Grounds | 3        | <ul style="list-style-type: none"><li>This application is in breach of the terms of an agreement entered in between TII and us. TII entered into this agreement in advance of this planning application. In these circumstances, it is submitted that TII ought to amend the application to agree with the terms to which it has already signed up.</li></ul> | TII do not understand what aspect of the agreement is alleged to have been breached. The agreement is confidential, and any issues are a matter as between the parties and not relevant to the Board's consideration of the RO application.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 2                                                                     | Observation details<br><br>Section 5. Grounds | 3        | The proposal includes 8.5 years of major and very deep construction work around 14m from the back wall of our home. As set out in the submission by McCabe Durney Barnes, the EIAR is wholly inadequate in addressing the very significant noise and vibration issues that the application accepts will occur over the extensive construction period.         | <p>TII do not agree that "the EIAR is wholly inadequate in addressing the very significant noise and vibration issues...". TII understand the reasons for your concerns and would like to provide the assurance that the potential impact of construction on your property has been carefully assessed. This includes the impact of noise and vibrations from: the tunnel boring machine (TBM), mechanical excavation and blasting; and construction generated ground movements leading to settlement and possible building and property movement. All of which have been assessed and reported in the EIAR and are summarised below. With the exception of a temporary disturbance when the TBM passes your property, TII are predicting a 'not significant' impact to the building occupants and your building, or risk to the integrity of your house.</p> <p>Construction Phase – Airborne Noise and Vibration<br/>EIAR Chapter 13 Airborne Noise and Vibration, Table 13.68 summarises the potential significant construction noise impacts from the construction of the proposed Charlemont Station, which includes receptor 25 for 9 Dartmouth Square West. The predicted impact without additional noise mitigation is Significant to Very Significant during some of the work phases. Noise mitigation measures are detailed in section 13.6.1 and include for a proposed 4m high acoustic noise screen along the east, west and southern boundaries of the Charlemont construction compound, and a 7m high noise screen along the northern boundary. Surface activities to support sprayed concrete tunnel construction will be enclosed within an acoustically clad steel framed building to control airborne noise breakout to surrounding receptors. With these mitigations in place the construction impacts are reduced to below significant.</p> <p>Construction Phase – Groundborne Noise and Vibration<br/>EIAR Chapter 14 Groundborne Noise and Vibration, Appendix 14.5 presents the predicted groundborne noise and vibration levels during the construction phase of the Project for 9 Dartmouth Square West:</p> <ul style="list-style-type: none"><li>The predicted level of groundborne noise during TBM passage is 47 dB LASmax, which is above the 45 dB LASmax threshold resulting in a significant impact on the occupants of the building for the relatively short duration of TBM passage.</li><li>The predicted level of groundborne vibration during TBM passage is 0.227 ms-1.75 day and 0.191 ms-1.75 night, below the VDV (Vibration Dose Value is a parameter that combines the magnitude of vibration and the time for which it occurs) Threshold Level of 1.0 ms-1.75 day and 0.5 ms-1.75 night, resulting in a not significant impact on the building.</li><li>The predicted level of groundborne noise during mechanical excavation at Charlemont Station is 39 dB LASmax, which is below the 40 dB LASmax threshold resulting in a not significant impact on the occupants of the building.</li><li>The predicted level of groundborne vibration during mechanical excavation at Charlemont Station is 0.003 ms-1.75 day and 0.002 ms-1.75 night, well below the VDV Threshold Level of 0.8 ms-1.75 day and 0.4 ms-1.75 night, resulting in a not significant impact on the building.</li><li>The predicted level of vibration during blasting at Charlemont Station is 6.8mm/s PPV (Peak Particle Velocity), which is below the 8mm/s PPV threshold resulting in a not significant impact on the building.</li><li>The predicted level of air overpressure during blasting at Charlemont Station is 110.8dB, below the Threshold Level of 125dB, resulting in a not significant impact on the building.</li></ul> |

| RE: Observation on a Strategic Infrastructure Development Application |              |          |                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
|                                                                       |              |          |                                  | <p>Unfortunately, there are no effective methods available to reduce groundborne noise from the TBM at source but noting that the duration of this impact will be temporary and of the order of up to two-weeks as the TBM passes. TII will undertake advanced consultation and stakeholder engagement to prepare people for the passing of the TBM and ensure the timing of these impacts are known.</p> <p>TII's contractor(s) will prepare a Construction Noise and Vibration Management Plan (CNVMP) for the proposed Project as referred to in EIAR Appendix A5.1, Outline Construction Environmental Management Plan (CEMP). The CNVMP will be a live document and will include a full monitoring and auditing programme which will be agreed with the Local Authorities prior to the commencement of the Construction Phase, including predetermined monitoring trigger levels to ensure noise and vibration limits are not breached, noting that it is not possible to mitigate TBM groundborne noise and vibration at source. Table 6.2: Noise and Vibration Measures of the Outline CEMP outlines the monitoring programme requirements.</p> <p>The Transport Infrastructure Ireland (TII) Airborne Noise and Ground-borne Noise Mitigation Policy (Appendix A14.6 of EIAR Chapter 14) also sets out the construction noise insulation and temporary rehousing measures to be implemented where required.</p> <p>Construction Generated Ground Movements<br/>EIAR Appendix A 5.17 Building Damage Report, covers the assessed impacts of construction generated ground movements and settlement on 9 Dartmouth Square West and has been predicted to not exceed the 'Slight' category, an explanation for which can be found in Table 4-4 of the aforementioned report.</p> <p>With particular regards to Protected Structures, these properties have been designated as "special" and hence a further Stage 3 refined assessment will be undertaken that will take account of final design and construction methodology details most likely utilising advanced numerical modelling techniques and further surveys of the building. The results of this refined assessment typically show that earlier assessments are conservative and overestimate the likely impact of construction generated ground movements.</p> <p>Monitoring instrumentation will also be installed to monitor the performance of the works and potential environmental impacts, including those discussed above to ensure that acceptable limits are not breached. TII would also draw attention to the The Property Owner Protection Scheme (POPS), committed to by TII, allows residential property owners to register with TII if their residential property is within thirty (30) metres of the edge of the MetroLink alignment or fifty (50) metres of station structures. The POPS comprises condition surveys of residential properties along the route of the proposed Project. The purpose of the condition surveys is to ascertain the condition of the properties before, during (if deemed necessary), and after the completion of the proposed Project to determine whether there has been any deterioration of any of the properties surveyed and whether same may be attributable to the proposed Project, and subsequently to recommend repairs as appropriate. Condition survey data gathered pre and post construction, and possibly during construction, will be used to assist the property owner and TII in swift and accurate verification of any property damage claims which may be received from property owners. The POPS is designed to cater for / address repair work which may be necessary for any damage (attributable to the proposed Project) to a qualifying residential property up to a threshold of €45,000. The POPS will be introduced by TII through public consultation and will be formally advised to eligible property owners by the Public Relations Department.</p> <p>Further information on POPS is available in Chapter 11 (Population &amp; Land Use). Useful information can also be found in the MetroLink Frequently Asked Questions document which can be found online at: <a href="https://www.metrolink.ie/en/your-property/property-owners-protection-scheme/">https://www.metrolink.ie/en/your-property/property-owners-protection-scheme/</a> , and this is where useful updates will be made available as the proposed Project progresses.</p> |

| 3                                                                     | Observation details<br><br>Section 5. Grounds | 3        | <ul style="list-style-type: none"><li>• The building work undertaken in connection with the development at 2 Grand Parade has resulted in vibrations that have damaged our property. This work was further removed, at shallower depths and took place over a shorter period than the proposed work on a metro station. The inadequate proposals in this application would see our property further exposed to damage.</li></ul>    | As noted by response (2) TII have carefully assessed the potential construction impacts on your property, with proposed mitigation measures outlined.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| 4                                                                     | Observation details<br><br>Section 5. Grounds | 3        | <ul style="list-style-type: none"><li>• The submission accepts that the value of our property 'may' be impacted by the very significant 'noise, vibration, traffic or air pollution'. There is absolutely no doubt that the scale of construction activity, the noise and vibration, the closeness to our home and the loss of part of our property (the lane) will have a very material impact on the value of our home.</li></ul> | <p>TII are of the view that MetroLink construction will not have a long term and permanent negative affect. There is strong evidence to suggest that property values will in fact increase in close proximity to public transport infrastructure and that local residents will greatly benefit from having a world class metro system providing access to the city centre, airport and north city at their door step. The benefits of the project for all communities along the MetroLink route are described in Chapter 3: Background to the MetroLink Project, section 3.4 MetroLink Response to Challenges. With regards to the particular potential construction environmental impacts noted by the observation:</p> <p>Noise and Vibration Construction Phase<br/>As noted by response (2) above, with the exception of temporary disturbance during the passing of the TBM, no significant impact is being predicted from noise and vibration.</p> <p>Traffic<br/>MetroLink is designed to form part of an integrated public transport network with Charlemont selected as the preferred interchange location in order to maximise the potential interchange with the existing Luas Green Line. In overall terms, Charlemont Station will provide for improvements to the public transport network resulting in decreases in private car usage/trips, increases in public transport usages and will facilitate walking and cycling to the station, without significantly impacting on the operation of the road network in the area.</p> <p>EIAR Appendix A9.5 Scheme Traffic Management Plan presents the analysis undertaken to assess the impact of the traffic management measures on the local road network surrounding the proposed Charlemont Station during the construction phase. At the local level the following parameters have been used to assess impacts on general traffic and on pedestrians:</p> <ul style="list-style-type: none"><li>• Increase in walking distance/quality of service for pedestrians (through removal of footpath, reduction of quality of service, removal of a pedestrian crossing or relocation of crossing by more than 100m);</li><li>• Increase in driver delays at junctions;</li><li>• Changes in traffic flows on surrounding streets; and,</li><li>• Additional distance travelled due to diversions.</li></ul> <p>The analysis undertaken at this location indicates that the increased volume of traffic on Grand Parade and Northbrook Road does not translate into any significant increase in driver delay. The largest increase in driver delay of 12 seconds is registered on the westbound approach on Grand Parade to the Ranelagh Road signalised junction.</p> <p>During the construction phase, pedestrians will experience a reduction in quality of pedestrian infrastructure and space. The construction site boundary will encroach upon footways in the local area, including the northern side of Dartmouth Road, and the southern side of Grand Parade. However, a temporary signalised crossing will be provided west of the Luas to maintain pedestrian access to and from the Stop. Whilst there are partial closures on Dartmouth Road and Grand Parade, pedestrian movements will be maintained on appropriately sized footways through the area.</p> |

| Submission No.                                                        |                                               |          | 060                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

|                                                                       |                                               |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | <p>Air Quality</p> <p>Potential air pollution from the construction works will primarily be caused by dust, however there is also potential for impacts from construction traffic along public roads and the redistribution of private vehicle traffic. In order to sufficiently ameliorate the likely air quality impact, a schedule of air control measures has been formulated for the proposed Project.</p> <p>A Dust Management Plan (Appendix A16.4) will be implemented to mitigate the impacts of airborne dust, that will include:</p> <ul style="list-style-type: none"><li>• Material handling systems and site stockpiling of materials will be designed and laid out to minimise exposure to wind. Water misting or sprays will be used as required if particularly dusty activities are necessary during dry or windy periods;</li><li>• Any blasting will be completed by specialised contractors with a specific blasting dust management plan; and</li><li>• Hoarding will be provided around the construction compounds.</li></ul> <p>As explained by EIAR Chapter 10, Human Health, section 10.5.1.1, as construction dust is quite large (30 microns in diameter) and falls to the ground relatively quickly, it would not be deemed to have a significant adverse health impact as the dust does not stay airborne and is not inhaled. When the dust minimisation measures are implemented, fugitive emissions of dust from site are not predicted to be significant and pose no nuisance, human health or ecological risk to nearby receptors.</p> <p>The air dispersion modelling assessment of Construction Phase traffic emissions has found that the proposed Project will result in no significant adverse effects to air quality from construction traffic. Nonetheless measures will be put in place to minimise emissions, including:</p> <ul style="list-style-type: none"><li>• Implementation of a policy which prevents idling of vehicles both on and off-site including HGV holding sites;</li><li>• Construction Phase traffic to be monitored to ensure construction vehicles are using the designated haul routes;</li><li>• Efficient scheduling of deliveries to minimise number of deliveries required, and in turn their emissions; and</li><li>• Construction vehicles will conform to the current EU emissions standards.</li></ul> <p>Loss of Property</p> <p>TII would like to take the opportunity to confirm that access to the laneway to the rear of Dartmouth Square West will be maintained except for a short period to enable the installation of acoustic barriers to mitigate noise impacts to the properties on Dartmouth Square.</p> |
| 5                                                                     | Observation details<br><br>Section 5. Grounds | 4        | <ul style="list-style-type: none"><li>• The protection of our home was the reason we entered into a legal agreement with TII which, as noted above, this application breaches. Charlemont is a very poor location for the terminus of this line:</li><li>o It is a poor connection to the LUAS with a long walk of up to 400m to get from the LUAS to the Metro.</li><li>o One side of the site is bounded by Grand Parade which is a busy, congested traffic route with no parking. The other side is Dartmouth Road, a residential road unsuited to heavy traffic flows through night and day.</li><li>o It creates a bias towards cannibalising the LUAS line in any future southern extension of the Metro instead of using this as an opportunity to provide other areas of the southside with access to transport infrastructure.</li></ul> | <p>Please refer to response item (1) in relation to the agreement.</p> <p>TII do not agree that Charlemont is a poor location for an interchange with the Luas Green Line for the reasons set out below.</p> <p>The Board is required to have regard to the likely consequences for proper planning and sustainable development in the area in which it is proposed to carry out railway works (section 43(1) of the 2001 Act) and as such the following matters are relevant.</p> <p>The connection from St Stephens Green to Charlemont / Ranelagh is supported by the current Transport Strategy for Greater Dublin Area (2022-2042). The Transport Strategies were prepared by the National Transport Authority, scrutinised by the Joint Oireachtas Committee on Transport and approved by the Minister for Transport. It notes in section 12.3.2, "Charlemont offers the optimal location for the primary interchange with the Green Line in response to growing demand in the longer term and is an appropriate location to facilitate any potential future metro extensions to serve the south west, south or south east of the city region should sufficient demand arise."</p> <p>The Transport Strategy is "a consideration material to the proper planning and sustainable development of the area or areas in question." Development Plans are required to be consistent with the Transport Strategy. The Dublin City Development Plan 2022-2028 envisages this station at Charlemont in policy SMT22 "To support the expeditious delivery of key sustainable transport projects so as to provide an integrated public transport network with efficient interchange between transport modes, serving the existing and future needs of the city and region and to support the integration of existing public transport infrastructure with other transport modes. In particular the following projects subject to environmental requirements and appropriate planning consents being obtained: ... MetroLink from Charlemont to Swords".</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

| RE: Observation on a Strategic Infrastructure Development Application |              |          |                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
|                                                                       |              |          |                                  | <p>Accordingly, the location of the Charlemont station was a strategic decision made at the highest levels of transport and land use planning and such is fully consistent with the proper planning and sustainable development of the area.</p> <p>The current Transport Strategy considers a range of options for the onward extension of MetroLink to meet the demand for travel over the period of the strategy. This includes consideration of the need for the upgrade of the Luas Green Line to metro with a metro extension to Dublin south west, south or south east. Whilst the strategy envisages that further extensions will be delivered after 2042, MetroLink which terminates at Charlemont allows for the possible extension of the metro in all any of the above directions.</p> <p>The proximity of the metro to the Luas line at Charlemont provides for a positive customer experience for all users with short interchange distance and due to the proximity, clear wayfinding and high visibility of the interchange. The interchange arrangements at Charlemont provide for significantly better interchange arrangements compared to an interchange at St Stephen's Green Station.</p> <p>The detailed analysis done for the Railway Order application further confirms that the section of MetroLink route between St Stephen's Green and Charlemont Stations contributes significantly to the overall benefits of the scheme. It serves a significant area of the south city of Dublin and offers enhanced access from the local area to the city centre and a direct connection to Dublin Airport. It serves key trip attractors including residential areas and offices / workplace locations, with high passenger boarding and alighting figures in the peak hours. During the morning peak, at Charlemont station the flows include 1,800 passengers alighting, 2,300 boarding and 1,229 passengers alighting, 2,276 boarding during the evening peak. The passenger numbers contribute significantly to the overall benefits of the scheme and the effect of these benefits outweigh the additional costs that are associated with the delivery and operation of the section from St Stephen's Green to Charlemont station.</p> <p>The location of the interchange at Charlemont does not preclude onward extension south. An interchange at Charlemont is supported by policy including the Dublin City Development Plan 2022 - 2028 and the Transport Strategy for the Greater Dublin Area.</p> <p>By extending MetroLink to Charlemont it provides for future proofing of the Green Line, bypassing the capacity constrained Luas on-street running section, and ensures potential future connectivity options are enabled, either to the Green Line or for extensions of the metro.</p> <p>The Charlemont Station interchange provides for increased passenger utilisation of the MetroLink system, thereby increasing the benefits delivered by the Project, reflected by an improved Project Benefit Cost Ration (BCR).</p> <p>Alleviation of Traffic Congestion<br/>TII would note that the observations made with regards existing traffic congestion is one of the reasons why MetroLink is such an important project for the Greater Dublin Area. The proposed Project will provide significant benefits not only to those who choose to use it, but also to other transport network users, by reducing the demand for road space and creating the opportunity for the road transport system to achieve optimum levels of efficiency and effectiveness.</p> <p>Furthermore, TII have deliberately designed the Station with minimum set down space (with the exception of a drop-off on Grand Parade for persons of restricted mobility only) or room for taxi ranks so that it does not encourage the Station to be used as a terminus.</p> |

| RE: Observation on a Strategic Infrastructure Development Application |                                               |          |                                                                                                                                                                                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
|                                                                       |                                               |          |                                                                                                                                                                                                                                                                                                                                                                                                | <p>A microsimulation VisWalk model has been developed for the immediate area surrounding Charlemont Station during the operational phase. The model covers the full extent of the publicly accessible station area, including the immediate vicinity of the station entrance at street level, the Luas stop and nearby junctions at Charlemont Bridge. In order to accommodate the forecast demand from the Project station, a new staircase with 2.4m stair width is proposed at the south east corner of Charlemont Luas stop. An elevator will also be provided at this location. Both have been sized for Metro to Luas, and Luas to Metro passenger numbers.</p> <p>In addition, it is proposed that the pedestrian crossing on R111 Grand Parade will be repositioned to the front of the new Hines building development. With this infrastructure in place, the VisWalk model indicates that the R111 Grand Parade will have an acceptable level of service overall, with some reductions in service seen at the pedestrian crossing where pedestrians are required to wait for a green phase at the signals. Overall, it is considered that the model displays an acceptable level of network performance.</p> <p>The proposed pedestrian crossing on Grand Parade will have minimal impact on the traffic flow along Grand Parade and can be programmed to operate in sync with the existing signalised junction at Grand Parade /Charlemont Street to maintain the flow of traffic movements. When the Project is operational, car mode share will decrease, with a reduction of up to approximately 830 car tips to and from the zones surrounding Charlemont Station over the 12hr period in 2065. In overall terms, the Charlemont Station will provide for improvements to the public transport network resulting in decreases in private car usage/trips, increases in public transport usages and will facilitate walking and cycling to the station, without significantly impacting on the operation of the road network in the area.</p> |
| 6                                                                     | Observation details<br><br>Section 5. Grounds | 4        | <ul style="list-style-type: none"><li>• A terminus in a more central location would provide a better solution:</li><li>o A terminus at St Stephen’s Green would save a very substantial spend (probably c. €700m)</li><li>o It would provide a better connectivity to the LUAS</li><li>o It would provide better connectivity to other public transport solutions such as Dublin Bus</li></ul> | <p>Connectivity and Interchange</p> <p>TII do not agree that an alternate location, including St Stephen's Green would provide a better solution. Charlemont is the most appropriate interchange location for the reasons set out by response (5) above and further expanded on below.</p> <p>As outlined by EIAR Chapter 3, Background to the MetroLink Project, one of the key objectives of the Project is the integration of it with the wider transport network that also includes for BusConnects and DART+ which are all included under Project Ireland 2040. Together, these projects will result in a reliable, sustainable, affordable, integrated public transport network that will support the economy, help Ireland meet its climate change targets in line with Climate Action Plan 2021 and make Dublin a more liveable and sustainable city.</p> <p>Arising from the decision to postpone the future upgrade of the Green Line to metro services, it is being argued that Charlemont station effectively becomes a terminus station in the short to medium term. In this regard, it is true to say that the Metrolink trains will terminate and turn back at Charlemont station, however the public transport service offering for passengers does not terminate, it transfers from Metrolink to LUAS as part of the integrated transport network.</p> <p>Charlemont Station is located within an area of high public transport accessibility, linking with the Luas Green Line which offers reasonably similar levels of services and frequency for journeys to and from the south of Dublin. As such, public transport service offering is not considered to terminate, but transfers onto the similar service offered by the Luas Green Line, forming part of a transport corridor running from Cherrywood to Estuary. The associated environmental impacts for the turnback and station at Charlemont have been fully assessed in the EIAR.</p>                                                                                        |

| RE: Observation on a Strategic Infrastructure Development Application |              |          |                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
|                                                                       |              |          |                                  | <p>Charlemont station itself was chosen on the basis of its interchange potential with Luas, as well as local bus services, as outlined above. The section of the line between St Stephen's Green and Charlemont generates considerable benefits for the scheme in terms of increased patronage. The fact that the Charlemont Station is now being referred to and considered as a "terminus station" rather than an interchange station, does not increase the environmental impacts the station has on its local environment, in terms of passenger demand, airborne noise, vibration and other environmental effects.</p> <p>The proposed route alignment from Estuary to Charlemont is consistent and compliant with the GDA Transport Strategy 2022-2042 (published in January 2023) in which states that the south city terminus at Charlemont offers the optimal location for interchange with the Green Line in response to growing demand in the longer term and is an appropriate location to facilitate any potential future metro extensions to serve the south west, south or south east of the city region should sufficient demand arise. TII's role is to deliver Metrolink as set out in the Transport Strategies.</p> <p>Cost of an Interchange Provided at Charlemont<br/>The Board is not responsible for any decisions in relation to the funding the Project. It is solely responsible for assessing whether the Project is consistent with proper planning and sustainable development and that its effects on the environment are acceptable.</p> <p>The responsibility for funding the Project lies with the NTA, the Government and ultimately the Oireachtas. It has received all necessary approvals, including under the Public Spending Code for the making of a Railway Order. It will undergo further scrutiny and approvals, including under the Public Spending Code, before it is funded. It is not appropriate for the Board to make findings in relation to value-for-money that are outside its statutory functions and would cut across those arrangements. Members of the public are entitled to make representations to their TDs in relation to the value-for-money of any element of the Project.</p> <p>In any case, TII do not agree that there is an opportunity to save money by stopping MetroLink at St. Stephen's Green and providing an interchange with the Luas Green line at this location for the reasons set out by response (5) and the above.</p> <p>There is a limit to the potential of the Luas to provide additional capacity in the on-street non-segregated section of the Luas Green Line from Charlemont northwards through the city centre. The nature of this route and the fact that it currently crosses several road junctions (Adelaide Road, Harcourt Street / Hatch Street upper and Harcourt Street / St Stephen's Green south) limit the service to a maximum of 24 trams per hour per direction. The projected demand for this section would require a higher frequency of up to 30 trams per hour and this demand cannot be met with on-street systems (Luas / bus). The interchange between Luas and MetroLink proposed at Charlemont will provide the necessary capacity to address the demand on this corridor and reduce overall travel time for passengers</p> <p>There is also high passenger demand forecast for a Metrolink station at Charlemont, including from the Ranelagh area, which would be lost if St. Stephen's Green was the MetroLink southern interchange station. The additional fare revenues collected by the Charlemont Station interchange increase the benefits delivered by the Project, reflected by an improved Project Benefit Cost Ration (BCR).</p> <p>Further, to ensure that public investment delivers value for money, the Public Spending Code sets out requirements for the evaluation, planning and management of public investment. The preparation of a Business Case is a key element of meeting these requirements. The Public Spending Code requires that both the Preliminary Business Case and Final Business Case for public investment projects are published.</p> <p>In July 2022, the Government granted Approval in Principle to the NTA to enable the submission of a railway order application by TII to An Bord Pleanála in respect of the MetroLink project (Decision Gate 1). This approval was granted after the Preliminary Business Case (PBC) had undergone significant scrutiny and challenge by bodies that are independent of TII, including DoT and DPER review (including independent review by JASPERS and the Major Projects Advisory Group (MPAG)) of the PBC around timeline, costs and benefits that were updated to inform the Government decision.</p> |

