| Letter Re: Railway (MetroLink-Estuary to Charlemont via Dublin Airport) Order 2022, Estuary Court Submission No. 2- Short and Long Term Impacts of the Proposed MetroLink Route Through Estuary Court |                                                       |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| 26                                                                                                                                                                                                    | 5. Concerns during Construction                       | 30       | If the project is delayed or stopped after construction has started (e.g., issues with finance or Contractor goes into liquidation) - There must be assurances that the area will not be left as a building site and must be reinstated as soon as possible. A reinstatement fund should be put aside in the event that this happens.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | The MetroLink project received Preliminary Business Case approval from Government in June 2021. Work will commence once the statutory planning process has been completed and an Enforceable Railway Order is in place. The timescale then envisaged for construction is indicated in EIAR Appendix A5.2 Construction Programme.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| 27                                                                                                                                                                                                    | 5. Concerns during Construction                       | 28       | The Railway Order Application and in particular the Environmental Impact Assessment Report (EIAR) has identified some of the concerns and set out mitigation measures to be implemented by the Contractor. We believe for some work activities there may be a conflict of interest between the contractor getting the work done and keeping within their limits, in order for transparency and to give the residents some confidence that the Contractor is staying within its limits, we believe an independent consultant should be appointed to the local resident groups in order to monitor and report on noise, vibration, air pollution etc. and they must have the power to stop construction works if the contractor is in breach of the limits. This could be included as a special condition of planning.                                                                                                                                                                                                                                               | <p>TII can confirm that the design and build contractor will be required to design and construct the works in accordance with consent Railway Order and the EIAR for the scheme. The contracts being put in place with potential contractors will be designed to ensure compliance with the consented Railway Order and ensure that the works are carried out in a controlled fashion and do not not exceed the predicted environmental impacts detailed in the EIAR. In addition TII will have a strong supervisory role in the delivery of the contract and will have a strong presence on site to ensure compliance with all relevant standards and constraints.</p> <p>TII as Sponsoring Agency are responsible for the delivery of the MetroLink project. We can confirm that our main aim is to deliver the construction of the scheme in a safe and efficient manner, whilst minimising the environmental impacts of the scheme on property owners during the construction phase. TII therefore does not accept that its main aim is to "reduce construction costs regardless of the negative consequences for property owners"</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| 28                                                                                                                                                                                                    | 5.1 Airborne and Ground borne Noise from Construction | 31       | <p>Ground borne noise and vibration can interfere with activities and affect human occupants in many ways. We mentioned above about the risk of structural damage to our properties however, the quality of life can also be greatly reduced and can be impacted primarily through distraction. There is a significant risk of vibrations to the houses in Estuary Court and this can produce secondary noise and or rattling and movement of the houses.</p> <p>The construction program provided does not detail how long the cut and cover section will take at Estuary Court however, it would be reasonable to assume it will be similar to the length of time to the Estuary Court satellite compound for (i.e., 36 months). That's 3 years of putting up with the 'very significant' noise disturbance for 12 hours per day and 6 hours on a Saturday. This will have a serious impact on the health and wellbeing of the residents especially for the residents closest to the works, residents who work shift work / night work or working from home.</p> | <p>The EIAR presents a comprehensive and detailed assessment of both ground borne and airborne noise and vibration in Chapter 13 and 14 of the EIAR. The assessments include for predictive modelling in order to identify the potential impacts on all sensitive receptors during both the construction phase and the operational phase.</p> <p>As outlined in section 14.4.1.1 in Chapter 14, there are no predicted significant groundborne noise and vibration impacts predicted for buildings at this location.</p> <p>Section 13.7.1.1.1 in Chapter 13 states:<br/><i>During cut and cover, retained cut works and associated support compounds along the R132, a number of NSL [Noise Sensitive Locations] are identified to remain above the CNT [Construction Noise Threshold] with the inclusion of on-site control measures and enhanced hoarding heights. The duration of works at any NSL is expected to exceed the duration for significant effects during this phase of works. The identified NSLs along this section of work are described in Table 13.86.</i></p> <p>These include receptors at Estuary Court. Significant mitigation is proposed to include 4m high noise barriers and further proposed mitigation in line with the Airborne and Ground borne Noise Mitigation Policy (Appendix A14.6). On the implementation of these measures the residual impacts are predicted to be moderate. However, as outlined in Transport Infrastructure Ireland (TII) Airborne and Groundborne Noise Mitigation Policy (Appendix A14.6) there is a process proposed whereby further mitigation measures including temporary relocation can be implemented at individual properties should this be merited.</p> |

| Letter Re: Railway (MetroLink-Estuary to Charlemont via Dublin Airport) Order 2022, Estuary Court Submission No. 2- Short and Long Term Impacts of the Proposed MetroLink Route Through Estuary Court |                                                      |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| 29                                                                                                                                                                                                    | 6. Concerns After Metrolink is Built and Operational | 32       | The construction of the Metrolink in Estuary Court will have a barrier like effect on natural ground water flows. It is very difficult to predict how this will impact Estuary Court, but it is likely to affect the natural flows and there is the potential of rising water table levels and possible flooding.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | The proposed Project will result in an increase in the area of impermeable surfaces due to the construction of the track bed, new stations, P&R, depot and other associated infrastructure. To ensure no associated increase in flood risk, the proposed Project developed an overarching Drainage Strategy to ensure the implementation of Sustainable Drainage Measures (SuDS). These measures, which will be further developed through detailed design, are in line with CIRIA SuDS manual C753 (2015), Greater Dublin Regional Code of Practice and associated GDSDS Technical Documents and Fingal CC Blue/Green infrastructure for Development Guidance Note. The proposed measures are designed to ensure no increase in existing runoff rates throughout the proposed new development as a consequence of the works. It is further noted that there is no specific history of flooding at Estuary Court. (See EIAR App18.5 Flood Risk Assessment).                                                                                                                                                                                            |
| 30                                                                                                                                                                                                    | 6. Concerns After Metrolink is Built and Operational | 32       | There are currently many mature trees (30 years) and much landscaping along our boundary wall. If this landscaping must be removed to allow for the construction works, it should be reinstated with as many mature trees as possible. It is also important that there is a maintenance plan in place after the construction has completed to ensure that the trees and landscaping can flourish and grow to an acceptable state in a reasonable amount of time.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | See response items (3),(5) and (9) above.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| 31                                                                                                                                                                                                    | 6. Concerns After Metrolink is Built and Operational | 32       | With Estuary Court location very close to the proposed Seatown Station, there is a risk that people will use Estuary Court as a park and ride facility. We would like to liaise with the TII and Fingal Co. Co. on this to agree on the optimum solution.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | As detailed in Chapter 06 (MetroLink Operations and Maintenance), the Project has been designed to ensure maximum interchange with other modes of transport, specifically, sustainable modes such as public transport, walking and cycling, rather than private vehicles for those within the station catchment. Overall, the provision of MetroLink will reduce the number of car trips to and from the area, as evidenced in Chapter 09 (Traffic and Transport) and Appendix A9.2-L Seatown Station that there will be a reduction of up to 2,000 car trips to and from the zones within 2km of Seatown Station over the 12hr period, reducing the demand for informal parking around the stations.<br><br>Additionally, the Park and Ride Facility provided at Estuary Station will be less than 1.5km from Estuary Court and therefore anyone wishing to drive to and park in the Swords area is likely to use this facility which will accommodate approximately 3,000 vehicles.<br><br>TII will continue to work closely with FCC post construction to identify and remedy any further difficulties which may arise in relation to this matter. |
| 32                                                                                                                                                                                                    | 7. Conclusion                                        | 33       | The residents of Estuary Court do not oppose the Metrolink project and we acknowledge the significant benefits it will bring to the Swords area. However, we believe the long and short-term impact to the Estuary Court residents must also be taken into account. We believe there are solutions available if the TII are willing to listen. We have set out below some mitigation measures that we would like them to consider.<br>1 . Re-align the Metrolink onto the R132 as originally intended (Please see our Submission No. 1 - Submission 090). This solution would allow us to keep our estate the way it is. By keeping the wall and mature trees, this aligns to the Planning Masterplan for the Seatown area and allows Estuary Court to continue to be a child friendly and healthy urban environment as set out in the Sustainable Swords Strategy 2022. As the works will be further away from our houses, this will also reduce the disturbance from construction and potential damage to our properties. This is our preferred solution and with the big opportunity from the R132 Connectivity project, we believe it warrants due consideration. | For details on the R132 alignment option, see response (4) to submission #90 also from the Estuary Court residents.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

| Letter Re: Railway (MetroLink-Estuary to Charlemont via Dublin Airport) Order 2022, Estuary Court Submission No. 2- Short and Long Term Impacts of the Proposed MetroLink Route Through Estuary Court |               |           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 33                                                                                                                                                                                                    | 7. Conclusion | 33 and 34 | <p>2. If there is a robust technical (not just cost or programme length) argument to say the Metrolink cannot be re-aligned to the R132 then the impact of the project on the residents of Estuary Court must be considered. There will be significant disturbance suffered by the residents during construction works so we believe it is fair and reasonable to expect that this should be minimised as much as possible. This could be done by the following actions:</p> <ul style="list-style-type: none"><li>• Do not use the bottom green as a satellite compound. This should be left as it is, so the children have somewhere to play. There are other sites that could be used for compounds.</li><li>• Only take down the section of the wall and mature trees at the top green where the construction activity is carried out. The walls and trees could be left in place at the bottom green.</li><li>• Once the works are complete, replace the boundary wall and landscaping as it currently is.</li><li>• Extend the Property Owner Protection Scheme to all the properties in Estuary Court.</li><li>• Provide a consultant to the residents to independently monitor airborne and ground borne noise impacts.</li><li>• Provide a dedicated liaison officer to the residents to ensure that the contractor complies with working times and other control measures they are required to do.</li></ul> | <p>In relation to the green space and other landscaping issues see items (3),(5) and (9)</p> <p>In relation to POPS see item (16)</p> <p>In relation to liaison officers, TII note that the provision of independent engineering advice for residential stakeholder groups throughout the enabling works and main construction stages of the MetroLink project is currently being considered as part of an overall comprehensive community engagement plan, which will include amongst other initiatives, the appointment of dedicated MetroLink liaison representatives and local community forums which will provide detailed updates on construction activities in their areas.</p> |

| 1                                                                                                                                                                                               | Cover letter      | 1        | We believe our submission sets out a robust argument as to why the Metrolink should be re aligned to the R132 and we would be grateful if you could give it due consideration.                                                                                                                                                                                                                                                                                                                                      | TII welcome your input and responses are provided below.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| 2                                                                                                                                                                                               | Cover letter      | 1        | We welcome any questions you may have and would also so welcome the opportunity to represent the Estuary Court residents at an oral hearing.                                                                                                                                                                                                                                                                                                                                                                        | TII are happy to continue to engage with residents up to and during the Oral Hearing to attempt to resolve outstanding issues whilst continuing to progress the MetroLink project.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| 3                                                                                                                                                                                               | Executive Summary | 9        | <p>The TII has submitted the Rail Order plans for the Metrolink route to cut through our housing estate and two other housing estates along the R132. They propose to take away our safe open green spaces not just for the construction stage but for good, by subsuming them into a public linear park.</p> <p>The proposed works will have a devastating impact on the residents of Estuary Court, not just with the loss of the open green spaces but with the disruption caused by the construction works.</p> | <p>By keeping within the Local Landscape Character Area (LLCA), the proposed MetroLink landscape reinstatement along the R132 between the Estuary and Pinnock Hill Roundabouts provides an integrated series of small local parks complete with play facilities, seating, and planting, adjacent to the residential areas and which interconnects, encouraging pedestrian and cycle use, to form part of the longer green ribbon connecting the broader Swords community with MetroLink and across the R132.</p> <p>The proposed Project has been designed taking into account the R132 Connectivity Project promoted by Fingal County Council. The R132 Connectivity Project received approval by An Bord Pleanála on 20 January 2022 (planning application reference number JP06F.310145). The R132 Connectivity Project aims to improve the connectivity and safety of pedestrians and cyclists moving along, and across, the R132 and enhance facilities for all road users with particular benefits for those choosing sustainable modes of transportation such as bus users, cyclists and pedestrians. The planned outcome of the Metrolink architectural and urban realm design for this linear park is to discourage anti-social behaviour, through the attractive setting, use of public lighting, open sightlines, and avoidance of areas where individuals and groups of people can hide.</p> <p>Further acknowledging your concerns, TII is committed to working with local resident’s groups to address concerns that have been expressed in relation to the loss of green space and the impact on the current boundary wall and will continue engagement with these groups in advance of oral hearing.</p> <p>Across the proposed MetroLink, safety and security is addressed by EIAR Chapter 6, MetroLink Operations and Maintenance. Section 6.6.5.8 specifically addresses managing the risk of "Vandalism or Anti-Social Behaviour on the Trains or within the Stations", and the wider chapter also addresses the broader design proposals for managing security challenges, including:</p> <ul style="list-style-type: none"><li>•The architectural and urban realm design is designed to discourage anti-social behaviour, for example through the attractive setting, use of public lighting, open sight-lines, and avoidance of areas where individuals and groups of people can hide.</li><li>•The Operational Control Centre (OCC) will be the central communications and operational hub, located in the administrative building at the Dardistown Depot. The role of the OCC will include monitoring and managing passenger safety and security and antisocial behaviour. The OCC will direct and deploy staff to manage incidents when required.</li><li>•The access control and intrusion detection (ACID) system will identify intruders trying to enter locations where unauthorised access is prohibited.</li><li>•There will be a MetroLink staff presence along the route for assisting passengers, security and deterring anti-social behaviour.</li></ul> |

| Letter Re: Railway (MetroLink-Estuary to Charlemont via Dublin Airport) Order 2022, Estuary Court Submission No. 1- Re-alignment of MetroLink route out of family housing estates onto the R132 |                   |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |  |
| 4                                                                                                                                                                                               | Executive Summary | 9        | <p>The residents of Estuary Court do not oppose the Metrolink project, however, we do not believe that anything like enough consideration has been given to the impact of which the proposed route will have on the residents and that the decision has been largely based on cost and other engineering grounds.</p> <p>To date the TII have not provided us with a definitive or conclusive reason as to why the Metrolink cannot be re-aligned onto the R132, especially as this road median alignment was the proposal for the previous concept, which was elevated.</p> | <p>Preferred Route Consultation.</p> <p>Having previously consulted with stakeholders along the R132 in 2018 and again in 2019, TII strongly believes that thorough consideration has been given to the impact of the proposed route on residents.</p> <p>In the decision-making process selecting the current route inside the R132 eastern verge, TII would like it noted that in terms of a decision based solely on cost and engineering, the original elevated option in the central median (previously consented under the Metro North Scheme) was the preferred solution to deliver the MetroLink through Swords. However, stakeholder feedback on the visual impact of such an option during the consultation in 2018, prompted TII to find the best below ground economical solution, an open structure, within the business case justifying the MetroLink Route through Swords.</p> <p>The Below Ground Alternative</p> <p>Following feedback received from stakeholders along the R132 during the Emerging Preferred Route consultation in 2018, objecting to an elevated structure in the median, TII considered a number of alternative options for the Preferred Route, including a retained open section proposal in the median of the R132. However, following an options appraisal, a retained open section option in the median was not brought forward into the Preferred Route Consultation in 2019 and for the following reasons:</p> <p>Permanent Impact of the retained open section in the median:</p> <ul style="list-style-type: none"><li>- An increase in permanent landtake along the R132 corridor verge and outside the boundary of the R132 to facilitate the final road alignment past the MetroLink open retained structures and stations.</li><li>- As traffic will be closer to receptors, traffic noise impact would likely increase post construction.</li><li>- Reduced ability to replace amenity loss on completion.</li><li>- Replacing existing verge and greenspace along the R132 with pedestrian and cycle lanes to deliver this option would impact on a greater number of residents.</li><li>- Stations provided in the median at roundabouts would require additional landtake to provide similar at grade access.</li><li>- Stations in roundabouts would provide less opportunity for landscape upgrade.</li><li>- Stations positioned in roundabouts would have less opportunity to achieve an open plaza design concept while ensuring that the station platforms are straight for passenger access operation and control.</li><li>- Utility diversions to achieve a median delivered solution would increase.</li></ul> <p>Temporary (Construction Phase) Impact:</p> <ul style="list-style-type: none"><li>- Increase in traffic disruption and traffic noise impact during construction.</li><li>- Increase in temporary landtake required to facilitate access for construction, diversions of traffic with the assumption that the two-lane c/way and pedestrians and cycle routes would be maintained in both directions.</li><li>- Similar loss of amenity and green landscape during construction.</li><li>- Temporary Property landtake requirements both in the existing road verge and outside the R132 boundary to deliver this option would impact on a greater number of residents.</li><li>- The duration of construction for a median option scheme was longer, impacting further on all receptors along the R132.</li></ul> |  |

| Letter Re: Railway (MetroLink-Estuary to Charlemont via Dublin Airport) Order 2022, Estuary Court Submission No. 1- Re-alignment of MetroLink route out of family housing estates onto the R132 |                                                            |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| 5                                                                                                                                                                                               | Executive Summary                                          | 9        | <p>The R132 Connectivity Project is changing the nature of the R132 road, and this provides a huge opportunity for the Metrolink to be re-aligned onto it. Based on TII's Decision Report and other available documents at the time, there is no evidence that the Connectivity Project was considered when choosing the preferred route option. We believe at a minimum this needs to be re-visited in detail. As such we believe that the EIAR cannot, at this time, be considered a complete document.</p>                                                                                                                                                                                                                                   | <p>A Median Alignment and the R132 Connectivity Project.</p> <p>A similar open retained structure solution in the Median to the one considered in 2019 but aligned to Fingal County Councils R132 Connectivity Project, consented in 2022 would result in the relocation of the proposed stations away from the new junctions at Seatown and Malahide Roundabouts. For an alignment option in the Median, this change would result in similar impacts as described above (response number (4)) together with the following permanent impacts:</p> <ul style="list-style-type: none"><li>- An increase in landtake to divert the R132 around these stations.</li><li>- Less favourable pedestrian at grade access into the stations positioned in the Median.</li></ul> <p>While TII were aware of Fingal County Councils (FCC) intention to urbanise the R132, as set out in the Fingal County Development Plan 2017-2023, the R132 Connectivity plans were only fully materialised on the selection of the MetroLink Route inside the Eastern Verge of the R132, which followed the consultation on the Preferred Route Option in 2019.</p> <p>Subsequently, the plans for which FCC have now received consent involve the upgrading of three existing roundabouts to signalised junctions, the creation of cycle and pedestrian routes in both directions, while maintaining a two-lane c/way incorporating a dedicated bus lane, a reduction to the speed limit and retaining the existing central reserve.</p> <p>Both schemes are key to the development of the Swords area, but as detailed are not mutually dependent on each other for delivery.</p> |
| 6                                                                                                                                                                                               | 1. Introduction                                            | 12       | <p>With the TII's proposed plans, our housing estate will no longer be child friendly, and this will ultimately ruin the little community that has been established here over the last 30 years. This has already caused great stress and anxiety to many of the residents in Estuary Court. While the residents of Estuary Court do not oppose the Metrolink project, we strongly believe that the Metrolink route does not need to come through our estate. We have engaged with the TII over the last 2 years and to date they have not been able to provide a definitive answer as to why the Metrolink needs to come into our estate instead of following the R132 road.</p>                                                               | <p>See response numbers (3), (4) above and (7) below.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| 7                                                                                                                                                                                               | 2. Impact of Metrolink Route Cutting Through Estuary Court | 13       | <p>The current proposed Metrolink route cuts through the top green of Estuary Court. However, the TII plan to take both of our green spaces for the duration of the construction works. The top green for constructing the cut and cover tunnel through it, and the bottom green for a site compound. They also plan to demolish our boundary wall along the R132 and cut down the mature trees and landscaping along it.</p> <p>At a high level the three the main impacts for Estuary Court of the proposed TII preferred alignment are as follows:</p> <ul style="list-style-type: none"><li>• Loss of open green space</li><li>• Loss of mature trees, landscaping and boundary wall</li><li>• Disruption from construction works</li></ul> | <p>See also response numbers (3) and (5) above.</p> <p>Details of the requirements and provision of Construction Compounds are given within section 5.3 of the EIAR Chapter 5: MetroLink Construction Phase. Volume 4 Figures, Chapter 5, Metrolink Construction Figure 5.1 Construction Compounds provides details of all the proposed sites along the alignment, noting that the vast majority, with two exceptions, are positioned in "commercial/industrial" designated land.</p> <p>The Satellite compound designated at Estuary Court, opposite the residents will be required for 36 months to undertake the main MetroLink works within the boundary of the site at this location, including:</p> <ul style="list-style-type: none"><li>- The cut &amp; cover and retained cut structures.</li><li>- The reinstatement of the permitted landscape on the completion of the alignment structures.</li></ul> <p>Note that locations of construction compounds proximate to the workface site are essential to achieving the projected programme for the works.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

| Submission No.                                                                                                                                                                                  |                                                            |           | 090                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |  |

| Letter Re: Railway (MetroLink-Estuary to Charlemont via Dublin Airport) Order 2022, Estuary Court Submission No. 1- Re-alignment of MetroLink route out of family housing estates onto the R132 |                                                            |           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |  |
| 8                                                                                                                                                                                               | 2.1 Loss of Open Green Space                               | 14 and 15 | <p>The loss of open green space will have a devastating effect on the young children in the Estate. With very small back gardens, the young children will have no green space to play ball games or even run around. The only place the children will have to play is on the road, raising safety concerns. The original timeframe provided to us by the TII for using the greens was:</p> <ul style="list-style-type: none"><li>• 2 years for the top green;</li><li>• 6-12 months for the lower green.</li></ul> <p>When considered with the actual cut and cover and open cut construction, the estimated duration through this area is between 51 and 69 months. Given that construction programmes often over-run for projects of this size, we envisage the length of time could easily extend to be a lot longer.</p> <p>This also doesn't allow for the time it would take for the new grass to get established and be suitable for playing on. This would take another year. It is very probable that our top green would be unavailable to the kids for 5/6 years and the bottom green 4/5 years. This might not seem like a long time to an adult but for the young kids under 10 in our estate, this could be half of their lives and a pivotal time for their growth and development. This will have a significant impact on their young lives.</p> | <p>See response number (7) above.</p> <p>Chapter 11 Population and Land Use Section 11.6.1 also notes the following:</p> <p>Community Relations Officers (CRO's) will be employed during the construction of the proposed Project and contact details will be provided on the proposed Project website so that stakeholders and communities can make contact as required. The CRO's will be responsible for maintaining open, transparent and positive relationship with members of the public, local businesses, groups and organisations affected by the works. Specifically, the CRO's will work closely with Transport Infrastructure Ireland and the appointed contractors to ensure that all effort to address public concerns are made, and to ensure that information on the nature and duration of all works is provided; and ☐ Reinstatement all land as quickly as possible following construction so as to expedite any local disruption and return to existing surface land uses that can be used by the surrounding residents, businesses and communities.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |  |
| 9                                                                                                                                                                                               | 2.1 Loss of Open Green Space                               | 15        | <p>To make matters even worse, the TII do not even intend to give us back what we currently have. After the construction works are complete, the TII want to develop our open greens into a linear park to run up along the R132. Please See Submission No. 2 - Submission 089 for more detail on this.</p> <p>On our first call/meeting with the TII in February 2021 , they presented their plan and informed us that they would be taking over both of our greens. It was evident from this call that no consideration was given to the impact this might have for the residents of Estuary Court. When the question was put to them about where our children could play safely, they had no answer other than to confirm there was no alternative green area proposed for us (See Fig 2.1 - section 3.3 of the submission).</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | <p>See response number (3) above</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |  |
| 10                                                                                                                                                                                              | 2.2 Loss of Mature Trees and Landscaping and Boundary Wall | 15 and 16 | <p>There are mature trees and landscaping along the boundary wall with the R132. The R132 is a very busy road and the mature trees provide a visual and noise barrier. They also aesthetically enhance the estate and provide a secure and pleasant feel. TII's plan is to remove all these trees. Even if the TII replaces these with semi-mature trees it will take 20 years to get back to what we have now. The estate will lose the visual amenity we currently have.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | <p>The proposed Project will provide an integrated series of small local parks complete with play facilities, seating and planting, adjacent to the residential areas and which interconnect to form part of the longer green ribbon proposed alongside the Fingal County Council's R132 proposals. The extensive landscaping is proposed for over the cut and cover sections and linking around open cut sections, following the alignment but also extending into existing open spaces as appropriate in order to provide a comprehensive recreational facility for the adjacent residential communities. The nature of the proposed planting is biodiverse and will mature to provide a much more valuable, connected landscape than is currently the case. The proposed tree planting will be much more appropriately scaled to the adjacent residential open spaces than the existing predominant tall roadside trees. This proposed section of the R132 extensive landscaping, which is being included as an integral part of the proposed Project within this Local Landscape Character Area (LLCA), will beneficially transform the interconnectedness of this area, across and along the road and with the range of local communities and facilities around the eastern side of Swords. This is particularly so for pedestrians and cyclists. It will represent a significant positive effect of the proposed Project in respect of its broader landscape context and in terms of social and cultural amenity for the town of Swords and its environs. It also represents a major enhancement of the existing landscape condition.</p> |  |
| 11                                                                                                                                                                                              | 2.2 Loss of Mature Trees and Landscaping and Boundary Wall | 16        | <p>The TII originally proposed not to reinstate our boundary wall. They wanted to take over our green spaces as part of a linear park. We have engaged with them on this over the last two years and the proposed plan in the Rail Order now includes for wall type H (not defined). However, they have included access gaps in the wall which makes it ineffective for security and the safety of our children playing on the green. Please see our Submission No. 2 - Submission 089 for further detail on this.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | <p>See response number (3) above</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |  |

| Letter Re: Railway (MetroLink-Estuary to Charlemont via Dublin Airport) Order 2022, Estuary Court Submission No. 1- Re-alignment of MetroLink route out of family housing estates onto the R132 |                                        |           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |  |
| 12                                                                                                                                                                                              | 2.3 Disruption from Construction Works | 16 and 17 | There will be significant disruption to the residents caused by the construction works. The hoarding will line one side of the road into our estate. The large plant will operate on the other side of the hoarding and in some places could be as close as 10m to the houses. It will be akin to living on a building site every day for a minimum of three years. There will be major disruption such as noise pollution, vibration, dust, piling slurry wash off, traffic restrictions, visual impact and increased vermin. Every resident in the estate will be impacted by the construction works in some form. The first row of houses will be most severely impacted, along with the elderly, people who work night work or shift work and those who work from home. Please see Submission No. 2 - Submission 089 for more detail on this.                                                                                                                                   | As noted here the other submission from Estuary Court residents (#89) raises the same issue. Please see the text within submission response #089 to item numbers: (19) to (25), where the issue raised here is addressed in detail.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |  |
| 13                                                                                                                                                                                              | 3. Discussion with the TII             | 18        | We engaged with the TII over the last few years and had calls and meetings with them. We raised the question on numerous occasions about why the Metrolink can't go on the R132 roadway instead of cutting through our estate. We only ever received short dismissive answers and they never wanted to go any further with it. None of the answers provided gave a satisfactory reason as to why the Metrolink could not be re-aligned onto the R132. The following answers were provided: <ul style="list-style-type: none"><li>• The R132 is not wide enough for a cut and cover construction</li><li>• Decision not to go on the R132 following previous public consultation</li><li>• There are utilities in the way</li></ul>                                                                                                                                                                                                                                                  | See response number (4) above                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |  |
| 14                                                                                                                                                                                              | 3.1 The R132 Road is Not Wide Enough   | 19        | The TII raised the point that even if the road was wide enough for the cut and cover tunnel, it wouldn't be wide enough to allow the construction of it. We don't accept this point. If the construction was to be carried out as a "top down" construction, there is very little extra width required. For example, during the construction of the Port Tunnel, the traffic lanes were reduced to the minimum on both sides. It did disrupt and slow down the traffic flow during the construction period however, this does demonstrate what can be done, if required. As a comparison the width of construction area for the Port Tunnel was approx. 35m, the width required for the Metrolink with top-down construction would be approx. 14m. The full width of the road (i.e., from boundary wall to boundary wall) at that section of the Port Tunnel is 42m. This is the same width as R132 at the Swords bypass section (i.e., Estuary Court to Pinnock Hill Roundabouts). | Further to response number (4) above.<br><br>Please note: TII's position on an alignment anywhere in the Median of the R132 is for the alignment to be in a fully open retained structure as there is no engineering reason for it to be covered over in the R132 with the exception of crossing points.<br><br>Construction of the MetroLink in the Median.<br>An open retained structure for the MetroLink alignment is 12m normal alignment and 25m for each of the open station stations. To deliver such a structure in the Median of the R132, requires a site width of 32m generally longitudinally and 45m for each of the stations, noting that the existing c/way is approximately 26m wide, with the R132 corridor including verges approximately 42m, and explains some of the summary of impacts highlighted in response number (4) above.<br><br>Traffic Diversions<br>Two options for creating R132 traffic diversions past the 2km long construction site would then be required:<br><br>1. Maintaining the existing c/way complete with footpaths and cycle routes in both directions would likely require temporary land take outside of the existing boundary of the existing R132, impacting on more residential receptors along the route (amenity loss and traffic noise impacts).<br><br>2. Working within the confines of the existing R132 Corridor, either: <ul style="list-style-type: none"><li>• Maintain 2 lanes of vehicular traffic in both directions within the space available between the existing boundary walls of the R132 and the construction site, with any existing pedestrian, cycle ways or bus stops along the R132 then suspended throughout the construction phase, or</li><li>• An alternative would require a reduction of vehicular traffic to one lane in both directions with cycle/Pedestrian/Bus stops now accommodated.</li><li>• Both of these options would impact traffic locally across the whole Swords locality and would also increase traffic noise impact with all residential receptors along the R132.</li></ul> |  |

| Letter Re: Railway (MetroLink-Estuary to Charlemont via Dublin Airport) Order 2022, Estuary Court Submission No. 1- Re-alignment of MetroLink route out of family housing estates onto the R132 |                                                                          |           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |  |
| 15                                                                                                                                                                                              | 3.2 Decision Made Not to go on the R132 based on the Public Consultation | 20 and 21 | <p>One of the original proposals for the Metrolink was for it to run on an elevated structure along the median of the R132 (See Fig 3.3 of the submission). At the public consultation stage there was a lot of negative feedback about this and the visual impact it would have along the route. Following this, it was decided by the TII not to pursue this option.</p> <p>The negative feedback related to the visual impact of the elevated structures (which we agree with) and not the alignment of the Metrolink along the R132. Therefore, we don't believe this is a justified reason as to why the Metrolink cannot be aligned on the R132 with a cut and cover option.</p>                                                                                                                                                                                                                | Please refer to response numbers (4), (5), (13) and (14).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |  |
| 16                                                                                                                                                                                              | 3.3 Utilities in the Way                                                 | 21        | <p>Another reason that the TII gave to us was that there are utilities running in the central median of the R132 road and these would be in the way of constructing a cut and cover tunnel. There may be utilities in the central median however we don't believe this is a good enough reason to not consider putting it there. Although it may cause inconvenience and additional costs, utilities can be diverted or relocated. This is common for any cut and cover construction in a built-up area and was carried out extensively in Dublin City for the LUAS works.</p>                                                                                                                                                                                                                                                                                                                        | Further to response number (4) above, as you state utilities can be relocated and diverted to suit the construction in the Median. The main utility diversions required to do so are anticipated to be just as complex when compared to other options. However, services running along both verges and in particular a gas main, currently located in the southbound (eastern) verge will likely have to be relocated with the change in highway alignment anticipated around the completed structures. All achievable, but very likely to prolong the works duration and therefore the impacts to residents. Thus this option is much less favourable for utility diversions.                                     |  |
| 17                                                                                                                                                                                              | 4. The Principal Reasons for the Choice of the Preferred Route           | 22        | <p>The Preferred Route Design Development Report (March 2019) set out the following principal reasons for choosing the Open cut on the east side of the R132.</p> <ul style="list-style-type: none"><li>* Lower overall construction costs</li><li>◆ Lower impacts on the landscape and visual amenity</li><li>• Lower potential impacts on traffic along the R132 during the construction phase</li><li>• Improved access to stations.</li></ul> <p>We set out our comments on these reasons as follows:</p> <p>4.1 Lower Overall Construction Costs</p> <p>The construction costs may be lower however, the option of open cut on the east side of the R132 now cuts through three established housing estates. We do not believe lower costs' are a good enough reason to offset the impact that this route will have on all the residents of Estuary Court, Seatown Villas and Ashley Avenue.</p> | Please refer to response number (4) paragraph 2.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |  |
| 18                                                                                                                                                                                              | 4. The Principal Reasons for the Choice of the Preferred Route           | 22        | <p>4.2 Lower Impacts on the Landscape and Visual Amenity</p> <p>As the route along the R132 (Estuary Roundabout to Pinnock Hill Roundabout) is now all below ground there certainly will be a lower impact on the landscape and visual amenity.</p> <p>We agree that the cut and cover / open cut option is much better than elevated or on the surface. However, this would also apply to a cut and cover option on the R132 and far less loss of our direct visual amenity, especially if the road is narrowed as part of the R132 proposals (see below).</p>                                                                                                                                                                                                                                                                                                                                       | See responses numbers (4), (5), (13), (14), (15) and (16).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |
| 19                                                                                                                                                                                              | 4. The Principal Reasons for the Choice of the Preferred Route           | 23        | <p>4.3 Lower Potential Impacts on Traffic Along the R132 During Construction</p> <p>While the option of moving the route to the east of the R132 will potentially have a lower traffic impact, there still will be impacts where the metro crosses the R132 and at the junctions. The R132 Connectivity scheme has plans to change the nature of the R132, from a fast-moving distributor road to one which functions as an urban street with defined crossing points, which are safe and convenient for all road users. The traffic will be reduced to 50km/h, and we believe this is an opportunity for the traffic routes to be re-configured to minimise the impact that the construction of the Metrolink might have.</p>                                                                                                                                                                        | As indicated in Appendix A9.5 Scheme Traffic Management Plan, the model scenario used for the assessment of the impact of Project construction works on traffic included the completion of the junction upgrades under the R132 Connectivity Study prior to the commencement of the MetroLink construction works. Temporary traffic management measures for the construction of MetroLink have been developed to minimise the impact of the Project on all road users, and to maintain access to businesses and other premises. A hierarchical approach to traffic management has been adopted with pedestrian/cyclists, public transport and commercial needs provision taking preference over private car usage. |  |
| 20                                                                                                                                                                                              | 5. Opportunity from R132 Connectivity Project                            | 24        | <p>Fingal Co. Co. have been granted permission to proceed with the R132 Connectivity Project.</p> <p>Fingal Co. Co. plan to proceed with these works before the Metrolink works start. The construction of the Metrolink will significantly impact the new proposed R132 where it transverses the road from Seatown Villas into Estuary Court (see Fig 2.0 of the submission) and also at the junctions along the R132. The newly laid road pavement will have to be dug up and reinstated again after the Metrolink works. We believe it illogical for one Public Authority to proceed with the R132 Connectivity Project while a 2nd Public Authority is planning a major Metro project that will cut through the R132 and have a major impact on it. Surely a joint approach would be the best way forward.</p>                                                                                    | <p>Chapter 30 of the EIAR describes the cumulative impacts of MetroLink and other projects, including the R132 Connectivity Project. Where possible, MetroLink contractors will work with other contractors to minimise impacts but due to different programme pressures this is not always possible.</p> <p>As previously stated in response number (5) above, neither project is mutually dependent upon each other. However, should the opportunity arise after an Enforceable Railway Order be granted by An Bord Pleanála, MetroLink will consult with FCC on the timing, interfaces, and management of the delivery of both schemes.</p>                                                                     |  |

