility to have flooding events, the quality of the water during the use of construction materials and the settlement induced by the changing water levels both during and after the works. A surface and groundwater monitoring plan must be developed and approved in order to check the hydrological factors in real time for both the construction phase and longer-term during operations.<br>It is necessary to evaluate the changing of the water table levels and the possibility of surface flooding. | Please refer to response (10) above.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

| MetroLink Submission: On behalf of ACRA and Ballymun Road North Residents (Barry Conway ACRA Deputy Chair & Jim Deignan) |                                                                                                     |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |  |
| 22                                                                                                                       | Residents on Upper Ballymun Road                                                                    | 17       | (Post Construction) there are further concerns attracting unwelcome attention and undesirable characters and anti-social behaviours. These residents are only a few meters from the station and will undoubtedly face significant post construction noise and disturbance late into the night as passengers and indeed revellers enter and leave the station.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | One of the outcomes of the high quality architectural and urban realm design is to discourage anti-social behaviour. The station and the area surrounding the station has been designed to provide an attractive and well lit urban environment with open sight-lines, and avoidance of areas where individuals and groups of people can hide. Any vandalism or anti-social behaviour in and around the stations will be observed through a comprehensive CCTV (Closed Circuit Television) system which is controlled from the Operational Control Centre (OCC). On the rare occasion that anti-social activity occurs, security staff and/or Gardai will be quickly notified so as to allow for a speedy response. The provision of CCTV systems will also act as a significant deterrent to any anti-social behaviour as any incidents will be recorded and this evidence will be issued to An Garda Siochana. See EIAR Ch 4 Section 4.6.3.7 & also 4.9.1 on safety processes |  |

TII have not given any comfort on how this will be managed and how commuters can comfortably use this route to go about their business. Furthermore, under the Bus Connects project, the NTA propose to facilitate parking on Ballymun by reducing the Northbound Road from the existing 2 lanes for traffic plus a bus lane to 1 lane for traffic plus a bus lane. In light of the issue outlined above there seems to be no common sense to this proposal, and it will only further exacerbate the issues with Metrolink.                                                                                                                                                                                                                                                                                                                                                                                                                                                 | Please refer to responses (5, 9, and 10) above.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |  |
| 24                                                                                                                       | Alternative Location                                                                                | 19       | During the previous Metro North proposal in 2007 the RPA at that time suggested a number of possible station locations including two park-based options. We are strongly of the opinion that there is merit in examining and considering a variation on what in 2007 the RPA proposed as Option 4 'Underground station at the North-West corner of Albert College Park.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | Please refer to response (1) above.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |  |
| 25                                                                                                                       | Comparison between the proposed Collins Ave Station and the previous Griffiths Park Station designs | 26       | There are a number of common denominators between the two locations. Both are sensitive receptors due to the presence of (three) schools at each location as well as having an impact on sporting /green amenities. In addition, Collins Avenue station has the added negative effect on those groups mentioned previously. We believe that stakeholders in our catchment area, particularly children and parents at OLV schools, senior residents at Albert College Court, churchgoers, Ballymun Road and Albert College Estate residents are no less deserving of the same considerations which were largely based on concerns relating to safety and environmental impacts, as was afforded to stakeholders in the Griffith Park station catchment area. Station relocation was clearly seen as the correct and only action to take at Griffith Park and we believe that given the similarities between the two sites, the same actions are justified at the Collins Avenue station which is after all just one kilometre further up the road. | Please refer to responses (1) above.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |  |
| 26                                                                                                                       | Requirement for an Intervention Shaft:                                                              | 28       | If Albert College Park is the revised location of the station an alternative location for the ventilation shaft is also proposed. We propose that the new location for this ventilation shaft should be moved north of the Collins Ave junction, between the Dentist and Ballymun Library.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | An alternative location for an intervention/ventilation shaft north of Collins Avenue is not included for in the RO Application.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |  |

| MetroLink Submission: On behalf of ACRA and Ballymun Road North Residents (Barry Conway ACRA Deputy Chair & Jim Deignan) |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| 27                                                                                                                       | Conclusion   | 31       | We submit that accommodation of everybody's interests can and should be achieved by a well-designed park-based solution which allows the most judicious and economic use of the parkland. We feel this will serve both the interests of those patrons of OLV Schools and Church, Local Residents and indeed commuters from outside the area, who could all potentially suffer a significant loss in their quality of life and their enjoyment of their properties if the wrong decision is taken. | TII have set out in the above responses the rationale for the proposed location of Collins Avenue Station and hence the need for an intervention shaft south of the proposed Collins Avenue Station, including the preferred location for this shaft in Albert College Park, and the environmental mitigation measures that will be employed to mitigate temporary environmental impacts, including traffic management and access, noise and vibration and air quality. |

| Objection to the Metrolink: Submission by Town Newton and Caitríona McClean, 6 Weston Avenue, Weston Park, Lucan, Co. Dublin, K78 YA39 A.C.R.A (Association of Combined Residence Association) |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |  |
| 1                                                                                                                                                                                              | Letter       | 1        | We object to the proposed MetroLink on the basis that there is a better alternative which can be delivered quicker with less environmental disruption, and with far greater impact in reducing car usage. This alternative would serve a much wider population, and would represent a greater value for public money.                                                                                                                                                                                                                                                                                                                                                                                                       | EIAR Chapter 7, Consideration of Alternatives presents in detail the alternative transport options that were analysed to serve the Fingal/North Dublin Corridor. The options assessed included for heavy rail, light rail and Bus Rapid Transit (BRT) options, as well as potential combinations of options. These options were assessed in a two-stage analysis, based on feasibility of the option and on the consideration of whether the scheme meets the fundamental Project objectives by serving Swords, Dublin Airport and the city centre. A Multi-Criteria Analysis (MCA) was undertaken having regard to Environment, Economy, Safety, Accessibility, and Social Inclusion and Integration. This assessment identified an Optimised Old Metro North as the best medium and long-term transport project for the Greater Dublin Area. The reasons for this choice are presented in EIAR Chapter 7, Consideration of Alternatives, section 7.3.2.                                                                                                                                                 |  |
| 2                                                                                                                                                                                              | Letter       | 1        | Because of the MetroLink's location in a small sprawl city most users will have to use public transport to get to the MetroLink bringing them into an already congested part of the city in a radial pattern, wasting vital capacity. The MetroLink is not an effective tool in reducing car usage for this very reason.                                                                                                                                                                                                                                                                                                                                                                                                    | EIAR Chapter 7, Consideration of Alternatives presents in detail the alternative alignments and locations that have been considered for the Project, and how the preferred route has been identified in line the with Transport Strategy for the Greater Dublin Area.<br><br>Transport modelling has been undertaken in a variety of growth scenarios, identifying a significant positive impact on reducing car usage. As detailed in EIAR Chapter 9, Traffic and Transport, notable reductions in traffic flow will be seen along key routes south of Dublin Airport, including along the M50 Motorway, and along most radial routes into Dublin City Centre. National roads such as the N11, N7, N4, M3 and M2 also see reductions in traffic flows when the proposed Project is in place. Across the modelled scenarios, a reduction of over 15,000 car trips occurs during the 12 hour period (07:00-19:00) is seen along the alignment.                                                                                                                                                             |  |
| 3                                                                                                                                                                                              | Letter       | 1        | If the MetroLink was built, the city would need another double rail track from Malahide next to the existing Dart line to the city centre as well as an underground Dart to Heuston station. Even this huge capital expenditure would still have a minimal effect on car usage due to its location.                                                                                                                                                                                                                                                                                                                                                                                                                         | Whilst designed to provide a fully integrated transport system, MetroLink is a standalone major public transport project proposed under the Transport Strategy for the Greater Dublin Area. As such, any changes to the DART network will be considered through its own planning process.<br><br>Please refer to Response (2) above regarding the impact of MetroLink on reducing car usage.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |  |
| 4                                                                                                                                                                                              | Letter       | 1        | If the MetroLink was built as far as Charlemont, it would put massive pressure on the existing Sandyford line for the MetroLink to extend underground to Sandyford. The consequences would be having an underground and overground rail system on same route from Sandyford to the Airport, servicing only a fraction of Dublin. The rest of Dublin and adjoining counties would have to wait many decades to get serviced or may not at all, due to large amount of resources that have already been expended on the MetroLink. The MetroLink is not an efficient use of public money, and in fact it would delay a transport solution for the vast majority in the greater Dublin area. We strongly object on this basis. | As detailed in EIAR Chapter 9, Traffic and Transport, a review of the total capacities on the existing public transport network has been undertaken. The model indicates that in 2035 (predicted Project Opening Year), if MetroLink was not in place, the Luas Green Line (south of Charlemont to Sandyford) would be operating 'under capacity'. When MetroLink is in place, the model does indicate an increased usage of the Luas Green Line, however the service will continue to operate with sufficient capacity remaining.<br><br>Also as outlined in response (4) above and in EIAR Chapter 3, Background to the MetroLink Project, MetroLink, BusConnects and DART+ have been developed as independent standalone projects, whilst also being designed as part of a fully integrated transport system. Therefore, the delivery of MetroLink will not preclude service provision to other areas in Dublin or the adjoining counties. Other transport projects have been identified in the Transport Strategy for the GDA 2022-2042, and these will not be impacted by the delivery of MetroLink. |  |
| 5                                                                                                                                                                                              | Letter       | 1        | Our organisation A.C.R.A. (Association of Combined Residence Associations) has come up with such a plan, the Newton Transport Plan, that meets most of the requirements of the Capital to operate successfully while addressing the aforementioned problems. The Newton plan is a fully integrated plan linking up all areas and incorporating all forms of public transport and accommodating active travel. The plan incorporates a common theme of orbital design as opposed to the traditionally used radial concept which brings all passengers into the centre and out again causing unnecessary congestion and consequent delays.                                                                                    | Please refer to Response (1) above regarding the consideration of alternative transport options. EIAR Chapter 7, Consideration of Alternatives, presents in detail the assessment undertaken to determine MetroLink as the preferred option.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |  |

|                                                                                                                                                                                                |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |  |

| Objection to the Metrolink: Submission by Town Newton and Caitríona McClean, 6 Weston Avenue, Weston Park, Lucan, Co. Dublin, K78 YA39 A.C.R.A (Association of Combined Residence Association) |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |  |
| 6                                                                                                                                                                                              | Letter       | 2        | <p>The Newton Orbital Luas: This plan is designed to takes users directly to all parts of the greater Dublin area with flexibility and has many advantages over the car. The Orbital Luas opens up huge possibilities for housing development. Transport and housing must be planned in conjunction and the Newton Orbital Luas creates the potential for combined planning. The MetroLink in contrast offers very little opportunity for new housing as the plan serves a very developed space which is already well served by housing and transport.</p>                                                                                                                                                                                                                                                              | <p>Please refer to Response (1) above with regard to the consideration of alternative transport options. EIAR Chapter 7, Consideration of Alternatives, presents in detail the assessment undertaken to determine MetroLink as the preferred option.</p> <p>As detailed in EIAR Chapter 3, Background to the MetroLink Project, compact growth will be achieved by the proposed Project along the Swords, Dublin Airport and City Centre corridor as it will provide the high-capacity transport system that will support compact development. This increased public transport capacity will support the development of much needed housing provision at a higher density, and thus will allow the benefits of compact growth to be realised.</p> |  |
| 7                                                                                                                                                                                              | Letter       | 2        | <p>The Newton Orbital Luas has the potential to reduce car numbers by up to 80% and can be completed quickly. It is a cost-effective attractive solution to the deficit in public transport. (See figure 1)</p> <p>Additional Luas: The plan creates two additional Luas lines into city centre (Lucan Luas and Rathfarnham Luas) and has other areas serviced by extending existing Luas lines.</p> <p>The G-Link: By linking up the Luas in the city centre in an inner orbital ring, it can take all users in the city centre to within walking distance of their destination. (See figure 2)</p>                                                                                                                                                                                                                    | <p>Please refer to Response (1) above with regard to the consideration of alternative transport options. EIAR Chapter 7, Consideration of Alternatives, presents in detail the assessment undertaken to determine MetroLink as the preferred option.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |  |
| 8                                                                                                                                                                                              | Letter       | 3        | <p>Rail: The G-link Luas described above maximises rail use because it has the potential to accommodate all users arriving at Dublin's train stations, even if train numbers were doubled. Crucially, by building the missing section of rail from Blanchardstown to Donabate via Dublin Airport on the edge of M50, the Newton Plan links up the full rail network in Dublin. This gives direct access to Dublin Airport to everyone arriving in Dublin by train without having to go through the city centre. It also creates a direct Cork to Belfast rail link. This allows for the number of trains into Dublin to more than double and for a trebling of trains on the Belfast line. There are also more country rail lines in the plan. (See figure 1)</p>                                                       | <p>Please refer to Response (1) above with regard to the consideration of alternative transport options. EIAR Chapter 7, Consideration of Alternatives, presents in detail the assessment undertaken to determine MetroLink as the preferred option.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |  |
| 9                                                                                                                                                                                              | Letter       | 3        | <p>City Centre Bus: A contraflow loop interchange plan on the Quays. This addresses the over one hundred (100) flaws in the city centre, the simple solution is a bus contraflow along the river. Details of this have already been submitted to Dublin City Council (see figure 3).</p> <p>Buses Outside the City:<br/>There are two bus orbitals on Dublin's outskirts.<br/>1. The CORE bus loop on the M50, with main Interchange at Liffey Valley. This orbital loop links all outlying estates to each other.<br/>2. The Outer orbital on the outskirts which is a new concept to maximise bus use with a high frequency.</p> <p>Country Bus Loop: This is a bus loop to maximise bus use into Dublin for up to 100 kilometres.</p> <p>The NTA have been made aware of the Newton Plan but have not responded.</p> | <p>Please refer to Response (1) above with regard to the consideration of alternative transport options. EIAR Chapter 7, Consideration of Alternatives, presents in detail the assessment undertaken to determine MetroLink as the preferred option.</p> <p>The referred to Newton Orbital Luas Plan does not form part of the GDA Strategy, TII are not party to communication between NTA and ACRA.</p>                                                                                                                                                                                                                                                                                                                                         |  |

| Objection to the Metrolink: Submission by Town Newton and Caitríona McClean, 6 Weston Avenue, Weston Park, Lucan, Co. Dublin, K78 YA39 A.C.R.A (Association of Combined Residence Association) |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 10                                                                                                                                                                                             | Letter       | 4        | We object to public money being spent on the MetroLink and ask that ABP refuse permission to proceed on the basis that the MetroLink is wasteful and does not address the climate change crisis in an adequate manner. It does not provide public transport in an acceptable time frame for the greater Dublin area but serves only a small section in an inefficient manner that will give rise to further spending, disruption and delays. | <p>TII strongly refute that MetroLink is wasteful. To ensure that public investment delivers value for money, the Public Spending Code sets out requirements for the evaluation, planning and management of public investment. The preparation of a Business Case is a key element of meeting these requirements. The Public Spending Codes requires that both the Preliminary Business Case and Final Business Case for public investment projects are published.</p> <p>In July 2022, the Government granted Approval in Principle to the NTA to enable the submission of a railway order application by TII to An Bord Pleanála in respect of the MetroLink project (Decision Gate 1). This approval was granted after the Preliminary Business Case (PBC) had undergone significant scrutiny and challenge by bodies that are independent of TII, including DoT and DPER review (including independent review by JASPERS and the Major Projects Advisory Group (MPAG)) of the PBC around timeline, costs and benefits that were updated to inform the Government decision.</p> <p>EIAR Chapter 7, Consideration of Alternatives outlines the robust decision making process that has led to the proposed Project, which has included the consideration of costs and anticipated monetary benefits. As detailed, the preferred option was the most economically advantageous scheme when compared to other options, delivering the highest benefit to cost ratio.</p> <p>EIAR Chapter 3, Background to the MetroLink Project details how MetroLink will contribute to the achievement of numerous climate action goals, through the delivery of both a sustainable mobility solution to reduce carbon emissions, and sustainable design. Analysis of the Project's potential impact on climate are presented in Chapter 17, Climate.</p> <p>TII confirm that the Project will be expedited as quickly as possible in accordance with the necessary planning approvals being in place and Government policy and direction.</p> |

| Objection to the Metrolink: Submission by Town Newton and Caitríona McClean, 6 Weston Avenue, Weston Park, Lucan, Co. Dublin, K78 YA39 A.C.R.A (Association of Combined Residence Association) |              |          |                                                                                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| 11                                                                                                                                                                                             | Letter       | 4        | We ask ABP to require the NTA to look at alternative plans in a transparent manner in keeping with EU legislation. | <p>TII are of the view, for the reasons set out by the above responses, and as evidenced by the detail presented by EIAR Chapter 7, Consideration of Alternatives, that alternative transport options have been considered in a transparent manner and appropriately assessed in accordance with EU legislation before selecting the proposed MetroLink project as the preferred option.</p> <p>Further, and as noted above, MetroLink will address transport challenges within the Greater Dublin Area. The proposed Project will provide significant benefits not only to those who choose to use it, but also to other transport network users, by reducing the demand for road space and creating the opportunity for the road transport system to achieve optimum levels of efficiency and effectiveness. Also as outlined in EIAR Chapter 3, the proposed Project is part of an integrated transport network that also includes for BusConnects and DART+ which are all included under Project Ireland 2040. Together, these projects will result in a reliable, sustainable, affordable, integrated public transport network that will support the economy, help Ireland meet its climate change targets in line with Climate Action Plan 2021, and make Dublin a more liveable and sustainable city. Whilst MetroLink is a standalone project that is not dependent on any other projects for its delivery or effective operation, it is nonetheless a critical part of the proposed integrated transport network for the Greater Dublin Area.</p> <p>Attention is also drawn to Chapter 4, Description of the MetroLink Project that confirms the overall project objective for the proposed Project, as established by the National Transport Authority (NTA) and Transport Infrastructure Ireland (TII), and as informed by planning policy context, MetroLink, is to 'provide a sustainable, safe, efficient, integrated and accessible public transport service between Swords, Dublin Airport and Dublin City Centre'. (National Development Plan 2021-2030, Box 9.1).</p> <p>The proposed Project will also improve the performance of the public transport and road networks in North Dublin, including the critical Dublin-Belfast trade corridor, and the supporting infrastructure for Dublin Port and Dublin Airport. By creating a new transport mode choice for passengers, the proposed Project will enhance regional and international connectivity and help optimise the transport network. EIAR Chapter 9, Traffic and Transport, presents an analysis of the capacity of existing public transport corridors, indicating that many of the other bus corridors are currently operating well over its capacity, and therefore an alternative solution is required to accommodate demand.</p> <p>Further, EIAR Chapter 7, Consideration of Alternatives presents in detail the robust decision making process that has led to the proposed Project, including alternative alignment options and feasibility assessments of cost, amongst other considerations. The proposed Project has been designed to ensure maximum interchange with other modes of transport, leading to positive impacts reaching far beyond the alignment through direct connections to both the heavy rail and Luas networks.</p> |

Responses where relevant are provided below in (3) and (4).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | TII wish to thank you for your submission. Responses where relevant are provided below in (3) and (4).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| 2                                                                                                                                                                                                                              | Observation  | 2        | <p>We have obtained some information from McCrae's Consulting Engineers archives in relation to the foundations of the building and can confirm that secant piles (750-900mm diameter) were used around most of the perimeter of the building. The piles used were cast in situ concrete bored piles and were in the region of 8.5 to 9.5m deep. The basement slab level is c. 4m below the finished ground floor level, with the underside of the car lift pits a further 2m below the finished basement level.</p> <p>The accompanying documentation states that the tunnel can deviate up to 15m laterally, 15m vertically down and 5m vertically up. We estimate that in the event of the tunnel deviating 5m upwards the top of the tunnel would be c. 7m from the assumed bottom of the piles for our client's building. Figure 1 below is a sketch of our clients building with the possible proposed tunnel routes shown. (See PDF )</p> | TII thanks you for the information provided. Please refer to responses (3) and (4) below.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| 3                                                                                                                                                                                                                              | Observation  | 3        | <p>The piles are installed down to the level of the limestone bedrock and we have concerns that vibration from tunnelling could affect our clients foundations if the final chosen location of the tunnel is too close to the bedrock the piles are bearing onto.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | <p>With regard to the proximity of your basement piles to the tunnels and the impacts of vibration on your structure, EIAR Chapter 14 Groundborne Noise and Vibration, Appendix 14.5 presents the predicted groundborne vibration levels during the construction phase of the project for 10/11 Leinster Street South:</p> <p>The predicted level of groundborne vibration during TBM passage is 0.248 ms-1.75 day and 0.208 ms-1.75 night, below the VDV (Vibration Dose Value is a parameter that combines the magnitude of vibration and the time for which it occurs) Threshold Level of 1.0 ms-1.75 day and 0.5 ms-1.75 night, resulting in a not significant impact on the building.</p> <p>It should also be noted that there is no other mechanical excavation nor blasting at this location, resulting in no impact on the building.</p> <p>With regard to settlement induced by the tunnelling operations your buildings have been assessed as being within the "negligible" damage category and hence no significant impacts are anticipated. This is as detailed in EIAR Appendix A5.17.</p> <p>The design includes for a limit of deviation which is required to allow for unforeseen obstructions and construction tolerances which may necessitate a change to the alignment. In the highly unlikely event that this were to occur, any resulting environmental impacts will comply with the limits set by the enforceable Railway Order.</p> <p>TII has carried out a comprehensive set of ground investigations in accordance with relevant guidelines and best practice. It has a high confidence that MetroLink can be constructed along the proposed alignment without requiring vertical or horizontal adjustment. However, in order to guard against rare and undetectable subterranean conditions that might interfere with construction, the Railway Order provides for limits of deviation (as have other railway authorisation since at least the 1840s). The impacts of potential changes within the Limits of Deviation are considered in the Wider Effects Report (Appendix A5.19).</p> |

| We write on behalf of our client Aidan Cyril Forde, Cordarragh, Brighton Road, Foxrock, Dublin 18 to make an submission/observation in relation to the Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022 |              |          |                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| 4                                                                                                                                                                                                                              | Observation  | 3        | We request that a detailed schedule of condition be prepared by the applicant prior to commencement of the works and vibration and noise monitors are installed in line with current best practice. | <p>Monitoring instrumentation will also be installed to monitor the performance of the works and potential environmental impacts, including those discussed above to ensure that limits in the EIAR are not breached. TII would also draw attention to the fact that residential properties within 50m of the station excavation, or 30m of the tunnel are eligible to subscribe to the Property Owners Protection Scheme (POPs) which includes for pre and post-construction condition surveys and repair of damage. The Property Owners' Protection Scheme is in addition to the existing legal rights of property owners and is in place to provide a simple and prompt way of rectifying any damage caused under the project up to the ceiling of €45,000. If the sum should exceed this amount the normal claims process would be used with the insurance companies for TII and/or the contractor.</p> <p>Appendix 5.1 of the EIAR contains an outline Construction Environmental Management Plan (CEMP) which outlines the proposed approach to noise and vibration monitoring during the construction phase in Table 6.2. A full monitoring and auditing programme will form part of the CNVMP which will be agreed with the Local Authorities prior to the commencement of the Construction Phase.</p> <p>TII's contractor(s) will prepare a Construction Noise and Vibration Management Plan (CNVMP) for the proposed Project as referred to in EIAR Appendix A5.1, Outline Construction Environmental Management Plan (CEMP). The CNVMP will be a live document and will include a full monitoring and auditing programme which will be agreed with the Local Authorities prior to the commencement of the Construction Phase, including predetermined monitoring trigger levels to ensure noise and vibration limits are not breached, noting that it is not possible to mitigate TBM groundborne noise and vibration at source. Table 6.2: Noise and Vibration Measures of the Outline CEMP outlines the monitoring programme requirements.</p> <p>Unfortunately, there are no effective methods available to reduce groundborne noise or vibration from the TBM at source but noting that the duration of this impact will be temporary and of the order of up to two-weeks as the TBM passes TII will undertake advanced consultation and stakeholder engagement to prepare people for the passing of the TBM and ensure the timing of these impacts are known.</p> |

| 1                                                                                                                                           | Observation / Concerns | 1        | I reside in one of the Dublin City Council homes marked for demolition and I use the swimming pool in Markievicz Leisure Centre. I have applied to the Irish Human Rights and Equality Commission for legal assistance and representation at any oral hearing of the Railway Order application so that my submission can be reasonably considered.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | TII will address the issues raised by your representatives at the Oral Hearing.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| 2                                                                                                                                           | Observation / Concerns | 1        | <p>I am blind and my home and community provide me with a quality of life not easily replicated elsewhere. As a blind person, I have a navigational knowledge of the local environment and landscape which I have acquired over 40 years. I find swimming extremely beneficial and having a public pool in close proximity to my home has been a vital facility.</p> <p>In recent years I went to great personal expense to adapt my home on Townsend Street to my needs, which I cannot afford to do again. And without these adaptations, I could not live safely and comfortably in any new home.</p> <p>And I will lose all this if my home is demolished and I am relocated elsewhere in the city. In addition, as a visually impaired person I am dependent on local services which will not necessarily be available in a new environment.</p> | <p>TII acknowledge the concerns you have around the demolition of your home and the Markievicz Leisure Centre. Mitigation for the loss of the College Gate apartments is being addressed as part of the Project with the support of Dublin City Council DCC). As the property is in the ownership of DCC, TII will work with DCC to ensure suitable alternative housing is provided in advance of the commencement of construction activities.</p> <p>TII will also continue to work with DCC in relation to the development of an alternative sports and recreational facility to replace the Markiewicz leisure centre and intends to fund the alternative. However, TII does not have control over that development, which is part of DCC's function to provide public sport and recreational facilities in its function area. DCC may or may not be in a position to deliver it in parallel with the MetroLink project. Accordingly, the Board should assess the MetroLink project on the basis that the alternative may not be available. The impact would then be significant, but nonetheless one that would not outweigh the strategic scale long term benefits that MetroLink will deliver.</p> |