                                                                                                                                                                                                                                                                                                                       |                                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| 1                                      | Observations/Concerns | 1        | We would like to know who's idea it was to built a tunnel under our property and destroy our quality of life and piece of mind.<br>Why is the MetroLink Tunnel not running under the main Phibsborough Road instead of running under residential homes? Our quality of life will be destroyed for 6-8 years while the tunnel is being built with noise, pollution, disturbance etc. Also noise from trains running day and night every 3 minutes. | <p>Thank you for your submission and for sharing your concerns/observations related to the MetroLink project.</p> <p>EIAR Chapter 07 (Consideration of Alternatives) presents the decision-making process that has led to the proposed Project, including the selection of Glasnevin Station. In line with the Transport Strategy for the Greater Dublin Area, Glasnevin station offers significant interchange value with the heavy rail network, with the rail lines at their closest point on the western side of Prospect Road, allowing for a more effective opportunity to transfer. Due to the preferred location of Mater Station ~600m away for onward travel into the city centre, the required curvature radius of the tunnel precludes the alignment from traversing under the R108 Phibsborough Road at this particular location to ensure maximum operating efficiency.</p> <p>Potential impacts associated with noise and vibration during the construction phase of the proposed Project are addressed in EIAR Chapter 13 (Airborne Noise &amp; Vibration) with mitigation measures proposed where required. The assessment of airborne noise and vibration during the construction of Glasnevin Station includes the consideration of the closest noise sensitive receptors to the works. Noise mitigation measures that will be put in place will also work to reduce potential noise impacts at this address which is approximately 125m from the works. As noted in Chapter 13, Section 13.6 mitigation measures include but are not limited to noise barriers and site hoarding, selection of quiet plant and a Noise &amp; Vibration Management plan which will be developed and used by the Contractors. This has also been assessed as part of Chapter 10 Human Health where through mitigation measures that no significant adverse human health impact is predicted and therefore there will be no impact on quality of life.</p> <p>EIAR Chapter 14 presents the assessment of Groundborne Noise and Vibration during Construction, with Appendix 14.5 Groundborne Noise and Vibration Blasting Modelling Results presenting predicted groundborne noise and vibration levels during the construction and operation phases of the project. The predicted groundborne noise during TBM passage is 49 dB LASmax which is above the Threshold Level of 45 dB, indicating a significant adverse impact for a short-term duration of up to 2-weeks when the TBM is passing this address. It should be noted that this will be transient in nature and will peak for 2-3 days where the TBM is closest to the property. Predicted vibration during TBM passage through Phibsborough Road is a not-significant level of 0.265 ms-1.75, below the threshold level of 1.0 ms-1.75 VDV at this location. Unfortunately, there are no effective methods available to reduce groundborne noise or vibration from TBMs at source. Advance public consultation and stakeholder engagement will be developed to inform the building occupants in advance of the TBM. A full monitoring and auditing programme will form part of the Construction Environmental Management Plan which will be agreed with the Local Authorities prior to the commencement of the Construction Phase.</p> <p>Should the Project be approved, prior to the commencement of any construction works, a detailed noise assessment for each work site will be undertaken based on the most up to date information for each. There is no published statutory Irish guidance relating to the maximum permissible noise level that may be generated during the Construction Phase of a project. Local authorities normally control construction activities by imposing limits on the hours of operation and consider noise limits at their discretion. Additionally, as noted in Appendix A5.1 Outline CEMP Table 6.2, the Contractor undertaking the construction of the works will be required to take specific noise abatement measures to the extent required and comply with the recommendations of BS 5228-1 (BSI 2014a).</p> <p>During operation of the railway groundborne noise is predicted to be 34 dB LASmax, which is below the threshold of 40 dB LASmax. Operational vibration at this building is predicted to be 0.008 ms-1.75, well below the threshold level of 0.8 mms-1.75 VDV. There are therefore no predicted significant impacts during operation at this location.</p> <p>In relation to pollution, it should be noted that these impacts will primarily be driven by works at Glasnevin Station and not necessarily tunnelling activities. Groundborne noise &amp; vibration is the primary disturbance/impact from tunnelling at this location and is covered in the paragraph above. Nonetheless, Appendix A5.1 Outline CEMP provides a number of mitigation and monitoring measures that the Contractor will adhere to throughout the Construction Phase of the project to reduce the impacts such as pollution through air quality, traffic and general construction activity mitigation measures. Section 6 of the Outline CEMP provides an overview of these measures.</p> |
| 2                                      | Observations/Concerns | 1        | We have lived here for almost 30 years, we had intended to retire to the country, it does not look like that now, due to MetroLink running under our property. Who would buy this property?                                                                                                                                                                                                                                                       | The substratum value for deep tunnel projects is that it is has no value in the market due to its depth below the surface and its limited use, therefore property values should not be impacted. TII do not agree that the development will have a long term and permanent negative affect on the value of property. In fact there is strong evidence to suggest that property values will in fact increase in close proximity to public transport infrastructure and that local residents will greatly benefit from having a world class metro system providing access to the city centre, airport and north city at their door step.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 3                                      | Observations/Concerns | 2        | We wish to strongly object to Transport Infrastructure Ireland for running a MetroLink under our property, when it can be easily run under the main Phibsborough Road, why not do this? We would like to know.                                                                                                                                                                                                                                    | Please refer to response item (1) in relation to the justification for the tunnel alignment from Glasnevin.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

| DAU Cover Letter - Re: Railway (Metrolink - Estuary to Charlemont via Dublin Airport) Order [2022] Metrolink. Estuary through Swords, Dublin Airport, Ballymun, Glasnevin and City Centre to Charlemont, Co. Dublin. |                                                                          |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| 1                                                                                                                                                                                                                    | Cover letter - Impact on amenity and function as a statutory public park | 3        | <p>Having reviewed the Railway Order application documentation including the Environmental Impact Assessment Report (EIAR) prepared for the scheme, the Department is of the view that the construction of a station for MetroLink at the Green, as currently proposed, will impact on the amenity and function of the Green as a statutory park. The applicant needs to ensure that the effect of this impact will not be long-term and can be fully and quickly mitigated.</p> <p>Section 27.5.4.1 13 of the EIAR acknowledges that: "<i>the proposed works can apply a level of mitigation which would go some way to reinstating the disturbed part of 'the Green', however, beyond any potential for reinstatement, replacement or restoration, it would be difficult to offset impacts on the maturity and wholeness of this place.</i>" Further noting that: "<i>Once the reinstatement works are completed the severe negative effects of construction will be partially moderated, however the edge of the park along the section of required works, will appear rather raw, small-scaled and immature, especially when directly compared with the remaining untouched sections. These contrasts will reduce over time, though it may take a significant period before they may be described as imperceptible</i>"</p> <p>Review of the supplied photomontages (V22.1-V22.6) further reinforces this assessment of the long-term impact to the Green.</p> | <p>EIAR Chapter 27, The Landscape, section 27.5.4.23 identifies that there will be a very significant temporary impact on the Landscape due to the loss of trees in the area of St. Stephen's Green East if mitigation measures are not deployed. However with the proposed mitigation measures relevant to this location in place, summarised below, this temporary impact can be mitigated by:</p> <p>(1) Development of site specific and comprehensive proposals for hard and soft landscape works, including for trees ensuring effective retention of mature trees where possible. Details of such planting proposals will be provided for consultation with OPW in advance of the construction phase. These will include: details of the tree species mix, numbers, density and sizes proposed; the tree preparation, presentation, transportation, lifting and placement techniques proposed, as well as; the proposed ground preparation, rootball securing technique, backfill materials and methods, and the specific establishment maintenance proposals for each. These measures will minimise the risk to tree establishment and maximise their viability and future rates of growth.</p> <p>(2) In sensitive locations such as St. Stephen's Green, residual landscape and visual effects will be significantly reduced through the inclusion in the proposed planting of relatively mature specimen trees. Furthermore, while the removal of trees from the landscape will initially have a significant impact if left unmitigated, especially in the case of old and developed trees as the replacing material (saplings) and mature specimen trees can never have the same size and development as the mature original trees that have been removed, resulting in an initial, but temporary contrast between the original established area of trees and the new planted trees area. Over a period of time this contrast will reduce and eventually become imperceptible. TII will work with the OPW and commit to ensuring a newly planted/ replanted areas contain a significant percentage of mature specimen trees. The precise percentage can be consulted on with OPW.</p> <p>While the temporary impact on trees is considered very significant, it does occur over a localised area of the Park that amounts to only 5% of the total area of the Park and is confined to the east side (adjacent to the Park fence line) of the Park only. A total of 64 trees (of class A, B, C are to be removed). We have identified 5 of those trees as being "A class" in accordance with BS 5837, which are generally large, high-quality trees, the remainder are of class B and C, deemed to be of moderate to low quality specimens. Trees are to be planted to replace those removed.</p> <p>Proposed mitigation of other construction works impacting the Park are noted in the EIAR and include reinstatement of the memorials, railings, bollards, lamp standards and paving which are to be reinstated on completion of the work. Further details of these mitigation works are provided in the EIAR Chapter 26, Architectural Heritage. New permanent infrastructure required within the park, for example the ventilation structures, will incorporate materials chosen to respect the surrounding 18th century Georgian brick architecture.</p> <p>TII are therefore of the view that the construction of St. Stephen's Green Station will not have a significant impact on the overall amenity and function of the Park. During the construction phase, only 5% of the Park area is taken. Once construction is completed, this area is returned to the Park with only 0.2% of the total Park area taken by MetroLink when operational, whilst providing further access to, and reinforcing St. Stephen's Green as a key Dublin landmark and destination.</p> |

Estuary through Swords, Dublin Airport, Ballymun, Glasnevin and City Centre to Charlemont, Co. Dublin. |                                                                          |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| 2                                                                                                                                                                                                                    | Cover letter - Impact on amenity and function as a statutory public park | 3        | <p>Review of the Consideration of Alternatives (EJAR Chapter 7 and Appendices A7.3-A7.5; A7.7-A7.8) indicates that viable alternative designs for a station at this location were identified. These potentially offer much greater capacity to preserve and maintain the amenity and function of the Green as a statutory public park during both Construction and Operation Stages. The St Stephen's Green Station - Mined Options Report (EIAR Appendix A7.5), for example, notes that the current preliminary design performs worst with "regards to 'Property Impaction SSG Park', 'Biodiversity', 'Landscape and Visual', 'Archaeology/Cultural Heritage', and 'Architectural Heritage' criteria".</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | <p>In evaluating alternatives and options, including for St. Stephen's Green Station, impacts and benefits, both short-term temporary construction (considering the operational life span of the proposed Project), and long-term permanent (operational phase of the proposed Project) have to be carefully balanced, considering a wide range of criteria that cover Project Objectives, Environment, Engineering and Economy (E.g. programme and risk).</p> <p>It is not appropriate to focus solely on a particular evaluation criteria in isolation since this will not result in the optimum overall solution / option being selected. In the case of St. Stephen's Green Station, while TII acknowledge that the preferred station location and construction methodology for the station is not the least environmentally impactful solution for St. Stephen's Green Park, when this is balanced and considered against the long-term strategic need for and operability of the Station / MetroLink, the mined solutions are deficient in terms of; the significant increase in the construction programme, which in turn results in a significant increase in the duration of MetroLink construction and associated environmental impacts. The mined options would also deliver a poor quality passenger experience (compared to the station box) due to more enclosed passenger areas and less efficient end loaded platforms, resulting in an operationally less attractive and less efficient Metrolink station for passenger experience. This would not align with the MetroLink Objective to "Provide an efficient, low carbon and climate resilient public transport service which contributes to a reduction in congestion on the road network in the Dublin region".</p> <p>This is compared to what TII would consider is a temporary impact to a very limited area of the Park that will be mitigated, and in the permanent long-term case the Park can be returned to its existing condition (also refer to Response (1) above).</p> <p>Attention is also drawn to EIAR Chapter 7, Consideration of Alternatives of the EIAR, and in Appendices to the Chapter (A7.3, A7.5, A7.7 and A7.8). It is very important to recognise and is evident, that a significant level of analysis was undertaken to identify alternatives, 16 alternatives (10 cut and cover, 6 mined) in total were considered. Each were assessed against multiple criteria to inform the determination of the preferred station location for St. Stephen's Green.</p> <p>This analysis considered potential environmental effects on St. Stephen's Green Park, potential effects on buildings on the east and north sides of St. Stephen's Green, on traffic and transport along St. Stephens Green East, and on critical utilities serving large areas of the city located under the road at St. Stephen's Green East. The analysis identified that the proposed station location on St Stephen's Green East partially under St. Stephen's Green Park is the preferred option because:</p> <ol style="list-style-type: none"><li>1. It avoids significant impact on existing utilities beneath the carriageway of St Stephen's Green East</li><li>2. It effects just 5% of the Park area during the construction phase, reducing to 0.2% of the Park area following full re-establishment</li><li>3. It reduces significantly the impact on traffic flows during the construction phase</li><li>4. It avoids the requirement for a separate intervention shaft</li><li>5. It has a shorter construction duration when compared to some other options including mined options</li><li>6. It delivers an optimum passenger experience resulting in an operationally efficient metro station</li></ol> <p>In addition, all heritage features such as monuments, railings, bollards, and paving stones can be fully reinstated following the construction phase. This option also negates the potential for direct impacts on properties to the east side of St Stephen's Green East road, on critical utilities including a major sewer (a critical piece of infrastructure) serving the Dublin population, and on the roadway which is an important access route to the city centre, particularly for public transport.</p> |
| 3                                                                                                                                                                                                                    | Cover letter - Archaeology and National Monuments                        | 4        | <p>1 Lissenhall Bridge (RMP DU011-081—; Protected Structure No 341 (Fingal)) Lissenhall Bridge is a Protected Structure and Recorded Monument as well as a National Monument under the criteria defined in Section 2 of the National Monuments Act 1930-2004. The bridge originally dates from the late medieval period and elements of this medieval structure are clearly identifiable within the extant bridge structure. This has been confirmed by a number of recent surveys as outlined in Table 25.6 of the EIAR. The EIAR has correctly identified that likely significant effects to this National Monument could occur at Construction Stage as a result of nearby construction works (particularly necessary piling works) and also from the transit of construction vehicles. The proposed mitigation measures to be implemented are vibration monitoring and the hoarding off of the bridge during construction to prevent all but pedestrian access (see Table 25.9). Chapters 13 and 14 of the EIAR clearly set out the general vibration threshold limits that will be applied in relation to historic structures and Table 25.9 further notes that the thresholds implemented for this site will be agreed in advance with the Department. However, there is no specificity within the EIAR as to the minimum buffer or exclusion zone that will be maintained for the placement of hoarding, obstruction and signage to prevent access by construction vehicles and machinery. The EIAR notes that hoarding/obstruction shall be placed "close to, but not on, the bridge deck".</p> <p>Recommendation The Department recommends that either an acceptable minimum distance from the bridge structure should be specified or it should be specified that the minimum acceptable distance will be agreed with the Department in advance.</p> | <p>Hoardings will be located and designed to ensure there is no risk to Lissenhall Bridge structure from construction works, plant and equipment. TII will introduce a requirement in its contracts to ensure that no construction work are to occur within a 10m limit of Lissenhall Bridge ensuring clear separation.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

|                                                                                                                                                                                                                      |                                                   |          | | DAU Cover Letter - Re: Railway (Metrolink - Estuary to Charlemont via Dublin Airport) Order [2022] Metrolink. Estuary through Swords, Dublin Airport, Ballymun, Glasnevin and City Centre to Charlemont, Co. Dublin. |                                                   |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| 4                                                                                                                                                                                                                    | Cover letter - Archaeology and National Monuments | 5        | <p>2 14-17 Moore Street and 8-9 Moore Lane, Dublin 1 (Preservation Order No. 1/2007; SMR DU018-390—; Protected Structure Nos 5282-5285 (DCC)). This set of buildings are collectively a National Monument (DU01 8-390 — ) in the ownership of the Minister of the Department of Housing, Local Government and Heritage. They are also subject to a previous Preservation Order (PO 1/2007) as well as individual listings as Protected Structures. The buildings are closely associated with the events of Easter 1916; No. 16 is accepted as the final headquarters of the 1916 leaders and is the location where the decision to surrender was taken. The EIAR does not indicate any likely direct impacts to this National Monument as a result of the construction of the proposed development. It does note a potential for significant indirect impact as a result of vibrations from the construction works, and an appropriate mitigation strategy for this has been outlined. However, construction of the proposed station as currently designed is predicated on its integration within an over-site development (see Section 4.17.9 of the EIAR) generally referred to as Dublin Central Site 2. This over-site development depends upon receipt of a separate and independent grant of planning permission and its footprint is expected to be substantially larger than that of the proposed station.</p> <p>• Section 4.17.9.3 of the EIAR notes that: "Allowance has also been made for the possibility that the developers may not progress with the proposed mixed-use development in advance of MetroLink. To provide for this scenario the TII has worked closely with Dublin Central GP Ltd to ensure that the design for that scheme allows for the construction of an independent support structure to enable the station box construction and fit out to be carried out during or after the Dublin Central GP works have been completed. Both scenarios (with and without the over-site development) have been fully assessed in the EIAR. The cumulative effect of the over-site development is considered in the EIAR Chapter 31 [sic] (Cumulative impact of interactions between other projects)".</p> <p>• Section 30.3.1 of the EIAR—identifying relevant projects for inclusion in the cumulative impact assessment—then states that: "the Hammersons Dublin Central Site 2 Project is not included among the developments as at the time of writing planning permission had not yet been obtained but also it is not included in this cumulative impacts assessment to avoid duplication in the assessment. It is noted that there would be a direct interface between these proposed Project [sic] and this development and the potential impacts of which have been assessed in the technical chapters within this EIAR".</p> <p>• Chapter 25 of the EIAR only explicitly considers Dublin Central Site 2 in relation to the 'Do Nothing' scenario (Section 25.2) without specific reference to any potential interactions with the National Monument.</p> <p>• Chapter 26 of the EIAR, dealing with Architectural Heritage, does discuss the potential impacts of the development both with and without the over-site development (see Section 26.5.4.10).</p> <p>The Department is concerned by this general inconsistency in the supplied documentation and is concerned that the potential for indirect and cumulative impacts to the National Monument may not have been fully assessed.</p> <p>2.1 Recommendation It is recommended that both indirect and cumulative impacts to 14-17 Moore Street and 8-9 Moore Lane need to be further addressed as part of the EIAR.</p> | <p>The potential for impacts (including indirect and cumulative impacts) on the National Monument (SMR DU018-390) has been fully assessed in Chapter 25, Archaeology and Cultural Heritage, and Chapter 26, Architectural Heritage, of the EIAR. These assessments assess what is required to construct the MetroLink station and Dublin Central Phase 2. In EIAR Chapter 25, the assessment is presented in Table 25.9 (Refer to ACH 177 - ACH 180). For the purposes of the assessment in Chapter 25, the assessment concludes that as site clearance is required for MetroLink either independently or with Dublin Central, the impacts and mitigation measures presented in Table 25.9 cover the potential effects on archaeology in both scenarios. Mitigation measures are proposed which are "Any works to be undertaken within the defined proximity zone of the National Monument will be undertaken under Ministerial Consent". Likewise, in Chapter 26, the analysis presented considers that the potential effects associated with the MetroLink construction with or without Dublin Central are similar. The potential effects are associated with the required demolition of buildings (regardless of which project demolishes the buildings), vibration and settlement risks associated with the project. Refer to Table 26.55 which indicates that the potential significance of direct effect on these buildings is "very high" during the construction phase. (Please refer to impact reference AHI-76, AHI-77, AHI-78 and AHI-79). As a result mitigation measures have been applied to these buildings and these are "The exclusion zone established by the Ministers office is to be maintained at all times and settlement and vibration monitoring is to be carried out as a precautionary measure. The threshold limits are to be agreed with the Ministers office. In the event of threshold limits being exceeded all work in the vicinity is to stop until the cause of the issue is identified and resolved. Structures adjacent to the haul route are to be protected from potential damage by means of strong hoardings during construction". The impact would decrease to imperceptible following mitigation.</p> <p>The impacts of the proposed Project and the other elements of the proposed Dublin Central project (beyond the immediate MetroLink site (Dublin Central Site 2) have not been assessed In Chapter 31 Cumulative Impacts as none of these projects were permitted projects at the time of writing. However as is standard procedure, prior to the Oral Hearing, a gap assessment list of projects that are deemed valid since the last data gathering exercise was carried out will be produced and will include other Dublin Central planning applications (excluding Site 2 for reasons above) if they have been granted planning permission at that stage.</p> |

|                                                                                                                                                                                                                      |                                                   |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 5                                                                                                                                                                                                                    | Cover letter - Archaeology and National Monuments | 6        | <p>3 Saint Stephen's Green (RMP DU018-020334-; Protected Structure Nos 77517761 (DCC)) Saint Stephen's Green ("the Green") is a Protected Structure and Recorded Monument as well as a National Monument. The current proposal is to site a station within the Green and the EIAR identifies the significant effect that this will have on this National Monument:</p> <ul style="list-style-type: none"><li>• Chapter 25 "Archaeology and Cultural Heritage" characterises the effect as very significant direct negative (permanent) during the Construction Stage and very significant indirect negative during Operation Stage.</li><li>• Chapter 26 "Architectural Heritage" characterises the effect as profound direct negative during the Construction Stage and very significant indirect negative during Operation Stage.</li><li>• Chapter 27 "The Landscape" characterises the effect as very significant negative during the Construction Stage and very significant negative during Operation Stage.</li></ul> <p>While certain mitigation measures are outlined within the EIAR the residual effect, even taking account of these actions, remains significant, intrusive and ongoing through both the Construction and Operation Stages. Preservation by record of sub-surface archaeological features, removal, storage and replacement of the historic furnishings (such as railings, paving, etc.) are entirely feasible and achievable. However, construction of the station as currently proposed will result in increased hard landscaping, introduction of upstanding structures into the footprint of the park and loss of mature trees and canopy that will result in long-term to permanent effects on the amenity and setting of this National Monument. It is clear in reviewing the Consideration of Alternatives (EIAR Chapter 7 and Appendices A7.3-A7.5; A7.7-A7.8) that the proposed location for the station at the Green was not the only viable option.</p> <ul style="list-style-type: none"><li>• The St Stephen's Green Station Options Assessment Summary (EIAR Appendix A7.8) notes that: "Of the 16 alternatives considered [including Preferred Design], location 8 and mined options 1 and 3 were considered viable [in addition to the Preferred Design]."</li><li>o Location 8 would place the station wholly under the carriageway of Saint Stephen's Green East.</li><li>o Mined Options 1 and 3 would be partially constructed underground with much more limited interventions at surface level.</li></ul> <p>The likely overall effect of the development to the Green —encompassing all its intrinsic characteristics—at both Construction and Operation Stage would be substantially reduced, if any of these three alternatives had been adopted, with certain specific potential impacts eliminated or considerably reduced in scale and scope. In that regard, the St Stephen's Green Station -Mined Options Report (EIAR Appendix A7.5) notes that: "[Mined] Option 3 performs the best in terms of minimising the impact on St. Stephen's Green Park both during the construction and operational phases, noting that during the construction phase the Park's railings would be removed temporarily to ensure they are protected. In contrast Option 0, the current Preliminary Design performs the worst by a considerable margin both during the construction and operational phases of the station compared to the other options, which includes for during construction a haul road and logistics being located within the Park, and five ventilation 'pop ups' in the permanent case (operational phase). [Mined] Option 1, construction and permanent land take is confined to the Plaza area of the Park and also necessitates the removal of a section of the Parks railings." It is clear that in selecting the location and design for the station at the Green, as currently proposed, consideration of the overall effect to the intrinsic characteristics of the National Monument (encompassing factors such as property impact, landscape, amenity, archaeology/cultural heritage and architectural heritage) has been weighed more lightly. It is clear in reviewing the EIAR and supporting documentation that factors such as programme, cost and consistency of architectural design have been privileged. The Department is of the opinion that the proposed station option has prioritised construction requirements above a sufficiently weighted assessment of the long term impacts on The Green.</p> <p>Recommendation The Department recommends that careful consideration be given to the proposed alternative station locations and/or construction methodologies assessed in the EIAR for the proposed station at St Stephen's Green. Such consideration would benefit from clarification of the issues raised above.</p> | <p>TII have undertaken significant assessment of alternative options for the MetroLink station as presented in Chapter 7 Consideration of Alternatives of the EIAR (Refer to New Metro North Alignment Options Report (TII 2018), Section 7.7.10.10 of this chapter) and associated appendices (Appendices A7.5, A7.7 and A7.8).</p> <p>Options assessed include alternative MetroLink alignment options through this area with alternative station locations, alternative station locations at St. Stephen's Green East, and alternative construction methodologies such as mining. The preferred station location of St. Stephen's Green East was chosen as it minimises the potential impacts on the Park when compared to other options with a larger footprint in the Park. As previously noted, the preferred option occupies c. 5% of the Park area during the construction phase, reducing to just 0.2% of the Park during the operational phase.</p> <p>It is correct to say that the protection of the Park was not the only consideration in the identification of the preferred station option here. The location of the station was also chosen and carefully designed to ensure that St Stephen's Green East continues to function as an important transport route, as an important corridor for critical utilities such as water, electricity and sewage, and as an important location for commercial and business activities. There would be significant and prolonged impacts on this side of St. Stephen's Green if the Location 8 that was located entirely outside of the Park is preferred. In fact, the Alternatives Assessment demonstrates that this critical functionality on this side of St. Stephen's Green would have been very difficult, if not practically possible, to achieve if Location 8 were chosen. In effect, the preferred option was a compromise solution balancing the impact on the Park while allowing the east side of St Stephen's Green Park to continue to function.</p> <p>Appendix A7.5 to the EIAR presents an analysis of the alternative construction methodology of mining the station which would allow for construction of the station with a smaller footprint at ground level. However these mined options were ruled out as they would increase the length of the construction phase (and as a result environmental impacts) by between 2 and 3.75 years and they would ultimately make it more difficult for the Project to achieve its objectives of providing a high quality operational station. It is acknowledged in Chapter 27 of the EIAR that the full maturation of replacement trees for those removed will take a significant period of time to re-establish (albeit that TII has committed to replanting a significant proportion of Mature Specimen Trees). However, on completion of the construction phase, by reinstatement of heritage items and replanting (and reestablishment) of trees, TII maintains that the proposed St. Stephen's Green Station will enhance this area by providing Dubliners and visitors alike with high quality public transport access to St. Stephen's Green and to this area of the city, thereby reducing car dependency, noise levels and improving air quality, while allowing citizens to enjoy St Stephen's Green long into the future.</p> <p>With regard to the permanent elements of 'upstanding structures' introduced into the park, for example the ventilation structures, these will incorporate materials chosen to respect the surrounding 18th century Georgian brick architecture. Please also refer to Responses (1) and (2) above.</p> |

| DAU Cover Letter - Re: Railway (Metrolink - Estuary to Charlemont via Dublin Airport) Order [2022] Metrolink. Estuary through Swords, Dublin Airport, Ballymun, Glasnevin and City Centre to Charlemont, Co. Dublin. |                                        |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| 6                                                                                                                                                                                                                    | Cover letter - Architectural Heritage  | 9        | The Department is concerned that the underlying significance of the historic city and suburbs (including medieval origins, the surviving legacy of the Georgian city, and the later designed elements and landscape of the C19 <sup>th</sup> suburban expansion) would be undervalued where a narrow focus is placed on the proposed route, and where individual sites and historic places are not fully evaluated.                                                                                                                                                                                                                                 | <p>TII would like to provide the assurance that the underlying significance of the historic city and suburbs is respected and has been taken account of by the EIAR, in particular Chapter 26 Architectural Heritage. All potential impacts on individual sites and historical places are fully evaluated in the EIAR (again in particular at Chapter 26) and all required mitigation measures are identified, described and assessed).</p> <p>The proposed route is entirely below ground through the historic city and its suburbs, with the exception of necessary above-ground elements at stations such as accesses, ventilation shafts and skylights, which have a very localised presence. In some cases, such as Collins Avenue, Mater and St. Stephen's Green stations, the ground above is to be reinstated following construction, while at other locations, such as O'Connell Street, Tara Street and Charlemont Stations, the above-ground development would be carried out by others. In all cases, reinstatement and landscaping will be required to integrate the MetroLink above ground elements sympathetically with the existing environment and will need to be agreed with DCC.</p> <p>For this reason, the impact of the Project when complete will have a physical presence that is in keeping architecturally with the existing environment, with no direct impacts on the architectural heritage of a wider area.</p> <p>The EIAR assessment does also consider the wider effects of construction and tunnelling activity in terms of the impact of construction generated vibration and settlement on buildings beyond the immediate surface elements of the Project. The outputs of these assessments have fed into the analysis presented in Chapter 26 Architectural Heritage.</p> |
| 7                                                                                                                                                                                                                    | Cover letter - Architectural Heritage  | 9        | A key concern arising is that the architectural heritage impact has not been adequately considered in its widest context. The effect on protected structures and the mature character of their settings, and the impact of enabling works, demolition, excavation, construction and intensification of use have not been fully identified or appraised. Planning permission for works adjacent to protected structures typically is addressed in detail to ascertain the impacts on significance and character in the context of the Planning & Development Act 2000, and as per the Architectural Heritage Protection Guidelines, published 2011 . | EIAR Chapter 26, Architectural Heritage, assesses the potential impacts of the proposed Project on all elements of architectural heritage and identifies potential for direct and indirect impacts on these features. As the majority of the proposed Project is underground, the areas where there is potential for direct impacts are few. Potential impacts on Protected Structures and their settings resulting from the proposed Project (due to the proposed works) on each individual feature are presented in Section 26.5 of EIAR Chapter 26. For each feature, there is a description for the potential element of the works that could cause an impact and the significance of effect on each site is presented (based on a rating of the value of the site and the potential magnitude of impact) together with all required mitigation measures.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| 8                                                                                                                                                                                                                    | Cover letter - Architectural Heritage  | 9        | <p>The impact arising from this infrastructural project includes extensive excavations in close proximity to protected structures, historic infrastructure, the demolition of boundaries, alteration of formal squares and streetscape character, and the removal of mature settings and amenity from C18<sup>th</sup> and C19<sup>th</sup> residential conservation areas. The cumulative scale of the impact is of particular concern.</p> <p>The overall impact that will occur has not been fully documented, nor has adequate provision been made for conservation and re-making post construction.</p>                                        | <p>The impact of enabling works, demolition, excavation and construction are identified, described and assessed in the EIAR Chapter 26, Architectural Heritage. Further, undertakings have been given to have conservation method statements prepared by the Project Conservation Architect and be implemented at construction stage.</p> <p>Please also refer to Response (7) above.</p> <p>The construction methodologies assessed are neither unusual nor novel and have been proposed based on the environment within which the works are to be undertaken and are commonplace in many urban settings adjacent to protected structures and historic infrastructure. Impacts can be managed in accordance with the Construction Environmental Management Plan (CEMP) to minimise impacts.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| 9                                                                                                                                                                                                                    | Cover letter - General recommendations | 10       | The Department would welcome further consideration of the design strategy, in particular the 'cut and cover' approach and would favour tunnelling where possible to avoid architectural heritage impacts. It should be noted that this approach may facilitate more timely delivery, as it will reduce reliance on demolition and disturbance of existing built heritage.                                                                                                                                                                                                                                                                           | <p>The majority of the proposed alignment, and all of the sections through fully developed urban areas will be tunnelled, minimising impacts on the existing urban fabric and the built heritage. With regards to stations, even for mined stations, surface penetrations are necessary to enable the construction of a mined station, and also for access to the station when operational, plus surface penetrations required for ventilation, lifts and emergency access. As a result, some amount of impact on architectural heritage is unavoidable, but noting this is minimal for the reasons set out by Response (7) above.</p> <p>It is also incorrect to state that mined stations construction will deliver a more timely delivery, in fact the Alternatives Assessment EIAR Appendix A7.7 demonstrates that mined station construction would serve to lengthen the overall duration of the construction programme and its environmental effects.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| 10                                                                                                                                                                                                                   | Cover letter - General recommendations | 10       | The Department would also welcome the careful consideration by An Bord Pleanala of all the aspects of the proposed technical design, the scale of excavation, the vibration tolerances and proposed approach to water management with regard to the possible impact on architectural heritage, i.e. brick basements, areas, and cellars as identified. The close proximity and under tunnelling of National Institutions and the prominent cultural sites of the city along with historic infrastructure such as the Royal Canal and its crossings are noted                                                                                        | <p>TII would like to provide the assurance, as evidenced by the extensive nature of the EIAR, that all possible environmental impacts have been identified, described and assessed, and where necessary, mitigated.</p> <p>Tii confirm that the environmental impacts on the city's architectural heritage have been assessed including:</p> <p>1. vibration impacts<br/>2. the proposed approach to water management with regard to the possible impact on architectural heritage<br/>3. brick basements and cellars as identified.<br/>4. tunnelling of National Institutions and the prominent cultural sites<br/>5. tunnelling and construction works in proximity to historic infrastructure such as the Royal Canal and its crossings are noted.</p> <p>The impacts and proposed mitigation measures are detailed in the following EIAR chapters:</p> <p>Technical design and scale of excavation, refer to Chapters; 4 Description of the Project, 5 MetroLink Construction Phase, and the Non-Technical Summary;</p> <p>Vibration tolerances, refer to Chapters 13 and 14 where airborne and groundborne noise and vibration are considered respectively;</p> <p>Water Management, refer to Chapters 18 Hydrology, and 19 Hydrogeology.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