| Letter Re: Railway (MetroLink-Estuary to Charlemont via Dublin Airport) Order 2022, Estuary Court Submission No. 1- Re-alignment of MetroLink route out of family housing estates onto the R132 |                                               |           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |  |
| 21                                                                                                                                                                                              | 5. Opportunity from R132 Connectivity Project | 24 and 25 | We believe it would make more sense for the Connectivity Project be completed in 2 phases: <ul style="list-style-type: none"><li>• Phase 1 - Temporary layout to change the nature of the road to one which functions as a urban street while also facilitating the construction of the Metrolink;</li><li>• Phase 2 - Final layout after the Metrolink cut and cover has completed. This will allow for the permanent reinstatement works to be completed just once. We understand that once the cover has been installed on the rail tunnel, the metro works can continue below in the tunnel while the R132 Connectivity works can be completed in tandem above the ground.</li></ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | See response (20)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |  |
| 22                                                                                                                                                                                              | 5. Opportunity from R132 Connectivity Project | 25        | <p>The Preferred Route Design Development Report (2019) goes into a lot of detail and sets out the positive and negative impacts of each option and the reason why it has chosen option 3 - open cut along east of R132. However, in this report and other TII documents available from that time, there is no reference to the R132 Connectivity Project. This would lead us to believe that either the TII were not aware of this proposed project or else they didn't consider it in their decision making.</p> <p>We believe the R132 Connectivity Project is a game changer for choosing the best option. By changing this road from a fast-moving dual carriageway to a road that functions as an urban street, this offers a massive opportunity for installing the Metro (cut and cover) the whole way around this section of the road. The width required for the new proposed urban street type road is greatly reduced. There is no requirement for a central median, hard shoulder and the grass verges on either side could be reduced in width.</p> <p>The urban street type road could fit in approx. 2/3 of the road and the metro tunnel and construction of it could easily fit in the other 1/3. Please see Fig 5.1 of the submission.</p> | See response number (5) above                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |
| 23                                                                                                                                                                                              | 5. Opportunity from R132 Connectivity Project | 26        | <p>The R132 is approximately 42m wide from boundary wall to boundary wall. Based on standard road lane widths, this could easily accommodate a new urban street type road on one side (approx. 2/3 of the road) and the construction of the Metrolink on the other side (approx. 1/3 of the road). The Metrolink is planned to be cut and cover for most of the R132 so by keeping to this method on the R132, this would provide an ideal route above for cycle lanes   pathways / landscaping all along the R132.</p> <p>We believe that the R132 Connectivity Project should be considered in full as part of the decision making for the best option. There are opportunities for both projects to work together and achieve a better and sustainable solution that does not need to disrupt and destroy the safe family environments in the three different housing estates along the route.</p> <p>None of the construction works have started on either project so it's not too late for the relevant design teams to come together and redesign the section of R132 that will provide the optimum solution for both the Metrolink and the Connectivity Project.</p>                                                                                   | <p>As stated above in response number (4) TII have reviewed many options for the delivery of the MetroLink through Swords with the option presented in the EIAR the least impactful to the stakeholders along the R132, while resolving the visual impact objection to the elevated alignment and ensuring that the scheme remains economical for delivery under the business case.</p> <p>Alternative Residents Solution.</p> <p>As with all of the options considered, the solution proposed on Fig 5.1 to effectively build the MetroLink Alignment under the existing R132 Southbound c/way is of course possible. However, we would offer the following initial observations in addition to those previous stated in response number (4) above:</p> <ul style="list-style-type: none"><li>• This alternative scheme assumes a full cut &amp; cover solution, which is not the scheme proposed under the EIAR, nor was it ever TII's intention to provide such a scheme when moving away from the initial preference for an elevated alignment. See response number (13) above.</li><li>• In its current layout, this alternative scheme would be unworkable in delivering the R132 Connectivity Scheme with an open retained MetroLink alignment. However, it is potentially feasible to have an open retained MetroLink with a full R132 Connectivity configuration running alongside it but pushed into the northbound verge. Further impacts of such a solution are outlined below.</li></ul> |  |

| Letter Re: Railway (MetroLink-Estuary to Charlemont via Dublin Airport) Order 2022, Estuary Court Submission No. 1- Re-alignment of MetroLink route out of family housing estates onto the R132 |               |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |  |
|                                                                                                                                                                                                 |               |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | <div>Additional Construction Impacts</div> <div>Further to response number (4) above, an alternative open structure solution running alongside a reconfigured R132 Connectivity project would have the following additional impacts:</div> <div><div></div><div>• To make a space for construction access to the works would require the relocation of 4 lanes of traffic towards the northbound verge of the R132. The consequence of this is to push cumulative traffic noise towards more residential receptors on a temporary basis during construction.</div><div>• While 2 lanes of vehicular traffic can be accommodated in both directions within the space available between the existing boundary walls of the R132 and the construction site. However, any existing pedestrian, cycle ways or bus stops along the R132 would have to be suspended throughout the construction phase. (See also response number (13) above.</div><div>• An alternative would require a reduction of vehicular traffic to one lane in both directions with cycle/Pedestrian/Bus stops accommodated. See also response number (13) above.</div><div>• Working space inside of the structure would also require land take on the eastern verge along the whole route, including part of the park at Estuary Court and potentially the gardens at the rear of The Crescent.</div><div>• To create access to build the stations will require temporary landtake outside of the existing boundaries of the R132 to divert traffic to provide. For Seatown Station, this has the potential to impact on residential, commercial, and school (St Colmcille's) receptors close to Seatown Walks.</div></div> <div>Additional Permanent Impact</div> <div>Whilst not an issue in terms of operational noise or vibration impacts. an open retained alignment would be located along the eastern verge of the R132 and at the rear of the park at Estuary Court and The Crescent.</div> |  |
| 24                                                                                                                                                                                              | 6. Conclusion | 27       | <div>The residents of Estuary Court do not oppose the Metrolink project, however, we do not believe enough consideration has been given to the impact on the residents and to other alternative routes along the R132. It seems like the TII have gone with the easy option to cut through our family housing estates.</div> <div>The R132 Connectivity Project is changing the nature of the R132. There is a huge opportunity for the Metrolink and R132 Connectivity Project to work together and drive synergies from each project. It seems impractical to shoehorn the R132 Connectivity Project in ahead of the Metrolink project, when both projects will require significant works on the R132, causing major disruption and having a major impact on the traffic. Surely a joint approach would be more beneficial to all parties including the road users and the local residents.</div> <div>We believe it is worth taking a step back and consider how these two projects could be carried out together, saving time, disruption and potentially cost. It is not too late for the TII to re-align the Metrolink onto the R132. We would urge you to compel the TII to revisit the proposed route with a view to re-aligning it onto the R132. If this doesn't happen, it will be us, the residents of Estuary Court and the two other housing estates that will be impacted long after the ribbon is cut.</div> | <div>As already stated above, response number (4) and (21), TII strongly disagree with this statement and consider that the option selected to deliver Metrolink through Swords has been fully considered. While acknowledging that the completion of the works through the park at Estuary Court will have a short-term impact with local residents. TII have provided residents with a commitment that the park will be fully reinstated at completion, and with the alignment in cut &amp; cover past their estate is of now of no significant impact to the residents in operation.</div>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |  |

| Ref: Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022 (Letter 24/11/2022) |              |          |                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 1                                                                                                | Letter       | 2        | Failte Ireland is fully supportive of this infrastructure project and are pleased to see it progress to the planning phase. | <p>TII would like to thank Failte Ireland for taking the time to make this submission. Your positive support is gratefully appreciated, and for the reasons you have set out, TII are committed to realising the MetroLink Project to address the challenges highlighted and to deliver the benefits that MetroLink will bring.</p> <p>We note the observations made in your letter, including:</p> <ul style="list-style-type: none"><li>•Dublin Airport is the key access point for the island of Ireland and the visitor experience and the ease of transit of our visitors to and from the airport is vitally important.</li><li>•International tourists would rather use public transport (or indeed walk) to navigate around the city. Therefore, an efficient and reliable transport system is a key requirement.</li><li>•MetroLink will create an integrated transport network which connects Irish Rail, DART+, Luas and BusConnects services.</li><li>•The Project has an essential part to play in enabling sustainable visitor movement and transit from Dublin to our regional cities and towns.</li><li>•Driving decarbonisation of the tourism sector is a key priority of Failte Ireland's strategy.</li><li>•Objective is to protect, enhance and promote both our natural and built heritage for the common benefits for visitor, industry, community and the environment. Therefore, continuing to shift our visitors onto sustainable modes of transport is a priority which will also result in a significantly improved visitor experience.</li></ul> <p>The objective of the MetroLink Project is to provide a sustainable, safe, efficient, integrated and accessible public transport service between Swords, Dublin Airport and Dublin City Centre. TII are working closely with daa to provide an integrated air and rail transport system that will provide onward connectivity to the wider transport network and country. The Project has been designed to ensure maximum interchange with other modes of transport, specifically more sustainable modes of transport such as walking, cycling and public transport, and a modal shift from private car use, creating an improved environment for Dublin.</p> <p>TII are equally committed and supportive of Failte Ireland's commitment to sustainability. In 2021 TII published a Sustainability Implementation Plan – “Our Future” (TII 2021a). Within this plan, six key sustainability principles have been developed to reflect TII's organisational ambition to lead in the delivery and operation of sustainable transport. 'Transition to net zero' principles focus on reduction of the carbon impact of construction, operation, and use of the transport network through responsible use of resources, reuse and repurposing, as well as driving the net-zero transition and enabling customers to make more sustainable choices.</p> |

| RE: SUBMISSION TO THE DRAFT RAILWAY ORDER (METROLINK - ESTUARY TO CHARLEMONT VIA DUBLIN AIRPORT) ORDER - Prospect House, No. 2, 3 Prospect Road, Prospect Road Glasnevin |                                              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |  |
| 1                                                                                                                                                                        | Executive Summary                            | 5        | 4) Notwithstanding our client' concerns about the proposed location of the Metrolink Station and impact on their property in principle, this representation seeks to ensure that:<br>a. Our client's land interests are accurately reported in the draft Railway Order on client's interest to ensure accurate reporting of impacts and decision taking to come; and<br>b. Open communication, strategy and regard to issues including the time needed to source alternative facilities with a similar offering, including relocating long-term business premises and findings a new source of long-term rental income, well in advance regarding the Metrolink Land Acquisition Strategy 2022 and prior to the finalisation of the Railway Order                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | TII thank you for you submission, which has been reviewed. We provide detailed responses for the issues and concerns raised below.                                                                                                                                                                                                                                                                                                                                                                                                                                             |  |
| 2                                                                                                                                                                        | Introduction                                 | 7        | The Metrolink proposes to develop the Glasnevin Metrolink Station on land includes our client's land interest. Within this context, the purpose of this submission is to ensure that our client's land interests are correctly reported within the Draft Railway Order to ensure that the scheme can be designed accordingly, including in relation to the environmental baseline, associated assessment of environmental effect to ensure accurate reporting of environmental impacts and any required mitigation, including through the separate Compulsory Purchase Order (CPO) process.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | Please refer to response Item number (1) above.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |  |
| 3                                                                                                                                                                        | 5.0 Material Considerations                  | 14&15    | The impact of the Metrolink proceedings have already been felt at the property of 2 - 3 Prospect House with our client refused planning permission by Dublin City Council as it was considered would "inappropriate to further develop this land in the interest of protecting and facilitating the development of the MetroLink project."<br><br>A first party appeal is currently being heard by An Bord Pleanála, having regard to the following particulars:<br>Reg. Ref. 3526/21: On the 12th of November 2021, Bytek Office Systems Ltd. were refused planning permission on lands at Prospect House, 2-3 Prospect Road, for proposed development consisting of the following:<br>The development will consist of:<br>a) the demolition of the existing rear first floor balcony, and;<br>b) the construction of a three-storey extension, over parking level, to the rear of the existing building, comprising of: 584sqm of office space and 294sqm of media rooms and associated staff welfare facilities; 8 no. car parking spaces and 8 no. bicycle storage spaces at lower ground floor level; a bin store and plant room at the lower round floor; and, all associated engineering and site development works necessary to facilitate the development. The application was refused, with one of the reasons being that it was refused on the grounds that 'the application site forms a critical future Urban Transport Node comprising a rail interchange station with linkages to Bus Connects at surface level along the R108 (Prospect Road). Due to the proposed development being located on lands earmarked for acquisition and demolition, as part of the MetroLink project, it would be inappropriate to further develop this land in the interest of protecting and facilitating the development of the MetroLink project'.<br><br>A first-party appeal was submitted to An Bord Pleanála, in which a decision is still due.<br><br>The client's business has been impacted by the material considerations of the Metrolink in the submission of planning applications, to facilitate the growth of the business. | TII are aware that of the status of the planning application and are in agreement with the reasons for refusal given by DCC. Regrettably the property concenred is required for the construction of the MetroLink's proposed Glasnevin station.<br><br>The Land Acquisiiton Strategy sets out TII's commitment to communicating with parties whom may be impacted by the MetroLink proposals. TII will ensure that where practicable, they and their advisers will seek to respond in due course to all enquiries received from affected parties and/or their representatives. |  |
| 4                                                                                                                                                                        | 6.1 Metrolink Land Acquisition Strategy 2022 | 15       | The acquisition strategy puts an emphasis on the early engagement with affected properties prior to the finalization of the Railway Order (Expected to be decided by 2023), in order to assess the full impact and needs of affected businesses and reach a pre-conditional agreement prior to the finalization.<br><br>TII state the following in regard to assistance to businesses whom are affected by the acquisition proposals:<br>"TII recognises the importance for existing businesses of being able to plan their relocations with as much advance information as is reasonably practicable in order to ensure a smooth transition of their operations from one location to another. Therefore, once TII has received approval to the Order, the necessary funding arrangements are in place and a notice to treat has been served, where practicable, TII will use reasonable endeavours to make arrangements to provide businesses with a longer period in which to relocate than the normal statutory process provides. In such cases, TII 's overall aim will be to provide as long a period as possible, commensurate with the co-ordinated progress of the MetroLink works."<br><br>The client submits that they are aware and open to a clear communication line with Transport Infrastructure Ireland to accommodate these acquisition proposals but wants to ensure that regard is given in any communications to the matters raised in this representation including, in particular, the need for early and clear dialogue, communication and strategy discussions having regard to the particular land interests in question.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | TII notes the assurances requested by the submitter regarding clear and open communication with the property owner.<br><br>The Land Acquisiiton Strategy sets out TII's commitment to communicating with parties whom may be impacted by the MetroLink proposals. TII will ensure that where practicable, they and their advisers will seek to respond in due course to all enquiries received from affected parties and/or their representatives.                                                                                                                             |  |

| Submission No.                                                                                                                                                           |                                                                                            |          | 093                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

| 5                                                                                                                                                                        | Downey Submission, 7.1 Environmental Impact Assessment: Reporting of Environmental Effects | 16&17    | <p>On behalf of our client's land interests we have significant concerns about the methodology for reporting of environmental effects as part of the EIAR as reported in Chapter 21: Land Take. Page 9 of the EIAR reports as follows with Table 21.2: Criteria for Baseline Categorization that follows reporting as follows:</p> <p>"Properties in general are viewed as being very important to the individual owners and occupiers and are sensitive to acquisition. However, the baseline ratings for land take/properties are evaluated by means of their capacity to accept change taking into account its value at a community/societal level and the current use of the property. Table 21.2 outlines the criteria for baseline categorisation."</p> <p>We would like to register our significant concerns that our client's property - a significant major employer - is being considered in a category akin to a car park or, a level above, derelict land and vacant properties. There is no logic provided for the disposition of these categories or why other employment-generating uses such as retail, hospitality or construction services are ascribed as higher baseline sensitivity. We would strongly recommend that the assessment of the sensitivity of the receptor is revised having regard to its ability to accommodate the change, including the availability of alternative premises.</p> | <p>The baseline categorisation used in the EIAR was developed through reference to the land use policy context from the Dublin City Council Development Plan (2016-2022) &amp; the Guidelines on Information to be Contained in EIARs (EPA 2022) as outlined in Chapter 21.</p> <p>TII recognise the inherent value of Prospect House to the owners and occupiers of the buildings. However, for the purpose of the baseline categorisation outlined in Table 21.2 (Chapter 21), building types have been categorised according to their use. In this case, as Prospect House's primary use is that of an office / commercial building, it has been categorised with a low baseline rating. Buildings such as offices get a lower rating because they have a greater capacity to accommodate change, when compared to buildings such as hospitals, churches and educational facilities which have a lower capacity to accept change and additionally have more benefit to the population.</p> |
| 6                                                                                                                                                                        | 7.2 Subject Lands: Environmental Baseline Description                                      | 18       | The subject land of Prospect House are lands that contain high potential value due to accessibility and to economic and social opportunities. The area is well served by public transport, bus, cycling and walking. Regard should be had to this environmental baseline position in the Metrolink Draft Railway Submission including EIAR Chapter 21 (Land Take) Section 21.4 and Table 21.6.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | Please refer to response item number (5) above.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| 7                                                                                                                                                                        | 7.3 Subject Lands - Future Potential                                                       | 19       | Having regards to the scenario where the Metrolink does not proceed, it is reasonable to assume the premises would continue on its current basis and more realistically grow in future. Regard should be had to this environmental baseline position in the Metrolink Draft Railway Submission including EIAR Chapter 21 (Land Take) 21.5 Predicted Impacts including 21.5.1 Do Nothing Scenario.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | The Do Nothing scenario considers the environmental baseline if the MetroLink does not proceed (refer to the methodology used in preparation of the EIAR detailed in Chapter 2). The potential impact of the Do Nothing scenario is neutral as no land take would be required for this scenario. The success of individual business is not included in the assessment of this baseline categorisation.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 8                                                                                                                                                                        | 7.4.1 Construction phase impact                                                            | 19       | Our clients need early and constructive dialogue to work out construction phase impacts and timeframes on the property and business use for the reasons set out in the sections that follow, i.e. impact and disruption on business relocation and sitting tenants.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | Please refer to the response for Item 8.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| 9                                                                                                                                                                        | 7.4.2 Operational Impacts: Relocation                                                      | 19       | <p>The client, in ownership of 2 - 3 Prospect House, is concerned about the relocation of the business premises. The subject lands facilitate Bytek office Systems Limited, F&amp;M Accountants, Aviator Limited, Viso Limited and Atum Consultants Limited as tenants of the premises. Due to the multi-let nature of these premises, it will be difficult to coordinate the relocation of these businesses due to a range of reasons such as accessibility, costs, disruption, location, time, and altered lease attributes.</p> <p>The relocation of a business is a lengthy procedure for the current context of the premises, being made up of multiple tenants. The client is concerned about the timeframe that they will be provided with in facilitating the acquisition proposals of the Metrolink, and if they will be able to locate a site that provides the same convenience and high value economic and social functions of the subject lands.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                       | Please refer to the MetroLink Compulsory Purchase Order (CPO) Guideline (metrolink_cpoguideline_final_september-2022). Businesses which are subject to compulsory acquisition will be subject to compensation, in accordance with the compensation code. TII understands the importance for businesses to be provided with certainty and is therefore proposing to introduce an agency service, at its own expense to support affected businesses to identify suitable alternative accomodation. The agency will assist in assessing property requirements and will be established following confirmation of the Railway Order.                                                                                                                                                                                                                                                                                                                                                               |

| RE: SUBMISSION TO THE DRAFT RAILWAY ORDER (METROLINK - ESTUARY TO CHARLEMONT VIA DUBLIN AIRPORT) ORDER - Prospect House, No. 2, 3 Prospect Road, Prospect Road Glasnevin |                                                        |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| 10                                                                                                                                                                       | 7.4.3 Operational impacts: Impact on sitting tenancies | 19&20    | <p>As with relocation procedures, the client is concerned about the loss of existing long-term tenants within the current facility and affects their future capacity in selecting a location. It is a difficult procedure to co-ordinate a location that works for every individual business tenant within the premises. The result of this can be the potential loss of tenants, which directly can affect tenants and businesses on an individual basis.</p> <p>The implication of this is that the lengthy process that is the Railway Order, the client is unsure about the future of their business premises. They are not able to develop the existing business premises any further, nor can they be secure that their land will be claimed through acquisition by Transport Infrastructure Ireland until the draft Railway Order is granted or refused by An Bord Pleanála within an undetermined date in 2023. The client asks of An Bord Pleanála in the instance of approving the Draft Railway Order, that a clear communication line opens regarding the property and land acquisition procedures, and how businesses will be assisted.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | Please see the response to Item 9.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| 11                                                                                                                                                                       | 7.4.4 Communication with TII                           | 20       | <p>There was a lack of clarity in regard to the communication about the timelines in which the subject properties will be affected prior to the potential finalization of the Railway Order. In order to facilitate the potential acquisition of the properties, as well as the relocation of the properties, a clear communication and timeline is a necessity in order for our clients to facilitate their next decisions in regard to the properties that are affected as a result of a potential CPO acquisition.</p> <p>We would recommend for An Bord Pleanála to ensure, that if the Draft Railway Order is approved, to put an emphasis that the National Road Authority, under Transport Infrastructure Ireland, provide clear details about the interval stages of the project, and the expected timeframes for the duration of the initialization plans of the Metrolink, construction, monitoring and implementation stages of the project, particularly in regard to when lands will be required to be acquired.</p> <p>Regard should be had to this environmental baseline position in the Metrolink Draft Railway Submission including EIAR Chapter 21 (Land Take) 21.5 Predicted Impacts including 21.5.1 Do Nothing Scenario.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | <p>When the Railway Order is granted by ABP, and is enforceable, TII's CPO powers as set out in the Railway Order Application will come into affect. 'Notice to Treat' will be served on each landowner whose land is being acquired. A Notice to Treat is a formal request served by the acquiring authority to agree a price for the portion of land or property identified. Following service of Notice to Treat the property owner will be required to submit a claim for compensation and as part of this process NTA will pay the reasonable costs (as part of the claim) for them to engage their own agent or valuer in preparing, negotiating and advising on compensation.</p> |

The outline CEMP is provided in the EIAR Chapter 5, Appendix A5.1.</p>      |
| 13                                                                                                                                                                       | 8.0 Conclusion                                         | 21       | <p>The submission is essentially to raise concerns regarding possible impacts of the Metrolink on the lands located at 2-3 Prospect Road, Glasnevin, Dublin 9. These concerns can be summarised as follows:</p> <p>1) Our clients is a long-term owner of the above-listed property which are currently used for a range of business uses, including our client's existing business use (Farrier Technology Limited - Bytech) and associated long-term and secure tenants.</p> <p>2) These lands are centrally located within the Dublin City Area being located alongside Quality Bus Corridors (QBC) and zoned 'Z3 - Neighbourhood Centres' in the Dublin City Council Development Plan (2017 to 2022) and also have the capacity to attract a range of different uses on the site, outside of the office sector.</p> <p>3) Owing to this potential, one of our clients Farrier Technology Limited would like to expand their existing operations on the site, proposals for which are currently being determined by An Bord Pleanála (Ref. ABP 312150-21).</p> <p>4) Notwithstanding our clients' concerns about the proposed location of the Metrolink Station in principal and their ability to find suitable alternative facility with a similar offering, the difficulties associated with moving businesses and the renewal of long-term rental revenue; this representation is seeking to ensure (a) accurate reporting of the impact in the draft Railway Order on client's interest to ensure appropriate decision taking to come; and (b) revision to the approach for the assessment of environmental effects on office premises; and (c) open communication well in advance regarding the Metrolink Land Acquisition Strategy 2022 and prior to the finalisation of the Railway Order.</p> | <p>In response to points 4 a, b and c of the conclusion to the submission we respond as follows:</p> <p>a) The impact on the property is clearly and accurately set out in the EIAR</p> <p>b) The approach to the environmental assesment methodology used in preparation of the EIAR is detailed in Chapter 2 of the EIAR and is consistant with relevant guidelines, policy and legislation and cannot be revised as suggested</p> <p>c) TII will continue to consult with affected property owners prior to and post a Railway Order being granted.</p>                                                                                                                               |

|                                                                                                                                                                              |                                                                                |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |  |
| St Josephs Church Re: Railway (Metrolink–Estuary to Charlemont via Dublin Airport) Order 2022 – Submissions by the Parish Priest and Judicial Vicar of the Marriage Tribunal |                                                                                |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |  |
| 1                                                                                                                                                                            | Construction - access to church restricted / blocked during construction phase | 1        | <p>According to the plans we have been given, the normal access of parishioners and others to the aforementioned Church Building and offices would be greatly restricted if not blocked completely. It is incumbent on me to state the serious footfall we get from people who have to attend the Mater Hospital or their family members, who all find it a place of solace when faced with life-threatening conditions. It is imperative for us as a faith community to protect, preserve and keep it open to the community.</p> <p>Besides, both the premises of my own accommodation, the Parish Office and the offices of the Dublin Interdiocesan Marriage Tribunal, according to the plans shown to us, lie directly above the proposed route of the metro-tunnel. Both of these offices provide a major service to parishioners and those who seek help and relief due to marriage failure. In fact in worldly terms it is a necessary community service. Indeed with all the work that will have to take place around the area we are concerned that an appropriate access be allowed during the whole period of the construction process so that the Church can remain both safe and available for worship and private prayer and that the offices mentioned can continue to function normally.</p> <p>For instance if we take the location plans ML5B-U38 and ML5B-U39 with corresponding Second Schedule reference numbers, a potential reading of these is that the Church and presbyteries with offices would simply be taken out of use. It is imperative that we receive the necessary guarantee that the subterranean work area would not cause closure of the parish and its functioning.</p> <p>We are also concerned about location plan ML5B-A5 with corresponding Second Schedule and ML5B-T1 with corresponding Fourth Schedule. The area of land they refer to is our area of access for funeral corteges and wedding cars as well car-parking for those who need mobile assistance as well as delivery vans to the Church. Pedestrian access is also provided from the Mater Hospital and various consultancies by this route. We request that for all these reasons this stretch remain open to all who normally use it.</p> <p>Our concern here is added to by the fact that we have been told that a significant part of Berkeley Road to the front of the Church will be taken over so as to facilitate site access in the building of the Mater station only adding to the difficulties of access to and exit from the aforementioned premises. We are also concerned that this use of Berkeley Road and possibly Berkeley Street would prevent access to the Presbyteries which contain the offices mentioned above. Health and safety considerations have also to be taken into account so that, should emergency services have to access any of these premises, they can easily do so.</p> | <p>TII confirm that throughout MetroLink construction access will be maintained for parishioners and others to the aforementioned Church building and offices. While the premises of your own accommodation, the Parish office and the offices of the Dublin Interdiocesan Marriage Tribunal lie above the proposed route of the Metrolink tunnel, these offices will still be able to function and access will be maintained, and the Church will remain both safe and available for worship and private prayer. TII also confirm that the Church and presbyteries with offices will not be taken out of use.</p> <p>Vehicular access for funerals, weddings, emergency services and car parking for those who need mobile assistance will be maintained during construction. Vehicles will be able to access the Church via the entrance on Eccles Street. During Phase 1 construction, all traffic movements will be maintained on Berkeley Road and Eccles Street. During Phase 2 and 3, there will be restricted access to Eccles Street from Berkeley Road. Vehicles seeking to route from Berkeley Road to Eccles Street will have to divert and approach Eccles Street from the N1 via either North Circular Road or Blessington Street (EAIR Chapter, Table 9.90).</p> <p>As identified in the EIAR (Section 5.10.7), construction activity will take place in the Four Masters Park, with parts of the Church grounds also within the Project Boundary. However, pedestrian access will be maintained to St Joseph's Church from both Berkely Road and Eccles Street throughout the duration of the construction of the Mater Station. Construction activities that may impact on places of worship (e.g. noise generation near churches) will be timed to occur outside of mass/service hours to minimise impacts.</p> <p>EIAR Appendix A9.5 section 7.7. details the construction traffic management associated with Mater Station, indicating that during the Advanced Enabling Works, there will be no diversions or road closures that will impact local access in the vicinity of the Church. Similarly, whilst footpaths will be impacted, diversions will be implemented to maintain pedestrian access.</p> <p>Property references ML5B-U38 and ML5B-U39 refer to subterranean works (essentially the through route of the Tunnel Boring Machine) and hence will be below all existing Church facilities so these are not taken out of use. ML5B-A5 is required as part of the station box though the area above it could be returned if not needed post construction. ML5B-T1 is temporary take needed to facilitate construction works although the intention is to maintain pedestrian access through here during the works.</p> <p>During the Main Works, the closure of access to Eccles Street from Berkeley Road to all traffic except for Emergency Vehicles will impact on local access, however diversions have been identified. Vehicles seeking to route from Berkeley Road to Eccles Street will be diverted and approach Eccles Street from the N1 via either North Circular Road or Blessington Street. Vehicles travelling away from Eccles Street, will be diverted southbound along Nelson Street, and from there can continue to travel along Berkeley Street, Mountjoy Street or Blessington Street. General traffic access to the Church will be maintained through the detailed diversion, including provision of reduced width access along Eccles Street for Emergency Vehicles. For pedestrians during this phase of works, appropriate signage and crossing facilities will be put in place to navigate around the site footprint.</p> |  |

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |  |
| St Josephs Church Re: Railway (Metrolink–Estuary to Charlemont via Dublin Airport) Order 2022 – Submissions by the Parish Priest and Judicial Vicar of the Marriage Tribunal |                                                           |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |  |
| 2                                                                                                                                                                            | Concerns about damage to church foundations and structure | 1        | <p>Obviously we have a concern about the buildings above this work, especially the Church which needs protection. It is important to point out that while the top of the tunnel is said to be 17.4 meters below street level, the fact is that the foundations of the Church may begin quite below street level. This is clear by even a brief look at the vaults under the sanctuary to be seen at the rear of the Church. So it raises a question as to what would be for this specific case an appropriate depth for the tunnel?</p> <p>Request: That every effort be made to protect St. Joseph's Church from damage (immediate or consequential) resulting from these works. Specifically we ask that the depth of the bore take account of the foundations of the Church and its age. That any damage resulting from the work will be repaired in full with no cost to the parish or Marriage Tribunal.</p> | <p>TII have assessed the potential impact of MetroLink construction on property, including St. Joseph's Church to ensure unacceptable impacts are mitigated. This includes the impact of vibrations from; the tunnel boring machine (TBM), mechanical excavation and blasting, and also construction generated ground movements leading to settlement and possible building and property movement. All of which have been assessed and reported in the EIAR, and are summarised below.</p> <p>EIAR Chapter 14.4.1.9 AZ4 – Groundborne Vibration during Construction. Tables 14.32 and 14.33 present the predicted vibration levels during TBM passage and mechanical excavation compared to the impact threshold values for vibration for various sensitive receptors (including St Joseph's Church). The predicted vibration presented in Table 14.32 and 14.33 outline the VDV (Vibration Dose Value is a parameter that combines the magnitude of vibration and the time for which it occurs) for TBM Passage at St Joseph's Church. The VDV Threshold Level for this building is 1.6 m/s-1, however the VDV for TBM passage is 0.265 m/s-1.75, and for Mechanical Excavation is 0.002 m/s-1.75. Both of these values are much lower than the VDV Threshold Level for this building, meaning that the building will not be damaged by vibration.</p> <p>EIAR Chapter 14.4.1.10 AZ4 – Blasting. Table 14.34 presents the predicted vibration levels during blasting compared to the threshold values for vibration for various sensitive receptors (including St Joseph's Church). According to the calculations presented by Table 14.34, at St Joseph's Church an exceedance vibration level of 4.2mm/s PPV (Peak Particle Velocity) is predicted compared to the Threshold Level for this building of 3mm/s, and therefore if not mitigated, it is predicted to have a significant impact on St Joseph's Church. Mitigation measures will therefore be implemented to reduce the risk to the building from blasting as outlined in Chapter 14, section 14.5.1.2. Mitigation will include preparation of site specific blast designs that take account of sensitive receptors, including minimisation of the maximum instantaneous charge weight, or if necessary, alternative methods to blasting being employed. With the implementation of mitigation measures, vibration from blasting will be sufficiently reduced such that the residual vibration will not cause damage to St Joseph's Church.</p> <p>Appendix A 5.17 Building Damage Report, covers the assessed impacts of construction generated ground movements and settlement on property. Table 5.2 of this report shows that St Joseph's Church has been assessed as falling within the 'slight damage' category currently, an explanation for which can be found in Table 4-4 of the aforementioned report. TII would also like to confirm that the assessment undertaken takes account of the fact the Church structure extends below ground level. Recognising the cultural and historical significance of the building, it has been designated as "special" and hence a further Stage 3 refined assessment will be undertaken that will take account of final design and construction methodology details most likely utilising advanced numerical modelling techniques and further surveys of the building. The results of this refined assessment typically show that earlier assessments are conservative and over estimate the likely impact of construction generated ground movements.</p> <p>St Joseph's Church has also been identified as a location where pre-construction condition surveys will be undertaken (See Chapter 26, Section 26.5 Predicted Impacts), subject to the property owners permission, and any required pre-construction repair work identified and undertaken. Monitoring instrumentation will also be installed to monitor the performance of the works and potential environmental impacts, including those discussed above to ensure that acceptable limits are not breached. Finally, in the event of any damage occurring that is attributable to MetroLink works, this will be repaired at no cost to the property owner.</p> |  |

| St Josephs Church Re: Railway (Metrolink–Estuary to Charlemont via Dublin Airport) Order 2022 – Submissions by the Parish Priest and Judicial Vicar of the Marriage Tribunal |                              |          |                                                                                                                                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| 3                                                                                                                                                                            | Route of the proposed scheme | 4        | Might another route be possible? We just wonder whether the solution for Dublin Airport is not to extend the proposed Luas line to Charlestown onto the airport thus providing a rail link to that facility in that way? Would not this latter way of providing for the airport be far less costly on the public purse and also less disruptive for many communities? | <p>The solution for Dublin Airport has been determined at a strategic level by GDA Transport Strategy 2022-2042 which provides that "<i>The current Metrolink project has been identified as the most advantageous way to serve the critical levels of transport demand on [the corridor from Dublin City, Swords and Dublin Airport.]</i>"</p> <p>The strategy was informed by a series of studies developed by the NTA and TII, which have been subject to numerous rounds of statutory and non-statutory public consultation. Chapter 7 (Consideration of Alternatives) details alternative route options considered by TII in the development of the proposed Project and the rationale for ruling those options in and out, that included an assessment of the environmental impacts of each option considered, both positive and negative. In the Fingal North Dublin Transport Study (2015), alternative options were considered including several light rail options. Extending the Luas line from Broombridge to Finglas (LR2) and on to Dublin Airport and Swords was also considered, however it was eliminated from further consideration as the journey time for this option would be very long when compared to other options.</p> <p>The assessment identified an Optimised Metro North (LR7) as the best option for the following reasons:</p> <ul style="list-style-type: none"><li>• It was the most economically advantageous scheme when compared to other options, delivering the highest benefit to cost ratio (BCR) of 1.5, almost double the BCR of the next best scheme (Tunnelled Luas);</li><li>•It generated the highest level of transport benefits when compared to other options, with the highest number of additional public transport trips generated in the morning peak travel period;</li><li>•It provided a new strategic public transport corridor, avoiding reliance on either the existing heavy rail lines or the Luas Cross City line;</li><li>•It delivered a connection right into the centre of the city, serving O'Connell Street and St. Stephen's Green;</li><li>•It retained the opportunity to extend Luas Cross City to Finglas, which would not be feasible if the tunnelled Luas options were selected, and it avoided reducing the service level on Luas Cross City to Cabra and Broombridge;</li><li>•Due to the high level of segregation, it was considered to significantly increase capacity to allow for potential future growth along the corridor, when compared to other options;</li><li>•It could potentially be extended southwards in the longer term to alleviate high travel demand on the Luas Green Line, and ultimately form a complete north south metro corridor traversing both the north and south city; and</li><li>•This option delivered the highest safety benefits when compared to other options.</li></ul> |
| 4                                                                                                                                                                            | Watercourse below the church | 5        | We wish also to alert you to a concern had by some about certain channels for water in the ground below us that may or may not be a cause for concern in the construction process.                                                                                                                                                                                    | <p>This is not an uncommon geotechnical phenomenon and is one of the reasons why we have selected a Tunnel Boring Machine (TBM) that is designed to operate in water bearing ground to construct the tunnels as this allows the tunnel face to be pressurised to prevent the ingress of water during construction of the tunnel and thus any impact on the advance of the tunnel works.</p> <p>In addition, the proposed mitigation measures in chapters 18 Hydrology (Section 18.6.1) and Chapter 19 Hydrogeology (Section 19.6.2) will ensure that groundwater and surface water resources are protected during the construction phase. TII would also like to assure you that we have undertaken; an extensive review of historical geotechnical and geological records and surface mapping, project specific ground investigation and mapped the expected geotechnical conditions, coupled with a risk management approach that deals with any remaining uncertainty to ensure the works are constructed safely.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