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| 3                                                                                                                                           | Observation / Concerns | 1 and 2  | <p>I feel that affected residents have been provided with no satisfactory evidence that demolition of the Townsend street apartments is unavoidable, and that our voices have been largely ignored by the Metrolink project and Dublin City Council.</p> <p>MetroLink's own Environmental Impact Assessment Report describes the impact of the proposed location for Tara station as 'significant':</p> <p><i>"The loss of a number of residential buildings required to build the Option 0 will result in a significant environmental effect and will require the rehousing of all the residents of these units. In addition, the loss of the Markievicz leisure centre will impact on the local population as it serves as the only public swimming pool in this area ".</i></p> | <p>Please refer to Response (4) below in relation to the consultation with residential property/landowners and residents’ associations that has taken place throughout the duration of the Project.</p> <p>EIAR Chapter 7 (Consideration of Alternatives) and Appendix A7.2 Tara Street Station Report detail the alternative options that were considered for the location and type of the Tara Street station to try and address concerns raised relating to the demolition of the College gate apartments and the Markievicz leisure centre. In total, 11 alternative options for Tara Station were considered and evaluated before determining that the proposed location provided the optimal solution.</p> <p>Of the alternate options considered, a mined station option at Tara was identified as a potential solution to avoid the demolition of the College Gate building, whilst retaining the required ease of interchange with the adjacent Dart station. However, TII do not consider this option would provide an effective resolution to the residents’ concerns or the wider project requirements for the following reasons:</p> <p>- A mined tunnel option would require two large cut and cover shafts to be constructed at either end of the platform cavern to provide construction access for mining the tunnel and to subsequently provide permanent access, ventilation and back of house facilities for the operation of the station.</p> <p>Mining of the cavern would need to be undertaken 24 hours a day, 7 days a week to ensure the safety and security of the works and to ensure the cavern was completed prior to the required passage of the tunnel boring machine. Alternative 12-hour working would introduce significant programme extension and unacceptable cost escalation as well as requiring additional work to secure the safety of the working face at the end of each day.</p> <p>The mined tunnel option would have the following specific impacts on College Gate residents:</p> <p>- Due to mining of the cavern, which would include drill and blast, it would generate a level of groundborne vibration and noise that would make the College Gate apartments uninhabitable.</p> <p>- There would also be noise and construction disturbance due to the initial adjacent demolition works and shaft construction by the apartment block. Although this work would not be undertaken on a 24-hr basis it would cause significant daytime nuisance to residents.</p> <p>- TII estimate that to avoid the significant costruction impacts on residents relocation would be required for a period of up to 2 years.</p> <p>TII also note the following concerns that do not support the use of a mined tunnel at this location. During construction:</p> <p>- Mined construction is significantly more complex and challenging to manage than a cut and cover option that uses diaphragm walls and propping to provide ground support before excavation commences.</p> <p>- There is a risk that the rock quality/stability above the cavern may require the tunnel/platforms to be made deeper, increasing construction costs, and subsequently affecting ease of passenger access during operation of the metro.</p> <p>- There are increased risks of programme delay and cost increases if issues occur during mining of the cavern (eg groundwater inflows, harder or poorer quality rock or building damage to College Gate due to vibrations or settlement requiring a change in construction process).</p> <p>- Phasing of construction activities would be constrained by the more limited construction working space available compared to the proposed station box construction leading to a longer construction period overall.</p> <p>During operation:</p> <p>- A mined station option would not provide the high-quality operational station that achieves the MetroLink architectural vision of providing passengers with a feeling of space and light as they quickly and easily navigate the station.</p> <p>- There would be a poorer passenger experience, for wayfinding, and accessibility. Access to/egress from the platforms would only be via the platform ends, resulting in inefficient passenger end loading of platforms and also trains as a result of passengers managing their exit from the station.</p> <p>- The mined tunnel would require increased ventilation requirements compared to the other underground stations along the route, requiring additional ventilation plant and space requirements to be provided.</p> <p>- A mined tunnel would introduce different requirements for emergency access and passenger egress in order to meet fire safety requirements and would need Dublin Fire Brigade approval.</p> <p>TII further note that:</p> <p>- Tara Station will be one of the busiest stations on the metro and retention of a high-quality station in keeping with the MetroLink architectural concept is very desirable.</p> <p>- Mitigation for the loss of the College Gate apartments is being addressed as part of the Project with the support of DCC. In particular, TII, in consultation with DCC, will support rehousing and provide compensation for the loss of the residential unit.</p> <p>- The proposed Project retains opportunity for future adjacent development by others.</p> |

| Submission to An Bord Pleanala on Railway (Metrolink - Estuary to Charlemont via Dublin Airport) Order [2022], Case reference: NA29N.314724 |                        |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 4                                                                                                                                           | Observation / Concerns | 2        | <p>To help mitigate against these effects, the Report promises Metrolink will ensure, in part, that:</p> <p><i>"Clear communication channels are opened with property owners to ensure there is a clear understanding of the process " and "TII will work closely with Dublin City Council to provide an alternative to the Markievicz Leisure Centre ."</i></p> <p>However, as a blind person I was left uninformed because, originally we were not notified about public consultation, and subsequently notifications to me appeared in printed format rather than braille, as I had requested. And, in fact, the statutory period of Public Consultation came and went and most local people were unaware that it had even taken place.</p> | <p>EIAR Chapter 08 Consultation (specifically section 8.3.5.5) details the consultation that has taken place with residential property/landowners and residents associations. The Project Team is acutely aware of the potential impacts of the proposed Project to residential property/landowners (and residents associations) in this area in particular, and as a result further engagement was undertaken to allow these stakeholders time to consider the proposals. Consultations took place with all owners of properties and lands which are affected by the proposed Project. During the non-statutory public consultations phase TII represenatives met Ms Wellard on a number of occassions to discuss her specific concerns , further meetings were convened with Ms Wellard post submission of the Railway Order and the conclusion of the staturoy consulatation stage.</p> <p>Appendix A8.19 notes that 5 meetings were held with Townsend Street DCC tenants throughout 2019, 6 of which are due to be affected by the demolition works and who have lived there for between 20-30 yrs. In preparing the application for Railway Order, the Project Team has consulted with the public and stakeholders in accordance with the following legislative, best practice and planning practice requirements in line with the Aarhus Convention, Consolidated EIA Directive Requirements and requirements of national law. To facilitate public participation, a range of communication materials were generated during each period of non-statutory public consultation, including accesseible materials such as braille maps.</p> <p>Ms Wellard raised concerns about the accessibility of the RO application documents on 23 October 2022, seeking a Braille copy of the Non-Technical Summary (NTS) and a tactile version of relevant drawings. TII commissioned a Braille version of the NTS on 7 November 2022 and provided same to Ms Wellard in advance of the end of the consultation period, but had difficulty in getting the tactile drawings produced and printed. A supplier was found and the tactile drawings ordered in December 2022, proofs were received and reviewed on 16 January and the final drawings were received and sent to Ms Wellard in February.</p> <p>TII regrets that it could not supply the tactile drawings during the statutory consultation period despite its best efforts. Ms Wellard can raise any issues arising out of her review of the tactile drawings at the oral hearing and TII will offer her all reasonable assistance to enable her participation in the statutory process.</p> |
| 5                                                                                                                                           | Observation / Concerns | 2        | <p>And the promised alternative to the Leisure Centre is dependent on Dublin City Council being able to provide a suitable site, which - given the demand for and value of land in the city centre - is likely to be somewhere on the outskirts.</p> <p>In light of all of this I request that An Bord Pleanala refuses approval for the Metrolink project or, alternatively, makes it a Condition of the approval that the location of the Tara station be reworked.</p> <p>I believe that the planning and decision making of Dublin City Council and TII are worthy of vigorous investigation given the burden they are asking local residents to carry.</p>                                                                                | <p>Please refer to response (2) in relation to the identification of an alternative site for the Markiewicz Centre by DCC.</p> <p>Please refer to response (3) in relation to the alternative options considered for the Tara Street Station, and the reasons why the proposed location has been identified as the preferred option.</p> <p>A station at Tara Street provides good interchange opportunities, serves important key trip attractors such as Trinity College, O’Connell Street shopping areas and the the Internation Finance Centre in the study area with high potential passenger trips. This option also takes a direct and short route through areas of high demand in the centre of the study area.</p> <p>TII recognise that the construction of the MetroLink scheme will impact significantly on local residents , buisnesses and other important stakeholders and sincerely regrets that homes will be lost during the construction of the scheme. However as Dublin’s public transport network grows through the implementation of higher capacity bus routes, light rails services and higher frequency rails servcies it is critically important that to achieve the full benefits and capitalise on these investments. to realise these benifits it is necessary that that they are integrated fully where appropriate to attain “the network effect”. This can be achieved by locating the metrolink station at Tara Street. High quality interchanges can significantly broaden the transport offer for their catchment and add to the appeal and attractiveness of sustainable transport by ensuring that people can easily change services to access a wider range of places by these modes, and each scheme should be designed to ensure that these are as seamless as possible.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

| Case Reference: NA29N.314724, Railway (MetroLink-Estuary to Charlemont via Dublin Airport) Order 2022, Submission on behalf of Alstead Securities in relation to Ashford House, Tara Street, Dublin 2 |                                                  |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |  |
| 1                                                                                                                                                                                                     | Cover letter                                     | 1        | This submission follows two earlier submissions to MetroLink consultations dated 11 <sup>th</sup> May 2018 and 21 <sup>st</sup> May 2019. These submissions sought the omission of the proposed Metrolink works at the Ashford House site from the proposals in its entirety.                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | Noted.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |  |
| 2                                                                                                                                                                                                     | Cover letter                                     | 1        | <p>In summary, it is considered that the proposals for MetroLink so far as they relate to the area surrounding the proposed Tara Street Station fails to respond to national, regional and local planning policies and fail to capitalise on the benefits which MetroLink will bring to the area.</p> <p>The current proposals would create a large, underused plaza with little amenity value. It is considered that there is potential for development above the proposed MetroLink. This would retain employment floorspace close to excellent transport links and provide commercial activity which would enliven the proposed plaza.</p>                                                                                                               | <p>The existing station design will deliver a public plaza over the station box creating an attractive public space in a part of the city where there is a shortage of such spaces. The creation of the new public plaza at the location is in line with local policy objectives as set out in the Georges Quay LAP. This plaza design does not preclude 3rd party developers further developing the area.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |  |
| 3                                                                                                                                                                                                     | MetroLink Proposals in relation to Ashford House | 4        | <p>As shown, an area marked 'Proposed Future Development By Others' over washes Alstead Securities landholding as shown in blue on Figure 4. This area of 'Proposed Future Development by Others' comprises c. 840m<sup>2</sup>. It is an irregular parcel of land and its development for a viable new building is severely compromised by the shape and configuration of the parcel of land left over after the Metrolink proposals.</p> <p>In addition, the Metrolink proposals include a number permanent structures at ground floor / surface level of the future of the future development site, including for example a fireman's lift. This is a very poorly considered arrangement and will severely impact development potential of the site.</p> | <p>MetroLink will be a catalyst for and provide opportunity for future development and regeneration. While the MetroLink Railway Order does not include for future neighbouring or overhead development, the tunnels and stations are designed to support appropriate future imposed loads.</p> <p>TII will be required to make submissions in relation to planning applications for proposed future developments on or adjacent to MetroLink and there will necessarily be some engineering constraints (such as permissible loadings) required. However MetroLink is committed to engaging with known development proposals and new development proposals as they emerge with the intent of facilitating such developments as they emerge to the maximum extent consistent with the safe operation of the proposed Project. TII notes the comments made in this submission and will consider whether they can be accommodated within the Railway Order design.</p> <p>In this context TII has successfully engaged with a number of developers over the last two years to accommodate development over and in proximity to the alignment and there have been no material restrictions on development subject to the implementation of agreed design and mitigation measures and it is not anticipated that MetroLink will have a material impact on the development potential of this or other sites above and in proximity to the alignment in future.</p> |  |
| 4                                                                                                                                                                                                     | Submission                                       | 7        | However, it is considered that the proposals, insofar as they relate to the Tara Street area, are poorly considered and will have significant negative long term impacts on our client's property, fail to improve the area, and fail to meet relevant planning policies and objectives which promote compact growth.                                                                                                                                                                                                                                                                                                                                                                                                                                       | The Proposed Project which is a high capacity public transport mode strongly supports the concept of 'compact growth' through facilitating the development of compact, connected places along a strategic corridor of development which is set out in relevant National, Regional and Local policy. The Proposed Project has considered the potential to deliver high density urban development on the sites that adjoin the plaza.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |  |
| 5                                                                                                                                                                                                     | Submission                                       | 7        | MetroLink, as proposed, does not appropriately recognise the potential for integrated higher density development at this location.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | Refer to Response (2) and (3) above.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |  |
| 6                                                                                                                                                                                                     | Submission                                       | 8        | National, regional and local policy, as set out above, clearly encourages intensification of employment and other uses around public transport routes. The policies are very clear in encouraging intensification along the MetroLink lines to take advantage of the new infrastructure. The proposals fail to encourage significant development in line with these policies.                                                                                                                                                                                                                                                                                                                                                                               | The proposed Project directly contributes to delivering intensification of employment and mixed used development along its corridor. Connecting and integrating with the public transport network and employment hubs in the county, the Proposed Project connect major employment areas across the region.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |  |

| Case Reference: NA29N.314724, Railway (MetroLink-Estuary to Charlemont via Dublin Airport) Order 2022, Submission on behalf of Alstead Securities in relation to Ashford House, Tara Street, Dublin 2 |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |  |
| 7                                                                                                                                                                                                     | Submission   | 8        | <p>Further to this, the creation of a public plaza at this location has not been well considered. The plaza will be overshadowed by neighbouring buildings resulting in a lack of sunlight, and will not offer positive public realm as the majority of users of both the DART and MetroLink Stations will pass through the area quickly to access transport. Opportunities for commercial development feeding into this square, both from retail/food and beverage at ground level and from offices at upper floors, has not been considered. New public plazas should be carefully planned with future users in mind; it is considered that this plaza has been created as a result of a left-over area of land and will offer little by way of public amenity. The creation of this plaza is by virtue that it is easier for the MetroLink project to have nothing above the station than to give detailed consideration to the function of this area which would result in a better outcome for all.</p> <p>If, as proposed, the lands are subject to CPO as part of the Railway Order, it is not considered that the creation of this plaza represents a good return for the people of Ireland in terms of public realm, the opportunity missed to provide well connected employment floorspace or the potential commercial return for the Exchequer should this area be more comprehensively developed.</p> <p>There is significant potential for more substantial development over the proposed MetroLink Station. This would allow for a significant amount of employment floorspace in very close proximity to both the DART and MetroLink.</p> | <p>The proposed Tara station has been designed to allow all passengers enter and exit the station quickly, efficiently and safely with interchange with the existing DART station key to the proposed location of this station. With this functionality as the key driver of the station design, world renowned architects Grimshaw have designed a station and plaza to the highest architectural standard that will serve this area of the city well by providing a high quality plaza at this city centre location.</p> |  |
| 8                                                                                                                                                                                                     | Submission   | 8        | <p>Alstead Securities Ltd have engaged RKD Architects to undertake a study of the potential for development at Ashford House alongside the proposed Tara MetroLink Station. The Draft Concept, prepared by RKD, is enclosed with this submission.</p> <p>The Draft Concept outlines the potential for the development of a commercial building above the proposed MetroLink station, on the site of Ashford House (Figure 5 and enclosed).</p> <p>The provision of increased office space would accord with planning policy which encourages commercial development close to sites with good public transport connections and public transport interchanges.</p> <p>This would also create an improved public plaza to the southeast which would benefit from increased commercial activity feeding into it (Figures 6 and 7).</p> <p>We have considered the operational and structural considerations of the proposed MetroLink project. RKD have worked considerably on similar schemes and have fully accounted for the extract and intake vents and fire access required to facilitate the MetroLink Station (Figure 8). These can all be provided in the Alternative Proposal as set out in the RKD document.</p> <p>This letter is also accompanied by a Technical Review prepared by DBFL Consulting Engineers. This review fully considers the proposed station and demonstrates how the proposed development above the station can be delivered. The review demonstrates that there are no structural reasons why lands above the station need to be sterilised.</p>                                                                            | <p>Please refer to Responses (2) and (3) above.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |  |
| 9                                                                                                                                                                                                     |              | 11       | <p>The permitted scheme should accommodate development above the MetroLink station. This would better achieve the aims and objectives set out in policy to promote development at sites with excellent public transport links.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | <p>Please refer to Responses (2) and (3) above.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |  |
| 10                                                                                                                                                                                                    |              | 11       | <p>Development should be allowed in advance or alongside the MetroLink construction stage so as to not sterilise the owner's lands. Appropriate protection for the proposed MetroLink scheme can be incorporated in the development above.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | <p>Refer to Response (3) above. However it is important to note that the Railway Order application for this proposed development is for the infrastructure required to deliver Metrolink only and cannot include for 3rd party commercial developments. If a third party obtains permission for an oversite development TII will work constructively with them to agree appropriate commercial terms of the acquisition of the air rights and the terms of interface with the MetroLink project.</p>                       |  |
| 11                                                                                                                                                                                                    |              | 12       | <p>The Metrolink proposal should be amended to have better consideration of future development potential of lands above and adjacent to the proposed station. This should include a reconsideration of the location and arrangement of above ground structures and 'pop-ups' associated with the Metrolink proposals.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | <p>Refer to Response (2), (3) and (10).</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |  |

| Case Reference: NA29N.314724, Railway (MetroLink-Estuary to Charlemont via Dublin Airport) Order 2022, Submission on behalf of Alstead Securities in relation to Ashford House, Tara Street, Dublin 2 |                |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| 12                                                                                                                                                                                                    |                | 12       | We request that the CPO is amended so that there are revisionary rights to Alstead Securities to allow for development above and adjacent to the Metrolink works. This submission demonstrates that there are no design or technical reasons as to why this cannot be accommodated. As currently drafted, the Draft Railway Order and associated CPO would severely limit the development potential of this key urban site and would fail to allow for national and regional planning policy targets for integration of land use and transportation to be met.                                                                                                                                                                                                                                                                                                                                          | Refer to Response (3).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| 13                                                                                                                                                                                                    |                | 12       | We also wish to identify the significant potential sterilising effect that an approved Railway Order will have on our client's lands. In the event of an approved Railway Order (as drafted) and a lag in commencement of works on the MetroLink, our client's lands will not be capable of any development. The ability to realise a high density of development at this central location in accordance with national and regional planning policy will be limited should there be any uncertainty in delivery of the MetroLink scheme. In addition, such a situation would create uncertainty from a tenancy perspective and could lead to loss of existing tenants and extreme difficulty in attracting new tenants. In this respect, we request that An Bord Pleanála is fully satisfied and has sufficient assurances to the effect that there is a strong business case for the MetroLink scheme. | Refer to Response (2) and (3).<br><br>The business case for the project is a matter for the Government, Oireachtas, TII and NTA. The Board's function is confined to considering whether the grant of a railway order is in the interests of proper planning and sustainable development and has acceptable impacts on the environment.<br><br>Without prejudice to TII's right to object to any particular head of loss, the observer will compensated for any losses compensatable under the CPO code. |

| 14                                                                                                                                                                                                    | 1 Introduction | 3        | This Technical Note, in addition with draft concepts carried out by RKD Architects on behalf of Alstead Securities Ltd, demonstrates the potential for better use of the site by developing a commercial building over the proposed Metro Station while limiting the intervention with the Metro station structure to a minimum. The open public space can still be retained.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | Refer to Response (2) and (3).                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| 15                                                                                                                                                                                                    | 2 Discussion   | 4        | To maximise the full development potential of the site a building could potentially be constructed that straddles the main station box. Some co-ordinated intervention within the periphery of the station box would be required in order to keep the structural spans for the new building within acceptable limits.<br><br>Figure 2 below indicates where it is proposed that structural columns could be incorporated within the Metro construction to support vertical loads from the building overhead.                                                                                                                                                                                                                                                                                                                                                                                            | Refer to Response (3).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| 16                                                                                                                                                                                                    | 3 Conclusion   | 7        | Based on a review of the drawings within the Railway Order Application for the construction of the proposed new underground Tara Metro station on the existing Ashford House site, and preliminary modelling carried out, it is concluded that from a structural perspective, there is no reason why development of the Ashford House site could not be accommodated above the MetroLink station as proposed. Whilst it is assumed above that development of the site would precede construction of the Metro station below, the sequence of work, whether station box first, commercial building first or concurrent would not impact on the conclusion reached above.                                                                                                                                                                                                                                 | Refer to Response (3).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

| Letter Re: Railway Order Application - Metro North: Estuary through Swords, Dublin Airport, Ballymun, Glasnevin and City Centre to Charlemont, Co. Dublin: Railway Order 2022 (Metrolink-Estuary to Charlemont via Dublin Airport) |                                                                                     |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| 1                                                                                                                                                                                                                                  | Mater Stop                                                                          | 1        | I sincerely hope that the construction of the Mater stop provides an opportunity for the rejuvenation of the area rather than it being viewed by TII as a convenient site for a station with no regard for the architectural environment and the communities living near the area.                                                                                                                                                                                                                                                                                                                          | <p>Thank you for your submission and for sharing your concerns/observations related to the Mater station.</p> <p>The station will benefit the local community hugely. The architectural plans for Mater Station have been prepared to integrate the station into the park in a sympathetic fashion with the skylights being framed by planting and providing circulation routes through the park. Existing monuments and protected railings will be removed temporarily during the construction and will be relocated within the park after the completion of the works. Large mature trees will be replaced so as to provide balance and create space within the park. The landscape design itself will be created on top of the station box and sufficient depths and infrastructure are provided for in order to integrate the landscape design.</p> <p>TII have reviewed your submission and provided response for the observations/concerns raised in detail below.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| 2                                                                                                                                                                                                                                  | Mater Stop station Design                                                           | 1        | I am extremely concernd about the design and location for the Mater Stop and the anciliary structures. The correct design for the area will enhance rejuvenation end positive redevelopment after the 9 years of construction whereas an unattractive utilitarian design approach to the station and The Four Masters Park may have a very adverse effect on an area that has huge potential for being a really positive asset in the North Inner City and Phibsborough village. To compliment the location I feel that the canopy of this station should have less footprint, elevation and visual impact. | <p>The entrance is appropriate and conveniently located to walk to Mater Hospital, St Joseph's Church and Berkeley Road. The station location will also connect with bus services to and from Dublin City Centre, with bus stops on Berkeley Road.</p> <p>The Mater Station urban realm design principles are based on the following:</p> <ul style="list-style-type: none"><li>* Realignment of the Four Masters Memorial;</li><li>* Rearranging the footpath to provide enough pedestrian space for the main entrance;</li><li>* Reinstatement with enhanced planting of the Four Masters Park and its existing railings; and</li><li>* Replacement of existing trees.</li></ul> <p>The landscape design creates a public plaza to the main arrivals area at the entrance/exit. This active plaza then provides access to Eccles Street and Berkeley Road. A shared surface plaza to Eccles Street will be created to provide greater connectivity to the adjacent existing pedestrian network. This plaza will frame the portico of the adjacent Mater Hospital and integrate pedestrian circulation and cycle parking within the streetscape. On completion of the station, the park will be reinstated in a similar fashion to its current condition. Prior to construction commencing and in order to complete the urban integration, existing railings, Four Masters Memorial, Healing Hands Sculpture and other existing features will be carefully removed and stored temporarily to be reinstated into the urban landscape as part of the completion works.</p> <p>Please refer to response item (5) below in relation to the station design at Mater, and the design principles across the Project.</p> |
| 3                                                                                                                                                                                                                                  | Mater Stop station Design - 1) Elevation and position of the station entrance       | 1        | The view of the Mater Hospital building will be blocked from Berkeley Road. With either a different canopy design or using a different location in Four Masters Park would have a very positive effect on the commercial potential for Berkeley Road. The ancilliary buildings (lifts, emergency exit, ventilation shafts, lights) further block the view into the park visually shutting the off the park from Berkeley Road and diminishing any sense of space in the street.                                                                                                                             | <p>Please refer to responses (1) and (2) above and also refer to Chapter 27 (The Landscape) and section 27.5.4.20 of the EIAR which considers the landscape and visual impact of the project at Mater.</p> <p>Upon completion of the proposed Project, the visual amenity of the area will be largely restored, much to its existing condition though with some minor improvements. The green park will be restored close to its existing condition within the triangle of buildings along with the proposed amendments also made to the original Mater Hospital section of Eccles Street, which will enhance and transform the area around the station on completion. | 4                                                                                                                                                                                                                                  | Mater Stop station Design - 2) Materials used in the design of the station entrance | 1        | These are inappropriate for this location, it is an architecturally sensitive area and zoned under Objective Z2 in the Dublin City Development Plan 2022-2028. The buildings on Berkeley Road and street are Victorian and made of red brick, while the Mater Hospital and St Joseph's church are made of granite, the proposed Mater stop station is a glass structure with heavy looking brown detailing, the emergency exit is of brown brick and resembles a public toilet.                                                                                                                             | <p>Section 26.4.4.8 Mater from the Chapter 26 (Architectural Heritage) of the Environmental Impact Assessment Report (EIAR) describes the architectural heritage features present in the area of Mater Station and their protection status.</p> <p>As stated in section 25.4.3.3 of EIAR Chapter 25 (Archaeology &amp; Cultural Heritage), Berkeley Road is an Area of Archaeological Potential and TII strongly believe that the proposals presented under this Railway Order are sympathetic to and will enhance the area further upon completion. When the works are completed, the visual amenity of the area will be largely restored, much to its existing condition though with some minor improvements. The restoration of the open green park space within the triangle of buildings along with the proposed amendments to the original Mater Hospital section of Eccles Street. Overall, the predicted effects on the visual environment and on visual amenity after the Mater Station is completed will, in the longer term be significant and positive.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

| Letter Re: Railway Order Application - Metro North: Estuary through Swords, Dublin Airport, Ballymun, Glasnevin and City Centre to Charlemont, Co. Dublin: Railway Order 2022 (Metrolink-Estuary to Charlemont via Dublin Airport) |                                                                 |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |  |
| 5                                                                                                                                                                                                                                  | Mater Stop station Design - 3) Plaza Design and bollards        | 2        | The hard materials of the unecesarily wide plaza which skirts the station in its current design location is inappropriate as it is too big and visually competes with the Mater Hospital steps there is a risk that this type of wide and inappropriate space may invite anti-social behaviour and loitering. The bollards could be replaced with planters as seen on Grafton St.                                                                                                                                                                                                                                     | <p>TII disagree and believe the commissioning of internationally renowned architect Nicholas Grimshaw and Partners, has delivered a contemporary station design which is appropriate for a state of the art metro system such as MetroLink.</p> <p>Appropriately, Dublin's rich architectural heritage has been respected, but not copied in a pastiche imitation. In accordance with best conservation principles, as set out in the ICOMOS Venice Charter of 1964, (referenced in EIAR Chapter 26 Architectural Heritage) the stations are architecturally distinguishable so as not to falsify the existing historic context. Reference and due respect to that context is made through the choice of high quality and appropriate materials and the scale of the interventions.</p> <p>At Mater station, the canopy entrance evokes the scale of park structures. The aesthetic values of all eras, including our own, have cultural validity, and therefore the brick is used in a contemporary way reflecting contemporary aesthetic idioms derived from 21st century technology. TII believe the current station and surface level designs greatly enhance the public realm at all locations along the MetroLink route. There is a unifying commonality in the design of all stations, providing a consistent and coherent architectural language, which assists with orientation and wayfinding, and contributes a new architectural lexicon to the cultural iconography of the city.</p> <p>The station architecture is integrated in the park in a sympathetic fashion with the skylights being framed by planting and providing circulation routes through the park. Significant emphasis is placed on the public spaces and the station concourse is a soaring space illuminated from above with natural light. Existing monuments and protected railings will be relocated within the park. Large mature trees will be placed so as to provide balance and create space within the park. The landscape design itself will be created on top of the station box and sufficient depths and infrastructure are provided for in order to integrate the landscape design. The bollards provide for necessary station security and are considered appropriate.</p> |  |
| 6                                                                                                                                                                                                                                  | Mater Stop station Design - 4) Station entrance location        | 2        | Relocating the station entrance to face the side walls of St Joseph's church on Berkeley Road would allow for the entrance / exit to be onto Eccles St. This location provides a more visually and softer view of the station entrance because it could be surrounded by trees as in the Stephens Green montage, it would also allow for the relocation of the ventilation shafts, lifts and emergency exit to be relocated resulting in the opening up the vista of the Four Masters Park, and the Mater Hospital.                                                                                                   | <p>The location of the station entrance is driven to optimise pedestrian access and flows both to the pedestrian crossings at the north corner of Eccles Street and Berkeley Road, and to facilitate the connection to Mater Hospital both to the canopy and to the lifts which have been duplicated in this particular location.</p> <p>Relocating the station entrance face towards St. Joseph's Church complicates, lengthens and hinders these flows and movements. Additionally, this provision affects a part of the park that has a certain level of protection and is fenced with railings.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |  |
| 7                                                                                                                                                                                                                                  | Mater Stop station Design - 5) Pedestrian safety / alternatives | 2        | Locating the station entrance further into the park near St Joseph's church would be safer for station users to enter and exit the station. In its proposed current location there is a great risk of pedestrians running across roads to the station as the proposed entrance is located very close to a cross roads (Berkeley Road, Eccles St and Vincents St). There is a proposal to pedestrianise Eccles St which will make it a safer entrance. It will also be safer to have the emergency exit located on the Eccles St side of the park rather than beside Berkeley Road which is a busy road at peak times. | Please refer to response (6). The safety of the design is fundamental to TII and the risks noted have been addressed. The design includes the signalisation of the junction of Berkeley Road, Eccles Street and St Vincent's Road North. The width of Eccles Street will be reduced locally at the junction. Provision of shared space will be incorporated on Eccles Street in the vicinity of the junction with Berkeley Road, with the shared space demarcated from the road edge by a raised kerb for the safety of pedestrian and cyclists.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |  |

| Submission No.                                                                                                                                                                                                                     |                |          | 006                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| Letter Re: Railway Order Application - Metro North: Estuary through Swords, Dublin Airport, Ballymun, Glasnevin and City Centre to Charlemont, Co. Dublin: Railway Order 2022 (Metrolink-Estuary to Charlemont via Dublin Airport) |                |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| 8                                                                                                                                                                                                                                  | Community Gain | 2        | <p>Provision should be made for a community fund.</p> <p>The extent and duration of this project will have a profound effect on the businesses and retail outlets on Berkeley Road, the majority will not be able to survive, especially the businesses in nos 10 - 18 Berkeley road. This row of shops defines Berkeley Road and will be the most affected by the vibrations and noise levels. Investment by TII should be put into reinstating the shops on Berkeley Road according to the DCC Shopfront Design Guide as this street is zoned as a Conservation Area. It is important that provision for improvements to the Berkeley Road and street public domaine are made and that these are integral to the station construction. An attractive street invites investment, the rejuvenation and regeneration of Berkeley Road will be essential for the return of commercial activities to this area. There is a very big risk that we will lose our retail and commercial outlets which are an important aspect of our lives and are an important part of the 15 minute city concept. The increased footfall provided by the commercial businesses is also important in discouraging crime - which is a factor to be considered with the proposed station site.</p> | <p>Whilst a local community fund is not currently in place, should a railway order consent be granted, TII will work with the local communities to actively support local communitiy gain initiatives.</p> <p>Chapters 13 (Airborne Noise and Vibration) and 14 Groundborne Noise and Vibration) of the EIAR addresses noise and vibration for the construction and operation phases of the project.</p> <p>The impacts on the businesses has been assessed. As stated in EIAR Chapter 13: Airborne Noise and Vibration, section 13.2.6.1.3, the principles for the management of Airborne Noise &amp; Vibration in the EIAR are based on BS 5228-1. Based on this standard the Construction Noise Threshold (CNT) was calculated for receptors on existing rounded ambient noise levels. In accordance with this standard, the CNT is set at 70 dBA at no. 9 Berkeley Road.</p> <p>The CNT threshold will be mandated to the contractors and enshrined in the Railway Order. Before commencing works, Contractors will then need to provide best practice mitigation to reduce the impacts. If the Contractor is unable to reduce the impacts sufficiently, and the residual levels are such that widespread community disturbance or interference with sleep is likely to occur, TII will consider whether the provision of further Noise Insulation (NI) or Temporary Rehousing (TRH) would be appropriate at locations where eligibility for either has been established. Please refer to the TII Airborne and Groundborne Noise Mitigation Policy (Appendix A14.6).</p> <p>Table 13.64 of Chapter 13 also presents the potential significant airborne noise impacts during the construction of Mater Station. At no. 9 Berkeley Road the Construction Noise Threshold set is predicted to be exceeded during a number of the earlier construction phases unless action is taken to mitigate. Mitigation in the form of plant selection, noise reduction at source and the provision of 4m high acoustic hoarding will reduce the impact, although it is possible that some residual impact may remain and would require further consideration in the form of the TII Airborne and Groundborne Noise Mitigation Policy.</p> <p>Prior to commencing construction, the appointed contractor undertaking the construction of the works at Mater will be required to undertake noise &amp; vibration monitoring at representative noise sensitive locations to evaluate and inform the control requirements and take specific noise abatement measures to the extent required and to comply with the recommendations of BS 5228-1 (BSI 2014a). In order to manage and mitigate airborne noise, the Contractor will be required to set out their proposals in the Construction Environmental Management Plan (CEMP), an outline of which is included in EIAR Appendix A5.1, and specifically Construction Noise and Vibration Management Plan (CNVMP) for Dublin City Council approval. The requirements for the control of Airborne Noise &amp; Vibration are included in section 6.2 Noise and Vibration.</p> <p>The Transport Infrastructure Ireland (TII) Airborne Noise and Ground-borne Noise Mitigation Policy (Appendix A14.6 of Chapter 14) sets out the construction noise insulation and temporary rehousing measures to be implemented where required for residential properties only. However, as noted in the policy, whilst the further mitigation measures only apply to residential dwellings (and other buildings used for accommodation), there may be other properties which are particularly sensitive to noise, such as commercial, educational and community facilities. The mitigation of impacts to these properties will be managed by the contractor.</p> |