| DAU Cover Letter - Re: Railway (Metrolink - Estuary to Charlemont via Dublin Airport) Order [2022] Metrolink. Estuary through Swords, Dublin Airport, Ballymun, Glasnevin and City Centre to Charlemont, Co. Dublin. |                                                               |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |  |
| 11                                                                                                                                                                                                                   | Cover letter - General recommendations                        | 10       | The Department welcomes the appointment of a Project Conservation Architect for the lifetime of the construction programme as it develops with the input of industrial heritage and stained glass specialists. To support the cultural heritage strategy the appointment of a bespoke Heritage Works Contractor is envisaged for the future works and this is regarded as being of great importance in securing good long-term heritage outcomes.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | As outlined in EIAR Appendix A5.1 Construction Environmental Management Plan (CEMP), specialists with appropriate skills and experience will monitor on-site construction on behalf of TII, where required. In terms of Architectural Heritage this will include a Project Conservation Architect with the required expertise and experience who will have responsibility for each site along the alignment. A Cultural Heritage Strategy has been prepared by TII's Project Archaeologist and Conservation Architect, who will remain involved for the duration of the Project (Section 6.8 of the CEMP). For any heritage works carried out by TII's contractors, these will be carried out and managed by organisations and persons who are qualified and experienced in this field of work and are deemed competent.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |  |
| 12                                                                                                                                                                                                                   | Cover letter - General recommendations                        | 10       | The Department recommends that these provisions should be further supported by the appointment in each site of a Conservation Architect with demonstrable expertise and experience in urban design in historic contexts to identify, confirm and develop the record of the historic fabric, inform appropriate levels of intervention and protection, and to guide future conservation and make good original character and historical design intent.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | Please refer to Response (11) above.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |  |
| 13                                                                                                                                                                                                                   | Cover letter - General recommendations                        | 10       | With regard to the proposed surface station design the Department notes that a substantial number of new stations will be built and that they will be constructed within contemporary and historic settings. While an overall coherence of design across stations is anticipated, the Department recommends a heritage-led approach within areas of significant historic character to ensure high quality design and the use of appropriate materials and craft skills etc. This approach should be agreed in each instance with the Local Authority Architectural Conservation Officer and the Department.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | TII believe the commissioning of internationally renowned architects, Nicholas Grimshaw and Partners, has delivered a contemporary station design which is appropriate for a state of the art metro system such as Metrolink. Appropriately, significant emphasis is placed on the public spaces. Where feasible, the station concourse is a soaring space illuminated from above with natural light. Dublin's rich architectural heritage has been respected, but not copied in a pastiche imitation. In accordance with best conservation principles, as set out in the ICOMOS Venice Charter of 1964, the stations are architecturally distinguishable so as not to falsify the existing historic context. Reference and due respect to that context is made through the choice of high quality and appropriate materials and the scale of the interventions. At Mater station, the canopy entrance evokes the scale of park structures. At St Stephen's Green, the materials of the ventilation structures are chosen to respect the surrounding 18th century Georgian brick architecture. The aesthetic values of all eras, including our own, have cultural validity, and therefore the brick is used in a contemporary way reflecting contemporary aesthetic idioms derived from 21st century technology. TII believe the current station and surface level designs greatly enhance the public realm at all locations along the MetroLink route. There is a unifying commonality in the design of all stations, providing a consistent and coherent architectural language, which assists with orientation and wayfinding, and contributes a new architectural lexicon to the cultural iconography of the city. |  |
| 14                                                                                                                                                                                                                   | Cover letter - Site specific recommendations and observations | 10       | Santry Lodge<br>Proposals provided in the context of Santry Lodge could potentially undermine the surviving significance of the historical demesne and its cultural heritage importance. Engineer-led design proposals in this context appear not to have sufficient regard to the surviving integrity of the former C18 <sup>th</sup> estate and its planned landscape as evidenced by historical mapping. The proposed interventions would have impact on the architectural heritage of this area and have not adequately evaluated the architectural significance and character of the surviving element of Santry Lodge, its entrance and boundary and its still discernible relationship to the wider planted landscape. The Department would welcome further consideration of the proposals to ensure the long-term survival of the lodge                                                                                                                                                                                                                                                                                                                                                                                                 | At the time of the Railway Order application, Santry Lodge, its gate lodge and gateway were not designated as a Protected Structure and not included in the NIAH, nor are the grounds of Santry Lodge included in the NIAH garden survey.<br><br>Notwithstanding the lack of statutory protection at the time of the Railway Order application, the EIAR has treated Santry Lodge as a significant structure, equivalent to being included in the NIAH. All potential significant impacts on Santry Lodge have been identified, described and assessed in Chapter 26 of the EIAR with proposed mitigation measures described in Section 26.7.1, Table 26.66. It is also important to note that the proposed design has been developed to avoid any direct impacts on Santry Lodge itself and while it is acknowledged that the alignment traverses the curtilage of this structure, it is unavoidable in the context of crossing the M50 Motorway at this location.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |  |
| 15                                                                                                                                                                                                                   | Cover letter - Site specific recommendations and observations | 11       | Lissenhall Bridge<br>The Department would welcome careful consideration and the provision of detailed survey of this early structure and its historic setting as it retains cultural significance and integrity. Further information is necessary to understand the overall condition and structural capacity to inform the level of intervention and to minimise adverse impact on the bridge's historic character. Due to the scale of the proposal insufficient information is available to ascertain the overall impact to this protected structure/monument and to gauge the proposed conservation outcome                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | As noted by Response (3) above, the EIAR identifies, describes and assesses all significant impacts of the project on the Bridge. Hoardings will be located and designed to ensure there is no risk to the Lissenhall Bridge structure from construction works, plant and equipment, and that there are no proposals for construction work to occur within 10m of Lissenhall bridge.<br><br>TII commit to procuring the main works contractor to undertake further surveys and assessments prior to commencement of works (in order to update existing surveys and results and data held) to ensure that the Lissenhall bridge is protected from the Metrolink works. In the unlikely event these assessments dictate that further protection measures are required, TII will agree with the Department the form and nature of any measures required. The assessments and mitigations will respect the bridge's historic setting and cultural significance.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |  |
| 16                                                                                                                                                                                                                   | Cover letter - Site specific recommendations and observations | 11       | Glasnevin Interchange<br>This site comprises earlier railway infrastructure in the ownership of Irish Rail and the historic canal infrastructure in the ownership of Waterways Ireland. The Department would welcome the careful consideration and detailed survey of these complex historic settings, their fabric and historic relationships to minimise adverse impact on the architectural heritage significance and historical function and to minimise the loss of historic fabric, mature planting and amenity. The re-making of the former bridge at Glasnevin Station in close proximity to the canal gates is welcome to preserve an integral part of the historic canal character. However, it is recommended that the bridge be put back on a permanent basis and made part of a well-considered design in the context of the surviving stonework. Detailed design and co-ordination with service routes is required for agreement with the Department. As noted above, it is recommended that interventions in historic areas such as Glasnevin be heritage led and of high quality, including the use of appropriate materials etc., all to be agreed with the Department and Local Authority Architectural Conservation Officer. | The bridge referred to is a temporary structure to facilitate access to the Coke Oven Cottages during station construction works. The temporary structure will be removed following the completion of the works. There are no plans to remake/reinstate the original bridge structure at this location which was removed in the 1980's.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |  |

                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| 17                                                                                                                                                                                                                   | Cover letter - Site specific recommendations and observations | 11       | <p>O'Connell Street</p> <p>The proposed subterranean station is envisaged as part of the wider O'Connell Street regeneration area and is to be integrated with the proposed re-development of this historic urban block and streetscape fronting O'Connell Street known as Dublin Central, Site 2. This development is the subject of a separate planning permission which seeks substantial demolition of the street fronted buildings to O'Connell Street. The designation of O'Connell Street as the first Architectural Conservation Area in Dublin was based on detailed survey and research and affirmed the cultural significance of the place associated with significant events of our past, particularly relating to the formation of the State. (Refer to attached in Appendix). The Department was informed that the design of the proposed station was intended to avoid adverse impact on the adjoining National Monuments site at Moore Street. While this is acknowledged, the wider urban block will be impacted upon by the proposed construction methodology. In this regard the options discussed by the EIAR suggest that the development of the station can go ahead regardless of the planning outcome for the development of Dublin Central (which facilitates the proposed 'cut and cover' approach). This suggests that the removal of extensive historic streetscape may be avoidable. As previously noted, it is recommended that interventions in historic areas such as Moore St. be heritage led and of high quality, including the use of appropriate materials etc., all to be agreed with the Department and Local Authority Architectural Conservation Officer.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | <p>TII and the developer of the Dublin Central Scheme (Hammersons) have worked closely together to ensure that both developments are complementary to one another and can be delivered in parallel provided that a Railway Order has been granted for MetroLink and planning permissions for the Dublin Central scheme has been granted. The EIAR assesses the environmental impact for two potential scenarios.</p> <p>• The first scenario envisions the shell of the MetroLink station box being constructed as part of the Dublin Central development. The planning application for the Dublin Central Development includes for the shell of the MetroLink Station box.</p> <p>•The second scenario envisions a situation whereby the Dublin Central scheme is delayed significantly or will not progress to construction. In this scenario the entire station box (shell and finishes) will be constructed by Transport Infrastructure Ireland.</p> <p>It is important to clearly state the following:</p> <p>• In Scenario 1, and in accordance with the Transport (railway infrastructure) Act, 2001, should the Dublin Central Scheme receive planning permission, works on the MetroLink Station shell cannot commence until a Railway Order for MetroLink has been granted.</p> <p>• In scenario 2, TII will construct the entire station box (shell and finishes), subject to a Railway Order having been granted.</p> <p>For this reason and as correctly stated in the DAU's submission "the development of the station can go ahead regardless of the planning outcome for the development of Dublin Central". In both scenarios, the extent of demolition of structure to the rear of street fronted buildings to O'Connell Street that is required has been assessed as part of the EIAR.</p> <p>Impact on the National Monument</p> <p>In the EIAR Chapters; 25 Archaeology and Cultural Heritage, and 26 Architectural Heritage, Dublin Central Site 2 was considered in the Do-Nothing Scenario to assess the potential impacts should that project not proceed. Section 26.5.1.10.1 of Chapter 26 notes that the in the event of Dublin Central Site 2 not proceeding, clearance works would still need to be undertaken to facilitate the proposed Project. These works would be carried out under the supervision of a PCA and mitigation measures would be in place to protect the facades of the buildings impacted. In either scenario there are no impacts to the National Monuments in this area.</p> <p>TII also confirm that interventions in historic areas such as Moore St. will be respected, the relevant authorities consulted, and that as noted by our Response (11) above, specialists with appropriate skills and experience will monitor on-site construction on behalf of TII, and that any heritage works carried out by TII's contractors will be carried out and managed by organisations and persons who are qualified and experienced in this field of work and are deemed competent.</p> |
| 18                                                                                                                                                                                                                   | Cover letter - Site specific recommendations and observations | 12       | <p>Mater</p> <p>This small enclosed park is identified as a rare amenity space for the community within the north Georgian character area and the setting of a grotto and a C20th high cross to the Four Masters, which gives the name to the park. The memorial is described as follows; 'This high cross on a large plinth commemorates the Franciscan friars of Donegal town, who between 1632 and 1636 compiled from early sources a history of the ancient kingdom of Ireland which became known as the Annals of the Four Masters. The Annals are chronicles of the medieval history of Ireland.' The proposed intensification of use as an entrance to the subterranean station will have a substantial effect on the use and benefit of this recreational space. The temporary dismantling of fabric and its removal to storage is ultimately destructive and results in loss of cultural significance, authenticity and integrity. Whilst the architectural character of the park today is defined by the presence of the historic classically fronted Mater hospital, an underlying significance is known to exist relating to Gardiner's unfulfilled ambition for the Georgian city. Excavations discovered the footprint and foundation stones for the great circus that was planned but never built in this location. The proposed excavation by 'cut &amp; cover' approach and the removal of the surviving elements of this grand vision is not supported by this Department. The proposed construction from the top down of the large scale subterranean box will have a significant and immediate impact on the adjoining historic fabric extending beyond the boundaries of the Four Masters Park. Adjoining the park is the site of St. Joseph's Church which is included in the overall public realm design and this Department, as before, notes the requirement for interventions to be heritage-led and of high quality, in this case, using appropriate materials to reference the Georgian architectural character area with all detailed design to be based on an understanding of the historical context and agreed with the Department and the Local Authority Architectural Conservation Officer</p> | <p>The amenity and historical value of the park are fully understood (as outlined in EIAR Chapter 26 Architectural Heritage, section 26.4.4.8.2). This was fully considered in the development of the proposed station design, resulting in the park being largely retained in its current shape and layout, with all elements of architectural heritage being reinstated. It is TII's view that while the temporary removal of the Four Masters Cross, Healing Hands sculpture and the construction of the station box will have a short-term impact on the amenity of the area, the final reinstatement of all of these elements (as well as the park layout) will ensure that the impact on the character of the park is minimised.</p> <p>The former existence of the street pattern of the Royal Circus is also understood and is referenced in EIAR Chapter 26, section 26.4.4.8.2, and in this context it is important to note that the proposed station will not alter the street layout in this area.</p> <p>The intended compulsory purchase of the park as part of the Railway Order Application will allow TII to open the reinstated and improved park to the wider public who will be able to fully avail of its extraordinary amenity value.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

Estuary through Swords, Dublin Airport, Ballymun, Glasnevin and City Centre to Charlemont, Co. Dublin. |                                                               |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 19                                                                                                                                                                                                                   | Cover letter - Site specific recommendations and observations | 12       | <p>St Stephens' Green</p> <p>The cultural significance of St. Stephen's Green formed the basis of several pre-planning discussions and the Department advised of the key concerns pertaining to the works in the context of the surviving cultural landscape.</p> <p>As previously noted, the Department would welcome An Bord Pleanála's further consideration of the design strategy and evaluation of the construction approach of the large stations in particular to avoid the 'cut and cover' and 'top-down' approach where possible, in favour of tunnelling to avoid/minimise architectural heritage impacts as an integral part of overall design strategy to safeguard cultural heritage significance and the adjoining sites of national importance. Furthermore, the Department would welcome the further consideration by An Bord Pleanala of the modified version of Options as presented by MetroLink, so that the station footprint is situated externally to the Green enclosure in order to restrict the scale of the construction/work within the park. Similarly the reconsideration of these options would remove vent shafts or skylights exiting within the railed area of St Stephens Green. The proposal to include these elements within the Green requires planting exclusion zones and maintenance access areas, diminishing the established areas of planting and the overall amenity space and habitat provision. Consideration of other viable options such as the construction below the carriageway to St. Stephen's Green or partial construction underground would reduce the impact at surface level. For example, a reduced construction/work area at the Wolfe Tone corner may be achieved to permit a more discreet construction of the escalator shaft and public lift to access the proposed subterranean station.</p> <p>In summary, the Department would welcome the further consideration of the design approach and the relocation of the construction zone eastwards away from the internal core of St Stephens Green, to protect the existing trees and to safeguard the historic setting and integrity of the Park. As previously noted, any interventions within historic areas such as St. Stephen's Green should be heritage - led and of high quality, including the use of appropriate materials etc., all to be agreed with the Local Authority Architectural Conservation Officer and the Department.</p> | <p>Please refer to Responses (1), (2) and (5) above. As outlined, TII have undertaken a robust and extensive options/alternatives assessment to identify the preferred location and construction methodology for the proposed station at St. Stephen's Green. The requirement for planting exclusion zones and maintenance access areas will be minimal, as noted previously, and once construction is complete and MetroLink is operational, MetroLink will occupy just 0.2% of the Park. Therefore, it is considered by TII that no significant diminishment of established areas of planting and the overall amenity space and habitat provision is materially impacted.</p> <p>TII recognise the historic and cultural importance of St. Stephen's Green and that the intervention in to the Park will be dealt with respectfully and with care. TII confirm that they will engage and consult with the Local Authority Architectural Conservation Officer and the Department, and as noted by response (11) above, specialists with appropriate skills and experience will monitor on-site construction on behalf of TII, and that any heritage works carried out by TII's contractors will be undertaken and managed by organisations and persons who are qualified and experienced in this field of work and are deemed competent.</p> <p>The work area at the Wolfe Tone corner is dictated by the design of the station and cannot be simply reduced as it has been sized to support the extensive construction required for this option.</p> |
| 20                                                                                                                                                                                                                   | Cover letter - Site specific recommendations and observations | 14       | <p>Charlemont</p> <p>The Department regards the construction of the large subterranean station integrated with the commercial development at this location as a significant impact on the setting and architectural character of the protected structures and Architectural Conservation Area of Dartmouth Square. Detailed conservation proposals are required to off-set the negative impacts that are apparent with this station construction i.e. the repair and conservation of historic structures, boundaries and settings to restore the overall architectural character of the area. The Department, as before, recommends that interventions be heritage-led and of high quality, in this case using appropriate materials to reference the late Victorian architectural character area with all detailed design to be based on an understanding of the historical context and agreed with the Department and the Local Authority Architectural Conservation Officer.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | <p>TII recognise the setting and architectural character of the Protected Structures and Architectural Conservation Area (ACA) of Dartmouth Square and commit to dealing with this respectfully and with care. EIAR Chapter 26, Architectural Heritage, includes as a mitigation measure the requirement for the Project Conservation Architect to prepare conservation method statements which will be implemented in order to ensure the protection of features in the ACA such as historic granite steps, kerbing and lamp posts to safeguard the architectural character.</p> <p>Mitigation measures are outlined within Chapter 26, Section 26.7.1 to mitigate the negative impacts of the proposed Project on the architectural heritage throughout the Project footprint. TII can confirm that they will engage and consult with the Local Authority Architectural Conservation Officer and the Department, and as noted by our Response (11) above, specialists with appropriate skills and experience will monitor on-site construction on behalf of TII, and that any heritage works carried out by TII's contractors will be undertaken and managed by organisations and persons who are qualified and experienced in this field of work and are deemed competent.</p>                                                                                                                                                                                                                                                                      |

|                                                                                                                                                                                                                      |                                    |          | | DAU Cover Letter - Re: Railway (Metrolink - Estuary to Charlemont via Dublin Airport) Order [2022] Metrolink. Estuary through Swords, Dublin Airport, Ballymun, Glasnevin and City Centre to Charlemont, Co. Dublin. |                                    |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| 21                                                                                                                                                                                                                   | Cover letter - Nature Conservation | 19       | <p>Recommendations</p> <p>In light of the above the Department recommends that any Railway Order granted in response to the present application should be subject to the following conditions:</p> <p>1. That all the mitigation measures to avoid the pollution of surface water runoff during the construction phase of the proposed development set out in the NIS supporting the present application shall be incorporated in a CEMP, a Water Management Plan (WMP) and a Soil Erosion and Pollution Control Plan to be submitted to the planning authority for its written agreement before the commencement of works, and these plans shall be implemented in full.</p> <p>Reason: To avoid the pollution of surface water courses in the vicinity of the proposed development resulting in adverse effects on aquatic flora and fauna and the Qualifying Interests (QIs) of downstream coastal European sites designated under the Habitats Directive (92/43/EEC) and the Birds Directive (2009/1 47/EC).</p> <p>2. That no removal of trees or vegetation to facilitate the proposed development shall occur during the main bird breeding season from March to August inclusive.</p> <p>Reason: To avoid the destruction of bird nests, eggs and nestlings.</p> <p>3. That any trees with potential bat roost features (PBRs) to be felled to facilitate the proposed development shall be resurveyed for bats before their removal, using if necessary endoscopes, and if the presence of any bat is identified in such a tree, it shall only be felled on the receipt of licence from the National Parks and Wildlife Service (NPWS) of this Department to derogate from the Habitats Directive to destroy a bat breeding or resting place.</p> <p>Reason: To avoid the death or injury of members of species, namely bat species, afforded a system of strict protection under the Habitats Directive (92/43/EEC).</p> <p>4. That 30 no. 2F Schwegler bat Boxes shall be installed along the MetroLink route, and that the lighting design for the proposed development, signed off on by a bat specialist and incorporating measures to minimise light spill pollution, shall be submitted to the planning authority for its written agreement before the commencement of any development on site, this lighting design to be implemented in full.</p> <p>Reason: To conserve bat species which are afforded a system of strict protection under the Habitats Directive (92/43/EEC).</p> <p>5. That a Cross Guns Otter Bypass Plan, to be drawn up in co-operation with the National Parks and Wildlife Service (NPWS) and Waterways Ireland, shall be submitted to the planning authority for its written agreement before the commencement of any works in connection with the proposed scheme in the vicinity of the 5th and 6th Locks and Cross Guns Bridge, Phibsborough; this plan to provide for the preservation of movement of otters along the Royal Canal as far as possible past the works on Glasnevin Station for the duration of these works.</p> <p>Reason: To maintain free movement along the Royal Cana! of a mammal species, namely otter, afforded a system of strict protection under the Habitats Directive (92/ 43/EEC), and which forms an important element of the city of Dublin fauna.</p> <p>6. That the areas along the MetroLink route identified in the EIAR supporting the present application as being suitable habitat for amphibians should be surveyed for such animals before the commencement of any works on these areas, and if any spawn, larvae or adults of frog or smooth newt are identified during these surveys, they shall be removed to suitable habitat nearby under licence from the NPWS.</p> <p>Reason: To conserve species, namely frog and smooth newt, protected under the Wildlife Acts, 1976 to 2022.</p> | <p>The majority of the measures / proposed conditions are addressed in either the EIAR Chapter 15 Biodiversity, or the Natura Impact Statement (NIS). TII have reviewed each of the proposed conditions and comment as follows:</p> <p>Proposed Conditions 1, 3, 4, and 6: TII confirm their agreement to these conditions.</p> <p>Proposed Condition 2: TII would ask that this condition is amended to read "Where feasible no removal of.....". In the event this is not feasible for reasons of programme, an alternative approach would be taken such as breeding bird checks before removal is undertaken. This condition goes beyond the restrictions set out in the Wildlife Acts with respect to vegetation clearance and breeding bird habitat, which contains an exception for "in the course of road or other construction works or in the development or preparation of sites on which any building or other structure is intended to be provided"</p> <p>Proposed Condition 5: The DAU condition states 'That a Cross Guns Otter Bypass Plan, to be drawn up in co-operation with the National Parks and Wildlife Service (NPWS) and Waterways Ireland, shall be submitted to the planning authority for its written agreement before the commencement of any works in connection with the proposed scheme in the vicinity of the 5th and 6th Locks and Cross Guns Bridge, Phibsborough...'</p> <p>Chapter 15, Section 15.5.1.4.3 of the EIAR sets out the mitigation measures to deal with the severance/barrier effect identified by the DAU. It proposes that temporary mammal-resistant fencing is erected at the dewatered basin between Locks 6 and 5. That will provide a safe path for commuting otter. The fencing/path will be installed in accordance with the specification outlined in Guidelines for the Treatment of Otters prior to the Construction of the National Road Schemes (NRA, 2008c) and TII's mammal resistant fencing specification. It will also be regularly inspected by an ecologist over the six-month period to ensure its effectiveness and if necessary, adjustments will be made to maintain functioning.</p> <p>TII is satisfied that will be sufficient to avoid any severance/barrier effect at this location, it has no difficulty with a condition requiring it to agree the details of the mitigation with Dublin City Council in consultation with NPWS and Waterways Ireland. In that regard, it is not clear whether NPWS is proposing a different mitigation approach and TII will seek to clarify this with NPWS with a view to presenting an agreed approach in advance of the oral hearing.</p> <p>Ref Wolfe Tone monument.</p> <p>TII believe that the proposed relocation of the Wolfe Tone Monument is appropriate and is sympathetic to St Stephen's Green and its historic setting.</p> <p>Ref Carroll's Building.</p> <p>The proposed orientation of the Charlemont station is clearly shown in the RO Plans\Drawings, Structures Details Book 2 of 3 MetroLink Stations Dublin City Council, ref Plan No. ML-ST 307 O-A1.</p> <p>The assessment of impact of the proposed works on the architectural significance is given in EIAR Chapter 26 Architectural Heritage. Refer to Table 26.66, Impact Reference AHI-102 to 104.</p> <p>Assessment of the structural integrity due to the station construction is discussed in EIAR Appendix A5.17 Building damage report which notes that '<i>While the ground movement impact assessment has concluded that protection works are not necessary, due to the proximity of the building to the station excavation, it is proposed, as a precaution, that provision at this time is made to be able to treat the ground beneath the building from the station site in the event ground movement mitigation is necessary</i>'.</p> |

| RE: Submission in respect of Application for Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022 Travelodge (Dublin Airport North), Pinnockhill, Swords, Co. Dublin. (Land owner- Devonmill Limited) |                                           |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |  |
| 1                                                                                                                                                                                                                        | Section 3.1 Hotel as a Sensitive Land Use | 9        | As evident in Section 2.0 of this Submission, the Travelodge Hotel will be significantly affected by the proposed works associated with the Metrolink project for a prolonged period of time (4-6 years). The construction works will result in restricted hotel access, traffic congestion in the surrounding area due to road closures and diversion, disturbance arising from the construction works and a potential permanent loss of car parking. | <p>Impacts of construction traffic to the vicinity of the property is limited to vehicles serving Pinnockhill site only, where a general movement of less than 50 vehicles per day throughout construction has been calculated. See Section 5.5.4 of Appendix A9.5.</p> <p>The proposed closure of the R125 South arm will be limited to 18 months for unavoidable works, building the cut &amp; cover section beneath the R125 - with pedestrian and cyclist access to be maintained to limit adverse impacts to the area. The detailed plans for traffic management around this property during the construction phase are detailed in Section 5.5 of Appendix A9.5 of the EIAR.</p> <p>While diversions from the north and west are considerable, there is also alternative routing via Mountgorry Way. Further, traffic coming from Dublin City Centre and Dublin Airport will experience a much reduced level of diversion compared to northwest originating traffic, with only a 200m difference in route distance compared to 1.7km for traffic from the north and west.</p> <p>Other impacts arising from the construction works, including loss of car parking, are summarised below.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |  |
| 2                                                                                                                                                                                                                        | Section 3.1 Hotel as a Sensitive Land Use | 9        | <p>We highlight the sensitivity of a hotel in this regard and the resultant potentially significant impact of the proposed works on the operation of the hotel.</p> <p>Both the physical and perceived attractiveness of the hotel will be acutely affected by its proximity to the construction works, resulting in a detrimental impact on the guest experience.</p>                                                                                 | <p>TII note your concern about hotel attractiveness, accessibility and operation during construction works for MetroLink and will continue to engage with Devonmill Limited to find ways to maintain guest experience during the delivery of MetroLink.</p> <p>TII can confirm that construction works will be managed during the duration of works and that appropriate mitigation measures to reduce negative construction phase effects on the Travelodge from noise and dust will be implemented, where practicable. The Outline Construction Environmental Plan (CEMP) (EIAR Appendix A5.1) provides a framework under which the construction activities will be managed to minimise potential negative environmental effects during the construction phase. Contractors will be required to comply with the appropriate mitigation, monitoring, inspection and reporting mechanisms outlined in this document, in addition to all legislation and by laws relating to the construction activity (EIAR Appendix A5.1, Section 1.1 ). Specific mitigation for noise and dust are outlined in EIAR Chapter 13 Airborne Noise and Vibration (Section 13.6.1) and the Dust Management Plan (EIAR Appendix A16.4). Measures to reduce negative construction phase effects on the Travelodge from noise and dust will be implemented, where practicable and are detailed in EIAR Chapter 13 Airborne Noise and Vibration (Section 13.6.1), the Dust Management Plan (Appendix A16.4) and the Outline CEMP (Appendix A5.1).</p> <p>During cut and cover works, the Travelodge will remain above the Construction Noise Threshold (CNT) of 75dB, with the inclusion of on-site control measures and enhanced hoarding heights in line with the TII Airborne and Groundborne Mitigation Policy (EIAR Chapter 13, Section 13.7.1.1.1 ). As a result, residual impacts are determined to be Moderate to Significant for the Travelodge. Appendix A14.6 of the EIAR sets out a noise mitigation policy for residential properties adversely affected by the construction phase. Although this does not cover commerical property TII intend to engage positively with the Travelodge to agree suitable mitigation measures.</p> <p>In terms of air quality, when the dust minimisation measures detailed in the mitigation section of Chapter 16 (Air Quality) are implemented, fugitive emissions of dust from the site are not predicted to be significant and pose no nuisance, human health or ecological risk to nearby receptors. The air dispersion modelling assessment of Construction Phase traffic emissions has found that the proposed Project resulted in no significant adverse effects (EIAR Chapter 16, Section 16.7.1 ).</p> <p>Vehicle and pedestrian access to the Travelodge will be maintained at all times during the construction phase, through planned diversions along the R132 that maintains full access to residents and businesses as the works are progressed. Please refer to Chapter 9 Traffic and Transport, Appendix A9.5, figure 5-41: R125 Pinnockhill Diversions, Scheme Traffic Management Plan. During construction under the R125, a dedicated off road active travel link will be built to provide a safe link for pedestrians, cyclists and vulnerable road users (EIAR Chapter 9, Section 9.6.1.2.1.3).</p> |  |