| Re: TII Submission for the Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022 |                                        |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| 1                                                                                                  | Executive Summary                      | 4        | <p>Fingallian's GAA Club fully supports in principle, the project to deliver a metro railway service to Swords. However, we are submitting an observation to An Bord Pleanála as we believe that the Club, its membership and the wider community will suffer adversely as a consequence of construction works and the plans being proposed for the Balheary green space when works are completed.</p> <p>Under the current plan, Fingallians will be significantly worse off in terms of available playing facilities. At a minimum the club would expect no impact to existing facilities as a result of the development of MetroLink. The current plan results in Fingallians losing a full-size pitch.</p> | <p>TII wish to thank you for taking the time to make this submission and are appreciative of your positive support for the Project.</p> <p>The proposed pitch layout tries to minimise the impact on the southernmost pitch (pitch #1, full size GAA pitch), hence the proposed intervention into that pitch is minimal. Through the consultations with Fingallians and Fingal County Council TII established that this pitch is the only full size pitch at this location and it is vital for the clubs operation. It is envisaged that the work will primarily involve relining, goalpost and ball net installation, which could be done in between the games or in off-season period. The phasing of the utilities works on both sides of the pitch will also be adjusted to suit the pitch shifting slightly in its position. The pitch will be at all times complying with minimum dimensions for a full size GAA pitch (130x80m). TII will work closely with Fingallians to ensure that there will be no impact to availability of the pitch during the construction works and the terms of the contract between the TII and its Contractor will reflect this requirement.</p> <p>The pitch #2, which is currently marked slightly below the full size (144x75m), is proposed to be converted to an artificial all weather surface pitch. Through the consultations with the club we established that this pitch is being used mainly for training of juvenile groups. It has been agreed at the request of the Fingal County Council and the Fingallians GAA, during the consultation process, that this pitch will be converted to an artificial pitch with flood lighting. The artificial surface and the lighting would compensate for the change in size of this pitch. The width of the pitch #2 is reduced to 50m initially, however it is proposed to extend its width to 60m after the MetroLink works along its eastern edge are completed. Further extension of the width is impossible as this would impact a tree buffer along the Ward River, which was left untouched at the request of the Fingal County Council. To maximise usefulness of the new pitch, it has been proposed to have the pitch fully lit, so it can benefit from much heavier usage - also outside of the daytime hours - than a natural pitch could withstand.</p> <p>It is anticipated works to pitch 2 will take a maximum of 1 year to complete. TII in collaboration with Fingal Co Council and Fingalians, will identify suitable alternative training facilities which will be in place in advance of the commencement of works to Pitch 2.</p> <p>As a result of MetroLink works, TII anticipate that works to Pitch 1 will improve the overall appearance and condition of Pitch 1. The provision of a All Weather-Flood Lit training Pitch 2 represents a significant upgrade to currently training pitch in use by Fingallians.</p> <p>TII therefore do not accept that the Club will be significantly worse off in terms of available playing facilities post MetroLink completion.</p> |
| 2                                                                                                  | Executive Summary                      | 4        | <p>We also believe the proposed works will cause a significant risk to the health and safety of club members and the wider community as adequate provision is not being made to enable safe access to Balheary or Fingallian's GAA Club.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | <p>As presented in EIAR Chapter 11, Population and Land Use, pitches will need to be repositioned and reduced in size, with potential severance impacts due to construction activity along the R132 leading to temporary road closures and diversions. However, mitigation measures including temporary adjustments and advance notices will be in place reducing the significance of the impacts. During the construction work, the quality of pedestrian access will also be maintained, with additional crossing points added along the route to facilitate safe access. Please also refer to response (5) below.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| 3                                                                                                  | Fingallian's C.L.G. - Current Activity | 5        | <p>Any reduction or restriction in access to the Balheary facilities in the short and medium terms will have a detrimental impact on Fingallian's ability to manage the demand for playing time. It is imperative that An Bord Pleanála considers as part of the planning application that suitable alternative facilities are provided for the duration of the project and when construction is finally completed.</p>                                                                                                                                                                                                                                                                                        | <p>Please refer to response (1) above.</p> <p>TII will work closely with Fingallians to ensure that there will be no impact to availability of Pitch 1 during the construction works and the terms of the contract between TII and its Contractor will reflect this requirement.</p> <p>It is anticipated that works to pitch 2 will take a maximum of 1 year to complete. TII in collaboration with Fingal Co Council and Fingalians, will identify suitable alternative training facilities which will be in place in advance of the commencement of works to Pitch 2.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

| Re: TII Submission for the Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022 |                           |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |  |
| 4                                                                                                  | Connectivity and Movement | 5        | <p>The Club fully supports in principle, the development of MetroLink as it will be a key enabler for the commuter residents in the town bringing them to and from their homes and to Fingallians in the most efficient ways possible with reduced carbon footprint aligned with the council improvements for cyclists. However, the project cannot be delivered at the expense of the already limited recreational and green spaces in the locality.</p> <p>Fingallians is particularly concerned about the short-term impact of the MetroLink works in the Lissenhall area. Based on our understanding of the planned works:</p> <p>* Both full-size playing pitches will be unavailable for up to 12 months (estimate) as the southern-most pitch (pitch #1 below) has to be re-aligned. Pitch #2 will be developed as an all-weather but reduced in size when compared to the existing pitch. As a result, this pitch will not be suitable to host matches. While we welcome the intended provision of an all-weather pitch it is essential that the design is reconsidered and increased to a full-size all-weather flood-lit pitch.</p> <p>- At present we have two full size pitches which are used year round</p> <p>- Providing a full size all-weather pitch will ensure a maximum utilisation (# of games and teams) of the pitch throughout the entire year particularly during adverse weather conditions</p> <p>- Ensure less travel - this will have a positive impact on reducing car journeys and hence a reduction on our carbon footprint by reducing the need for renting indoor facilities throughout north county over the winter months</p> <p>- There is sufficient space to enable the increase in size.</p> | <p>As per our repsonse to (1) above, we confirm that only Pitch 1 is a "Full Size" GAA pitch. Pitch 2 is a training pitch whose dimensions currently are smaller than the minimum regulation GAA pitch (130 x 80m). Our proposals in repect of pitch 1 and 2 are outlined in response (1).</p> <p>It is antipated works to pitch 2 will take a maximum of 1 year to complete. TII in collaboration with Fingal Co Council and Fingalians, will identify suitable alternative training facilities which will be in place in advance of the commencement of works to Pitch 2.</p> <p>As as result of MetroLink works, TII anticipate that works to Pitch 1 will improve the overall appearance and condition of Pitch 1. The provision of a All Weather-Flood Lit training Pitch 2 represents a signiifcant upgrade to the current training pitch in use by Fingallians.</p>                     |  |
| 5                                                                                                  | Connectivity and Movement | 6        | <p>The revised plan for the footbridge crossing the R132 suggests it will be permanently removed which is contrary to the original plan (see photo below). This will bring an increased risk to the large numbers of club members, particularly the exceptionally large numbers of juveniles, travelling teams, parents/supporters and the general public who access Balheary and LMP on a daily basis.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | <p>As detailed EIAR Chapter 5, MetroLink Construction Phase, Fingallian's Footbridge Satellite Compound, the footbridge provides general access across the R132 Swords Bypass. It also functions to link the Balheary Park playing pitches to the Fingallian's GAA Club. However, its use becomes redundant by the proposed upgrade of the R132 Swords Bypass through this area, with signalised crossings replacing the current footbrodge.</p> <p>The planned upgrade of the R132, and placement of signalised pedestrian crossings will be completed and operational in advance of the MetroLink works. As part of the Metrolink project the removal of the bridge is to be sequenced in such a way that an alternative safe pedestrian crossing is provided prior to demolition to ensure that access and connectivity is safely maintained between Balheary and Fingallians GAA Club.</p> |  |
| 6                                                                                                  | Connectivity and Movement | 6        | <p>Provision must be given to Fingal maintenance vehicles (grass cutting) and emergency access for an ambulance.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | <p>As outlined in EIAR Appendix A9.5, traffic movements will be restricted to and from the R125 arm of Estuary Junction, resulting in an approximate 1km diversion for southbound movements and 2km diversion for westbound movements so that access can still be maintained. Two U-turn facilities will allow traffic impacted by the Estuary Junction closures to stay on the R132 for the entirety of the diversion. These diversions will therefore maintain traffic access for both maintenance and emergency access.</p>                                                                                                                                                                                                                                                                                                                                                                 |  |

Dublin - Project - Metrolink (TII) |                        |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 1                                                                                                                                                                                     | Observation/ Objection | 1        | The project will directly affect me. Initially TII lied and said they were demolishing my property. Now they say they are tunnelling underneath my building and taking our car park and garden. Therefore, if permission is granted and this project proceeds, myself and the other residents will be forced to move.                                                                                                                                                                        | <p>As confirmed in Chapter 11 (Population and Land Use), no residential properties will be demolished at Glasnevin. Chapter 21 (Land Take) details that the communal garden areas, car parking and traffic access to the apartments will be subject to land take during the construction works, however there is no permanent land take associated with the apartments themselves.</p> <p>TII understand the reasons for your concerns and would like to provide the assurance that the potential disturbance impact on your property as a result of the proximity of the proposed tunnel and station has been carefully assessed. This includes the impact of noise and vibrations from: the tunnel boring machine (TBM), mechanical excavation and blasting; construction generated ground movements leading to settlement and possible building and property movement; and the operation of MetroLink. All of which have been assessed and reported in the EIAR and are summarised below. With exception of a temporary disturbance when the TBM passes your property, TII are predicting a 'not significant' impact to the building occupants and your building, or risk to the integrity of your house.</p> <p>Further details on the impact of noise and vibration at your property are included in response item (6) below.</p>                                                                                                                                                                                           |
| 2                                                                                                                                                                                     | Observation/ Objection | 1        | There are many factors that will negatively impact the residents of the Court. The most serious impact in my view is to potentially be forced to move out for many years as the works will be unbearable to live with. This will have a severe psychological impact on many residents who have lived at the Court most of their lives especially as there is a housing crisis. Also many of us have had the same neighbours for 20 years plus so the community will be broken up/ displaced. | <p>Please refer to response item (1) above in relation to the predicted impact at your property, and the support and compensation offered by TII to affected properties.</p> <p>Chapter 10 (Human Health) details how the EIAR has considered impacts to psychological health. It is noted that there are potential psychological impacts from the construction phase. However, psychological impacts are very complex and not easily predicted, with no simple methodology to predict effects in groups of people. Potential psychological effects are also not equally distributed, with the construction of Glasnevin Station seen as essential in order to provide an appropriate station to service the area. While the negative psychological impacts on residents are recognised and accepted, it is also recognised that the individuals affected will have to be compensated and rehoused appropriately. While this may give rise to some disruption and annoyance it is not considered likely that there will be long-term deleterious effects, as there is no evidence of a higher incidence of psychological illness where people were rehoused in similar circumstances. It also must be balanced against the positive psychological impacts of the Operational Phase and the benefits and convenience to residents of the area given the proximity of the proposed MetroLink stations. On balance, there is no reason to predict significant adverse effects on human health from a psychological perspective.</p> |
| 3                                                                                                                                                                                     | Observation/ Objection | 1        | There is also the concern that the building may be irreparably damaged during construction.                                                                                                                                                                                                                                                                                                                                                                                                  | Please refer to response item (1) and (6) in relation to the predicted impact at your property, and the support and compensation offered by TII to affected properties.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |

| Letter Re: Railway Order Application - Metro North: Estuary through Swords, Dublin Airport, Ballymun, Glasnevin and City Centre to Charlemont, Co. Dublin - Project - Metrolink (TII) |                        |          |                                                                                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| 4                                                                                                                                                                                     | Observation/ Objection | 1        | It is unacceptable that we should lose our secure parking spaces.                          | <p>Temporary management measures have been developed to minimise the impact on parking and loading. Temporary parking will be provided during construction. TII are in discussion with the local authority and other parties to identify a suitable location in the immediate vicinity.</p> <p>Upon construction works being finished the resident carpark at The Court will be reinstated in a new alignment and associated landscape provision of trees and shrubs to the new layout. This is indicated in Chapter 4 (Description of the MetroLink Project), section 4.17.7.</p>                                                                                                                                                                                                                                                                                   |
| 5                                                                                                                                                                                     | Observation/ Objection | 1        | The loss of the garden will be huge as many of us use it during the spring/ summer months. | <p>TII will offer compensation to property owners for land that is deemed to be acquired land in accordance with the general compulsory purchase code. Appropriate compensation will also be payable to owners of properties that are subject to short-term and or temporary acquisition.</p> <p>Compensation will be provided through the Compulsory Purchase Order (CPO) process. Details are set out in the LAS (Land Acquisition Strategy) regarding the arrangements proposed for the provision of information and assistance to owners and occupiers of land required for the construction and/or operation of the MetroLink project whether or not the occupier has any interest in the land which may be subject to a compulsorily acquisition.</p> <p>Please refer to response item (4) above in relation to predicted impacts on psychological health.</p> |

Dublin - Project - Metrolink (TII) |                        |          |                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| 6                                                                                                                                                                                     | Observation/ Objection | 1        | The noise/ vibration will not be acceptable. For example, there are roadworks at present every night which are causing disruption to sleep and that is only a fraction of the potential noise we would have to endure should Metrolink go ahead. | <p>Please refer to response item (1) above in relation to the predicted impact at your property, and the support and compensation offered by TII to affected properties.</p> <p>Construction Phase – Airborne Noise and Vibration<br/>EIAR Chapter 13 Airborne Noise and Vibration, Table 13.62 summarises the potential significant construction noise impacts from the construction of the proposed Glasnevin Station, which includes The Court, Dalcassian Downs. The predicted impact without additional noise mitigation is Significant to Very Significant during some of the work phases. Noise mitigation measures are detailed in section 13.6.1 and include for a proposed 4m high acoustic noise screen along the north, east and southern boundaries of the Glasnevin construction compound. With these mitigations the construction impacts are reduced to below significant.</p> <p>Construction Phase – Groundborne Noise and Vibration<br/>EIAR Chapter 14 Groundborne Noise and Vibration, Appendix 14.5 presents the predicted groundborne noise and vibration levels during the construction phase of the project for The Court, Dalcassian Downs:</p> <ul style="list-style-type: none"><li>• The predicted level of groundborne noise during TBM passage is 49 dB LASmax, which is above the 45 dB LASmax threshold resulting in a significant impact on the occupants of the building for the relatively short duration of TBM passage.</li><li>• The predicted level of groundborne vibration during TBM passage is 0.263 ms-1.75 day and 0.221 ms-1.75 night, below the VDV (Vibration Dose Value is a parameter that combines the magnitude of vibration and the time for which it occurs) Threshold Level of 1.0 ms-1.75 day and 0.5 ms-1.75 night, resulting in a not significant impact on the building.</li><li>• The predicted level of groundborne noise during mechanical excavation at Glasnevin Station is 41 dB LASmax, which is above the 40 dB LASmax threshold resulting in a significant impact on the occupants of the building.</li></ul> <p>Unfortunately, there are no effective methods available to reduce groundborne noise or vibration from the TBM at source but noting that the duration of this impact will be temporary and of the order of up to two-weeks as the TBM passes. TII will undertake advanced consultation and stakeholder engagement to prepare people for the passing of the TBM and ensure the timing of these impacts are known.</p> <p>TII's contractor(s) will prepare a Construction Noise and Vibration Management Plan (CNVMP) for the proposed Project as referred to in EIAR Appendix A5.1, Outline Construction Environmental Management Plan (CEMP). The CNVMP will be a live document and will include a full monitoring and auditing programme which will be agreed with the Local Authorities prior to the commencement of the Construction Phase, including predetermined monitoring trigger levels to ensure noise and vibration limits are not breached, noting that it is not possible to mitigate TBM groundborne noise and vibration at source. Table 6.2: Noise and Vibration Measures of the Outline CEMP outlines the monitoring programme requirements.</p> <p>The Transport Infrastructure Ireland (TII) Airborne Noise and Ground-borne Noise Mitigation Policy (Appendix A14.6 of EIAR Chapter 14) also sets out the construction noise insulation and temporary rehousing measures to be implemented where required.</p> |

| Letter Re: Railway Order Application - Metro North: Estuary through Swords, Dublin Airport, Ballymun, Glasnevin and City Centre to Charlemont, Co. Dublin - Project - Metrolink (TII) |                        |          |                                                                                                                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| 7                                                                                                                                                                                     | Observation/ Objection | 1        | There will be loss of light from the hoarding during construction.                                                                           | As detailed in EIAR Chapter 5, MetroLink Construction Phase, hoarding is required to ensure that the construction sites are secure. Exceptions to the standard 2.4m hoarding or fencing will be at areas that need specific sound barriers or boundary treatment, as identified in Chapter 13 (Airborne Noise & Vibration) and Chapter 27 (Landscape & Visual). As noted in Chapter 07 (Consideration of Alternatives), the construction compound at Glasnevin is necessarily centred on the station box location and limited in size to minimise impact on surrounding buildings, roads, railway and canal. No environmental assessment of alternatives was undertaken as this was the only feasible option. Prior to the commencement of the construction works at each compound, the Contractor will conduct an individual site assessment to verify the height and positioning of screening to control noise impacts based on the most up to date construction methodologies and input data. As noted in Table 13.85 of Chapter 13 (Airborne Noise &Vibration) the construction hoarding at Glasnevin will be up to 4m in height on the northern, southern and eastern boundaries.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| 8                                                                                                                                                                                     | Observation/ Objection | 1        | There are personal injury concerns relating to ingesting dust/ dirt generated from the construction and the possible infestation of rodents. | <p>The EIAR has fully assessed the potential impacts on the local population, including dust and other air quality emissions impact assessment, and proposed mitigation measures in Chapter 16 (Air Quality). The potential risk from dust emissions has been reviewed for the critical activities at each of the construction areas. The Construction Environmental Management Plan (Appendix A5.1) will be used to manage the construction phase dust emissions. In addition, before commencing works, an Air Quality Management Plan shall be prepared and submitted in advance to the relevant planning authority. The plan will include all appropriate dust and emissions mitigation measures applicable to the circumstances of the relevant site, based on the local authority requirements and industry best practices. The plan will be developed by the Contractor and for each worksite shall include:</p> <ul style="list-style-type: none"><li>o An inventory and timetable of activities which may give rise to emissions or dust;</li><li>o Alert levels and system to be used (including notification process);</li><li>o Details of control measures;</li><li>o Details of dust monitoring arrangements, including the location of sensitive receptors, monitoring locations, and monitoring equipment to be used; and</li><li>o Details of the air quality reporting requirements.</li></ul> <p>The types of measures that will be implemented to manage dust will include the following:</p> <ul style="list-style-type: none"><li>•Material handling systems and site stockpiling of materials will be designed and laid out to minimise exposure to wind. Water misting or sprays will be used as required if particularly dusty activities are necessary during dry or windy periods;</li><li>•Any blasting will be completed by specialised contractors with a specific blasting dust management plan;</li><li>•Liaison with local authorities and community groups;</li><li>•Hoarding will be provided around the construction compounds; and</li><li>•It is anticipated that methods of collecting rainwater and recycling for general site use, will be adopted where practical. Requirements for dewatering installations at deep station and tunnel portals can also provide a valuable source of water for general site use.</li></ul> |

Dublin - Project - Metrolink (TII) |                        |          |                                                                                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| 9                                                                                                                                                                                     | Observation/ Objection | 1        | I believe there is a security/ safety issue as we will be living on a building site. If at some stage the work is completed I would have an issue living at a train station with the anti-social behaviour that can occur.                                                                                       | <p>As detailed in Chapter 05 (MetroLink Construction Phase), there will be a construction security team on site. The primary function of the site's security team will be to ensure that no unauthorised entry to site occurs. There will be fencing around the sites to minimise the risk of vandalism and unauthorised access. This process will be made easier by all operatives possessing an ID card. ID cards will only be issued to operatives that have attended the site induction and (if relevant) a medical examination. CCTV and alarm systems will be installed where required.</p> <p>One of the outcomes of the architectural and urban realm design is to discourage anti-social behaviour during the operational phase, for example through the attractive setting, use of public lighting, open sight-lines, and avoidance of areas where individuals and groups of people can hide. Vandalism and anti-social behaviour on the trains and within the stations will be observed through CCTV (Closed Circuit Television) and if required staff sent to manage the situation. The ACID (Access control and intrusion detection) system will also identify intruders trying to enter locations where unauthorised access is prohibited. It will also cover the platform doors to the track (surface and retained cut stations) and to the tunnel (underground stations); entrances to technical rooms, the station incident rooms, and stations (outside operational hours); access to the mainline tracks; entrances to facilities at Dardistown depot (test racks, workshops, garages, OCC (Operational Control Centre), technical rooms, storage areas, offices, and emergency doors); the back-up OCC: electricity sub-stations; tunnel portals; shafts and ventilation shafts and emergency doors. ACID will be integrated with the telephone system, CCTV, SCADA (Supervisory Control and Data Acquisition), Fire Alarm System and the Central Clock System.</p> <p>Subject to a Data Protection Impact Assessment and compliance with the General Data Protection Regulation, there will be a single CCTV system and a single ACID system serving all stations, tunnels, substations, and depot, and managed from Dardistown Depot.</p> |
| 10                                                                                                                                                                                    | Observation/ Objection | 1        | I strongly object to this project for the following reasons: <ul style="list-style-type: none"><li>• Psychological injury</li><li>• Personal injury</li><li>• Health and safety</li><li>• Potential damage to property</li><li>• Damage to wildlife</li><li>• Damage to nature</li><li>• Inconvenience</li></ul> | <p>Please refer to the above responses in relation to impacts to human health (including psychological health), health and safety, potential damage to property and inconvenience.</p> <p>The EIAR details in full the proposed environmental protection measures to be implemented during construction. One of the key aspects of environmental control during the construction phase is the requirement for the appointed contractor to prepare a detailed design and construction methodologies plan in the form of a detailed Construction Environmental Management Plan (CEMP) to ensure all environmental impacts are managed and mitigated in accordance with the EIAR and Railway Order, assuming an Enforceable Railway Order is granted. This detailed CEMP(s) will be provided to DCC for consultation and approval in advance of any construction works on site. An Outline CEMP is included in Appendix A5.1 of the EIAR that will be developed further by the appointed contractors. Monitoring instrumentation will also be used throughout the works to monitor potential environmental impacts, including those discussed above to ensure that acceptable limits are not breached.</p> <p>The EIAR Chapter 15, Biodiversity, describes and assess the likely direct and indirect significant effects of the proposed MetroLink Project on Biodiversity, with particular attention to species and habitats protected under Directive 92/43/EEC and Directive 2009/147/EC. This chapter also provides a characterisation of the receiving environment within the proposed Project and within a wider study area in the vicinity of the proposed Project and the proposed mitigation measures to ameliorate the predicted impacts.</p> <p>Measures to mitigate and monitor the predicted impacts as a result of construction activity across the proposed Project are also detailed in Chapter 5 (MetroLink Construction Phase) and summarised in Chapter 31 (Summaries of the Route Wide Mitigation &amp; Monitoring Proposed).</p>                                                                                                                                                                                                              |

|                                                                                                                                                                                       |                        |          |                                                                                                                                      |                                                                  |

| Letter Re: Railway Order Application - Metro North: Estuary through Swords, Dublin Airport, Ballymun, Glasnevin and City Centre to Charlemont, Co. Dublin |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| 1                                                                                                                                                         | 5. Grounds   | 4        | I wish to object to the proposed site in front of Our Lady of Victories Church (OLV) being used as a location for the Collins Avenue Station as I feel there is a better alternative site which would have the benefit of providing a modern transport link but with far less adverse impacts on the people living/working in the proposed area and the young children attending OLV schools. I fully accept the benefits of having a metro station but there is a need to properly evaluate the impact on the large number of people who would be affected if this location is used.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | <p>As outlined in EIAR Chapter 7 (Consideration of Alternatives), section 7.7.10.7, the assessment undertaken for the Emerging Preferred Route (EPR) identified a preferred route option including the proposed station location in front of Our Lady of Victories (OLV) Church.</p> <p>This location for the station provides a number of advantages when compared to other location options, including Albert College Park:</p> <p>(1) It allows the Project to achieve a core project objective of providing public transport that is integrated in the existing and future proposed transport network, providing for interchange between bus routes both on Collins Avenue and on Glasnevin Road. A station location further south at the northern section of Albert College Park would not provide a good level of interchange as there would be over 500m separating potential bus stop locations on Collins Avenue and the MetroLink station.</p> <p>(2) The proposed Collins Avenue Station will have a significant catchment area, noting the analysis undertaken at the Emerging Preferred Route (EPR) stage identified this route option had the highest potential passenger numbers when compared with other route options.</p> <p>(3) During the construction phase, the location of a station within the frontage to Our Lady of Victories means that traffic disruption to Dublin would be reduced when compared to the location of a station within the road corridor (partially or fully).</p> <p>TII acknowledge that there is potential for significant environmental effects on the surrounding area to the proposed MetroLink station if not mitigated effectively. However, as detailed in relevant chapters of the EIAR, TII's assessment shows that it is possible to mitigate the majority of potential impacts identified at this location during the construction period. Once the construction phase is completed, the location of a MetroLink station at OLV Church will provide significant positive benefits to the local community in terms of enhanced public transport provision, reduced traffic and the resultant improvements in the environment, with reduced noise and air quality pollution.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| 2                                                                                                                                                         | 5. Grounds   | 4 and 5  | <p>The main reasons for my objection are listed below:</p> <p>1) The proposed site for Collins Avenue Station is unsuitable because its construction which may take 7-10 years when the enabling works are taken into consideration would have a devastating impact on the operation of the 3 schools who share an entrance which is within 100 metres of the construction site for the station. The combined total of children and teachers needing daily access to the schools is close to 700. These users will be in this location for an average 5 hours a day for students and longer for teachers and admin staff. This is roughly 3,500 daily hours of school occupation affected by construction at the proposed OLV site. There will be additional traffic and disruption from the construction workers coming into the area as well as the usual traffic and these effects will continue through out the school day, increased risk of traffic accidents, traffic diversions will be needed and removal of existing parking will all impact access to the school. Heavy lorries moving tons of earth coming and going throughout the day will lead to greater pollution which will have a negative effect on the children's health and wellbeing and the associated noise will further erode their quality of life. This is a health and safety matter and when this number is multiplied by the weeks and years of construction the final impact on their young lives is significant and this measurement of impact needs be taken into account.</p> <p>2) Furthermore, when the parents who are obliged to drop off and collect such young children are factored into the equation, the number of affected people is well in excess of a 1,000. All of them will be adversely impacted on a daily basis. This is an unacceptable Impact, and that is only part of the problem.</p> | <p>Please refer to response item (1) above in relation to the proposed location for the Collins Avenue Station.</p> <p>It is important to note that as outlined in EIAR Chapter 5 Table 5.15, the estimated construction duration anticipated for the principal construction elements at Collins Avenue Station Compound / Deep Station is 99 months which equates to 8.25 years. However, the duration of major civil engineering work that would generate noise and dust would be c36 months (up until roof slab is on which will significantly reduce emissions). While there is potential for effects during the construction phase, impacts will be minimised through the implementation of the Construction Environmental Management Plan (CEMP) (EIAR Appendix A5.1 Outline CEMP, Diagram 2.1). Further details are provided below having regard to the management of traffic, noise and vibration and air quality. Mitigations for these impacts are also presented in Appendix A5.1 Outline CEMP.</p> <p>Traffic Management and Access</p> <p>Chapter 5 of the EIAR (MetroLink Construction Phase), explains that traffic management plans for the construction phase of the Project have been developed to minimise the impact on road users and to maintain access. Prior to implementation, all traffic management measures will be agreed with the relevant local authority, and where relevant, consultation with An Garda Síochána and other statutory stakeholders will be undertaken.</p> <p>The design of traffic management measures and highways works is based on achieving the key objective of maintaining continual access to all properties during the works. Where necessary, a safe alternative route will be provided for pedestrians and vulnerable road users, such as children, and persons with restricted mobility, to maintain pedestrian access to premises. Where detour routes are required, these will be kept as short as possible and detour signage will be clear and easy to understand. These mitigation measures are presented in Appendix A5.1 Outline CEMP.</p> <p>Measures will be implemented in order to maintain access to the schools during the construction of MetroLink. There are no footway, footpath or cycle lane closures that would require users to significantly divert from the existing routing, therefore maintaining access to the schools and surrounding area for people who walk or cycle. There will also be a temporary footpath constructed to the rear of the Church in order to maintain access from Albert College Court. Vehicles accessing the Church car park will be required to use a diversion via Albert College Court, maintaining access during all project stages. The proposed diversion for local access is presented in Appendix A9.5 Scheme Traffic Management Plan.</p> |

| Letter Re: Railway Order Application - Metro North: Estuary through Swords, Dublin Airport, Ballymun, Glasnevin and City Centre to Charlemont, Co. Dublin |              |          |                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
|                                                                                                                                                           |              |          |                                                             | <p>As outlined by EIAR Chapter 9, Traffic and Transport, Table 9.64, enabling works in this area will be undertaken such that one lane of general traffic and one bus lane in each direction will remain open, as well as dedicated cycle lanes being provided. Section 9.6.1.2.4.3 also confirms that during the enabling works, footways will either be retained in their existing location or realigned to a similar standard. During the main works, there will be a temporary footpath constructed to the rear of OLV Church to maintain access from Albert College Estate.</p> <p>The Enabling Works and Main Works will have an impact on accessing the OLV Schools if not mitigated. For those who walk to the premises, the signalised pedestrian/toucan crossing outside the front of the school will be retained during all works and will continue to allow safe access for pedestrians and vulnerable users. As presented in Appendix A9.5 Scheme Traffic Management Plan, there will be a restriction on parking in the bus lane on the western side of the R108, however with the maintenance of the pedestrian crossing, safe access will be maintained for drop-offs occurring on the eastern side of the R108 and other locations.</p> <p>In relation to health and safety, as outlined in EIAR Appendix A9.5 Scheme Traffic Management Plan Section 2.5.2.2, construction vehicles will be controlled in terms of the hours of operation (i.e. construction traffic will be prohibited during periods of very heavy traffic, and during school drop off and pick up periods to ensure the safety of children). In addition, there will be controls at the entrance and exit of sites for construction vehicles in order to ensure the health and safety of other road users. These details are also presented in Appendix A5.1 Outline CEMP.</p> <p>As outlined in Appendix A5.1 Outline CEMP, all staff and workforce will be encouraged to make their way to site and home from site by public transport, by project specific transport (e.g. minibuses), by bicycle or on foot. Limited parking spaces will be provided for vehicles required for the construction activity and for employees. The nominated contractor(s) may provide a transfer pick-up and drop off service from suitable public transport hubs.</p> <p>Noise and Vibration<br/>Mitigation will be implemented to reduce impacts on schools, church users and residents, that will include:</p> <ul style="list-style-type: none"><li>•The provision of a noise barrier (4m) on the east, south and northern boundaries;</li><li>•The Contractor undertaking the works will be required to take specific noise abatement measures to the extent required and comply with the recommendations of BS 5228–1 (BSI 2014a);</li><li>•The selection of plant items will be required to comply with European Communities (Noise Emissions by Equipment for Use Outdoors) (Amendment) Regulations 2006 (S.I. No 241/2006);</li><li>•The outline Construction Environmental Management Plan (CEMP) contained in EIAR Appendix A5.1 includes a Construction Noise and Vibration Management Plan (CNVMP) that will be developed further for the construction phase and will be used by all contractors based on the application of the mitigation measures outlined in EIAR Chapters 13 (Airborne Noise &amp; Vibration), and 14 (Groundborne Noise &amp; Vibration);</li><li>•The CNVMP will take account of detailed assessment of potential noise and vibration impacts associated with each construction compound. The assessment will identify through modelling and calculation, predicted construction noise levels, identification of potential exceedance of Construction Noise Thresholds (CNTs), identification of required noise mitigation measures specific to each work area to minimise noise and vibration impacts so far as is reasonably practicable; and</li><li>•As part of the CNVMP a baseline noise study will be undertaken prior to the commencement of construction works to characterise the prevailing noise environment at impacted Noise Sensitive Locations (NSLs), as indicated in Appendix A5.1 Outline CEMP.</li></ul> <p>These measures will effectively reduce noise levels from construction to below the CNT. As outlined in EIAR Chapter 10 (Human Health) Table 10.14, following mitigation, construction may cause annoyance to users, but no residual health effects are predicted.</p> |