| Item No.                                                                                                                                                                                                                           | Section Ref.                                        | Page No. | Observation Statement                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | TII Response                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| Letter Re: Railway Order Application - Metro North: Estuary through Swords, Dublin Airport, Ballymun, Glasnevin and City Centre to Charlemont, Co. Dublin: Railway Order 2022 (Metrolink-Estuary to Charlemont via Dublin Airport) |                                                     |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 9                                                                                                                                                                                                                                  | Air and Dust Quality                                | 2,3      | <p>Air and dust quality are a major concern for this area. It is a residential area with a mixed generation profile, there is also a national school located near the Black Church. The prolonged nature of this project makes the concerns even greater given that the other proposed developments in the Phibsborough area will go ahead within this time frame.</p> <p>A baseline for current air and dust quality should be taken before construction starts and should be monitored weekly throughout the construction phase. The basic standard should be the WHO recommended emission standards and benchmarks.</p> <p>It is completely inappropriate that provisions are being made on eligibility for rehousing and compensation due to airborne noise and dust levels. Tenants and individuals working in the city and the locality such as nurses should not be adversely affected by this construction - the level of homelessness has already impacted many of our essential services. There is also the issue of the property investments made by small landlords being adversely affected and not being eligible for compensation because they are not owner occupiers. <i>"To be eligible for support the owner/occupier must be in occupation of a private dwelling and the dwelling must be located where the predicted construction airborne noise is estimated to exceed the relevant criteria referred to in Appendix A "</i>.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | <p>Baseline Air Quality monitoring has been undertaken and presented in Chapter 16. The relevant guidelines are listed in section16.3.2 and include: <i>World Health Organization (WHO) Air Quality Guidelines for Particulate Matter, Ozone, Nitrogen Dioxide and Sulphur Dioxide Global Update 2021, (WHO 2021).</i></p> <p>Strict dust prevention will be in place at all times to minimise any potential emissions and these procedures will be strictly monitored and assessed. In the event of dust nuisance occurring outside the site boundary, movements of materials likely to raise dust will be curtailed and satisfactory procedures implemented to rectify the problem before the resumption of construction operations. Dust emissions are to be controlled so that re-housing is unlikely to be required but it is wholly appropriate that provisions are put in place to protect the rights of the community.</p> <p>Before commencing relevant works, the Outline Construction Environmental Management Plan (Appendix A5.1) will also be used to manage the construction phase impacts. As part of the updated Construction Environmental Management Plan in advance of commencing construction, an Air Quality Management Plan will also be produced to include for specific working hour measures at sensitive locations. This document shall be prepared and submitted to DCC for approval.</p> <p>As noted in section 2.1 of appendix A14.6 Airborne Noise and Groundborne Noise Mitigation Policy, where airborne noise mitigation measures can be effectively deployed on site and maintain levels within the prescribed thresholds, certain sensitive individuals (e.g., for medical reasons or work patterns/night working) may still consider the impacts to be intolerable. In such circumstances, if further mitigation may be required, these will be dealt with on a case-by-case basis.</p>                                                                                                                                                                                                                                                                                                                           |
| 10                                                                                                                                                                                                                                 | Construction Impact / compensation / airborne noise | 4        | <p>My house is directly opposite and within 30 metres of the station box. I am concerned that given the depth and level of the boring and required for the station box construction my house will be affected by subsidence and cracking. This is a similar situation for the majority of the houses on Berkeley Road. The metrolink criteria for re-housing and compensation appears to be only in relation to properties which are estimated to exceed the relevant criteria, these houses appear to be either directly above the proposed tunnel or are 30 metres from the tunnel rather the station box. There is no provision made for houses that are outside of the estimated modelling and criteria which may be damaged during the construction or in the years afterwards (due to subsidence).</p> <p>Given that a high percentage of the houses in the area are rented and that many of the buildings on Berkeley Road have commercial leases, it is remarkable that Metrolink have decided to put criteria on the types of building use that they will compensate if damaged or affected by airborne noise, this is especially relevant for numbers 10 to 22 Berkeley Road, many of which are either commercial properties or are rented: <i>"To be eligible for support the owner/occupier must be in occupation of a private dwelling and the dwelling must be located where the predicted construction airborne noise is estimated to exceed the relevant criteria referred to in Appendix A "</i>. Provision needs to be made not only for damage to all property in the area, resulting from the construction of the station and tunnel but also for the property owners in situations where the inhabitants need to be rehoused due to airborne noise and vibration or are made ill due to the dust and pollution levels during construction. It is inappropriate that compensation would only be given to the occupier / owner when it is a construction project that will affect the properties of the many different categories of ownership and property investment in this area.</p> <p>These houses have very little foundations - the provision of a 5 year window for subsidence damage post construction is too small. The window should ideally be at the upper end of internationally recognised subsidence risk timelines.</p> | <p>Buildings and Infrastructure - A comprehensive Settlement Assessment has been undertaken to determine the potential impacts that construction of the proposed Project will have on sensitive receptors such as buildings and infrastructure from the advance of the TBM. The ground movement predictions and the building damage assessment methodology adopted for MetroLink is based on the approach adopted in most tunnel projects around the world, including London Crossrail and High Speed 2 in England. This is described in EIAR Section 5.4.11 (Ground Settlement Monitoring and Mitigation Works).</p> <p>EIAR Appendix A 5.17 Building Damage Report, covers the assessed impacts of construction generated ground movements and settlement on property. Table 5.2 of this report shows that a property similar to yours has been assessed as falling within the '<i>very slight damage</i> ' category currently. The building risk categories shown in Table 4-4 of the aforementioned report are used to define the degree of building damage related to the Risk Category, for which yours is 2 or below. Because your building falls within Damage Category 2 or below, no structural impacts are predicted.</p> <p>Please be aware that no properties along Berkeley Road are predicted to be above damage category 2 and hence no properties will suffer structural impacts. No properties will require rehousing due to either short term or long term settlement. Please note that long term settlement impacts are not anticipated. Monitoring will be continuous until settlement is shown to have ceased.</p> <p>Monitoring instrumentation will also be installed to monitor the performance of the works and potential environmental impacts, including those discussed above to ensure that acceptable limits are not breached. TII would also draw attention to the fact that private properties within 50m of the station excavation, or 30m of the tunnel are eligible to subscribe to the Property Owners Protection Scheme (POPs) which includes for pre and post-construction condition surveys and repair of damage.</p> <p>With regard to other environmental impacts please refer to responses (8) and (9).</p> |

| Re: Railway (Metrolink–Estuary to Charlemont via Dublin Airport) Order 2022 An Bord Pleanála Ref No 314724 |                                                 |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| 1                                                                                                          | Construction / Operation - Impact on Deliveries | 3        | As per the application documents submitted, construction of the MetroLink is anticipated to last up to 10 years and is programmed as four main works packages: Enabling Works Central and South; Enabling Works North; Main Works Central and South; and Main Works North. An Post acknowledges some disruption is likely to occur given the scale and complexity of MetroLink’s construction, however it is respectfully requested that An Post’s specific operational requirements are recognised in relation to its various post offices and mail sorting offices. These facilities are central to the operation of a reliable public postal service, and it is imperative that their operational viability be protected.                                                                                                                                                                             | TII recognise the importance of An Post operations and will work to ensure that any disruption is kept to a minimum and operational requirements are not unduly affected. Further detail of how this will be achieved is provided by the responses below to specific points raised by the An Post submission.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| 2                                                                                                          | Construction / Operation - Impact on Deliveries | 3        | It is evident that there will be a number of temporary traffic management measures, as well as permanent alterations to the transport network in order to facilitate the MetroLink Project that may materially impact accessibility for An Post deliveries and access for staff and customers. Any impact on An Post’s ability to operate its essential public service during the construction stages of MetroLink, including permanent road alterations and/or temporary traffic management measures such as the addition of construction haulage volumes that might materially affect the capacity of the existing road network, could have a serious impact on the ability of An Post to meet the postal needs of the public and agreed service legal agreements with the State. It is requested that the proposed works do not directly affect An Post’s ability to operate under normal conditions. | The MetroLink Project will not directly impact on An Post's ability to operate and this will be monitored throughout the works. EIAR Chapter 5, MetroLink Construction Phase, section 5.4.12 Traffic Works notes that traffic management plans for the construction of MetroLink have been developed to minimise the impact of the Project on road users, and to maintain access to businesses and other premises. Prior to implementation, all traffic management measures will be agreed with FCC and DCC and where relevant, consultation with An Garda Síochána and other statutory stakeholders will be undertaken. Traffic management measures and road construction works are based on the key principle of maintaining continual access to all properties during the works. Road works will be monitored throughout the duration of the works to ensure traffic delays, congestion and inconvenience to road users are minimised. |
| 3                                                                                                          | Construction / Operation - Impact on Deliveries | 3        | Furthermore, in relation to the operational phase of MetroLink, An Post wishes to ensure the level of traffic, including the high proportion of Heavy Goods Vehicles expected, is safely accommodated on the road network and strategic junctions along the planned route.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | As outlined in EIAR Chapter 9, Traffic and Transport, during the operational phase of the Project, notable reductions in traffic flow will be seen along key routes south of Dublin Airport, including along the M50 Motorway, and along most radial routes into Dublin City Centre. National roads such as the N11, N7, N4, M3 and M2 will also see reductions in traffic flows when the Project is operational. In all modelled scenarios, the number of car trips reduces when the Project is in place and operational, with car mode share also reducing in all model scenarios. As such, the reduction in private vehicles will reduce congestion on some road links and junctions, resulting in journey time savings on the road network. During the operational phase, minimal volumes of HGVs will be associated with the Project and overall improved traffic conditions would be expected to benefit An Post's operations.      |
| 4                                                                                                          | Potential Land Acquisition                      | 3        | The GPO has been identified as ‘Substratum land which maybe acquired’ for the MetroLink Project. The GPO serves as the Headquarters for An Post, as well as being the location of a strategic postal retail unit for the public and as a visitor experience centre. In this regard, An Post, as the licensee of the GPO, wishes to highlight potential concerns around the provision of the MetroLink route below the GPO via tunnel.                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | The proposed acquisition of substratum land beneath part of the GPO building is necessary for the construction of the Metrolink tunnel. Response (5) below explains the environmental impact assessment that has been undertaken to assess the potential impacts of construction on the GPO and the proposed mitigations to manage these impacts.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

| Submission No.                                                                                             |                            |          | 007                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |  |

| Re: Railway (Metrolink–Estuary to Charlemont via Dublin Airport) Order 2022 An Bord Pleanála Ref No 314724 |                            |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |  |
| 5                                                                                                          | Potential Land Acquisition | 3        | <p>The GPO is a Protected Structure (under Ref. 6010) and is also located within a Conservation Area and the O’Connell Street Architectural Conservation Area, which is subject to a Scheme of Special Planning Control. The GPO is also considered as a building of national importance by the National Inventory of Architectural Heritage (Ref. No. 50010528). As such, the GPO plays an important archaeological and architectural heritage role within the Dublin City landscape, being one of the most important architectural landmarks on O’Connell Street and must be recognised as part of the provision of the MetroLink. In this regard, any potential disturbance which the boring of a tunnel underneath this Protected Structure must be fully assessed in terms of the archaeological and architectural significance of this building, as well as from a user operation perspective during such construction works.</p> | <p>TII have assessed the potential impact of MetroLink construction on property, including the GPO, to ensure impacts are mitigated wherever possible and that this important building is not damaged. This includes the impact of noise and vibration from the tunnel boring machine (TBM), and construction generated ground movements leading to settlement and possible building and property movement. All of which have been assessed and reported in the EIAR, and are summarised below.</p> <p>EIAR Appendix A 5.17, Building Damage Report, covers the assessed impacts of construction generated ground movements and settlement on property. Table 5.2 of this reports shows that the GPO has been assessed as falling within the 'slight damage' category currently, an explanation for which can be found in T.4-4 of the aforementioned report. Recognising the cultural and historical significance of the GPO, the building has been designated "special" and hence a further Stage 3 refined assessment will be undertaken that will take account of final design and construction methodology details, most likely utilising advanced numerical modelling techniques, and further surveys of the building that will be undertaken by structural, conservation and architectural specialists experienced in this type of building. The results of this refined assessment typically show that earlier assessments are conservative and over estimate the likely impact of construction generated ground movements.</p> <p>As is the case with several building along the MetroLink route the GPO is of critical national importance, TII will implement building monitoring regime to monitor building settlement affects pre during and post construction. The monitoring regime will be agreed with An Post in advance of construction commencement.</p> <p>EIAR Chapter 14.4.1.8 AZ4, Groundborne Noise during Construction. Table 14.29 presents the predicted noise levels during TBM Passage compared to the acceptable noise threshold values for the GPO. The results of the calculations presented in Table 14.29 show the LAmax,s for TBM Passage at the GPO has a value of 50 dB, while the acceptable Threshold Level for this building is 45 dB, resulting in a significant impact on the buildings operation for a limited duration during TBM passage. Unfortunately, there are no effective methods available to reduce groundborne noise or vibration from the TBM at source, but noting that the duration of this impact will be of the order of up to two-weeks as the TBM passes. TII will liaise with An Post to ensure the timing of these impacts are known.</p> <p>EIAR Chapter 14.4.1.9 AZ4, Groundborne Vibration during Construction. Table 14.32 presents the predicted vibration levels during TBM Passage compared to the acceptable threshold values for vibration for the GPO. The predicted vibration presented in Table 14.32 shows the VDV (Vibration Dose Value is a parameter that combines the magnitude of vibration and the time for which it occurs) for TBM Passage at the GPO has a value of 0.269 m/s-1.75 which is lower than the VDV Threshold Level for this building of 1.6 m/s-1.75, meaning there will be no significant impact on the building's operation.</p> <p>The GPO will be a property where pre-construction condition surveys will be undertaken, subject to the property owners permission, and any required pre-construction repair work identified and undertaken. Monitoring instrumentation will also be used throughout the works to monitor potential environmental impacts, including those discussed above to ensure that acceptable limits are not breached, noting that groundborne noise generated by the TBM will be of a temporary limited duration that will be managed through close liaison with An Post. TII also confirm they will continue to liaise with An Post to ensure disruption is kept to a minimum.</p> |  |
| 6                                                                                                          | Conclusion                 | 4        | As a Semi-State authority, An Post wishes to be continuously consulted on the MetroLink Project. We are available for discussion on any of the matters referred to below and would also appreciate if you could confirm receipt of this submission by return.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | TII will update An Post with developments during the Project and will continue to ensure that impacts are minimised during and post construction in accordance with the above responses.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |  |

Dublin |                                                           |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |  |
| 1                                                                                                                                                        | 1 Intro and Overarching Comments                          | 1        | We welcome the overall proposal as it is a long overdue strategic priority for the improvement and expansion of the public transport network in and around Dublin                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | TII welcome your support for the project.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |  |
| 2                                                                                                                                                        | 1 Intro and Overarching Comments                          | 1        | The proposal needs to be integrated with a wider transportation initiative for the catchment area to reduce private car use and dependence, including the promotion of cycle-and-ride to use the Metrolink stations.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | As detailed in Chapter 6 (MetroLink Operations and Maintenance), the proposed Project has been designed to ensure maximum interchange with other modes of transport, specifically other sustainable modes of transport such as walking, cycling and public transport. All operational stations will have pedestrian and cycle access, with bus stops located either adjacent to or within the site to facilitate integration with MetroLink. Interchange with Luas and rail/DART has been a key consideration for station locations, as presented in Chapter 7 (Consideration of Alternatives). Station designs include cycle parking provision in the immediate vicinity of stations.              |  |
| 3                                                                                                                                                        | 1 Intro and Overarching Comments                          | 1        | <p>The remainder of our submission concerns options for the Tara Station due to considerations about the loss of community infrastructure and city centre residential accommodation.</p> <p>The applicant, Transport Infrastructure Ireland (TII), in its Preferred Route - Public Consultation Document - March 2019, stated: "<i>Tara is an important station as Metro Link will interconnect with DART and Iarnrod Eireann services here, one of the major strategies behind the new alignment. The Emerging Preferred Route necessitated acquiring and demolishing the College Gate complex and the Sport and Fitness Markievicz centre owned by Dublin City Council. While the site would be available afterwards for new development, the loss of the current apartment block and valued public amenity is a serious impact. As the financial and social costs here are so high, we've spent significant time and resources investigating alternatives. TII have therefore reluctantly concluded that the original proposal remains the most feasible option for construction of the MetroLink station at Tara Street. We realise this has a severe impact and will take whatever measures we can to mitigate the impact on the residents and users of the fitness centre.</i>"</p> <p>The following sections of our submission will focus on engineering project risks and constraints for the selected option for Tara Station, which involves the demolishing the College Gate complex and the Markievicz Sport and Fitness Centre as well as two alternative design options, which would allow for its retention, if deemed appropriate.</p> | See responses below.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |  |
| 4                                                                                                                                                        | 3 Alternatives to Demolition of the College Gate Building | 3        | We will now review the alternative designs for Tara Station, which were listed in the Preferred Route Design Development Report (PRDDR),but were not recommended for a variety of engineering based constraints mentioned above, which we recommend be reviewed by the Board. These are a modified version of Option3 Station moved southwards, which we suggest be considered if constructed as per option 4, to mitigate the major concerns outlined in the PRDDR.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | Please note that the Option 3a as discussed in the EIAR is a modified version of Option 3 with mining as per Option 4 to eliminate the need to divert the Townsend sewer. The concept design for this option showed that there was insufficient clearance beneath the sewer to allow for the requisite station facilities and hence this option did not work. So, the suggested alternative has been assessed. This is clearly explained in Section 7.7.10.9.1 of EIAR Chapter 7. It is further noted that impacts on the Townsend sewer would remain. Please note the mining would be required to be undertaken 24/7 and hence result in similar impacts as Option 4 as discussed above in Item 5. |  |

         |          | 008                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| 5                                                                                                                                                        | 3.1 Option 4 Mined Station at the Preferred Location | 5        | <p>The PRDDR states in Section 4.2:</p> <p><i>"Option 4 involves the mining of a cavern below the existing College Gate building, which carries substantially more safety risks during its construction than all the other options. Whilst the initial construction cost would be slightly more than Option 0, the potential for additional risk and cost associated with mining could easily lead to increased costs during construction and it could be expected that the tendered cost would make allowance for such risk. While Option 4 would retain the College Gate building there would be significant disturbance to residents because of the shaft construction directly adjacent to the building and the mining of the tunnel directly underneath part of the building. These construction activities are estimated to take up to 2 years. During this period there would be risk to the building from the mining activities including potential for structural damage, and significant construction disturbance, including noise and vibration, such that it is envisaged that this would require moving everyone out of the building during construction for a period of up to two years."</i></p> <p>TII state that for the above reasons Option 4 is not recommended. However, the listed Project Risks and Constraints have been successfully mitigated on other underground metro stations, in other jurisdictions, where similar construction techniques were utilised, where it was required to retain specific structures. We would suggest that Option 4 for Tara Station could be successfully implemented, once again here. We would therefore recommend that Option 4 be considered, if An Bord Pleanála deem that the College Gate building should be retained.</p> | <p>Please refer to response (4) below in relation to the consultation with residential property/landowners and residents associations that has taken place throughout the duration of the Project.</p> <p>Chapter 07 (Consideration of Alternatives) details the decision-making process that has led to the development of the proposed Project, including the route alignment and station locations. Appendix A7.2 Tara Street Station Report presents in detail the various options that were considered by TII for this location.</p> <p>Concerns had been raised during the public consultation on the Emerging Preferred Route (EPR) regarding the demolition required for the station in the location proposed, and concerns were again raised during the consultation on the Preferred Route. A number of alternative station locations were considered to try and address these concerns. Option 0 is the proposed station location, with a further 11 options assessed. Three options as submitted by College Gate residents, with the station relocated either to the north or south of the EPR proposed location, have been reviewed in detail. In addition, other options developed through the Preferred Route design process including a mined option and realignment of the route to the east of Tara Street Station have also been reviewed. All were assessed against the EPR proposed station location (Option 0) as a base case, adjusted to suit the single bore and reduced station box length.</p> <p>The various options were taken through a Mutli Criteria Analysis to compare aspects of each different option. Assessment of options considered the viability of the rail alignment, the quality/ease of interchange with Tara DART Station (a key requirement given that this will be one of the busiest stations on MetroLink with high passenger interchange with the DART), demolition/construction impacts (including minimising impacts on the existing DART infrastructure/operations), other environmental and planning issues, including traffic and utility impacts, and urban integration, health and safety issues, and potential construction costs.</p> <p>A mined station option at Tara was considered as a solution to avoid the demolition of the College Gate building. The option comprises the construction of two deep shafts either side and immediately adjacent to the College Gate apartments to provide construction access for mining the tunnel under College Gate apartments and to subsequently provide permanent access, ventilation and back of house facilities for the operation of the station. It was established that 24 hour working would be the only realistically feasible approach to construct the cavern. Therefore, the nature of the work, drill and blast and mechanical excavation would generate a level of groundborne noise and vibration that would mean it would not be reasonable to inhabit the College Gate apartment block due to the disturbance caused, leading to a relocation of residents for a minimum of two years. However, there are possible risks that could extend the duration further, and therefore this option has a similar impact on College Gate residents as the cut and cover preferred option. TII consider that when balanced against the significant direct construction cost increase compared to the preferred cut and cover option, that demolition and redevelopment of the area around the site of the proposed Tara Station as part of the wider integrated development and regeneration of the site provides a better option. The mined option also performs wors economically with a much greater risk allowance required compared to the preferred cut and cover option, and the preferred proposed cut and cover station provides a higher quality operational station that is consistent with the MetroLink architectural vision and operational and maintenance strategy.</p> <p>This assessment has identified that for a number of reasons including constructability, cost, and retention of a good interchange facility, that Option 0, including demolition of College Gate and Markiewicz Centre, remains the preferred station location:</p> <ul style="list-style-type: none"><li>* This location retains a good interchange facility with Tara DART Station;</li><li>* It reduces risk to the overall construction programme;</li><li>* It offers cheaper overall construction cost;</li><li>* It retains opportunity for future adjacent development by others;</li></ul> |

| Submission No.                                                                                                                                           |                                                                                                             |          | 008                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |  |

| Letter Re: Railway Order Application- Metro North: Estuary through Swords, Dublin Airport, Ballymun, Glasnevin and City Centre to Charlemont, Co. Dublin |                                                                                                             |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |  |
|                                                                                                                                                          |                                                                                                             |          | (5) continued                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | TII will continue to work with DCC in relation to the development of an alternative sports and recreational facility to replace the Markiewicz leisure centre and intends to fund the alternative. However, TII does not have control over that development, which is part of DCC's function to provide public sport and recreational facilities in its function area. DCC may or may not be in a position to deliver it in parallel with the MetroLink project. Accordingly, the Board should assess the MetroLink project on the basis that the alternative may not be available. The impact would then be significant, but nonetheless one that would not outweigh the strategic scale long term benefits that MetroLink will deliver. |  |
| 6                                                                                                                                                        | 3.2 Option 3 Station Moved Southwards                                                                       | 5        | Here, it is proposed to move the station box towards the south and amending the station box alignment to be parallel to the overhead train infrastructure, which would be result in minor, re-alignment of the Metrolink route. Open box construction (similar to Option 0) was to create the station shape and all properties on the station footprint would need to be acquired.<br>The PRDDR states: <i>"Agreement and design details would need to be finalized with adjacent property owners to integrate the station box and above ground elements in the development, including access points, emergency exits and ventilation shafts... Passenger transfer to the DART Tara Street Station would use the existing southern access, which would need to change from a peak hour access to a permanent access."</i><br>Once again Tara Station will act as a multi-modal interchange station between Metrolink and DART railway line. The main point of interchange between the two stations will be via the southern entrance to Tara Station.                                                                                                                                                         | No response required.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |  |
| 7                                                                                                                                                        | 3.2.1 project Risks and Constraints                                                                         | 5        | As stated in the PRDDR: <i>"Buildings at Townsend Street and Spring Garden Lane would need to be demolished with Townsend St. and Spring Garden Lane closed during construction. Agreement and design details would need to be finalised with adjacent property owners to integrate the station box and above ground elements in the development, including access points, emergency exits. Passenger transfer to the DART Tara Street Station would use the existing southern access, which would need to change from a peak hour access to a permanent access. Townsend St. and Spring Garden Lane closed during construction. Significant impact on East/ West cycle movements.</i><br>This option would also directly impact existing large sewers along Townsend Street (including a 2.4m circular brick foul sewer and 1.2m circular concrete foul sewer) which would require diversion. TII deemed this diversion unlikely to receive approval from Irish Water.<br>In the PRDDR Assessment Summary, TII deemed option 3 not recommended due to traffic disruption during construction, this utility diversion and significant property entire city block between Tara Street and Corn Exchange Place. | No response required.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |  |
| 8                                                                                                                                                        | 3.3 Option 3A. Suggested alternative to Option 3 (using impacts to the construction techniques of option 4) | 6        | By adopted same construction methodology of option 4 construction and the major disruption with the diverting of mains sewers, the closing of Townsend Street to traffic during construction and the building on Spring Garden Lane needing to be demolished could be mitigated. Also, as per options 0 and 4, Tara Station will act as a multi-modal interchange station between Metrolink and DART railway line. The main point of interchange between the two stations will be via the southern entrance to Tara Station, with MetroLink access remaining as per option 3.<br>Although the same construction methodology of option 4 would involve mitigating similar engineering related constraints and risks as per this option, but as per our comments on option 4, these Project Risks and Constraints have been successfully mitigated on other underground metro stations, elsewhere, and we would therefore recommend that Option 3A be considered, as an alternative to Option 4, if An Bord Pleanála deem that the College Gate building should be retained.                                                                                                                                    | Refer to Item 4.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |  |

| Submission No.                                                                                                                                           |                                            |          | 008                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

| Letter Re: Railway Order Application- Metro North: Estuary through Swords, Dublin Airport, Ballymun, Glasnevin and City Centre to Charlemont, Co. Dublin |                                            |          |                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 9                                                                                                                                                        | 4. Replacement of Community Infrastructure | 7        | Should the subject project proceed as proposed in the application, it is submitted that the Markievicz Sport and Fitness Centre should be replaced elsewhere in the local area as part of the Metrolink project, given the Centre's importance as a community resource. It also submitted that further consideration is required regarding the loss of the substantial number of city centre residential units in the College Gate building. | <p>As noted in Chapter 21 (Land Take), TII will offer compensation to property owners for land that is deemed to be acquired land in accordance with the general compulsory purchase code. Compensation will be provided through the Compulsory Purchase Order (CPO) process. In recognition of the impact on residential cases where properties are to be acquired and given the unique circumstances surrounding the proposed impacts to College Gate apartment complex, TII will engage the services of a property advisory company to engage directly with property owners who are impacted by the MetroLink proposals. Property owners will be invited to participate in a discretionary scheme which provides an opportunity to negotiate and reach a 'Pre-Agreement' on both a baseline residential unit price and other matters of compensation that an owner would normally be entitled to under the compensation code. This will provide the parties with as much certainty as possible at an early stage.</p> <p>As noted above TII are engaging with DCC in relation to the Markiewicz Leisure Centre.</p> |