| Item No.                                                                                                                                                                                                                 | Section Ref.                                                     | Page No. | Observation Statement                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | TII Response                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |  |
| RE: Submission in respect of Application for Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022 Travelodge (Dublin Airport North), Pinnockhill, Swords, Co. Dublin. (Land owner- Devonmill Limited) |                                                                  |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |  |
| 3                                                                                                                                                                                                                        | Section 3.1 Hotel as a Sensitive Land Use (page 9 of submission) | 9        | <p>We raise significant concerns that potential customers researching the hotel prior to booking a room will have major apprehensions regarding issues of noise, dust, ambience and ease of accessibility (including using online tool such as Google earth and streetview) all of which are among the key criteria used to gauge whether or not to book accommodation in a given hotel. The fact that the hotel will adjoin construction works over a very prolonged period has the potential to seriously affect the hotel's core trading performance in the short to medium term and ultimately affect the reputation of the hotel as somewhere to stay in this part of the city.</p> <p>We are cognisant that a level of disruption and disturbance is unavoidable in these circumstances. However, we seek assurance that the construction works, where in such close proximity to sensitive land uses, will be genuinely managed to reduce impact upon the hotel, including noise, accessibility and appearance of the immediately surrounding area. As part of this, we seek assurance that the hotel will continue to be visible from the surrounding area, with limited impact upon views of the hotel from key approaches. We request that Travelodge is closely consulted with during every stage of construction.</p>                                                                                                                                                                                                                                                                                      | See response (2) above. TII will work with Travelodge to ensure that in so far as practicable the hotel will continue to be visible from the surrounding area, with limited impact upon views of the hotel from key approaches.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |  |
| 4                                                                                                                                                                                                                        | Section 3.2 Loss of Car Parking                                  | 9 & 10   | <p>As detailed above, it is proposed that land is acquired at the subject site (land take ref. MUS- AS) which would result in the loss of a section of the Travelodge car park, comprising 24 no. spaces.</p> <p>The Travelodge is strategically located in an out of city location, directly accessible from Dublin Airport and the surrounding national road network (M1) via the R125. As a result, accessibility by car and car parking availability are integral to the operation of the hotel. The loss of 24 no. car parking spaces would therefore result in a detrimental impact upon the business operation of the hotel.</p> <p>We therefore request that consideration is given to an alternative/ interim car parking solution for hotel guests during the construction process to ensure the optimal operation of the hotel during this time. Transport Insights in their observations, query whether temporary car parking spaces could be facilitated to the immediate east of the R125 road closure.</p> <p>Notwithstanding this, from reviewing the landscaping proposal, there appears to be provision for the reinstatement of the Travelodge Hotel's car park post-construction, despite it being highlighted for permanent landtake (see Section 2.0 above for details). We request clarity in this regard and would welcome the full reinstatement of the car parking area, in addition to an interim parking solution for the hotel during the construction process. As noted previously, the loss of car parking spaces will result in an adverse impact upon the operation of the hotel.</p> | <p>CPO Landtake (reference ML 1S-A3) is required for a portion of the car park to facilitate the cut and cover section of the project past the Travelodge Hotel. Upon completion of construction this landtake will be returned to Devonmill Limited and as per the landscaping drawings the car parking will be reinstated. It is anticipated that this land will be occupied for an estimated 3 years, while the works are completed through this area, before it is reinstated in accordance with the proposed landscape design and returned to Hotel use.</p> <p>TII will not be able to provide alternative car-parking at the site during the construction, however we are willing to work with Travelodge to identify the provision of suitable alternative carparking arrangements.</p> |  |
| 5                                                                                                                                                                                                                        | Section 3.3 Diversions and Traffic Disruption                    | 10       | <p>As noted in Transport Insights' observations, the proposed construction works, due to their proximity to the hotel, will result in significant diversions and restricted access to the hotel for a prolonged period of time. For example, if approaching from the R132 to the west, visitors accessing the hotel would face a significant diversion, in excess of 1.7 kilometres. Refer to Transport Insights' observations (Appendix C) for further details surrounding the estimated traffic related impacts that will result from the diversions, closures and construction-related traffic.</p> <p>In summary, we highlight that the proposed construction works will result in significant restricted vehicular access to the hotel. As a hotel that is strategically located in close proximity to the national road network, we raise serious concerns surrounding the impact on this on the hotel's trading performance. Transport Insights' observations should be referred to for full details in this regard.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | See response (1) above.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |
| 6                                                                                                                                                                                                                        | Section 3.4 Future Growth of the Hotel                           | 10       | <p>As noted in Section 1.3 of this Submission, the Travelodge Hotel has plans for future expansion, as reflected by extant planning permission (F17A/0756) for the construction of a four storey hotel and 55 no. additional hotel bedrooms. Whilst this permission is yet to be implemented, we confirm that our Client intends to further pursue the expansion of the Travelodge.</p> <p>We raise concerns that the future growth of the hotel will be impeded by the construction of the Metrolink project, in terms of ability to physically implement the permission and/or potential issues in securing a further planning permission in advance of the Metrolink project being complete.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | <p>TII are aware of the extant permission F17A/0756 and have assessed it as part of the Stage 2 Cumulative Impacts assessment in Chapter 30 of the EIAR. Based on the information available it was deemed that the projects would have no cumulative impacts.</p> <p>The MetroLink Project should have no impact on the ability to deliver existing or future planning permissions for development of the property. However, it is noted that decisions on future planning permissions will lie with Fingal County Council as the planning authority for the area.</p> <p>TII are happy to engage with your Client for any construction management required should the projects overlap in construction phases.</p>                                                                             |  |

| RE: Submission in respect of Application for Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022 Travelodge (Dublin Airport North), Pinnockhill, Swords, Co. Dublin. (Land owner- Devonmill Limited) |                                    |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |  |
| 7                                                                                                                                                                                                                        | Section 3.5 Restaurant Tenant      | 11       | <p>As noted in the introduction, the subject site also accommodates our client's tenant, Smoking' Bones (restaurant), who operate from the restaurant unit associated with the hotel. Like the primary hotel use, the restaurant will be acutely affected by the proposed construction works.</p> <p>In addition to the significantly reduced accessibility to the restaurant arising from the road closures and delays and general construction related disturbance, the restaurant will also be impacted by the loss of car parking spaces at the Travelodge Hotel site. The impact of this is amplified by the lack of on-street car parking opportunities in the surrounding area.</p> <p>In this context, we reiterate the serious impact of the loss of car parking spaces and the importance of facilitating an alternative parking solution during this period. Generally, the proposed works have the potential to significantly impact upon the attractiveness of the restaurant and therefore its viability. In turn, from our client's perspective, we highlight the potential consequences of this on the lease.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | See response (4) above                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |
| 8                                                                                                                                                                                                                        | Section 3.6 Delays and Uncertainty | 11       | <p>We further highlight that any decision that is made by An Bord Pleanála to make a Railway Order has myriad consequences for an affected landowner that go beyond the rules governing the assessment of compensation. Primarily, these consequences arise from the uncertainty surrounding the commencement date and date of completion if the Railway Order is confirmed.</p> <p>We acknowledge that the uncertainty surrounding the timing of the scheme generally arises from delays surrounding funding approval. Therefore, in our opinion, An Bord Pleanála should not confirm the Railway Order until such time that they are satisfied that at the date of Making the Railway Order, the acquiring Authority has funding in place to design the scheme, acquire the lands required for the scheme, in addition to the funding for the construction and completion of the scheme, without limitation.</p> <p>It is our further opinion that the Board should satisfy itself that the acquiring Authority is bound to proceed in a timely fashion if the Railway Order is confirmed. We highlight that under existing legislation, a Notice to Treat must be served within 18 months of the Railway Order becoming operative. A Notice to Enter may be served at any time thereafter enabling the acquiring Authority to take possession of the lands being acquired.</p> <p>However, and importantly, there are no statutory time limits imposed on the acquiring Authority in terms of preparing the final design for the Scheme approved, or indeed in respect of commencing or completing the works (i.e. the duration of the works). The Board should therefore be asked to impose binding conditions on the acquiring Authority in respect of these matters.</p> | <p>The Railway Order Application was made following a Government Approval of the Preliminary Business Case which detailed the funding requirements for the scheme. As such Government have approved the required funding and the scheme will commence when an Enforceable Railway Order is in place.</p> <p>Once a Railway Order has been granted TII will immediately expedite the design and delivery of the scheme to ensure its efficient and timely delivery in accordance with TII's commitments to Government as detailed in the approved Preliminary Business Case for the Scheme.</p> |  |
| 9                                                                                                                                                                                                                        | Section 4.0 Conclusion             | 12       | <p>In this context, we highlight the potential significant impact that the construction of the Metrolink project will have upon the operation of the hotel and associated restaurant, including the significant challenge that will arise in respect of maintaining a viable hotel business. As set out above, the hotel, due to the nature of the land use, will be acutely affected by the identified disruptions during the construction process and potentially into the long term, having regard to the loss of car parking.</p> <p>It is therefore imperative that the proposed works and associated impacts upon the Travelodge Hotel are given full consideration by An Bord Pleanála during the application process and by the relevant authorities throughout the construction process.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | See response for item (2) above                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |  |

|                                                                                                                                                                                                                          |                                                                                                 |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |  |

| RE: Submission in respect of Application for Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022 Travelodge (Dublin Airport North), Pinnockhill, Swords, Co. Dublin. (Land owner- Devonmill Limited) |                                                                                                 |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |  |
| 10                                                                                                                                                                                                                       | Appendix C, Transport and traffic related observations, Current Operational Concern             | 23       | The primary approach to the hotel (via Pinnock Hill Roundabout) will be closed for an 18-month period (years 4-6) causing a diversion of 1.7 kilometres for traffic travelling from/ to the west. As a result, the construction phase will have significant negative impact on the hotel access for the guests, staff and servicing (e.g. suppliers, refuse collection etc.). Furthermore, the proposed route for HGVs will result in a deterioration in traffic conditions along the R125 which will be the only approach to the hotel during the 18-month closure of the access from the west.                                                      | <p>Impacts of construction traffic to the vicinity of the property are limited to vehicles serving Pinnockhill site only, which will be considerably less than the average figure of 50 vehicles per day throughout construction. The proposed closure of the R125 South arm will be limited to 18 months for unavoidable works, building the cut &amp; cover section beneath the R125 - with pedestrian and cyclist access to be maintained to limit adverse impacts to the area. See Section 5.5 of Appendix A9.5</p> <p>While diversions from the north and west are considerable, there is also alternative routing via Mountgorry Way. Further, traffic coming from Dublin City Centre and Dublin Airport will experience a much reduced level of diversion compared to northwest originating traffic, with only a 200m difference in route distance compared to 1.7km for traffic from the north and west.</p> <p>HGV routes for the works are highlighted on Appendix A9.5 Scheme Traffic Management Plan, figure 5-38: Access to Pinnock Hill Junction to North Portal construction sites. All site entrances are proposed to be situated directly off the R132, including the Pinnock Hill Construction and Logistics Compound.</p>                                                                                                                                                                                              |  |
| 11                                                                                                                                                                                                                       | Appendix C, Transport and traffic related observations, Car Parking                             | 22 &23   | Based on the construction boundaries contained within the Draft Railway Order drawings, 24 no. car parking spaces of the north facing car park are to be permanently acquired for construction purposes, with uncertainty as to whether these would be returned to the hotel following the completion of construction works. This is deeply concerning for both the hotel and restaurant as the car park is vital for their operation since no on-street parking is available in the site's vicinity. It would also represent a significant risk to the future redevelopment of the site (see Tom Phillips + Associates Observation for elaboration). | <p>Permanent land required for the MetroLink Alignment and Temporary land take required for construction activities has been minimised wherever possible and boundaries adjusted to avoid and/or minimise impacts as far as possible. TII will continue to engage with Devonmill Limited to limit the impact of the works adjacent to the Hotel, including the acquisition of car park.</p> <p>In relation to the section of carpark at Travelodge Hotel proposed for CPO, TII confirm that this subject land (ML 1S-A3) will not be permanently taken following the completion of MetroLink Construction works. The land is required to support construction of the permanent cut and cover section within Pinnock Hill Roundabout area and to accommodate pedestrian and cyclist diversions around the works when the R125 leg is closed to create the cut and cover section under the R125 at the junction. Upon completion of construction works, the land will be landscaped as detailed and returned to its former use as a carpark. The proposed final landscape is provided on drawing ML1-JAI-ARL-SC03_XX-DR-Y-00006, sheet 8 of 13 Landscaping Drawings, Railway Order Plans\Drawings.</p> <p>The general arrangement drawing within the area of Travelodge Hotel (please refer to drawing no.ML1-JAI-ARD-ROUT_XX-DR-Y-03022) has been enclosed to the Notification letter CAP_ML_2400_97 issued on 20th of September 2022.</p> |  |
| 12                                                                                                                                                                                                                       | Appendix C, Transport and traffic related observations, Significant Risk of Programme Extension | 23       | The MetroLink project is unique in Ireland in relation to its technical complexity, duration and investment cost, with a significant risk of both programme and cost overruns arising. Such programme risks amplify our Client's concerns regarding the severe construction phase impacts outlined above.                                                                                                                                                                                                                                                                                                                                             | <p>TII have reviewed your submission and noted your concerns/observations. Please refer to responses to the issues/ concerns raised in detail.</p> <p>Once an Railway Order has been granted TII will immediately expedite the design and delivery of the scheme to ensure its efficient and timely delivery in accordance with TII's commitments to Government as detailed in the approved Preliminary Business Case for the Scheme.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |  |
| 13                                                                                                                                                                                                                       | Appendix C, Transport and traffic related observations, Summary and Outcome Sought              | 23       | As set out within this letter, proposals contained within the Draft Railway Order represent a significant risk to the ongoing operation of the hotel. In particular, the severance of access from the west for an 18-month period, and traffic impacts (i.e. diversions, HGV movements) along the proposed approach for the first 6 years of construction works that will result in an unacceptable and severe impact to the hotel.                                                                                                                                                                                                                   | See responses (1), (2), (4), (6) and (10) above.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |  |

| RE: Submission in respect of Application for Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022 Travelodge (Dublin Airport North), Pinnockhill, Swords, Co. Dublin. (Land owner- Devonmill Limited) |                                                                                    |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| 14                                                                                                                                                                                                                       | Appendix C, Transport and traffic related observations, Summary and Outcome Sought | 23       | Our Client believes that construction of the MetroLink project can be completed without the need to impact significantly on the hotel's operation. They request: <ul style="list-style-type: none"><li>• Further engagement with our Client in relation to construction and traffic management plans for the Swords area.</li></ul>                                                                                                                                                  | TII welcome your submission and are happy to engage further with Devonmill Limited regarding construction and traffic management plans within the area.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| 15                                                                                                                                                                                                                       | Appendix C, Transport and traffic related observations, Summary and Outcome Sought | 23       | <ul style="list-style-type: none"><li>• Consideration of changes to the traffic management plan to minimise the impacts on the hotel operation during the construction phase. This could include 'spreading' construction traffic onto other roads rather than the significant current concentration on the R132 and R125 in the site's immediate vicinity, and potential use of bailey bridge to lessen the duration of the R125 road closure adjacent to the hotel site.</li></ul> | The approach taken by TII to deliver the rail alignment beneath the R125 is the most practical solution at this location. The method of cut & cover construction proposed through the R125 is a top down construction phasing that minimises the duration that the road will be closed. Once the road is closed and utilities diverted, piling for the sides walls will take place followed by the casting of the roof slab for the structure. The road and utilities are then reinstated for the R125 across the partially completed structure. With the road now reopened, the works continue underneath with access provided from land on either side of the road. |

| Re: Observation on a Strategic Development Application |                                               |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| 1                                                      | Observation details<br><br>Section 5. Grounds | 4        | <p>Since the original “emerging proposed route “from Swords to Sandyford was first proposed, there have been a large number of factors which have had a modifying effect on the proposed route:</p> <p>1) The original study was done on the basis of Swords to Sandyford : there has been no major study done on the proposed terminal at Charlemont For something so vital to the success of Metrolink : in my view, this is a very serious omission.</p>                                                                                                                                                                                                                                                                                                                                                                                               | <p>TII would disagree with your assertion that "there has been no major study done on the proposed terminal at Charlemont". TII have undertaken considerable analysis, as set out by EIAR Chapter 7, Consideration of Alternatives, section 7.7.8 and Appendix A7.9 that concluded Charlemont was a better interchange than St Stephen's Green for the reasons set out below.</p> <p>The Board is required to have regard to the likely consequences for proper planning and sustainable development in the area in which it is proposed to carry out railway works (section 43(1) of the 2001 Act) and as such the following matters are relevant.</p> <p>The connection from St Stephens Green to Charlemont / Ranelagh is supported by the current Transport Strategy for Greater Dublin Area (2022-2042). The Transport Strategies were prepared by the National Transport Authority, scrutinised by the Joint Oireachtas Committee on Transport, and approved by the Minister for Transport. It notes in section 12.3.2, "Charlemont offers the optimal location for the primary interchange with the Green Line in response to growing demand in the longer term and is an appropriate location to facilitate any potential future metro extensions to serve the south west, south or south east of the city region should sufficient demand arise."</p> <p>The Transport Strategy is "a consideration material to the proper planning and sustainable development of the area or areas in question". Development Plans are required to be consistent with the Transport Strategy. The Dublin City Development Plan 2022-2028 envisages this station at Charlemont in policy SMT22 "To support the expeditious delivery of key sustainable transport projects so as to provide an integrated public transport network with efficient interchange between transport modes, serving the existing and future needs of the city and region and to support the integration of existing public transport infrastructure with other transport modes. In particular the following projects subject to environmental requirements and appropriate planning consents being obtained: ... MetroLink from Charlemont to Swords".</p> <p>Accordingly, the location of the Charlemont station was a strategic decision made at the highest levels of transport and land use planning and as such is fully consistent with the proper planning and sustainable development of the area.</p> <p>The proximity of the metro to the Luas line at Charlemont provides for a positive customer experience for all users with short interchange distance and due to the proximity, clear wayfinding and high visibility of the interchange. The interchange arrangements at Charlemont provide for significantly better interchange arrangements compared to an interchange at St Stephen's Green Station. Passengers wishing to interchange between Luas and metro at the St Stephen's Green terminus would face a 500m long walk along a route either through St Stephen's Green park or along the footpath north of the park, which adds significantly to the time for interchange and therefore the overall journey time for passengers and a less positive customer experience for all interchange users. This passenger experience would be reduced further for those with mobility or visual impairments as well as those travelling to/from the airport with luggage.</p> <p>By extending MetroLink to Charlemont it provides for future proofing of the Green Line, bypassing the capacity constrained Luas on-street running section, and ensures potential future connectivity options are enabled, either to the Green Line or for extensions of the metro.</p> <p>The Charlemont Station interchange provides for increased passenger utilisation of the MetroLink system, thereby increasing the benefits delivered by the Project, reflected by an improved Project Benefit Cost Ration (BCR).</p> |
| 2                                                      | Observation details<br><br>Section 5. Grounds | 5        | <p>2) Since the initial proposals have been published, there has been a very substantial increase in proposed housing developments to the west of Dublin including the proposed " City Edge" development which is for circa 40,000 units. In order to keep costs down, these units are proposed to have NO underground carparks and they state:</p> <p><i>" while the area is served by the Red Luas line, buses and a rail station at Park West, growing the area will require the development of the Lucan Luas line which is included in the Greater Dublin Transport Strategy as well as a new rail station at Kylemore,a new Luas stop on Naas Road and potentially a new Luas line to Kimmage . "</i> ( source : Irish Times report 17 August 2022)</p> <p>It is inconceivable that this new development will not be linked into the new Metro.</p> | <p>As set out by EIAR Chapter 4, Description of the MetroLink Project, the overall project objective for the proposed Project, as established by the National Transport Authority (NTA) and Transport Infrastructure Ireland (TII), and as informed by policy context, MetroLink is to 'provide a sustainable, safe, efficient, integrated and accessible public transport service between Swords, Dublin Airport and Dublin City Centre'. (National Development Plan 2021-2030, Box 9.1). The geographic areas described by the observation do not fall within the scope of the MetroLink Project.</p> <p>See also Response (1) above regarding the potential for future connectivity options.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

| Re: Observation on a Strategic Development Application |                                           |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| 3                                                      | Observation details<br>Section 5. Grounds | 5        | 3) The original proposal was to utilise part of the Luas Green line in order to build the new Metro line : that the green line would terminate at Charlemont. It would appear that the population on the south side would not merit putting the Metro underground and therefore that the principle used would be to have 5km of cut and cover or retained sections. While this proposal appears to be in abeyance, the idea of cutting off these communities by having a track bisecting areas which have had orbital roads for many hundreds of years is most reprehensible : in every draft development plan, the “ 15 minute “ city is touted : to cut off areas in this way does NOT give this 15minute framework to communities. | <p>Response (1) details the policy justification for the proposed MetroLink terminus at Charlemont, as approved by the Minister for Transport and in particular notes that the location of the Charlemont station was a strategic decision made at the highest levels of transport and land use planning and such is fully consistent with the proper planning and sustainable development of the area.</p> <p>TII's role is to deliver the MetroLink project as provided for in the previous Transport Strategy for the Greater Dublin Area (2016-2035) and the current Transport Strategy for the Greater Dublin Area (2022-2042) and as supported by the Dublin City Development Plan 2022-2028. The proposed MetroLink alignment has not been extended south of Charlemont for the reasons set out by the GDA strategy, section 12.3.10, ""The challenges associated with the upgrading of the Luas Green Line to a metro standard of service have led to the emergence of an alternative proposal which seeks to meet travel demand from south of Sandyford along a new light rail corridor which serves UCD post-2042. As such, the upgrading of the Green Line to metro standard is not being pursued as part of this strategy. Instead, for this strategy period, the capacity and frequency on the current Green Line from Sandyford northwards to the city centre will be incrementally increased through the provision of additional tram fleet and services and associated turnback arrangements to meet forecast passenger demand.""</p> <p>Further information on the challenges associated with connecting to the existing Luas Green Line can be found in the TII published report: ""Constructability Report - Green Line Closure, April 2019, ref <a href="https://www.metrolink.ie/media/ox0p3cjb/constructabilityreportgreenlineclosure.pdf">https://www.metrolink.ie/media/ox0p3cjb/constructabilityreportgreenlineclosure.pdf</a>"". This showed that construction works to connect the metro from Charlemont to the Green Line would incur line closures over a period of up to 3-4 years, depending on construction methodology.</p> <p>For this reason it has been necessary to determine the most appropriate interchange and termination location for MetroLink. As noted by the GDA Transport Strategy 2022-2042, section 12.3.2, ""Charlemont offers the optimal location for the primary interchange with the Green Line in response to growing demand in the longer term and is an appropriate location to facilitate any potential future metro extensions to serve the south west, south or south east of the city region should sufficient demand arise.' This is also reflected by EIAR Chapter 7, section 7.7.8 MetroLink Southern Terminus Location that explains the rationale for selecting Charlemont as the optimum location for interchange with the Green Line.</p> <p>As noted by the GDA Strategy the selection of Charlemont does not preclude any future connections to the west or south of the city.</p> |
| 4                                                      | Observation details<br>Section 5. Grounds | 5        | 4) The Luas is an incredibly successful piece of infrastructure - but there is another factor not spoken of : in Sandyford, there are several “ Park and Ride” carparks which are almost always full : it is presumed that these people drive from another area ( west Dublin?) in order to take the Luas. There is then a huge exodus from the Luas each morning at Charlemont with people streaming down along the canal bank - presumably to Grand Canal basin area: it would seem that these people enjoy this walk - and in most European cities, these walking routes are actively encouraged : why would anyone think that to modify the Luas by cutting it off at Charlemont makes any sense?                                 | <p>There are no proposals to "modify the Luas by cutting it off at Charlemont". With regards to how MetroLink interfaces with the Luas Green Line please refer to Responses (1) and (3) above.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

| Re: Observation on a Strategic Development Application |                                               |          |                                                                                                                                                                                                                                                                                                                                                                                                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |  |
| 5                                                      | Observation details<br><br>Section 5. Grounds | 5        | 5) If the Metro were to be terminated at St Stephens Green, it would surely give the most potential to link in with these major new developments to the west of the city as well as other potential new sites ( the barracks at Rathmines) and the proposed Player Wills housing (287 units) which is not connected or proposed to connect to any Luas or metro?                                                          | Please refer to Response (1) above that explains the rationale for locating the southern interchange at Charlemont rather than St Stephen's Green.<br><br>In addition, the section of MetroLink route between St Stephen's Green and Charlemont Stations contributes significantly to the overall benefits of the scheme. It serves a significant area of the south city of Dublin and offers enhanced access from the local area to the city centre and a direct connection to Dublin Airport. It serves key trip attractors including residential areas and offices / workplace locations, with high passenger boarding and alighting figures in the peak hours. During the morning peak, at Charlemont station the flows include 1,800 passengers alighting, 2,300 boarding and 1,229 passengers alighting, 2,276 boarding during the evening peak. The passenger numbers contribute significantly to the overall benefits of the scheme and the effect of these benefits outweigh the additional costs that are associated with the delivery and operation of the section from St Stephen's Green to Charlemont station.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |  |
| 6                                                      | Observation details<br><br>Section 5. Grounds | 5        | 6) If O'Connell Street and St Stephens Green were to be the central terminus points, it would have a impact on these areas. With future new plans for rejuvenation in this area (proposed refurbishment of the St Stephens Green shopping centre) it surely makes way more sense to locate a major terminus/hub at this point to help improve the further diversification of use.                                         | As noted by Response (1) above, by extending MetroLink to Charlemont it provides for future proofing of the Green Line, bypassing the capacity constrained Luas on-street running section, and ensures potential future connectivity options are enabled, either to the Green Line or for extensions of the metro.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |  |
| 7                                                      | Observation details<br><br>Section 5. Grounds | 5        | 7) It is noted that the proposed Metrolink is capable of carrying 20,000 people per hour IN EACH DIRECTION: if the Metrolink terminates at Charlemont, there is a very narrow warren of streets around it and the barrier of the canal with narrow footpaths which makes dissipation of large throngs problematic : if the terminus were at St Stephen's Green, there are many possible options - Luas , buses, taxis etc | The rationale for locating the southern MetroLink interchange at Charlemont rather than St Stephen's Green is explained by Response (1) and (5) above.<br><br>With particular regard to the pedestrian comfort in the vicinity of the proposed Charlemont Station. A microsimulation VisWalk model has been developed for the immediate area surrounding Charlemont Station during the operational phase. The model covers the full extent of the publicly accessible station area, including the immediate vicinity of the station entrance at street level, the Luas stop and nearby junctions at Charlemont Bridge. In order to accommodate the forecast demand from the proposed Charlemont Station, a new staircase with 2.4m stair width is proposed at the south-east corner of Charlemont Luas stop. An elevator will also be provided at this location. Both are sized for MetroLink to Luas, and Luas to MetroLink passenger numbers.<br><br>In addition, it is proposed that the pedestrian crossing on R111 Grand Parade will be repositioned to the front of the building being developed by Hines. With this infrastructure in place, the model indicates that the R111 Grand Parade will have an acceptable level of service overall, with some reductions in service seen at the pedestrian crossing where pedestrians are required to wait for a green phase at the signals (ref EIAR Chapter 9, Traffic & Transport, Section 9.6.2.2.4.3 Pedestrian Operational Impact Assessment). Overall, it is considered that the model displays an acceptable level of network performance. Locations of the proposed new staircase, lift and pedestrian crossing are shown on the Railway Order Plans\Drawings, Structures Drawings, Structures Details Book 2 of 3 MetroLink Stations Dublin City Council (see Charlemont Station, Proposed Street Level design).<br><br>The proposed pedestrian crossing on Grand Parade will have minimal impact on the traffic flow along Grand Parade and can be programmed to operate in sync with the existing signalised junction at Grand Parade /Charlemont Street to maintain the flow of traffic movements. When the Project is operational, car mode share will decrease, with a reduction of up to approximately 830 car tips to and from the zones surrounding Charlemont Station over the 12hr period in 2065. In overall terms, the Charlemont Station will provide for improvements to the public transport network resulting in decreases in private car usage/trips, increases in public transport usages and will facilitate walking and cycling to the station, without significantly impacting on the operation of the road network in the area. Refer to EIAR Chapter 9, Traffic & Transport, and EIAR Appendix A9.2 Overall Project Traffic & Transportation Assessment.<br><br>Furthermore, TII have deliberately designed the Station with minimum set down space (with the exception of a drop-off on Grand Parade for persons of restricted mobility only) or room for taxi ranks so that it does not encourage the Station to be used as a terminus. |  |