Dublin |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|                                                                                                                                                           |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | <p>As outlined in EIAR Chapter 14, section 14.4.1, groundborne noise and vibration at this location will be below the threshold of significance for construction. Vibration will only be perceptible to school occupants for single events or short-term durations and therefore will be tolerable as assessed and documented by EIAR Chapter 10, Human Health, section 10.5.1.2.</p> <p>Chapter 10 (Human Health) recognises that locations such as schools are considered 'highly sensitive' due to the presence of young people. However, at Collins Avenue, whilst there may be limited noise impacts predicted near these receptors, there are no significant adverse effects to human health.</p> <p>Air Quality<br/>Construction dust tends to be quite large in size (greater than 30 microns in diameter) and falls to the ground relatively quickly. This gives the potential for the soiling of cars or windows in the vicinity. As explained by EIAR Chapter 10, Human Health, section 10.5.1.1, this would not be deemed to have a significant adverse health impact as the dust does not stay airborne and is not inhaled. As outlined in EIAR Appendix A16.4 Section 6.3, a Dust Minimisation Plan (DMP) will be submitted for approval to the relevant planning authority to minimise airborne dust. Further information on dust mitigation is outlined in EIAR Appendices; A5.1 Outline CEMP, A16.2 Site Specific Potential for Construction Phase Dust Impacts, and A16.4 Dust Management Plan.</p> <p>The modelling of road traffic for impacts on human and ecological receptors has found no significant impacts that require mitigation measures with respect to the modelling of emissions. However, some mitigation measures can be put in place to minimise emissions:<br/>* Implement a policy which prevents idling of vehicles both on and off-site including HGV holdingsites;<br/>* Construction Phase traffic should be monitored to ensure construction vehicles are using the designated haul routes;<br/>* Additional vehicular traffic will be managed through the CEMP and Temporary Traffic Management Plans for the proposed Project and stations as per Chapter 9 (Traffic &amp; Transport);<br/>* Efficient scheduling of deliveries to minimise number of deliveries required, and in turn their emissions; and<br/>* Construction vehicles should conform to the current EU emissions standards and where reasonably practicable, their emissions should meet upcoming standards prior to the legal requirement date for the new standard. This will ensure emissions on haul routes are minimised.</p> |
| 3                                                                                                                                                         | 5. Grounds   | 5        | 3) Continuing on the subject of small children, I note RINA referred to a Creche located at the Junction of St Pappins Rd and Ballymun Road. If this was influencing the fact that the building of a station in the northern end of Albert College Park was considered unsuitable, I feel a judicial review is called for. After all the creche is operating on the site of the old parochial house, a building which was purchased at public expense to facilitate the earlier Metro North plans which were later shelved. The original CPO was granted to take possession of the old presbytery in order to remove any impediments to the building of a station in this general area and any current temporary use should not be factored into the score ratings for impacts. Especially not to the disadvantage of those who have their family homes in the area. | Please refer to response (1) above related to the location chosen for Collins Avenue Station. The creche referenced in the query was not a factor in the identification of the preferred station location.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

| Letter Re: Railway Order Application - Metro North: Estuary through Swords, Dublin Airport, Ballymun, Glasnevin and City Centre to Charlemont, Co. Dublin |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| 4                                                                                                                                                         | 5. Grounds   | 5 and 6  | 4) The next issue is the Church users who will be adversely affected by building in this location. This parish is well established and caters for many weddings, funerals, holy communions and confirmations etc. for the local congregation throughout the year. Naturally the parishioners need access to the front of the building, nobody wants their deceased family members entering the church from a crowded car park instead of the nicely landscaped front gardens which have a special area to park hearses or wedding cars etc. The landscaped area was an integral part of the original design of the church grounds. Also, the current proposal would deny Brides the use of the church steps for their wedding photos. The church is a parish amenity supported by community funding and both its use and the enjoyment of its grounds should remain available to all the parishioners. | <p>Please refer to response item (1) above in relation to the selection of the proposed location of Collins Avenue Station. Please refer to response item (2) in relation to the predicted impacts associated with the construction works.</p> <p>As outlined in the EIAR Chapter 4, Description of the MetroLink Project, Section 4.17.4.2, the specific urban design principles for Collins Avenue Station are to:</p> <ul style="list-style-type: none"><li>* Integrate grilles and hatches required for the station with the planting proposals;</li><li>* Consideration of the relationship between the station and the entrance to Our Lady of Victories Infants School;</li><li>* Raised table junction and shared space, and</li><li>* Preserve the main axis of Our Lady of Victories Church.</li></ul> <p>The landscape design in the operational phase will have future planting and swales to manage surface water sustainably, verge planting to direct pedestrians and cyclists, and a new plaza to integrate the street with the proposed Project and its architectural features as well as linking the church with the adjacent new transport infrastructure. The existing baseline, potential impacts on landscape quality and views, and mitigation proposals are described in Chapter 27 (Landscape &amp; Visual).</p> <p>The design ensures the church will remain visible and identifiable from the road so that it can retain its local landmark status. Whilst the proposed built elements of the station will be evident, clear views to the church from the road and the residential properties beyond are maintained but softened by the proposed intervening planting. Views from the front of the church confirm the retention of the existing formality but within a more decorative contemporary garden. The improved quality of paving materials being employed accentuates that formal axis to the front of the church. TII consider that this high quality landscape design for the area in front of the church having full regard to the location and function of the church will ensure that the church will be able to function fully for all church users including those attending communions, weddings and funerals.</p> |
| 5                                                                                                                                                         | 5. Grounds   | 6        | 5) The Credit Union is another very important community facility, an integral part of community services and another stakeholder likely to be adversely affected by disruption and restricted access for its members if Metrolink is allowed to proceed at this site.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | <p>Please refer to response item (1) above in relation to the selection of the proposed location of Collins Avenue Station. Please refer to response item (2) in relation to the predicted impacts associated with the construction works. As indicated in Appendix A9.5 Scheme Traffic Management Plan, there will be no impact to the parking available for the Credit Union, with access maintained to the premises. Therefore, the operation and customer access to the Credit Union will not be disrupted.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| 6                                                                                                                                                         | 5. Grounds   | 6        | 6) The proposal to build the Collins Avenue Station on the lands in front of Our Lady of Victories Church is much too close to the private homes located on the eastern side of Ballymun Road, there are approx. 8 family homes which would be subjected to intolerable disruption, that's in addition to numerous homes in Albert College Estate which would also be affected. The fact that the proposed development abuts the garden wall of number 158 Ballymun Road, a family home, is totally unacceptable. There would be far less private homes affected to the same extent, or with that level of proximity to the building site if the Collins Avenue Station was relocated to Albert College Park which could use the same design just a bit further down the road and I feel this should be considered.                                                                                    | <p>Please refer to response item (1) above in relation to the selection of the proposed location of Collins Avenue Station. Response item (2) details the predicted impacts associated with the construction works and mitigation measures that will help reduce impacts on all sensitive properties in the area.</p> <p>The EIAR has assessed the impact on 158 Ballymun Road, and provides for appropriate mitigations, as outlined below, to reduce the impacts to below significant:</p> <p>Construction Phase – Airborne Noise and Vibration</p> <p>EIAR Chapter 13 Airborne Noise and Vibration, Table 13.59 summarises the potential significant construction noise impacts from the construction of the proposed Collins Avenue Station, which includes receptor 1 for 158 Ballymun Road. The predicted impact without additional noise mitigation is Moderate to Significant during some of the work phases. Noise mitigation measures are detailed in section 13.6.1 and include for a proposed 4m high acoustic noise screen along the north, east and southern boundaries of the Collins Avenue construction compound. Surface activities to support sprayed concrete tunnel construction will be enclosed within an acoustically clad steel framed building to control airborne noise breakout to surrounding receptors. With these mitigations the construction impacts are reduced to below significant.</p> <p>Construction Phase – Groundborne Noise and Vibration</p> <p>EIAR Chapter 14 Groundborne Noise and Vibration, Appendix 14.5 presents the predicted groundborne noise and vibration levels during the construction phase of the project for 158 Ballymun Road:</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

| Submission No.                                                                                                                                            |              |          | 097                                                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

Dublin |              |          |                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
|                                                                                                                                                           |              |          |                                                             | <ul style="list-style-type: none"><li>• The predicted level of groundborne noise during TBM passage is 49 dB LASmax, which is above the 45 dB LASmax threshold resulting in a significant impact on the occupants of the building for the relatively short duration of TBM passage.</li><li>• The predicted level of groundborne vibration during TBM passage is 0.266 ms-1.75 day and 0.224 ms-1.75 night, below the VDV (Vibration Dose Value is a parameter that combines the magnitude of vibration and the time for which it occurs) Threshold Level of 1.0 ms-1.75 day and 0.5 ms-1.75 night, resulting in a not significant impact on the building.</li><li>• The predicted level of groundborne noise during mechanical excavation at Collins Avenue Station is 32 dB LASmax, which is below the 40 dB LASmax threshold resulting in a not significant impact on the occupants of the building.</li><li>• The predicted level of groundborne vibration during mechanical excavation at Collins Avenue Station is 0.001 ms-1.75 day and 0.001 ms-1.75 night, well below the VDV Threshold Level of 0.8 ms-1.75 day and 0.4 ms-1.75 night, resulting in a not significant impact on the building.</li><li>• The predicted level of vibration during blasting at Collins Avenue Station is 2.6mm/s PPV (Peak Particle Velocity), which is below the 8mm/s PPV threshold resulting in a not significant impact on the building.</li><li>• The predicted level of air overpressure during blasting at Collins Avenue Station is 104.6dB, below the Threshold Level of 125dB, resulting in a not significant impact on the building.</li></ul> <p>Unfortunately, there are no effective methods available to reduce groundborne noise or vibration from the TBM at source but noting that the duration of this impact will be temporary and of the order of up to two-weeks as the TBM passes. TII will undertake advanced consultation and stakeholder engagement to prepare people for the passing of the TBM and ensure the timing of these impacts are known.</p> <p>TII's contractor(s) will prepare a Construction Noise and Vibration Management Plan (CNVMP) for the proposed Project as referred to in EIAR Appendix A5.1, Outline Construction Environmental Management Plan (CEMP). The CNVMP will be a live document and will include a full monitoring and auditing programme which will be agreed with the Local Authorities prior to the commencement of the Construction Phase, including predetermined monitoring trigger levels to ensure noise and vibration limits are not breached, noting that it is not possible to mitigate TBM groundborne noise and vibration at source. Table 6.2: Noise and Vibration Measures of the Outline CEMP outlines the monitoring programme requirements.</p> <p>The Transport Infrastructure Ireland (TII) Airborne Noise and Ground-borne Noise Mitigation Policy (Appendix A14.6 of EIAR Chapter 14) also sets out the construction noise insulation and temporary rehousing measures to be implemented where required.</p> <p>Traffic Management<br/>As presented in Appendix A9.5 Scheme Traffic Management Plan, continued access to the property at 158 Ballymun Road will be maintained throughout the works. Therefore, a significant impact is not anticipated.</p> |

Dublin |              |          |                                                                                                                                                                                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| 7                                                                                                                                                         | 5. Grounds   | 6        | 7) Albert College Court provides accommodation for senior citizens/ incapacitated/vulnerable people. Occupancy of these units would be untenable during the construction phase. Given that we are in a housing crisis it makes no sense to build on the land at the front of OLV Church thereby removing much needed specialised housing units from use for the duration of the build. | <p>Please refer to response (1) above related to the location chosen for Collins Avenue Station. Please refer to response item (2) in relation to the predicted impacts associated with the construction works.</p> <p>As detailed in Chapter 11 (Population and Land Use), during the construction of the Collins Avenue station there will be localised disturbance and inconvenience, particularly impacting residents at Albert College Court assisted living/senior citizens accommodation.</p> <p>The EIAR has assessed the impact on Albert College Court, and provides for appropriate mitigations, as outlined below, to reduce the impacts to below significant:</p> <p>Construction Phase – Airborne Noise and Vibration<br/>EIAR Chapter 13 Airborne Noise and Vibration, Table 13.59 summarises the potential significant construction noise impacts from the construction of the proposed Collins Avenue Station, which includes receptor 39 for Albert College Court. The predicted impact without additional noise mitigation is Significant to Very Significant during some of the work phases. Noise mitigation measures are detailed in section 13.6.1 and include for a proposed 4m high acoustic noise screen along the north, east and southern boundaries of the Collins Avenue construction compound. Surface activities to support sprayed concrete tunnel construction will be enclosed within an acoustically clad steel framed building to control airborne noise breakout to surrounding receptors. With these mitigations the construction impacts are reduced to below significant.</p> <p>Construction Phase – Groundborne Noise and Vibration<br/>EIAR Chapter 14 Groundborne Noise and Vibration, Appendix 14.5 presents the predicted groundborne noise and vibration levels during the construction phase of the project for Albert College Court:</p> <ul style="list-style-type: none"><li>• The predicted level of groundborne noise during TBM passage is 48 dB LASmax, which is above the 45 dB LASmax threshold resulting in a significant impact on the occupants of the building for the relatively short duration of TBM passage.</li><li>• The predicted level of groundborne vibration during TBM passage is 0.242 ms-1.75 day and 0.203 ms-1.75 night, below the VDV (Vibration Dose Value is a parameter that combines the magnitude of vibration and the time for which it occurs) Threshold Level of 1.0 ms-1.75 day and 0.5 ms-1.75 night, resulting in a not significant impact on the building.</li><li>• The predicted level of groundborne noise during mechanical excavation at Collins Avenue Station is 36 dB LASmax, which is below the 40 dB LASmax threshold resulting in a not significant impact on the occupants of the building.</li><li>• The predicted level of groundborne vibration during mechanical excavation at Collins Avenue Station is 0.002 ms-1.75 day and 0.002 ms-1.75 night, well below the VDV Threshold Level of 0.8 ms-1.75 day and 0.4 ms-1.75 night, resulting in a not significant impact on the building.</li><li>• The predicted level of vibration during blasting at Collins Avenue Station is 4.3mm/s PPV (Peak Particle Velocity), which is below the 8mm/s PPV threshold resulting in a not significant impact on the building.</li></ul> |

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| Letter Re: Railway Order Application - Metro North: Estuary through Swords, Dublin Airport, Ballymun, Glasnevin and City Centre to Charlemont, Co. Dublin |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
|                                                                                                                                                           |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | <ul style="list-style-type: none"><li>• The predicted level of air overpressure during blasting at Collins Avenue Station is 107.8dB, below the Threshold Level of 125dB, resulting in a not significant impact on the building.</li></ul> <p>Unfortunately, there are no effective methods available to reduce groundborne noise or vibration from the TBM at source but noting that the duration of this impact will be temporary and of the order of up to two-weeks as the TBM passes. TII will undertake advanced consultation and stakeholder engagement to prepare people for the passing of the TBM and ensure the timing of these impacts are known.</p> <p>TII's contractor(s) will prepare a Construction Noise and Vibration Management Plan (CNVMP) for the proposed Project as referred to in EIAR Appendix A5.1, Outline Construction Environmental Management Plan (CEMP). The CNVMP will be a live document and will include a full monitoring and auditing programme which will be agreed with the Local Authorities prior to the commencement of the Construction Phase, including predetermined monitoring trigger levels to ensure noise and vibration limits are not breached, noting that it is not possible to mitigate TBM groundborne noise and vibration at source. Table 6.2: Noise and Vibration Measures of the Outline CEMP outlines the monitoring programme requirements.</p> <p>The Transport Infrastructure Ireland (TII) Airborne Noise and Ground-borne Noise Mitigation Policy (Appendix A14.6 of EIAR Chapter 14) also sets out the construction noise insulation and temporary rehousing measures to be implemented where required.</p> <p>Measures to mitigate and monitor these impacts as a result of construction activity across the proposed Project are detailed in Chapter 5 (MetroLink Construction Phase) and Appendix A5.1 Outline Construction Environmental Management Plan (CEMP). Additionally, the appointed contractor will update the Construction Environmental Management Plan (CEMP) to ensure all environmental impacts are managed and mitigated in accordance with the EIAR and Railway Order, assuming an Enforceable Railway Order is granted. This updated CEMP will be provided to DCC for consultation and approval in advance of any construction works on site. Monitoring instrumentation will also be used throughout the works to monitor potential environmental impacts, including those discussed in response item (2) above to ensure that acceptable limits are not breached.</p> <p>The EIAR presents an analysis of the potential impacts on Albert College Court in a number of chapters, recognising the sensitivity of the occupants. Section 10.5.1.2 of Chapter 10 identifies that once the mitigation measures are implemented there are limited noise impacts predicted as outlined in Chapter 13 (Airborne Noise &amp; Vibration) near these receptors but no significant adverse effects to human health. This chapter also identifies that when the dust minimisation measures detailed in the mitigation section of Chapter 16 (Air Quality) are implemented, fugitive emissions of dust from the site are not predicted to be significant and pose no nuisance to human health. Therefore, there will be no residual dust impacts during the Construction Phase.</p> <p>As such, residents at this location will not require rehousing.</p> |
| 8                                                                                                                                                         | 5. Grounds   | 6 and 7  | 9) There hasn't been any interaction with residents on Clonmel Road regarding the traffic impacts this project may have on them. Clonmel Road will need a traffic management plan. Currently many parents from the greater Wadelai area use the pedestrian lane way on the Eastern side of Clonmel Road as a link corridor to bring their children to OLV school. They avoid Glasnevin Avenue or Ballymun Road as these areas are very congested during the morning rush hour. These drop off trips bring additional traffic to the road and can cause congestion in the cul de sac on Clonmel Road. Blockages occur as you get cars coming down the road to drop off children, while those who have already completed their drop off are trying to do a u turn and leave the area. Those who have very young children add to the issue by having to find parking and walk the very junior pupils into the school before returning to their car. While the temporary extra traffic is inconvenient for some residents trying to go about their daily journeys it isn't a major problem at present. However, when Ballymun Road access is restricted and traffic lanes there are reduced, a lot more parents will have no choice but to divert to Clonmel Road, use of the pedestrian lane will increase significantly. Clonmel Road will be unable to deal with this additional influx of cars. The roads in Wadelai Estate were built in the 1940s when the levels of private car ownership was much lower and as a result the roads are quite narrow. Metrolink don't appear to have grasped this side effect of their proposal. | TII would like to point out that a detailed traffic and transport assesment to identify potential effects on traffic, pedestrian movements and public transport during the construction phase are presented for Collins Avenue station in Appendix A9.5 Scheme Traffic Management Plan of the EIAR where impacts on local traffic movements during the construction phase are predicted. However, Chapter 5 of the EIAR, MetroLink Construction Phase, explains that traffic management plans for the construction phase of the Project have been developed to minimise the impact on road users, and to maintain access to businesses and other premises. Prior to implementation, all traffic management measures will be agreed with the relevant local authority (DCC) and where relevant, consultation with An Garda Síochána and other statutory stakeholders will be undertaken. The design of traffic management measures and highways works is based on achieving the key objective of maintaining continual access to all properties during the works. Where necessary, a safe alternative route will be provided for pedestrians and vulnerable road users, such as children, and persons with restricted mobility, to maintain pedestrian access. These details are presented in both Appendix A9.5 Scheme Traffic Management Plan, and in Appendix A5.1 Outline CEMP.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

|                                                                                                                                                           |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

| Letter Re: Railway Order Application - Metro North: Estuary through Swords, Dublin Airport, Ballymun, Glasnevin and City Centre to Charlemont, Co. Dublin |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
|                                                                                                                                                           |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | No temporary traffic management measures are proposed for Clonmel Road, as it is outside of the Project boundary. The pedestrian access route from Clonmel Road to Our Lady of Victories Schools will not be impacted by the construction of the Collins Avenue Station.<br><br>Please refer to response item (2) in relation to the maintenance of the pedestrian crossing on the R108 Ballymun Road to facilitate safe access to and from the schools and drop-off on the R108.                                                                                                                                                                                                                       |
| 9                                                                                                                                                         | 5. Grounds   | 7 and 8  | 10) Most of the users of this station will be Students who attend DCU and who travel from all over the city. A far better location for the station would be further south along Ballymun Road in Albert College Park. This location is closer to the college entrance and would be more convenient for the students.<br>For all of the above reasons it is my view that the location of the proposed Collins Avenue Station is better suited to a linear site in Albert College Park adjacent to the Ballymun Road side where there is a lower density of family homes in the immediate vicinity. Statistically this alternative site has no private homes adjoining the Metrolink site and less private homes in close proximity, plus less school attendees who would be impacted compared to the proposed OLV site. Furthermore, the numbers affected if the OLV site proceeds is way in excess of the number of park users who would be inconvenienced. Park users have the option using another gate into the park and availing of the remaining recreational areas or taking a walk in other public park and using other recreational facilities. Unfortunately, for the local residents adjacent to OLV Church it is their home, some are paying big mortgages and do not have an option to move, likewise, parishioners, school children and their parents do not have any other options. Most park users only spend a short time visiting the park, whether going for a leisurely stroll, sports training or playing football matches, a couple of hours at most, whereas the residents on upper Ballymun Road (referred to previously) would be permanently subjected to the inconveniences associated with living beside a building site 24/7. Surely the considerable effects on them and their lives should supersede occasional visitors to the park. | TII acknowledge the concerns of residents in the area surrounding Our Lady of Victories but as described in response (1) above, there is a strong rationale for the location chosen for Collins Avenue Station. As also identified in the responses above TII consider that the majority of significant effects on the surrounding area during the construction phase can be managed through the implementation of mitigation measures. Furthermore, it is important to note that completion of the project the area will be left with a high quality transport link into the city centre and to Dublin airport and further north, allowing for reduction in traffic on Collins Avenue and on the R108. |

| RE: Railway Order application for Metrolink project (ref 314724) |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| 1                                                                |              | 3        | In reality, however, it is a classic example of the absence of joined-up thinking on transport in Dublin — a stand-alone project that doesn't make sense in its own terms and would need to be extended southwards in order to do so. An Bord Pleanála is, therefore, in the invidious position of being asked to make a decision on part of a much larger project without having any idea of where the rest of it would go.                                                                                                                                                                                                                                                                                                                             | As outlined in EIAR Chapter 03 (Background to the MetroLink Project), three major public transport projects proposed under the Transport Strategy for the GDA 2016-2035 (NTA, 2016), namely MetroLink, BusConnects and DART+ have been developed as independent standalone projects. These continue to be supported by the Transport Strategy for the GDA 2022-2042. However, these projects (together with the existing transport network and other public transport projects) are designed to provide a fully integrated transport network. The proposed Project is designed to offer interchange with other modes of public transport at numerous stations, such as Luas, DART, and bus, with the Luas Green Line interchange at Charlemont Station offering connection southwards. Additionally. the design of the project does not preclude future extensions or phases. If developed, these extensions and phases will be considered through their own planning process.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| 2                                                                |              | 5        | <p>In November 2021, according to an Irish Times report, the NTA had decided to develop Luas lines serving UCD Belfield and Knocklyon/Rathfarnham to take pressure off the existing Green Line and remove the need for it to be upgraded to a metro south of Charlemont — but only after 2042. What all of this indicates is that the NTA is making it up as it goes along.</p> <p>In this case, it appears to be a stratagem to overcome the most glaring downside of the metro project, as first envisaged — the fact that it would have cannibalised most of the original Green Line, which had been installed just a few years earlier. So why, then, is the current plan to terminate the proposed 19km metro line at Charlemont being pursued?</p> | <p>As explained by EIAR Chapter 7, Consideration of Alternatives, section 7.5 Assessment of Alternative Route Options, the assessment of alternatives to identify a preferred route for the proposed Project has been undertaken based on the assessment of a number of route options and station locations. The proposed project has emerged out of three rounds of non-statutory public consultation and has been an objective of two GDA Transport Strategies that were the subject of Strategic Environmental Assessment and public consultation.</p> <p>Charlemont is specifically identified as locations for stations in the GDA Transport Strategy 2022-2042. ABP is required to have regard to those requirements as policies and objectives for the time being of a public authority whose functions have a bearing of the proper planning and sustainable development of Dublin (Transport (Railway Infrastructure) Act 2001 and 143 of the Planning and Development Act 2000). The transport strategy is also a consideration material to the proper planning and sustainable development of the area (Section 31 J of the Planning and Development Act 2000).</p> <p>The GDA Transport Strategy is a consideration material to the proper planning and sustainable development of the area (Section 31 J of the Planning and Development Act 2000).</p> <p>ABP has to give considerable weight to the GDA Transport Strategy, given its elevated role in the statutory scheme relating to proper planning and sustainable development, including that:</p> <ul style="list-style-type: none"><li>* the NTA is required to provide a report to planning authorities making regional spatial and economic strategies, development plans and local area plans ("relevant plans") with recommendations on the optimal use, location, pattern and density of new development taking account of the Transport Strategy and stating whether there is inconsistency between the relevant plan and the Transport Strategy;</li><li>* relevant plans are required to be consistent with the Transport Strategy;</li><li>* the Office of the Planning Regulator is required to evaluate relevant plans to ensure that they address consistency with the Transport Strategy;</li><li>* the Minister for Housing can direct variations to draft relevant plans to ensure that they are consistent with the Transport Strategy;</li><li>* landowners are not entitled to compensation where permission is refused due to inconsistency with the Transport Strategy.</li></ul> <p>The proposed MetroLink alignment has not been extended south of Charlemont for the reasons set out by the GDA strategy , section 12.3.10, "The challenges associated with the upgrading of the Luas Green Line to a metro standard of service have led to the emergence of an alternative option which seeks to meet travel demand from south of Sandyford along a new light rail corridor which serves UCD post-2042. As such, the upgrading of the Green Line to metro standard is not being pursued as part of this strategy. Instead, for this strategy period, the capacity and frequency on the current Green Line from Sandyford northwards to the city centre will be incrementally increased through the provision of additional tram fleet and services and associated turnback arrangements to meet forecast passenger demand."</p> |

| RE: Railway Order application for Metrolink project (ref 314724) |              |          |                                                                                                                                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|                                                                  |              |          | Response (2) continued.                                                                                                                                                                                                                                                                                                                                          | <p>Further information on the challenges associated with connecting to the existing Luas Green Line can be found in the TII published report: "Constructability Report - Green Line Closure, April 2019, ref <a href="https://www.metrolink.ie/media/ox0p3cjb/constructabilityreportgreenlineclosure.pdf">https://www.metrolink.ie/media/ox0p3cjb/constructabilityreportgreenlineclosure.pdf</a>". This showed that construction works to connect the metro from Charlemont to the Green Line would incur line closures over a period of up to 3-4 years, depending on construction methodology.</p> <p>For this reason it has been necessary to determine the most appropriate interchange and termination location for MetroLink. As noted by the GDA Transport Strategy 2022-2042, section 12.3.2, "Charlemont offers the optimal location for the primary interchange with the Green Line in response to growing demand in the longer term and is an appropriate location to facilitate any potential future metro extensions to serve the south west, south or south east of the city region should sufficient demand arise.' This is also reflected by EIAR Chapter 7, section 7.7.8 MetroLink Southern Terminus Location that explains the rationale for selecting Charlemont as the optimum location for interchange with the Green Line.</p> <p>As noted by the GDA Strategy the selection of Charlemont does not preclude any future connections to the west or south of the city should a railway order application be made for the same some point in the future.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| 3                                                                |              | 5        | This issue was raised by An Bord Pleanála representatives during "pre-application consultations" with TII/NTA when they queried "the appropriateness of the selection of Charlemont as the end-point in the light of the decision to omit the Luas Green Line upgrade". That question has never been satisfactorily answered and needs to be rigorously pursued. | <p>Rationale for the Proposed Charlemont Station</p> <p>The proposal for an interchange location at Charlemont / Ranelagh is supported by the previous Transport Strategy for Greater Dublin Area (2016-2035) and the current Transport Strategy for Greater Dublin Area (2022-2042). The latter considers a range of options for the onward extension of MetroLink to meet the demand for travel over the period of the strategy. This includes consideration of the need for the upgrade of the Luas Green Line to metro with a metro extension to Dublin south west, south or south east. Whilst the strategy envisages that further extensions will be delivered after 2042, MetroLink which terminates at Charlemont allows for the possible extension of the metro in all the above directions.</p> <p>The proximity of the Metrolink station to the Luas stop at Charlemont provides for a positive customer experience for all users with short interchange distance and due to the proximity, clear wayfinding and high visibility of the interchange. The interchange arrangements at Charlemont provide for significantly better interchange arrangements compared to an alternative interchange at St Stephen's Green Station. Passengers wishing to interchange between Luas and metro at an alternative St Stephen's Green terminus would face a 500m-walk along a route either through St Stephen's Green park or along the footpath north of the park, which adds significantly to the time for interchange and therefore the overall journey time for passengers and a less positive customer experience for all interchange users. This passenger experience would be reduced further for those with mobility or visual impairments as well as those travelling to/from the airport with luggage.</p> <p>The section of MetroLink route between St Stephen's Green and Charlemont Stations contributes significantly to the overall benefits of the scheme. It serves a significant area of the south city of Dublin and offers enhanced access from the local area to the city centre and a direct connection to Dublin Airport. It serves key trip attractors including residential areas and offices / workplace locations, with high passenger boarding and alighting figures in the peak hours. During the morning peak, at Charlemont station the flows include 1,800 passengers alighting, 2,300 boarding and 1,229 passengers alighting, 2,276 boarding during the evening peak. The passenger numbers contribute significantly to the overall benefits of the scheme and the effect of these benefits outweigh the additional costs that are associated with the delivery and operation of the section from St Stephen's Green to Charlemont station. Further details are provided in Chapter 7: Consideration of the Alternatives, section 7.7.8 MetroLink Southern Terminus Location, including Table 7-16 Summary to Identify Southern Termination Point for MetroLink.</p> <p>The location of the interchange at Charlemont does not preclude onward extension south. An interchange at Charlemont is supported by policy including the Dublin City Development Plan 2022 - 2028 and the Transport Strategy for the Greater Dublin Area. As noted by the GDA Transport Strategy 2022-2042, section 12.3.2, "Charlemont offers the optimal location for the primary interchange with the Green Line in response to growing demand in the longer term and is an appropriate location to facilitate any potential future metro extensions to serve the south west, south or south east of the city region should sufficient demand arise."</p> <p>By extending MetroLink to Charlemont it provides for future proofing of the Green Line, bypassing the capacity constrained Luas on-street running section, and ensures potential future connectivity options are enabled, either to the Green Line or for extensions of the metro.</p> <p>The Charlemont Station interchange provides for increased passenger utilisation of the MetroLink system, thereby increasing the benefits delivered by the Project, reflected by an improved Project Benefit Cost Ration (BCR).</p> |

| RE: Railway Order application for Metrolink project (ref 314724) |              |          |                                                                                                                                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |  |
| 4                                                                |              | 6        | The Board's representatives queried the rationale for Glasnevin being chosen for one of the principal Northside stations, as opposed to Drumcondra, which was the location under the earlier scheme — given that Glasnevin is relatively close to the Luas Green Line terminating in Broombridge and also relatively remote from Croke Park (unlike Drumcondra).      | <p>EIAR Chapter 7, Consideration of Alternatives details the robust decision-making that has led to the preferred route chosen, including alternative alignments and station locations. The identification of a preferred route took account of the interchange capability of a location with other modes of transport, including the existing rail commuter services, and the future proposed DART+ network. Other criteria were also identified, such as potential trip demand, key trip attractors in the area, and directness of route (and subsequent impact on cost). Section 7.6.5 of Chapter 07 presents in detail the rationale for the selection of Glasnevin over Drumcondra. The choice of a station location at either Drumcondra or Glasnevin has been considered in the context of the achievement of the Transport Strategy for the GDA, having particular regard to maximising the interchange opportunities between different services and to provide fast and convenient access to major transport destinations such as Dublin City Centre and Dublin Airport.</p> <p>That analysis was subject to the non-statutory public consultation as part of the Emerging Preferred Route Report in 2018 and the conclusions of that report and consultation ultimately led to the adoption of the Glasnevin Station as an objective of the GDA Transport Strategies 2016-2035 and 2022-2042.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |  |
| 5                                                                |              | 6        | Also raised was “the selection of the east side of St Stephen's Green, given the distance from Grafton Street and possible future interchange with Dart Underground”. The Board should also have queried the costly diversion of Metrolink's alignment to link up with DART at Tara Street when such an interchange would ultimately be provided by Dart Underground. | <p>Chapter 07 (Consideration of Alternatives) outlines how the Emerging Preferred Route (EPR) process identified St. Stephen's Green East as the preferred location for a station at St. Stephen's Green. The EPR was assessed through a Multi-Criteria Analysis (MCA) which included consideration of capital cost, landscape and visual impacts, impact to property, archaeology/architectural and cultural heritage, settlement, passenger experience and accessibility. The construction of a station at St. Stephens Green West would be very constrained due to the presence of St Stephens Green park, Luas services and the critical commercial importance of this area. Furthermore, as this location would be more than 1km from both Tara St and Charlemont there would be a requirement for two intervention shafts between Tara St and Charlemont in order to meet fire strategy requirements i.e. an intervention point not more than 1km apart to allow for evacuation and entrance for emergency services in the event of an emergency.</p> <p>A station at Tara Street allows the project to achieve one of the projects key objectives of interchange. It provides a good interchange opportunity with DART services and serves important key trip attractors in the study area with high potential passenger trips. This option also takes a direct and short route through areas of high demand in the centre of the study area. Additionally, the latest Transport Strategy for the GDA 2022-2042 indicates that DART Underground will not be delivered before 2050, and therefore its benefits will not be present for Metrolink's proposed 2035 opening year, or for many years into the future. Therefore, the Tara Street location is critical to achieve an effective interchange between DART and MetroLink enhancing the overall transport network .</p> |  |
| 6                                                                |              | 6        | The abrupt termination of MetroLink at Charlemont, without any firm plan for a future extension, would involve excavating both the station as well as a substantial turn-back loop deep enough underground to avoid the Grand Canal and the main sewerage line serving Tallaght that runs alongside it. This would add immensely to the overall cost of the project.  | <p>Please refer to response item (2) above in relation to the choice of Charlemont Station as an appropriate interchange with LUAS. As presented in Chapter 07 (Consideration of Alternatives), the selection of Charlemont Station does not preclude any future connections to the south. In terms of cost, the provision of turnback facilities will be required no matter where the project endpoint will be, so there is no additional cost associated with this element of the project.</p> <p>The proposed tunnel turnback for Charlemont Station is to the south of the station with the tunnel entering the station from the direction of St Stephens Green from the North under both the Grand Canal and the Main Sewer from Tallaght.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |  |

| RE: Railway Order application for Metrolink project (ref 314724) |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |  |
| 7                                                                |              | 6        | To put it mildly, more “joined-up thinking” is urgently required. This needs to embrace the integration of a// public transport modes serving Dublin — Luas lines, bus routes, commuter rail services and mainline rail. In regard to the latter, an All Island Strategic Rail Review is now under way to consider how the rail network can promote “sustainable connectivity”.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | <p>The transport strategy for the Greater Dublin Area is outside the scope of the Board's functions in considering this application for a Railway Order. The NTA, whose statutory function is to lead transport planning, has identified the current MetroLink and in particular the stations at Dublin Airport, Swords, Glasnevin, Tara Street and Charlemont as a critical component of the integrated transport solution for the GDA.</p> <p>Please refer to response item (1) above in relation to integration offered by MetroLink. EIAR Chapter 06 (MetroLink Operations and Maintenance) details how the proposed Project has been designed to ensure maximum interchange with other modes of transport, specifically more sustainable modes of transport such as walking, cycling and public transport. Table 6.6. of this chapter details the interchange opportunities present at each station.</p> <p>As detailed in EIAR Chapter 03 (Background to the MetroLink Project), sustainability was a critical driver in the development of the Project. The Project is a sustainable mobility solution which supports the National Planning Framework's vision. The Project will be fully electrified and will be able to serve over 100 million passengers over time, diverting approximately 6.8 million car trips per annum in the early years through its delivery of interchange opportunities at each station. It should be noted that the All Island Strategic Rail Review "is not focused on commuter rail services within the major cities, but it will consider the interactions between proposed improvements to inter-urban rail and existing, or proposed, commuter rail services".</p>                                                                                                                                                                                                                                                                                                                               |  |
| 8                                                                |              | 6        | <p>If there is to be a new high-speed link between Belfast, Dublin and Cork, it should obviously be routed through Dublin Airport — not only to cater for Northern Ireland residents using the airport but also to free up the existing coastal railway line south of Drogheda for commuter services, which are currently impeded by having to share the same tracks.</p> <p>But if the mooted high-speed rail line was to run through Swords and Dublin Airport, running underground into the city centre and then onwards to Cork, where would that leave MetroLink? Clearly, it would make little sense to have two tunnelled rail lines serving the airport — both of these in addition to the Port Tunnel, which feeds into the M1 that also serves the airport.</p> <p>As far as I can see, this issue is not mentioned at all in the voluminous EIAR submitted in support of the MetroLink scheme; clearly, a high-speed mainline rail line running through Dublin Airport is someone else's department — CIE or Iarnrod Eireann — whereas MetroLink is Tii's (and NTA's) baby. Such compartmentalisation is the enemy of “joined-up thinking” on transport.</p> | <p>Chapter 03 (Background to the MetroLink Project) recognises that an intervention is necessary on this corridor to achieve a change in transport patterns that reduces the reliance on private cars and increases significantly the modal shift to public transport. The corridor facilitates the efficient functioning of two major international gateways (Dublin Port and Dublin Airport) and completes the economic link between Dublin and Belfast (which is part of the Belfast/Dublin Economic Corridor that is flagged for protection in the NPF).</p> <p>As detailed in Chapter 07 (Consideration of Alternatives), during the development of the Old Metro North project, an option was considered that provided a link to the airport from the Iarnród Éireann network. This option was not approved as it failed to achieve the Government's objectives for the (Old) Metro North project. It was also considered as part of the North Dublin Fingal Transport Study, which considered a long list of 10 heavy rail options and a short list of 3 heavy rail options, none of which performed as well as the proposed project having regard to economic, environmental, safety, accessibility and social inclusion factors.</p> <p>The Board's functions on this railway order application do not extend to matters of strategic transport planning. TII will not comment on the potential outcomes of the All Island Strategic Rail Review other than to say that as noted above the All Ireland Strategic Rail Review is a review of the inter-urban rail network while the proposed MetroLink project is a high capacity urban metro system required to serve predicted future population needs from Swords via Dublin Airport to Dublin City Centre and onwards to Charlemont . As noted in response item (1), MetroLink has been designed as part of an integrated transport network, with consideration given to avoiding the duplication of infrastructure/services by maximising interchange with all networks.</p> |  |
| 9                                                                |              | 6        | The EIAR's Architectural Heritage chapter lists seven buildings on the west side of O'Connell Street Upper dating from the reconstruction of the street in neo-classical style after the 1916 Rising and Civil War that are either protected structures or listed in the NIAH, all of which are located within the site of the proposed MetroLink station. Only facades would be retained.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | Please see response item (10) below in relation to the impacts on architectural heritage at this location.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |  |