| Letter Re: Observation on a Strategic Infrastructure Development Application |                                        |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |  |
| 1                                                                            | Observation Details                    | 1        | <p>Our observations relate to the following areas:</p> <p>1. Project Governance and Consultation</p> <p>2. Negative impact of construction phase</p> <p>3. Design and layout of station</p> <p>4. Restoration and Operational Phase</p> <p>The observations should be read in the context of the duration and scale of the project and consequent exposure of residents near Mater Station to major disruption, including significant levels of noise and air pollution, for almost a decade.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | <p>Thank you for your submission and for sharing your observations with regards to the MetroLink project.</p> <p>As detailed in EIAR Chapter 5, MetroLink Construction Phase, the programme for the construction of the proposed Project has been optimised to minimise the duration of the Construction Phase in order to lessen the duration of potential environment impacts, while ensuring that the areas surrounding the work sites remain operational and functional. Work will run concurrently at all MetroLink site locations to ensure the Project is delivered in an effective and timely manner.</p> <p>Once a contractor has been appointed, TII will seek to further optimise the programme with a view to reducing the overall duration of works at all stations, including the proposed Mater Station. TII will consult with stakeholders on any such proposals received from the contractor.</p> <p>Please refer to response item (8) and (9) below in relation to the anticipated levels of groundborne and airborne noise and vibration, and to response item (10) regarding impacts on air pollution.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |  |
| 2                                                                            | 1. Project Governance and Consultation | 1        | <p>The project governance structure is unclear, particularly in relation to engagement with residents. This is of particular concern as it is proposed that this project will be advanced using a Public Private Partnership Model, with a Special Purpose Vehicle formed solely for the delivery of the MetrLink project. The roles and responsibilities of the proposed SPV, subcontractors, Transport Infrastructure Ireland, National Transport Authority, Department of Transport and Dublin City Council are not defined. We are concerned that this may result in local residents finding themselves referred between the various public bodies and private companies involved when issues arise.</p> <p>Our home is located less than 3.5 metres from the construction site boundary and is identified as being exposed to significant noise disruption (75-80 CNL) for an extended period. However, there has been no consultation or contact whatsoever with us as residents over the past three years. That, and the reliance on the statutory minimum consultation period following the publication of the Railway Order, raises fears about the seriousness with which public engagement, as required under the planning process, is being taken.</p> | <p>The National Roads Authority is the Approving Authority for the MetroLink project. Transport Infrastructure Ireland is the Sponsoring Agency for the project with full accountability and responsibility for delivering the MetroLink Scheme. All contractors appointed to the scheme whether public private partnership, design and build contractor will be contracted directly to Transport Infrastructure Ireland to carry out the works. TII will coordinate closely with Fingal Co Council and Dublin City council during the implementation of all works within their respective boundaries.</p> <p>EIAR Chapter 8 (Consultation), details the consultation with Berkeley Road Residents Association around the Mater Station prior to the submission of the Railway Order. The chapter documents the extent and nature of public, stakeholder and landowner consultation and participation that has taken place over the course of the project's development, including through a number of non-statutory consultation periods. It is intended that the consultation undertaken in respect of the MetroLink project will, when the railway order application process is complete, fully meet the requirements of the Aarhus Convention, Codified EIA Directive, and Irish national legislation. TII have listened carefully to the concerns raised by stakeholders and the community in preparing the detail for the extensive Environmental Impact Assessment that identifies and addresses environmental concerns including proposed mitigations to reduce environmental impacts during the construction and operational phase of the Project.</p> <p>Appendix A5.1 Outline CEMP details the proposed external communication with the public and key stakeholders during the construction phase. TII and the contractor(s) will take all reasonable steps to engage with stakeholders in the local community, especially those who may be affected by the construction works including residents, businesses, community resources and specific vulnerable groups. Please refer to response item (3) below in relation to the proposed Stakeholder Communications Plan during the construction phase.</p> |  |

| Letter Re: Observation on a Strategic Infrastructure Development Application |                                                        |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| 3                                                                            | 1. Project Governance and Consultation - Remedy Sought | 1        | <p>a) TII/NTA and their parent department to develop a comprehensive plan for community liaison on aspects of the development before construction begins, potentially as part of any detailed design, planning, and procurement phase - this to include direct contacts with those in the community most impacted by the development.</p> <p>b) A liaison committee to be established that includes residents, representatives from relevant public bodies and, eventually, the PPP Co./lead contractor, with terms of reference which are agreed with local residents groups.</p> | <p>Appendix A5.1 Outline CEMP details the proposed external communication with the public and key stakeholders during the construction phase. TII and the contractor(s) will take all reasonable steps to engage with stakeholders in the local community, especially those who may be affected by the construction works including residents, businesses, community resources and specific vulnerable groups.</p> <p>The contractor(s) will be responsible for putting in place a Stakeholder Communications Plan which will be developed under the consent of a designated Public Liaison Officer (or equivalent officer) appointed by TII. This plan will provide a two-way mechanism for members of the public to communicate with a designated member of the contractor(s)'s staff and for the contractor(s) to communicate important information on various aspects of the proposed Project to the general public. The principle component of a Stakeholder Communications Plan will include:</p> <ul style="list-style-type: none"><li>* Procedures to inform members of the community directly affected by the Construction Phase on schedules for any activity of a particularly disruptive nature which is likely to impinge on their person or property e.g. blasting, demolition, pile driving and any mitigating actions that are being taken (shielding, restriction on work hours) to minimise such disruption.</li><li>* For the tunnel boring, TII will establish a website to provide information on the forecast and actual passage of the tunnel boring machine. The contractor(s) will distribute leaflets to properties, affected parties, giving such notice along the tunnelling alignment, along with details of the first point of contact for any queries.</li><li>* The contractor(s) will coordinate preconstruction defect surveys for identified properties, liaising (in conjunction with the employer) with the building surveyor employed to carry out the surveys and maintaining a dialogue with the relevant property owners throughout the duration of works.</li></ul> <p>TII will establish coordination and communication meetings with key stakeholders. The contractor(s) will attend these meetings as required and arrange other meetings where necessary. Any plans which have been approved by TII will be issued to the relevant stakeholders, including the Airborne and Groundborne Noise Mitigation Policy.</p> |
| 4                                                                            | 2. Construction Phase                                  | 2        | <p>The construction phase for the Mater site is estimated to be 105 months or 8.75 years according to tables presented in Appendix 5.3. It is noted that there is reference to a construction period of five or six years at other points in the documentation, and it would be useful for TII to provide clarity on this point and correct the documents accordingly to allow for proper consideration.</p>                                                                                                                                                                       | <p>The programme for the construction of the proposed Project has been optimised to minimise the duration of the Construction Phase, where possible, in order to lessen the duration of potential environmental impacts, while ensuring that the areas surrounding the works sites remain operational and functional.</p> <p>A summary programme showing the duration and phasing for construction of the proposed stations and surface works along the alignment is shown in Chapter 5 MetroLink Construction Phase Diagram 5.4. of the EIAR. This shows the duration that each of the proposed construction compounds will be in place, while Appendix A5.2 provides more detailed, including the tunnelling elements. For Mater Station Compound/Deep Station construction the estimated programme is 105 months, that includes the following elements of the works anticipated at Mater: Advance Enabling Works; Main Works to Station; Station Fitout and Completion. It is anticipated that first two stages of the works at Mater, the Advance Enabling Works and Main Works to Station, will take up to 6 years to complete.</p> <p>The indicative construction programme has been developed based on experience on similar major infrastructure projects such as High Speed 1 in the United Kingdom (UK), Crossrail (UK) and Madrid Metro in Spain.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

| Letter Re: Observation on a Strategic Infrastructure Development Application |                                      |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| 5                                                                            | 2. Construction Phase                | 2        | <p>For almost the entirety of the construction period, 19 Berkeley Road will in close proximity to a major construction site. During construction of the western vent shaft, the site will be within 3.5 metres of our home (Appendix 5.3, Figure 8-38 Mater Station Stage 2 - Commission TTM Phase 1). We are concerned about the impact on our living conditions, health, our enjoyment of our home and the impact on working from home. We note the extended duration of the construction phase and the possibility that our personal circumstances may change over that period.</p> | <p>TII acknowledge the concerns you may have around the proximity of your property to the construction site at Mater Station. Potential impacts associated with the construction phase activities of the proposed Project on the residences and businesses are addressed in Chapter 11 (Population &amp; Land Use) of the EIAR, with mitigation measures proposed where required. The Mater construction site will be located in Four Masters Park. This will give rise to inconveniences and disturbances affecting activities and services at a localised level and Berkeley Street in particular. This includes potential noise and vibration impacts from construction activities as detailed in Chapter 13 (Airborne Noise &amp; Vibration) and Chapter 14 (Groundborne Noise &amp; Vibration), disturbances to the local road network as detailed in Chapter 9 (Traffic &amp; Transport), and dust risk as detailed in Chapter 16 (Air Quality). Further details are provided below (See response 4, 5 and 6).</p> <p>Measures to mitigate and monitor these impacts as a result of construction activity across the proposed Project are detailed in Chapter 5 (MetroLink Construction Phase) and summarised in Chapter 31 (Summaries of the Route Wide Mitigation &amp; Monitoring Proposed).</p> <p>Additionally, the appointed contractor will prepare detailed design and construction methodologies in the form of a detailed Construction Environmental Management Plan (CEMP) to ensure all environmental impacts are managed and mitigated in accordance with the EIAR and Railway Order, assuming an Enforceable Railway Order is granted. This detailed CEMP(s) will be provided to DCC for consultation and approval in advance of any construction works on site. An Outline CEMP is included in Appendix A5.1 of the EIAR that will be developed further by the appointed contractors. Monitoring instrumentation will also be used throughout the works to monitor potential environmental impacts, including those discussed above to ensure that acceptable limits are not breached. As noted in response item (3), a two-way liaison will be facilitated between local stakeholders and the contractor(s) and therefore there will be an opportunity to raise any concerns or highlight changes in circumstances.</p> |
| 6                                                                            | 2. Construction Phase - Western Vent | 2        | <p>There are inconsistencies in the documentation with regard to the location of the vent - drawings in the relevant Appendix would suggest the site of this shaft is outside no 18 Berkeley Road, but the text of the EIAR refers to it being outside no's 20-21 Berkeley Road. Again, clarity would be helpful but in either case, the secondary construction site will be within 3.5 metres of our home for extended periods of time.</p> <p>Remedy Sought: a) That the western vent shaft be relocated to the Metro side of Berkeley Road.</p>                                      | <p>On the western side of Berkeley Road and north of the junction with Sarsfield Street, a ventilation shaft will be constructed as part of the Mater Station under Berkeley Road, and in front of No 18 and 19. The footpath will be reinstated on completion, but the existing parking at this location will be removed. TII do not accept that there is inconsistency in respect to the location of the ventilation shaft.</p> <p>Ideally, and like the vast majority of the MetroLink deep stations, the ventilation shaft would be an integral part of the main structure. However, with limited space to build the station under the park and surrounding roads, a ventilation shaft located on the north west corner of the structure would protrude up into Berkeley Road, and therefore would require the road to be diverted permanently around it where there is limited space to do so. Its proposed location, whilst not ideal from the prospective of the impact on your property during construction and loss of a parking bay, will in the long term be a preferred location as it allows the streetscape to be returned to its pre-construction layout upon completion.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

| Letter Re: Observation on a Strategic Infrastructure Development Application |                                       |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| 7                                                                            | 2. Construction Phase - Working Hours | 2        | <p>Given the scale of the works and the extended duration of the construction project, to request working hours of 07.00-19.00 weekdays and 07.00-13.00 hours Saturdays for almost a decade is unreasonable and would place an intolerable burden on us and the local community in terms of health impact and disruption. <i>5.1 Outline CEMP</i> indicates that site set-up and shutdown takes place within this 7-7 window whereas the <i>EIAR Non-Technical summary (7.1.1 Working Hours)</i> indicates that these hours are exclusive of site preparation time. Once more, TII need to provide clarity on this point to allow for consideration.</p> <p>Remedy Sought: b) A restriction on the types of work that can be conducted on weekends or early mornings/late evenings with stricter conditions around noise etc. applying at those times.</p> <p>c) That site set-up and shut-down is undertaken between 7 and 7 pm.</p> | <p>Standard working hours will apply at the Mater Station construction site, from Monday to Friday 0700 to 1900, Saturday 0700 to 1300. To clarify, these times allow for 30 minutes of set up and set down on the shift, so the site activities are effectively from 0730-1830 in a normal week day, and 0730-1230 on Saturdays.</p> <p>The proposed working hours and planned activities for Mater are set out in Table 5.5 of Chapter 5. Any changes to the proposed working hours at Mater would have significant impact on the duration of the works.</p> <p>The works immediately outside of your property are scheduled to take place in the first year of the Main works construction programme on a standard working hours basis and thereafter all of the remaining construction activities will be confined within the existing park on the opposite side of Berkeley Road.</p> <p>Once the main station structures works are completed, the programme assumption and rationale for all 24/7 working on activities such as station fitout, MEP (Mechanical, Electrical and Plumbing), TBM (Tunnel Boring Machine) strip out and clean and track laying, is that all are critical path activities through the tunnel and station. These activities also take place with the benefit of being confined inside the completed structure, which assists in minimising any impact from these activities. The overall programme completion would be impacted significantly should these activities progress on a standard hours basis only. While activities below ground are progressed on a 24/7 basis, site level activities such as deliveries, etc. will be limited to standard working hours (Chapter 5, Section 5.5.17.3) to further minimise impact.</p> |

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| Letter Re: Observation on a Strategic Infrastructure Development Application |                                         |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| 8                                                                            | 2. Construction Phase - Noise pollution | 2        | <p>The EIAR is clear the impact of the construction programme, especially noise, will be significant despite the use of mitigation measures. The independent advisors (RINA) estimate that Nos. 19-22 will experience noise levels of 75-80 (significant or very significant) for 15 months. Exposure to noise at this level for more than 40 hours per week is considered damaging to hearing. It is also the case that noise pollution is not just a matter of volume as focused on by the EIAR but a matter of tone, frequency, longevity etc.</p> <p>The Environmental Protection Agency Act 1992, Environmental Noise Regulations 2002 and EU Directive 2002/49/EC would all seem to apply to various degrees, and there is a particular obligation on local authorities under the Directive to make action plans to reduce ambient noise. It is noted that various mitigation measures are identified (but not necessarily promised) in documentation and that an Airborne Noise and Ground Noise Mitigation Policy is included in the suite of documents. However, this latter document is vague and wholly inadequate in terms of assuaging our concerns. We note that the provisions made for rehousing residents impacted heavily for extended duration by works seem inadequate.</p> | <p>Potential impacts associated with noise and vibration during the construction and operational phase of MetroLink are addressed in EIAR Chapter 13, Airborne Noise &amp; Vibration, with mitigation measures proposed where required. EIAR Chapter 14, Groundborne Noise and Vibration includes the specific control measures proposed across the Project to control vibration sources with the potential to result in disturbance to building occupants or building damage.</p> <p>Airborne Noise and Vibration</p> <p>EIAR Chapter 13.5.2.6.6 Mater Station sets out the assessment of airborne noise and vibration during the construction of Mater Station and includes the consideration of a number of receptors on Berkeley Road, including no. 19.</p> <p>As stated in EIAR Chapter 13: Airborne Noise and Vibration, section 13.2.6.1.3, the principles for the management of Airborne Noise &amp; Vibration in the EIAR are based on BS 5228-1. Based on this standard the Construction Noise Threshold (CNT) was calculated for receptors on existing rounded ambient noise levels. In accordance with this standard, the CNT is set at 70 dBA at no. 19 Berkeley Road.</p> <p>The CNT threshold will be mandated to the contractors as set out in the EIAR. Before commencing works, contractors will then need to provide best practice mitigation to reduce the impacts. If the Contractor is unable to reduce the impacts sufficiently, and the residual levels are such that widespread community disturbance or interference with sleep is likely to occur, TII will consider whether the provision of further Noise Insulation (NI) or Temporary Rehousing (TRH) would be appropriate at locations where eligibility for either has been established. Please refer to the TII Airborne and Groundborne Noise Mitigation Policy (Appendix A14.6).</p> <p>Table 13.64 of Chapter 13 also presents the potential significant airborne noise impacts during the construction of Mater Station. At no. 19 Berkeley Road the Construction Noise Threshold set is predicted to be exceeded during a number of the earlier construction phases unless action is taken to mitigate. Mitigation in the form of plant selection, noise reduction at source and the provision of 4m high acoustic hoarding will reduce the impact, although it is possible that some residual impact may remain and would require further consideration in the form of the TII Airborne and Groundborne Noise Mitigation Policy.</p> <p>Prior to commencing construction, the appointed contractor undertaking the construction of the works at Mater will be required to undertake noise &amp; vibration monitoring at representative noise sensitive locations to evaluate and inform the control requirements and take specific noise abatement measures to the extent required and to comply with the recommendations of BS 5228-1 (BSI 2014a). In order to manage and mitigate airborne noise, the Contractor will be required to set out their proposals in the Construction Environmental Management Plan (CEMP), an outline of which is included in EIAR Appendix A5.1, and specifically Construction Noise and Vibration Management Plan (CNVMP) for Dublin City Council approval. The requirements for the control of Airborne Noise &amp; Vibration are included in section 6.2 Noise and Vibration. TII confirm that monitoring will be undertaken in accordance with the CNVMP. Monitoring and auditing will be transparent. It is envisaged that monitoring data and audit results will be presented and shared in community forums. TII will consider options for sharing that data and results with the public and stakeholders in a timely and transparent way which may include the use of online portals and tools. It proposes that is not fixed by way of condition so that the content and manner of can be adapted to the changing circumstances of the project over time.</p> |

| Letter Re: Observation on a Strategic Infrastructure Development Application |              |          |                                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
|                                                                              |              |          | (8) continued                                                        | <p>Groundborne Noise and Vibration</p> <p>EIAR Appendix 14.5 Groundborne Noise and Vibration Blasting Modelling Results presents predicted groundborne noise and vibration levels during the construction phase of the project for buildings on Berkeley Road. In summary:</p> <ul style="list-style-type: none"><li>* Predicted levels of groundborne noise during TBM passage is up to 47 dB LASmax, which is above the 45 dB LASmax threshold, resulting in a significant impact during the relatively short 2-week duration of the Tunnel Boring Machine - TBM's passage.</li><li>* Predicted levels of groundborne vibration during TBM passage is 0.226 ms-1.75, which is lower than the VDV (Vibration Dose Value is a parameter that combines the magnitude of vibration and the time for which it occurs) Threshold Level of 1.0 ms-1.75, resulting in a not significant impact on the building and its occupants.</li><li>* Predicted levels of groundborne noise during the mechanical excavation of Mater Station is up to 34 dB LASmax, which is below the 40 dB LASmax threshold, resulting in a not significant impact on the building occupants.</li><li>* Predicted levels of groundborne vibration during mechanical excavation of Mater Station is 0.002 ms-1.75, which is lower than the VDV Threshold Level of 0.8 ms-1.75, resulting in a not significant impact on building and its occupants.</li><li>* Predicted levels of vibration during blasting at Mater Station is up to 3.5 mm/s PPV, which is lower than the Threshold Level of 8 mm/s PPV, resulting in a not significant impact.</li></ul> <p>Unfortunately, there are no effective methods available to reduce groundborne noise from the TBM at source but noting that the duration of this impact will be temporary and of the order of up to two-weeks as the TBM passes. TII will undertake advanced consultation and stakeholder engagement to prepare people for the passing of the TBM. If required, further mitigation involving the potential for temporary relocation during the passing of the TBM can be assessed on a case-by-case basis as referred to in Appendix A14.6, section 2.2 and 4.0.</p> |

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| Letter Re: Observation on a Strategic Infrastructure Development Application |                                                         |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| 9                                                                            | 2. Construction Phase - Noise pollution - Remedy Sought | 3        | <p>d) Constant monitoring of noise levels on site with results made publicly accessible via a website or otherwise provided to residents.</p> <p>e) That the Railway Order be subject to the full and total implementation of all applicable noise pollution legislation, both national and European, at all times during the construction and operational phase. There should be a requirement to provide a plain English document detailing the challenges and responses in this regard, while a regular regime of environmental inspections by DCC should be set at the beginning of the project and residents should be notified of same.</p> <p>f) The Airborne Noise and Ground Noise Mitigation Policy put forward by TII should be subject to review by a liaison committee including representatives from the local community. This document, as currently framed, does not address our concerns and should be rewritten to clearly reflect the obligations that are imposed by legislation, identify how best practice approaches to noise management will be implemented and provide greater clarity around measures such as the potential need for rehousing.</p> <p>g) Comprehensive and meaningful provision for rehousing residents agreed through consultation with affected residents.</p> | <p>d) The Outline Construction Environmental Management Plan (Appendix A5.1) will also be used to manage the construction phase impacts. As part of the updated Construction Environmental Management Plan in advance of commencing construction, a Noise and Vibration Management and Control Plan (NVMCP) will be produced to include for specific working hour measures at sensitive locations. A full monitoring and auditing programme will form part of the CNVMP which will be agreed with the Local Authorities prior to the commencement of the Construction Phase. This document shall be prepared and submitted to DCC for approval. A plan will be developed by the contractor for each worksite, including Mater. TII confirm that monitoring will be undertaken in accordance with the CNVMP. Monitoring and auditing will be transparent. It is envisaged that monitoring data and audit results will be presented and shared in community forums. TII will consider options for sharing that data and results with the public and stakeholders in a timely and transparent way which may include the use of online portals and tools. It proposes that is not fixed by way of condition so that the content and manner of can be adapted to the changing circumstances of the project over time.</p> <p>e) While recognising that works carried out outside of standard hours might cause concern to residents, the impact on the human health around Mater Station as a consequence of the proposed works have been assessed and mitigations considered fully in the EIAR. The relevant chapters of the EIAR, for example Airborne Noise &amp; Vibration Chapter 13 provides information on the relevant assessments carried out and the impact mitigation proposed at this site. Chapter 10 of the EIAR sets out the human health impact assessment, which indicates no residual effects on health at Mater with the proposed mitigation measures implemented for noise (4m high hoarding).</p> <p>As noted in Chapter 13 (Airborne Noise and Vibration), the assessment has been undertaken with reference to the most appropriate guidance documents relation to environmental noise and vibration. There are no statutory standards in Ireland relating to noise and vibration limit values for construction works (or for environmental noise relating to the Operational Phase). In the absence of specific statutory Irish guidelines, the assessment has made reference to non-statutory national guidelines where available, in addition to international standards and guidelines relating to noise and/or vibration impact for environmental sources.</p> <p>Please refer to response item (3) in relation to the Stakeholder Communication Plan. As noted in Appendix A5.1 Outline CEMP, all information on the works will also be available on the proposed Project website.</p> <p>f) As noted in Appendix A5.1 Outline CEMP, any plans which have been approved by TII will be issued to the relevant stakeholders, including the Airborne and Groundborne Noise Mitigation Policy. As noted in item (e) above, there are no statutory standards in Ireland relating to noise and vibration limit values for construction works, and therefore obligations imposed by legislation are not present. The Airborne Noise and Groundborne Noise Mitigation Policy details the criteria for eligibility under the policy for temporary rehousing in section 3.3 of the document.</p> <p>g) Appendix A14.6 Airborne Noise and Groundborne Noise Mitigation Policy details the proposed temporary re-housing measures, including the eligibility criteria and details of compensation. Similarly, TII is committed to having a Property Owner Protection Scheme (POPS) in place prior to construction works commencing. The Property Owner Protection Scheme (POPS), committed to by TII, allows residential property owners to register with TII if their residential property is within thirty (30) metres of the edge of the MetroLink alignment or fifty (50) metres of station structures. The POPS comprises condition surveys of residential properties along the route of the proposed Project. The purpose of the condition surveys is to ascertain the condition of the properties before, during (if deemed necessary), and after the completion of the proposed Project to determine whether there has been any deterioration of any of the properties surveyed and whether same may be attributable to the proposed Project, and subsequently to recommend repairs as appropriate. Condition survey data gathered pre and post construction, and possibly during construction, will be used to assist the property owner and TII in swift and accurate verification of any property damage claims which may be received from property owners.</p> |

| Submission No.                                                               |                                     |          | 009                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

The POPS will be introduced by TII through public consultation and will be formally advised to eligible property owners by the Public Relations Department.</p> <p>Further information on POPS is available in Chapter 11 (Population &amp; Land Use). Useful information can also be found in the MetroLink Frequently Asked Questions document which can be found online at: <a href="https://www.metrolink.ie/en/your-property/property-owners-protection-scheme/">https://www.metrolink.ie/en/your-property/property-owners-protection-scheme/</a> , and this is where useful updates will be made available as the proposed Project progresses.</p> <p>In cases where parts of properties are occupied, access to the remaining unoccupied parts will be maintained, where it is possible and safe to do so. Protection such as hoarding will be used to ensure that the boundary of any construction site will be maintained, and damage would not occur outside of this boundary. Where damage could not be avoided, it would be repaired.</p> <p>Information regarding any situations requiring relocation and the process for financial compensation for property impacts directly related to the proposed Project is provided in Chapter 11 (Population &amp; Land Use) and Chapter 21 (Land Take) of the EIAR.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 10                                                                           | 2. Construction Phase - Air Quality | 3        | <p>National Policy Objective 64 of the 2040 Project Ireland 2040 National Planning Framework is to "<i>improve air quality and help prevent people being exposed to unacceptable levels of pollution in our urban and rural areas</i> ". In a submission to the Clean Air Strategy as part of the public consultation, the Public Health Institute of Ireland stated that they "<i>would strongly recommend that the Department adopts WHO recommended emission standards and benchmarks for air quality in Ireland. No level of air pollution is considered safe and so WHO emission standards provide a gold standard against which air quality in Ireland should be compared.</i> "</p> <p>These standard values are focused on the protection of human health, but the Railway Order contents itself with references to measures that "should" mitigate the worse effects rather than stronger language that would guarantee that the measures will be effective and "will" mitigate impacts.</p> <p>Remedy Sought: h) Constant monitoring of air pollution levels and results made publicly accessible via a website or otherwise provided to residents. There should be discrete, measurable obligations that form part of the planning permission. Air quality monitoring standards for the Mater stop construction should be brought in line with WHO recommended emission standards and benchmarks.</p> <p>i) In respect of any and all breaches of noise, light or air quality standards, the PPP Co./contractor should be subject to significant financial penalties that are used to compensate residents.</p> <p>j) That electric vehicles are used to minimise noise and air pollution in the area.</p> | <p>Please refer to the EIAR, Chapter 16 Air Quality, section 16.3.2 Relevant Guidelines, Policy and Legislation, which discusses the Environmental Protection Agency (EPA) guidelines that were considered and consulted in the preparation of this Chapter.</p> <p>h) EIAR Chapter 16 (Air Quality), assesses the likely effects of the Project on Air Quality during the construction phase with mitigation measures proposed where required. Air Quality during the construction phase will be impacted by traffic and dust emissions resulting from construction activities at the Mater Station site from Earthworks, Construction and Trackout (Maximum Daily HGV Movements). Section 16.5.2.6, Regional Air Quality Assessment – Construction Phase Southern Peak Scenario, has assessed traffic emissions pre-mitigation as being overall Neutral, Not Significant and short-term.</p> <p>Table 16.44 presents a summary of predicted dust emission magnitudes from the main construction sites, the results for the Mater Station site being:</p> <ul style="list-style-type: none"><li>- Earthworks - Large;</li><li>- Construction - Small;</li><li>- Trackout - Large;</li></ul> <p>This has resulted in defining the site-specific mitigation level as High and thus mitigation will be required. A detailed list of Dust Mitigation Best Practice Measures for each construction activity is presented in Appendix 16.4 Dust Management Plan.</p> <p>Strict dust prevention will be in place at all times to minimise any potential emissions and these procedures will be strictly monitored and assessed. In the event of dust nuisance occurring outside the site boundary, movements of materials likely to raise dust will be curtailed and satisfactory procedures implemented to rectify the problem before the resumption of construction operations.</p> <p>As specified in the response item above, before commencing relevant works, the Outline Construction Environmental Management Plan (Appendix A5.1) will also be used to manage the construction phase impacts. As part of the updated Construction Environmental Management Plan in advance of commencing construction, an Air Quality Management Plan will also be produced to include for specific working hour measures at sensitive locations. This document shall be prepared and submitted to DCC for approval. The plan will include all appropriate dust and emissions mitigation measures applicable to the circumstances of the relevant site, based on the local authority requirements and industry best practices. A plan will be developed by the contractor for each worksite, including Mater. The plan will be developed by the Contractor and for each worksite shall include:</p> <ul style="list-style-type: none"><li>* An inventory and timetable of activities which may give rise to emissions or dust;</li><li>* Alert levels and system to be used (including notification process);</li><li>* Details of control measures;</li><li>* Details of dust monitoring arrangements, including the location of sensitive receptors, monitoring locations, and monitoring equipment to be used; and</li><li>* Details of the air quality reporting requirements.</li></ul> |

| Submission No.                                                               |                                         |          | 009                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

| Letter Re: Observation on a Strategic Infrastructure Development Application |                                         |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|                                                                              |                                         |          | (10) continued                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | <p>The types of measures that will be implemented to manage dust will include the following:</p> <ul style="list-style-type: none"><li>•Material handling systems and site stockpiling of materials will be designed and laid out to minimise exposure to wind. Water misting or sprays will be used as required if particularly dusty activities are necessary during dry or windy periods;</li><li>•Any blasting will be completed by specialised contractors with a specific blasting dust management plan;</li><li>•Liaison with local authorities and community groups;</li><li>•Hoarding will be provided around the construction compounds; and</li><li>•It is anticipated that methods of collecting rainwater and recycling for general site use, will be adopted where practical. Requirements for dewatering installations at deep station and tunnel portals can also provide a valuable source of water for general site use.</li></ul> <p>i) As noted in response item (9, e) above, there are no statutory standards in Ireland relating to noise and vibration limit values for construction works (or for environmental noise relating to the Operational Phase). In relation to air quality, when dust minimisation measures are implemented, fugitive emissions of dust from the site are not predicted to be significant and pose no nuisance, human health or ecological risk to nearby receptors. The construction phase of the assessment identifies a generally negligible impact on air quality in the vicinity of the proposed Project. Therefore, overall, it is considered that the residual effects with the EPA Guidelines and considering the likely effects of emissions from the proposed Project construction, the likely effects overall are considered Neutral, Not Significant and Medium-Term. While there is no statutory basis for TII to impose financial penalties, the conditions of the RO will be legally binding on the contractor.</p> <p>j) Chapter 6 (MetroLink Operations and Maintenance) confirms that the rolling stock will be fully automated, and therefore will operate in a sustainable and environmentally manner. As presented in Chapter 16 (Air Quality), the air dispersion modelling assessment has found that in 2035 when the Project is operational, no receptors will have ambient air quality exceedances of the ambient air quality standards. Chapter 16 Air Quality, section 16.5.3.11, identifies that there are no substantial emissions within the tunnels as the trains or the operations do not generate significant emissions to air, therefore the main emission of ventilation shafts in normal operation is akin to warm air. The street level location of the grilles associated with the ventilation shafts is designed to minimise effects on pedestrians and near buildings. They are often situated in slightly elevated median strips (30cm) for drainage purposes or within green spaces, out of the normal transit of pedestrians or other sensitive receptors. Inlet and outlet ventilation grilles are separated in order to minimise the possibility of air recirculation. Consideration is also given to the potential for air pollution to enter from vehicles through the air intake system, in particular in more urban areas where pollutant concentrations are higher. Within the stations a system with air-quality sensors and ventilation controls can be utilised in order to ensure air quality within underground stations remains comfortable and at safe levels for human health. The assessment of noise during the Operational Phase of the Project (as presented in Chapter 13 Airborne Noise and Vibration) indicates that the calculated rail noise levels across the proposed Project are therefore not significant in terms of any widespread community disturbance and results in a not-significant to slight impact when added to the prevailing noise environment.</p> |
| 11                                                                           | 2. Construction Phase - Light Pollution | 3 and 4  | <p>An increased amount of light in the evening and at night is related to sleep deprivation, stress, anxiety, fatigue and other health problems. The construction compound and vent shaft will be presumably brightly lit to allow work during winter evenings. Again, as residents, our health is being jeopardised without any consultation or consideration.</p> <p>Remedy Sought: k) Planning permission conditions to ensure that there is no over-illumination, glare or light clutter on site and that lighting impacts be minimised with any and all floodlights turned off immediately at close of allowable construction period. Details of what measures will be taken in this regard should be provided to residents.</p> | <p>Light pollution can be a problem on construction sites where new or temporary lighting is installed and large areas flood lit, causing over illumination and nuisance. For construction sites to work effectively and safely, it is important that the sites are well lit, either by natural or artificial lighting. Lighting on MetroLink will therefore be designed to ensure that any artificial light emitted from a site does not prejudice health or create a nuisance. In the case of the site at Mater, the site lighting will be contained within the 4m high hoarding proposed at this location for the purpose of noise mitigation, with task lighting only used during the standard working hours. Outside of standard working hours and in the hours of darkness, site lighting similar to local street light will only be required and for the purposes of site security and access provision.</p> <p>Lighting will be positioned and directed so as not to intrude unnecessarily on adjacent buildings and land uses and to avoid unnecessary interference with local residents or passing road users.</p> <p>To ensure the light levels on construction sites are appropriate, the good practice use of light or lux meters to measure and check actual lighting levels on-site will be adopted. Measured values will be compared with relevant guidance for lighting in the workplace (refer to the EIAR Appendix 5.18, Construction Lighting). This would ensure that light pollution is mitigated whilst workers are protected with a safe level of lighting.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