| Re: Observation on a Strategic Development Application |                                               |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |  |
| 8                                                      | Observation details<br><br>Section 5. Grounds | 6        | 8) The draft development plan appears to be a well balanced plan which seeks to create thriving communities all around the city, each with their own characteristics: this proposal which seeks to drop a major hub into a residential area without developing the ancillary facilities such as cafes, shops and public open space . It is not clear how the boundary with the former Carrolls building will be handled - whether it will be secured at evening times which would segregate the area further. | <p>As noted in Response (1), the location of the Charlemont station was a strategic decision made at the highest levels of transport and land use planning and as such is fully consistent with the proper planning and sustainable development of the area.</p> <p>TII would note as set out by EIAR Chapter 4, Description of the MetroLink Project, section 4.17.12.2 "<i>The Charlemont station is an underground cut and cover station with two public access points, located beside and integrated with an adjacent development (currently under construction). It has surface connectivity to the Luas Green Line along Grand Parade and has two entrance/exits from the station, one onto Grand Parade and one onto Dartmouth Road. The Grand Parade exit provides connectivity to the Luas stop with additional path width provided between the two modes of transport. The site is also characterised by the presence of the Carroll's Building, which is an office building completed in 1964 and listed on the DCC Record of Protected Structures. A landscape avenue of trees and low-level planting segregates pedestrians from the road, creating a safer environment for pedestrian movement in this area. The path widths and circulation routes are improved between the entrance and a Luas stairs and access lift on the western side of the Charlemont Luas stop. The second exit/entrance onto Dartmouth Road has a public plaza integrating seating, raised planters, large mature trees and cycle parking. The station box itself sits adjacent to an office development that is within private ownership. The landscape design within this area is coordinated with the development currently under construction and integrated with the infrastructural requirements. The landscape design here consists of pockets of planting and strategically placed mature trees to integrate and soften the human experience within this zone. Parking spaces and cycle parking are also provided here, as well as ramp access to private parking and office basement.</i>"</p> <p>The securing of the Carroll's Building is a matter for the owners of the property, however TII can confirm that any securing of the Carroll's property will not limit access to the MetroLink Station. Access will be maintained to both entrances of the Station, including via the access linking Dartmouth Road to Grand Parade.</p> |  |

| Letter Re: Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022 |                 |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| 1                                                                                  | Letter          | 1 and 2  | <p>As a community, we welcome the development of the MetroLink project which will bring benefits to our community, to Dublin and to the country as a whole and look forward to its timely delivery.</p> <p>We do, however, have concerns in relation to the proposed works as they affect our community. These are outlined in detail in the enclosed submission, but we would like to draw attention to three key concerns.</p> <p>In order to keep local residents informed of developments and ensure buy-in and support from the community, we request the establishment of a Mater Station Liaison Committee to ensure continuous communication and consultation with local residents before, during and after the construction phase to address concerns in advance of proposed works and also as particular issues arise.</p> <p>The Liaison Committee should also allow for local input into the reinstatement, restoration and improvement of the Park, public realm and visual amenity of the area.</p> | <p>Thank you for your submission and for sharing your concerns/observations related to the MetroLink Project. We have reviewed the submission and provided response for your observation/concern in detail below.</p> <p>TII have undertaken extensive consultation across the route of MetroLink and has listened carefully to the concerns of stakeholders and the community, as documented by EIAR Chapter 8, as well as undertaking a detailed and extensive Environmental Impact Assessment that identifies and addresses environmental concerns as evidenced by the submitted EIAR, including proposed mitigations to reduce environmental impacts, that accompanies the MetroLink Railway Order application.</p> <p>TII carried out extensive non-statutory public consultation during the development of the Emerging Preferred and Preferred route development stage. In addition, there have been several meetings with local residents during the development of preliminary design stages for the scheme.</p> <p>It is the intention of TII to continue to consult with Local Business and Residents through the establishment of local community forums.</p> |
| 2                                                                                  | Letter          | 2        | <p>The local community is unanimous in its view that the design of the station is out of character with the surrounding architecture and also wishes to have the Four Master Park restored as far as possible to its original appearance. To that end, we request local input into these proposals through the Mater Station Liaison Committee.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | <p>As noted in response item (1) above, TII are committed to engaging with and listening to the views and concerns of the District 7 Community Alliance, and working with the community to manage any impacts resulting from MetroLink construction.</p> <p>Prior to the submission of the Railway Order Application, TII engaged with the local business community and explained the sequencing of works and environmental impacts as set out in the Railway Order submission. TII are committed to addressing the concerns of the local business community that are detailed in the District 7 Community Alliance submission and to continue to address their concerns throughout the projects construction stage through one on one engagement and through the soon to be established local business forum.</p> <p>Please refer to response items (11, 12 &amp; 13) below in relation to the architectural design of Mater Station.</p>                                                                                                                                                                                                                                |
| 3                                                                                  | Letter          | 2        | <p>We are of the view that the development of the Mater Station offers an opportunity to rejuvenate the area around the Mater Station and Four Masters Park. To that end, we request that provision be made for the establishment of a Community Fund to be used to improve local amenities.</p> <p>We look forward to engaging with the NTA, TII and Dublin City Council on the above and on the establishment in the first instance of the Mater Station Liaison Committee which we consider to be an essential first step in engaging with the local community.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                            | <p>TII will work with established Community Groups through the local community liaison officers along the route to identify projects at local level that would involve the Community in the delivery of MetroLink and its legacy. Such projects could include:</p> <ul style="list-style-type: none"><li>- A local school learning programme.</li><li>- Enhancement of community amenity within agreed funding limits.</li><li>- Engagement with final landscape and finishing options, including aspects of biodiversity.</li></ul> <p>TII are willing to explore mechanisms for investing in local initiatives to support affected communities during the works, such initiatives will be subject to funding being made available.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 4                                                                                  | 1. Introduction | 5        | <p>In keeping with current national and local development and planning policies, we make the following observations to ensure that the proposed development and construction does not:</p> <ul style="list-style-type: none"><li>i) injure the residential and commercial character of the Berkeley Road area,</li><li>ii) undermine the amenities of property in the vicinity of the Mater Station,</li><li>iii) compromise the safety, health or wellbeing of local residents.</li></ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | <ul style="list-style-type: none"><li>i) Please refer to response items (11), (12) and (13) in relation to the architectural design of Mater Station, and impacts to the public realm.</li><li>ii) Please refer to response item (9) in relation to the impacts to the urban environment in the vicinity of stations.</li><li>iii) Please refer to response item (17) in relation to the assessment of predicted impacts and proposed mitigations to ensure the safety of the surrounding population.</li></ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

| Submission No.                                                                     |                                                         |          | 066                                                                                                                                                                                                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

| Letter Re: Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022 |                                                         |          |                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| 5                                                                                  | 1. Introduction                                         | 5        | As such, where observations are found to be of merit, we ask that the issues raised and remedies requested here serve as the basis for formal commitments, obligations and planning conditions that may be required of the applicant, project sponsor and/or scheme contractor prior to, during and after construction.                                                                                                              | <p>Please refer to response items (1) and (2) above in relation to the consultation process.</p> <p>EIAR Chapter 5 (MetroLink Construction Phase), Section 5.12.4.5 sets out TII plans for community engagement during the construction Phase.</p> <p>A Stakeholder and Community Engagement Plan has already been developed which has guided the frequency and means of communication to date. The proposed Project will continue to progress community engagement by:</p> <ul style="list-style-type: none"><li>• Regularly reviewing and updating stakeholder and community engagement plans;</li><li>• Actively maintaining partnerships and design focus groups established with the community; and</li><li>• Communicating in a timely and open manner.</li></ul> <p>Through the ongoing development of this plan, it is proposed that TII and its appointed contractor(s) will ensure that local residents, occupiers, businesses, local authorities and all other stakeholders affected by the proposed construction works, as outlined in this EIAR, will be informed in advance of work taking place.</p>                                                                                                                                                                                                                                                                                                                                                                     |
| 6                                                                                  | 2. Need for Greater Clarity and Community Consultation  | 6        | We feel it is important to note that the period allow for submission of observations in relation to this Railway Order, although it might be in line with statutory requirements, it is completely inappropriate and it is against the principles of planning consultation to expect local residents with no technical background or knowledge to be able to review a submission of this size and complexity in the period provided. | As noted, the period for consultation is in line with statutory requirements. The Non Technical Summary provides a summary of the Environmental Impact Assessment in general terms for ease of understanding.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| 7                                                                                  | 2 - Need for Greater Clarity and Community Consultation | 6        | At an overall level, we observe a general lack of clarity around the responsibilities of the applicant and delivery teams in terms of communication and consultation with the local community over the course of the project. This also includes the proper demarcation of responsibilities between the applicant, the Scheme Contractor and other parties involved such as TII and Dublin City Council.                             | <p>Appendix A5.1 Outline Construction Environmental Management Plan (CEMP) details the monitoring and communication process that will be implemented throughout the construction phase. The document also sets out the responsibilities of the employer, employer representative, the contractor(s), the construction manager, the environmental manager and the environmental specialists that may be engaged by the contractor(s).</p> <p>As detailed in Appendix A5.1 Outline CEMP, TII and the contractor(s) will take all reasonable steps to engage with stakeholders in the local community, especially those who may be affected by the construction works, including residents, businesses, community resources and specific vulnerable groups.</p> <p>The contractor(s) will also be responsible for implementing a Stakeholder Communication Plan, as set out in response item (4) above, which will be developed under the consent of a designated Public Liaison Officer appointed by TII.</p> <p>TII and its appointed contractor(s) will ensure that local residents, occupiers, businesses, local authorities such as Dublin City Council, and all other stakeholders affected by the proposals will be informed of planned works.</p> <p>As noted in response item (1), it is TII's intention to continue to consult with Local Business and Residents through the establishment of local community forums for residents and local business forums for businesses.</p> |

| Letter Re: Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022 |                                                         |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |
| 8                                                                                  | 2 - Need for Greater Clarity and Community Consultation | 6        | We also observe a lack of specificity with regard to the applicant's formal obligations to the local community (e.g. ground vibration monitoring, emissions and air monitoring, to name but a few), and particularly the lack of obligation that pertain to specific worksites such as, in our case, the Mater Station (e.g. the nature of the reinstatement of the Four Masters Park and all adjacent areas of public realm that might be impacted by the works). | <p>Appendix A5.1 Outline CEMP identifies the minimum requirements with regards to the appropriate mitigation, monitoring, inspection and reporting mechanisms that need to be implemented throughout construction. Compliance with the CEMP does not absolve the contractor(s), and their subcontractor(s), from compliance with all legislation and byelaws relating to their construction activities.</p> <p>For the duration of the contract(s), the environmental performance of the contractor(s) will be monitored through site inspections and audits by the Environmental Manager. The programme for monitoring, inspections and audits will be specified in the contract and it is likely to be a combination of internal inspections and independent external audits that may be either random or routine. The results of all environmental monitoring activities will be reviewed by the Environmental Manager on an ongoing basis to enable trends or exceedance of criteria to be identified and corrective actions to be implemented as necessary. The contractor(s) will be required to inform TII of any continuous exceedances of criteria.</p> <p>Detailed monitoring plans will be prepared by the contractor(s), such as a Construction Noise and Vibration Management Plan, an Air Quality Management Plan, Dust Management Plan, Blasting Plan, Ecology and Landscape Management Plan, to name a few. Further details on the documents to be provided by the contractor(s) are contained in Appendix A5.1 Outline CEMP.</p> <p>In relation to conservation and architectural heritage, a Project Conservation Architect has been engaged to oversee the implementation of the Project. The PCA will prepare specifications for the removal, storage, conservation and reinstatement of any built and cultural heritage elements such as at Four Masters Park.</p> |  |
| 9                                                                                  | 2 - Need for Greater Clarity and Community Consultation | 6        | Finally, we note that the restoration and rejuvenation of the area after the development of the Mater station is vital to the proposal being acceptable to the local community.                                                                                                                                                                                                                                                                                    | <p>Please refer to response items (11), (12) and (13) in relation to the architectural design of Mater Station. The completion of a MetroLink Station at Mater will likely lead to the rejuvenation of the local area around the station. TII are committed to the restoration and enhancement of the Four Masters Park on completion of the station, that will undoubtedly set this location as an attractive place to live and do business.</p> <p>As noted in Chapter 3 (Background to the MetroLink Project), there will be improvement in the physical quality of the public realm by provision of high-quality station architecture designed to ensure universal access, natural wayfinding and passive surveillance. This is reinforced with well-designed hard and soft landscapes. Station architecture and public realm design are fully integrated with the local environment and designed using high quality materials to provide an attractive environment resulting in a positive and comfortable passenger experience.</p> <p>The proposed Project stations will support opportunities to improve the urban environment, as will the associated reduction in vehicle numbers. The attractiveness of the urban environment is also a key determinant in where people choose to live, attracting more population, amenities and business into the area.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |  |
| 10                                                                                 | 2 - Need for Greater Clarity and Community Consultation | 6        | These issues could be addressed by requesting the applicant to agree a comprehensive plan for community liaison on aspects of the development before construction begins, potentially as part of any detailed design, planning, and procurement strategy planned for 2023.                                                                                                                                                                                         | Please refer to response items (1), (2) and (4) above related to the consultation process and TII's commitment to community engagement throughout the construction and operational phases.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |  |
| 11                                                                                 | 2 - Need for Greater Clarity and Community Consultation | 7        | To provide for appropriate ongoing review of operations on site in conjunction with the local community, we ask that a Mater Station liaison committee be established to liaise between the applicant, the building contractor and the local community to ensure all and any issues that arise before, during and after construction are resolved in a coordinated and consensual manner.                                                                          | Please refer to response items (4) and (5) in relation to community engagement and communication during the construction phase.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |
| 12                                                                                 | 2 - Need for Greater Clarity and Community Consultation | 7        | Membership of the committee could include local community members (e.g. reps from Berkeley Road Area and District 7 Community Alliance), elected representatives of Dublin City Council, and representatives of the applicant and the applicant's team. The committee will act as a liaison with the local community in relation to ongoing monitoring of the Mater station construction.                                                                          | Please refer to response items (4) and (5) in relation to community engagement and communication during the construction phase.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |

| Submission No.                                                                     |                                              |           | 066                                                                                                                                                                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |  |
| 13                                                                                 | 3 - Observations - 3.1.1 Design Observations | 10 and 11 | <p>It is our view that the quality of the streetscape, particularly its relationship with Berkeley Road and the view to the old Mater Hospital, will be compromised by the following aspects of the new MetroLink Station:</p> <ul style="list-style-type: none"><li>- Voluminous design and obtrusive orientation of the station.</li><li>- Excessive use of bollards.</li><li>- Excessive hard landscaping and construction of a 'plaza'.</li><li>- Construction materials and colour scheme of the station and ancillary buildings are inappropriate and do not enhance the architectural quality of the streetscape.</li><li>- The proposed single access to the station (this could be moved south to provide dual access to/from Eccles Street and Berkley Road to/from the proposed station box from the south. The access canopies could then be located within the area currently finished in tarmacadam adjacent to St Joseph's Church thus avoiding unnecessary intrusion in the Four Masters Park. This would allow for the retention of much of the historic railings as well as the restoration of the Four Masters Cross to its original location).</li><li>- Proposed location of the ventilation shafts, lifts and other structures (e.g. skylights) along Berkeley Road (Which could also be moved to a location similar to that noted above in relation to access points), and their design and materiality which is not in keeping with the visual heritage of the existing buildings.</li><li>- The proposed relocation of the Four Masters Cross is inappropriate and consideration should be given to reinstatement to its original location as noted above.</li></ul> | <p>Please refer to response item (13) below in relation to the architectural design of Mater Station.</p> <p>TII recognise that Four Masters Park has very important heritage and architectural connotations, and as such the Mater Station urban realm design principles are based on the following:</p> <ul style="list-style-type: none"><li>* Realignment of the Four Masters Memorial;</li><li>* Rearranging the footpath to provide enough pedestrian space for the main entrance;</li><li>* Reinstatement with enhanced planting of the Four Masters Park and its existing railings; and</li><li>* Replacement of existing trees.</li></ul> <p>The construction of Mater Station in the Four Masters Park will affect the park itself, both Eccles Street and Berkeley Road, and St Joseph's Church, requiring stringent environmental management measures during construction and restoration of the urban realm. Design changes that were introduced to reduce impacts on heritage include the following: prior to the construction phase the railings, gates, plinth walls, Healing hands sculpture and Celtic cross at Four Masters Park (RPS, Reference 737) will be removed, stored carefully and reinstated following the completion of construction of the proposed Mater Station.</p> <p>The entrance to Mater Station is situated at the northwest corner of the park and close to the Hospital access, which is conveniently located to walk to Mater Hospital, St Joseph's Church and Berkeley Road. The location of the entrance is also a result of the tunnelling alignment between Glasnevin and O'Connell Station, in line with the Project objectives of facilitating integration and serving the City Centre.</p> <p>Ideally, and like the vast majority of the MetroLink deep stations, the ventilation shaft would be an integral part of the main structure. However, with limited space to build the station under the park and surrounding roads, a ventilation shaft located on the north west corner of the structure would protrude up into Berkeley Road, and therefore would require the road to be diverted permanently around it where there is limited space to do so. Its proposed location will in the long term be a preferred location as it allows the streetscape to be returned to its pre-construction layout upon completion.</p> <p>As detailed in Chapter 26 (Architectural Heritage), following the completion of the construction of the station box, the Park will be reinstated on the surface to a shape and form similar to the existing Park with updated planting, including new trees along each side of the triangle. The railings and gates, the Four Masters Cross and the sculpture will all be reinstated to slightly amended alignment and locations to facilitate ventilation grilles, air intake shafts, fire access lift, emergency escape stairs and the main entrance to the station. The existing garden and grotto adjoining and within the grounds of St Joseph's Church will also be reinstated on the existing footprint and in similar style to the Four Masters Park proposals. This allows the accommodation of the introduced elements of the station which will now be expressed at surface level. It also ties in with the axial elements related to the original Mater building and which will be expressed in the proposed shared surface at its front. To ensure the protection of architectural heritage throughout the alignment, a Project Conservation Architect has been engaged to oversee the implementation of the Project. A specialist Heritage Works Contractor will also be appointed to remove, store and conserve and constraints during the construction phase, to ensure they are protected for reinstatement prior to the Operational Phase.</p> |  |
| 14                                                                                 | 3 - Observations - 3.1.1 Design Observations | 11        | <p>The removal of 50 mature trees from this relatively small area is excessive, unnecessary, at odds with Government climate action and biodiversity policy, and would represent a significant environmental and visual amenity loss to the local area.</p> <p>The Planning Report states that “<i>tree planting will ...be relatively immature and will not enclose the Park or contribute much to the definition of the two adjoining streets for at least a period of approximately 7-10 years</i>”.</p> <p>In light of this, proper consideration should be given to protecting existing mature trees where possible, as well as reinstating mature trees that must be felled with mature specimens.</p> <p>We do not believe that there are any technical barriers or difficulties preventing consideration of the above matters which will in turn result in the nearly full reinstatement of the Four Masters Park, its environs and the vistas to and from local protected structures after construction and ask that local residents, for whom views are an amenity of their property (and who have not had access to any studies of the visual impact assessment), be consulted on the above aspects.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | <p>EIAR Chapter 27 (Landscape) details the impact on the landscape and visual amenity of the stations during both the construction and operational phases. On completion of the station box, the existing Four Master Park and its surface features will be substantially reinstated with the visual amenity of the area largely restored, much to its existing condition and improved in respect of the shared space to the front of the original hospital building, the refinement of the park layout and the tree and plant species selection.</p> <p>Over the initial period after completion of the construction, the maturity and ambience created by the existing trees cannot be matched. However, as the new trees mature, this too will return with views along the adjacent streets and into the Park, much as they were. The restoration of the open green park space within the triangle of buildings along with the proposed amendments to the original Mater Hospital section of Eccles Street, will again impart the tranquil qualities of the existing condition.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |  |

| Letter Re: Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022 |                                              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| 15                                                                                 | 3 - Observations - 3.1.1 Design Observations | 12       | <p>There are many examples of modern underground stations with a much smaller elevation, visual impact and footprint above ground. Other similar projects have also incorporated design contests for station canopies to promote local acceptance.</p> <p>Examples given:</p> <ul style="list-style-type: none"><li>- St. Cathedral Parkway Subway Station by LHP Architects - New York.</li><li>- Compact metro canopy designs - Bilbao</li></ul>                                                                                                                                                                                                                                                                                   | <p>The station architecture is integrated in the park in a sympathetic fashion with the skylights being framed by planting and providing circulation routes through the park. Existing monuments and protected railings will be relocated within the park. Large mature trees will be placed so as to provide balance and create space within the park. The landscape design itself will be created on top of the station box and sufficient depths and infrastructure are provided for in order to integrate the landscape design.</p> <p>TII believe that the commissioning of internationally renowned architect Nicholas Grimshaw and Partners, has delivered a contemporary station design which is appropriate for a state of the art metro system such as MetroLink. Appropriately, significant emphasis is placed on the public spaces. The station concourse at Mater will be a soaring space illuminated from above with natural light. Dublin's rich architectural heritage has been respected, but not copied in a pastiche imitation. In accordance with best conservation principles, as set out in the ICOMOS Venice Charter of 1964, the stations are architecturally distinguishable so as not to falsify the existing historic context. Reference and due respect to that context is made through the choice of high quality and appropriate materials and the scale of the interventions.</p> <p>At Mater station, the canopy entrance evokes the scale of park structures. The aesthetic values of all eras, including our own, have cultural validity, and therefore the brick is used in a contemporary way reflecting contemporary aesthetic idioms derived from 21st century technology.</p> <p>TII believe the current station and surface level designs greatly enhance the public realm at all locations along the MetroLink route. There is a unifying commonality in the design of all stations, providing a consistent and coherent architectural language, which assists with orientation and wayfinding, and contributes a new architectural lexicon to the cultural iconography of the city.</p>                                                                                                                                                                                                                               |
| 16                                                                                 | 3 - Observations - 3.1.1 Design Observations | 13       | Overall we believe that, in the interest of visual amenity, and safety, local residents have a right to influence what local streets will look like and the priorities for their design.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | Please refer to response items (1), (2) and (4) above in relation to the consultation process and TII's commitment to community engagement throughout the construction and operational phases.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 17                                                                                 | 3.2 Construction Context - Mater Station     | 14       | <p>Residents will suffer the possible impact of vibration, dust and noise including the possible damage to their health and their properties. They will lose years of enjoyment of the area, and many will lose the amenities of their property, through restricted access, loss of views, noise and air pollution during its construction, without any return.</p> <p>The impact of the construction of the Mater Station and ancillary MetroLink infrastructure in the area, in terms of traffic and emissions cannot be considered in isolation from the broader context of development in the vicinity.</p> <p>Our observations in relation to the impact of contractution on both residents and businesses are noted below.</p> | <p>Potential impacts associated with the construction phase activities of the proposed Project on the residences and businesses are addressed in Chapter 11 (Population &amp; Land Use) of the EIAR, with mitigation measures proposed where required. The construction site will be located in Four Masters Park. This will give rise to inconveniences and disturbances affecting activities and services at a localised level and Berkeley Street in particular. This includes potential noise and vibration impacts from construction activities as detailed in Chapter 13 (Airborne Noise &amp; Vibration) and Chapter 14 (Groundborne Noise &amp; Vibration), disturbances to the local road network as detailed in Chapter 9 (Traffic &amp; Transport), and dust risk as detailed in Chapter 16 (Air Quality).</p> <p>Measures to mitigate and monitor these impacts as a result of construction activity across the proposed Project are detailed in Chapter 5 (MetroLink Construction Phase) and summarised in Chapter 31 (Summaries of the Route Wide Mitigation &amp; Monitoring Proposed). Please also refer to response (1) above that also summarises the assessed impacts and proposed mitigations.</p> <p>Additionally, the appointed contractor will prepare detailed design and construction methodologies in the form of a detailed Construction Environmental Management Plan (CEMP) to ensure all environmental impacts (Traffic, Noise &amp; Vibration, Air Quality etc) are fully considered, managed and mitigated in accordance with the EIAR and Railway Order. This detailed CEMP(s) will be provided to Dublin City Council (DCC) for consultation and approval in advance of any construction works on site and more broadly will be considered by DCC in the context of other developments in the area at the time of approval.</p> <p>An Outline CEMP, included in Appendix A5.1 of the EIAR, lists out all of the requirements for construction environmental planning and management that will be developed further by the appointed contractors. Baseline surveys and monitoring will be undertaken in advance of the works commencing with instrumentation also used throughout the works to monitor potential environmental impacts, including those discussed above to ensure that acceptable limits are not breached.</p> |