| RE: Railway Order application for Metrolink project (ref 314724) |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |  |
| 10                                                               |              | 7        | <p>Table 26.55: Potential Direct Impacts During Construction at O’Connell Street Station rates the impacts of demolishing all but the facades of these buildings as “Significant” or “Very Significant” — whether this is done “on a standalone basis” or (as Til intends) in conjunction with Hammerson pic’s redevelopment of “Site 2” of its Dublin Central mega- scheme.</p> <p>The last surviving Georgian house from Luke Gardiner’s development of Sackville Street — 42 O’Connell Street Upper — is endangered by the demolition of No.43 and the excavation of its site to a depth of 28 metres. This would have “significant implications” for its stability, “requiring underpinning of the party walls/foundations” to keep the long-vacant house standing.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                           | <p>The assessment, protection and monitoring of any building impacted by the Project will be a key requirement in the delivery of the construction works at each station and MetroLink Site. To this end a Project Conservation Architect (PCA) has been engaged to oversee the implementation of the Project and will be thoroughly engaged throughout the construction works to ensure that No. 42 O’Connell St is not damaged during the works adjacent to the building.</p> <p>The potential impacts to 42 O’Connell Street have been addressed in a number of chapters in the EIAR including Chapter 14 (Ground borne Noise and Vibration) and Chapter 26 Architectural Heritage. Please note that in Chapter 26, Table 26.55 of the EIAR relates to the potential effects on sites including No. 42 O’Connell St in the absence of any mitigation, while Table 26.66 in the same chapter outlines mitigation measures which are:</p> <p>“The demolition of number 43 O’Connell Street Upper and the structures to the rear and the propping of number 42 O’Connell Street Upper are to be carried out in accordance with a method statement compiled by the PCA or by the appointed contractor’s conservation architect and approved by the PCA and vibration and settlement monitoring equipment is to be installed in number 42 and monitored to ensure that at no time do vibrations or settlement exceed given limits.”</p> <p>The equipment is to be monitored and in the event of threshold limits being exceeded all work in the vicinity is to stop until the cause of the issue is identified and resolved. Furthermore, any damage to architectural heritage receptor is to be repaired in accordance with a method statement to be prepared by the PCA or by the appointed contractor’s conservation architect and approved by the PCA. The potential effects are expected to decrease from Imperceptible to slight following mitigation.</p> |  |
| 11                                                               |              | 7        | <p>The most tragic loss would be the former Carlton cinema, dating from 1938, which was one of the anchors of O’Connell Street for decades until its closure in 1994. With seating for 2,000 in its original format before it was subdivided into three cinemas in 1976, the entire volume of the Art Deco cinema still survives, including a significant amount of its original fabric.</p> <p>More than 20 years ago, the Carlton was proposed as a location for the National Conference Centre; indeed, its name was appropriated to refer to the development site even then being assembled by forerunners of Hammerson pic as the “Carlton site”. It would be ideal for conversion into a concert hall or music venue to enliven this stretch of O’Connell Street.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                           | <p>Unfortunately as identified in Chapter 26 of the EIAR, whilst, the impressive facade of the Carlton Cinema will be retained, other elements will be demolished. However the impacts at this site and the adjacent site have to be considered in the context of this building not being used since 1994 and the adjacent site being vacant since 1976. The retention of this facade will ensure that it does not continue to deteriorate due to dereliction. In addition, prior to the demolition of number 52-54 O’Connell Street Upper the building is to be recorded to English Heritage level 3. The recording of associated coal cellars to facilitate propping of the facades, the demolition and the propping of the facade are to be carried out in accordance with a method statement compiled by the PCA or by the appointed contractor’s conservation architect and approved by the PCA. Vibration and settlement monitoring equipment is to be installed in the retained façade and monitored to ensure that at no time do vibrations or settlement exceed given limits. The equipment is to be monitored and in the event of threshold limits being exceeded all work in the vicinity is to stop until the cause of the issue is identified and resolved.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |  |
| 12                                                               |              | 7        | <p>Instead, as the EIAR notes, “the Carlton ... is to be demolished, except for the facade, as part of the works to construct O’Connell Station. The section to be demolished [the entire interior] is not part of the protected structure, though it is included in the NIAH. To facilitate the supports for the façade during construction, the cellars beneath the footway will be infilled with concrete ...</p> <p>Again, the predicted impact is rated as “very significant”. As someone who remembers the cinema in its heyday as well as the Carlton Grill on the first floor, overlooking O’Connell Street, I sought to persuade Hammerson to retain and refurbish its Art Deco glory. They were also open to considering options for its future use, including the idea of turning it into a music venue.</p> <p>But that was before the alignment of MetroLink was altered so that, instead of excavating a station box in the middle of O’Connell Street as originally envisaged, it was now to be done behind propped-up façades along its west side. It is clear that the combined impact of MetroLink and Hammerson’s Dublin Central scheme will fundamentally change the character of the street.</p> | <p>Please refer to response item (11) in relation to the demolition associated with the construction of O’Connell Street Station.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |  |

| RE: Railway Order application for Metrolink project (ref 314724) |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |  |
| 13                                                               |              | 7        | <p><i>Table 26.58: Potential Direct Impacts During Construction at St Stephen's Green Station</i> acknowledges that “part of the park will become a construction site during the works to provide St Stephen's Green Station, with the removal of paths, railings alongside paths, vegetation, the addition of hoardings, the installation of plant and other equipment, the removal of trees ...”</p> <p>Railings, plinth walls and gates around part of the park's eastern perimeter would also be removed along with some of the lamp posts and bollards as well as the Wolfe Tone monument, its array of granite columns and the adjoining Famine sculpture for the duration of the station's construction. All of this will have a “profound” impact on the architectural heritage of the park.</p> | <p>Temporary land take required for construction activities at St. Stephen's green has been minimised in order to mitigate the impacts on the green as far as possible. The construction footprint within St. Stephens Green park will occupy just 5% of the park area. As noted in Chapter 26 (Architectural Heritage), architectural elements such as railings, monuments, paving stones are to be removed on a temporary basis prior to construction and are to be reinstated on completion. Mitigation in these cases involves the removal into secure storage of those items and their return and re-erection in each case. The dismantling, transportation, storage, conservation or repairs and reinstatement are to be carried out in accordance with specifications to be compiled by the MetroLink Project Conservation Architect and the works supervised by suitably qualified professionals. Following the implementation of mitigation measures the potential impacts on elements of architectural heritage are considered to be moderate.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |
| 14                                                               |              | 8        | <p>Socially, the proposed demolition of the mid-1990s College Gate apartment block on Townsend Street and the Markievicz Leisure Centre on its lower levels as well as a nearby terrace of social housing adjoining the railway bridge would be the most serious negative impact of MetroLink in the city centre, as it would result in the loss of more than 80 homes.</p> <p>Chapter 8 of the EIAR states that “the Project Team is acutely aware of the potential [!] impact of the proposed Project to these property owners” and that TII would negotiate a scheme of compensation to allow for relocation of residents. It would also “support DCC in the identification and development of a replacement site for a leisure centre and swimming pool”.</p>                                        | <p>TII acknowledge that the loss of residential property and the Markievicz Sports and Fitness Centre is a very significant impact arising from the proposed station location at Tara St. However the decision to locate a station here was carefully considered and is central to the proposed MetroLink project as it allows for interchange with DART services at this location, in addition to serving an important catchment area. The EIAR outlines proposed mitigation measures to ameliorate the effects of the property loss. As detailed in Chapter 11 (Population and Land Use), for those residential properties that will need to be acquired permanently, suitable measures will be proposed for residents under the provisions of the Railway Order. In particular, a Land Acquisition Strategy has been prepared to provide information to residents and set out the arrangements in place for affected property owners. As detailed in Chapter 21 (Land Take), section 21.6 Mitigation Measures, in recognition of the impact on residential cases where properties are to be acquired and given the unique circumstances surrounding the proposed impacts to the College Gate apartment complex, TII will engage the services of a property advisory company to engage directly with property owners. Property owners will be invited to participate in a Discretionary Scheme. The Discretionary Scheme will offer property owners the opportunity to negotiate and reach a 'Pre-Agreement' on both a baseline residential unit price and other matters of compensation that an owner would normally be entitled to under the compensation stage. This will provide the parties with as much certainty as possible at this early stage.</p> <p>TII will use reasonable endeavours to make arrangements to provide residential property owners with as much time as possible in which to relocate, beyond that which is provided for under the statutory process.</p> <p>Full details of the Land Acquisition Strategy are contained in Chapter 11 and 21, and on <a href="http://www.metrolink.ie">www.metrolink.ie</a></p> <p>TII will also continue to work with DCC in relation to the development of an alternative sports and recreational facility to replace the Markiewicz leisure centre and intends to fund the alternative. However, TII does not have control over that development, which is part of DCC's function to provide public sport and recreational facilities in its function area. DCC may or may not be in a position to deliver it in parallel with the MetroLink project. Accordingly, the Board should assess the MetroLink project on the basis that the alternative may not be available. The impact would then be significant, but nonetheless one that would not outweigh the strategic scale long term benefits that MetroLink will deliver.</p> |  |
| 15                                                               |              | 8        | <p>Ashford House on Tara Street, a substantial eight-storey office block dating from the 1990s, is also targeted for demolition to make way for the excavation of the Tara station — all as a direct result of the project promoters' decision to divert the MetroLink alignment further east to provide a multi-level connection with the overground Tara Street DART station.</p>                                                                                                                                                                                                                                                                                                                                                                                                                      | <p>Please refer to response item (5) above in relation to the justification of Tara Station location.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |  |
| 16                                                               |              | 8        | <p>It should be noted that the entire city block bounded by Tara Street, Poolbeg Street, Hawkins Street and Townsend Street has been cleared in recent years for redevelopment. Had the alignment been drawn differently, it would surely have been possible to provide a station box for Metrolink on that extensive site. However, it appears to have been overlooked by TII/NTA.</p> <p>Instead, an equally large urban block immediately to the east — bounded by Tara Street (with the sole exception of the Irish Times building), Townsend Street, the Loopline and Poolbeg Street, and incorporating much of Luke Street — is now slated to be turned into another huge hole in the ground for several years to facilitate construction of Metrolink's Tara station box.</p>                     | <p>Please refer to response item (5) in relation to the justification for Tara Street Station. EIAR Appendix A7.2 Tara Street Station Report summarises the options considered for the location of Tara Station. In total 11 options were considered, which included various alignments which would locate under other sites referenced in the submission, however the preferred option 0, now the proposed Tara Street Station location, was selected as the preferred option as it retains good interchange facility with DART in line with the Project objectives, it has more limited impact on city traffic and utilities during construction than other options, it reduces risk to the overall construction programme, provides for a safer construction methodology, offers a cheaper overall construction cost, and retains the opportunity for future adjacent development by others.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |  |

| Submission No.                                                   |              |          | 098                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                                       |

| RE: Railway Order application for Metrolink project (ref 314724) |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                       |
| 17                                                               |              | 9        | It is now up to An Bord Pleanála's inspectorate and the Board itself to examine this huge transport project objectively, bearing in mind that it carries a minimum price-tag of €9.5 billion. Given the complexity of what has been proposed, it will need to hold an oral hearing to tease out many of the issues, including the downsides I have highlighted in this submission                                                                                                                                                                                                                                                                                                                                                                | TII welcome the opportunity to present the proposed Project at an Oral Hearing.                                                                                                                                                                       |
| 18                                                               |              | 9        | If MetroLink has an Achilles heel, it is surely the abrupt termination of the 19km line at Charlemont and the extensive turn-back loop that would be required to accommodate it. To overcome this fatal flaw, TII/NTA should be sent back to the drawing board to devise a viable continuation of the line that would sensibly extend it into Dublin's southern suburbs.                                                                                                                                                                                                                                                                                                                                                                         | Please refer to response item (2) in relation to Charlemont Station and future phases of the Project.                                                                                                                                                 |
| 19                                                               |              | 9        | In this regard, I agree with the submission made by architect Peter Twamley that the line should be extended to serve Rathmines — including the site of Cathal Brugha Barracks, now the subject of a Government-sponsored feasibility study for a major housing scheme — and onwards via Harold's Cross, Terenure and Templeogue to terminate in Tallaght.                                                                                                                                                                                                                                                                                                                                                                                       | Please refer to response item (2) above in relation to Charlemont Station and future phases of the Project. As presented in Chapter 07 (Consideration of Alternatives), the selection of Charlemont Station does not preclude any future connections. |
| 20                                                               |              | 9        | <p>I also agree with Mr Twamley that the diversion of MetroLink to connect with DART at Tara Street must be revisited. As he writes, "based on distance alone, the cost of a direct route from O'Connell Street to St Stephen's Green will be considerably less than the proposed diversionary loop from O'Connell Street to Tara Street and on to St Stephen's Green ..."</p> <p>This would not only make much more sense economically but also eliminate the drastic requirement to demolish several important assets in and around Townsend Street, including the College Gate apartments and Markievicz Leisure Centre, the nearby small social housing scheme adjoining the Loopline and the Ashford House office block on Tara Street.</p> | Please refer to response item (5) and (16) in relation to the justification for Tara Street Station.                                                                                                                                                  |

| Submission No.                               |                                     |          | 099                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |  |

| 1                                            | Introduction                        | 1        | We welcome the Metrolink project and have engaged with TII since the start of the project in order to improve the project, minimise the negative impacts on our community and, in particular, to protect the mature trees within our area.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | TII acknowledge and thank you for your response in support of the proposed Project. We have reviewed and responded to your observations below, including those made with regards to community impacts and mature trees.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |  |
| 2                                            | Access to Independent Expert Advice | 1        | Access to Independent Expert Advice: Why wasn't access to an Independent Expert provided earlier on the Project (Example of precedent given MetroLink North and the Madden Report)?.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | Access to the Independent Engineer was provided in September 2021, following the appointment of RINA. This appointment coincided with the completion of the preliminary design and was the most appropriate time for the Independent Engineering Expert to begin their review of the MetroLink Preliminary Design proposals.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |  |
| 3                                            | Access to Independent Expert Advice | 2        | <p>Independence of advice from Independent Expert: Why were the terms of reference for the Independent Experts Advice Brief set by NTA/TII? GADRA referred this to the Minister of Transport and were simply deferred them back to NTA.</p> <p>RINA's (the Independent Expert) final report to residents had to be approved by TII prior to circulating it to the resident stakeholders, and this approval process by TII only serves to undermine independence.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | <p>The terms of reference for the independent Engineer were issued to residents groups prior to RINA being commissioned. Transport Infrastructure Ireland (TII) and the National Transport Authority (NTA) recognised that residents groups may find that some aspects of the Railway Order process quite technical and set up Independent Engineering Experts to assist residents groups in interpreting technical designs, drawings etc. and formulating their responses.</p> <p>Following engagement with Resident Groups pre-tender stage to the Independent Engineering Expert contract, it was agreed that the involvement of an independent third party would provide the assurance of the independence of the IEE, rather than involve the residents directly in the tender evaluation process. As such an Engineer nominated by Engineers Ireland formed part of the evaluation team during the tender process. The description of services for the Independent Engineering Expert were published at tender stage and are still available on the MetroLink website. TII and NTA provided free access to an Independent Expert to assist residents associations understanding and responding to the scheme. It was done voluntarily to promote full and effective public participation in the scheme.</p> <p>The contract scope for RINA states that each report shall be submitted to TII for factual assessment prior to issue, and as such TII made no comments on the content or conclusions of the report nor had any role in approving the final document. Therefore, the independence of the IEE to carry out their role and produce an independent report was maintained. Please note the following extract from the IEE scope, "Each report shall be submitted to the Client's Representative for review. The Client's Representative shall not comment on the content of the report. The Client will only make comments as to the accuracy of facts regarding MetroLink. No comment regarding the analysis of the content will be provided unless it is deemed the Service Provider has provided a report which has not been developed with the reasonable skill, care and diligence of a Service Provider carrying out similar work."</p> |  |
| 4                                            | Access to Independent Expert Advice | 2        | <p>Information not provided to the Independent Expert in a timely manner before RO submission: Why wasn't sufficient information provided to the Independent Expert in advance of the RO submission?</p> <p>Prior to the submission of the RO, the appointed Experts appeared to have had difficulty in obtaining information from TII and, indeed, were not even informed of the timing of the application for Railway Order. In the RINA (Independent Experts) Interim Report, it states that for 70% of resident's questions to the TII, an answer was provided that was not comprehensive, nor did it provide as much information as was expected.</p> <p>The Independent Expert did not see any of the EIAR, which contained answers to many of the questions residents raised, ahead of the RO submission, which meant the independent expert report was not available until 6 weeks into the consultation period, giving residents just two weeks to make submissions.</p> | <p>The EIAR is one of the most complex and interconnected EIARs ever produced for an Irish project. It was not finalised until immediately prior to its submission to ABP. Given the pressing need to deliver MetroLink, TII's priority was to lodge the RO and open the public participation process for all affected stakeholders. The public consultation period was also extended in respect of the entire application for a total of 15 weeks, such that there would have been 9 weeks for residents to make submissions based on the observers calculations. It should also be noted that residents groups were issued with RINA's report in draft on the 9th of November and in final form on the 23rd of December providing sufficient time for residents to further expand on their submission during the upcoming Oral hearing.</p> <p>Key aspects of the project were also subject to statutory public consultation in relation to the GDA Transport Strategy 2016-2035 and 2022 to 2042 and non-statutory public consultation in relation to the Emerging Preferred Route (2018), Preferred Route (2019) and the Albert College Park Intervention Shaft (2020).</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |  |

| Metrolink Submission Railway Order (RO) 2022 |                                                                  |              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |  |
| 5                                            | Access to Independent Expert Advice/Construction Phase           | 2, 3, 27, 28 | That an independent expert is available to residents during the Enabling and Construction Works. Request to ABP that a condition is placed on the granting of the RO that an independent expert advice (free of influence from TII/NTA) is available to residents and stakeholders during the enabling works and the construction phase. GADRA have requested that this aspect of the project is under the ownership of Dept of Finance, Enterprise or Transport and not the NTA.                         | <p>The services of the Independent Engineering Expert (RINA) are due to be concluded on completion of the Railway Order process (expected in 2024). The continuation of provision of independent engineering advice for residential stakeholder groups throughout the enabling works and main construction stages of the MetroLink project is currently being considered as part of an overall comprehensive community engagement plan, which will include amongst other initiatives, the appointment of dedicated MetroLink liaison representatives and local community forums which will provide detailed updates on construction activities in their areas.</p> <p>TII does not believe it is appropriate to impose conditions requiring the involvement of the Departments cited in this matter, as the construction of railways is outside their statutory remit. TII does not accept that there is a basis to question its bona fides in this regard and points to the ten years of public consultation that preceded the Railway Order application in that regard.</p> |  |
| 6                                            | Access to Independent Expert Advice<br><br>and<br><br>Conclusion | 3 & 28       | <p>Residents Monitoring Group.</p> <p>GADRA are supporting the call for a Residents Monitoring Group so that Environmental impacts such as noise, vibration, traffic, dust, working hours, timelines etc. and the effectiveness of any construction mitigation measures - Agree monitoring and reporting templates. Reports are available for all residents to review in real time with a role for Independent Experts here also to provide oversight as to completeness of information bring shared.</p> | <p>Chapter 5: MetroLink Construction Phase, section 5.12.4.5 sets out TII Plans for Community and Engagement during the construction Phase.</p> <p>A Stakeholder and Community Engagement Plan has already been developed which has guided the frequency and means of communication to date. The proposed Project will continue to progress community engagement by:</p> <ul style="list-style-type: none"><li>• Regularly reviewing and updating stakeholder and community engagement plans;</li><li>• Actively maintaining partnerships and design focus groups established with the community; and</li><li>• Communicating in a timely and open manner.</li></ul> <p>Through the ongoing development of this plan, it is proposed that TII and its appointed contractor(s) will ensure that local residents, occupiers, businesses, local authorities and all other stakeholders affected by the proposed construction works, as outlined in this EIAR, will be informed and consulted in advance of work taking place.</p>                                                |  |
| 7                                            | Access to Independent Expert Advice<br><br>and<br><br>Conclusion | 3 & 28       | <p>Community Fund.</p> <p>GADRA fully supports the call by associations for Community Fund and Residential Monitoring Group. Similar to the children's hospital fund.</p>                                                                                                                                                                                                                                                                                                                                 | <p>TII intends to establish a minimum of 3 local community liaisons offices along the MetroLink Route. It is proposed to locate these offices in the city centre, Glasnevin and Swords Areas. The offices will be established at least 3 months prior to the commencement of the Major Infrastructure works.</p> <p>TII will work with all established Community Groups through the local community liaison offices along the route to identify projects at local level that would involve the Community in the delivery of MetroLink and its legacy. Such projects might include by way of example:</p> <ul style="list-style-type: none"><li>- A local school learning programme.</li><li>- Enhancement of community amenity within agreed funding limits.</li><li>- Engagement with final landscape and finishing options.</li></ul>                                                                                                                                                                                                                                       |  |
| 8                                            | Access to Independent Expert Advice<br><br>and<br><br>Conclusion | 3 & 30       | <p>Stakeholder Engagement (Historic).</p> <p>GADRA believe that so many of the issues that they (we) have today could have been addressed prior to Railway Order. GADRA have engaged with TII since the very start of this project sending their first questions to the TII in 2018. However, despite the early and enthusiastic engagement on their side, they found that TII did not respond.....</p>                                                                                                   | <p>While fully recognising that matters of concern have been raised through the consultation process in 2019 and 2020, TII strongly disagree with any suggestion that these matters have not been addressed in advance of the submission of the Railway Order. The process of the Preliminary Design upon which the EIAR for the Railway Order is based, and the proposed construction arrangements, where appropriate, have incorporated feedback from the consultation process undertaken in 2019 and 2020 as set out by EIAR Chapter 8, Consultation.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |  |

| 9                                            | Stakeholder Engagement                      | 3           | <p>Risk to Dublin City should project start and then stop for unforeseen circumstances:</p> <p>GADRA raised this issue with the Independent Experts at our first meeting November 11<sup>th</sup>, 2021, and RINA raised it with TII who confirmed that, at that point, it had not been included it in their Risk Register. TII to confirm whether this risk has now been considered?</p> | <p>TII confirm this risk has been considered.</p> <p>If the works were halted temporarily, for example if monitoring of a particular environmental impact showed results were trending towards a breach of acceptable limits (note the monitoring is designed with pre-determined trigger levels designed to ensure acceptable levels are not breached) or a safety concern was identified, then the area of the works concerned would be secured and temporarily suspended until TII are satisfied the works can resume following an investigation, consideration of lessons learnt, and actions to be implemented to avoid any reoccurrence. Such plans will be set out by the contractor's Monitoring Action Plans (MAPs) and associated contingency plans.</p> <p>If in the highly unlikely event construction must be abandoned, in the first instance, all works would be made safe and secured, and then it would be a decision for Transport Infrastructure Ireland to determine to what extent further work should be undertaken. It must be stressed that abandoning MetroLink main works once underway is viewed as a highly unlikely event. The main works procurement and governance process that will determine whether MetroLink main works should proceed will be rigorous and robust to ensure that a future risk of abandonment of the Project is extremely unlikely / improbable.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| 10                                           | Specific Issues Being Raised and Conclusion | 4, 5 and 29 | <p>Please confirm the rationale for the decision to go from Twin Bore to Single Bore and why this was not included in the EIAR?</p> <p>The EIAR is incomplete in relation to the decision to change from Twin to Single Bore, what was the reason for this massive change.</p>                                                                                                            | <p>The EIAR provides the rationale and benefits of a single bore tunnel and therefore TII do not consider the EIAR is incomplete.</p> <p>A detailed comparative analysis of twin versus single bore tunnel has been undertaken, that has included consultation with Barcelona Metro that currently successfully operates a single bore configuration. EIAR Chapter 7, section 7.7.2.2.1 Overall Conclusions, notes that this analysis identified that a single bore tunnel option offered significant benefits for the proposed Project when compared to the twin bore solution that was considered at the Emerging Preferred Route (EPR) stage. These benefits include:</p> <p>Passenger Evacuation and Incident Management</p> <ul style="list-style-type: none"><li>• The single bore configuration enables faster passenger evacuation from the ends of the train directly onto tracks, rather than more challenging lateral evacuation on to an elevated walkway along the sides of the tunnel required for a twin bore configuration.</li><li>• The single bore provides increased space for emergency services access and working space adjacent to a train in the tunnel.</li><li>• Conditions can be created within a larger single bore diameter tunnel that facilitates smoke stratification at a high level in the bore for a longer period of time when compared to that in a twin bore configuration. Therefore, the single bore configuration facilitates enhanced evacuation conditions for passengers and provides better tunnel visibility during fire events when compared to the twin bore solution.</li><li>• The single bore configuration offers a more flexible system throughout the life cycle of the asset in that it allows operational adjustments such as additional track crossovers without the need to build new infrastructure / tunnels.</li></ul> <p>Programme and Cost - A single bore tunnel can be constructed at lower cost and quicker than a twin bore configuration due to:</p> <ul style="list-style-type: none"><li>• The overall reduced volume of structure to be constructed i.e. twin bore tunnels will require more concrete and steel, and an overall greater volume of excavation.</li><li>• Not only can the single bore tunnel itself be constructed more quickly, and hence reduce the construction programme as less overall volume of material needs to be excavated, but also there is no requirement for cross-passages, which are slow to construct and need to be mined as separate construction activities after the main tunnel has been built, adding time to the programme and a complex activity dependency to be managed..</li><li>• There is no requirement to construct extra mined/cut &amp; cover sections required to accommodate track crossovers since these can be accommodated in the single bore tunnel, that the twin-bore cannot accommodate.</li></ul> <p>(It is recognised that the single bore configuration unlike the twin bore arrangement means there is a need for intervention shafts where the distance between stations is greater than 1000m. This only occurs at one location on the Project between Griffith Park and Collins Avenue stations and overall is offset by the benefits listed.)</p> <ul style="list-style-type: none"><li>• As there is only one TBM to drive or pull through stations under construction, the station programme durations are reduced together with schedule interface risks with other programme critical construction activities.</li></ul> |

|                                              |                                                                                                    |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | <div>Environment</div> <ul style="list-style-type: none"><li>• The reduction in excavation means spoil quantities, handling and disposal is reduced and hence traffic on the roads and the follow on volume of land fill disposal is reduced.</li><li>• The reduction in concrete and steel that will be used to manufacture the tunnel lining precast segments will be reduced for a single bore tunnel and will therefore reduce the traffic on the roads.</li><li>• There is an overall reduced environmental impact since the construction programme is quicker, less materials are needed for construction (reduced use of natural resources and traffic to transport materials to site), less excavation (spoil disposal volumes are reduced resulting in less traffic on the roads and reduced landfill), and an overall reduction in embedded carbon as a result of the reduced volume of material (steel and concrete) required compared to a twin bore configuration.</li></ul> <div>Accordingly, the EIAR complies with the EIA Directive requirement to describe the reasonable alternatives, indicate the main reasons for the chosen option and compare their environmental effects in so far the decision to opt for a Single Bore over a Twin Bore Tunnel.</div>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |  |
| 11                                           | Specific Issues Being Raised<br><br>and<br><br>Intervention Shaft and Collins Ave Station position | 4, 5 & 6 | <div>Specific Issues Being Raised (Assume location as highlighted):</div> <div>Our issues in relation to the Metrolink are as follows:</div> <div>Intervention Shaft (Albert College Park) Issues, including:<ul style="list-style-type: none"><li>o The lack of consultation on the shaft position.</li><li>o The lack of any evidence of an alternative to the shaft.</li><li>o The lack of evidence supporting the size of the shaft in the EIAR.</li><li>o The size of the footprint of the shaft in both construction and operation phase.</li><li>o The withholding of information on the shaft during the consultation on the EPR.</li><li>o The lack of information in relation to Intervention Shaft within the EIAR especially in relation to construction traffic, base line sound measurements - it appears to not have been included (most like as it appears to have been a late addition to the project).</li><li>o GADRA's proposal for Dublin Fire Brigade Access ACP Shaft to be outside of the park on Ballymun road rather than be in the park as part of the shaft footprint.</li><li>o The fact that there are alternatives to the carpark/ emergency vehicle area outside of the park that also comply with industry safety standards has not been shown in the EIAR.</li></ul></div> | <div>The Public Consultation Document for the Preferred Route, published as part of the public consultation held in March 2019, included reference to an intervention shaft required in Albert College Park (ACP), with the location indicated in Section 10, Appendix B, Sheet 15 ACP Intervention &amp; Ventilation Shaft. However, feedback was received following the PR consultation in 2019 that there was not sufficient information provided on the intervention shaft at ACP. TII thus subsequently held a Local Area consultation solely on the intervention shaft at ACP for 4 weeks in early 2020. This was supported by a detailed report explaining the rationale and construction and operational requirements for the shaft - see EIAR Appendix A8.16. The main topics raised during this consultation related to aesthetics, environment, amenities, and parking. Please refer to EIAR Chapter 8, Diagram 8.10 and Appendix A8.14 and A8.15 for further details. TII would therefore contest that they have not undertaken sufficient consultation or withheld information as suggested by the observation made.</div> <div>The requirement for an intervention shaft is a function of the distance between Collins Avenue and Griffith Park stations. Response (12) explains the rationale for the proposed location of Collins Avenue Station, while EIAR Chapter 7 Consideration of Alternatives, section 7.7.11.1 explains the location options that were considered for the Intervention Shaft before determining the south-west corner of Albert College Park presented the preferred solution:</div> <ul style="list-style-type: none"><li>• The Intervention shaft is no more than 1000m from either Collins Avenue or Griffith Park Stations;</li><li>• The intervention shaft is adjacent to the tunnel on the west side of the park in order to reduce the length of connecting tunnel;</li><li>• The park area is the only "open space" on the MetroLink route between the two stations and as a result the location of the intervention shaft here avoids the requirement for any demolitions or impacts on private property; and</li><li>• The tunnel intervention shaft can be accessed easily by emergency vehicles and there is enough area for safely congregating passengers in an emergency.</li></ul> <div>The design for the Albert College Park Intervention Shaft has been developed having regard to the submissions received and further discussions with Dublin Fire Brigade and other stakeholders with the site layout and the landscaping also developed to mitigate the visual impact. The size of the facility has been designed to accommodate the necessary ventilation facilities and access to the tunnels; to provide space for maintenance vehicles; and emergency vehicles space adjacent to the building entry point as required by Dublin Fire Brigade. Summary information is provided in EIAR Chapter 4, Section 4.17.5 Albert College Park Intervention Shaft with full details in EIAR Appendix A8.16. Response (34) below explains the rationale for the construction footprint of the site.</div> <div>Further, as noted by EIAR Chapter 21, Land take, section 21.6.1.5, while temporary and permanent land take at the proposed Albert College Park Intervention Shaft will result in the loss of two 5 a-side soccer pitches and a small portion of one full sized pitch situated in Albert College Park and currently used by a local football club. In mitigation, it is proposed to rotate the existing full-sized pitches 90 degrees and locate them side-by-side to the east of the park, resulting in slightly reduced dimensions. Sufficient area will be available to increase the dimensions of both 5 a-side pitches. Sufficient area will also be available for circulation around the pitches while they are occupied. Loss of habitat and wildlife will also be reinstated after initial construction. Chapters 27 (Landscape &amp; Visual) and 15 (Biodiversity) set out the assessment into the potential impacts at Albert College Park, while Appendix A8.18 details the engagement that has taken place with Dublin Fire Brigade.</div> |  |

|                                              |                                                                                                    |          |                                                                                                                                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