Construction Phase - Vermin                        | 4        | <p>l) Plan for vermin management communicated to residents likely to be impacted.</p> <p>m) Provision made for rehousing during construction phases where there is a risk of vermin infestation.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | <p>Rodent control, good sanitation, disinfecting contaminated work areas, worker education via tool box talks and using personal protective equipment (PPE) when handling infected animals are important actions for prevention of Leptospirosis (or Weil's Disease).</p> <p>While rodents will be temporarily displaced as a result of initial construction activities, there is nothing in the Construction Phase which would lead to an increase in the number of rodents. It could be argued that with the rodent control policies in place, there will be a reduction in the level of rodents and the subsequent risk associated with Leptospirosis. As there will be no increase in vermin numbers and more likely a decrease because of vermin control measures, there will be no resulting increase in vermin transmitted disease over and no significant adverse effect on human health. Therefore, provisions for rehousing as a result of risk of vermin infestation are not required.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| 13                                                                           | 2. Construction Phase - Structural Impact on Property | 4        | <p>Number 19 Berkeley Road is typical of the residential housing stock in the area in that it is a two-storey red brick Victorian terrace house which, in keeping with the construction methods of the time, was built without deep foundations. The consequences of tunnelling, boring, blasting, and other heavy construction work in such close vicinity to the house is a cause of great concern. Again, it is important to stress that we will be exposed not only to the main construction works but a subsidiary project that will involve piling works and would seem to be significant in and of itself.</p> <p>Remedy Sought:</p> <p>n) Given the proximity of our house to the construction site, much greater clarity is required as to the structural risks being imposed. An obligation should be placed on the authorities bring forward this project to cover the reasonable costs of securing independent legal and engineering advice.</p> <p>o) A requirement of planning should be that some form of insurance bond should be lodged for 19 Berkeley Road and other similarly affected properties. This would be drawn on in the event that remedial work is necessary following construction and during the operation of the Metrolink and would protect residents in the event that the construction company cannot or will not compensate residents for damage. This should be separate to any other insurance that may be entered into by the PPP Co./contractor. Given issues that have emerged with regard to defective building works with serious health and safety implications (mica, apartment defects) and lack of redress for those impacted, we feel it is critical given the scale of this project, that individual homeowners are reassured that they are completely protected in the case of loss or damage.</p> | <p>n) A comprehensive Settlement Assessment has been undertaken to determine the potential impacts that construction of the proposed Project will have on sensitive receptors such as buildings and infrastructure from the advance of the TBM. The ground movement predictions and the building damage assessment methodology adopted for MetroLink is based on the approach adopted in most tunnel projects around the world, including London Crossrail and High Speed 2 in England. This is described in EIAR Section 5.4.11 (Ground Settlement Monitoring and Mitigation Works).</p> <p>Excavation for the tunnels and other below ground structures could potentially lead to ground movements at the surface and below ground. An assessment of the effects of ground movements and potential impacts on existing buildings has been carried out as part of the Scheme Design.</p> <p>The EIAR Appendix A 5.17 Building Damage Report, covers the assessed impacts of construction generated ground movements and settlement on property. Section 5.2 of this report sets out the rationale for the assessment of properties. The results of the assessment provided in Table 5.2 shows that your property Ref AB-47 has been assessed as falling within the '<i>Slight</i> ' category. The building risk categories shown in Table 4-4 of the aforementioned report are used to define the degree of building damage related to the Risk Category. As your building falls within Damage Category 2 or below, no protection works are anticipated for this building. However, as the foundations of your property are shallow, a Phase 3 assessment will be undertaken by the appointed Contractor on your property, the results of which and any requirements for monitoring and/or other mitigations that eventuate from that assessment will be shared with you in advance of commencing works.</p> <p>The Phase 3 assessment will take account of final design and construction methodology details. For the Phase 3 assessment, each building will be subject to detailed assessment on an individual basis. A detailed survey will be carried out as part of the Phase 3 assessment to provide the necessary additional information to inform this detailed analysis of how the individual elements of the building would be affected by the predicted ground movements. The method and extent of the detailed analysis will be determined on a case-by case basis and may include a more sophisticated semi-empirical or a detailed soil-structure interaction using finite element modelling methods. It is likely that the Phase 3 assessment will yield further improvement to the damage category determined by the Phase 2b assessment. The results of this refined assessment typically show that earlier assessments are conservative and over estimate the likely impact of construction generated ground movements.</p> <p>o) Please refer to response item (9) above related to POPS.</p> |

| Letter Re: Observation on a Strategic Infrastructure Development Application |                                |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| 14                                                                           | 2. Construction Phase - Access | 4        | <p>It appears that Construction Site B may impinge on pedestrian access to our home from Berkeley Road. The construction schedule suggests that Site B will be in operation for an extended period over two phases of the project. As well as personal access, this may make it difficult to arrange waste collection, meter readings, social or business visits, etc. Further, street parking outside the property will be permanently lost because of the project. This is a future cost that must be borne by us as residents and which will create difficulties for both for social and business visitors.</p> <p>Remedy Sought: p) That planning permission should make provision for unfettered street access to 19 Berkeley Road at all times and set out how waste collection, visits etc will be facilitated over the course of the construction period.</p> | <p>Whilst full access will be limited for a period of up to one year, it is not anticipated that construction works will prevent pedestrian access to any properties, 18 through to 22 Berkeley Road, while constructing the ventilation shaft structure outside 18 &amp; 19 Berkeley Road.</p> <p>Around the proposed Mater Station Works, Chapter 5 of the EIAR, MetroLink Construction Phase, details that traffic management plans for the construction phase of the Project have been developed to minimise the impact on road users, and to maintain access to residential properties and other premises. Prior to implementation, all traffic management measures will be agreed with Dublin City Council and where relevant, consultation with An Garda Síochána and other statutory stakeholders will be undertaken.</p> <p>The design of traffic management measures and highways works is based on achieving the key objective of maintaining continual access to all properties during the works. Where necessary, a safe alternative route will be provided for pedestrians and vulnerable road users, such as children, and persons with restricted mobility, to maintain pedestrian access to premises. Where detour routes are required, these will be kept as short as possible and detour signage will be clear and easy to understand. All construction sites will be designed to be as unobtrusive as possible.</p> <p>Regards parking availability, this is also covered by the EIAR in Chapter 9, section 9.6.1.2.4.5, Parking and Loading Construction Impact Assessment, with particular detail provided in EIAR Appendix A9.5 Scheme Traffic Management Plan, section 7.7.</p> <p>There will be slight impacts for loading and parking during the Enabling Works associated with Mater Station. These are in the form of a loss of parking bays for both on street loading facilities (loading bays outside 16 &amp; 17 Berkeley Street) and general parking. This loss of parking will at its peak be approximately 7 parking spaces, however generally only one or two spaces will be lost through the phasing of the work.</p> <p>During Phase 1 of the Main Works, the Pay and Display parking spaces along the eastern side of Berkeley Road will be removed, resulting in the removal of 12 on-street parking spaces. Approximately 5 on-street Pay and Display and Resident Permit parking spaces will be removed from the western side of Berkeley Road. A temporary location for the taxi rank will be agreed with DCC.</p> <p>During Phase 2 and 3 of the Main Works at Mater Station, the Pay and Display parking spaces along the eastern side of Berkeley Road will be removed. This will result in the removal of 12 on-street parking spaces. On the west side of Berkeley Road, five on-street Pay and Display and Resident Permit parking spaces will be removed as well as a loading bay that will be relocated.</p> <p>Proposed mitigation for the loss of parking on Berkeley Road will include monitoring of closures, considering if they are required at all stages of the construction phase, or if spaces can be reinstated temporarily throughout the works.</p> <p>Once MetroLink is operational, to accommodate the station entrance, the current footways and traffic lanes on Eccles Street will be realigned as part of the proposed Project. The realignment of Eccles Street, and the widening of the footway on Berkeley Road will result in the loss of on-street parking at both locations. Approximately 20 on-street parking spaces will be lost on Eccles Street, while approximately 14 spaces will be lost on Berkeley Road, due to the provision of a signalised crossing in proximity to the Station entrance. While there will be a loss of commercial and residential parking and loading infrastructure as a result of the proposed Project, the modal shift from road to public transport when the proposed Project is in place will reduce the overall demand on parking and loading facilities, thus reducing the severity of the impact.</p> |

| Submission No.                                                               |                        |          | 009                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 15                                                                           | 3. Location and Design | 5 and 6  | <p>The EIAR explicitly states at 4.9.23 that "<i>The station facilities at ground level will be integrated with the existing urban environment.</i> " As can be seen from the photomontages provided on the Railway Order application, this is not the case. The Mater station and associated infrastructure is obtrusive and unsympathetic to the Architectural Conservation Area within which it is sited. The design is of the proposed development is entirely out of character with the general appearance and character of the existing Victorian streetscape and the facade of the Mater Hospital. The industrial design and materials proposed are quite different to the surrounding buildings. The station and various associated work are extremely visually intrusive and will be the dominant feature of the Eccles Street/Berkeley Road intersection. It will irreversibly affect a unique and beautiful streetscape. This is contrary to good planning as identified in the EIAR itself, while the impact on residents in 18-22 Berkeley Road is especially pronounced as the station is just a few metres away and positioned in the direct line of front windows, thus having an extremely negative impact on the visual amenity of the area and house.</p> | <p>TII disagree that the station infrastructure is obtrusive and unsympathetic to the Architectural Conservation Area at this location. TII fully recognise the important heritage and architectural connotations of this location that have been considered in detail in the development of the Station layout at Four Masters Park.</p> <p>In commissioning the internationally renowned architect Nicholas Grimshaw and Partners, TII are confident that the proposals details will deliver a contemporary station at Mater which is appropriate for a state of the art metro system such as MetroLink. Appropriately, significant emphasis is placed on the public spaces. The Mater station concourse is a soaring space illuminated from above with natural light. Dublin's rich architectural heritage has been respected, but not copied in a pastiche imitation. In accordance with best conservation principles, as set out in the ICOMOS Venice Charter of 1964 (Referred to in EIAR Chapter 26, section 26.7), the stations are architecturally distinguishable so as not to falsify the existing historic context. Reference and due respect to that context is made through the choice of high quality and appropriate materials and the scale of the interventions. At Mater station, the canopy entrance evokes the scale of park structures. The aesthetic values of all eras, including our own, have cultural validity, and therefore the brick is used in a contemporary way reflecting contemporary aesthetic idioms derived from 21st century technology. TII believe the current station and surface level designs greatly enhance the public realm at all locations along the MetroLink route. There is a unifying commonality in the design of all stations, providing a consistent and coherent architectural language, which assists with orientation and wayfinding, and contributes a new architectural lexicon to the cultural iconography of the city.</p> <p>The Mater Station urban realm design principles are based on the following:</p> <ul style="list-style-type: none"><li>* Realignment of the Four Masters Memorial;</li><li>* Rearranging the footpath to provide enough pedestrian space for the main entrance;</li><li>* Reinstatement with enhanced planting of the Four Masters Park and its existing railings; and</li><li>* Replacement of existing trees.</li></ul> <p>As detailed in Chapter 26 (Architectural Heritage), following the completion of the construction of the station box, the Park will be reinstated on the surface to a shape and form similar to the existing Park with updated planting, including new trees along each side of the triangle. The railings and gates, the Four Masters Cross and the sculpture will all be reinstated to slightly amended alignment and locations to facilitate ventilation grilles, air intake shafts, fire access lift, emergency escape stairs and the main entrance to the station. The existing garden and grotto adjoining and within the grounds of St Joseph’s Church will also be reinstated on the existing footprint and in similar style to the Four Masters Park proposals with proposed trees. This allows the accommodation of the introduced elements of the station which will now be expressed at surface level. It also ties in with the axial elements related to the original Mater building and which will be expressed in the proposed shared surface at its front. To ensure the protection of architectural heritage throughout the alignment, a Project Conservation Architect has been engaged to oversee the implementation of the Project. A specialist Heritage Works Contractor will also be appointed to remove, store and conserve and constraints during the construction phase, to ensure they are protected for reinstatement prior to the Operational Phase.</p> <p>The station architecture is integrated in the park in a sympathetic fashion with the skylights being framed by planting and providing circulation routes through the park. Existing monuments and protected railings will be relocated within the park. Large mature trees will be placed so as to provide balance and create space within the park. The landscape design itself will be created on top of the station box and sufficient depths and infrastructure are provided for in order to integrate the landscape design.</p> |

| Submission No.                                                               |                        |          | 009                                                                                                                                                                                                                                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

| Letter Re: Observation on a Strategic Infrastructure Development Application |                        |          |                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 16                                                                           | 3. Location and Design | 6        | While reinstatement of a portion of the park is welcome, it noted that the plan does not make provision for planning mature trees so it will be approx. 7-10 years after planning that the park will resemble the layout in the landscape diagrams. | EIAR Chapter 27 (The Landscape) details the impact on the landscape and visual amenity of the stations during both the construction and operational phases. As noted during the operational phase at Mater Station, on completion of the station box, the surface features will be substantially reinstated as per the project description (please refer to response item (15) above). The Park and its surroundings will be updated and improved, particularly in respect of the shared space to the front of the original hospital building, the refinement of the Park layout and the tree and plant species selection. Over the initial period after completion of the construction, the maturity and ambience created by the existing trees cannot be matched. However, as the new trees mature, this too will return with views along the adjacent streets and into the Park, much as they were. The restoration of the open green park space within the triangle of buildings along with the proposed amendments to the original Mater Hospital section of Eccles Street, will again impart the tranquil qualities of the existing condition. Overall, the predicted effects on the visual environment and on visual amenity during the Operational Phase will, in the longer term be significant and positive.                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| 17                                                                           | 3. Location and Design | 6        | There are no images of the Metro when closed so it is not clear whether the large canopy overhang on the Metro will provide a level of shelter which will be sufficient to encourage street drinkers to congregate.                                 | <p>All of the stations on MetroLink are gate-secured closed outside of normal operating hours. The entrances to Mater station will be gated with grilles incorporated into the canopies which will be lowered and locked at the end of the operational day and opened in the morning. Additionally, outside of normal operating hours, the public lifts will not be available for use. Please refer to section 6.8.3.3 of EIAR Chapter 6: MetroLink Operations &amp; Maintenance.</p> <p>When open for operation, MetroLink has been designed as an open system for passengers, so that people can walk through the station and onto the platforms without obstruction. The PSDs (Platform Screen Doors) will stop people accessing the track from the stations. A security fence will be installed along the whole of the above ground sections of the railway and at the tunnel portals. One of the outcomes of the architectural and urban realm design is to discourage anti-social behaviour, for example through the attractive setting, use of public lighting, open sight-lines, and avoidance of areas where individuals and groups of people can hide. Vandalism and anti-social behaviour on the trains and within the stations will be observed through CCTV (Closed Circuit Television) and if required staff sent to manage the situation. The ACID (Access control and intrusion detection) system will also identify intruders trying to enter locations where unauthorised access is prohibited. Subject to a Data Protection Impact Assessment and compliance with the General Data Protection Regulation, there will be a single CCTV system and a single ACID system serving all stations, tunnels, substations, and depot, and managed from Dardistown Depot.</p> |
| 18                                                                           | 3. Location and Design | 97       | The risk of noise pollution from the crossing located outside no. 21 Berkeley Road is of concern.                                                                                                                                                   | <p>The demand for the use of the proposed pedestrian crossing on Berkeley Road will be linked to the MetroLink services hours which are expected to run between 05:30 and 00:30 for 365 days per year, with more trains added into service at peak times. The noise impact on the surrounding environment as a consequence of the proposed pedestrian crossing will be insignificant in comparison to the noise that already exist in an urban area.</p> <p>EIAR Chapters 13 (Airborne Noise and Vibration) and 14 (Groundborne Noise and Vibration) present a comprehensive and detailed assessment of operational groundborne and airborne noise and vibration. No residual noise impacts are identified at this location during operation. The calculated railway noise levels across the proposed Project are not significant in terms of any widespread community disturbance and results in a not significant to slight impact when added to the prevailing noise environment.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

| Letter Re: Observation on a Strategic Infrastructure Development Application |                                          |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 19                                                                           | 3. Location and Design - Remedies Sought | 7        | a) A station design that is more visually appropriate for a metro station in a small urban park surrounded by Victorian buildings. There are numerous examples of station design that are much less obtrusive than what is proposed and more in keeping with what residents understood to be an "underground station".<br>b) Relocating the station entrance further into the park so it is less disruptive and respects sight lines/views along Berkeley Road.<br>c) Minimising above ground station infrastructure by removing the 'light wells' which will allow more green space, and using artificial light in the station;<br>d) A requirement to plant equivalent mature trees to those that will be cut down as part of the construction process in order to soften the impact of the station.<br>e) Removal of crossing outside no. 21 Berkeley Road or mitigations sufficient to address noise pollution concerns.                                                                                                                                                                                                                                                                                                                                                                                                   | a) Please refer to response item (15) above in relation to the station architecture and design of Mater Station.<br>b) The entrance to Mater Station is situated at the northwest corner of the park and close to the Hospital access, which is conveniently located to walk to Mater Hospital, St Joseph’s Church and Berkeley Road. The location of the entrance is also a result of the tunnel alignment between Glasnevin and O’Connell Station, in line with the Project objectives of facilitating integration and serving the City Centre.<br>c) Please refer to response item (15) above in relation to the station architecture and design of Mater Station.<br>d) Please refer to response item (16) above in relation to the planting of trees around Mater Station.<br>e) Please refer to response item (18) above in relation to the anticipated impact of the pedestrian crossing on Berkeley Road.                                                                                                      |
| 20                                                                           | 4. Restoration & Operation               | 7        | <p>Given the scale of upheaval and duration of the project, it is essential that funding should be set aside to benefit the local area and restore Four Masters Park to the greatest extent possible once the construction period is complete.</p> <p>There is a lack of detail and clarity regarding the reinstatement of the Four Masters Park following the construction period, with no indication of which body will be responsible for the park upkeep and security. There will be much greater access to the park area than there is currently, which while potentially positive does raise some concerns about anti-social behaviour. The difficulties experienced at some Luas stops highlights the risks in this regard and it is noted that most DCC parks are closed at night for security reasons. We also have concerns about future possible noise pollution from buskers and similar activities.</p> <p>Remedy Sought: a) A dedicated Community Fund should be established to ensure improvements are delivered in relation to the visual amenity and liveability of the local area.<br/>b) DCC to manage the park area following construction<br/>c) No licences to be granted for buskers.<br/>d) No licences to be granted for events without the specific approval of the local Residents Association.</p> | <p>Please refer to response item (15) in relation to the reinstatement of Four Masters Park following the completion of the construction works at Mater Station.</p> <p>a) TII will explore the possibility of providing Dedicated Community Funding, however such funding does not currently form part of our proposals. TII will work with all established Community Groups through the local community liaison offices along the route to identify projects at local level that would involve the Community in the delivery of MetroLink and its legacy. Such projects could include:</p> <ul style="list-style-type: none"><li>- A local school learning programme.</li><li>- Enhancement of community amenity within agreed funding limits.</li><li>- Engagement with final landscape and finishing options.</li></ul> <p>Once the works are completed it is intended that the park will be owned, managed and secured by TII. As such there are no plans to facilitate licensing of buskers or other events.</p> |
| 21                                                                           | Oral Hearing Request                     | 7        | We wish to request an oral hearing.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | <p>Thank you for the submission and request for Oral Hearing. We have reviewed the submission and provided response for the observations/ concerns raised in detail above.</p> <p>An overview of the Oral Hearing process is provided in the EIAR Chapter 8.9.2. An Bord Pleanála may, at its absolute discretion, hold an oral hearing on the Railway Order application. Given the scale and extent of the MetroLink project it is highly likely that an oral hearing will be held similar to past railway order applications. The purpose of the oral hearing will be to allow issues relevant to an application for approval be examined. The oral hearing can be attended by anyone, but only those that have made a written application may make an oral submission at the oral hearing. The oral hearing is managed by the An Bord Pleanála.</p>                                                                                                                                                                 |

| Submission No.                                                                         |                                                               |          | 010                                                                                                                                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |  |

| 1                                                                                      | Letter - introduction                                         | 1        | To ensure a proper planning and sustainable Dublin transport solution for the next 50 years, ultimately TII's goal should be a LOA4 (Level of Automation 4) Metrolink spine running North/South.<br><br>This TII railway order is but half that solution.                                                                                                                 | As described in EIAR Chapter 6 MetroLink Operations and Maintenance, section 6.4, it is proposed that MetroLink will operate at Grade of Automation GoA4 (referred to in the submission as LOA4) which means that the trains will be fully automated.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |
| 2                                                                                      | Introduction                                                  | 1        | With the utmost of respect I have concerns that the incumbents in TII have unfortunately hamstrung the next generation of designers in two key areas:<br><br>1) The inappropriate selection of Charlemont as the Southern Metrolink Terminus.<br>2) Insufficient airport stakeholder engagement to determine future Capacity enhancements requirements at Dublin Airport. | TII's role is to deliver the MetroLink project as provided for in the previous Transport Strategy for Greater Dublin Area (2016-2035) and the current Transport Strategy for Greater Dublin Area (2022-2042) and as supported by the Dublin City Development Plan 2022 - 2028. The Board is required to have regard to the likely consequences for proper planning and sustainable development in the area in which it is proposed to carry out railway works (section 43(1) of the 2001 Act). The connection from St Stephen's Green to Charlemont / Ranelagh is provided for by the previous Transport Strategy for Greater Dublin Area (2016-2035) and the current Transport Strategy for Greater Dublin Area (2022-2042) and further the location of the interchange is supported by the Dublin City Development Plan 2022 - 2028.<br><br>All the observations made by this submission have been responded to, including the rationale for the proposed MetroLink / Luas Green Line interchange at Charlemont and the concern that the proposed Airport Station does not have sufficient capacity.                                                                                                                                                                                                                                                                                                                                        |  |
| 3                                                                                      | 1.0 Executive Summary                                         | 1        | 1) A Luas terminus spur to the St Stephen Green East station (SSE), incorporating a turn back, should be designated the southern Metrolink terminus.                                                                                                                                                                                                                      | A Luas spur to St Stephen's Green East Station (MetroLink SSG station) incorporating a turnback does not form part of the MetroLink project. Whilst such a spur might be considered if MetroLink were to terminate at St Stephen's Green East, it is unlikely that such a spur could be justified, in particular due to the significant additional interventions that would be required within St Stephen's Green Park to accommodate the additional Luas tracks; and it would unlikely be merited from an economic perspective given that the distance between the two stations would be an approximately 480m or 7 to 8 minute walk via the north side of St Stephen's Green Park.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |  |
| 4                                                                                      | 1.0 Executive Summary                                         | 1        | 2) The Metrolink design should incorporate future Airport capacity enhancements without disturbing the operational line.                                                                                                                                                                                                                                                  | TII can confirm MetroLink has been designed and future proofed for the Airport capacity forecast for c.2060 of between 50 to 55 million passengers using Dublin Airport, with MetroLink designed to be capable of carrying up to 20,000 passengers per hour in each direction.<br><br>Furthermore a detailed microsimulation analysis has been undertaken in order to confirm that the proposed station at Dublin airport has sufficient capacity. This analysis includes taking account of the capacity of platforms, escalators and lifts for predicted passenger demand during the AM and PM peaks. The forecast demand for passengers at the Airport has been developed with reference to the DTTAS report "Review of Future Capacity Needs at Ireland's State Airports" with the demand at 55 million passengers per annum in the 2057 forecast year. The Airport station design includes for six escalators that will connect ground level with the concourse level and the concourse with the mezzanine, and four escalators that will link the mezzanine and platforms. Six high capacity escalators will connect the street with the platforms, and another six lifts will connect the concourse and the platforms. The proposed station layout including platforms is shown to offer acceptable performance levels for both AM and PM peak hours, and even when 2057+25% is considered, any congestion is within acceptable levels. |  |
| 5                                                                                      | 1.1 Background                                                | 2        | Therefore of note, is the fact that this RO does not give any long term detail to the southern portion of the Metrolink spine.                                                                                                                                                                                                                                            | TII's role is to deliver the MetroLink project as provided for in the previous Transport Strategy for Greater Dublin Area (2016-2035) and the current Transport Strategy for Greater Dublin Area (2022-2042) and as supported by the Dublin City Development Plan 2022 - 2028.<br><br>The scope of the MetroLink Project does not include for a line beyond Charlemont, however, the location of the interchange at Charlemont does not preclude onward extension south. An interchange at Charlemont is supported by policy including the Dublin City Development Plan 2022 - 2028 and the Transport Strategy for the Greater Dublin Area. Further, as noted by the GDA Transport Strategy 2022-2042, section 12.3.2, "Charlemont offers the optimal location for the primary interchange with the Green Line in response to growing demand in the longer term and is an appropriate location to facilitate any potential future metro extensions to serve the south west, south or south east of the city region should sufficient demand arise."                                                                                                                                                                                                                                                                                                                                                                                           |  |