| Letter Re: Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022 |                                  |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 18                                                                                 | 3.2.2. Accessibility and parking | 16       | <p>Dublin City Development Plan 2016 - 2022, states it is DCC policy "<i>to improve facilities and encourage relevant transport agencies/transport providers to provide for the needs of people with mobility impairment and/or disabilities including the elderly and parents with children</i>".</p> <p>Further: MT027 states as an objective for DCC "<i>to renew restrictions on the use and cost of on-street parking and change them, as necessary, in order to discourage commuter parking, and to facilitate short-term parking for shopping, business and leisure purposes at appropriate locations</i>".</p> <p>It is not clear whether these policies and objectives have been considered fully or sensitively in the current scheme.</p> | <p>Dublin City Development Plan 2016-2022 (DCC 2016a) is one of the relevant Local land-use transport planning policies which sets out the context for the proposed Project. Further details on the planning and policy context of the proposed Project can be found in the Planning Policy Report and Overall Traffic and Transport Assessment (Appendix A9.2).</p> <p>Chapter 5 of the EIAR (MetroLink Construction Phase) explains that traffic management plans for the construction phase of the Project have been developed to minimise the impact on road users, and to maintain access to businesses and other premises. Prior to implementation, all traffic management measures will be agreed with the relevant local authority (FCC or DCC) and where relevant, consultation with An Garda Síochána and other statutory stakeholders will be undertaken. The design of traffic management measures and highways works is based on achieving the key objective of maintaining continual access to all properties during the works. Where necessary, a safe alternative route will be provided for pedestrians and vulnerable road users, such as children, and persons with restricted mobility, to maintain pedestrian access to premises. Where detour routes are required, these will be kept as short as possible and detour signage will be clear and easy to understand. All construction sites will be designed to be as unobtrusive as possible.</p> <p>As detailed in Appendix A9.5 Scheme Traffic Management Plan, there will be slight impacts for loading and parking during the Enabling Works associated with Mater Station. These are in the form of a loss of parking bays for both on street loading facilities outside 16 &amp; 17 Berkeley Road and general parking. This loss of parking will at its peak be approximately 7 parking spaces, however generally only one or two spaces will be lost during each sub phase of the works. Further details on this can be found in EIAR Appendix A9.5 section 7.7.5.3.5.</p> <p>During Phase 1 of the Main Works, the Pay and Display parking spaces along the eastern side of Berkeley Road will be removed, resulting in the removal of 12 on-street parking spaces. Approximately 5 on-street Pay and Display and Resident Permit parking spaces will be removed from the western side of Berkeley Road. A temporary location for the taxi rank will be agreed with DCC.</p> <p>During Phase 2 and 3 of the Main Works at Mater Station, the Pay and Display parking spaces along the eastern side of Berkeley Road will be removed. This will result in the removal of 12 on-street parking spaces. On the west side of Berkeley Road, five on-street Pay and Display and Resident Permit parking spaces will be removed as well as a loading bay that will be relocated.</p> <p>A summary of Mitigation Measures in Construction Phase are presented in Table 9.147 of the EIAR Chapter 9 (Traffic &amp; Transport). The mitigation measure for Berkeley Road for general traffic, parking and loading is to monitor if closures are required at all stages of the construction phase, or if spaces can be reinstated temporarily throughout the works.</p> <p>Once MetroLink is operational, to accommodate the station entrance, the current footways and traffic lanes on Eccles Street will be realigned as part of the proposed Project. The realignment of Eccles Street, and the widening of the footway on Berkeley Road will result in the loss of on-street parking at both locations. Approximately 20 on-street parking spaces will be lost on Eccles Street, while approximately 14 spaces will be lost on Berkeley Road, due to the provision of a signalised crossing in proximity to the Station entrance. While there will be a loss of commercial and residential parking and loading infrastructure as a result of the proposed Project, the modal shift from road to public transport when the proposed Project is in place will reduce the overall demand on parking and loading facilities, thus reducing the severity of the impact in the long-term.</p> |
| 19                                                                                 | 3.2.2. Accessibility and parking | 16       | <p>Under the current scheme, there is a cumulative loss of approximately 34 parking spaces in the Berkeley Road area ("<i>20 on-street parking spaces will be lost on Eccles Street, while approximately 14 spaces will be lost on Berkeley Road</i>"), with a long-term negative impact predicted. However, it also states that 'this impact will be removed following completion of the Construction Phase'.</p> <p>It is not clear whether this means that the parking spaces will be reinstated or is simply a boilerplate response unrelated to local 'Mitigation Measures' for Berkeley Road and Eccles Street.</p>                                                                                                                            | <p>Please refer to response item (18) above which details the impact to parking at Mater Station in the operational phase.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| Letter Re: Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022 |                                  |           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| 20                                                                                 | 3.2.2. Accessibility and parking | 17 and 18 | <p>Given current pressures on parking (in an area in which many households in the area do not own a motorcar) it is unclear how resident parking and access to parking for short-term medical visits or services will be maintained during construction or if it has been considered at all. There are also concerns that a considerable amount of car parking for residents will be eliminated after completion of the works in an area already lacking such facilities.</p> <p>Beyond a high-level mention of 'car-sharing' and 'transporting workers to site via mini-buses', there are insufficient details in relation to the provision of transport or car-pooling for people working on the Mater site (also a policy/objective in Dublin City Development Plan) or how the extra parking and traffic and access difficulties created by the current proposals in the Berkeley Road area will be resolved.</p> <p>Remedies Sought: A detailed proposal on how the limited parking access in the area can be protected for vulnerable visitors and local residents, to be agreed in consultation with local residents and businesses, as part of a broader traffic impact assessment and travel management plan.</p> <p>In addition, a detailed proposal should be required from the applicant and its agents, including the scheme contractor, on how site workers and site visitors will travel to the site (e.g. park &amp; ride etc.), in keeping with DCC policies on sustainable travel and development - again to be agreed in consultation with local residents and businesses.</p> <p>Similarly, consideration should be given to consultation with other public bodies (DCC, etc.) in relation to parking enforcement, and parking provisions for residents.</p> <p>Lastly, the applicant should be requested to clarify the intended final layout of Berkeley Road including the reinstatement of public road infrastructure, including footpaths, cycle lanes and short term and resident car parking spaces to at least the existing numbers and provision if not improved.</p> | <p>Please refer to response number (18) above in relation to the impact to parking at Mater Station during both the construction and operational phases.</p> <p>As noted in Appendix A5.1 Outline CEMP, all staff and workforce will be encouraged to make their way to and from the site by public transport, by project-specific transport (e.g. minibuses), by bicycle or on foot. Limited parking spaces will be provided for vehicles required for the construction activity and for employees. The nominataed contractor(s) may provide a transfer pick up and dropoff service from suitable public transport hubs.</p> <p>A Construction Mobility Plan will be prepared for the proposed Project by the contractor(s) to outline access arrangements to construction sites by sustainable travel modes. Each site will need a specific plan for project personnel mobility. The following measures will be considered within the final Construction Mobility Plan:</p> <ul style="list-style-type: none"><li>* The provision of showers/changing rooms for construction staff;</li><li>* The provision of cycle parking for staff;</li><li>* Ensuring safe and segregated pedestrrrian access to site; and,</li><li>* Provision of site-specific transportation (minibuses) where frequent movements are going to be occurring e.g. between different work sites.</li></ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| 21                                                                                 | 3.2.3 Traffic & Travel           | 18        | <p>Traffic &amp; Travel: Summary of issue below - more assessments</p> <p>It is unclear if these (Traffic modelling) include consideration of other developments in the local area.</p> <p>It is not clear that the current proposals provide an assessment of the nature and extent of the impact of the development on the wider transportation system, particularly pedestrians, but also cyclists and other road users.</p> <p>Not aware of any assessment of the safety impact on the reallocation of road space on Berkeley Road.</p> <p>Meaningful engagement sought on the expanding desk based assessment in the area.</p> <p>Remedies Sought:</p> <p>A detailed contextual assessment of the effects of the proposed development during the period of construction on pedestrian and vehicular safety in the vicinity of the construction site is sought, to include assessment of walkability and impact of increased parking pressures and traffic displacemnt in the neighbouring residential streets.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | <p>As detailed in Appendix A9.5 Scheme Traffic Management Plan, the assessment of impacts on the traffic network includes the measures proposed within the R132 Connectivity Study and the proposed BusConnects infrastructure designs. During the operational phase, traffic modelling assesses a scenario with the Project and committed transport schemes only, and a scenario with the Project with planned schemes under the National Development Plan (for Opening Year) and planning schemes under the Transport Strategy for the GDA for the Design Year and the Forecast Year.</p> <p>Designated access and pedestrian routes around the construction site at Mater Station, particularly at and/or along the hoarding lines will be designed so that it is not perceived as uninviting by pedestrians. With the exception of the Construction Compound on Four Masters Park pedestrian routes for residents and businesses will be maintained throughout the construction period on Eccles Street and Berkeley Road, see Figure 7-35 of Appendix A9.5. The impact on pedestrian and cyclist safety during the construction phase has been assessed and presented in Appendix A9.5 Scheme Traffic Management Plan. This is assessed through consideration in reductions in quality of service, such as through the removal of designated infrastructure, increased conflict with construction vehicles, or reduced width of infrastructure.</p> <p>The requirements for pedestrian and cyclist provision during the construction phase are outline in section 6.1 Traffic and Transport of the Outline Construction Environmental Management Plan (CEMP) Appendix A5.1 of the EIAR. The environment around the site compound will be designed to ensure that pedestrians feel they are entering a safe and accessible environment. This will ensure that the impact to businesses and shops adjacent to the works areas is minimised. Temporary pathways will be installed where appropriate, and provision will be made to ensure access for persons with restricted mobility is maintained. Where the existing level of service cannot be maintained in the vicinity of the compound at Mater, an alternative route will be provided. This route will be clearly signed, visible, and safe, and will provide a level of service (capacity) required to cater for the pedestrian demand. The Outline CEMP provides for the establishment of a Project Construction Traffic Forum, which will include representatives from key stakeholders.</p> <p>From the requirements set out in the Outline CEMP and as part of the preparation for the construction phase the appointed contractor for the works at Mater Station will prepare a detailed Traffic Management Plan of their proposal to manage and control traffic including pedestrians and cyclists. The Traffic Management Plan is a key document within the CEMP documentation to be submitted for Dublin City Council for consultation and approval prior to works commencing at Mater.</p> |

| Letter Re: Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022 |                                           |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| 22                                                                                 | 3.2.4 Economic Impact on Local Businesses | 19       | <p>Economic Impact on Local Businesses.</p> <p>Given the duration of the construction, the removal of parking spaces and vehicular access, the scale of the impact on local businesses is likely to be economically significant. Indeed, without some form of material intervention, it is hard to see how many will survive. This outcome will be a huge loss to the local community and contrary to the stated objective of economic regeneration in the area.</p> <p>Remedies Sought: An economic assessment on the effects of the proposed development on local businesses and consideration of potential methods to ameliorate any negative impacts, including their inclusion in Community Gain projects during and after construction.</p> | <p>TII/NTA do not have a policy of compensation for local business for disruption during the construction stage. As with the installation of Luas line throughout the City, TII believe that any short term disruption to businesses during the works is offset by the eventual benefits of owning and operating a business in close proximaty to developed public transport.</p> <p>For residential properties only, TII is committed to having a Property Owner Protection Scheme (POPS) in place. The scheme allows residential property owners to register with TII if the property is within thirty metres of the edge of the MetroLink alignment or fifty metres of station structures. The POPS comprises condition surveys of private properties and other selected properties along the route of the proposed Project. The purpose of the condition surveys would be to ascertain the condition of the properties before, during (if deemed necessary), and after the completion of the proposed Project to determine whether there has been any deterioration of any of the properties surveyed and whether the same may be attributable to the proposed Project and recommend repairs as appropriate. Condition survey data gathered pre and post construction, and possibly during construction, will be used to assist the property owner and TII in the swift and accurate verification of any property damage claims which may be received from property owners. The POPS would be introduced by TII through public consultation and will be formally advised to eligible property owners by the Public Relations Department.</p> <p>The Property Owners' Protection Scheme is in addition to the existing legal rights of property owners and is in place to provide a simple and prompt way of rectifying any damage caused under the project up to the ceiling of €45,000. If the sum should exceed this amount the normal claims process would be used with the insurance companies for TII and/or the contractor.</p> <p>Useful information on POPS can also be found in the MetroLink Frequently Asked Questions document which can be found on-line at: <a href="https://www.metrolink.ie/en/your-property/property-owners-protection-scheme/">https://www.metrolink.ie/en/your-property/property-owners-protection-scheme/</a></p> |

| Letter Re: Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022 |                                                     |           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| 23                                                                                 | 3.2.5 Health Impact on Local Residents: Air Quality | 20 and 21 | <p>Refers to: National Policy Objective 64 of the 2040 Project Ireland 2040 National Planning Framework is to “<i>improve air quality and help prevent people being exposed to unacceptable levels of pollution in our urban and rural areas</i> ” . And</p> <p>Clean Air Strategy that is currently being developed by the Department of the Environment, Climate and Communications. And</p> <p>Noted that the construction and development of the Mater station is just one of a number of developments taking place in the local area. Prior to any of this development taking place, the Phibsborough area has been identified as having poor air quality by the Clean Air Together project developed by the EPA in partnership with An Taisce’s Environmental Education Unit.</p> <p>Remedies Sought: At a minimum, in the interests of public health and residential safety, local monitoring and mitigation of air quality should be agreed with the local community and these should consist of discrete, measurable obligations to be regularly disclosed to the public required as part of the grant of planning permission. It is also strongly recommended that air quality monitoring standards for the Mater station construction should be brought in line with WHO recommended emission standards and benchmarks.</p> | <p>Further to response item (15) above, EIAR Chapter 16 (Air Quality) assesses the likely effects of the Project on Air Quality during the construction phase with mitigation measures proposed where required. Air quality during the construction phase will be impacted by traffic and dust emissions resulting from construction activities at the Mater Station site from Earthworks, Construction and Trackout (Maximum Daily HGV Movements). Section 16.5.2.6, Regional Air Quality Assessment – Construction Phase Southern Peak Scenario, has assessed traffic emissions pre-mitigation as being overall Neutral, Not Significant and short-term.</p> <p>Table 16.44 presents a summary of predicted dust emission magnitudes from the main construction sites, the results for the Mater Station site being:<br/>- Earthworks - Large;<br/>- Construction - Small;<br/>- Trackout – Large;</p> <p>This has resulted in defining the site-specific mitigation level as High and thus mitigation will be required. A detailed list of Dust Mitigation Best Practice Measures for each construction activity is presented in Appendix 16.4 Dust Management Plan.</p> <p>Before commencing relevant works, an Air Quality Management Plan will be prepared and submitted for TII approval. The plan will include all appropriate dust and emissions mitigation measures applicable to the circumstances of the relevant site, based on the local authority requirements and industry best practices. A plan will be developed by the contractor for each worksite, including Mater.</p> <p>Strict dust prevention will be in place at all times to minimise any potential emissions and these procedures will be strictly monitored and assessed. In the event of dust nuisance occurring outside the site boundary, movements of materials likely to raise dust will be curtailed and satisfactory procedures implemented to rectify the problem before the resumption of construction operations.</p> <p>In addition, EIAR Appendix A5.1 presents the Outline Construction Environmental Management Plan (CEMP). This document provides a framework that outlines the minimum requirements with regards to the appropriate mitigation, monitoring, inspection and reporting mechanisms that need to be implemented throughout the construction phase. Referring to the Outline CEMP, the appointed contractor will prepare a more detailed CEMP for the Mater Station site. The detailed CEMP will be provided to Dublin City Council for consultation and approval in advance of any construction works on site. In addition, TII may appoint an Employer Representative to monitor compliance with the CEMP on their behalf. This may involve the appointment of temporary or permanent specialists with appropriate skills and experience as required to implement on-site procedures and monitor construction on behalf of TII to ensure impacts do not exceed those identified in the RO, i.e. competent experts in biodiversity, architecture, archaeology and cultural heritage, noise and vibration, dust, waste, soils, land, ground movements, contamination and water.</p> <p>In addition, regulatory and statutory bodies may undertake site visits to monitor compliance with legislative and regulatory requirements. A Freephone (e.g 1800) helpline service will also be maintained during the Construction Phase to deal with enquiries and concerns from the general public. All legal standards in force in relation to air quality will be adhered to during construction.</p> |

| Submission No.                                                                     |                                                                        |            | 066                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| 24                                                                                 | 3.2.6 Construction Impact on Residential Property and Other Structures | 21, 22, 23 | <p>Refers to: The demarcation of properties included in vibration monitoring strategies is insufficient and the proposed strategy and measures does not provide any clarity on surveillance of properties that lie in close proximity to the works but just outside the 30m monitoring zone nor any details of how liaison with home owners will be undertaken or in what regularity. And</p> <p>Given the difficulty in predicting the likely impact of construction on local property, it should not be the case that it is determined, through estimation or prediction, who will be impacted by the construction before the development has taken place, nor should the possibility of engaging with TII regarding damage be presumptively limited to an estimated cohort (nor should this determination be within the gift of the Scheme contractor).</p> <p>Remedies Sought 1 of 4: In the interests of public health, residential safety and natural justice, clarity is required as to the scale of monitoring of properties and redress available for affected properties, particularly those where tunnelling is taking place directly under or near their homes. Detailed strategy on monitoring of properties in proximity to the tunneling works, detailed policies on rehousing, and details of provisions for homeowners without the means or capacity to engage surveyors or legal advice prior to, or during, construction are also required.</p> | <p>Further to response item (20) above related to POPS, information regarding any situations requiring relocation and the process for financial compensation for property impacts directly related to the proposed Project is provided in Chapter 11 (Population &amp; Land Use) and Chapter 21 (Land Take) of the EIAR.</p> <p>A comprehensive Settlement Assessment has been undertaken to determine the potential impacts that construction of the proposed Project will have on sensitive receptors such as buildings and infrastructure from the advance of the Tunnel Boring Machine (TBM). The ground movement predictions and the building damage assessment methodology adopted for MetroLink is based on the approach adopted in most tunnel projects around the world, including London Crossrail and High Speed 2 in England. This is described in EIAR Section 5.4.11 (Ground Settlement Monitoring and Mitigation Works).</p> <p>EIAR Appendix A 5.17 Building Damage Report, covers the assessed impacts of construction generated ground movements and settlement on property. The building risk categories shown in Table 4-4 of the aforementioned report are used to define the degree of building damage related to the Risk Category and determines where further assessments are required (Table 5.2) along the route. In advance of construction commencement all of the properties likely to be impacted by the works will be reassessed under this process and against the most up to date design information.</p> <p>EIAR Chapter 21 (Land Take), Section 21.6.1.2, outlines the Compensation for Compulsory Purchase process. Under the Transport (Railway Infrastructure) Act 2001 (as amended) (the ‘Act’) upon commencement of the Railway Order (RO), TII will be authorised to acquire compulsorily any land or rights in, under or over land or any substratum of land specified in the RO, and, for that purpose, the RO shall have effect as if it were a compulsory purchase order (as referred to in Section 10(1) of the Local Government (No.2) Act 1960 (as inserted by Section 86 of the Housing Act, 1966) which has been duly made and confirmed) with modifications. Accordingly, TII is authorised to serve a notice to treat pursuant to the provisions of the Housing Act, 1966, including Section 79 thereof. TII also has the right to enter onto other lands for the purposes of carrying out the works permitted under the RO in certain circumstances. The acquisition of the various specified rights and interests in land and property, is necessary in order to ensure the delivery of the MetroLink project in its entirety.</p> <p>Further information can be obtained from the MetroLink Compulsory Purchase Order Guideline document (September 2022) which can be found on-line at: <a href="https://www.metrolink.ie/media/0jlpbyso/metrolink_cpoguideline_final_september-2022.pdf">https://www.metrolink.ie/media/0jlpbyso/metrolink_cpoguideline_final_september-2022.pdf</a></p> <p>TII will offer compensation to property owners for land that is deemed to be acquired land in accordance with the general compulsory purchase code. Appropriate compensation will also be payable to owners of properties that are subject to short-term and or temporary acquisition. Compensation will be provided through the Compulsory Purchase Order (CPO) process. Details are set out in the LAS (Land Acquisition Strategy) regarding the arrangements proposed for the provision of information and assistance to owners and occupiers of land required for the construction and/or operation of the MetroLink project whether or not the occupier has any interest in the land which may be subject to a compulsorily acquisition.</p> |
| 25                                                                                 | 3.2.6 Construction Impact on Residential Property and Other Structures | 23         | Remedies Sought 2 of 4: Prior to commencement of construction, comprehensive 'no fault' insurance should be put in place to protect households and residents in the area and details should be publicly provided.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | Please refer to response no (22) above relating to POPS.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

| Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022 |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| 1                                                                       | Letter       | 1        | <p>I ask that An Bord Pleanala refuse to grant a railway order for this project on the following grounds.</p> <p>1. It will not enhance public transport options within those parts of the Dublin Area in which most journeys take place(see Figure 1) It is another stand-alone non integrated project which will continue to absorb resources better used elsewhere;</p>                                                                                                                              | <p>TII does not concur with the view that MetroLink will not enhance pubic transport options or that it is a stand-alone non-integrated project.</p> <p>EIAR Chapter 3, Background to the MetroLink Project, explains the need for the Project, and how MetroLink will address challenges within the Greater Dublin Area. The proposed Project will provide significant benefits not only to those who choose to use it, but also to other transport network users, by reducing the demand for road space and creating the opportunity for the road transport system to achieve optimum levels of efficiency and effectiveness. Also as outlined in Chapter 3, the proposed Project is part of an integrated transport network that also includes for BusConnects and DART+ which are all included under Project Ireland 2040. Together, these projects will result in a reliable, sustainable, affordable, integrated public transport network that will support the economy, help Ireland meet its climate change targets in line with Climate Action Plan 2023 and make Dublin a more liveable and sustainable city. Whilst MetroLink is a standalone project that is not dependent on any other projects for its delivery or effective operation, it is nonetheless a critical part of the proposed integrated transport network for the Greater Dublin Area.</p> <p>The proposed Project will improve the performance of the public transport and road networks in North Dublin, including the critical Dublin-Belfast trade corridor, and the supporting infrastructure for Dublin Port and Dublin Airport. By creating a new transport mode choice for passengers, the proposed Project will enhance regional and international connectivity and help optimise the transport network. EIAR Chapter 9, Traffic and Transport, presents an analysis of the capacity of existing public transport corridors, indicating that the Ballymun bus corridor, as well as many of the other bus corridors in North Dublin, is currently operating well over its capacity, and therefore an alternative solution is required to accommodate demand.</p>                                                                                                                                                                                            |
| 2                                                                       | Letter       | 1        | <p>2. The route chosen</p> <p>a. Does not cater for the Drumcondra corridor which has the greatest demand for enhanced public transport options in the north part of Dublin city. Note the north part of our capital city has more people than Fingal, the south part of Dublin City, South Dublin and Dun Laoghaire Rathdown (see Figure 4) and has had over the past 30 years see Section 1 p16-19.</p> <p>b. Was the outcome of a deeply flawed process run by the National Transport Authority.</p> | <p>With regards to observations (a) and (b) TII does not agree and would note the following:</p> <p>a. Response (1) above refers to how the Project will enhance the public transport network. EIAR Chapter 7, Consideration of Alternatives presents the decision-making process which determined the optimum station location for the Drumcondra area. Stations at either Drumcondra or Glasnevin were considered in the context of the achievement of the Transport Strategy for the Greater Dublin Area (GDA), having particular regard to maximising the quality interchange opportunities between different services and to provide fast and convenient access to major destinations such as Dublin city centre and Dublin Airport. Following careful consideration, it was determined that the provision of a station at Glasnevin will better meet the requirements of the GDA Transport Strategy for the reasons set out in Chapter 7, section 7.6.5 Drumcondra v Glasnevin.</p> <p>b. TII do not agree that MetroLink is the outcome of a flawed process. The decision was informed by a comprehensive Route Option Selecton study which was assessed in accordance with the 'Common Appraisal Framework for Transport Projects and Programmes' (CAF). EIAR Chapter 7 presents the decision-making process that has led to the proposed Project, including the consideration of alternative alignments, and the identification of the preferred route. The assessment of alternatives to identify a preferred route for the proposed Project has been undertaken based on an assessment of a number of route sections, route options and station locations. In March 2018, following a comprehensive assessment of the route options along the corridor, NTA and TII published the Alignment Options Report identifying the Emerging Preferred Route (EPR) for the proposed Project. The EPR was subject to non-statutory public consultation in 2018 and the key observations and submissions are referred to in EIAR Chapter 8, Consultation. A review of the submissions arising from the public consultation and further design development led to the establishment of a Preferred Route for the Project, which was subject to further non-statutory public consultation inn April 2019 (also presented in EIAR Chapter 8).</p> |

| Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022 |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 3                                                                       | Letter       | 1        | <p>3. Enhancing public transport options between Dublin City Centre and Dublin Airport can be done by methods other than this proposal given that a 2011 NTA Study of Dublin Airport passengers found that</p> <p>a. Less than one seventh (14%) of trips were business related;<br/>b. Three quarters of all trips were either for holiday/leisure (nearly half) or visiting family/relatives (over one quarter);<br/>c. Less than one third of trips originated in Dublin City Centre/South part of Dublin City;<br/>d. Three quarters (75%) had journey times of less than one hour to Dublin Airport with almost half (46%) having journey time of less than 30 minutes. See Section 1 p. 20-22, 48-50</p> | <p>The overall project objective of MetroLink, as established by TII and as outlined in the Transport Strategy for Greater Dublin Area (2022-2042) and National Development Plan 2021-2030 (Government of Ireland, 2021) is 'to provide a sustainable, safe, efficient, integrated and accessible public transport service between Swords, Dublin Airport and Dublin City Centre'. The decision to service Dublin Airport was accordingly a strategic decision made at the highest levels of transport and land use planning and as such is fully consistent with proper planning and sustainable development. If An Bord Pleanála were to refuse the Railway Order on the basis on this submission, it would not be possible to deliver on the policy objective set out in the Transport Strategy and National Development Plan.</p> <p>With regards to the 2011 NTA Study of Dublin Airport, the traffic modelling has been informed by planning datasheets (supplied by the NTA) which utilise data from the CSO 2016 Census, in conjunction with land use and growth priorities identified by the Regional Assemblies and Local Authorities. Therefore, whilst themes may be similar across the datasets, the traffic modelling undertaken as part of the EIAR utilises the most up to date data from the NTA.</p> <p>EIAR Chapter 3, Background to the MetroLink Project identifies the need for the proposed Project to serve Dublin Airport. To achieve the best economic performance, Irish airports (and ports) need to be served by an efficient and effective transportation network. The proposed Project will support the efficiency and growth of Dublin Airport by creating an additional passenger access opportunity and allowing for optimisation of the surrounding road and public transport networks. As detailed in EIAR Chapter 7, Consideration of Alternatives, a range of alternative route alignments and station options were considered. As a result of the multi-criteria analysis undertaken which considered a range of environmental, economic, accessibility and social inclusion elements, the preferred route was identified.</p> <p>Dublin Airport is the largest airport by passenger numbers in Europe without a rail connection, whilst it also has approximately 20,000 people employed within the larger airport campus who require a mode of access. Providing an efficient public transport link from Dublin Airport into the city centre via the R108 corridor facilitates interchange with the other public transport networks for onward journeys to the rest of Ireland, such as the heavy rail network via Glasnevin or Tara Street stations. EIAR Chapter 9, Traffic and Transport presents an analysis of the capacities on existing public transport networks, indicating that the bus corridors around Dublin Airport (on the M1 and R132) are operating at, or very near to, full capacity, and therefore alternative interventions are required to accommodate this demand.</p> |
| 4                                                                       | Letter       | 1        | <p>In addition, the peak times for passengers departing and arriving do not correspond with the AM and PM peak commuting times in the Dublin Area. (Section 1 p. 22). This suggests that the passenger capacity proposed will not be needed for decades, if ever, given recent trends in working remotely from centralised offices.</p>                                                                                                                                                                                                                                                                                                                                                                        | <p>As outlined in EIAR Appendix A9.3, the Traffic Modelling Plan, and EIAR Chapter 9, Traffic and Transport, the Eastern Regional Model (ERM) used for forecasting and assessing the impact of the Project provides a detailed representation of travel demand across four time periods - AM (morning peak), LT (lunch time), SR (School run) and PM (evening peak). This has been used to capture the varied demand throughout the day. As outlined in EIAR Chapter 6, MetroLink Operations and Maintenance, the operational strategy of the proposed Project is driven by the forecasted passenger demand. Passenger demand modelling has been used to predict the numbers of passengers boarding and alighting at each station, and the resulting passenger load on the whole Project, for up to 30 years after opening. Passenger modelling identified that passenger numbers may peak at over 18,000 passengers for the AM peak hour southbound. On the basis of the modelling prepared for the proposed Project and allowing for future growth in capacity beyond the projection year, the proposed Project is designed to accommodate 20,000 passengers per hour per direction. As such, it is not relevant that the Dublin Airport arrivals/departures peak overlaps with the Dublin Area commuting peak, because the modelling confirms that peak travel on this corridor needs a metro scale solution.</p> <p>EIAR Chapter 3, Background to the MetroLink Project, details how the effects of COVID-19 have been considered within the assessments. TII has observed that the road network has returned to near-normal levels (approximately 80%) very quickly following lockdown events - meaning that the capacity constraints and challenges identified are likely to persist without interventions such as the MetroLink Project. While "work from home" trends may be expected to become more prevalent in those industries where it is possible. The business case for the proposed Project has had regard to potential for lower patronage due to hybrid working and the analysis undertaken still strongly supports the provision of MetroLink.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

| Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022 |                 |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 5                                                                       | Letter          | 1        | In short, the vast majority of passengers at Dublin Airport are not very time-constrained in how they access the Airport landside. So travel times between Dublin City Centre and the Airport should not be a criterion by which this proposal is assessed.                                                                                                                                                                                                                                                                          | <p>EIAR Chapter 3, Background to the MetroLink Project, identifies outbound passengers experience significant impact due to unreliability of their journey time to the Airport. TII analysis demonstrates that the M50/M1 Motorway system adjacent to Dublin Airport can at times experience unstable traffic flow patterns, or a complete breakdown of flow. In response to the consequential journey time uncertainty, many travellers to the Airport will factor in a significant buffer time to ensure that they arrive at the Airport in time. Of inbound passengers, over 60% used a car, van or taxi to leave the airport, contributing to road network congestion. Without the proposed Project, the use of private vehicles will grow as populations grow and more people fly, leading to further congestion on the road network.</p> <p>Travel time between Dublin City Centre and Dublin Airport is not the only criterion upon which this proposal is assessed. The benefit that MetroLink delivers are much wider than this. The MetroLink forms part of an integrated public transport network. The system is designed in an integrated manner so that people travelling from the area south of Dublin to access locations in Dublin City Centre and North Dublin, such as Mater, Swords etc. will utilise public transport to interchange with the MetroLink or will walk or cycle to access their local station. EIAR Chapter 9, Traffic and Transport presents the wider impact to journey times and shows that the proposed Project will have far reaching benefits to journey times to and from a range of locations within the Greater Dublin Area, not just between Dublin Airport and the City Centre.</p> |
| 6                                                                       | Letter          | 2        | Furthermore, Dublin Airport attracts lots of meeters/greeters, at all times of the year. Very few of these people are likely to use public transport to travel to the Airport.                                                                                                                                                                                                                                                                                                                                                       | Please refer to Responses (3) and (5) above in relation to the need for the proposed Project to serve Dublin Airport, and the existing lack of capacity on bus corridors around Dublin Airport. EIAR Chapter 9, Traffic and Transport presents the baseline modal split for journeys to and from Dublin Airport. Between 2006 and 2016, car mode share has decreased through the years, with an increase in Bus in 2016 according to the NTA's Travel Survey. Whilst vehicular modes continue to account for over half of the total mode share, there is an increasing shift towards public transport modes.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| 7                                                                       | N/A             | 2        | <p>In asking you to reject this project, I suggest that other options (see Section 1 p. 35-70, p. 111-132) would better serve the north part of our capital city region, including Swords and the Airport. Any option must focus on the most heavily trafficked corridor of that area ie. through Drumcondra which is primarily a residential and educational district.</p> <p>Our capital city does not need another stand alone public transport system which will not enhance our urban environment which is not well tended.</p> | <p>Please refer to Response (1) above regards the decision-making process in relation to an alignment serving the Drumcondra corridor, and the provision of the Project as part of a wider integrated transport network.</p> <p>As outlined in EIAR Chapter 3, Background to the MetroLink Project, the proposed Project will by way of modal shift and by taking significant volumes of passenger movement underground, support the transformation of the surface level urban environment, making it more attractive for people to engage with. The stations will also attract a wide range of businesses keen to take advantage of the projected footfall, helping to generate an improvement to the urban public realm. Similarly, the proposed Project stations will support opportunities to improve the urban environment through the associated reduction in vehicle numbers.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| 8                                                                       | 2. Route Chosen | 6        | 2.7 This is a case of the public authorities and their consultants suppressing options that were worked out by respected professionals taken on by private citizens. If the public authorities were confident that the project proposed lacked merit, they did not state that, setting out their reasons. This suggests policy-driven evidence making in pursuit of a project favoured by insiders and incumbents. Such stealthy behaviour is not necessary and does not inspire trust in government.                                | <p>EIAR Chapter 7, Consideration of Alternatives presents the robust decision-making process that has led to the proposed Project. This chapter details how route options have been considered and assessed, including the undertaking of non-statutory consultation throughout this process.</p> <p>EIAR Chapter 8, Consultation, presents the extensive public consultation and stakeholder engagement that has been undertaken throughout the entirety of the Project, including with private citizens. TII has at all times endeavoured to ensure the widest possible access for the public, stakeholders and landowners to information about the Project at all stages of its pre-planning development. In this regard, it is intended that the consultation undertaken in respect of the MetroLink project will, when the Railway Order application process is complete, fully meet the requirements of the Aarhus Convention, Codified EIA Directive, and Irish national legislation.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

| Submission No.                                                          |                                                                        |          | 064                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