|                                              |                                                                                                    |          | Response (11) continued.                                                                                                                                             | <p>EIAR Chapter 13 Section 13.3.1.6 notes the baseline noise monitoring results at Albert College Park with two unattended and four attended monitoring locations for this area. Section 13.5.2.6.3 describes the construction impacts on Albert College Park Intervention Shaft.</p> <p>EIAR Chapter 5, MetroLink Construction and Appendix A9.5 Scheme Traffic Management Plan details the impact of the temporary traffic management measures and associated construction traffic. As the Intervention Shaft is wholly located within the Albert College Park, there are no temporary traffic management measures associated with the construction of this site required on the adjacent R108, causing no impact to road users. As shown in Appendix A5.7 Construction Vehicles, Plant and Equipment, there will be approximately 30 to 80 vehicle movements per day associated with the Intervention Shaft, however much of the works will see daily vehicle movements lower than this range. As a result, the impact on traffic at this location will not be significant. The construction of the intervention shaft will also be complete in 2027 (prior to the peak main works construction year of 2028) and therefore the impact of the vehicles associated with the Intervention Shaft have been considered in the cumulative assessment of the enabling works (peak construction traffic generated in 2024).</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| 12                                           | Specific Issues Being Raised<br><br>and<br><br>Intervention Shaft and Collins Ave Station position | 4        | Specific Issues raised in relation to Collins Ave:<br><br>Please confirm the rationale for the position of Collins Avenue station?                                   | <p>As outlined in EIAR Chapter 7, Consideration of Alternative, section 7.7.10.7, the assessment undertaken for the Emerging Preferred Route (EPR) identified a preferred route option including the proposed Collins Avenue station location.</p> <p>This location for the station provides a number of advantages when compared to other location options, including Albert College Park:</p> <p>(1) It allows the Project to achieve a core project objective of providing public transport that is integrated in the existing and future proposed transport network, providing for interchange between bus routes both on Collins Avenue and on Glasnevin Road. A station location further south at the northern section of Albert College Park would not provide a good level of interchange as there would be over 500m separating potential bus stop locations on Collins Avenue and the MetroLink station.</p> <p>(2) The proposed Collins Avenue Station will have a significant catchment area, noting the analysis undertaken at the Emerging Preferred Route (EPR) stage identified this route option had the highest potential passenger numbers when compared with other route options.</p> <p>(3) During the construction phase, the location of a station within the frontage to Our Lady of Victories means that traffic disruption to Dublin would be reduced when compared to the location of a station within the road corridor (partially or fully).</p> <p>The predicted temporary environmental impacts during construction on the surrounding area, as detailed in the relevant chapters of the EIAR, can be effectively mitigated. Once the station is operational, the location of a MetroLink station here will provide significant positive benefits to the local community in terms of enhanced public transport provision, reduced traffic and the resultant improvements in the environment as a result of reduced noise and air quality pollution.</p> |
| 13                                           | Specific Issues Being Raised<br><br>and<br><br>Intervention Shaft and Collins Ave Station position | 4        | Our issues in relation to the Metrolink at Griffiths Park are as follows:<br><br>- The rationale for the move to the current position for the Griffith Park Station? | <p>At the Emerging Preferred Route Stage (EPR) stage the Griffith Park station was shown located on the Na Fianna playing pitches. The rationale for subsequently selecting the Home Farm pitches as the location for the Griffith Park Station is described and assessed in EIAR Chapter 7 Consideration of Alternatives, Section 7.7.10.8 Griffith Park, as the least impactful solution to deliver the Proposed Route. Locating the station under the Home Farm sports pitch is more preferable than under the Na Fianna pitches as the main Home Farm pitches are located away from this location whereas the Na Fianna pitches form the clubs principal playing pitches and training ground. The construction impacts would thus be more significant at the Na Fianna location.</p> <p>In addition, the adoption of a single bore tunnel arrangement requires the inclusion of an Intervention shaft between the Griffith Park Station and the Collins Avenue station due to the distance between these stations exceeding the Fire Safety Strategy limit of 1000m. Locating the Griffith Park Station on the Na Fianna grounds would increase the distance from here to the Glasnevin Station to above 1000m and thus require the introduction of an additional intervention shaft along this built-up residential section of the route.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

| Submission No.                               |                                                                                                    |          | 099                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |

| 14                                           | Specific Issues Being Raised<br><br>and<br><br>Intervention Shaft and Collins Ave Station position | 4        | Our issues in relation to the Metrolink at Griffiths Park are as follows:<br><br>- Please confirm that the proximity of the Griffith Park Station to the highly sensitive Tolka river has been considered?                                                                                                                                                                                                                                                                                                                                                                                                                                                        | We confirm that the location of Griffith Park Station has considered the proximity of the Tolka River. For the full details of the assessments carried out relevant to the proposed Griffith Park Station, please refer to EIAR Chapter 15: Biodiversity. This has also been considered as part of Chapter 18 Hydrology and Chapter 19 Hydrogeology. Appendix A5.1 Outline CEMP and A5.11 outline construction measures with regards to working near watercourses.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |  |
| 15                                           | Intervention Shaft and Collins Ave Station position:                                               | 5 & 6    | Intervention Shaft: GADRA object to the positioning of an Intervention Shaft in a public park, which will permanently remove an area of public park from public use.<br><br>This proposed shaft is a material permanent above ground structure, yet the public were not given any information on this shaft during the consultation phase (2019) and were not given any alternative site rather than in a public park. Indeed, the only consultation that occurred on the shaft was in relation to design, not position.<br><br>An alternative location well away from homes and not in a public park in an area of Ballymun Library Car Park was not considered. | Response (11) above explains the rationale for the proposed location of the Albert College Park Intervention Shaft.<br><br>The rationale for the location (including consideration of alternate locations), layout, access provision, finishing and landscaping of the proposed Albert College Park (ACP) Shaft are also provided in the Report on the ACP Tunnel Intervention Shaft, included as Appendix A8.16 of Chapter 8, Consultation of the EIAR.<br><br>As set out in EIAR Chapter 4, Description of the MetroLink Project, section 4.17.5, and detailed on drawing ML1-JAI-SRD-ROUT_XX-DR-Y-03001 Plan Drawings ML-VT- 304 G-H, the shaft is located on the South West corner of Albert College Park. To address the concerns received from the Preferred Route consultation, the above ground structure will consist of a brick clad building with approximate dimensions 9m by 8m and 3m high at the top of the access shaft, with the remainder of the structure below ground. Access and egress has focused on resident feedback with both provided onto Ballymun Road.<br><br>As referred to in Chapter 8, Appendix A8.15, the outline details of the proposed shaft were shared during the Local Area Consultation in early 2020.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |  |
| 16                                           | Intervention Shaft and Collins Ave Station position:                                               | 5 & 6    | Albert College Park: The disruption to nocturnal wildlife at this site will be significant and GADRA are requesting no works on this site at night.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | The Pre-Construction planning for the Preliminary Design as assessed under this EIAR has provided for the majority of the works to be undertaken during standard working hours. There are exceptions to this for the reasons explained by responses (28) and (32) below but noting these works will take place underground and be covered so that noise disturbance during the night does not occur, and deliveries restricted.<br><br>With regards to disruption to nocturnal life, overall, it is not expected that any potential impacts would be of such a magnitude that they would negatively affect the conservation status of the local bat species that have been recorded at this location. This is due to the following reasons:<br><br>• All bat species present are very common species, that are of “Least concern” in terms of their conservation status, and include Leisler’s bat, which is known to tolerate certain levels of light disturbance, consistent with the proposed development at this location, compared to other bat species;<br>• The availability of suitable alternative habitats beyond this location will provide suitable foraging habitat for any displaced bats (e.g. within Santry Demesne, along the Santry River corridor);<br>• The existing levels of light disturbance at this location;<br>• The proposed lighting will be designed such that it is directed towards the construction compound rather than beyond its boundaries and it avoids light spill onto any nearby sensitive features (such as hedgerows and trees used by bats). A Lighting Management Plan will be prepared by the contractor for Albert College Park and this will include details on how the lighting will be managed to avoid light spill at this particular location;<br>• The good practice use of light or lux meters to measure and check actual lighting levels on-site will be adopted. Measured values will be compared with relevant guidance for lighting in the workplace (refer to Appendix 5.18, Construction Lighting of the EIAR). This will ensure that light pollution is mitigated whilst workers are protected with a safe level of lighting.<br>• There will be no significant additional lighting which will increase the baseline light levels along features suitable for commuting and foraging bats at Albert College Park. Low level lighting may be required in these locations to provide a safe environment for security personnel and pedestrians; however, surface works will not be undertaken during night-time hours in these locations. Therefore, there is no potential for likely significant effects to occur.<br><br>The EIAR has demonstrated that there are no other sensitive nocturnal biodiversity receptors likely to be affected by the works. |  |

| Submission No.                               |                                                                    |               | 099                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |

| Metrolink Submission Railway Order (RO) 2022 |                                                                    |               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| 17                                           | Intervention Shaft and Collins Ave Station position:               | 5 & 6         | Zoning: The area planned for shaft is currently zoned as Z9, GADRA do not believe that a ventilation shaft meets the criteria for this Zoning, but a station would.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | <p>The proposed ventilation shaft lies within lands zoned Z9 in the Dublin City Development Plan 2016-2022 (in force at the date of lodgement) and the Dublin City Development Plan 2022-2028 which is now in force.</p> <p>As a structure considered to come within the description of Public Service Installation in the Dublin City Development Plan 2022-2028, it is considered that the Ventilation Shaft is a Permissible Use under the Z9 zoning, and is therefore compliant with the zoning objective.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| 18                                           | Intervention Shaft and Collins Ave Station position:               | 7             | Modelling: GADRA are of the opinion that the strategic modelling employed does not accurately reflect the future passenger demands in the area (in determining the location of Collins Ave Station).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | The NTA's Eastern Regional Model (ERM) has been used to forecast passenger demand for the MetroLink. This model includes for future land use and population changes and is the most appropriate tool available to forecast passenger demand for The Project. GADRA have not identified any aspect of the ERM that supports their conclusion.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| 19                                           | Intervention Shaft and Collins Ave Station position:               | 7, 8, 9 & 10  | <p>Please note below the argument our colleagues in ACRA and Ballymun Residents Associations have made to the TII and we fully support this.</p> <p>For determining the location of the station at Collins Ave, why were no comparison made between:</p> <ul style="list-style-type: none"><li>- the current selected church station location; to either</li><li>- the location option (option 3 Metro North); or</li><li>- the GADRA proposed Albert College Park station location, coupled with a ventilation shaft north of Collins Avenue at Ballymun Library.</li></ul>                                                                                                                        | <p>TII have carefully examined the possible locations for Collins Avenue Station. Response (12) explains the rationale for the proposed location of Collins Avenue Station and response (11) the intervention shaft location requirements. EIAR Chapter 7 Consideration of Alternatives, section 7.7.11.1 explains the rationale that has resulted in the Intervention Shaft being placed in the south-west corner of Albert College Park:</p> <ul style="list-style-type: none"><li>• The Intervention shaft is no more than 1000m from either Collins Avenue or Griffith Park Stations;</li><li>• The intervention shaft is adjacent to the tunnel on the west side of the park in order to reduce the length of connecting tunnel;</li><li>• The park area is the only "open space" on the MetroLink route between the two stations and as a result the location of the intervention shaft here avoids the requirement for any demolitions; and</li><li>• The tunnel intervention shaft can be accessed easily by emergency vehicles and there is enough area for safely congregating passengers in an emergency.</li></ul>                                                                                                                                                                           |
| 20                                           | Intervention Shaft and Collins Ave Station position:               | 10 & 11       | <p>Categories for the Multi Criteria Assessment: Collins Ave. Why was this information only release after the RO submission date?</p> <p>We also note the manner in which Our Lady of Victories School has been treated in this process and would highlight how differently this school has been treated in comparison to the treatment and special allowances made for the Scoil Caitriona and the children in School Mobhi by moving the Griffith Park Station, and we ask why these children and school should not be afforded the same respect and consideration given the similarities in the impacts.</p> <p>See below possible location of station in the park negating need for a shaft</p> | <p>Collins Avenue MCA document is a working analysis that was undertaken for various options that had been identified previously for this location. A draft internal analysis was undertaken to confirm the analysis undertaken in the EPR. Following consultation, TII agreed to share this draft document with the local residents. Due to its draft/working nature it was not required to form part of the application documents.</p> <p>All decisions in relation to the locations of MetroLink infrastructure have been taken on the balance of benefit versus impact, and that impacts need to be mitigated to acceptable levels. As demonstrated throughout the EIAR documents it is simply not the case that TII have prioritised one community group over another in the decisions taken. The rationale for moving Griffith Park Station is explained by response (13) above. TII would further note that impacts to the school, as for any other receptor will be mitigated so that the impacts of MetroLink are not unacceptable which are covered throughout the EIAR.</p> <p>Response (12) above explains the rationale for the proposed location of Collins Avenue Station and thus the need for an intervention shaft between the proposed Collins Avenue and Griffith Park stations.</p> |
| 21                                           | Intervention Shaft and Collins Ave Station position and Conclusion | 10, 11 and 30 | GADRA highlight how differently the Our Lady of Victories School appear to have been treated in comparison to the treatment and special allowances made for the Scoil Caitriona and the children in School Mobhi by moving the Griffith Park Station, and we ask why these children and school should not be afforded the same respect and consideration given the similarities in the impacts.                                                                                                                                                                                                                                                                                                     | Please refer to response (20) above.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| 22                                           | Shaft Consultation                                                 | 12            | <p>Shaft Consultation:</p> <p>GADRA contend that the NTA/TII have not fulfilled the requirements of DPER's "Consultation Principles &amp; Guidance" or their statutory obligations under the Aarhus Convention in terms of the underpinning pillars of access to information and public participation in decision-making in this regard.</p>                                                                                                                                                                                                                                                                                                                                                        | TII strongly disagree with the assertion that the requirements of DPER's "Consultation Principles & Guidance" or the statutory obligations under the Aarhus Convention have not been followed. EIAR Chapter 8, Consultation provides details of the consultation process undertaken in 2019 and 2020 in relation to the proposed intervention shaft at Albert College Park. Please also refer to response (15) above.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

| 23                                           | Shaft Consultation                       | 13       | Shaft Consultation:<br><br>There is no need for Fire Engines to turn on this footprint as indicated in the EIAR Section 4.17.5, and as confirmed to GADRA by Dublin Fire Brigade (DFB) and confirmed in the EIAR, DFB have requested a one-way system with two exits - thus negating the need to turn vehicles.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | As set out within the EIAR Chapter 4 section 4.17.5, a one way system for entry from and exit to the R108 has been provided for Dublin Fire Brigade, alongside required parking space for vehicles by the intervention shaft, both following discussions with Dublin Fire Brigade regarding their requirements. Further details are provided on slide 84 of 89 on RO Submission: Structures Details Book 3 of 3 Other Line wide Structures Fingal County Council and Dublin City Council. There is no provision for vehicle turnback’s at this location.<br><br>The reasoning supporting the proposed location, layout and operation of the Emergency Shaft at Albert College Park is detailed within Appendix A8.16.               |
| 24                                           | Shaft Consultation                       | 13 & 21  | Shaft Consultation.<br><br>Shaft access and parking, confirm DFB have been consulted on the details outlined.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | Dublin Fire Brigade have been consulted during the development of the Preliminary Design of the Albert College Park Shaft as detailed within the EIAR and Railway Order documents, and the design accommodates their requirements. Please refer to dates of meetings held with DFB outlined in appendix A8.19.                                                                                                                                                                                                                                                                                                                                                                                                                      |
| 25                                           | Information Provided during Consultation | 15 to 24 | GADRA also contend that :<br>- A proper consultation process was not followed in 2019.<br>- The decision to put an above ground shaft and emergency vehicle/ maintenance car park in a Dublin city park was taken without discussing the proposal with DCC (as confirmed to GADRA by the Head of Parks) or with the public.<br>- Also note and object to the permanent loss of park lands and we object to any access from Hampstead Avenue as detailed.<br>- Noted allegations of breaches of the Irish Constitution and of the Aarhus Convention, refuted by the NTA.<br>- Request from ABP that this position and size of this shaft is not agreed until an assessment of an alternative to its position and size has been undertaken.<br>- object to the additional emergency exit on to Hampstead Avenue, with the required second exit can be accommodated on the Ballymun Road. | TII do not agree that a “proper consultation process was not followed in 2019” for the reasons set out by response (11) above. TII has carried out three consultations over and above the statutorily require Railway Order consultation. TII would also note that DCC are aware of and have not objected to the Albert College Park intervention shaft proposal.<br><br>Response (11) also explains the reasoning (and alternatives considered) for the proposed location and size of the intervention shaft.<br><br>TII can also confirm no access is provided off Hampstead Avenue, with both accesses now provided off the Ballymun Road. (See Railway Order Drawings, Structures Book 3 of 3, ML1-JAI-SRD-ROUT_XX-DR-Y-03001). |

| Submission No.                               |                                          |          | 099                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| 26                                           | Information Provided during Consultation | 15 to 24 | <p>Preferred Route Albert College Intervention Shaft. Report from 2019. In particular, GADRA highlight the following issues (Summarised below 1 - 9) with the report produced in relation to Albert College Shaft 2019 Report in particular noting the seriousness of points 1 and 2:</p> <p>1) The option of a station at this site in the EIAR is a fundamental flaw with this assessment. No reason given on why a station was not considered (at this location).</p> <p>2) An Environmental Impact Assessment Report (EIAR) of the construction stage was not addressed - again a fundamental flaw and a major issue with the current process.</p> <p>3) Dispute the validity of the statement: this preliminary design was developed from feedback provided during the public consultation process.</p> <p>4) State that "the details of the proposed shaft were not widely circulated or communicated".</p> <p>5) Noted "that local public representatives do not support the proposal to put a shaft into a public park preferring the option of a station instead".</p> <p>6) Provide correspondence on NTA position with the provision of information during the consultation period.</p> <p>7) Shaft report indicates that the distance from Glasnevin Station to Mater Station is 683m. This shows that a station in Albert College Park would not result in a distance between consecutive stations that is out of line with the distance between other stations on the Preferred Route.</p> <p>8) "For the tunnel intervention shaft to be no more than 1000m from either Collins Avenue or Griffith Park Stations, it must be situated either immediately north of Hampstead Avenue in the south-west corner of Albert College Park; or within the residential area immediately south of Hampstead Avenue;" GADRA were shocked that a residential area was even considered for a shaft location.</p> <p>9) Note and object to the permanent loss of park lands and we object to any access from Hampstead Avenue as detailed. Include alternative: DFB have confirmed that they are just looking for best international standards which means a hard standing area for two fire engines be available for emergency vehicles within 20 meters of the shaft- the layby on the Ballymun road satisfies this criteria negating the need for an area of the park to be incorporated into this shaft design thus reducing the permanent land take from the park.</p> | <p>It is important to recognise that the level of detail presented by the Preferred Route (PR) Albert College Intervention Shaft 2019 is commensurate with the level of detail required for the PR stage of the project. However as the design developed and information became available on the proposed intervention shaft, a site specific public consultation was initiated whereby submissions were invited on the proposals to install an intervention shaft at Albert College Park. This consultation occurred between February 12<sup>th</sup> 2020 and March 30<sup>th</sup> 2020 and was initiated by the delivery of an information pack to 4,250 homes in Glasnevin and Ballymun from February 12<sup>th</sup> 2020, in addition to the delivery of brochures outlining the proposals to local libraries and council offices. 195 submissions were received in response to this public consultation including 7 from public representatives and 11 from local organisations.</p> <p>In accordance with the numbered observation points:</p> <p>1. The rationale for the position of Collins Avenue Station is explained by response (12) above.</p> <p>2. TII do not agree that this is a fundamental flaw. At the Preferred Route consultation stage the details of the proposal were not at the level of detail to undertake an EIAR, and the subsequent development of the design to Preliminary Design has formed the basis of the EIAR assessment for the Railway Order, noting that the Preliminary Design was developed taking account of the feedback gathered during the consultations in 2019 and 2020.</p> <p>3 and 4. Response (11) above explains why TII consider they have taken account of feedback provided during the consultation process and adequately circulated the proposals for Albert College Intervention Shaft.</p> <p>5.While support may not be unanimous for Albert College Intervention Shaft, TII have set out the rationale that has led to the preferred location for Collins Avenue Station and Albert College Park Intervention Shaft in responses (12) and (11) respectively.</p> <p>6. TII are unsure as to what correspondence the GADRA is referring to but will be happy to provide the relevant resonance if GADRA wish to contact TII directly in advance of the Oral Hearing]</p> <p>7. The rationale for the preferred location of Collins Station is set out by response (12) above. This means the distance between the proposed location of Collins Avenue Station and Griffith Park Station is greater than 1000m and hence the requirement for an intervention shaft between these stations.</p> <p>8. The statement explains the constraints that apply to the selection of a location for an intervention shaft. The residential area is also considered a constraint and ruled out early in the design process.</p> <p>9. Response (11) explains the reason for the proposed land take, including the provision of space for maintenance and emergency vehicles space adjacent to the building entry point as required by Dublin Fire Brigade. The hardstanding area is linked to a maintenance access road which is not only proposed for DFB but also for associated maintenance. TII can also confirm no access is provided off Hampstead Avenue, with both accesses now provided off the Ballymun Road. (See Railway Order Drawings, Structures Book 3 of 3, ML1-JAI-SRD-ROUT_XX-DR-Y-03001).</p> <p>While the objection to Park land take is recognised by TII, it is also noted that this submission proposes that instead a station is located at this site that would bring with it a greater potential environmental impact during the construction phase to be managed, as well as also resulting in permanent land take, and therefore many of the observations (objections) to Albert College Park Shaft would also apply to a station if constructed at this location.</p> <p>(continued below)</p> |

| Submission No.                               |                                          |          | 099                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| 27                                           | Information Provided during Consultation | 15 to 24 | <p>Preferred Route Albert College Intervention Shaft. Report from 2019. In particular, GADRA highlight the following issues (Summarised below 10-18) with the report produced in relation to Albert College Shaft 2019 Report in particular noting the seriousness of points 1 and 2:</p> <p>10) Drilling and blasting appears to be the intended method by which this shaft will be constructed (Section 5 of shaft report). The impact on Human health impact was not considered in the as part of an EIA and note our opposition to the plan, asking that VBM is used.</p> <p>11) Baseline sound monitoring from this location, was omitted and this also must be addressed prior to RO.</p> <p>12) The report does not contain the impacts on this structure (Underground plant and fan room) as part of the build.</p> <p>13) the report states that shaft is a significant construction - so we ask again why this significant construction was excluded from consultation on the Preferred Route and was omitted from the EIAR- this needs to be addressed prior to granting RO.</p> <p>14) Object to the plans for a temporary construction compound (see Section 5.1 of shaft report below) and we object to the loss of the park for the duration of 3 years - noting that this does not include the length of time required for the park to recover and be available for public use. In contrast to the shaft report the EIAR says the construction will take 5 years.</p> <p>15) The report does not contain any assessment of the short medium- and long-term effect of the proposal. As previously stated, a major flaw.</p> <p>16) Review of Section 6.1 of shaft report there is no assessment of the impacts on the residents living less than 20 meters from this site - although the report does make reference to the impact on the playing pitch.</p> <p>17) Request that a precast roof be used during the construction of the shaft to mitigate impact on residents.</p> <p>18) Request that this site is a dark quiet site at night with no works taking place on it given that this site is adjacent to the main tunnels and its proximity to home and the flora and fauna of the park.</p> | <p>(continued from above)</p> <p>10. The Human Health assessment is presented in Chapter 10 of the EIAR. As stated in section 10.5.1.1.2 and 10.5.1.1.3 of this chapter the human health effects of airborne and groundborne noise &amp; vibration have been considered. The health effects are associated with exceedances in criteria set out in Chapter 13 Airborne Noise and Vibration, and Chapter 14 Groundborne Noise &amp; Vibration. It should be noted that blasting and its potential for health effects is specifically referenced in section 10.5.1.3. Section 10.7 of the chapter identifies that blasting could cause a significant effect which will be temporary or short-term (at locations identified as exceeding criteria in Chapter 14). However, there are no exceedances of criteria for blasting at sensitive receptors in the vicinity of Albert College Park as identified in Chapter 14.</p> <p>11. Baseline monitoring was undertaken in the vicinity of Albert College Park (AT25, AT26, AT27, AT28, AT64, UT31 and UT32) . Refer to Table and Figure 13.1 (sheet 5 of 7).</p> <p>12. Please refer to the EIAR prepared for the project where all potential effects arising from the project during both the construction and operational phase have been presented.</p> <p>13. As outlined above, this location was consulted on separately to the Preferred route.</p> <p>14. Response (11) above explains the rationale for the land take, noting that there will be no loss of pitches during the construction phase. The estimated construction period as stated by EIAR Chapter 5, MetroLink Construction Phase, Table 5.15, is 63 months. This period allows for the removal of the compound and landscape reinstatement. Once the main civils works are complete, for the MEP installation at this location, it is possible for the compound footprint to be reduced to the permanent footprint of the facility shaft area with the park reinstated as proposed.</p> <p>15) The assessment presented in every chapter of the EIAR is based on a comprehensive assessment of potential effects during the construction phase and the operational phase. This is in line with best practice and guidance.</p> <p>16) The Albert College Park Report notes that all impacts would be assessed within the EIAR in necessary detail. Please refer to the EIAR prepared for the project where all potential effects arising from the project during both the construction and operational phase have been presented.</p> <p>17) Please refer to section 13.6.1.2.4 of Chapter 13 and 14 of the EIAR where it is proposed that at Albert College Park, during night-time support works for sprayed concrete tunnelling, surface activities will be enclosed within an acoustically clad steel framed building to control airborne noise breakout to surrounding sensitive properties.</p> <p>18. Response (16) above explains the proposed management of night-time lighting, noting that lighting will be designed such that it is directed towards the construction compound rather than beyond its boundaries and it avoids light spill onto any nearby sensitive features. Response (28) explains the proposed approach to required night-time working, noting an acoustically clad steel framed building will be used within the compound to control airborne noise breakout to surrounding properties. Deliveries to this compound at night will be limited to concrete supply for the sprayed concrete tunnelling works only and these will be scheduled to occur over limited delivery periods to minimise impacts on surrounding properties.</p> |

| Submission No.                               |              |           | 099                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |  |

| 28                                           | Construction | 24 & 25   | Construction: Requesting daytime standard working and delivery times (table 5.3) only, including SCL (Section 5.5.11.)                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | <p>The shaft at Albert College Park will require two 23m long connection tunnels from the shaft, connecting to the main tunnel (see the general arrangement of the shaft in Diagram 5.27). Both tunnels will be constructed using the Sprayed Concrete Lining technique (SCL which consists of cycles of excavation followed by the application of shotcrete (sprayed concrete), rockbolts and steel girders. The final connections will then be made from the main running tunnel (See Diagram 5.28).</p> <p>Owing to the nature of the tunnelling works and to ensure a safe and stable method of excavation, the SCL tunnel construction will be undertaken 24 hours per day, seven days per week. It is proposed that during SCL night-time support works, an acoustically clad steel framed building will be used within the compound to control airborne noise breakout to surrounding sensitive properties. Refer to Outline Construction Environmental Management Plan (CEMP) Table 6.2 "Noise and Vibration Measures - Topic: Acoustic Barriers ANV8".</p> <p>The structure will achieve a minimum sound reduction index of 24dB Rw with acoustic internal lining of the structure to reduce reverberant noise build up. The enclosure design will be such that openings are sited away from Noise Sensitive Location (NSL) boundaries as far as practicable.</p> <p>Deliveries to this compound at night will be limited to concrete supply to the SCL works only and these will be scheduled to occur over limited delivery periods to minimise impacts on surrounding properties.</p> |  |
| 29                                           | Construction | 24 and 25 | The ground water level at this shaft site is high and much grouting works will be required. Confirm that this matter has been fully assessed in the design and particularly in the choice of construction for the shaft (secant piling - Section 5.5.2.1)?                                                                                                                                                                                                                                                                                                                                      | <p>Groundwater levels have been considered in the design of all of the deep structures along the route, including the Ventilation Shaft at Albert College Park. EIAR Chapter 19 (Hydrogeology) presents the assessment of groundwater in relation to the project.</p> <p>The water tightness of the internal structure of the shaft will be achieved through specification to minimise water ingress through the secant walls. In addition, an allowance has been made for the inclusion of internal walls inside the secant piles to accommodate an internal drainage system for water management within the completed shaft, as is normally provided, but noting that there will be no significant drawdown of groundwater levels.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |  |
| 30                                           | Construction | 24        | Please confirm that base line noise monitoring will be a requirement under the RO.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | Baseline monitoring has been completed at this location as part of the EIAR. Furthermore, it is a requirement of the Outline Construction Environmental Management Plan (EIAR Volume 5 Appendix 5.1) for the appointed contractor to undertake further baseline noise monitoring in advance of the commencement of works at all construction compound locations. Please refer to table 6.2: Noise and Vibration Measures, Topic Monitoring Programme ANV 11.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |  |
| 31                                           | Construction | 25        | A request that NTA uses a Vertical Shaft Machine for the construction of this shaft which makes vertical holes.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | The EIAR assessment is based on the proposed construction of this shaft using secant piling as the method of construction. When appointed by TII the Contractor can choose an alternative method to construct this shaft while adhering to the environmental limits, including Noise and Vibration, for this location.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |  |
| 32                                           | Construction | 25        | Object to plans to avoidable night-time works at both Collins Avenue Station and Griffith Park Station, specifically in the context of the proposal in Section 13.5.2.6.4 to night-time strip and clean via Griffith Park in the interests of time efficiency and ask that the Inspector add as a condition that strip and clear is carried out at a station that is situated away from residents. We note the EIAR give no traffic impact at the Griffith Park site for this strip and clean activity. All plans for will be detailed in the Construction Noise and Vibration Management Plan. | <p>All planned night-time work activities will have to be undertaken, controlled and mitigated under the detailed Construction Environmental Management Plan to maintain impacts below the agreed construction noise thresholds. Examples of mitigation measures that can be used to reduce impact are detailed within Chapter 13, section 13.6, including the use of enclosure structures for planned activities outside of the standard working hours.</p> <p>The rationale for all 24/7 working on activities such as MEP, TBM strip out and clean and track laying, is that they can be managed underground without causing disturbance at night. While activities below ground are progressed on a 24/7 basis or undertaken within an acoustically clad steel framed building enclosure at site level to mitigate potential noise levels, while site level activities such as deliveries etc will be limited to standard working hours (Chapter 5, Section 5.5.17.3 and Chapter 13, section 13.6.1.2.4 refers).</p> <p>As presented in Appendix A9.5 Scheme Traffic Management Plan Table 2-2, construction activities which occur at night-time or on weekends have only been assessed as part of the Stage 1 assessment, as they are of low potential magnitude and duration. As such, these impacts have been removed from any further assessment and deemed not to require a Stage 2 Assessment or any further mitigation measures.</p>                                                                                                                                                  |  |

|                                              |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |  |

| 33                                           | Construction | 25       | We would request that the inspector request as a condition monitoring of construction noise at Collins Ave and Griffiths Park Stations and removes all but essential night-time works from these locations as time efficiency is not an acceptable reason to justify the impact that will arise.                                                                                                                                                                                                                                                                                                                                                                                                                   | Monitoring is proposed within the Outline Construction Environmental Management Plan, Volume 5, Appendix 5.1 refers. The baseline noise study forms part of the Construction Noise Vibration Management Plan (CNVMP) to be prepared for each construction compound. Refer to Outline CEMP Table 6.2 "Noise and Vibration Measures - Topic: Method Statement ANV2 & 3".<br><br>The rationale for all 24/7 working on activities such as MEP, TBM strip out and clean and track laying, is that they can be managed underground without causing disturbance at night. While activities below ground are progressed on a 24/7 basis, site level activities such as deliveries etc will be limited to standard working hours (Chapter 5, Section 5.5.17.3 refers).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |
| 34                                           | Construction | 25       | Why is the ACP shaft a Main Construction Compound (Section 5.10) and we query the size of the compound Table 5.6, which is similar to the Station compounds.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | EIAR Chapter 5, Table 5.6 provides a summary of the proposed size of the compound at ACP of 6,000m <sup>2</sup> , with the adjacent main station compound sites of Collins Ave comprising 9,000m <sup>2</sup> and Griffiths Park 11,700m <sup>2</sup> respectively.<br><br>ACP has been designated as a main compound site because it serves a key construction component of the MetroLink, the ventilation shaft, and has been sized accordingly.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |  |
| 35                                           | Construction | 25       | Safety concerns raised (Section 5.10.4) that the planned construction route for traffic leaving the site is a U turn on the Ballymun Road, given its proximity to a primary school.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | No u-turning of MetroLink vehicles will be permitted. The planned route for construction traffic following a left turn out of the site, will be to proceed southbound on the R108 Ballymun Road keeping right and turning right onto Griffiths Avenue, keeping right again before turning right onto the R102, travelling northbound keeping left to merge onto the R108 Ballymun Road towards the M50.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |  |
| 36                                           | Construction | 25       | Section 5.10.5 refers to an additional site being required as a lorry holding area to control the flow of HGVs into the site. This site has not been identified and we are asking the Inspector to set as a condition that the residential street of Homefarm/ Walsh/ Island Roads are not used for this activity, and that waiting trucks are required to turn off engines to ensure they do not continue to cause emissions while idling.                                                                                                                                                                                                                                                                        | We confirm that Homefarm/ Walsh/ Island Roads will not be used for the purpose of providing an additional site for lorry holding at Griffith Park. The contractor will be required to plan the logistics of deliveries to site utilising the areas provided to them, mainly at Northwood, or finding additional lorry holding areas limiting impact on local traffic in accordance with the Scheme Traffic Management Plan (STMP).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |  |
| 37                                           | Construction | 26       | The schools within the area have requested separate protected entrances to their schools throughout construction Section 9.4.5 Table 9.5.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | It is not anticipated that the MetroLink works will have a direct impact on any school entrances. However, if works are required past school entrances (Utility diversion works for example) these will be scheduled in discussion with the schools to provide alternative means of safe segregated pedestrian and vehicle access as required during school opening times.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |  |
| 38                                           | Construction | 26       | Although we have fully read the Metrolink EIAR and Ballymun CBC EIAR, we cannot understand if it is intended that both projects would occur at the same time.<br><br>We suggest that it would be foolish to proceed with the CBC construction only, to then close it off again to rip it up for Metrolink, and we are appealing to the Inspector to delay the felling of trees within the Na Fianna fence (section 17.3.4.1.2) until after the construction of the station box, to prevent the loss of the carbon sink that these tall mature provide. The trees will also help in sound mitigation, will be dust limiting and will help offset CO2 emissions, so we are asking that this tree felling is delayed. | Both the proposed MetroLink and BusConnects are NTA governed schemes. Dependent upon the timing of the relevant schemes and their statutory approvals, the works will be coordinated so far as possible to ensure cumulative impacts as a consequence of concurrent activities are minimised.<br><br>The MetroLink proposals will unfortunately result in the loss of trees inside the boundary wall and within the Home Farm site that runs along the east side of Mobhi Road to facilitate construction of Griffith Park Station. It is not possible to delay the removal of these trees until after the construction of Griffith Park Station. Please refer to drawing ML1-JAI-SRD-ROUT_XX-DR-Y-02051, sheet 15 of 61 from Railway Order Plans\Drawings, Structures Drawings: Book 2 of 3 MetroLink Stations Dublin City Council.<br><br>The impacts of tree loss is considered in Chapter 15: Biodiversity section 15.8.1. Habitat Loss, with replanting proposed in the landscape design to compensate for habitat loss by providing new areas for trees. The landscape plan includes for the planting of 3,444 individual trees which will be organised in small copses, lines of trees and within woodland habitats. The planting of these new trees will compensate for the loss and will not result in significant negative residual effect on treelines at any geographic scale.<br><br>The timing for the commencement of both scheme is dependant on the timing of when each scheme will be granted their respective planning permissions. |  |