| 7                                                                                      | 1.2 Metrolink Terminus: Charlemont V's St Stephen Green east. | 2        | In relation to TII choice of Charlemont over St Stephan Green East (SSE) as outlined in EIAR Volume 2 Chapter 7 Consideration of the Alternatives P63 Section 7.7.8 and Table 7-16. I am sceptical that this future proofing of Metrolink can be achieved at Charlemont.                 | Your observation " I am sceptical that this future proofing of Metrolink can be achieved at Charlemont." is noted. However, TII can confirm MetroLink has been designed and future proofed to accommodate a future extension southward if required.<br><br>TII's role is to deliver the MetroLink project as provided for in the previous Transport Strategy for Greater Dublin Area (2016-2035) and the current Transport Strategy for Greater Dublin Area (2022-2042) and as supported by the Dublin City Development Plan 2022 - 2028. The terminus at Charlemont is provided for by the previous Transport Strategy for Greater Dublin Area (2016-2035) and the current Transport Strategy for Greater Dublin Area (2022-2042) and further the location of the interchange is supported by the Dublin City Development Plan 2022 - 2028.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |  |
| 8                                                                                      | 1.2.1 Is TII transixed on Charlemont?                         | 2        | New Metro North (NMN) has morphed within a revised "draft" GDA strategy - from a light rail tram system to an automated high floor Metro carriage system.<br><br>From operating power supply, to platforms, to segregation issues and carriages, neither transport modes are compatible. | It is not intended to run Luas light rail trams on the Metro system or vise versa. At the time of the Fingal/North Dublin Study (2013) forecasted peak hour demand for the preferred scheme (LR7) was a design capacity of 9,900pphpd (passengers per hour per direction), operated at maximum two minute headways. Subsequent transport modelling carried out on the route between the publication of the Emerging Preferred Route and Preferred Route forecast AM southbound line flows in excess of 18,000 pphpd and forecast PM northbound line flows of 13,500pphpd. This increased transport demand is attributed to the fact that demographic, housing density, employment patterns have all changed since the modelling work to support the earlier scheme. Based on the updated transport demand figures, NTA/TII agreed that the MetroLink baseline design capacity should be increased to 20,000pphpd.<br><br>The capacity of a rail system is the result of the unit capacity delivered by a single vehicle multiplied by the service frequency measured in Trains Per Hour (TPH). Unsegregated rail-based systems have an ability to carry a maximum capacity of 7,000 pphpd, increasing to 11,000 pphpd where a high level of segregation can be achieved. This was the operational concept that was used for LR7. Where demand exceeds this level, metro/light metro systems, which have a capability of carrying up to 20,000 pphpd or more, are the most appropriate system and on this basis NTA/TII defined the appropriate type and level of service for MetroLink to be a fully segregated, high floor GoA4 metro, facilitating a high frequency service with shorter trains and stations than would otherwise be required. More information is available in the Preliminary Business Case, Appendix O, Evolution of MetroLink Alignment, System Capacity and Design.<br><br>It is correct to say that Luas and MetroLink are not technically compatible in so far as it is not intended that Luas rolling stock will run on MetroLink tracks or vice versa, both systems are currently independent of one another. They are however complementary modes forming part of the overall integrated transport strategy for Dublin as described in the current Transport Strategy for Greater Dublin Area (2022-2042) and as supported by the Dublin City Development Plan 2022 - 2028.<br><br>The compatibility of the systems is derived from their inter-connectivity. As outlined in EIAR Chapter 3, the proposed Project is part of an integrated transport network that also includes for BusConnects and DART+ which are all included under Project Ireland 2040. Together, these projects will result in a reliable, sustainable, affordable, integrated public transport network that will support the economy, help Ireland meet its climate change targets in line with Climate Action Plan 2021 and make Dublin a more liveable and sustainable city. Whilst MetroLink is a standalone project that is not dependent on any other projects for its delivery or effective operation, it is nonetheless a critical part of the proposed integrated transport network for the Greater Dublin Area. |  |
| 9                                                                                      | 1.2.1 Is TII transixed on Charlemont?                         | 3        | 1) A L0A4 autonomous Metrolink system joining a manually operated Luas green line is quite evidently portrayed by TII as problematic.                                                                                                                                                    | Whilst connecting and extending the MetroLink service to the Luas Green line is challenging, it is however possible and could be implemented over time. As described in the EIAR Chapter 7, Section 7.7.7, Luas Green Line Deferral, significant works would be required to the existing infrastructure to accommodate the new MetroLink rolling stock and enable full segregation of the route. Notwithstanding the current postponement of this element of works, the option of extending MetroLink services onto the Green Line is retained in the current Transport Strategy for Greater Dublin Area (2022-2042).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |  |

| 10                                                                                     | 1.2.1 Is TII transixed on Charlemont?                      | 3        | 2) The Board Inspector must be acquainted with the LGLTI (Luas Green Line Tie in) appraisal study. TII chose Option 4B tie in, however they overlooked the Grand Canal Sewer obstacle - hence option 4B tie in was subsequently shelved. Consequently, NMN and now Metrolink is therefore being left underground with literally nowhere to go or resurface.<br><br>3) Why therefore does TII still profess the long term option of a future Green line - Sandyford tie in?                                                                                                                                                                                                                                                                                                                                                                                         | The proposed MetroLink alignment has not been extended south of Charlemont for the reasons set out by the GDA strategy , section 12.3.10, "The challenges associated with the upgrading of the Luas Green Line to a metro standard of service have led to the emergence of an alternative proposal which seeks to meet travel demand from south of Sandyford along a new light rail corridor which serves UCD post-2042. As such, the upgrading of the Green Line to metro standard is not being pursued as part of this strategy. Instead, for this strategy period, the capacity and frequency on the current Green Line from Sandyford northwards to the city centre will be incrementally increased through the provision of additional tram fleet and services and associated turnback arrangements to meet forecast passenger demand."<br><br>As noted by Response (5) above, the location of the interchange at Charlemont does not preclude onward extension south.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |  |
| 11                                                                                     | Is TI I transixed on Charlemont?                           | 3        | 4) Why bury the TBM head at Option 6 instead of Option 9B (Vol 2 Chapter 7 P 118 Diagram 7.41)?<br><br>5) Why isn't TII retrieving the TBM from a portal at Option 6?                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | In addition to the summary information provided in the EIAR Chapter 7, further information on the consideration of tunnel termination options is provided in the EIAR Appendix A7.4, Charlemont Shafts Options Report.<br><br>4) Option 9B has an intervention shaft provided at the south end of its alignment, therefore the TBM could be driven in to the shaft and lifted out. However, Option 9, as noted in Appendix A7.4, Section 5.1, and Table 5.3, would not meet the project objectives and is significantly more expensive, and as such this option was not progressed.<br><br>5) Option 6 does not have a shaft at the south end of its alignment, but instead a side ventilation shaft closer to Charlemont Station, therefore it is more economical to leave the skin of the machine and the cutter head (the metal tube within which the workings of the TBM are contained and the 'head' at the front of the machine that rotates with cutter tools to excavate the tunnel) in the ground at the end of the tunnel and simply remove the inner workings of the TBM. This approach is common on tunnelling projects. The EIAR Appendix A7.4, Section 3.1, provides information on disposal or recovery options for the TBM.                                                                                                                                                                                                                                                                                                                                                                                                      |  |
| 12                                                                                     | 1.2.3 Why Charlemont Is not a suitable Metrolink Terminus. | 3        | At the outset I sought to guide ABP to areas that for some unknown reason are lacking in the TII RO documentation. I propose a LUAS Green line terminus spur at St Stephen Green SSE Metrolink and shall now counter TII justification for a Charlemont St Metrolink Terminus.<br><br>TII Position:<br><br>"A shorter interchange walking distance at Charlemont with almost 5 minutes shorter interchange time when compared to St Stephen's Green (Refer to Diagram 7.11 and Diagram 7.12);<br><br>Response:<br><br>A Luas Green line terminus (opposite the Shelbourne Hotel) trumps the interchange distance at Charlemont (Diagram 7.11.). A safe comfortable surface transfer and assured interconnection (with luggage) is a strategic Metrolink bonus for revenue generation from Southside residents.                                                     | TII's role is to deliver the MetroLink project as provided for in the previous Transport Strategy for Greater Dublin Area (2016-2035) and the current Transport Strategy for Greater Dublin Area (2022-2042) and as supported by the Dublin City Development Plan 2022 - 2028. The connection from St Stephens Green to Charlemont / Ranelagh is supported provided for by the previous Transport Strategy for Greater Dublin Area (2016-2035) and the current Transport Strategy for Greater Dublin Area (2022-2042) and further the location of the interchange is supported by the Dublin City Development Plan 2022 - 2028.<br><br>The reasons why an interchange with the Luas Green Line is preferred at Charlemont is set out by Response (5) above, and described in EIAR Appendix A7.9. This notes that there is a limit to the potential of the Luas to provide additional capacity in the on-street non-segregated section of the Luas Green Line from Charlemont northwards through the city centre. The nature of this route and the fact that it currently crosses several road junctions (Adelaide Road, Harcourt Street / Hatch Street upper and Harcourt Street / St Stephen's Green south) limit the service to a maximum of 24 trams per hour per direction. The projected demand for this section would require a higher frequency of up to 30 trams per hour and this demand cannot be met with on-street systems (Luas / bus). The interchange between Luas and MetroLink proposed at Charlemont will provide the necessary capacity to address the demand on this corridor and reduce overall travel time for passengers. |  |
| 13                                                                                     | 1.2.3 Why Charlemont Is not a suitable Metrolink Terminus. | 4        | TII Position:<br>- Charlemont allows for future proofing of the extension of Metro further south, either by way of a connection to the Luas Green Line or an alternative metro route alignment to the south of the city;<br><br>Response<br>Of particular note is the fact that TII chose not to complete tunnel boring to a position directly underneath the Luas line (Option 9B Vol 2 Chapter 7 P 118 Diagram 7.41).<br><br>TII declared position on the "Luas Green Line Deferral" outlined at Vol2 Chapter7 Section 7.7.7. P60- 61 cast's doubt on any future connect to Sandyford.<br><br>An oral hearing would give TII an opportunity to update ABP on a revision to the flawed Option 4B LGLTI (Luas Green Line Tie in) "Appraisal study".<br><br>IMHO a Metrolink terminus at SSE gives better future catchment/alignment options to south city suburbs. | The EIAR Appendix A7.9 Terminus Station at Charlemont compared to St. Stephen's Green, sets out the reasons why MetroLink incorporates a station at Charlemont rather than terminating at St Stephen's Green East. See also Response (5) for compliance with planning documents and Response (11) regarding tunnel termination options south of Charlemont.<br><br>TII disagree that "a Metrolink terminus at SSE gives better future catchment/alignment options to south city suburbs" for the reasons provided in EIAR Appendix A7.9. The section of MetroLink route between St Stephen's Green and Charlemont Stations contributes significantly to the overall benefits of the scheme and the tunnel termination will facilitate a future connection southward.<br><br>Regarding tunnel termination Option 9b, see Response (11) above.<br><br>TII disagree that Option 4B as presented in the New Metro North Green Line Tie-in Study, Options Appraisal Report (March 2017) is flawed. This was an option considered at that time for a continuation of the metro onto the Luas Green Line. Whilst MetroLink proposals have been developed further since that time, the present MetroLink tunnel termination south of Charlemont included in the RO submission would continue to support an extension onto the Luas Green Line as previously envisaged, if required.                                                                                                                                                                                                                                                                      |  |

| Submission No.                                                                         |                                                            |          | 010                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

| Observation: Railway (Metrolink - Estuary to Charlemont via Dublin Airport) Order 0222 |                                                            |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| 14                                                                                     | 1.2.3 Why Charlemont Is not a suitable Metrolink Terminus. | 4        | <p>TII Position:</p> <p>Charlemont bypasses capacity constraints on the Luas on-street running section between St Stephen's Green;</p> <p>Response:</p> <p>"...capacity constraints on the Luas on-street running section between St Stephens Green" are a function of road usage and have nothing to do with where a Metrolink underground Terminus is located. Luas Road usage limits are outlined at Table 7-15 Vol2 Chapter 7 P62-63.</p> <p>Prior to Luas reaching its notional absolute "on-street running" capacity, a decision on a Metrolink South extension would naturally have already been made. A Metrolink extension natural objective, is to relieve pressure on the Luas system.</p> <p>An additional new Luas Terminus at SSE absolutely ensures no capacity/constraints on the on street platforms "between St Stephen's Green". A co-located Luas/ Metrolink Terminus at SSE future proofs the uptake of Metrolink passengers to/from Dublin Airport.</p> | <p>TII do not agree that ""...capacity constraints on the Luas on-street running section between St Stephens Green" are a function of road usage and have nothing to do with where a Metrolink underground Terminus is located." This section cannot accommodate the same level of service increase as that south of Charlemont, where the line has limited interface with road traffic - It is limited to 7000 passengers/hr. The nature of this route and the fact that it currently crosses several road junctions (Adelaide Road, Harcourt Street / Hatch Street upper and Harcourt Street / St Stephen's Green south) limit the service to a maximum of 24 trams per hour per direction. The projected demand for this section would require a higher frequency of up to 30 trams per hour and this demand cannot be met with on-street systems (Luas / bus). The interchange between Luas and MetroLink proposed at Charlemont will provide the necessary capacity to address the demand on this corridor and reduce overall travel time for passengers. It is important to note that once the street running section of Luas reaches capacity, there is limited opportunity to improve that section of the alignment as explained by Response (18) below.</p> |
| 15                                                                                     | 1.2.3 Why Charlemont Is not a suitable Metrolink Terminus. | 4        | <p>TII Position:</p> <p>Charlemont provides additional public transport connectivity to key trip attractors south of St Stephens Green, with high demand for services in this area predicted.</p> <p>Response:</p> <p>Charlemont will continue to "provide additional....." with "high demand for services" from an enhanced Luas System from SSE Metrolink Terminus.</p> <p>TII Position:</p> <p>Charlemont provides additional fare/revenues collected with a favourable Cost Benefit ratio likely;</p> <p>Response:</p> <p>A comfortable connection between Luas and Metrolink for Airport Passengers (with luggage) will seal additional revenue success. Both are naturally achieved with a new SSE Luas Terminus.</p>                                                                                                                                                                                                                                                   | <p>In addition to Luas street running being constrained (see Response (14) above), and as outlined by Response (13) above, the section of MetroLink route between St Stephen's Green and Charlemont Stations contributes significantly to the overall benefits of the scheme. There is also high passenger demand forecast for a Metrolink station at Charlemont, including from the Ranelagh area, which would be lost if St. Stephen's Green was the MetroLink southern interchange station. The additional fare revenues collected by the Charlemont Station interchange increase the benefits delivered by the Project, reflected by an improved Project Benefit Cost Ration (BCR).</p> <p>It is also important to note that MetroLink is not just an Airport link, it serves a number of destinations along the route, provides much needed transport improvements to areas north of the Airport including Swords and wider afield via the provision of the Park and Ride at Estuary, provides key interchanges with DART at Tara Street and Glasnevin, as well forming part of the wider integrated transport network that also includes for BusConnects and DART+ which are all included under Project Ireland 2040.</p>                                      |
| 16                                                                                     | 1.2.3 Why Charlemont Is not a suitable Metrolink Terminus. | 5        | <p>TII Position:</p> <p>Charlemont avoids more significant environmental impacts on St Stephens Green.</p> <p>Response:</p> <p>Neither St Stephen Green East (SSE) Metrolink location nor its internal design are changing. An underground "turn back" shall obviously be required so TII could elaborate on the "more significant environmental impacts" comment at an ABP hearing?</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | <p>TII note that St. Stephen's Green is designated as a national monument. EIAR Appendix A7.9 provides information on the comparison between Charlemont and SSG East as the MetroLink southern-most interchange station.</p> <p>Further, if the scheme were to terminate at St Stephen's Green, it would be important to determine where the next station south of St Stephen's Green would be located for a future extension as required in the Transport Strategy for Greater Dublin Area (2022-2042). With single bore tunnel configuration, the maximum distance between stations is 1,000m. If the distance between stations extends beyond 1,000m there is a need for an intervention shaft or separate escape tunnel. Selecting a different station location other than Charlemont within a 1,000m arc south of St Stephen's Green Station will be challenging given the limited space available for a station within this area and it is reasonable to assume that the Station may be located outside the 1000m arc, thus requiring the construction of an intervention shaft similar to that currently proposed at Albert College Park between St Stephen's Green and the proposed station location.</p>                                                    |

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| Observation: Railway (Metrolink - Estuary to Charlemont via Dublin Airport) Order 0222 |                                                                 |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| 17                                                                                     | 1.2.4 Why St Stephens Green SSE Metrolink Terminus is suitable. | 5        | <p>It's obvious why Dartmouth Square residents don't want Metrolink. Charlemont has the propensity to become the Southside's one stop drop off / pick up point for Airport Bound passengers.</p> <p>Southside Airport Passengers will naturally seek to avoid DAA Long term Car park fees or exorbitant round trip Taxi Fares. Therefore the true success of Metrolink is dependent on an assured airport passenger connection particularly with a southbound LUAS.</p> <p>So how does TII overcome future capacity issues with on street Luas platforms whilst endeavouring not to be overwhelmed by a naturally expanding Green Luas line coupled with additional projected DAA enhanced airport capacity demand?</p> <p>Answer: ABP to condition TII to create a new Luas Green Line terminus at the SSE Metrolink terminus.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | <p>MetroLink forms part of an integrated public transport network. The system is designed in an integrated manner so that people travelling from the area south of Dublin to access locations north of Charlemont, such as Dublin Airport, Mater, Swords etc. will utilise public transport to interchange with the MetroLink, or will walk or cycle to access their local station. The system is not designed to encourage people to drive to stations within the City and TII actively discourage people from doing so other than the Park &amp; Ride station at Estuary. TII therefore do not agree with the observation that “Charlemont has the propensity to become the Southside's one stop drop off / pick up point for Airport Bound passengers” as this is not borne out by our transport analysis. Furthermore, TII have deliberately designed the Station with minimum set down space (with the exception of a drop-off on Grand Parade for persons of restricted mobility only) or room for taxi ranks so that it does not encourage the Station to be used as a terminus.</p> <p>When the Project is operational, car mode share will decrease, with a reduction of up to approximately 830 car tips to and from the zones surrounding Charlemont Station over the 12hr period in 2065. In overall terms, Charlemont Station will provide for improvements to the public transport network resulting in decreases in private car usage/trips, increases in public transport usages and will facilitate walking and cycling to the station, without significantly impacting on the operation of the road network in the area.</p> <p>In terms of passengers from the south of the city using Metrolink, the section of MetroLink route between St Stephen's Green and Charlemont Stations contributes significantly to the overall benefits of the scheme. It serves a significant area of the south city of Dublin and offers enhanced access from the local area to the city centre and a direct connection to Dublin Airport. It serves key trip attractors including residential areas and offices / workplace locations, with high passenger boarding and alighting figures in the peak hours. During the morning peak, at Charlemont station the flows include 1,800 passengers alighting, 2,300 boarding and 1,229 passengers alighting, 2,276 boarding during the evening peak. The passenger numbers contribute significantly to the overall benefits of the scheme and the effect of these benefits outweigh the additional costs that are associated with the delivery and operation of the section from St Stephen's Green to Charlemont station.</p> <p>By extending MetroLink to Charlemont it provides for future proofing of the Green Line, bypassing the capacity constrained Luas on-street running section, and ensures potential future connectivity options are enabled, either to the Green Line or for extensions of the metro. (Response (18) below addresses the suggestion of increasing this section of the line to twin track running).</p> <p>The Charlemont Station interchange provides for increased passenger utilisation of the MetroLink system, thereby increasing the benefits delivered by the Project, reflected by an improved Project Benefit Cost Ration (BCR). Response (5) and (12) above further explains the reasons why Charlemont is the preferred interchange with the Luas Green Line.</p> |
| 18                                                                                     | Why St Stephens Green SSE Metrolink Terminus Issuitable.        | 5        | <p>If the ABP inspector walks the ground on the Northern side of St Stephens Green one can see the original Luas Green line turn back.</p> <p>What if this Northern stretch was upgraded to twin tracks, extended and designated a Luas (Southbound only spur). The benefits of this spur are as follows;</p> <ul style="list-style-type: none"><li>• The Transfer time from Luas to Metrolink shall reduce the minimal connectivity distance extolled by TII at Charlemont.</li><li>• The Luas/SSE transfer is at surface level making luggage transport safer and more comfortable.</li><li>• All Southbound Metrolink passengers are assured of near empty trams at the new SSE Luas terminus opposite the Shelbourne Hotel.</li><li>• Southbound Metrolink Airport passengers (seeking assured Luas seats) won't now have to transfer from O'Connell St Metro to Luas Parnell, therefore freeing up Green Line commuter space exiting the city centre.</li><li>• Dedicated Northbound Green Line "SSE Metro Terminus" trams dovetailing with peak airport hours, will deter City Centre bound passengers from boarding.</li><li>• An Express Metrolink service SSE-Airport with limited stops during Airport peak hours shall allow greater Luas Metro uptake connection along the Sandyford line, thus easing pressure on the M50 to the Airport.</li></ul> <p>Were the ABP inspector to delete the Charlemont Metrolink terminus from this RO then all is not lost.</p> <p>TII still have the option to extend the SSE line by 390m, extract the TBM and incorporate a ventilation shaft / emergency stairwell for turn back tunnel staff. The ideal location for these works are adjacent to the Iveagh Gardens or outhouses at the Southern end of the NCH.</p> <p>Future Metrolink stops options are Portobello thereafter Central Rathmines whilst Line Curvature from Charlemont may restrict / necessitate having to bypass central Rathmines?</p> | <p>Please refer back to Response (5) that explains the reasoning for why an interchange with the Luas Green Line is proposed and preferred at Charlemont. This includes that by extending MetroLink to Charlemont it provides for future proofing of the Green Line, bypassing the capacity constrained Luas on-street running section, and ensures potential future connectivity options are enabled, either to the Green Line or for extensions of the metro. If a new Green Line terminus was provided at St Stephen's Green as suggested, it would still be constrained by the capacity limited on-street running section between St Stephen's Green and Charlemont, thereby necessitating additional tracks as noted by the observation. The provision of additional tracks will further impact the existing road network, and that assumes that additional tracks can be accommodated within the existing space constraints, as well as requiring significant, and challenging modification and expansion to the Charlemont Green Line Stop and beyond, noting that it is located on an elevated section and embankment, if Charlemont Stop is not to be come a bottleneck for the service. As a result, additional Luas lines between St Stephen's Green and Charlemont is not preferred over the proposed MetroLink solution.</p> <p>As noted previously, if the scheme were to terminate at St Stephen’s Green, it would be important to determine where the next station south of St Stephen’s Green would be located for a future extension as required in the Draft Transport Strategy for Greater Dublin Area (2022-2042). With single bore tunnel configuration, the maximum distance between stations is 1,000m. If the distance between stations extends beyond 1,000m there is a need for an intervention shaft or separate escape tunnel. Selecting a different station location other than Charlemont within a 1,000m arc south of St Stephen’s Green Station will be challenging given the limited space available for a station within this area and it is reasonable to assume that the Station may be located outside the 1000m arc, thus requiring the construction of an intervention shaft (similar to that currently proposed at Albert College Park) between St Stephen’s Green and the proposed station location.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

|                                                                                        |                                           |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | <p>If a decision was taken to terminate MetroLink at St Stephen's Green, significant changes would be required to the scheme. These would include design changes at St Stephen's Green station and provision of alternative turnback facilities immediately south of the station.</p> <p>Future metro services to Terenure/Rathmines or Portobello do not form part of the Metrolink scheme. TII's role is to deliver Metrolink as supported by the Transport Strategy for Greater Dublin Area (2022-2042) and Dublin City Development Plan 2022-2028. The connection from St Stephens Green to Charlemont / Ranelagh is supported by the current Transport Strategy. The Transport Strategies were prepared by the National Transport Authority, scrutinised by the Joint Oireachtas Committee on Transport, and approved by the Minister for Transport. It notes in section 12.3.2, "Charlemont offers the optimal location for the primary interchange with the Green Line in response to growing demand in the longer term and is an appropriate location to facilitate any potential future metro extensions to serve the southwest, south or southeast of the city region should sufficient demand arise."</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |  |
| 19                                                                                     | 1.2.5 The Customer votes with their feet? | 6        | <p>TII engineers make no reference to the passengers experience when interfacing with Metrolink. Airport passengers with suitcases are expected to interchange with the Luas Green Line at Charlemont. Its strange that no mention is apparently made within the RO to a Luas Red line interchange point?</p> <p>A TII appraisal team looked at the various options on how passengers shall transfer at Charlemont. Four Options are outlined at EIAR Vol 2 Chapter7 P113.</p> <p>"Option 1 was the preferred option as it reduced the potential for a setting impact on the Carroll's Building (when compared to option 2)". No doubt this is of little comfort to passengers who in perpetuity shall haul suitcases up a flight of stairs to the Charlemont Luas Southbound Platform.</p> <p>A connecting link for Southside residents is critical to the success of Metrolink- A minimal stairwell just doesn't do it.</p> <p>Given TII projected capacity expansion of the Luas Green Line, pressure will continuously mount on the southbound uplift carrying capacity/ capability of Metrolink passengers at Charlemont. So is Charlemont interchange really suitable for southbound airport passengers to 2042? Will there be even space then on a Southbound Luas exiting the city?</p> | <p>TII have carefully considered the interchange between the Luas Green Line and MetroLink at Charlemont. A microsimulation VisWalk model for the immediate area surrounding Charlemont Station during the operational phase has been developed. The model covers the full extent of the publicly accessible station area, including the immediate vicinity of the station entrance at street level, the Luas stop and nearby junctions at Charlemont Bridge. In order to accommodate the forecast demand from the proposed Charlemont Station, a new staircase with 2.4m stair width is proposed at the south east corner of Charlemont Luas stop. A lift will also be provided at this location for passengers with luggage or of restricted mobility. Both the stairs and lift are sized for MetroLink to Luas, and Luas to MetroLink passenger numbers.</p> <p>TII would note that they have provided an interchange that has been designed to provide the capacity required to meet the Project requirements to carry up to 20,000 Passengers Per Hour Per Direction (pphpd) at peak hours.</p> <p>Interchange with the Luas Red Line is provided via the Green Line.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |  |
| 20                                                                                     | 1.2.5 The Customer votes with their feet? | 6        | <p>Finite Tram floor space capacity.</p> <p>A Luas tram has a maximum capacity of 408 passengers. Conservatively, assuming the Luas exclusively had airport passengers, then the usable floor area reduces to 408 + 2 (as each passenger would invariably hold a pull along suitcase). This finite Luas minimum capacity (204) may determine where passengers will actually strive to connect from Metrolink to LUAS.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | <p>The transport network capacity and interchange locations have been defined for the Project based on complex and detailed modelling of the transport network as a whole using the NTA Eastern Regional Model. The model incorporates a wide range of data sources, including demographic data, land use data, transportation network data, and travel survey data, including those travelling to and from the airport. The system is designed to model a variety of transportation modes, including private vehicles, public transit, walking, and cycling, and to simulate the interactions between these modes. The ERM model has been validated and calibrated using a range of localised data sources to ensure that the model can accurately represent the transport network, these include public transport and vehicle counts. The scenarios modelled also include for the implementation of other committed schemes, such as the Luas Green Line Capacity Enhancement scheme, and therefore does not utilise the current Luas capacities.</p> <p>Appendix A9.2-B Traffic and Transport Assessment - Charlemont Station section 5.1.1.4 presents the volume of passengers interchanging with other public transport modes at Charlemont Station for the AM and PM peak hours in 2035, 2050 and 2065. It is noted that the Luas Green Line at Charlemont runs every 15 inutes or better, representing a minimum headway of 4 services per hour. As detailed, interchange at Charlemont is characterised by high flows to and from the adjacent Luas stop, as well as to and from the Bus network. Modelling indicates approximately 900 passengers transferring either to or from Luas in the opening year during the AM and PM peak hours, and up to approximately 1,200 passengers transferring both to and from Luas in 2065 in the AM and PM peak hours. As a result, with the proposed capacity enhancements in place, it is antipated that the Luas will be able to provide for these interchange passengers.</p> |  |

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | | Observation: Railway (Metrolink - Estuary to Charlemont via Dublin Airport) Order 0222 |                                           |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