The options assessed included for heavy rail, light rail and Bus Rapid Transit (BRT) options in addition to combination options. Further detail on each option and the findings of the full assessment undertaken can be found in the Fingal/North Dublin Transport Study (NTA, 2015). The assessment identified an Optimised Metro North as the best medium and long-term transport project for the Greater Dublin Area.<br><br>As previously noted, the proposed Project also offers strong integration with the other public transport networks. Glasnevin Station will provide quality interchange with both the Maynooth and Kildare heavy rail lines, whilst Tara Station offers quality interchange with the DART network. The Luas Red and Green Lines are located in close proximity to the O'Connell Street Station and St. Stephen's Green Station, whilst direct interchange with the Luas Green Line is provided at Charlemont. All stations offer strong integration with the existing Dublin Bus network as well as the future BusConnects network.                                   |
| 10                                                                      | 4. North part of Dublin City is under-served with rail-based transport | 9        | 4.2. Based on the Metrolink proposed in 2018, I commissioned two more maps of the same type, to take account of the results of the 2016 Census see Figure 5 and 6. I realise that the 2022 routing is slightly different to that on which these maps were based. However, both show that the optimum route has not been chosen to serve people living and working in the north Dublin .                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | EIAR Chapter 7, Consideration of Alternatives outlines the relevant criteria that was used during the Preliminary Assessment to establish the merits of the feasible and practicable routes identified, in order to develop the most appropriate feasible options for consideration at the next stage. The criteria consisted of the potential for interchange, potential trip demand, key trip attractors nearby, and the impact on the directness of the route (journey times). Therefore, the surrounding population, and associated trip demand, has been strongly considered, however it was not the sole factor upon which the Preferred Route was developed. The Transport Modelling Report (Appendix A9.4) outlines how the NTA's planning datasheets have been used to project the population and job growth both within the GDA, and within a 15 minute walking catchment of the MetroLink alignment, as far as 30 years after opening, demonstrating positive linear growth in both scenarios around the Project alignment.                                                                                                                                                                                                                        |
| 11                                                                      | 5. Dublin Port Tunnel                                                  | 13       | After the Minister signed the order to approve the [Dublin Port Tunnel] project, significant changes were made by adding an extra lane to the inbound slip road from the Coolock Lane Interchange the Shantalla Road Bridge, see section 1 p. 23-24.<br><br>5.4. This was done by stealth. Apparently, NRA sought approval for this as part of an extension to the M50 in another part of the Dublin region! It is not at all clear that the impact of this change was ever assessed in terms of increased traffic through Drumcondra , with all that implies in terms of air and noise pollution, see section 1 p. 25 I suggest that this way of proceeding negated the environmental impact assessment which was the subject of the sworn inquiry.<br><br>5.5. Building a north city LUAS loop would mitigate some the harm done by this outrageous abuse of process by the public authorities. | TII and the MetroLink Project will proceed in accordance with the statutory planning process and all necessary legal requirements. TII has no comment to make as regards the Dublin Port Tunnel project observation, and nor should TII's response be taken to infer any opinion with regard to the Dublin Port Tunnel project observation.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| 12                                                                      | 6. Streetscape, Community Severance, Place Making                      | 13       | 6.1.2 Given the cost of underground stations, it is much cheaper to put such through traffic in a tunnel. This would calm Ballymun's main street with space for walking, cycling, public transport, supported by a network of sit-around hand around public parks are developed and maintained, as in Dublin 2. 6.1.3. The local and national public authorities are implementing a policy of removing traffic from Dublin City Centre. That they are not applying the same policy to Ballymun is clear evidence of lack of balance and consideration for all citizens when allocating public resources.                                                                                                                                                                                                                                                                                          | As noted by the above responses, MetroLink is designed to address multiple and wider strategic transport challenges rather than just singular geographic issues as part of a wider integrated transport network.<br><br>TII do not agree that Ballymun will not benefit from and experience a reduction in traffic. EIAR Chapter 3, Background to the MetroLink Project, explains how MetroLink will provide a frequent and reliable public transport alternative to the private car, and it is predicted to achieve significant modal shift to public transport along this corridor. This in turn will reduce demand for road space, particularly in the Ballymun area where the bus corridor is currently operating over capacity and cannot sufficiently accommodate the demand at present. The provision of MetroLink along the Ballymun/R108 corridor therefore serves to facilitate a reduction in traffic in this area. In conjunction with this, the proposed street level layout around the station, as part of the BusConnects Core Bus Corridor proposals, will reduce the R108 Ballymun Road to one vehicular traffic lane in each direction to accommodate a designated bus lane and cycling infrastructure in the vicinity of Ballymun Station. |

Dublin |                               |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |  |
| 1                                                                                                                                 | Airport Specific Security     | 3        | daa requests that should a grant of permission be issued, a condition is included requiring MetroLink to adhere to all relevant security measures during construction and operation as detailed by daa as the responsible organisation for Aerodrome Security provisions.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | Safety and security is extremely important to TII. TII also recognises that daa will need to be comfortable with aspects of the design and construction which relate to applicable airport security. TII confirm that they will work with daa to identify and ensure all applicable necessary security measures during both construction and operation are adhered to, and has no difficulty with An Bord Pleanála including a suitable condition to that effect in the Railway Order.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |  |
| 2                                                                                                                                 | Airport Specific Security     | 3        | The proposed MetroLink must comply with the relevant security requirements adopted by daa, including but not limited to Aviation Security in Airport Developments (ASIAD), Security in Design of Stations (SIDOS) and should take account of other relevant UK codes such as G085 Code of Practice (2018). All above and below ground, subsurface design should be in accordance with the relevant standards.                                                                                                                                                                                                                                                                                                                                                                                                          | Please refer to response (1) above.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |  |
| 3                                                                                                                                 | Airport Specific Security     | 3        | daa requests that MetroLink prepare the following Security Plans for design, construction, and operation:<br><br>• Concept Security Plan (CSP): Sets out the concept for developing the mitigation strategies for the design and operation of the final station that evolve from the Threat Vulnerability and Risk Assessment (TVRA) into a set of design intent details. The CSP shall be submitted to the Dublin Airport Security Committee (DASC) at the commencement of detail design stage.<br><br>• Construction Stage Security Plan (CSSP): Sets out the plan for mitigating construction stage security risks. These differ from the permanent case design and operations mitigation set out in the CSP. A CSSP is to be submitted to the DASC a minimum of 1 year prior to planned construction commencement. | Please refer to response (1) above.<br>TII confirms that it is working with DAA regarding its request for both a CSP and CSSP. TII confirm that these security plans will be provided, within a suitable timeframe.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |  |
| 4                                                                                                                                 | Airport Specific Security     | 3        | MetroLink is requested to nominate representatives to sit within the Dublin Airport Security Committee as headed by An Garda Síochana and the CSP and CSSP shall be agreed within this forum.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | TII confirm representatives will be nominated to sit within the Dublin Airport Security Committee.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |  |
| 5                                                                                                                                 | Airport Specific Security     | 3        | It is important that the final design and the phased construction stage implementation allows flexibility to accommodate the required security measures. daa requests that should a grant of permission be issued, a condition is included requiring MetroLink to adhere to all relevant security measures as detailed by as the responsible organisation for Aerodrome Security provisions.                                                                                                                                                                                                                                                                                                                                                                                                                           | Please refer to response (1) above.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |  |
| 6                                                                                                                                 | Pedestrian and Traffic Impact | 3        | daa request the Metrolink station is designed to accommodate an elevated pedestrian walkway. This will ensure there is no impact on the safe and efficient operation of our internal roads which may be impeded by the number and frequency of the crossings.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | The pedestrian modelling undertaken by TII demonstrates that the current proposed at-grade connection between the Station and terminals 1 and 2 permits adequate capacity for vehicles and does not cause unacceptable delays or excessive vehicle queuing for traffic using the Airport, and that such connection provides an acceptable, functioning , efficient and safe Level of Service and route for pedestrians with no excessive queuing or pedestrian crowding or corralling evident for pedestrians travelling to and from the Station.TII's latest version of the VISWALK model is based on the approach agreed with DAA in April 2022. The model has been prepared for future year scenarios with forecast pedestrian demand based on ERM and vehicle demand based on daa projections. This model indicates that the airport road network will operate with adequate capacity for vehicles and pedestrians, even with the addition of MetroLink passengers. All the crossings in the immediate vicinity of MetroLink and the GTC operate efficiently for both pedestrians and vehicles, with no excessive vehicle queuing or pedestrian crowding evident. The modelling results can be found in section 6.1.3.1.1 of Appendix A9.2-D Traffic and Transport Assessment Dublin Airport.The TII VISWALK model demonstrates that signal timings can be implemented that would accommodate both pedestrians and vehicles, vehicles can be accommodated without excess delay and that an appropriate LoS would be provided for pedestrians. The VISWALK assessment also demonstrates there is sufficient capacity to accommodate vehicles on the Airport network with no queuing back to the motorway occurring.TII confirm that current pedestrian modelling does not justify the need for an elevated walkway. |  |
| 7                                                                                                                                 | Pedestrian and Traffic Impact | 4        | Pedestrian movement and traffic flows are key to Dublin Airport efficient operation and security. In particular to Airport Security is the movement of pedestrians and pedestrian approach/dispersion routes. The MetroLink design must not allow pedestrians to be corralled and become a potential target.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | Please refer to response 6 above.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |  |

Dublin |                                                                |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |  |
| 8                                                                                                                                 | Pedestrian and Traffic Impact<br><br>Pedestrian Movement:      | 4        | <p>The location of the proposed station means that, to access the airport, staff and passengers will need to cross internal airport roads. This will significantly increase the numbers of pedestrians crossing and therefore increase the level of conflict between pedestrian movements and internal airport vehicular traffic movements. The figures outlined in Table 1 indicate close to 6,000 pedestrian movements during the AM peak hour in the Opening Year 2035, these movements will conflict with vehicle movements<sup>2</sup> on the T2 Departures Road (approx. 670) and in the GTC (approx. 450) in the vicinity of the station.</p> <p>Footnote 2: Source: 7-day average flows recorded in May 2019 (Dublin Airport operated at the permitted 32 million passengers per annum cap in that year)</p>                                                                                                                                  | Please refer to responses 6 above.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |  |
| 9                                                                                                                                 | Pedestrian and Traffic Impact<br><br>Pedestrian Movement:      | 4        | <p>MetroLink proposes five new signalised at grade pedestrian crossings. These are upgrades to existing zebra crossings. An assessment including VISWALK modelling was undertaken for these five crossings. Signalised junctions at these locations are deemed to be the minimum appropriate intervention to accommodate the forecast pedestrian volumes. Two crossing points, between Terminal 1 and the Terminal 1 Multi Storey Car Park have not been assessed by MetroLink within the Traffic &amp; Transportation Assessment (TTA). Static analysis tools of the Transport for London (TfL) Pedestrian Comfort Analysis were also used in the TTA to assess pedestrian movement. Table 6.2 of the TTA4 shows that in the opening year pedestrians will experience a comfortable to acceptable level.</p> <p>Footnote 3: Source: EIAR Volume 5 Appendix A9.2 Overall Project Traffic &amp; Transportation Assessment – Dublin Airport Station</p> | <p>Please refer to response (6) above.</p> <p>At the two unassessed crossing locations referenced, the majority of demand and movements are not created by MetroLink, and are a management issue of DAA regardless of the presence of MetroLink.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |  |
| 10                                                                                                                                | Pedestrian and Traffic Impact<br><br>Impact on internal Roads: | 4        | <p>The TTA also states that, with MetroLink providing an attractive alternative for journeys that are currently made by bus, it is likely that there will be a shift from existing bus services onto MetroLink, resulting in a reduction in bus, as well as taxi and private car, trips on the road network at Dublin Airport. This assessment is purely qualitative, however, and the TTA does not provide any details of the modelled flows on the internal Airport road network to illustrate this.</p> <p>daa identifies that consideration is not given to:</p> <ul style="list-style-type: none"><li>• The potential impact of additional pedestrian crossing movements on general traffic on the internal Airport road network, or</li><li>• The potential impact of additional traffic (buses and cars) dropping off/picking up at the Metro Station.</li></ul>                                                                               | <p>TII disagree that the assessment is "purely qualitative". Signiificant analysis has been carried out to assess modal shift Post MetroLink using the NTA ERM model.</p> <p>The potential impact of additional pedestrian crossing movements on general traffic on the internal Airport road network, and the potential impact of additional traffic (buses and cars) dropping off/picking up at the Metro Station was considered as part of the modelling for the MetroLink Airport Study. The modelling results can be found in section 6.1.3.1.1 of Appendix A9.2-D Traffic and Transport Assessment Dublin Airport..</p> <p>The NTA's ERM has been utilised by the MetroLink project to determine future modal splits at all stations, including the Airport station. The ERM has been applied on major projects such as BusConnects and MetroLink and is considered to be the most appropriate basis upon which to forecast the impact of MetroLink.</p> <p>The modelling shows a shift from other modes of travel to the Metrolink, which will then result in reduction in travel by these modes. The vehicle flows used within the VISWALK modelling were provided by daa's consultants, and we have not reduced these flows to take into account any shifts away from other modes.</p> <p>Consideration of the potential impact of the additional pedestrian crossing movements on general traffic on the internal Airport road network was presented within the Airport TTA for the 2035 Opening Year.</p> <p>The MetroLink Airport station has been designed to accommodate Airport passengers and workers. TII are committed to working with daa to ensure that appropriate traffic management measures are provided at the Airport to minimise any such drop-off/pick-up activities.</p> |  |
| 11                                                                                                                                | Pedestrian and Traffic Impact<br><br>Pedestrian Movement:      | 5        | <p>The Terminal 1 and Terminal 2 kerbside set down areas are a key airport surface access 'processor function' at Dublin Airport. At-grade pedestrian crossings are present in both Kerbside areas. Although assessment of the pedestrian crossings has been undertaken from a pedestrian comfort / level of service perspective, the impact of the additional pedestrian movements caused by MetroLink on Kerbside operations and requires additional considertation in the TTA. It is also possible that the MetroLink operations will result in pedestrian surges from the station as services arrive in either direction.</p>                                                                                                                                                                                                                                                                                                                     | <p>The TII VISWALK model assesses the set down area at the Terminal 2 kerbside. The model indicates that there is sufficient capacity for pedestrians to travel through the area.</p> <p>The Terminal 1 kerbside set down is remote from the MetroLink station. Pedestrians at this point originate from all access points and must pass through this point to access Terminal 1. It is therefore considered that MetroLink will not alter the pedestrian demand at this location.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |  |

| Submission No.                                                                                                                    |                                                                                            |          | 068                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |  |

Dublin |                                                                                            |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |  |
| 12                                                                                                                                | Pedestrian and Traffic Impact<br><br>Impact on internal Roads:                             | 5        | The proposed station layout will introduce an additional uncontrolled junction in close proximity to the signal-controlled junction between Corballis Road North and the T2 departures road. Corballis Road North is the main exit route from both terminal areas and associated car parks and its efficient operation is crucial to the wider operation of the internal Airport road network. Consideration should be given to how the proposed exit junction impacts on the operation of Corballis Road North and the adjacent T2 departures road junction.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | This junction is not required for the operation of the Metrolink Station, but is required to facilitate daa plans to provide future bus parking area. These plans are in accordance with daa requirements as communicated to us in November 2019. It is therefore a daa design issue but TII will agree the most suitable access junction arrangements with daa.                                                                                                                                                                                                                                                                                                      |  |
| 13                                                                                                                                | Pedestrian and Traffic Impact<br><br>Bus Circulation and Junctions Improvements on Campus: | 5        | daa identifies that:<br><br>• the impact of the additional pedestrian movements caused by MetroLink on bus circulation and other traffic movements within the GTC requires additional consideration in the Dublin Airport Station TTA.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | The TII VISSIM/VISWALK model has been prepared for future year scenarios of 2035 with forecast pedestrian demand based on ERM and vehicle demand based on daa projections. With regard to vehicular modes, cars, taxis and buses are included within the model. Therefore, TII has assessed the impact of ERM forecast pedestrian demand against the daa forecast of bus numbers at 2035. The VISSIM model indicates the model will operate with a satisfactory level of capacity for vehicular traffic. The modelling shows this includes the ability for all vehicles to discharge across the stopline during the relevant green phase at the pedestrian crossings. |  |
| 14                                                                                                                                | Pedestrian and Traffic Impact<br><br>Alternatives Considered:                              | 5        | Alternatives were considered to facilitate safe and efficient pedestrian movement. daa considered Elevated Pedestrian Connections to be a safer and preferable solution. When assessed all elevated alternatives offered a quality user experience that provides a safe, efficient, enjoyable and stress-free journey that encourages repeated use of MetroLink to access the airport. It is noted that a similar pedestrian walkway is provided at the proposed Estuary Station, connecting the MetroLink Station to the proposed car park. daa requests that the Metrolink station is designed to accommodate an elevated walkway.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | TII do not agree that an Elevated walkway is required. Please refer to response (6) above.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |  |

When proposed design details are available, TII will be willing to engage with daa designers and support development of future design for over-station development which is compatable with the current station design and Railway Order and which ensures that any adjacent or over-station works can be executed without negatively impacting MetroLink.                                                                                    |  |
| 16                                                                                                                                | Future Airport Development                                                                 | 5        | <p>The Dublin Airport Central (DAC) masterplan indicates that the MetroLink site along with other sites within the GTC will be developed into multistorey commercial developments in the future. This is in line with the concept of Transit-Oriented Development supported in the National Transport Authority Greater Dublin Area Transport Strategy 2022-2042. The Fingal Development Plan 2017 – 2023 also sets the following objectives that support further development at Dublin Airport:</p> <p><i>Objective ED30 Engage and collaborate with key stakeholders, relevant agencies and sectoral representatives to ensure that Dublin Airport is developed and promoted as a secondary hub to capitalise on the associated wider economic benefits for Fingal and the wider region,</i></p> <p><i>Objective ED34 Engage with and support the DAA and other employment providers in aviation uses associated with Dublin Airport to create quality and easily accessible employment opportunities for Fingal residents.</i></p> <p><i>Objective DA01 Facilitate the operation and future development of Dublin Airport, in line with Government policy, recognising its role in the provision of air transport, both passenger and freight.</i></p> <p>daa requests that the station structure and retaining walls are designed and constructed to support future loads imposed by Dublin Airport development foundations that may be positioned near the MetroLink stations construction. It should be assumed the pavilion will rise to three levels and may incorporate a possible elevated Automated People Mover platform. It should also be assumed that the multi-storey car park will rise to a height of 110m AOD with the street level being a double height space designed to accommodate the bus/coach park, and thus will likely require increased open plan column spaces with increased foundation loading. daa request that the applicant indicates how the MetroLink station building structure can be adapted to support a multistorey development in line with the above objectives.</p> | Please refer to responses (6) and (15) above.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |

| 20                                                                                                                                | Safeguarding Dublin Airport<br><br>Cranes and Construction Plant:             | 7        | In accordance with the specifications of ICAO Annex 14, EASA Certification Specifications, and IAA ALM 002 (the Aerodrome Licensing Manual) all obstacles on and adjacent the aerodrome shall be illuminated with approved lighting sources. It is the responsibility of the owners/operators of obstacles to ensure that such sources and systems are maintained.                                                                                                                                                                                                              | TII confirm obstacle illumination in accordance with ICAO Annex 14, EASA Certification Specifications, and IAA ALM 002 (the Aerodrome Licensing Manual) will be provided.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| 21                                                                                                                                | Safeguarding Dublin Airport<br><br>Hazardous, Confusing or Misleading Lights: | 7        | The development (both in construction and operation) will be required to assess the proposed lighting to ensure that the development will not entail the introduction of hazardous, confusing, or misleading lights, unless suitable mitigations such as shielding can be incorporated in the design. An assessment will be required and assessed, in conjunction with the IAA-SRD and IAA-ANSP, with a view to removing the lights or adapting or shielding them to reduce the hazard.                                                                                         | TII confirm they agree this will be in accordance with IAA requirements and undertaken prior to the commencement of MetroLink construction and operation that could impact daa operations.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 22                                                                                                                                | Safeguarding Dublin Airport<br><br>Runway End Safety Area (RESA):             | 7        | The MetroLink South Portal lies adjacent the Departure area of Runway 16 and the Approach Area to Runway 34. The current RESA at the end of Runway 34 does not meet current European Union Aviation Safety Agency (EASA) Requirements. The location of the south portal should allow the relocating of all roads (current and planned), navigational aids and perimeter fencing to establish a compliant RESA. daa also requests that consideration is given to the ability to accommodate future dual road bridges to carry the realigned Old Airport Road (Collinstown Lane). | From our consultations with daa, TII understand that the current RESA does not meet current European Union Safety Agency requirements and currently extends 183m from the end of the approach area to runway 34 and 150m wide. In siting the MetroLink south portal, TII have allowed for an extended/compliant RESA area which extends 300m from the end of the approach to runway 34. The portal has also been sited to allow for the rerouting of the airport maintenance road, lighting and boundary fence. In addition in consultation with Fingal Co Council, TII have also allowed for the future relocation of the old Airport Road (Collinstown Lane) to the east of the MetroLink south portal .<br><br>The MetroLink design for the Airport tunnel and South Portal structure took into account information supplied by daa. This specified that the present RESA operates under a derogation and provided the required RESA dimensions that the MetroLink portal design should comply with, i.e. an area 300m long from the runway end by 150m wide. The MetroLink southern portal lies fully outside of this RESA.<br><br>Given that TII have provided a design that complies with the RESA information previously supplied by daa, any further adjustments to the MetroLink design, including those noted will need to be accommodated within the powers granted by the Railway Order (RO) applied for. Where it is possible to deliver such works within the bounds of the applied for and granted RO, and within the constraints of the MetroLink programme to "establish a compliant RESA", this shall be reviewed and considered whether it should be deemed betterment and thus funded by daa. |
| 23                                                                                                                                | Safeguarding Dublin Airport<br><br>Electromagnetic Fields:                    | 7        | As noted in the application the proposal is not considered to impact safety or operations of Aircraft at Dublin Airport with regard to electromagnetic fields. Any impact can be overcome by appropriate procedures in the flight crew operations manual. daa requests that the final as constructed alignment is provided to daa and all airlines to ensure appropriate safety procedures are applied to aircraft.<br><br>daa requests continued consultation to ensure sensitive equipment, such as hold baggage screening (HBS) systems at Dublin Airport is not impacted.   | TII confirms that the final as constructed alignment will be made available to daa. TII expects that daa will manage the onward provision of the as constructed alignment and follow up coordination with the airlines so that TII are dealing with a single coordinated interface. i.e. daa.<br><br>TII will continue to consult with daa in relation to sensitive equipment to ensure impacts are avoided.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

Dublin |                                                        |          |                                                                                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| 24                                                                                                                                | Safeguarding Dublin Airport<br><br>Public Safety Zone: | 7        | The north portal construction compound is located partially within the Inner PSZ and Outer PSZ. The central and southern portal compounds are located partially within the Outer PSZ. daa refers the Board to the limitations of the Inner Public Safety Zone, and the appropriate person densities for the Outer Public Safety Zone contained within the ERM Report, Public Safety Zones (2005). | <p>The function of the Public Safety Zones (PSZ) are set out in the PSZ Report (ERM, on behalf of the Department of Transport and the Department of Environment, Heritage and Local Government, 2003). Within the inner PSZ, the objective is to prevent further development. Within the outer PSZ the objective is to prevent high density housing development, and the building of schools, hospitals and facilities attracting large numbers of people.</p> <p>Exceptions for permitted developments in the inner PSZ are:</p> <ul style="list-style-type: none"><li>•developments where persons are not expected to be present;</li><li>•roads and railways where vehicles and passenger trains/trams are not expected to be stationary. For example, road vehicles can be expected to be stationary at major road intersections, junctions, and traffic lights. Therefore, major road intersections, junctions, traffic lights and similar should not be permitted in the inner PSZ.</li></ul> <p><u>North Portal</u><br/>Activities on the site within the Inner PSZ are limited to the operation and control of the access gates, and some piling marginally within the Inner PSZ. Given the North Portal when in operation is a permitted development by exception (see above), TII confirm they will work with daa to resolve any incompatibility between construction activities and Inner Safety Zone policies, recognising that a development can only be realised if construction is permitted.</p> <p><u>Central and Southern Compounds</u><br/>While the central and southern portal compounds are located partially within the Outer PSZ, in accordance with Table 6.1 of the ERM 2003 Public Safety Zones Report referred to above, during construction, the site, deemed a working premises will comply with ≤ 110 persons/half hectare.</p> |
| 25                                                                                                                                | Construction Phases                                    | 8        | Dublin Airport is a live campus with ongoing development. Continued co-operation between MetroLink and daa will be required to undertake the construction and operation of MetroLink with particular reference to construction traffic, vibration utilities, tunnel depth, dewatering and airport security.                                                                                       | The specific issues called out in the submission have been dealt with extensively and adequately in the Railway Order application and the EIAR in Chapter 5 MetroLink Construction Phase, Section 5.8 and in particular 5.8.3 Dublin Airport Station. TII is committed to consulting with daa to seek to ensure that any additional issues arising from the devlopment of detailed design and construction methodology are dealt with appropriately.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