| 39                                           | Construction                                                               | 26       | We do ask though that (Section 10.3.5.1.2) Schools are not rated higher than residences who may have people present in them 24 hours a day with many people still working from home, and we would not support a decision for night-time works at this site justified on the basis of facilitating the schools, which could be temporarily relocated.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | <p>The approach to night-time works has been covered by the responses (28), (32) and (33) above.</p> <p>TII acknowledge that there is potential for significant environmental effects on the surrounding area due to the proposed MetroLink station if not mitigated effectively. However, as detailed in the relevant chapters of the EIAR, TII's assessment shows that it is possible to mitigate the potential impacts identified for all potential sensitive receptors at Collins Avenue, Albert College Park, Griffiths Park and Glasnevin during the construction period. Once the construction phase is completed and the MetroLink is operational, the location of Collins Avenue Station will provide significant positive benefits to the local community in terms of enhanced public transport provision, reduced traffic and the resultant improvements in the environment, with reduced noise and air quality pollution.</p>                                                                                                                                                                                                                                                      |
| 40                                           | Construction                                                               | 26       | Concerns raised in relation to Aspergillus and Immunocompromised residents (10.3.6.6.1) and would like this monitored closely, given that the current Pandemic has left increasing numbers of people with compromised immune systems in many cases unbeknown to themselves.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | <p>Aspergillus is ubiquitous in the environment. Every day activities such as disposing of organic waste into brown bins, composting garden waste or event grass cutting generate Aspergillus.</p> <p>As outlined in Section 16.5.2.12.1 of Chapter 16 of the EIAR, research has found that dust suppression techniques also prevent the suspension of aspergillus successfully. A competent contractor will be appointed in advance of the construction phase to prepare an Aspergillus Prevention Plan taking into account the National Guidelines for the Prevention of Nosocomial Aspergillosis (HSE 2018). This document provides a risk assessment for aspergillus and preventative dust mitigation measures and in Appendix B of the document pre-project planning and contractor advice. Survey and prevention works with respect to Aspergillus will take place before construction commences by a competent contractor in proximity to any sensitive buildings. If the pre-construction surveys indicate that Aspergillus is a risk, mitigation works will be implemented in line with the Aspergillus Prevention Plan to ensure the prevention of Aspergillus spores spreading.</p> |
| 41                                           | Proximity of the Griffith Park station to the highly sensitive Tolka river | 27       | <p>Proximity of the Griffith Park station to the highly sensitive Tolka river</p> <p>As indicated earlier, we cannot see in the EIAR evidence in relation to the decision to move the Na Fianna Station to Homefarm Football Club (HFC). We note that the EIAR states that the Hydrology is not as favourable at the new Homefarm site, and it is a more sensitive site from a heritage point of view (7.7.10.8). Indeed, it seems to imply that the station position on the Emerging Preferred Route ( EPR) was preferable to that on the Preferred Route (PR). Given the extremely close proximity of the Griffith Park Station to the River Tolka, 25 meters away, in an area that has previously flooded (section 18.4.3.4.2), we can see no technical reason for the move of station in the EIAR. It does imply in the EIAR that the reason for the move is that the impacts of the station at Na Fianna would be bigger on the Club than a station on Homefarm pitches would have on the Homefarm Club (section 7.7.2. 1). We are asking ABP to be fully satisfied that this station is in the right position from a technical point of view, in the context of the risk of flooding and the potential for significant impact should a flooding event occur.</p> | <p>As noted above, the tunnel fire safety strategy requires intervention points along the tunnel. A station positioned within the Na Fianna Site would necessitate another shaft then required before Glasnevin Station within a congested residential area.</p> <p>EIAR Chapter 18 Hydrology, section 18.3.4, makes note of the concerns raised during consultation of the potential flood risk at the proposed location of Griffiths Park Station next to the Tolka River. Section 18.4.9.4.2 makes reference to historical flooding of the Tolka River and notes that the areas that have previously flooded are outside of the study area and therefore unaffected by the proposed project.</p> <p>Information provided from the Office of Public Works and their National Flood Hazard Mapping indicates that there is no risk of flooding at this location. Please refer to Table 18.14 Summary of all Construction and Contractor Compound Sites (including bulk fuel storage areas) - Flooding Potential.</p>                                                                                                                                                                          |
| 42                                           | Proximity of the Griffith Park station to the highly sensitive Tolka river | 27       | We note the impact that this move of station is to bring the tunnels under more homes, especially in the Prospect ACA area who need to be afforded extra protections given the nature of their shallow foundations and age of their homes.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | <p>TII have assessed the impact of construction generated ground movements on the properties in the Prospect ACA and these are documented in EIAR Appendix 5.17. This includes for residential properties on St Theresa Place and along Prospect Avenue that are within the potential ground movement zone of influence. Table 5.2 specifically lists the predicted impacts on these properties. For reference, building numbers B120, B139, B140 and B141 apply. Each of those assessed falls within the Negligible damage category (see Table 4-4). The assessment undertaken is considered conservative and has taken into account the type of building and the shallow foundations noted. No additional extra protections are predicted to be required.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                |

| Submission No.                               |                                                                                                  |          | 099                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

|                                              |                                                                                                  |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | <p>A programme of environmental monitoring will be undertaken, that will include ground movement, with predetermined monitoring trigger levels set to ensure that environmental limits are not breached. TII would also note the Property Owner Protection Scheme (POPS), committed to by TII, allows residential property owners to register with TII if their residential property is within thirty (30) metres of the edge of the MetroLink alignment or fifty (50) metres of station structures. The POPS comprises condition surveys of residential properties along the route of the proposed Project. The purpose of the condition surveys is to ascertain the condition of the properties before, during (if deemed necessary), and after the completion of the proposed Project to determine whether there has been any deterioration of any of the properties surveyed and whether same may be attributable to the proposed Project, and subsequently to recommend repairs as appropriate. Condition survey data gathered pre and post construction, and possibly during construction, will be used to assist the property owner and TII in swift and accurate verification of any property damage claims which may be received from property owners. The POPS is designed to cater for / address repair work which may be necessary for any damage (attributable to the proposed Project) to a qualifying residential property up to a threshold of €45,000. The POPS will be introduced by TII through public consultation and will be formally advised to eligible property owners by the Public Relations Department.</p> <p>Further information on POPS is available in Chapter 11 (Population &amp; Land Use). Useful information can also be found in the MetroLink Frequently Asked Questions document which can be found online at: <a href="https://www.metrolink.ie/en/your-property/property-owners-protection-scheme/">https://www.metrolink.ie/en/your-property/property-owners-protection-scheme/</a> , and this is where useful updates will be made available as the proposed Project progresses.</p> |
| 43                                           | Proximity of the Griffith Park station to the highly sensitive Tolka river<br><br>and Conclusion | 27 & 29  | We also note the very large plaza in front of the Griffith Park station, right to the river's edge. Given that the Valley of the river Tolka is a conservation area, although non statutory, area (27.4.2.18), we would request that the plaza is made smaller, and we would be fearful of anti-social activities at this site. Indeed, we can see no evidence as to why the stations have such large concrete plazas throughout this project and feel all should be reduced in size. It appears designers saw space and decided to use it, rather than trying to limit the above ground impacts throughout - we again mention the car park /Maintenance area put into Albert College Park for the shaft even though the hard shoulder on Ballymun road is within 20 meters of entrance and satisfies best international standards. | <p>The risk of anti-social behaviour has been considered by the Project and is addressed by EIAR Chapter 6, MetroLink Operations and Maintenance. Section 6.6.5.8 specifically addresses how this will be managed, including how the architectural and urban realm design is designed to discourage anti-social behaviour, for example through the attractive setting, use of public lighting, open sight-lines, and avoidance of areas where individuals and groups of people can hide. CCTV will also be installed throughout the MetroLink system, including at station entrances and the public realm to provide general security and surveillance of all the public areas.</p> <p>Regards "car park / maintenance area put into Albert College Park" please refer to response (11) above.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| 44                                           | Other Considerations                                                                             | 27       | <p>We note the planned establishment of a project construction traffic Forum with representatives from key stakeholder groups, including residents. This forum must be set up with clear terms of reference with binding authority (refer Section 9.7. 1,2)- we would again feel that the role of the Independent Experts needs to be included here.</p> <p>We find it unacceptable that the contractor will be responsible for informing stakeholders of works - Section 11.6.1.2. This responsibility remains with the NTA, and residents should not have to deal with multiple contractors. In addition, we are unsure of how the CRO will work which was not clear in the EIAR.</p>                                                                                                                                             | <p>TII confirm that the forum will be set up with a clear terms of reference (ToR) and that the attending representatives will be consulted with regards these terms of reference. See response (5) in relation to the role of the Independent Engineer.</p> <p>TII do not agree that it is 'unacceptable' for the contractor to be responsible for informing stakeholders, particularly given they are managing the works day-to-day. However this does not mean that TII will abdicate responsibility, and TII will play a key role in making sure this forum operates effectively and in accordance with the agreed ToR. TII also confirm that the forum will not be dealing with multiple contractors, and that the contractor will be required to coordinate their attendance and communications with the forum.</p> <p>The purpose of the CRO as noted by the EIAR Section 11.6.1.2 is that CRO's are responsible for maintaining open, transparent and positive relationship with members of the public, local businesses, groups and organisations affected by the works. Specifically, the CRO's are not the appointed contractor but they will work closely with Transport Infrastructure Ireland and the appointed contractors to ensure that all effort to address public concerns are made, and to ensure that information on the nature and duration of all works is provided". Further information, including contact details will be provided closer to the time construction is scheduled to commence.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| 45                                           | Other Considerations                                                                             | 28       | <p>The EIAR refers to construction workers using sustainable transport to work (9.7. 1.1) - we also feel that surrounding roads may need pay and display or resident only parking- indeed Hampstead residents have already documented issues with parking for agents of the NTA in their submission.</p> <p>We would ask where these workers will live, if, as expected, many workers from abroad will be required for the Metro. We also ask as to where all these workers will be sourced, as it is likely that there will be a shortage of qualified workers available.</p>                                                                                                                                                                                                                                                      | <p>The STMP include details of the proposed Mobility Management Plan (MMP), which supports and promotes sustainable travel for construction staff and constrains the use of private cars to access work compounds. TII therefore do not envisage MetroLink impacting local existing parking arrangements or there being a requirement to change the local parking regime, but noting this is a matter for DCC rather than TII.</p> <p>The identification and sourcing of appropriately skilled workers for the construction works is outside the scope of the railway order and will be the responsibility of the appointed contractors.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

| Submission No.                               |                      |          | 099                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

| 46                                           | Other Considerations | 28       | <p>We note the request in relation to limits of deviation (Chapter 6 pg. 17) where there is a request for 15 meters laterally with station boxes, which we feel is too great and much larger than was requested or granted in Metro North.</p> <p>- Please provide justification within the EIAR for this proposal.</p> <p>- The Inspector should set tight levels of deviation.</p> <p>- The zone of influence moves accordingly.</p> <p>- A Construction limit of deviation of one meter sideways and vertically as any greater than this will impact on settlement calculations.</p> <p>- Highlight the need for Independent Experts throughout construction.</p> | <p>The design includes for a limit of deviation which is required to allow for unforeseen obstructions and construction tolerances which may necessitate a change to the alignment. In the highly unlikely event that this were to occur, any resulting environmental impacts will comply with the limits set by the enforceable Railway Order.</p> <p>Limits of deviation have been set for the proposed Project and this is addressed by Appendix A5.19, Wider Effects Report. The LODs are not 15m laterally for stations as stated, but only 2m.</p> <p>TII has carried out a comprehensive set of ground investigations in accordance with relevant guidelines and best practice. It has a high confidence that MetroLink can be constructed along the proposed alignment without requiring vertical or horizontal adjustment. However, in order to guard against rare and undetectable subterranean conditions that might interfere with construction, the Railway Order provides for limits of deviation (as have other railway authorisation since at least the 1840s). The impacts of potential changes within the Limits of Deviation are considered in the Wider Effects Report (Appendix A5.19).</p> <p>TII will employ contractors with the necessary industry recognised skills to deliver MetroLink. TII will also have an 'Expert Panel' in place that will comprise of internationally recognised experts covering the fields of expertise required to design, construct and bring in to operation a metro system. These experts will provide advice to TII and assist with providing oversight of the organisations contracted to deliver and operate MetroLink.</p> <p>Independent Industry Experts throughout the construction phase specifically to help assure that the potential impacts of construction are known, assessed, monitored and mitigated so far as is reasonably practical.</p> |
| 47                                           | Other Considerations | 28       | <p>EIAR Chapter 9 omits the shaft from its scope assessment of road transport and impacts on pedestrian and cyclists.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | <p>EIAR Chapter 9 does not omit the shaft from its scope assessment of road transport and impacts on pedestrian and cyclists. EIAR Chapter 9: Traffic and Transport includes Albert College Park within the Outline Project Description, provided in Table 9.1, with a summary of existing cycling provision provided in Table 9.60.</p> <p>The baseline conditions around Collins Ave Station (including Albert College Park) are referred to within the Overall Traffic and Transport Assessments (TTA's) and the station specific TTAs, contained in Appendix A9.2 - C (TTA - Collins Ave Station).</p> <p>Furthermore section 9.6.1 sets out the predicted impact assessment to be provided by the STMP. As detailed within sections 9.8.1.3 (Pedestrian Impact) and 9.8.1.4 (Cycling Impact) the traffic management measures adopted will seek to minimise impact and ensure quality and ease of movement through the works areas. The hierarchy of local impact mitigation is prioritising Pedestrians and Cyclists (Vulnerable Users) for protection above other road users.</p> <p>EIAR Chapter 5: MetroLink Construction Phase, Figure 5.1 Sheet 16 of 26 shows the ACP construction site located within the existing park boundary, clear of the existing Ballymun Road. Section 5.10.4 describes access to the ACP construction site. This anticipates that the southbound bus lane would be used by construction vehicles to provide a left turn in/left turn out arrangement to minimise traffic impact, with control of vehicles crossing the pavement to ensure pedestrian safety as the existing footway would remain open to pedestrians. No other works are envisaged on the R108 at this location during the main construction works. See also Response (11) regarding construction traffic.</p>                                                                                                 |

| Submission No.                               |                      |          | 099                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |  |

| Metrolink Submission Railway Order (RO) 2022 |                      |          |                                                                                                                                                                                                                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |  |
| 48                                           | Other Considerations | 28       | Glasnevin Station: The proposed station building is not in keeping with the area in either style or size and this needs to be addressed before the granting of the RO.                                                     | <p>Regarding the design of Glasnevin being out of character TII disagree and believe the commissioning of internationally renowned architect Nicholas Grimshaw and Partners, has delivered a contemporary station design which is appropriate for a state of the art metro system such as MetroLink. Appropriately, significant emphasis is placed on the public spaces. Where feasible, the station concourse is a soaring space illuminated from above with natural light. Dublin's rich architectural heritage has been respected, but not copied in a pastiche imitation. In accordance with best conservation principles, as set out in the ICOMOS Venice Charter of 1964, the stations are architecturally distinguishable so as not to falsify the existing historic context. Reference and due respect to that context is made through the choice of high quality and appropriate materials and the scale of the interventions.</p> <p>The Project will deliver a robust and authentic design with a strong metropolitan identity, unique and sympathetic to Dublin. Concepts such as singular station volumes, use of natural light, intuitive wayfinding, robust and long-lasting materials, and contextual placemaking will be followed through all stages of development and construction, combining to form the very best in architectural vision.</p> <p>The 'Materials Palette' that has also been included with the Railway Order application further confirms the 'MetroLink Design Vision Principles', including the principle of achieving a 'Sense of Place' that reflects the local area, that is appropriate to the City, and the local context / character. Further information on the MetroLink Design Principles can be found in section 4.5 of Chapter 4 (Description of MetroLink Project).</p>                                                                                                                                                                                                                                                                                                                                                                               |  |
| 49                                           | Other Considerations | 28       | Glasnevin Station: We feel this is an extremely ambitious plan involving many different organisations and construction teams, and the overall ownership of this needs to be clarified - it was not made clear in the EIAR. | <p>The design and construction of Glasnevin Station is undoubtedly complex. Both the proposed MetroLink and Dart Plus upgrades at Glasnevin Station are NTA governed schemes. Site works will commence and be undertaken under the control of a single controlling entity, with agreed staged handovers where necessary between TII and IE. This management of complex programmatic interfaces is not uncommon and is well within the skillset of the construction industry.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |
| 50                                           | Other Considerations | 28       | Glasnevin Station:<br><br>Concerns that the canal will be drained for such a long period and fear that it will not recover for years, if at all.                                                                           | <p>TII have carefully considered the potential impacts on the canal, explained below, and are satisfied that the canal will not be irreparably damaged.</p> <p>EIAR Chapter 15, Biodiversity provides details of the mitigation measures that will be implemented during construction and operation to minimise habitat loss, reduce the potential for impacts on vegetation, reduce the potential for impacts to water quality in receiving watercourses, protect groundwater quantity and quality, and to control and prevent the spread of non-native invasive plant species. As otters are listed on Annex II and Annex IV of the EU Habitats Directive they are strictly protected under the Birds and Habitats Regulations. Based on the findings of the field surveys carried out, as there were no otter breeding or resting places, holt or couch sites present within the footprint of the proposed Project boundary, there will not be any loss of holt or couch sites as a result of construction works. As otters could potentially establish new holt or couch sites within the zone of influence of the proposed Project in the future, a pre-construction check of all suitable otter habitats will be required within 12 months of any construction works commencing. The presence of any new holt/couch sites will be treated and/or protected in accordance with the Guidelines for the Treatment of Otters prior to the Construction of National Road Schemes.</p> <p>EIAR Chapter 26, Architectural Heritage details the mitigation that will be implemented where there are predicted effects on architectural heritage. A Project Conservation Architect (PCA) will be engaged to oversee the implementation of the Project. Prior to the establishment of construction compounds, the PCA will undertake Structural and Condition Surveys of any built and cultural heritage constraints that will require removal to secure storage (followed by conservation and reinstatement) or protection in-situ. The PCA will also prepare specifications for these works. A specialist Heritage Works Contractor will be appointed to remove, store and conserve these constraints.</p> |  |

| 51                                           | Other Considerations | 29       | Glasnevin Station: Note that no night-time above groundwork occurred on station boxes or shafts in the building of the Milan metro and:<br>- Are requesting this for all the stations and shafts.<br>- That the mainline rail realignments also occur by day only given their proximity to homes at the Glasnevin station.                                                                                                                                                                                                                                                                                                                     | <p>The schedule of proposed working hours at each construction compound across the project is set out on Table 5.5. At Glasnevin Station standard working hours will apply with the following exceptions:</p> <p>- 7 day working, days only: Station works during TBM stoppages; Station south end works; Critical Civils works; Architectural fit out.<br/>- 7 Day, 24 hour working: Track possessions works and blockades on GSWR and MGWR; MEP Station Works. This is proposed to enable efficiency and safety of construction activities and to minimise the overall programme impact of Irish Rail line closures/blockades.</p> <p>Please also refer to responses (28), (32) and (33) above that explains TII's proposed approach to night-time works.</p> <p>Appropriate mitigation of impacts associated with out of hours work will be taken in accordance with the EIAR to ensure the stipulated environmental threshold levels are not exceeded. Appendix A5.1 Outline CEMP denotes mitigation measures for night-time works such as advanced communication with local authorities and residents, activities with highest noise emissions will be carried out during the day time as far as practicable, acoustic enclosures will be in place</p> |  |
| 52                                           | Other Considerations | 28       | Support to Prospect Lodge ACA:<br><br>- These Victorian homes are on very shallow foundations.<br>- This area need extra attention, which is not apparent in the EIAR. In addition,<br>- The Zone of Influence needs to be extended to a wider area and to include all homes in a terrace.<br>- That this extended zone be further extended if level of deviation increases.                                                                                                                                                                                                                                                                   | <p>Please refer to response (42) above. Additionally, please note that the zone of influence is the area that may be subject to construction generated ground movements and is taken to be the area bounded by the 1mm settlement contour. It is not necessary to "extend" the zone of influence as this zone is calculated taking into account the ground conditions and the depth of tunnelling. Please refer to response item (46) in relation to limits of deviation.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |  |
| 53                                           | Conclusion           | 29       | The Fire/emergency safety issues associated with a single bore tunnel have not been addressed properly with in the EIAR.<br>- DFB have confirmed that they have had no input into the design of the project or the shaft - this has been confirmed to RINA and GADRA by TII.<br>- It is only at the very late stage of this project (just a couple of months before RO application) that Atkins were brought on as consultants in this area, and therefore rather than designing safety into the project at the design stage, it is being addressed retrospectively on an already designed project. The Atkins report is not part of the EIAR. | <p>This observation is incorrect. TII have undertaken extensive engagement with DFB as noted by responses (10) and (11), and DFB have been consulted on all aspects of fire and life safety for the MetroLink project. TII would also refer to response (10) above that explains the rationale, including reference to the EIAR, for the selection of the single bore option, noting that TII would not be proposing an option that they consider unsafe.</p> <p>TII do not accept or agree with the observation that safety is being designed retrospectively into the Project. The proposed single bore tunnel configuration, design of tunnel ventilation, station layouts and facilities, and the intervention shaft, considers the safety requirements as set out in design codes and standards. Proposed strategies, designs and safety arrangements have been shared and discussed with Dublin Fire Brigade to support and inform the development of the Preliminary Design.</p> <p>There appears to be a misunderstanding with regards the role of Atkins. DFB have employed Atkins as their technical adviser to assist them with their engagement with TII.</p>                                                                                   |  |
| 54                                           | Conclusion           | 29       | The increase in settlement from a single bore rather than twin bore has not been addressed in the EIAR and we would be requesting an appropriate increase in ZOI in relation to settlement and all monitoring and mitigants to be employed.                                                                                                                                                                                                                                                                                                                                                                                                    | <p>Settlement was considered as part of the Twin Bore vs Single Bore assessment and can be seen within the Preferred Route Preliminary Design Report 2019. The EIAR has assessed the impacts of settlement as a result of tunnelling which can be found within EIAR Volume 5 Appendix A5.17 Building Damage Report. This provides full details of the settlement methodology and assessments undertaken along the route for the single bore tunnel adopted as part of the proposed Project. The ZOI is taken account of as part of the ground movement predictions and is illustrated by the settlement contour drawings contained in Appendix C. The movement monitoring regime and any requirements for mitigations will take account of these ground movement predictions.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |  |
| 55                                           | Conclusion           | 29       | We have concerns in relation to the change of the Griffith Park Station position. Given its proximity to the high value Tolka river, the poorer hydrology at the new site, and the settlement issues being more significant for the Prospect ACA as the Victorian housing has shallower foundations. We do not feel that the EIAR has shown evidence supporting this move in the station position, nor has it fully addressed the increased mitigations required following this change.                                                                                                                                                        | <p>TII do consider the EIAR has addressed the observations raised and refer to above responses (13), (14), (41), and (42) above.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |  |

| Submission No.                               |              |          | 099                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

| 56                                           | Conclusion   | 29       | <p>We have throughout objected to the use of a public park zoned Z9 to house an Intervention Shaft and parking area and asked for this to be either changed to a station or the position of Collins Avenue Station be moved to avoid the need for this shaft in its current position. We will never have an increase in parkland within this area, so to give away a park that has been protected for hundreds of years when there are realistic viable alternatives is not good practice. RINA have confirmed that it is not common to put a shaft into a park and have not been able to give us an example of a shaft in a park on another metro as they are usually placed beside buildings.</p> <p>The EIAR does not show any evidence the TII /NTA seriously looked at any alternatives to this current option - it looks like they were reacting to the unexpected request to move the station from Na Fianna site.</p> <p>The EIAR is lacking in all aspects and all chapters in relation to the Shaft - scoped out of noise vibration traffic air quality - it looks like these baseline monitoring had been completed prior to the TII decision to put the shaft in ACP and baseline monitoring was omitted from the site. It would be remiss to proceed until all the baseline monitoring has been completed in relation Hampstead homes.</p> | <p>Please refer to responses (13, 17, 26 and 27 above), dealing with alternatives, zoning, impact assessments and baseline monitoring.</p> <p>Please refer to response (17) regards the zoning use.</p> <p>Response (12) explains TII's rationale for the proposed location of Collins Avenue Station.</p> <p>Response (11) explains the rationale for the proposed location of Albert College Park Intervention Shaft, including the reasons for the proposed land take, and the mitigation of the impacts to the playing pitches, so that all playing pitches while reorientated are retained.</p> <p>Response (13) explains the rationale for the proposed location of Griffith Park Station</p> <p>Responses (26) and (27) address the points raised in respect of the EIAR.</p> |
| 57                                           | Conclusion   | 29       | <p>We do not believe that Albert College Park with the current Z9 zoning supports the shaft location, which is adjacent to the tunnel and not integral to the tunnel and cannot in itself be considered green transport.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | <p>Please refer to response (17) above.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| 58                                           | Conclusion   | 29       | <p>The Z9 zoning does not in any way support a car park or maintenance depot in the publicly owned park. Any requirement for a hard standing area is satisfied by the existing hard shoulder on the Ballymun Road, which is within 20 meters of the shaft entrance and therefore the proposed hard standing area should not be approved in its current position</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | <p>Please refer to responses (17) and (11) above regards 'zoning' and the reason for provision of the hardstanding area within the site of the proposed intervention shaft respectively, noting that the latter complies with the zoning description of "Public Service Installation".</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| 59                                           | Conclusion   | 30       | <p>GADRA are asking that the Collins Avenue Station is moved into the park, negating the need for a shaft in the park- the decision to position this station at Our Lady of Victory Church is not supported in the EIAR. The drip feeding of information in relation to this site and decision-making process clearly indicates major issues in the decision making process.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | <p>Response (12) and (11) above explain the rationale for the proposed location of Collins Avenue Station and the intervention shaft.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

| Metrolink Submission Railway Order (RO) 2022 |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| 60                                           | Conclusion   | 30       | <p>In relation to the Shaft, GADRA are requesting:</p> <p>(1) • That ABP makes it a condition of RO that the shaft footprint is reduced, and parking for emergency vehicles is positioned outside of the park on Ballymun Road, which satisfies requirements of a hard standing area within 20 meters of entrance to shaft</p> <p>(2) • The Shaft is daytime works only and it is a dark quiet site at night</p> <p>(3) • No strip and clean at night via Griffith Park station</p> <p>(4) • No night-time works above ground on station boxes</p> <p>(5) • No mainline rail realignments work at night unless absolutely necessary, and local residents to be relocated during this work</p> <p>(6) • Zone of influence to increase in areas where homes have shallow foundations and mitigants be employed</p> <p>(7) • Role of Independent Experts to be extended into phase two -enabling works and construction and to include oversight of multi-agency construction sites - Glasnevin and Charlemont.</p> <p>(8) • Ownership of project needs to be defined legally, with clear dispute mechanism</p> <p>(9) • Clearly defined actions should the project have a protracted term, stall or be stopped completely to reinstate areas to former conditions and make them safe during delays</p> <p>[Observation bullets numbered to assist with referencing corresponding response]</p> | <p>Bullet 1 - please refer to response (11). This condition will result in a significant impairment to the functionality of the shaft and should not be imposed.</p> <p>Bullets 2, 3, 4 and 5 - please refer to responses (28), (32) and (33). This condition will compromise the deliverability of the project without reducing the impacts of the construction on night time noise, as this noise will be mitigated to levels consistent with the amenity of residential area.</p> <p>Bullet 6 - please refer to response (54). This condition would be unworkable as it is based on a misunderstanding of the Zone of Influence concept.</p> <p>Bullet 7 - please refer to response (2). TII does not consider that this condition is necessary and the measures proposed in the EIAR provide for best practice community engagement during the construction phase.</p> <p>Bullet 8 - The ownership of the project is outside the scope of the railway order process. ABP's role is to satisfy itself that the Railway Order and conditions provide for a project that will be consistent with proper planning and sustainable development and with acceptable environmental impacts regardless of who owns it.</p> <p>Bullet 9 - please refer to response (9). TII have no difficulty with a condition requiring appropriate measures to be particularised before the TBM commences operation and adhered in the very unlikely event that the project stalls. It is not appropriate to require reinstatement due to delays. TII note that the draft RO requires further consent from ABP in the event that the construction period exceeds 10 years.</p> |

| Re: Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022 Case Reference Number NA29N. 314724 |                     |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| 1                                                                                                               | Letter introduction | 1        | Firstly, in general, I am in favour of the broad aim of the Metrolink project to connect Dublin's city centre to our national airport. However, as a resident living in the Dartmouth/Charlemont area, I wish to set out several observations for the Board regarding the proposal to locate the Terminus station at Charlemont-Dartmouth.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | Thank you for taking the time to make a submission and your overall endorsement of the MetroLink Project generally. We have reviewed your submission and responded to the observations made below.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| 2                                                                                                               | Letter introduction | 1        | Both my home and my mother's home backs directly onto where the Terminus station is proposed to be located. Our homes on the western side of Dartmouth Square are covered by zoning Objective Z2 To protect and/or improve the amenities of residential conservation areas; the lands to the rear are covered by zoning Objective Z1 To protect, provide, and improve residential amenities. Currently, there is controlled parking on either side of Dartmouth Square West. Dartmouth Square is also covered by the Dartmouth Square ACA.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | <p>The zoning under the Dublin City Development Plan 2022 - 2027 for the residential properties in question is "Z2 Residential Neighbourhoods (Conservation Areas)" with an objective to "protect them from unsuitable new developments or works that would have a negative impact on the amenity or architectural quality of the area (See Table 3.11 of the Planning Report). As outlined in Section 4.5.18.6 of the Planning Report the element of the project within the Z2 zoning area will affect a below ground area only and as such will not compromise the land use objective for the lands overhead. The majority of the proposed Station and all above ground elements are located within the lands zoned Z6 with the objective "To provide for the creation and protection of enterprise and facilitate opportunities for employment creation". The station has been designed so that it is integrated with the proposed redevelopment of this site by a third party development, and as such, demonstrates that the proposed Project is consistent with the zoning objective.</p> <p>Metrolink will not impact the controlled parking on either side of Dartmouth Square West.</p> <p>TII recognise the importance of Dartmouth Square and its designated status as an Architectural Conservation Area (ACA). Mitigation measures for Architectural Heritage can be found in Table 26.66 of EIAR chapter 26 (Architectural Heritage). The only potential for direct impacts on the Architectural Heritage Areas (ACA) is related to the diversion of utilities on Dartmouth Square West. To minimise the impact on protected structures in Dartmouth Square such as historic granite steps, kerbing and lamp standards, works within the Dartmouth Square ACA will be overseen by the Project Conservation Architect (PCA) and carried out in accordance with a method statement prepared by PCA. The impact on Architectural Heritage in Dartmouth Square has been assessed to decrease to slight following mitigation.</p> <p>Additionally, Dublin City Development Plan 2022-2028 supports the Metrolink station at Charlemont in policy SMT22.</p> |
| 3                                                                                                               | Letter introduction | 2        | <p>The proposed link between St. Stephens Green and Charlemont cannot be justified in planning terms. Furthermore, it undermines the business case for the entire project and this 'Terminus at Charlemont' element should effectively be refused for the MANY reasons we outline below including:</p> <p>Construction Impacts</p> <ul style="list-style-type: none"><li>- Noise and Vibration</li><li>- Settlement &amp; Subsidence</li><li>- Hydrogeology</li><li>- Phasing &amp; Programme</li><li>- Hours of Operation</li><li>- Construction Compound</li><li>- Traffic and Transport</li><li>- Impact on Utilities</li><li>- Human Health</li><li>- Interactions of Effects</li></ul> <p>Operational Impacts</p> <ul style="list-style-type: none"><li>- Noise and Vibration</li><li>- Hours of Operation</li><li>- Traffic and Transport</li><li>- Impact upon Amenities</li></ul> <p>Conservation area property issues and wider residential community losses</p> <ul style="list-style-type: none"><li>- Compulsory Purchase Order</li><li>- Rear Lane</li><li>- Properties</li><li>- Devaluation of Properties</li><li>- Temporary Relocation</li><li>- Required Purchase at Market Value</li><li>- Costs</li></ul> | TII have reviewed your submission and responded to each of the observations raised in connection with these items listed.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| Re: Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022 Case Reference Number NA29N. 314724 |              |          |                                                                                                                                                                                                                                                                                                                                                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| 4                                                                                                               | Point 1      | 3        | 1. Charlemont is the incorrect strategic location for a Terminus hub and spoke system as it is too far out along the Luas Green Line spoke and would prejudice future options for integration of networks and services. St. Stephens Green is the most appropriate location as it provides for interchange with bus, Luas, and future DART underground. | <p>TII do not agree that Charlemont is the incorrect location for an interchange with the Luas Green Line or that it prejudices future options for integration with the wider transport network for the reasons set out below.</p> <p>The Board is required to have regard to the likely consequences for proper planning and sustainable development in the area in which it is proposed to carry out railway works (section 43(1) of the 2001 Act) and as such the following matters are relevant.</p> <p>The connection from St Stephens Green to Charlemont / Ranelagh is supported by the current Transport Strategy for Greater Dublin Area (2022-2042). The Transport Strategies were prepared by the National Transport Authority, scrutinised by the Joint Oireachtas Committee on Transport and approved by the Minister for Transport. It notes in section 12.3.2, "Charlemont offers the optimal location for the primary interchange with the Green Line in response to growing demand in the longer term and is an appropriate location to facilitate any potential future metro extensions to serve the south west, south or south east of the city region should sufficient demand arise."</p> <p>The Transport Strategy is "a consideration material to the proper planning and sustainable development of the area or areas in question." Development Plans are required to be consistent with the Transport Strategy. The Dublin City Development Plan 2022-2028 envisages this station at Charlemont in policy SMT22 "To support the expeditious delivery of key sustainable transport projects so as to provide an integrated public transport network with efficient interchange between transport modes, serving the existing and future needs of the city and region and to support the integration of existing public transport infrastructure with other transport modes. In particular the following projects subject to environmental requirements and appropriate planning consents being obtained: ... MetroLink from Charlemont to Swords".</p> <p>Accordingly, the location of the Charlemont station was a strategic decision made at the highest levels of transport and land use planning and such is fully consistent with the proper planning and sustainable development of the area.</p> <p>The current Transport Strategy considers a range of options for the onward extension of MetroLink to meet the demand for travel over the period of the strategy. This includes consideration of the need for the upgrade of the Luas Green Line to metro with a metro extension to Dublin south west, south or south east. Whilst the strategy envisages that further extensions will be delivered after 2042, MetroLink which terminates at Charlemont allows for the possible extension of the metro in all any of the above directions.</p> <p>The proximity of the Metro to the Luas line at Charlemont provides for a positive customer experience for all users with short interchange distance and due to the proximity, clear wayfinding and high visibility of the interchange. The interchange arrangements at Charlemont provide for significantly better interchange arrangements compared to an alternative interchange at St Stephen's Green Station. Passengers wishing to interchange between Luas and metro at an alternative St Stephen's Green terminus would face a 500m-walk along a route either through St Stephen's Green park or along the footpath north of the park, which adds significantly to the time for interchange and therefore the overall journey time for passengers and a less positive customer experience for all interchange users. This passenger experience would be reduced further for those with mobility or visual impairments as well as those travelling to/from the airport with luggage.</p> <p>The detailed analysis done for the Railway Order application further confirms that the section of MetroLink route between St Stephen's Green and Charlemont Stations contributes significantly to the overall benefits of the scheme. It serves a significant area of the south city of Dublin and offers enhanced access from the local area to the city centre and a direct connection to Dublin Airport. It serves key trip attractors including residential areas and offices / workplace locations, with high passenger boarding and alighting figures in the peak hours. During the morning peak, at Charlemont station the flows include 1,800 passengers alighting, 2,300 boarding and 1,229 passengers alighting, 2,276 boarding during the evening peak. The passenger numbers contribute significantly to the overall benefits of the scheme and the effect of these benefits outweigh the additional costs that are associated with the delivery and operation of the section from St Stephen's Green to Charlemont station. Further information is available in Chapter 7: Consideration of the Alternatives, section 7.7.8 MetroLink Southern Terminus Location.</p> <p>The location of the interchange at Charlemont does not preclude onward extension south. An interchange at Charlemont is supported by policy including the Dublin City Development Plan 2022 - 2028 and the Transport Strategy for the Greater Dublin Area.</p> <p>By extending MetroLink to Charlemont it provides for future proofing of the Green Line, bypassing the capacity constrained Luas on-street running section, and ensures potential future connectivity options are enabled, either to the Green Line or for extensions of the metro.</p> <p>The Charlemont Station interchange provides for increased passenger utilisation of the MetroLink system, thereby increasing the benefits delivered by the Project, reflected by an improved Project Benefit Cost Ration (BCR).</p> |