Senior citizens (bound for Dublin Airport with luggage in tow) will have difficulty navigating the confines of this minimalist stairwell.</p> <p>In essence the stairwell and new (replacement?) single lift facility at Charlemont is neither adequate nor suitable for the projected peak flow transfer passenger volumes to 2042. Having studied the Luas and Metrolink network, astute southbound airport passengers may decide that the best option to connect with suitcase is where Southbound Luas Green line passengers disembark.</p> <ul style="list-style-type: none"><li>• The first logical assured link is Metrolink O'Connell St - Luas Parnell St.</li><li>• Metrolink SSE- Dawson St is second in order to overcome any station street congestion issues predicted at the St Stephen Green Luas Stop.</li><li>• The Last option is for passengers to remain on Metrolink to the Charlemont terminus. (Assuming one wants to haul a suitcase up a flight of stairs, take one's chances alongside fellow airport passengers in boarding a southbound Luas tram that's projected to increase its passenger volumes existing the city).</li><li>• Airport Passengers travelling southbound may also have boarding restrictions and no doubt shall invariably remain adjacent to tram doors (with suitcase) thus making for an awkward journey for all customers</li></ul> <p>If there is a slight truth to this portrayal of the Charlemont Southbound Luas platform experience then ABP must reflect on the exact reasons why TII are adamant that Charlemont beats SSE as the preferred terminus. Is it because the NTA have invested large funds in carrying out enabling works at Charlemont before submitting a Railway order? Is it face saving for TII executives? How realistic is Metrolink ever really going to connect with Luas?</p> | <p>Please refer to Response (19) above that explains that a lift is provided at the Charlemont Luas Green Line Stop for persons with luggage or of restricted mobility.</p> <p>Please also refer to Responses (5) and (12) above that explains the considerations and reasons for why an interchange with the Luas Green Line is preferred at Charlemont.</p> <p>Finally TII would note that the station box location was not fixed by the Charlemont Development. The preferred route for MetroLink was published in March 2019 following a comprehensive route options study. The preferred route was based on the emerging preferred route for the scheme which included a station at Charlemont. The Charlemont Metro Enabling Works were constructed to enable the Charlemont Development to proceed whilst simultaneously ensuring there was an option available to construct a station at Charlemont that avoided unnecessary demolition, took advantage of an available site, provided infrastructure that is integrated with planned development rather than necessitating later changes and retrospective adjustments to a new development or even possible demolition of the new development, whilst providing protected provision for the future extension of the scheme south, if required. As such it was consistent with proper planning and sustainable development at this location.</p> <p>It is also important to recognise that the station location at Charlemont is influenced by available vacant land and thus avoids unnecessary demolition.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 22                                                                                     | 1.3 TII Metrolink RO                      | 7        | <p>A) Future Expansion of the line when in full operational mode:</p> <p>The TII RO submission fulfils its own self brief and that of a "DRAFT" GDA transport strategy plan. Future expansion of the Metrolink line is conveniently outside the "scope of this project". Therefore one asks ABP to ascertain by way of an oral hearing how further extension of the North/ South Spine shall tie in with the operational line that terminates 350m south of Charlemont.</p> <p>For instance:</p> <ul style="list-style-type: none"><li>• If future expansion is professed by TII, then why isn't the TBM head retrieved via a portal?</li><li>• Are there any environmental effects to ground water resulting from a buried TBM?</li><li>• It's obvious that spoil from future boring must be extracted in a southerly direction, therefore how shall the future tunnel be mined/joined when an advancing TBM head meets a sealed buried TBM head?</li><li>• The RO outlines various curvature radii options between TARA St and SSE. A new station located south of Charlemont must therefore lie within a tolerance arc e.g. (The minimum permissible 80km/hr track curvature radii line commencing 350m South of Charlemont). Would this defined Arc eliminate a future connection to a major suburb, eg Central Rathmines?</li><li>• Would a SSE terminus not give Metrolink South better catchment potential whilst diverging from Luas heading south?</li></ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | <p>TII's role is to deliver the MetroLink project as provided for in the previous Transport Strategy for Greater Dublin Area (2016-2035) and the current Transport Strategy for Greater Dublin Area (2022-2042) and as supported by the Dublin City Development Plan 2022 - 2028. The GDA Transport Strategy is clear regards the future possible extension of the metro. The connection from St Stephens Green to Charlemont / Ranelagh is provided for by the previous Transport Strategy for Greater Dublin Area (2016-2035) and the current Transport Strategy for Greater Dublin Area (2022-2042). No onward extension is planned at this time, however the need for future extension will be addressed with reference to prevailing circumstances at each Strategy/Development Plan review. Such policy is not within TII's remit.</p> <p>The GDA Transport Strategy considers a range of options for the onward extension of MetroLink to meet the demand for travel over the period of the strategy. This includes consideration of the need for the upgrade of the Luas Green Line to metro with a metro extension to Dublin south west, south or south east. Whilst the strategy envisages that further extensions will be delivered after 2042, MetroLink which terminates at Charlemont allows for the possible extension of the metro in all the above directions.</p> <ul style="list-style-type: none"><li>• Response (11) explains why the TBM is left in the ground, noting that this approach is common to tunnelling projects and the location of the TBM is clear of a future tunnel extension.</li><li>• There are no environmental effects on the ground water. Noting the TBM will be used to construct the running tunnel from Northwood to Charlemont, there will be no materials that will have an environmental impact on groundwater. Whilst also noting that the inner workings of the TBM will be dismantled and removed on completion of the tunnel drive.</li><li>• There are a number of options available for making the connection, as noted by Response (11) there is nothing unusual with such an approach, or the requirement to make a future connection. It is actually very common for underground metros to be progressively extended. Should planning permission be sought and granted for further extension in the future, it may be likely that sprayed concrete would be used to make the connection between what will be the existing MetroLink tunnel and any future metro tunnel, and depending on the precise connection, if required, parts or all of the cutter can be cut out if required.</li><li>• Response (18) explains why provision for an extension immediately to the west of Charlemont is not deemed to be necessary.</li><li>• Response (17) above explains why the section of the MetroLink route between St Stephen's Green and Charlemont Stations contributes significantly to the overall benefits of the scheme.</li></ul> |

|                                                                                        |                                                                                             |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |  |

| Observation: Railway (Metrolink - Estuary to Charlemont via Dublin Airport) Order 0222 |                                                                                             |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |  |
| 23                                                                                     | 1.3 TII Metrolink RO                                                                        | 8        | <p>B) Passenger Integration Option 1 between Luas and Metrolink at Charlemont.</p> <p>Option 1 was chosen as the preferred route citing minimum transfer times. This begs the following question;</p> <p>Who is minded to disembark from a Northbound Luas at Charlemont when one is so close to the City Centre?</p> <p>Inevitably the answer would predominately be local employees or Airport bound travellers, certainly not city centre shoppers / workers or commuters.</p> <p>Therefore it's vital that the connection with Luas must primarily suit Airport Bound passengers with suitcases. Charlemont doesn't do it!</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | <p>TII's role is to deliver the MetroLink project as provided for in the previous Transport Strategy for Greater Dublin Area (2016-2035) and the current Transport Strategy for Greater Dublin Area (2022-2042) and as supported by the Dublin City Development Plan 2022 - 2028. The connection from St Stephens Green to Charlemont / Ranelagh is provided for by the previous Transport Strategy for Greater Dublin Area (2016-2035) and the current Transport Strategy for Greater Dublin Area (2022-2042) and further the location of the interchange is supported by the Dublin City Development Plan 2022 - 2028.</p> <p>Clearly any passenger travelling northbound on the Green Line who is able to stay on the Luas to reach their desired destination will not change to MetroLink. The modelling referred to by Response (20) above takes account of this. It is also important to note that MetroLink is not just an Airport link, it serves a number of destinations along the route, provides much needed transport improvements to areas north of the Airport including Swords and wider afield via the provision of the Park and Ride at Estuary, provides key interchanges with DART at Tara Street and Glasnevin, as well forming part of the wider integrated transport network that also includes for BusConnects and DART+ which are all included under Project Ireland 2040. Finally as noted by response (19) the interchange at Charlemont has been designed to take account of predicted passenger numbers, including the provision of a lift to assist persons with luggage or of restricted mobility. It is therefore not correct to infer that MetroLink is simply an Airport Link, the purpose of the Project and its legacy will have far more reaching benefits than this.</p> |  |
| 24                                                                                     | 1.3 TII Metrolink RO                                                                        | 8        | <p>C) Where will Metrolink go?</p> <p>The million euro question. One wonders how many worldwide Metro systems terminate underground with no strategic decision on where the line eventually resurfaces. "Fail to prepare...prepare to fail", In my humble opinion, a flawed weak decision to terminate at Charlemont does not bode well for a future Southern Metrolink spine</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | <p>TII's role is to deliver the MetroLink project as provided for in the previous Transport Strategy for Greater Dublin Area (2016-2035) and the current Transport Strategy for Greater Dublin Area (2022-2042) and as supported by the Dublin City Development Plan 2022 - 2028, and including flexible options for extending the line. TII have designed Metrolink to comply with this policy, which has been fully adopted and to which An Bord Pleanála must have regard. Please also refer to Response (5) above.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |  |
| 25                                                                                     | 1.4 Ideal Integration between Metrolink the Luas Green Line and future Metrolink potential. | 8        | <p>As the notion of ever linking Metrolink to the Luas Green Line fades, attention will no doubt gather pace as to where Metrolink Southern spine shall terminate.</p> <p>Were ABP to designate SSE as the Metrolink Terminus then the next future Metrolink stop could be Portobello, thereafter central Rathmines, before Metrolink continues routing to areas outside of the current Luas Green and Red lines catchment areas.</p> <p>The important thing is to future proof Metrolink. Charlemont doesn't do it and if TII were honest they would probably say the same in private.</p> <p>ABP are respectfully asked to consider southbound airport passengers with luggage when deciding on a suitable Metrolink / LUAS connection point. Dedicated Luas trams modified with overhead luggage compartments would add additional appeal to the SSE- Sandyford line.</p> <p>My proposal for a Luas Green line Terminus spur at SSE ticks all the boxes and opens up the South Central Suburbs for future line extension/connection to Metrolink. A future northbound bore can terminate and connect with Metrolink at the temporally sealed Iveagh Gardens Portal.</p> | <p>TII's role is to deliver the MetroLink project as provided for in the previous Transport Strategy for Greater Dublin Area (2016-2035) and the current Transport Strategy for Greater Dublin Area (2022-2042) and as supported by the Dublin City Development Plan 2022 - 2028, and including flexible options for extending the line. TII have designed Metrolink to comply with this policy, which has been fully adopted and to which An Bord Pleanála must have regard.</p> <p>Response (18) explains why provision for an extension immediately to the west of Charlemont is not deemed to be necessary.</p> <p>TII do not agree that MetroLink is not part of wider future integrated strategic planning as explained by response (24) above.</p> <p>Response (23) explains that MetroLink is more than just a link to the Airport, whilst Response (19) outlines the transport modelling that has been undertaken to inform the design of the interchange with the Luas Green Line, noting the provision of a lift for passengers of restricted mobility, including those with luggage.</p> <p>Finally, and importantly, responses (5) and (12) explains the reasoning for why an interchange with the Luas Green Line is proposed and preferred at Charlemont, whilst noting the constrained on-street running capacity between St Stephen's Green and Charlemont means there is a limit to the capacity that can be provided by the existing Luas Green Line, or space to provide additional surface Luas lines and increase the size of Luas stops, noting Charlemont Stop is elevated and on an embankment (also see Response 18).</p>                                                                                                                                                            |  |

| Observation: Railway (Metrolink - Estuary to Charlemont via Dublin Airport) Order 0222 |                                                                                  |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| 26                                                                                     | 2.0 Insufficient airport stakeholder engagement to determine the future Capacity | 10       | <p>1) Dublin Airport Metrolink platform size</p> <p>The Metrolink RO treats Dublin Airport as a normal in-line station. Every Metrolink passenger embarking or disembarking Metrolink at Dublin Airport shall invariably have luggage in tow. Therefore this station is without question the most critical on the network in respect of platform space.</p> <p>DAA, with the undoubted approval from FCC plan to expand the Airport from 32 to 40mppa (by 2030) thereafter to 55mppa, will guarantee that Dublin Airport Station platforms will be the first stress test Metrolink constraint.</p> <p>What is the theoretical safety limit for passengers entering the Station, - to cover simultaneous transit movement from both 65m length platforms? Is it the maximum carrying capacity of inbound and outbound MetroLink carriages, 1000 or the equivalent 500 passengers with suitcases?</p> <p>I believe that the proposed 65m platform (with only single sided entry/exit points) may not suffice for peak aircraft wave returns to Dublin Airport.</p> <p>For passenger comfort the station box should either be extended into two segregated 65m sections for separate in line arrival and departure platforms OR this unique pinch point station should incorporate an additional central island platform thus segregating the proposed 65m platforms for a more comfortable uninterrupted arriving and departing passengers flow experience.</p> | <p>As noted by Response (4) above, the Airport Station has been modelled and designed taking account of the predicted passenger numbers, (see EIAR Appendix A9.2-D Traffic and Transportation Assessment – Dublin Airport Station). The preliminary design is based on the predicted passenger numbers with modelling showing that 65m long platforms are sufficient. There is no requirement for additional platforms to be provided.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| 27                                                                                     | 2.0 Insufficient airport stakeholder engagement to determine the future Capacity | 10       | <p>2) The lack of RO capacity enhancements to meet DAA expected passenger volumes to 50mppa.</p> <p>The DAA airfield Masterplan and FCC local area plan extends the Airport into the "Western Campus". Therefore as Airport passenger Volumes increase to 55mppa when does Til see the 65m platforms becoming a constraint? How will Metrolink passengers link up with a western Campus Terminal? Will Metrolink link only the Eastern Campus?</p> <p>Future proofing a link spur (South of the Dublin Airport south portal) either stand alone or via Dardistown would ensure that any future Western Campus Airport Terminal development can link up with Metrolink.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | <p>Section 9.4.3.3. of Chapter 9 (Traffic and Transport) details the Specific Developments which have been incorporated into the passenger modelling. As detailed, in addition to the forecast growth associated with the typical land use patterns, Dublin Airport is a key growth driver in the corridor and has a different growth associated with flight travel demand. Within the model, growth in landside demand is determined for passengers, staff and freight, applied to hte Dublin Airport Special Zone. Freight and staff numbers are forecasted on a scaling factor, which are aligned with passenger growth forecasts.</p> <p>The passenger growth forecasts are based on the central growth forecast from the Department of Transport, Tourism and Sport (DTTAS) report 'Review of Capacity Needs at Ireland's State Airports - August 2018', and the Central Statistics Office (CSO) 2016-2019 Aviation Stats' TAM05. The CSO statistics are used to cauculate the growth rate up to 2019 and the growth rate from 2020 to 2050 is determined by interpolation from the 2019 passenger forecast to the 2050 passenger forecast contained within the DTTAS report. We have assumed that the growth rate from 2050 will continue until the 2065 forecast year.</p> <p>The MetroLink station location is consistent with the Metro stop identified in the Dublin Airport Masterplan, prepared by daa for the growth and expansion of its facilities into the future, which specifically identifies the station location at the Ground Transportation Hub.</p> <p>Development at the western side of the airport is considered within the Dublin Airport Masterplan as part of the long term expansion proposals and the Proposed Project would not inhibit the ability to connect to this area of the airport.</p> <p>As noted by Response (4) above, the Airport Station has been modelled and designed taking account of the predicted passenger numbers, which includes the modelling showing that 65m long platforms provided are sufficient. Further, the Station has been designed in accordance with daa requirements. The wider development of the Airport is a matter for daa, the scope of the MetroLink project is to provide a Station that meets the requirements of daa, which it does. No future expansion of the metro system at the Airport is currently envisaged to be required.</p> |

| Observation: Railway (Metrolink - Estuary to Charlemont via Dublin Airport) Order 0222 |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |  |
| 28                                                                                     | 3.0 Summary: | 11       | <p>I trust that I have highlighted the flaws with Charlemont as the designated Southern Terminus. I am dubious whether TH have any future plans to ever connect Metrolink with Luas.</p> <p>If ABP approves this RO, then Metrolink passengers shall interface with Luas via a substandard passenger link unsuitable for airport bound passengers.</p> <p>The expected increase in Luas passengers could ultimately be detrimental to the success of Metrolink for Southside passengers (outside of DART connection) that seek to route to Dublin Airport.</p> <p>To ensure uptake and future proofing of Metrolink - the St Stephens Green East (SSE) Metrolink station, combined with a Green Line terminus Spur, is my preferred ideal transfer location.</p> <p>In relation to Dublin Airport, the 65m platform is the limiting factor. DAA expansion plans may be curtailed to this limit as is the M50/M1 constraint today.</p> <p>Traditionally as a nation we don't future proof major infrastructure projects, Metrolink is no different. Expect soul searching when the DAA wish to expand terminals as the Metrolink thwarts line construction options.</p> <p>Finally ABP should query why some select station platforms aren't capable of being future proofed (via locally mined extensions) - if even to ensure a rapid airport service from select stations. (The Current RO predicts- acceleration and deceleration every 1Km, to every station!) An M50 lift may still be quicker for Southside residents.</p> | <p>TII's role is to deliver the MetroLink project as provided for in the previous Transport Strategy for Greater Dublin Area (2016-2035), the current Transport Strategy for Greater Dublin Area (2022-2042) and as supported by the Dublin City Development Plan 2022 - 2028, including flexible options for extending the line. TII have designed Metrolink to comply with this policy, which has been fully adopted and to which An Bord Pleanála must have regard. TII have responded to each of the individual observations made by this submission. TII would note that while there is some merit in considering individual aspects of the proposed project, with any complex urban infrastructure project that involves numerous environmental considerations, a physically constrained existing environment, and future uncertainty on how the World and Dublin may operate, it is important to balance all these considerations and consider the proposed project holistically as explained by Response (5) and (12) above that outlines TII's reasoning for a proposed station at Charlemont, whilst also noting that any extension further south is not precluded should the demand for it arise.</p> <p>TII have explained that MetroLink is more than just a railway to / from the Airport. It serves a number of destinations along the route, provides much needed transport improvements to areas north of the Airport including Swords and wider afield via the provision of the Park and Ride at Estuary, provides key interchanges with DART at Tara Street and Glasnevin, as well forming part of wider integrated transport network that also includes for BusConnects and DART+ which are all included under Project Ireland 2040.</p> <p>TII have also explained that the interchange with the Luas Green Line at Charlemont, including the provision of stairs and lift, has been designed to meet the modelled and predicted passenger demand, and in accordance with daa requirements. Similarly, the Airport Station has been modelled and designed taking account of the predicted passenger numbers, which includes modelling showing that 65m long platforms provided are sufficient.</p> <p>Finally, it is not correct to infer there is no strategic plan and vision, the GDA Transport Strategy presents precisely that whilst recognising that planning for the future presents a degree of uncertainty that needs to be accepted and taken account of. It is not unusual, as illustrated by many existing metro systems around the World, for systems to be progressively expanded when it becomes evident there is a demand and economic benefit. No onward extension is planned at this time, however the need for future extension will be addressed with reference to prevailing circumstances at each Policy/Planning document review. Such policy is not within TII's remit.</p> |  |

Dublin |                                                                                               |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| 1                                                                                                                                                       | Section 1: The plan for new openings/access into Seatown Villas from the Linear Park proposal | 1        | We fully support and agree with the other Seatown Villas residents who had a chance to speak on the call back in October 2021 and outlined their objections to opening up an access point between the R132 and Seatown Villas via the proposed linear park (refer to image 1 & 2). There is no good reason to do this. All it will do is drive additional traffic both vehicular and pedestrian (walking/cycling) into a very quiet residential area.                                                                                                           | While noting your comment supporting an objection to a linear park along the route of the Metrolink, its purpose is aligned to the Fingal Development Plan 2017-2023 (Draft Development Plan 2023-2029) and with Fingal County Council R132 Connectivity Project recently consented. Further detail supporting this statement is provided below.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 2                                                                                                                                                       | Section 1: The plan for new openings/access into Seatown Villas from the Linear Park proposal | 1        | It would not add any significant time delay for people to have to use the current access points via Seatown Road to the Seatown roundabout or via North Street via the R125 to the Estuary roundabout. In fact, as these are the main current pedestrian or cycle options for people today, then it doesn't create an impression that they would be inconvenienced taking the same routes in the future once Metrolink is open.                                                                                                                                 | Permeability and ready access to the Metro are important aspects of the design intent and TII feel that the arrangement indicated in the Railway Order application is the most appropriate in the context of the overall landscape design in this area.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| 3                                                                                                                                                       | Section 1: The plan for new openings/access into Seatown Villas from the Linear Park proposal | 2        | We suggest that you consult with Fingal Council on the issues that they have had with the small children's playground in the Castle park on the other side of North street from Seatown Villas. With the majority of the residents of Seatown Villas either falling into an older demographic as it is the oldest residential estate in Swords or families with smaller children, it would be unfair to turn their peaceful living situation into an area when they would not feel safe with the amount of through traffic from mainly other areas in the town. | <p>TII note your concerns in relation to the proposals for the linear park. TII would like to note that the proposals here have been designed to take into account the R132 Connectivity Project promoted by Fingal County Council and received approval by An Bord Pleanála on 20 January 2022 (planning application reference number JP06F.310145). The R132 Connectivity Project aims to improve the connectivity and safety of pedestrians and cyclists moving along, and across, the R132 and enhance facilities for all road users with particular benefits for those choosing sustainable modes of transportation such as bus users, cyclists and pedestrians.</p> <p>Throughout the Swords area the landscaping proposals outlined in the EIAR and Railway Order have been developed in consultation with Fingal County Council. The proposal aims to improve community connectivity through the development of the linear park linking all of the stations with the community in an open setting. The planned outcome of the Metrolink architectural and urban realm design for this linear park is to discourage anti-social behaviour, through the attractive setting, use of public lighting, open sightlines, and avoidance of areas where individuals and groups of people can hide.</p> <p>More broadly across the proposed MetroLink, Safety and Security is addressed by EIAR Chapter 6, MetroLink Operations and Maintenance. Section 6.6.5.8 specifically addresses managing the risk of "Vandalism or Anti-Social Behaviour on the Trains or within the Stations", and the wider chapter also addresses the broader design proposals for managing security challenges, including:</p> <ul style="list-style-type: none"><li>•The architectural and urban realm design is designed to discourage anti-social behaviour, for example through the attractive setting, use of public lighting, open sight-lines, and avoidance of areas where individuals and groups of people can hide.</li><li>•The Operational Control Centre (OCC) will be the central communications and operational hub, located in the administrative building at the Dardistown Depot. The role of the OCC will include monitoring and managing passenger safety and security and antisocial behaviour. The OCC will direct and deploy staff to manage incidents when required.</li><li>•The access control and intrusion detection (ACID) system will identify intruders trying to enter locations where unauthorised access is prohibited.</li><li>•CCTV will be installed throughout the MetroLink system including at station entrances, public realm and on trains to provide general security and surveillance of all the public areas, and to inform, if required, the directing and sending of staff to manage the situation.</li><li>•There will be a MetroLink staff presence along the route for assisting passengers, security and deterring anti-social behaviour.</li></ul> <p>Further acknowledging your concerns, TII is committed to working with local resident's groups to address concerns that have been expressed in relation to the loss of green space and the impact on the current boundary wall and will continue engagement with these groups in advance of oral hearing.</p> |

| Letter Re: Railway Order Application - MetroLink: Estuary through Swords, Dublin Airport, Ballymun, Glasnevin and City Centre to Charlemont, Co. Dublin |                                                                                               |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |  |
| 4                                                                                                                                                       | Section 1: The plan for new openings/access into Seatown Villas from the Linear Park proposal | 3        | ...this proposed linear park only extends from the proposed Estuary Junction to the proposed pedestrian crossing over the metro line (without any detail about how this new crossing bridges the R132)... sits between a dual carriageway, an exposed section of the metro line and a new planned pumping station. The new zig zag path from the proposed Estuary junction to North street offers the same access as exists currently (and in the proposed new layout) along the pedestrian path by the side of North street.                                                                                                                                                                                                                                                                                                                                                                               | With the development of MetroLink and the FCC led R132 Connectivity project, future crossings of the R132 are intended to be at grade, signalised crossings as indicated on the application drawings. The zig-zag path is part of the overall landscaping scheme, the rationale of which is as outlined in (3) above. See EIAR Chapter 27, The Landscape e.g. section 27.5.3.4                                                                                                                                                                                                        |  |
| 5                                                                                                                                                       | Section 1: The plan for new openings/access into Seatown Villas from the Linear Park proposal | 3        | At the other end, it (the proposed linear park) only serves as a shortcut between Estuary Court and North street via Seatown Villas. Something that is not required as there is direct access from Estuary court via the pedestrian bridge over the Seatown roundabout on the R132 and will continue in the new proposed R132 Connectivity project where the proposed Seatown Road junction concept has both pedestrian and cycling crossings provided at all sides of the junction for easy crossing to either side of Seatown road or south along the R132 which would be the intended direction of travel for the majority of crossings at this junction to access the new proposed Seatown Metrolink station.                                                                                                                                                                                           | See response numbers (1) and (2) and (3) in relation to the landscaping proposals for this area.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |  |
| 6                                                                                                                                                       | Section 2: Alignment of the rail line and the construction method                             | 5        | <p>We would also like to raise a question on the planned construction method described for the portion of the line that will be coming through Seatown Villas in the proposal.</p> <p>There is a section of the line once it is inside the current Seatown Villas boundary described as retained cut design (refer to image 5). Why is this being included in a residential area?</p> <p>Why can't this portion of the line continue as Cut and Cover design, the same as the portion of the line that enters and exits the current Seatown Villas boundary? At least, then there is a possibility to return the green space to closer to what it is currently after the construction works are complete.</p> <p>We would like more information on this regarding studies, regulations and requirements that would dictate for a retained cut section in an otherwise short section of tunnelled track.</p> | <p>A retained cut as opposed to a cut and cover solution has been proposed in this residential area as it is required to ensure the section of cut and cover south of this point will be adequately ventilated. Removing the retained cut section and replacing it with a cut and cover solution will lengthen the cut and cover section requiring the provision of active ventilation fan systems and may compromise emergency egress and evacuation arrangement in the event of an emergency.</p> <p>See also response number (10) in relation to the construction methodology.</p> |  |

Dublin |                   |          |                                                                                                                                                                                                                                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| 7                                                                                                                                                       | Closing paragraph | 6        | The residents of Seatown Villas will have to sacrifice a lot during the construction phase of the Metrolink project given the scale of the project... By returning the space and boundary conditions to the way they are now before any work starts should be the very least we are entitled to. A small community such as what exists today in Seatown Villas should not be made to suffer in order to facilitate the rest of Swords. | <p>See also response numbers (2) and (3) in relation to the landscaping proposals for this area.</p> <p>It is acknowledged that all residents along the route, including those at Seatown Villas will be impacted during the construction phase of the project. Various mitigation strategies to overcome potential construction impacts on the residents along the route have been provided in detail within each of the relevant Chapters of the EIAR, for example: Traffic and Transport (CH09), Noise and Vibration (CH's13 &amp; 14), Biodiversity (CH15), Air Quality (CH16), and Landscape (CH27).</p> <p>The benefits of MetroLink to the boarder community of Swords include but are not limited to: Traffic, reducing congestion and improving air quality; Landscape, through enhancing the existing urban landscape, improving community connectivity and residential amenity; Economic and employment, by attracting commercial enterprise into the area; and Transport, with a quicker and more reliable mode of transport to and from Dublin Airport and the City Centre.</p> <p>By keeping within the Local Landscape Character Area (LLCA), the proposed MetroLink landscape reinstatement along the R132 between the Estuary and Pinnock Hill Roundabouts provides an integrated series of small local parks complete with seating, and planting, adjacent to the residential areas and which interconnects, encouraging pedestrian and cycle use, to form part of the longer green ribbon connecting the broader Swords community with MetroLink and across the R132.</p> <p>The nature of the proposed planting is biodiverse and will mature to provide a much more valuable, connected landscape than is currently the case. The proposed tree planting will be much more appropriately scaled to the adjacent residential open spaces than the existing predominant tall roadside trees.</p> <p>This proposal aligns with the Fingal County Council's R132 Connectivity plans under the Fingal Development Plan 2017 – 2023 (Draft Fingal Development Plan 2023-2029), recently consented in 2022.</p> |