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| Re: Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022 Case Reference Number NA29N. 314724 |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| 5                                                                                                               | Point 1      | 3        | <p>The project incorrectly dismisses St. Stephens Green West as an appropriate terminal station. It only considers St. Stephens Green East and Charlemont. Furthermore, no Study has been completed by NTA/TII as part of the entire Metrolink project on the optimal location for a city centre terminus.</p>                                                                                                                                                           | <p>TII do not agree that St Stephen's Green is the most appropriate interchange location for the reasons set out by response (4) above.</p> <p>It is not correct to say that the Project "only considers St. Stephens Green East and Charlemont." A number of route options were considered in the process of identifying the Emerging Preferred Route (EPR). These route options included potential station locations on St. Stephen's Green West. St. Stephen's Green West was ruled out as the alignment between the proposed Tara Station and a station on St Stephen's Green West would result in an undesirable horizontal reverse curve and an alignment greater than a 1000m long that would necessitate an intermediate intervention shaft located somewhere between these stations to comply with the MetroLink Fire Strategy. Further, as a potential station location, St Stephen's Green West itself is a very constrained location due to the presence of buildings, Luas and St Stephen's Green Park. Maintaining the Luas operational during station construction would be complex and challenging with significant disruption expected, whilst the impacts on St Stephen's Green Park would be greater for a station in this location compared to the proposed location on St Stephen's Green East. This would be the result of; the likely need to place more of the station in the Park compared to the proposed station on St Stephen's Green East; it would impact an area of the Park that has greater amenity value than St Stephen's Green East due to the nearby Park entrance adjacent to the southern end of Grafton Street, and there would be a risk of impacting the existing Park lake. In summary, an alignment that links the proposed Tara, St Stephen's Green East and Charlemont stations is a more direct and economic alignment, does not require additional intervention infrastructure, avoids a complex engineering interface with the Luas Green Line, impacts the Park less and has less potential for disruption during the construction phase. As outlined by EIAR Chapter 3, Background to the MetroLink Project, one of the key objectives of the Project is the integration of it with the wider transport network that also includes for BusConnects and DART+ which are all included under Project Ireland 2040. Together, these projects will result in a reliable, sustainable, affordable, integrated public transport network that will support the economy, help Ireland meet its climate change targets in line with Climate Action Plan 2023 and make Dublin a more liveable and sustainable city.</p> <p>It is being argued that Charlemont station effectively becomes a terminus station in the short to medium term. In this regard, it is true to say that the Metrolink trains will terminate and turn back at Charlemont station, However, Charlemont Station does not have the associated infrastructure and services associated with a terminus location and in fact has more in common with a "system turn back location". Charlemont Station is located within an area of high public transport accessibility, linking with the Luas Green Line which offers reasonably similar levels of services and frequency for journeys to and from the south of Dublin. As such, public transport service offering is not considered to terminate, but transfers onto the similar service offered by the Luas Green Line, forming part of a transport corridor running from Cherrywood to Estuary. The associated environmental impacts for the turnback and station at Charlemont have been fully assessed in the EIAR. Additionally, there is a strong level of interchange offered throughout the corridor at locations such as Glasnevin, O'Connell Street, Tara Street and St Stephen's Green, where many journeys on the MetroLink will 'terminate'.</p> <p>The terminus station for MetroLink is located at Estuary where all of the activities normally associated with a terminus take place.</p> <p>Charlemont station itself was chosen on the basis of its interchange potential with Luas, as well as local bus services, as outlined above. The section of the line between St Stephen's Green and Charlemont generates considerable benefits for the scheme in terms of increased patronage. Operationally, the Station will see people moving quickly in and out of the area, noting that it will act as an interchange, and has been deliberately designed with minimum set down space or room for taxis so that it does not encourage the Station to be used as a terminus. All operational environmental impacts are mitigated so they are not significant, while the impact on amenity will be permanent and positive.</p> <p>The proposed route alignment from Estuary to Charlemont is consistent and compliant with the GDA Transport Strategy 2022-2042 (published in January 2023) in which states that the south city terminus at Charlemont offers the optimal location for interchange with the Green Line in response to growing demand in the longer term and is an appropriate location to facilitate any potential future metro extensions to serve the south west, south or south east of the city region should sufficient demand arise.</p> |
| 6                                                                                                               | Point 2      | 3        | <p>2. Expensive Duplication of Rail infrastructure - The inclusion of an expensive and costly section between St. Stephens Green and Charlemont is strategically weak and duplicates the existing Luas Green Line services. NTA's cost estimate for this 1km section at C650M is an expensive duplication and significant investment that deprives other parts of Dublin that are in immediate need of rail infrastructure to support housing and urban development.</p> | <p>The Board is not responsible for any decisions in relation to the funding the Project. It is solely responsible for assessing whether the Project is consistent with proper planning and sustainable development and that its effects on the environment are acceptable.</p> <p>The responsibility for funding the Project lies with the NTA, the Government and ultimately the Oireachtas. It has received all necessary approvals, including under the Public Spending Code for the making of a Railway Order. It will undergo further scrutiny and approvals, including under the Public Spending Code, before it is funded. It is not appropriate for the Board to make findings in relation to value-for-money that are outside its statutory functions and would cut across those arrangements. Members of the public are entitled to make representations to their TDs in relation to the value-for-money of any element of the Project.</p> <p>In any case, TII do not agree with this statement for the reasons set out by response (4) above, noting that infrastructure is not being duplicated given the capacity of the Luas south from St. Stephen's Green is restricted due to on-street running.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

| Re: Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022 Case Reference Number NA29N. 314724 |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
|                                                                                                                 |              |          | Response (6) continued.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | <p>There is a limit to the potential of the Luas to provide additional capacity in the on-street non-segregated section of the Luas Green Line from Charlemont northwards through the city centre. The nature of this route and the fact that it currently crosses several road junctions (Adelaide Road, Harcourt Street / Hatch Street upper and Harcourt Street / St Stephen's Green south) limit the service to a maximum of 24 trams per hour per direction. The projected demand for this section would require a higher frequency of up to 30 trams per hour and this demand cannot be met with on-street systems (Luas / bus). The interchange between Luas and MetroLink proposed at Charlemont will provide the necessary capacity to address the demand on this corridor and reduce overall travel time for passengers.</p> <p>There is also high passenger demand forecast for a Metrolink station at Charlemont, including from the Ranelagh area, which would be lost if St. Stephen's Green was the MetroLink southern interchange station. The additional fare revenues collected by the Charlemont Station interchange increase the benefits delivered by the Project, reflected by an improved Project Benefit Cost Ration (BCR).</p> <p>Further, to ensure that public investment delivers value for money, the Public Spending Code sets out requirements for the evaluation, planning and management of public investment. The preparation of a Business Case is a key element of meeting these requirements. The Public Spending Code requires that both the Preliminary Business Case and Final Business Case for public investment projects are published.</p> <p>In July 2022, the Government granted Approval in Principle to the NTA to enable the submission of a railway order application by TII to An Bord Pleanála in respect of the MetroLink project (Decision Gate 1). This approval was granted after the Preliminary Business Case (PBC) had undergone significant scrutiny and challenge by bodies that are independent of TII, including DoT and DPER review (including independent review by JASPERS and the Major Projects Advisory Group (MPAG)) of the PBC around timeline, costs and benefits that were updated to inform the Government decision.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| 7                                                                                                               | Point 3      | 3        | 3. The station box at Charlemont, as constructed in 2021/22 by the Developer Hines, does not have the benefit of planning permission and has not been part of the EIA undertaken for this project. Processing the current Railway Order application, which is reliant on these preliminary and now constructed works, is legally unsafe and contravenes the provisions of the EIA Directive.                                                                                                                                                                                                                                                                  | The MetroLink enabling works constructed as part of the Hines development was included in the planning application for the Hines Development and has the benefit of planning permission which was granted in April 2019.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| 8                                                                                                               | Point 4      | 3        | <p>4. The station box at Charlemont will result in only one possible future tie in with the Luas Green Line to the south, which would result in an option that was previously dismissed as part of the Tie- In study from March 2017. No alternatives to the station box at Charlemont were considered as it had been fixed through the design of the overhead Hines Grand Parade commercial development.</p> <p>The implication of this new alignment is very significant on our wider community as it will involve top-down construction that will only be possible when many houses on Manders Terrace, Oakley Road and Charleston Road are demolished</p> | <p>The station box at Charlemont allows for a future tie into the Luas Green Line should it be determined in the future that through running metro services to Sandyford is the required solution to address the public transport needs to the south of the city. It is incorrect to say that the current proposal is based on an option that was previously dismissed as part of the March 2017 Green Line tie in study. The station design is in affect a modification to the preferred Green Line Tie Option 4B which was modified as result of the postponement of the upgrade of the Green Line to metro standard.</p> <p>The station box location was not fixed by the Charlemont Development. The preferred route for MetroLink was published in March 2019 following a comprehensive route options study. The preferred route was based on the emerging preferred route for the scheme which included a station at Charlemont. The Charlemont Metro Enabling Works were constructed to enable the Charlemont Development to proceed whilst simultaneously ensuring there was an option available to construct a station at Charlemont that avoided unnecessary demolition, took advantage of an available site, provided infrastructure that is integrated with planned development rather than necessitating later changes and retrospective adjustments to a new development or even possible demolition of the new development, whilst providing protected provision for the future extension of the scheme south, if required.</p> <p>It is also important to recognise that the station location at Charlemont is influenced by available vacant land and thus avoids unnecessary demolition.</p> <p>The submission seeks to portray the construction of the Metro Enabling Works as prejudicial to future decisions on proper planning and sustainable development of the area. It implies that the counterfactual would have had no effect on such decisions. That is not the case. There was a planning conflict between the EPR and the Grand Parade Development at the time the latter development was proposed. There was no resolution to that conflict that was free of implications for future decisions on the proper planning and sustainable development of the area. The Board could have refused permission for the Grand Parade Development, inevitably creating a underutilised and potentially vacant and idle site in a commercial hub location. The Board could have granted permission with no provision to facilitate a station at this location, resulting in a requirement for the railway order to provide for the demolition of a new office building. The Board's actual decision was reasonable and lawful in seeking to minimise the prejudice to an important office development and a critical piece of national infrastructure. It was also not particularly restrictive of future decisions in relation to the proper planning and sustainable development of the area. Of the three options open at the date of the Grand Parade planning application, two remain open: the Board can still require changes to the station design that require the demolition of the commercial building and it can grant an order that avoids demolition by using the Metro Enabling Works.</p> |

|                                                                                                                 |              |          |                                                                                                                                                                                                                                                                                                                                                                                                 | <p>It is agreed that the short-term implications for local residents will be significant as the scheme progresses through the construction stage, however the EIAR assesses the environmental impacts of the construction phase and commits to the implementation of appropriate mitigation measures that reduce the environmental impacts to not significant. The same is true of the operations phase for the project. TII will work closely with local residents to ensure the required mitigation measures are put in place.</p> <p>If in the future, the metro was extended south, this does not mean that inevitably open cut construction will be required or demolition of property will be necessary. In designing an extension, the promoter will seek to reduce the requirement for demolition by looking for tunnel launch sites at the southern extent of the scheme and, if one can be identified, driving the Tunnel Boring Machine northwards ultimately connecting into the existing tunnel. In that case, even if the new alignment were under the properties identified in the submission, the tunnel underneath them would be constructed by the Tunnel Boring Machine without the need for above ground works.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| 9                                                                                                               | Point 5      | 3        | 5. The Environmental Impact Assessment is wholly inadequate in relation the description of development, alternatives, transport assessment, noise, and the cumulative effects of the development on the Charlemont-Dartmouth Community. For a project of this size, scale, investment to date, it is inadequate to propose a Railway Order with so many important studies and analysis missing. | <p>TII do not agree that the Environmental Impact Assessment is inadequate. The Railway Order application comprises a very detailed environmental impact assessment that has identified and assessed the potential environmental impacts of MetroLink and proposed mitigations for these impacts where necessary. TII would also draw attention to the detailed project description, construction phase description and operational phase description provided in EIAR Chapters 4 and 5 and 6, and EIAR Chapter 7 and associated appendices that present details of alternatives considered. EIAR Chapter 9 and appendices provides a detailed analysis of transport and traffic effects, and EIAR Chapters 13 Airborne Noise &amp; Vibration, and 14 Groundborne Noise &amp; Vibration provide a detailed assessment of potential noise and vibration effects, while Chapter 29 outlines the assessment of interactions between various environmental aspects, and Chapter 30 covers the cumulative impacts with other projects. This assessment is carried out for the full length of the alignment including relative to potential significant effects on the Charlemont-Dartmouth Community.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| 10                                                                                                              | Point 6      | 4        | 6. The development would result in noise and disturbance during the construction and operational phases and would result in a loss of amenities for the area.                                                                                                                                                                                                                                   | <p>The EIAR presents a comprehensive and detailed assessment of both groundborne and airborne noise and vibration in Chapter 13 and 14 of the EIAR. The assessments include for predictive modelling in order to identify the potential impacts on all sensitive receptors during both the construction phase and the operational phase.</p> <p>Noise and disturbance during construction:<br/>No profound impacts have been identified for residents and mitigation measures proposed will be effective at reducing the impacts on these properties and in general terms impacts will be associated with the construction phase only. Significant mitigation is proposed to include 4m high noise barriers and further proposed mitigation in line with the Airborne and Groundborne Noise Mitigation Policy. On the implementation of these measures the residual impacts are predicted to be moderate. However, as outlined in Transport Infrastructure Ireland (TII) Airborne and Groundborne Noise Mitigation Policy (Appendix A14.6) there is a process in place whereby further mitigation measures can be implemented at individual properties should this be merited.</p> <p>Noise and disturbance during operation:<br/>No residual noise impacts are identified at this location during operation. The calculated rail noise levels across the proposed Project are not significant in terms of any widespread community disturbance and results in a not significant to slight impact when added to the prevailing noise environment.</p> <p>Loss of amenity during construction:<br/>EIAR Chapter 11, Population &amp; Land Use provides an assessment of effects on community amenity during construction and operation, which relates to the interaction of impacts on air quality; visual amenity; traffic and transport; and noise and vibration.</p> <p>At this location during construction as outlined in Section 11.5.2 of Chapter 11, no impacts are identified on the retail sector or community and social infrastructure (e.g. schools or hospitals). Any severance/disruption to transport will be limited by site mitigation measures such as alternative routes reducing impacts to not significant.</p> |

| Re: Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022 Case Reference Number NA29N. 314724 |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
|                                                                                                                 |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | <p>Loss of amenity during operation:</p> <p>No significant residual negative impacts are anticipated on the Population and Land Use from the operation of the proposed Project, following the incorporation of the mitigation measures into the design of the proposed Project and implementation on an ongoing basis throughout the lifecycle. The residual effects that will arise during operation will be permanent and positive as detailed in EIAR Chapter 11, section 11.1.1.</p> <p>The zoning under the Dublin City Development Plan 2022 - 2027 for the residential properties in question is "Z2 Residential Neighbourhoods (Conservation Areas)" with an objective to "protect them from unsuitable new developments or works that would have a negative impact on the amenity or architectural quality of the area (See Table 3.11 of the submitted Planning Report). As outlined in Section 4.5.18.6 of the Planning Report, the element of the Project within the Z2 zoning area will affect a below ground area only and as such will not compromise the land use objective for the lands overhead. The majority of the proposed Charlemont Station and all above ground elements are located within the lands zoned Z6 with the objective "To provide for the creation and protection of enterprise and facilitate opportunities for employment creation". The Station has been designed so that it is integrated with the proposed redevelopment of this site by a third party development, and as such, demonstrates that the proposed Project is consistent with the zoning objective. The MetroLink station design does not result in any segregation of the area, with no surface barriers or walls proposed.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| 11                                                                                                              | Point 6      | 4        | <p>The Traffic Study for the local Charlemont area is wholly inadequate as it omitted the modelling of the impact of Airport users coming to the only Dublin South Metrolink station at Charlemont. The Traffic Study uses a strategic, generalised regional model that does not take local factors into account.</p> <p>Extract from observation 7) below - The EIA did not properly assess the impact of additional local traffic volumes, rather they used a generalised regional model that does not take local factors into account.</p> <p>A key local factor at a Terminus station in Charlemont that runs to the Airport is the huge volume of anticipated airport users from Dublin South and greater Dublin/Leinster that will come to Charlemont via car or taxi with baggage for onward destination to the airport. Grand Parade and the residential area around Charlemont-Dartmouth cannot sustain the significant additional traffic volumes associated with this development</p> | <p>The MetroLink forms part of an integrated public transport network. The system is designed in an integrated manner so that people travelling from the area south of Dublin to access locations north of Charlemont, such as Dublin Airport, Mater, Swords etc. will utilise public transport to interchange with the MetroLink, or will walk or cycle to access their local station. The system is not designed to encourage people to drive to stations within the City and TII actively discourage people from doing so other than the Park &amp; Ride station at Estuary. TII therefore do not agree with the observation that there will be a "huge volume of anticipated airport users from Dublin South and greater Dublin/Leinster that will come to Charlemont via car or taxi with luggage for onward destination to the airport" as this is not borne out by our transport analysis.</p> <p>The Transport Assessment for MetroLink includes for people travelling to/from Dublin Airport from all areas within the extents of the GDA area, therefore it is incorrect to say "The Traffic Study for the local Charlemont area is wholly inadequate as it omitted the modelling of the impact of Airport users coming to the only Dublin South Metrolink station at Charlemont".</p> <p>The NTA's Eastern regional Model (ERM) incorporates a wide range of data sources, including demographic data, land use data, transportation network data, and travel survey data. The system is designed to model a variety of transportation modes, including private vehicles, public transit, walking, and cycling, and to simulate the interactions between these modes. The ERM model has been validated and calibrated using a range of localised data sources to ensure that the model can accurately represent the transport network, these include public transport and vehicle counts from the canal cordon counts. The outputs from the model have been combined with local survey data to undertake the more localised modelling, such as the pedestrian impact assessments, or the local traffic signals. This does not support the observations made "The Traffic Study uses a strategic, generalised regional model that does not take local factors into account." or "The EIA did not properly assess the impact of additional local traffic volumes, rather they used a generalised regional model that does not take local factors into account."</p> <p>Regards the observation there will be a "huge volume of anticipated airport users from Dublin South and greater Dublin/Leinster that will come to Charlemont via car or taxi with luggage for onward destination to the airport. Grand Parade and the residential area around Charlemont-Dartmouth cannot sustain the significant additional traffic volumes associated with this development", this is covered by response (12) below.</p> |

| Submission No.                                                                                                  |              |          | 100                                                                                                                                                                                                                                                                                                                                                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| 12                                                                                                              | Point 7      | 4        | <p>7. The development would have an adverse impact upon traffic during the construction and operational phase, and it has not been properly designed and there is poor integration with other modes of transport.</p> <p>Pedestrian movements in and around the station would be difficult. Grand parade is an already heavily congested orbital route.</p> | <p>MetroLink is designed to form part of an integrated public transport network with Charlemont selected as the preferred interchange location in order to maximise the potential interchange with the existing Luas Green Line. In overall terms, Charlemont Station will provide for improvements to the public transport network resulting in decreases in private car usage/trips, increases in public transport usages and will facilitate walking and cycling to the station, without significantly impacting on the operation of the road network in the area.</p> <p>Construction Phase:</p> <p>EIAR Appendix A9.5 Scheme Traffic Management Plan presents the analysis undertaken to assess the impact of the traffic management measures on the local road network surrounding the proposed Charlemont Station during the construction phase. At the local level the following parameters have been used to assess impacts on general traffic and on pedestrians:</p> <ul style="list-style-type: none"><li>• Increase in walking distance/quality of service for pedestrians (through removal of footpath, reduction of quality of service, removal of a pedestrian crossing or relocation of crossing by more than 100m);</li><li>• Increase in driver delays at junctions;</li><li>• Changes in traffic flows on surrounding streets; and,</li><li>• Additional distance travelled due to diversions.</li></ul> <p>The analysis undertaken at this location indicates that the increased volume of traffic on Grand Parade and Northbrook Road does not translate into any significant increase in driver delay. The largest increase in driver delay of 12 seconds is registered on the westbound approach on Grand Parade to the Ranelagh Road signalised junction.</p> <p>During the construction phase, pedestrians will experience a reduction in quality of pedestrian infrastructure and space. The construction site boundary will encroach upon footways in the local area, including the northern side of Dartmouth Road, and the southern side of Grand Parade. However, a temporary signalised crossing will be provided west of the Luas to maintain pedestrian access to and from the Stop. Whilst there are partial closures on Dartmouth Road and Grand Parade, pedestrian movements will be maintained on appropriately sized footways through the area.</p> <p>Operational Phase:</p> <p>A microsimulation VisWalk model has been developed for the immediate area surrounding Charlemont Station during the operational phase. The model covers the full extent of the publicly accessible station area, including the immediate vicinity of the station entrance at street level, the Luas stop and nearby junctions at Charlemont Bridge. In order to accommodate the forecast demand from the proposed Charlemont Station, a new staircase with 2.4m stair width is proposed at the south east corner of Charlemont Luas stop. An elevator will also be provided at this location. Both are sized for MetroLink to Luas, and Luas to MetroLink passenger numbers. Please refer to Chapter 9: Traffic &amp; Transport, Appendix A9.2-B Traffic and Transport Assessment Charlemont Station, section 6.1.3. Pedestrian Impact Assessment.</p> <p>In addition, it is proposed that the pedestrian crossing on R111 Grand Parade will be repositioned to the front of the building being developed by Hines. With this infrastructure in place, the model indicates that the R111 Grand Parade will have an acceptable level of service overall, with some reductions in service seen at the pedestrian crossing where pedestrians are required to wait for a green phase at the signals. Overall, it is considered that the model displays an acceptable level of network performance.</p> <p>The proposed pedestrian crossing on Grand Parade will have minimal impact on the traffic flow along Grand Parade and can be programmed to operate in sync with the existing signalised junction at Grand Parade /Charlemont Street to maintain the flow of traffic movements. When the Project is operational, car mode share will decrease, with a reduction of up to approximately 830 car tips to and from the zones surrounding Charlemont Station over the 12hr period in 2065. In overall terms, the Charlemont Station will provide for improvements to the public transport network resulting in decreases in private car usage/trips, increases in public transport usages and will facilitate walking and cycling to the station, without significantly impacting on the operation of the road network in the area.</p> <p>Furthermore, TII have deliberately designed the Station with minimum set down space (with the exception of a drop-off on Grand Parade for persons of restricted mobility only) or room for taxi ranks so that it does not encourage the Station to be used for a significant volume of car or taxi trips.</p> |

| Re: Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022 Case Reference Number NA29N. 314724 |                                     |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| 13                                                                                                              | Point 8                             | 4        | 8. The development will have an adverse impact upon property values, particularly during the construction phase. For many houses in the area there will be a long-term and permanent adverse impact upon property values from noise of the operating rail infrastructure, vents, Tanoy systems, escalators, and large traffic volumes - vehicular and pedestrian using the station 19 hours per day. The adverse impact also extends to the loss of amenity for the wider community changing a quiet residential neighbourhood into a noisy, busy, congested major transport hub.                                                                                                                                                                                                                                                                                                                                                                                       | <p>Response (10) above outlines the predicted environmental impacts with regards to noise and vibration, and amenity, while responses (9) and (10) summarise the assessed traffic and pedestrian impacts. TII would note that as explained by response (10) above that in overall terms Charlemont Station will provide for improvements to the public transport network resulting in decreases in private car usage/trips.</p> <p>TII do not agree that the development will have a long term and permanent negative affect. In fact there is evidence to suggest that property values will in fact increase in close proximity to public transport infrastructure and that local residents will greatly benefit from having a world class metro system providing access to the city centre, airport and north city at their door step. The benefits of the project for all communities along the MetroLink route are described in Chapter 3: Background to the MetroLink Project, section 3.4 MetroLink Response to Challenges.</p>                                                                                                                                                                                                                                                                                                                         |
| 14                                                                                                              | Re: this Railway Order as it stands | 4        | <ul style="list-style-type: none"><li>■ We are seeking the removal of the Tara Street to Charlemont section of the rail order.</li><li>■ Specifically the Charlemont station should not form part of the rail order as it will severely and demonstrably adversely affect the residential amenities of the Dartmouth Square residents both during the construction phase and the operational phase.</li></ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | <p>The above responses to the observations made explain why TII do not consider it is correct or appropriate that the MetroLink alignment south of the proposed Tara Station should be omitted, and also demonstrates why the proposed Charlemont Station has been selected by TII as the preferred interchange with the Luas Green Line.</p> <p>TII have also addressed the concerns raised with regards to the impact on residential amenities during both the construction and operational phase and explained how these will be managed so that no significant impacts are experienced.</p> <p>A scheme which terminates at Tara Street would not be consistent with the Transport Strategy for Greater Dublin Area (2022-2042). In addition any decision to terminate the scheme at Tara will significantly impact on the overall viability and benefits of scheme.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 15                                                                                                              | Re: this Railway Order as it stands | 4        | <ul style="list-style-type: none"><li>■The deep construction required immediately adjacent to residential houses is wholly inappropriate and will result in a very severe loss of amenity and devaluation of property.</li></ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | <p>It is not uncommon for deep excavations to occur during construction works in urban areas. The excavation will be secured by hoardings for safety and to mitigate noise.</p> <p>As noted by responses (16) to (23) below, TII have assessed the impact of the excavation on your property.</p> <p>TII would also like to assure you that at no time will the safety of this property and its occupants be placed at risk, noting that the construction of the station will be monitored, including surrounding ground and building movements, with predetermined trigger levels aligned with action plans to ensure movements do not exceed acceptable levels. This will be further supported by a vast suite of mitigation measures implemented at the site (as outlined in the Construction Environmental Management Plan (CEMP) in Appendix A5.1 of the EIAR to minimise all other impacts on residents.</p> <p>Responses (10) and (13) above explain that no significant loss of amenity is predicted or long-term devaluation of property.</p>                                                                                                                                                                                                                                                                                                        |
| 16                                                                                                              | Re: Construction Phase              | 5        | <ul style="list-style-type: none"><li>■ The construction noise impact assessment is wholly inadequate as it fails to consider the internal noise impact over a 9-year period. The assessment of the effects of upon residential amenities is different between the construction stage and the operational phase. In the construction stage, there is no assessment upon the internal noise levels. I work full-time. I work through a blended remote working model for four days a week in my 'home office'. How am I expected to be able to work my full-time employment role for 9+years with all the combined noise impacts affecting the quality of my working environment? How does this project justify the intolerable levels of interference through loss of sleep, general ongoing daily disturbance and psychological impacts resulting in a detriment to human health for me and my neighbours who are also full time employed and work from home?</li></ul> | <p>TII do not agree that the construction noise impact assessment is inadequate. Table 2.3 of EIAR Chapter 2, Methodology Used in Preparation of the EIAR explains the durations of effect utilised in the analysis throughout the EIAR. Please also note that the assessment provided in EIAR Chapter 13 Airborne Noise and Vibration provides for noise and vibration impacts over shorter durations to reflect the duration of the actual activity i.e. noise effects resulting from the construction will not last 9 years, but will last as long as the "noisy activity" lasts. These durations are outlined in Chapter 13 of the EIAR.</p> <p>The assessment undertaken in EIAR Chapter 14 Groundborne Noise and Vibration is also undertaken in line with best practice and is in line with all relevant guidelines and policy requirements as laid out in Section 13.2.2 of the EIAR. The assessment of noise levels at building facades is normal for this type of analysis as the assessment criteria generated from best practice guidance all refers to noise levels at building facades.</p> <p>Please also refer to response (10) above that summarises the assessed noise impacts, noting no profound impacts have been identified for residents and mitigation measures proposed will be effective at reducing the impacts on properties.</p> |

| Re: Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022 Case Reference Number NA29N. 314724 |                        |          |                                                                                                                                                                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| 17                                                                                                              | Re: Construction Phase | 5        | ■ The EIAR fails to properly assess the building damages from settlement and potential subsidence impacts of the tunnelling upon the 'conservation protected' houses along Dartmouth Square West. | <p>TII do not agree. The EIAR has assessed the impact of construction generated ground movements as set out by EIAR Appendix A 5.17 Building Damage Report.</p> <p>With particular regards to Protected Structures, these properties have been designated as "special" and hence a further Phase 3 refined assessment will be undertaken that will take account of final design and construction methodology details most likely utilising advanced numerical modelling techniques and further surveys of the building. The results of this refined assessment typically show that earlier assessments are conservative and overestimate the likely impact of construction generated ground movements.</p> <p>Monitoring instrumentation will also be installed to monitor the performance of the works and potential environmental impacts, including those discussed above to ensure that acceptable limits are not breached. TII would also note the Property Owner Protection Scheme (POPS), committed to by TII, allows residential property owners to register with TII if their residential property is within thirty (30) metres of the edge of the MetroLink alignment or fifty (50) metres of station structures. The POPS comprises condition surveys of residential properties along the route of the proposed Project. The purpose of the condition surveys is to ascertain the condition of the properties before, during (if deemed necessary), and after the completion of the proposed Project to determine whether there has been any deterioration of any of the properties surveyed and whether same may be attributable to the proposed Project, and subsequently to recommend repairs as appropriate. Condition survey data gathered pre and post construction, and possibly during construction, will be used to assist the property owner and TII in swift and accurate verification of any property damage claims which may be received from property owners. The POPS is designed to cater for / address repair work which may be necessary for any damage (attributable to the proposed Project) to a qualifying residential property up to a threshold of €45,000. The POPS will be introduced by TII through public consultation and will be formally advised to eligible property owners by the Public Relations Department.</p> <p>Further information on POPS is available in Chapter 11 (Population &amp; Land Use). Useful information can also be found in the MetroLink Frequently Asked Questions document which can be found online at: <a href="https://www.metrolink.ie/en/your-property/property-owners-protection-scheme/">https://www.metrolink.ie/en/your-property/property-owners-protection-scheme/</a> , and this is where useful updates will be made available as the proposed Project progresses.</p> |
| 18                                                                                                              | Re: Construction Phase | 5        | ■The hydrogeological impact assessment is inadequate as it has not been based upon local bore hole logs.                                                                                          | <p>This statement is incorrect, local bore hole logs have been used to inform the hydrogeological impact assessment. Please refer to EIAR Figure 19.6 which identifies the location of the borehole at Charlemont. Pump tests were undertaken here and groundwater samples were taken (from 3 boreholes at this location) and analysed in order to inform the baseline conditions presented in the EIAR. Furthermore calculations were undertaken to estimate the effects of excavations on the groundwater for every station including Charlemont (refer to EIAR Chapter 19, Hydrogeology, tables 19.35 and 19.41 and Charlemont subsection under section 19.5.3.6).</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| 19                                                                                                              | Re: Construction Phase | 5        | ■ Construction of the intervention tunnel will give rise to significant noise and disturbance, 24/7 during the period of its construction. | <p>TII have carefully assessed the impact of construction noise and vibration for all aspects of construction, including the construction of the intervention tunnel, which will be mechanically excavated. With the exception of the passage of the TBM which will operate on a 24/7 basis and take approximately 2-weeks to pass 1 Dartmouth Square, there are no predicted adverse residual impacts from any other activity once noise and vibration mitigation measures have been implemented. A summary of the predicted noise and vibration impacts is provided below.</p> <p>Construction Noise and Vibration</p> <p>Potential impacts identified due to airborne noise and vibration are presented in EIAR Chapter 13. Noise mitigation proposed for works at Charlemont Station are summarised in Section 13.6.1 of the EIAR and include for boundary hoarding around the working area, including a 4m high hoarding at the southern boundary, increasing to 7m high on the northern boundary. In addition, the above ground support works for sprayed concrete tunnelling works will be enclosed within an acoustically clad steel framed building to control noise breakout to surrounding receptors. With the proposed noise mitigation measures, the assessed residual impacts during the construction of Charlemont Station are set out in Table 13.90, indicating that noise impacts at 7 Dartmouth Square will be reduced to Moderate.</p> <p>EIAR Appendix A14.5, Groundborne Noise and Vibration and Blasting Modelling Results, 14.4 Section AZ4 Northwood to Charlemont presents the predicted groundborne noise and vibration levels during TBM passage for various sensitive receptors. The predicted level of groundborne noise during TBM passage at 7 Dartmouth Square West is 46 dB LASmax which is just above the 45 dB LASmax threshold level, resulting in a significant impact on the occupants of this address for the relatively short 2-week duration of the TBM passage. Unfortunately there are no effective methods available to reduce groundborne noise from TBMs at source and therefore the principal mitigation measure is advance consultation and engagement to inform residents of the timing of the TBM passing to allow building occupants to prepare for the temporary elevated noise levels.</p> <p>During mechanical excavation, groundborne noise is predicted to be 37 dB LASmax, which is below the 40 dB threshold for MEchanical excavation, indicating no significant impacts during this activity.</p> <p>The predicted VDV (Vibration Dose Value is a parameter that combines the magnitude of vibration and the time for which it occurs) during TBM Passage during the day and night at 7 Dartmouth Square West this is 0.22ms-1.75 (VDV day) and 0.185ms-1.75 (VDV night) respectively. Both of these values are lower than the VDV Threshold Levels of 1.0ms-1.75 (VDV day) and 0.5ms-1.75 (VDV night). Levels of vibration during mechanical excavation of Charlemont Station are predicted to be 0.002ms-1.75 for both day and night-time periods, which are also lower than the VDV Threshold Levels of 0.8 ms-1.75 daytime and 0.4 ms-1.75 night-time, resulting in a not significant impact on the building and its occupants. The threshold levels have been set in relation to human response to vibration, and thresholds for building damage are much higher. As the predicted levels of vibration from TBM passage and mechanical excavation are below these thresholds, no impact is predicted for either the building or for residents of this address.</p> <p>Predictions of vibration during blasting at Charlemont Station have also been made. For 7 Dartmouth Square West a vibration level of 5.6mm/s PPV (Peak Particle Velocity) is predicted compared to the threshold level for this building of 8mm/s resulting in no potential significant impact. The air over pressure is predicted to be 109.5 dB, which is also below the threshold level of 125 dB indicating no significant impact.</p> <p>Owing to the nature of the sprayed concrete intervention tunnel construction and to ensure a safe and stable method of excavation, and to minimise settlement impact, the sprayed concrete intervention tunnel construction will be undertaken 24 hours per day, seven days per week. The groundborne noise and vibration arising from mechanical excavation of the tunnel will not exceed threshold limits. As noted above, it is proposed that during night-time support works at the surface, an acoustically clad steel framed building will be used within the compound to control airborne noise breakout to surrounding sensitive properties.</p> <p>As outlined in Transport Infrastructure Ireland (TII) Airborne and Groundborne Noise Mitigation Policy (Appendix A14.6) there is a process in place whereby further mitigation measures can be implemented at individual properties should this be merited.</p> |
| 20                                                                                                              | Re: Construction Phase | 5        | ■ The construction phase is a medium-term effect which has not been properly considered in the EIAR.                                       | <p>It is not correct to say that the construction phase has not been properly considered in the EIAR. Please refer to EIAR Chapter 2, Methodology Used In Preparation of the EIAR, Table 2.3 where the durations of effect utilised in the analysis throughout the EIAR are referenced. Please also note that the assessment in EIAR Chapter 13, Airborne Noise and Vibration has allowed for noise and vibration impacts over shorter durations to reflect the duration of the actual activity i.e. excessive noise effects resulting from the construction will not last 9 years, but will last as long as the "noisy activity" lasts. These durations are outlined in EIAR Chapter 13.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