It is not progress to destroy them.                                                                                                                                                                                                                                                                                                                            | See response numbers (3) and (7)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| 10                                                                                                                                                      | Closing paragraph | 6        | These cut and cover & cut and open methods of construction are just cheaper alternatives to full tunnel construction which is what we have been promised since the first “Metro North” project back in 2001.                                                                                                                                                                                                                           | <p>TII have not arrived at the proposed solution for MetroLink through Swords without careful considerations of all of the options available. The final route selection now proposed has evolved from a Route Alignment Options Study, that commenced in 2016 that considered four potential route alignments through the Swords area.</p> <p>One of those route options in this study was along Swords Main Street in tunnel and this was included in the New Metro North Alignment Options Report as part of the preparation for the Emerging Preferred Route (EPR) Consultation process.</p> <p>However, it was not considered to have the same potential to support regional and local growth objectives for Swords and its environs when compared with an alignment along the R132 and therefore was not selected for the Emerging Preferred Route and consultation in 2018.</p> <p>A tunnel is usually the last option considered once other viable alternatives have been ruled out and is thus more typically appropriate in built up city areas due to the excessive demolition of buildings that would be required by other solutions.</p> <p>The EIAR Chapter 7, Consideration of Alternatives details the options that were looked at. [See section 7.6.4.3.3 for option assessment at the northern end of the line]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |

| 1                                                         | Observations | 1        | <p>I refer to the above (NRN Metrolink-Estuary to Charlemont Order 2022) that I am the legal owner/occupier of the above property and in that require I have recieved notification from Metrolink that the tunnel is realigned to go directly underneath my property.</p> <p>I hereby formally and strenuously object to the proposed development on the following grounds:<br/>Substantial and permanent damage to the structure and fabric of my house and boundary walls, serious concern that my house (which significantly slopes downwards)/garden/boundary walls will not withstand the construction;</p> | <p>Thank you for your submission and for sharing your concerns/observations related to the MetroLink project. We have reviewed the submission and provided response for the observations/concerns raised in detail below.</p> <p>A comprehensive Settlement Assessment has been undertaken to determine the potential impacts that construction of the proposed Project will have on sensitive receptors such as buildings and infrastructure from the advance of the TBM. The ground movement predictions and the building damage assessment methodology adopted for MetroLink is based on the approach adopted in most tunnel projects around the world, including London Crossrail and High Speed 2 in England. This is described in EIAR Section 5.4.11 (Ground Settlement Monitoring and Mitigation Works).</p> <p>EIAR Appendix A 5.17 Building Damage Report, covers the assessed impacts of construction generated ground movements and settlement on property. Section 5.2 of this report sets out the rationale for the assessment of properties similar to yours. The results of the assessment provided in Table 5.2 shows that representative properties selected similar to your property, has been assessed as falling within the 'Slight' category. This means that there is no structural damage predicted to your home.</p> <p>The Property Owner Protection Scheme (POPS), committed to by TII, allows residential property owners to register with TII if their residential property is within thirty (30) metres of the edge of the MetroLink alignment or fifty (50) metres of station structures. The POPS comprises condition surveys of residential properties along the route of the proposed Project. The purpose of the condition surveys is to ascertain the condition of the properties before, during (if deemed necessary), and after the completion of the proposed Project to determine whether there has been any deterioration of any of the properties surveyed and whether same may be attributable to the proposed Project, and subsequently to recommend repairs as appropriate. Condition survey data gathered pre and post construction, and possibly during construction, will be used to assist the property owner and TII in swift and accurate verification of any property damage claims which may be received from property owners. The POPS is designed to cater for / address repair work which may be necessary for any damage (attributable to the proposed Project) to a qualifying residential property up to a threshold of €45,000. The POPS will be introduced by TII through public consultation and will be formally advised to eligible property owners by the Public Relations Department.</p> <p>Further information on POPS is available in Chapter 11 (Population &amp; Land Use). Useful information can also be found in the MetroLink Frequently Asked Questions document which can be found online at:<a href="https://www.metrolink.ie/en/your-property/property-owners-protection-scheme">https://www.metrolink.ie/en/your-property/property-owners-protection-scheme</a> and this is where useful updates will be made available as the proposed Project progresses.</p> |
| 2                                                         | Observations | 1        | Significant concerns that the utilities (water, sewerage, gas, electricity, telephone/broadband) will adversely be impacted upon;                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | Based on the settlement analysis methods described in Appendix A22.1 and the residual impacts identified in Table 22.12, there are no predicted impacts on utilities in this area.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| 3                                                         | Observations | 1        | <p>Serious concern of the depth below ground level of the tunnel and the distance from my house to top of the tunnel (no information has been furnished; essential as I am sloping downwards);</p> <p>Trespass into the subsoil underneath my property;</p>                                                                                                                                                                                                                                                                                                                                                      | <p>The TII issued letter ref CAP_ML_0097_04 dated 20th September 2022 to you. This letter contained detailed information of the substratum acquisition. The overall depth from ground level to the top of the tunnel is 12m as shown on drawing ML4L-U42 within the letter pack. The drawing shows your property location relative to the tunnel.</p> <p>EIAR Chapter 21 (Land Take), Section 21.6.1.2, outlines the Compensation for Compulsory Purchase process. Under the Transport (Railway Infrastructure) Act 2001 (as amended) should a Railway Order be granted by An Bord Pleanála and-upon its commencement, TII will be authorised to acquire compulsorily any land or rights in, under or over land or any substratum of land that is specified in the Railway Order. TII will be authorised to serve a notice to treat pursuant to the provisions of the Housing Act, 1966, (including Section 79 thereof) and also have the right to enter onto other lands for the purposes of carrying out the works permitted under the Railway Order. The acquisition of rights and interests in the required land and property, is necessary to ensure the delivery of the MetroLink project in its entirety.</p> <p>Further information can be obtained from the MetroLink Compulsory Purchase Order Guideline document (September 2022) which can be found on-line at: <a href="https://www.metrolink.ie/media/0jlpbyso/metrolink_cpoguideline_final_september-2022.pdf">https://www.metrolink.ie/media/0jlpbyso/metrolink_cpoguideline_final_september-2022.pdf</a></p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| 4                                                         | Observations | 1        | Loss of privacy;                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | The proposed Project may have some impact upon your property and within the local environment generally, there is unlikely to be a loss of privacy specific to your property as a consequence. Local areas in which the landscapes may be altered due to the Project, refer to EIAR Section 27.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

| Letter Re: NRA Metrolink-Estuary to Charlemont Order 2022 |              |          |                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| 5                                                         | Observations | 1        | Impact on parking and servicing;             | <p>As outlined in EIAR chapter 9.5.2.4.5.1 Future Receiving Environment- Parking and Loading, there will be no change to current parking facilities within the AZ4 Northwood to Charlemont areas.</p> <p>As part of the preparation for the construction phase the appointed contractor for the works at both of these stations will prepare a detailed CEMP that will include plans to mitigate construction workers parking locally with the preparation of the Construction Mobility Plan , one of the key aspect of which is to encourage all forms of transport with the exception of car use. This document forms part of the CEMP documentation to be submitted for Dublin City Council approval prior to the Main works commencing at these locations. The Construction Mobility Plan can be found in EIAR Chapters A5.1 and forms part of the outline CEMP.</p> <p>Chapter 5 of the EIAR, MetroLink Construction Phase, explains that traffic management plans for the construction phase of the Project that have been developed to minimise the impact on road users, and to maintain access to businesses and other premises. Prior to implementation, all traffic management measures will be agreed with Dublin City Council and where relevant, consultation with An Garda Síochána and other statutory stakeholders will be undertaken.</p>                                                                                                                                                                                                                                                                                                                                                                                                                |
| 6                                                         | Observations | 1        | Significant increase in traffic levels;      | <p>The Scheme Traffic Management Plan - STMP (Appendix A9.5) provides a summary of the magnitude of the impact of the proposed Project's Construction Phase on each of the user groups (public transport, general traffic, vulnerable users, parking and loading). Detailed descriptions of the works at each site and the associated HGV routing or each routing are also presented in the STMP, with further details found in Chapter 5, MetroLink Construction Phase. The STMP assessment is based on the current MetroLink Project Design Report and Temporary Traffic Management - TTM designs/layouts, as well as estimates of when the Construction Phase will commence including timescales. The assessment uses 2028 as the most impactful construction year, in terms of construction vehicle numbers.</p> <p>Appendix A9.5 provides the Scheme Traffic Management Plan, for which section 7.5 refers to Griffiths Park and section 7.6 refers to Glasnevin. While the works will attract additional traffic to and from both locations, the assessments of vehicle movement indicates a slight (&lt;10%) traffic flow increase and slight driver delay (&lt;180 seconds) and are not considered likely to give rise to any potential significant effects.</p> <p>In order to distribute construction traffic evenly between these two sites, separates routes to each location have been planned. Within sections of the Scheme Traffic Management Plan (A9.5), Figure 7-18 details the proposed routes to and from Griffiths Park from the M50 (Junction 4) along the R108, while Figure 7-22 details the proposed routes to and from Griffiths Park from the M50 (Junction 5) along the R135. In this manner residual impacts are mitigated in this area.</p> |

| 8                                                         | Observations | 1        | Loss and damage to trees, shrubs and plants; | <p>TII acknowledge that the loss of trees is unfortunate but have included for suitable mitigations across MetroLink to offset the temporary impacts.</p> <p>The inclusion of measures to avoid, reduce and offset significant adverse landscape and visual effects forms an inherent part of the brief and design thinking of the various disciplines involved in the development of the design for the proposed Project. A major part of the landscape design for the project has therefore involved the identification and retention of valuable landscape assets where possible and feasible, across the proposed Project. This includes existing mature trees, historic paving, railings and street furniture elements. These proposals include for example, the provision of tree and woodland planting which effectively replace trees unavoidably lost as a result of the alignment, design and construction of the proposed Project – this forms part of the embedded primary mitigation included within the landscape design. In most circumstances however, the designed planting as proposed is more appropriately scaled to the pertaining landscape context and is invariably more biodiverse than the baseline planting lost. These aspects of the proposed Project go beyond the requirements of mitigation and are in effect improvements over and above the baseline, which may often be referred to as “enhancements” . Specific landscape and visuals impact areas assessed are described within section 27.5.4 of the EIAR.</p>                                                                                                                                                                                                                       |

| 9                                                         | Observations | 1        | Loss of ecological habitats;<br><br>Impact on wildlife and domestic animals; | EIAR section 15.4.2.2 assesses the potential impact of the proposed Project on habitats. The types of habitats within the boundary of the proposed Project that will be impacted on as a result of direct permanent habitat loss, or temporary habitat loss, in the case of the habitat type canals, are described within Table 15.17. EIAR section 15.1 presents the mitigation measures to avoid or reduce the potential impacts of the proposed Project on biodiversity.<br>Where there are significant residual biodiversity impacts as a result of the proposed Project despite the mitigation measures proposed, compensatory measures are proposed to offset or reduce the predicted impacts as detailed in EIAR section 15.8.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |  |
| 10                                                        | Observations | 1        | Access road safety issues;<br><br>Traffic generation;                        | Throughout the construction phase, where necessary, a safe alternative routes will be provided for pedestrians and vulnerable road users, such as children, and persons with restricted mobility, to maintain pedestrian access to premises. Where detour routes are required, these will be kept as short as possible and detour signage will be clear and easy to understand. All construction sites will be designed to be as unobtrusive as possible and traffic management measures will be designed with the safety of all users as a key principle. The EIAR Chapter 9, Traffic and Transport, section 9.7.1.2 includes for a Scheme Traffic Management Plan (STMP) to manage traffic movements during the construction phase to ensure traffic congestion is minimised.<br><br>Safety has been central to the design development of stations, the P&R and surrounding areas to ensure that they are safe for all users to use. This has been achieved by ensuring that the design is based on the following relevant principles as described in EIAR Section 4.6.3.7.<br><br>Traffic generation, please refer to response number (6) above.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |  |
| 11                                                        | Observations | 1        | Drainage/flood risk - the area is particularly prone to serious flooding;    | There is no additional serious flood risk due to MetroLink works at this location. The design will cater for any local drainage intercepted by the works but note the distance of the stations from your property. A baseline assessment of flooding was undertaken and is included within Appendix A18.5 Flood Risk Assessment. Details of mitigation and management of flood risk, refer to EIAR section 18.6.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |  |
| 12                                                        | Observations | 2        | Disturbance and health risks from smells/odours/noxious fumes;               | Due to the distance of your property to the nearest station compound at Griffith Park (within approximately 300m), there is little to no risk to your property. The proposed Griffith Park compound location is shown on EIAR diagram 5.49. and the general arrangement drawings ML1-JAI-ARD-ROUT_XX-DR-Y-03074 & ML1-JAI-ARD-ROUT_XX-DR-Y-03073 within alignment Details Book 2 of 2 Dublin City Council.<br><br>The EIAR has fully assessed the potential impacts on the local population generally, summarised below:<br><br>Chapter 16 - dust and other air quality emissions impact assessment and proposed mitigation measures. The potential risk from dust emissions has been reviewed for the critical activities at each of the construction areas. The Construction Environmental Management Plan (Appendix A5.1) will be used to manage the construction phase dust emissions. In addition, before commencing works, an Air Quality Management Plan shall be prepared and submitted in advance to the relevant planning authority. The plan will include all appropriate dust and emissions mitigation measures applicable to the circumstances of the relevant site, based on the local authority requirements and industry best practices.<br><br>As detailed in section A5.15 Waste Management, all contractors will maintain their duty of care to protect the interests and safety of others from the potential effects related to waste and ensure that waste generated during the Construction Phase is handled in accordance with the relevant legislation governing its storage, transfer, treatment and disposal. All necessary measures will be taken to ensure that waste management is carried out without endangering human health and without harming the environment, and in particular:<br><br>- Without risk to water, air, soil, plants or animals;<br>- Without causing a nuisance through noise or odours; and<br>- Without adversely affecting the countryside or places of special interest |  |

| Submission No.                                            |              |          | 012                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

| 13                                                        | Observations | 2        | Noise pollution;                                                                                                                                                                                                          | <p>Potential impacts associated with airborne noise and vibration during the construction phase of the proposed Project are addressed in Chapter 13 (Airborne Noise &amp; Vibration). As this location is approximately 300m from construction activity at surface level, no airborne noise or vibration impacts are expected as indicated in Appendix A13.7. A13.7 details the predicated construction noise impact at the receptor locations in the vicinity of Griffith Park Station.</p> <p>Chapter 14 considers Groundborne Noise and Vibration, the Appendix 14.5 Groundborne Noise and Vibration Blasting Modelling Results presents predicted groundborne noise and vibration levels during the construction and operation phase of the project for 1 Fairfield Road.</p> <p>The predicted level of groundborne noise during TBM passage in proximity to your property is anticipated to be 50 dB LASmax, which is above the 45 dB LASmax threshold, resulting in a significant impact as the TBM progresses by your property in a matter of days and no more than two weeks.</p> <p>The predicted level of groundborne vibration during TBM passage is 0.295 ms-1.75, which is lower than the VDV Threshold Level of 1.0 ms-1.75, resulting in a not significant impact on the building.</p> <p>Unfortunately, there are no effective methods are available to reduce groundborne noise from TBMs at source. The principal mitigation measures aimed at minimising impacts are as follows:</p> <ul style="list-style-type: none"><li>• Advance public consultation and stakeholder engagement can greatly reduce the significance of groundborne noise effects during construction, as building occupants would be prepared for the passage of the TBM and resultant elevated noise and vibration levels.</li><li>• TII will accept and consider applications for additional measures on a case-by case basis, in accordance with its Noise and Vibration Mitigation Policy (see Appendix A14.6).</li></ul> <p>The Transport Infrastructure Ireland (TII) Airborne Noise and Ground-borne Noise Mitigation Policy (Appendix A14.6 of Chapter 14) sets out the construction noise insulation and temporary rehousing measures to be implemented where required.</p> |

| 15                                                        | Observations | 2        | Significant and substantial vibration during construction and in the aftermath when the project is complete - I request that meters be installed in my property to measure levels;                                        | As described in EIAR section 14.4, the predicted level of groundborne vibration during TBM passage is 0.295 mms-1.75, which is lower than the VDV Threshold Level of 1.0 mms-1.75, resulting in a not significant impact on the building. Similarly, in operation, no significant impacts are predicted with vibration levels at 0.010 mms-1.75 (worst predicted case) , hence monitoring is not required.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 19                                                        | Observations | 2        | Right of support to my property from soil/earth is being interfered with serious risk of collapse, given the age of my property (circa 100 years), resulting from excavation interference with right to natural drainage; | Please refer to response numbers (1) and (2) above.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

| Letter Re: NRA Metrolink-Estuary to Charlemont Order 2022 |              |          |                                                                                                                                                                                                                                                                                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| 20                                                        | Observations | 2        | Impact on the environment/ecology/heritage of my property and the general area;                                                                                                                                                                                                                                      | <p>The potential impacts associated with the construction phase activities of the proposed Project on the residences (including this property) and businesses are addressed in Chapter 11 (Population &amp; Land Use) of the EIAR, with mitigation measures proposed where required. This includes potential noise and vibration impacts from construction activities as detailed in Chapter 13 (Airborne Noise &amp; Vibration) and Chapter 14 (Groundborne Noise &amp; Vibration), disturbances to the local road network as detailed in Chapter 9 (Traffic &amp; Transport), and dust risk as detailed in Chapter 16 (Air Quality).</p> <p>The EIAR Chapter 15, Biodiversity, describes and assess the likely direct and indirect significant effects of the proposed MetroLink Project on Biodiversity, with particular attention to species and habitats protected under Directive 92/43/EEC and Directive 2009/147/EC. This Chapter also provides a characterisation of the receiving environment within the proposed Project and within a wider study area in the vicinity of the proposed Project and the proposed mitigation measures to ameliorate the predicted impacts.</p> <p>Measures to mitigate and monitor the predicted impacts as a result of construction activity across the proposed Project are also detailed in Chapter 5 (MetroLink Construction Phase) and summarised in Chapter 31 (Summaries of the Route Wide Mitigation &amp; Monitoring Proposed).</p> <p>Furthermore, a Project Conservation Architect (PCA) has been engaged to oversee the implementation of the Project. Prior to the establishment of construction compounds, the Project Conservation Architect (PCA) will undertake Structural and Condition Surveys of any built and cultural heritage constraints that will require removal to secure storage (followed by conservation and reinstatement) or protection in-situ. The PCA will also prepare specifications for these works. A specialist Heritage Works Contractor will be appointed to remove, store and conserve these constraints. The Main Construction Works Contractors will appoint Consultant Conservation Architects to implement required preservation of in situ works. Refer to EIAR Section 5.4.4</p> <p>Additionally, the POPS scheme, through which condition surveys of private properties and other selected properties along the route of the proposed Project will be commissioned. Your property will qualify for this scheme as it is located within 30m of the tunnel alignment. Please refer to response number (1) above.</p> <p>EIAR Section 4.6.3 describes the implementation of sustainable policy areas within the Project design. This includes several initiatives in order to meet the project sustainability aims outlined in TII's Sustainability Implementation Plan. Some of theses initiatives include Climate Change Mitigation, Biodiversity, Heritage, Skills and Learning, health and wellbeing amongst other items. The operational impacts on human health are described in section 10.5.2 in which the potential for positive impacts are described.</p> |
| 21                                                        | Observations | 2        | Significantly interfering with and diminishing my right to extend/expand my property;<br><br>Very substantial devaluation of my property;<br><br>Interfering with my right to dispose of my property at full market value;<br><br>Postponing my right to sell/dispose of my property until construction is complete; | <p>TII have confirmed that your property may be subject to substratum acquisition. Drawing no:ML4L-U42 confirms the proposed tunnel alignment and the extent of the proposed acquisition which is 12m below ground level. A substratum acquisition can proceed without affecting the above ground property and therefore this should not preclude any intentions to dispose. There are no restrictions to altering or extending the property with or without the need for planning consent. Where a planning permission is required, all applications along the alignment will be referred to TII.</p> <p>Regards devaluation, there is evidence to suggest that property values will in fact increase in close proximity to public transport infrastructure and that local residents will greatly benefit from having a world class Metro system providing access to the city centre, airport and north city at their doorstep. The benefits of the project for all communities along the MetroLink route are described in Chapter 3: Background to the MetroLink Project, section 3.4 MetroLink Response to Challenges.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

We have reviewed the submission and provided response for the observations/concerns raised in detail below.</p> <p>TII acknowledge the location of your property within the Prospect Architectural Conservation Area and is committed to having a Property Owner Protection Scheme (POPS) in place prior to construction works commencing to provide protection to your property during the completion and commissioning of the works. Once you have registered it is intended that the scheme will provide protection for residential property owners such as yourselves that are located within 30m of the edge of the MetroLink alignment.</p> <p>The POPS comprises condition surveys of residential properties along the route of the proposed Project. The purpose of the condition surveys is to ascertain the condition of the properties before, during (if deemed necessary), and after the completion of the proposed Project to determine whether there has been any deterioration of any of the properties surveyed and whether same may be attributable to the proposed Project, and subsequently to recommend repairs as appropriate. Condition survey data gathered pre and post construction, and possibly during construction, will be used to assist the property owner and TII in swift and accurate verification of any property damage claims which may be received from property owners. The POPS is designed to cater for / address repair work which may be necessary for any damage (attributable to the proposed Project) to a qualifying residential property up to a threshold of €45,000. The POPS will be introduced by TII through public consultation and will be formally advised to eligible property owners by the Public Relations Department.</p> <p>Further information on POPS is available in Chapter 11 (Population &amp; Land Use). Useful information can also be found in the MetroLink Frequently Asked Questions document which can be found online at: <a href="https://www.metrolink.ie/en/your-property/property-owners-protection-scheme/">https://www.metrolink.ie/en/your-property/property-owners-protection-scheme/</a> , and this is where useful updates will be made available as the proposed Project progresses.</p> <p>Information regarding any situations requiring relocation and the process for financial compensation for property impacts directly related to the proposed Project is provided in Chapter 11 (Population &amp; Land Use) and Chapter 21 (Land Take) of the EIAR.</p> |
| 2                                                                                                                                                                            | Property Protection: Section 2.1 | 15 and 16 | <p>TII must clarify that during the construction of MetroLink, which will take a minimum of 9-10 years, my property will be covered by the Construction firm's insurance. This cover must protect my property from all possible damage duration of the entire construction period.</p> <p>My property is within thirty meters of the edge of the MetroLink and as such will be covered by Til's Property Owners' Protection Scheme (POPS).</p> <p>TII proposes that the POPS scheme, to protect property owners, (once the Operation of MetroLink is in place) will be for one year only.</p> <p>This entire area is part of the Prospect Architectural Conservation Area and must be preserved. As such, the POPS insurance cover must be increased from 1 to at least 10 years, to ensure the safety of my property from damage during the fist 10 years of the Operational period.</p> | <p>In the unlikely event that your property is significantly impacted by the MetroLink works any damage to your property will be covered by the project insurances. In addition as your property is located within 30m of the alignment and can therefore avail of the Property Owners Protection Scheme. Under this scheme such you choose to avail of it, TII will arrange for an independent surveying company to carryout surveys pre, during and post completion of the construction works. Any damage up to a limit of 45,000 euro will covered by the POP scheme. The POP scheme will remain in place for a minimum of 2 years post completion of the main infrastructure construction works.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| 3                                                                                                                                                                            | Property Protection: Section 2.1 | 16        | <p>TII must inform property owners of:</p> <ul style="list-style-type: none"><li>- The implications to their own home insurance during the construction and operation period.</li><li>- The short and long term implications of resale value of their properties.</li></ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | <p>As noted at item 2 above, during the construction phase and subject to registering for POPS your property will be protected against any damaged caused by the MetroLink works. It is the property owners responsibility to notify their insurance company to any change in circumstances which may impact their policy, though as this is a substratum acquisition which is approx. 12m below ground level, the impact to the above ground property is likely to be negligible. Where substratum land is to be acquired Rule 17, section 48 of the Planning and Development (Strategic Infrastructure) Act 2006 will apply. The substratum value for deep tunnel projects is that it is has no value in the market due to its depth below the surface and its limited use, therefore property values should not be impacted. | 4                                                                                                                                                                            | Section 2.2 Representation at the Oireachtas | 16 to 21 | Joint Committee on Transport, Tourism & Sport, discussing Architectural Conservation Area April 2018. Concerns not yet answered in summary include:<br>- Confusion on the alignment of the MetroLink beneath properties.<br>- Concerns raised on the public consultation process, particularly the duration and access to information to allow residents to have input.<br>- CPO of Brian Boru pub which was mentioned in James Joyces Ulysses.<br>- Uncertainty on the duration of the works.<br>- Impact from construction and tunnelling activities: traffic, noise and dust pollution and health and safety of residents. Similar implications for education , health, safety and sporting and recreation activities of school children in a mini Gaeltacht Area.<br>- Assurance that the area will be reinstated after the works are completed.<br>- Requested that the public consultation period can be extended. | TII disagree that we have not addressed concerns previously raised. TII have undertaken extensive consultation across the route of MetroLink and have listened carefully to the concerns of stakeholders and the community, as documented within EIAR Chapter 8. Furthermore TII have undertaken a detailed and an extensive Environmental Impact Assessment Report that identifies and addresses environmental concerns as evidenced by the submitted EIAR, including proposed mitigations to reduce environmental impacts, that accompanies the MetroLink RO application.<br>- Confusion on the alignment of the MetroLink beneath properties. - This is addressed in Chapter 21 Land Take<br>- Concerns raised on the public consultation process, particularly the duration and access to information to allow residents to have input. - Chapter 8 Consultation<br>- CPO of Brian Boru pub which was mentioned in James Joyces Ulysses. - Addressed in Chapter 21 Land Take & Chapter 26 Architectural Heritage<br>- Uncertainty on the duration of the works. Chapter 5 MetroLink Construction Phase & Appendix A5.2 Construction Programme<br>- Impact from construction and tunnelling activities: traffic, noise and dust pollution and health and safety of residents. Similar implications for education , health, safety and sporting and recreation activities of school children in a mini Gaeltacht Area. Covered in Chapter 5 MetroLink Construction Phase, Appendix A5.1 Construction Environmental Management Plan, Chapter 9 Traffic & Transport, Chapter 10 Human Health, Chapter 11 Population & Land-Use, Chapter 13 & 14 Airborne & Groundborne Noise and Vibration, Chapter 16 Air Quality<br>- Assurance that the area will be reinstated after the works are completed. Chapter 5 MetroLink Construction Phase & Chapter 27 Landscape<br>- Requested that the public consultation period can be extended. - Consultation Period was extended from 25th November 2022 to 16th of January 2023 |
| 5                                                                                                                                                                            | Section 2.3 Noise, Vibration and POPS        | 22       | Requested that Floating Tracks be placed underneath Prospect Architectural Conservation Area, to protect properties from damage, noise and vibration.<br><br>TII must guarantee (no noise heard or vibrations felt) by maintaining tracks and wheels of MetroLink trains, to lessen noise and vibrations, should Floating Tracks not be installed.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | TII have given due consideration to the design and, having fully assessed for operational noise and vibration, found no reason to consider Floating Tracks as a requirement under the Prospect Architectural Conservation Area.<br><br>TII refer you to the following for your information.<br>Section 14.4.2.6, AZ4 Northwood to Charlemont (that includes Griffiths Park and Glasnevin Station) of the EIAR Chapter 14, Ground-borne Noise and Vibration, presents the results of the assessment of potential groundborne noise and vibration impacts from the operational railway sources. The threshold of a significant impact from groundborne noise for receptors in AZ4 is 40dB L <sub>Amax,s</sub> . Contours of groundborne noise are presented in Figure 14.6, the contours indicate a groundborne noise contour of 40dB L <sub>Amax,s</sub> at an approximate distance of 16m from the track centre. There are no exceedances predicted of the groundborne noise threshold for residential receptors in the geographical area of AZ4.<br><br>The calculated vibration levels are below the threshold for structural damage for any building type, as presented in Table 14.8. Section AZ4 Northwood to Charlemont. Calculations of groundborne vibration during the Operational Phase are presented in Table 14.45. There are no predicted significant impacts for vibration from railway operation in the geographical area of AZ4. The calculated vibration levels are below the threshold for structural damage for any building type, as presented in Table 14.8.<br><br>TII will implement a suitable maintenance regime once operational to ensure that threshold levels are not breached.                                                                                                                                                                                                                                                                                                           |

| 6                                                                                                                                                                            | Section 2.3 Noise, Vibration and POPS | 22 and 23 | <p>Buildings within the ACA have shallow foundations on clay. No evidence provided on how the clay will need to settle. Therefore an extended POP period is needed for properties within the ACA.</p> <p>If damage is to occur to my house and the terrace of houses, it will more than likely happen within the construction period. However, no allowances have been made for the settlement of clay underneath my property. TII must address this and protect all property owners in our ACA.</p> | <p>Please refer to response (1) above for information related to the POPS scheme.</p> <p>Buildings and Infrastructure - A comprehensive Settlement Assessment has been undertaken to determine the potential impacts that construction of the proposed Project will have on sensitive receptors such as buildings and infrastructure from the advance of the TBM. The ground movement predictions and the building damage assessment methodology adopted for MetroLink is based on the approach adopted in most tunnel projects around the world, including London Crossrail and High Speed 2 in England. This is described in EIAR Section 5.4.11 (Ground Settlement Monitoring and Mitigation Works).</p> <p>The type of building, the depth of tunnelling, the ground within which the tunnel is constructed as well as the ground between the tunnel and your property has been used in undertaking the assessments. EIAR Appendix A 5.17 Building Damage Report, covers the assessed impacts of construction generated ground movements and settlement on property. Section 5.2 of this report sets out the rationale for the assessment of properties similar to yours. The results of the assessment provided in Table 5.2 shows that your property (Ref B - 120), as one of the representative properties selected, has been assessed as falling within the 'Negligible' category. The building risk categories shown in Table 4-4 of the aforementioned report are used to define the degree of building damage related to the Risk Category. According to this Table, the Negligible damage category refers to hairline cracks.</p> <p>Appendix A5.17 Appendix C contains the predicted settlement contour drawings. Sheet 22 of 30, drawing ML1-JAI-EIA-Rout_XX-DR-T-21142 refers to the tunnel alignment relevant to your property.</p> <p>EIAR Chapter 14, Groundborne Noise and Vibration, presents predicted vibration levels arising from mechanical excavation and blasting. In all cases vibration levels will be maintained within limits that do not cause damage to property.</p> |
| 7                                                                                                                                                                            | Section 2.3 Noise, Vibration and POPS | 23        | <p>Requested that thorough surveys be carried out before, during, and after construction. I also request that should any damage, cracks, or settlement occur they are closely monitored. It is imperative that every three months, measurements of the settlement is carried out, regardless of any appearance of damage.</p> <p>No information regarding the potential damage to property has been given by TII.</p>                                                                                | <p>Information with regard to potential damage to property is comprehensively provided in the EIAR. Please refer to responses (1) and (6) above.</p> <p>A scheme wide ground movement monitoring plan will be developed consistent with the analysis provided in the EIAR. The ground movement monitoring plan will developed by the appointed contractors and approved by TII prior to its implementation. Affected property owners will be informed as to the extent and frequency of the required monitoring in advance of the works commencing. Movement monitoring will be undertaken prior to and during the period that settlement is anticipated and would only cease when the ground movement is demonstrated to have stopped.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