Dublin |                                          |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |  |
| 29                                                                                                                                | Construction Phases<br><br>Utilities:    | 8        | The application does not illustrate details of Dublin Airport Services such as 10kV Network, Aviation Fuel Network, IAA Utilities, etc. The location and impact on these services must be considered during the consultation phase of MetroLink.                                                                                                                                                                                                                                       | <p>The location and impact on utilities and services (including the 10kv network) has been considered by TII. This has included consultation with the Airport, collation of utility and services asset record drawings, desk top studies, and utility surveys. Specific consultation with the Airport has been undertaken with regards to sensitive equipment as well as sensitive receptor surveys, including electromagnetic interference/compatibility surveys that has enabled the identification of any potential impacts on communications, Nav aids and surveillance systems. No significant impacts were recorded.</p> <p>The utility drawings submitted with the Railway Order application show all the utilities and services for which TII have drawings for. EIAR Chapter 22 Infrastructure and Utilities provides details of the impact assessments undertaken for utilities and services at Dublin Airport. The utilities and services that need to be diverted and their diversions have been identified. The management of these diversions by TII's contractors will be agreed with daa, but noting that services will be maintained for daa operations, and the potential for vibration and movement impact on utilities will be mitigated.</p> <p>TII have also examined the location of the Aviation Fuel Network and do not consider the MetroLink works will impact this item of infrastructure given its location in relation to MetroLink construction.</p> <p>Finally, detailed surveys will be undertaken by the Contractor(s) prior to undertaking the main construction to record all existing utilities in advance of any works. TII will ensure that Contractor(s) undertake joint risk workshops with daa prior to and concurrent with the works to ensure all risks are identified, evaluated and managed.</p> |  |
| 30                                                                                                                                | Construction Phases<br><br>Tunnel Depth: | 8        | daa note the proposed depth of approximately 10-15 meters below ground level through the tunnel on airport lands. The interaction with current and future projects must be co-ordinated at the time of construction.                                                                                                                                                                                                                                                                   | In the event of the possibility of MetroLink and daa projects being under construction at the same time, TII and their contractors will work collaboratively with daa and their contractors to ensure "best for programme outcomes" are delivered for both parties.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |  |
| 31                                                                                                                                | Construction Phases<br><br>Dewatering:   | 9        | Consideration should be given to any dewatering of construction areas, particularly in the area of the proposed station. daa are aware of possible soil and groundwater contamination to the north of this area, which is currently under investigation. Any pumping of groundwater from the station area may have the potential to pull a plume of contaminated groundwater towards the works.                                                                                        | <p>The perimeter diaphragm walls forming the station box will provide effective water cut-off during station box construction and excavation, with any upward flow of groundwater (from below the station formation level) limited to negligible. If analysis identifies a risk that upward groundwater flows could be excessive, a ground water cut-off plug will be formed inside the perimeter walls just above the toe level of the perimeter wall.</p> <p>No external dewatering (outside of the site boundaries) will be permitted during the construction of the station boxes beyond the natural ground water fluctuation.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |
| 32                                                                                                                                | Design                                   | 9        | daa requests the Board has regard to the Dublin Airport Architectural Design framework and all relevant design elements are agreed with daa prior to the commencement of development and operation as appropriate.                                                                                                                                                                                                                                                                     | The architectural form of all stations will be in accordance with the MetroLink Architectural Vision and Strategy. TII will have regard to Dublin Airport Architectural Design framework in so far as it relates to consistency of passenger wayfinding from the station to terminal building and the general presentation of the urban realm.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |  |

Dublin |                                                        |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |  |
| 35                                                                                                                                | Design<br><br>Wayfinding:                              | 9        | It is unclear what wayfinding signage strategy is proposed for the MetroLink. Wayfinding is critical within an airport environment and the airport needs to understand how the addition of the MetroLink will affect existing wayfinding within the airport campus and at the entrance and exit from the campus. daa request that all new and alterations to existing wayfinding signage are to be agreed with daa prior to operation.                                                                                                                                                                                                                      | At this stage of the design one would not expect the wayfinding signage strategy to be defined in detail. The way finding strategy will be to provide clear direction and orientation, using detailed signage that will ensure all passengers (including those with visual and hearing impairments) are provided with clear direction, and that this is integrated with the overall Airport wayfinding strategy. This strategy will be supported by crossings defined with appropriate line markings and tactile paving, lighting improvements, hearing induction loops at crossings, and rationalisation and reduction in some of the street furniture along the pedestrian routes.<br><br>TII concur with daa that wayfinding is critical and that TII will consult with daa and agree all MetroLink related new and alterations to existing wayfinding within the Airport to ensure MetroLink and daa operations are seamlessly integrated.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |  |
| 36                                                                                                                                | Design<br><br>MetroLink Tickets:                       | 9        | It is unclear from the plans shown how tickets are purchased for the MetroLink. Is it proposed that ticket kiosks machines will be provided within the station footprint? Is there any infrastructure required within the Airport Terminals or carparks buildings to facilitate booking or purchasing tickets? Passenger circulation and flow is a key function within an airport and transport environment and the congregation of people along key circulation routes should be avoided for security reasons. daa request further consultation and agreement on the location of ticket machines prior to operation.                                       | Please refer to EIAR Chapter 6, MetroLink Operations and Maintenance, that explains the MetroLink ticketing strategy, including:<br><br>• Passengers will be able to purchase tickets from ATVMs, located in prominent positions in the stations, with the number provided sufficient to meet the peak passenger requirements. There are no proposals for manned desks for ticket sales. Smart (Leap) Card validators will also be available at all stations.<br><br>• There will be an automatic fare collection system compatible with an integrated ticketing scheme with other public transport offerings in the Greater Dublin Area (GDA). This will include the purchase of tickets at automatic ticket vending machines (ATVM), smart card validators and means to top up smart cards, gate-free access to the station platforms, portable control devices for staff to check fares, and links with the OCC and banking facilities for central collection of fares<br><br>• Ticket vending machines are equipped with audio support options as well as a user selectable high contrast interface, and will be accessible, with at least one machine with controls set lower for wheelchair users, where the supporting plinth will not project in front of the face of the machine in a way that prevents its convenient use, and there will be a clear space in front of the machine to facilitate wheelchair users.<br><br>• MetroLink stations will not be gated and will not feature turnstiles or accessible gates/doors. All of the public areas are deemed to be a 'Paid Area' in that people have either bought a ticket at one of the ATVMs or purchased a valid smart card. The absence of any gateways adds to the fluidity of movement through the station.<br><br>No MetroLink ticketing infrastructure is envisaged to be required within the Airport Terminals or carpark buildings. |  |
| 37                                                                                                                                | Design<br><br>The design of the Dublin Airport Station | 10       | daa request more detailed information in relation to the life expectancy of the façade and roof, and external landscaping.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | The design life of particular elements of the station, noting the primary structure will have a 120 year design life, will be determined at detail design, considering and balancing CAPEX and OPEX, and the appropriate operation and maintenance regime. Where this impacts on daa, this will be discussed with daa to ensure daa operations are not unnecessarily impacted.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |  |
| 38                                                                                                                                | Design<br><br>Luggage and Trolleys                     | 10       | The station design needs to ensure there is adequate provision for passengers arriving and exiting the Airport terminals and carparks with large volumes of luggage including Out of Gauge (OOG) Luggage up to the maximum allowable size including golf clubs and bike boxes. Circulation routes, escalators, lifts, train cars and corridors need to be designed to allow sufficient space for people with luggage. It is unclear if trolleys are provided or if there is a trolley collection point for people bringing trolleys from other facilities. daa request further consultation and agreement on the management of trolleys prior to operation. | The Station and the rolling stock has been designed to accommodate travellers with luggage, including the Station providing 6 high capacity elevators so persons are not carrying luggage on the escalators. There will be no trolleys provided for within the Station itself. TII propose that the management of trolleys at ground level is discussed and agreed at the detail design stage.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |  |
| 39                                                                                                                                | Design<br><br>Washroom Facilities:                     | 10       | The Dublin Airport Station plans do not indicate washroom facilities for passenger use. daa requests that MetroLink clarify that the station design meets building regulations, codes, and standards in relation to washroom facilities considering the distance to existing washroom facilities within the Airport Terminals.                                                                                                                                                                                                                                                                                                                              | TII confirm that washroom facilities will be provided at all interchange stations. MetroLink Airport Station is an interchange station and will have washroom facilities.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |  |
| 40                                                                                                                                | Design<br><br>Sculpture:                               | 10       | There is an ideal opportunity to provide a piece of sculpture/art within the proposed MetroLink landscaped space to announce a user's arrival at Dublin Airport in line with Dublin Airports Design Framework proposals.                                                                                                                                                                                                                                                                                                                                                                                                                                    | A budget has been provided for the provision of Art/Sculptures at each station. This can be discussed with daa at the detail design stage.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |  |

|                                        |                                                                  |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                                                                                       |
| 1                                      | Cover Letter                                                     | 2        | Dublin Central GP Limited is wholly supportive of TII's MetroLink application. It wishes to confirm its clear and unambiguous support for the current O'Connell Street station design and the Metrolink scheme generally.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | TII acknowledge Dublin Central CP Limited support for the MetroLink project.          |
| 2                                      | Cover Letter                                                     | 2        | <p>Dublin Central GP Limited has engaged in extensive pre-planning consultation with TII to ensure that both projects compliment and facilitate each other, while remaining structurally independent (and that no Railway Works which are the subject of an application for a Railway Order will be constructed by the Applicant until and unless the Railway Order comes into operation under section 43(4) of the Transport (Railway Infrastructure) Act 2001 (the 2001 Act)). As such, Dublin Central will not be prejudicial to MetroLink and vice versa. To this end, Dublin Central GP Limited has agreed a Memorandum of Understanding with the NTA/TII to complete the enabling works that would accommodate the planned future MetroLink O'Connell Street station under Dublin Central Site 2.</p> <p>We further note that in the event that MetroLink project is delayed or does not proceed in accordance with the application as lodged, that the Dublin Central development shall be capable of being completed, occupied and used regardless.</p> | TII acknowledge and agree with the position as outlined by Dublin Central CP Limited. |
| 3                                      | Appendix A, Dublin Central Masterplan Implementation Status      | 4        | <p>Dublin City Council issued its notification of decision to grant conditional permission for Dublin Central Site 3, Site 4 and Site 5. Sites 3, 4 and 5 are however, subject of current appeals to An Bord Pleanála (ABP Ref. ABP-3 12603-22, ABP-312642-22 and ABP-313947-22 respectively).</p> <p>Further planning applications are to be made imminently, including for Site 2 mixed use development fronting O'Connell Street, where there is an overlap with the area of the proposed MetroLink and O'Connell Station works.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | Planning application for Site 2 lodged to the planning authority by the developer.    |
| 4                                      | Appendix A, Accommodating Metrolink and O'Connell Street Station | 4        | Dublin Central GP Limited continues to be fully committed to working with TII to ensure the delivery of the co-ordinated and sustainable regeneration of the O'Connell Street area of Dublin City Centre. It has agreed a Memorandum of Understanding with the NTA/TII in relation to works that would accommodate the planned future MetroLink O'Connell Street station under Dublin Central Site 2. This ensures that the Applicant's project is structurally independent of, and not prejudicial to, the TII MetroLink Project, and vice versa (and that no Railway Works which are the subject of an application for a Railway Order will be constructed by the Applicant until and unless the Railway Order comes into operation under section 43(4) of the 2001 Act).                                                                                                                                                                                                                                                                                     | TII acknowledge and agree with the position as outlined by Dublin Central CP Limited. |

| Dublin Chamber of Commerce Submission to An Bord Pleanála. Railway Order Application for Metrolink Estuary to Charlemont. January 2023 |                     |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| 1                                                                                                                                      | Conditional Support | 4        | <p>The whole project is of keen interest to the members of Dublin Chamber, but the areas of key significance and of possible major disruption to business activity will be the boring of the City Tunnel along with the Dardistown section and the construction of stations along that alignment. It is not acceptable that key infrastructure routes through the city centre core be disrupted for a protracted period of time during the construction phase, we would like to see increased public transport options and a development of the public realm around the city centre stops to foster pedestrian access during this phase. We are glad to see that tunnel boring will be stored at the construction site in Northwood, but we would stress that construction sites need to be as unobtrusive as possible to ensure ease of access to streets for deliveries, employee and customer access.</p> | <p>TII have developed a Preliminary Design for the Project, upon which the Railway Order application is based, that has considered a wide range of options to optimise the benefits delivered by MetroLink, whilst balancing these with potential environmental impacts. The EIAR provides details of alternatives considered, analysis of the potential environmental impacts, and mitigations where these environmental impacts need to be managed and reduced to acceptable levels. This includes the consideration of impacts to businesses, public transport and pedestrian access during the construction of the Project.</p> <p>Chapter 5 of the EIAR, MetroLink Construction Phase, explains that traffic management plans for the construction phase of the Project have been developed to minimise the impact on road users, and to maintain access to businesses and other premises. Prior to implementation, all traffic management measures will be agreed with the relevant local authority (FCC or DCC) and where relevant, consultation with An Garda Síochána and other statutory stakeholders will be undertaken. The design of traffic management measures and highways works is based on achieving the key objective of maintaining continual access to all properties during the works. Where necessary, a safe alternative route will be provided for pedestrians and vulnerable road users, such as children, and persons with restricted mobility, to maintain pedestrian access to premises. Where detour routes are required, these will be kept as short as possible and detour signage will be clear and easy to understand. All construction sites will be designed to be as unobtrusive as reasonably practicle.</p> <p>Impacts on public transport have been assessed in the EIAR and services will be maintained to the extent possible. If this is not feasible, the National Transport Authority (responsible for the provision of public transport services) and relevant local authority will be consulted and reasonable alternatives to mitigate the impact will be considered and implemented where practice.</p> <p>The provision of increased public transport is outside the remit of Transport Infrastructure Ireland and the MetroLink project and is a matter for the National Transport Authority and the Transport Strategy for Greater Dublin 2022-2042.</p> |
| 2                                                                                                                                      | Conditional Support | 4        | <p>The alignment of the St. Stephens Green, O'Connell St and Mater stops brings construction right through a central, congested corridor with high traffic flows of business vehicles, private vehicles, taxis and public transport. In the shorter term, road space will be lost and traffic disruption is inevitable as roads are closed. The business community wants to know:</p> <p>a. How are the agencies involved going to respond to the closure of certain routes and roads to private vehicles?</p> <p>b. Will increased public transport options - that offer high levels of frequency and quality, and are reasonably-priced - be made available?</p> <p>c. Who will be the body that is ultimately responsible for traffic at the enabling works stage and construction stage?</p>                                                                                                             | <p>(a) Response (1) above explains the strategy and measures that will be implemented to maintain access for private and public transport users.</p> <p>As detailed in EIAR Appendix A9.5, Scheme Traffic Management Plan, all existing public transport services will be maintained, however they may experience delays to journey times, diversions or relocation of bus stops due to closures. As a minimum, one general traffic lane in each direction will be retained wherever possible to maintain traffic access, although capacity may be reduced, but the operation of services and access for businesses will be maintained.</p> <p>In the event it is not feasible to maintain a public transport service, as noted by response (1) above, the National Transport Authority and relevant local authority will be consulted and reasonable alternatives to mitigate the impact will be considered and implemented where possible,</p> <p>(b) The provision of increased public transport is outside the remit of Transport Infrastructure Ireland and the MetroLink project and is a matter for the National Transport Authority and the Transport Strategy for Greater Dublin 2022-2042.</p> <p>(c) Responsibility for traffic ultimately resides with Dublin City Council and Fingal County Council. As with previous public transport projects successfully implemented by TII, TII intend to establish a Scheme Traffic Management Forum which will consist of representatives from the Local Authority, An Gardai Síochana, The National Transport Authority and other relevant stakeholders.</p> <p>The Scheme Traffic Management Forum will meet monthly to review the effectiveness of traffic management schemes implemented in the preceding month and planned traffic managements schemes which will come into effect in the next 3-month period. This forum will ensure that all temporary traffic management arrangements are implemented with the agreement of Dublin City Council and Fingal County Council and are communicated in advance to local stakeholders.</p>                                                                                                                                                                                                                                                                                                             |

| Dublin Chamber of Commerce Submission to An Bord Pleanála. Railway Order Application for Metrolink Estuary to Charlemont. January 2023 |                     |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|                                                                                                                                        |                     |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | <p>In terms of specific traffic and transport issues, TII, who themselves are a provider of operating public transport infrastructure, will work closely with the relevant local authority (DCC or FCC), and with the National Transport Authority, An Garda Síochána and other statutory stakeholders as necessary to ensure acceptable access and levels of traffic is maintained at all times throughout the construction of the Project.</p> <p>As outlined in EIAR Appendix A5.1, Outline Construction Environmental Management Plan (CEMP), the appointed contactor(s) will be required to implement the necessary mitigation measures in relation to traffic and transportation during construction. Following the appointment, the contractor(s) will be required to develop an updated contract-specific CEMP which will detail all measures to be employed to mitigate the potential environmental impacts, including those in relation to traffic and transportation.</p>                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 3                                                                                                                                      | Conditional Support | 4        | We have mentioned in the past the need to enhance the public realm to entice people to frequent the city core not only on core working days but also for recreation. We would strongly suggest that free flow of pedestrians is not impeded excessively by works. The city is still recovering post covid especially the hospitality sector. While it is accepted that some disturbance during construction will be inevitable, they justifiably want this to be short lived and properly controlled to ensure it is not at an unacceptable level.                 | <p>As identified in EIAR Appendix A9.5, pedestrian routes will be maintained throughout the construction period. It is important to note that at no time will there be a safety risk to the public from construction activity. Health and safety of all, whether it be the public, businesses, stakeholders, people working on the project or any other group or entity that comes in to contact with the Project, will not be compromised in anyway.</p> <p>In areas, such as the city centre, the designated access and pedestrian routes around the construction sites, particularly at and/or along the hoarding lines will be designed so that it is not perceived as uninviting by pedestrians. The environment around the sites will be designed to ensure that pedestrians feel they are entering a safe and accessible environment. This will ensure that the impact to businesses and shops adjacent to the works areas is minimised. Temporary pathways will be installed where appropriate, and provision will be made to ensure access for persons with restricted mobility is maintained. Where the existing level of service cannot be maintained in the vicinity of a construction site, an alternative route will be provided. This route will be clearly signed, visible, and safe, and will provide a level of service (capacity) required to cater for the pedestrian demand.</p> |
| 4                                                                                                                                      | Conditional Support | 4        | Excessive noise dust and vibrations must be kept at a level that ensure the maximum flow of pedestrians that is consistent with the health and safety of the sites under reference.                                                                                                                                                                                                                                                                                                                                                                                | <p>TII confirm that noise, dust and vibration levels will be maintained at a level that do not present any health and safety risk to pedestrians. All environmental impacts will be monitored, with pre-determined trigger levels assigned so that it is not possible for environmental limits to be breached that could have a health and safety impact.</p> <p>As noted by response (3) above, health and safety of all, whether it be the public, businesses, stakeholders, people working on the project or any other group or entity that comes in to contact with the Project, will not be compromised in anyway.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| 5                                                                                                                                      | Conclusions         | 5        | <p>The highest priority for Dublin Chamber and its members is to ensure that projects will transform the city region, and that pillar four, Sustainable Mobility, of Project Ireland 2040 is carried out. This project has had many iterations in the past that have stalled, and we urge that if the Board grants a RO, that the project leaders move swiftly to procurement and construction phase.</p> <p>Metrolink has the potential to transform how people get around Dublin, if done right and on time. There can be no further delays to this project.</p> | <p>TII as the Government Agency responsible for delivering MetroLink, are committed to expediting the delivery of this transformative project on receipt of an Enforceable Railway Order.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

| Written Submission from Dublin City Council's Chief Executive to An Bord Pleanála in relation to the National Transport Application for the Railway (MetroLink - Estuary to Charlemont via Dublin Airport) Order [2022] |                       |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |
| 1                                                                                                                                                                                                                       | 2.4.1 Planning Policy | 22       | While the Proposed Scheme is supported, it is important that the proposal adequately addresses conservation impacts along the route as well as the potential to improve green infrastructure and pedestrian and cycle connectivity and permeability.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | <p>TII have included for the conservation mitigation of impacts throughout the Project and have appointed a Project Conservation Architect (PCA) to oversee the implementation of mitigation measures relative to the Built and Cultural (inclusive of Industrial) Heritage during the lifetime of the Project. The responsibilities of the PCA and proposed mitigation measures are outlined in the Construction Environmental Management Plan in EIAR Volume 5, Appendix 5.1 and MetroLink Cultural Heritage Strategy Rev.02.</p> <p>MetroLink will provide significant benefits not only to those who choose to use it, but also to other transport network users, by reducing the demand for road space and creating the opportunity for the road transport system to achieve optimum levels of efficiency and effectiveness. Also as outlined in Chapter 3, the proposed Project is part of an integrated transport network that also includes for BusConnects and DART+ which are all included under Project Ireland 2040. Together, these projects will result in a reliable, sustainable, affordable, integrated public transport network that will support the economy, help Ireland meet its climate change targets in line with Climate Action Plan 2023 and make Dublin a more liveable and sustainable city. Whilst MetroLink is a standalone project that is not dependent on any other projects for its delivery or effective operation, it is nonetheless a critical part of the proposed integrated transport network for the Greater Dublin Area.</p> <p>The maximum number of bicycle parking has been provided at each station taking cognisance of available space. To meet future cycle parking demand, will require a coordinated multi-agency approach to ensure efficient delivery of cycle parking spaces and facilities. There is a clear mix of uses in the areas surrounding MetroLink stations, which may see cycle demand in varying peak times. As a result, it requires a combined approach and delivery from multiple agencies, e.g. Dublin City Council, Fingal County Council, NTA, TII and Irish Rail, to identify how future demand can be accommodated sustainably and the maximum benefits of the parking achieved. TII anticipate cycle parking provisions are likely to involve a combination of fixed and shared bicycles and other facilities to support the delivery of mobility hubs across the region.</p> <p>With regards 'green infrastructure', TII will procure the contractors to deliver the design based on specified environmental criteria and in line with TII's Sustainability Implementation Plan – Our Future (TII 2021), that sets out the vision to lead in the delivery and operation of sustainable transport, strengthen resilience to climate change, and maintain commitment to the environment. The Plan recognises the need to rethink, reimagine and redesign approaches to ensure sustainability is at the heart of everything that TII does, requiring it to be the leading provider of sustainable infrastructure. These provisions are contained within the EIAR Chapter 4 and specifically referenced in Section 4.6 Sustainable Design.</p> |  |
| 2                                                                                                                                                                                                                       | 2.4.4 Zoning          | 22       | Overall the proposed above-ground structures are considered compatible and consistent with the objectives of the Development Plan including the zoning objectives for all of those areas within which the proposed access points to the stations are proposed to be located. One exception is at Glasnevin Station where the potential absence of oversite development is of concern should it not be 'designed in' at this stage of the proposal to accord with the Z3 zoning objective for the Glasnevin site is 'to provide for mixed neighbourhood facilities'. A condition is recommended that allow for the station box to be so-designed as to not impede the potential of the site to provide for comprehensive redevelopment appropriate for a neighbourhood centre rather than merely a station box, particularly having regard to policies to increase density as part of Transport Orientated Development. | <p>The Railway Order does not include for an oversite development (OSD), but the MetroLink project does not preclude an OSD at Glasnevin.</p> <p>TII do agree that further consideration can be given to exploring an engineering solution that can deliver the type of oversite development envisioned by DCC but would suggest that the engineering solution proposed to facilitate the oversite development will form part of a separate subsequent planning application. We believe that an engineering solution can developed that can be structurally independent of the current station design and will with work with DCC to ensure that the construction of a viable oversite development at the site is not impeded in the future.</p> <p>TII would also note, as set out by section 3.6.2.1 of the Planning Report, that a station is Permissible on these lands under zoning objective Z3. The station will directly deliver objective SMT017 of the DCDP 2022-2028.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |  |
| 3                                                                                                                                                                                                                       | Impact on Amenity     | 23       | <p>The proposed development will generally not have a significant impact on public amenity. Exceptions are St. Stephen's Green, Albert College Park and Griffith Park, all of which will be impacted to various degrees during the construction of the proposed development. Significant parts of these public amenity lands will be effectively unusable during construction of the project. Although this is a negative impact, it is considered necessary and unavoidable for the completion of the project and in the long term public interest.</p> <p>The Planning Authority is of the opinion that provided the areas are properly reinstated following construction, this situation is acceptable.</p>                                                                                                                                                                                                         | <p>TII would note that as set out by the EIAR, amenity impacts have been minimised so far as practicable and that TII and their contractors will continue through the detailed design and construction to do everything practicable to minimise impacts.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |  |

| Written Submission from Dublin City Council's Chief Executive to An Bord Pleanála in relation to the National Transport Application for the Railway (MetroLink - Estuary to Charlemont via Dublin Airport) Order [2022] |                                                                  |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |  |
| 4                                                                                                                                                                                                                       | Impact on Amenity                                                | 23       | The demolition of existing residential properties (circa 80) to facilitate the construction of Tara Street Station is regrettable. On balance, however, the provision of a Metro Station, is of considerable benefit to the entire city and the rehousing of residential tenants by TII in consultation with DCC, will provide adequate compensation for the loss of residential units on Townsend Street.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | <p>TII also regret the loss of these residential properties having considered numerous options and alternatives for Tara Station. TII also appreciate that while MetroLink will provide considerable benefits to Dublin, for the individuals who are directly impacted by demolition this may be of little consolation.</p> <p>In this regard please refer to the MetroLink Land Acquisition Strategy which was published in September 2022 and outlines a series of commitments TII has made in respect to early engagement and negotiation with property owners and tenants whose properties and homes are subject to compulsory purchase order. This includes, early negotiations with property owners to ensure that compensation is paid as soon as possible following the grant of an Enforceable Railway Order.</p> <p>For tenants TII will engage the services of a Residential Lettings and Management Agency which can be made available to undertake a property search with the intention of identifying suitable alternative accommodation for those tenants displaced by the Scheme. Once an alternative property has been identified whether through this appointed agent or sourced by the tenant themselves directly, TII will consider meeting relevant and reasonable costs associated with securing the Tenancy such as discharging the rental payments of the new Tenancy for a period of up to one year, together with any reasonable disturbance costs necessary and attributable to their move.</p> |  |
| 5                                                                                                                                                                                                                       | Impact on Amenity                                                | 23       | DCC have also engaged with TII in relation to the development of a sports and recreational facility to replace Markiewicz Sports & Fitness Centre should this be acquired, as envisaged, as part of the MetroLink project.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | <p>TII will also continue to work with DCC in relation to the development of an alternative sports and recreational facility to replace the Markiewicz leisure centre and intends to fund the alternative. However, TII does not have control over that development, which is part of DCC's function to provide public sport and recreational facilities in its function area. DCC may or may not be in a position to deliver it in parallel with the MetroLink project. Accordingly, the Board should assess the MetroLink project on the basis that the alternative may not be available. The impact would then be significant, but nonetheless one that would not outweigh the strategic scale long term benefits that MetroLink will deliver.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |  |
| 6                                                                                                                                                                                                                       | Visual Amenity on Structures                                     | 23       | The above ground structures, i.e. the access points, lifts, roof lights etc., are designed as clean, simple, contemporary structures. It is recommended that a condition be attached that all above-ground elements be highly durable, vandal resistant (where they come into contact with the public) and should have minimal embodied environmental impact.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | <p>Above ground structures are designed with careful consideration to their impact on the public realm and integrated with the public realm where possible. All above-ground elements will be highly durable, vandal resistant (where they come into contact with the public) and shall have minimal embodied environmental impact.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |  |
| 7                                                                                                                                                                                                                       | Planning and Property Development Department - summary of report | 25       | <p>The LAP was prepared following the publication of the 2015 North Dublin/ Fingal Transport Study (the Study), which identified the overall corridor for the new Metro North, now MetroLink. The Study included provision for surface-level metro stops at DCU (Collins Avenue), Ballymun and Northwood.</p> <p>Whilst the LAP strongly supported the delivery of a metro route through Ballymun it stated: "it is imperative that any rail line through the Main Street does not segregate east and west Ballymun as was the case pre-regeneration when the dual-carriageway ran through the area. Considerable public money has been invested creating and developing an urban Main Street, with new connections and ease of pedestrian and cycle movement. In order to prevent the segregation which a rail transport system requires, the LAP calls for any future Metro line to have regard to the LAP objectives to create an urban Main Street with enhanced permeability and to ideally run the Metro underground through the Main Street until after the junction with Santry Avenue"</p> | <p>The Proposed Project is in tunnel from Northwood Station through to the city centre. This decision facilitates urban realm improvements and integration at street level that allows strong connectivity between the east and west of Ballymun Main Street and along the MetroLink alignment, both within the project and in conjunction with other public transport projects such as BusConnects. At Ballymun Station, two signalised crossings are provided that connects the east side of Ballymun Main Street to the Station, while at Northwood similar crossing provisions are made. TII are therefore of the view that permeability and connectivity is delivered in so far as the scope of MetroLink and TII's remit permits.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |  |

| Written Submission from Dublin City Council's Chief Executive to An Bord Pleanála in relation to the National Transport Application for the Railway (MetroLink - Estuary to Charlemont via Dublin Airport) Order [2022] |                                          |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| 9                                                                                                                                                                                                                       | Conservation Section - summary of report | 25       | <p>-The proposed works should take into account any areas that contain historic stone setts noted in Volume 2, Appendix 6 of the Development Plan, and take all practicable measures to avoid loss of or damage to historic materials and features.</p> <p>-The proposed works should take into account any areas that contain historic paving/kerbing and associated features noted in Volume 2, Appendix 6, Part 2.0 of the Development Plan, and take all practicable measures to avoid loss of or damage to historic materials and features</p> <p>- 'The Applicant should comply with the requirements of the Architectural Heritage Protection Guidelines for Planning Authorities 2011 - 14.4.1 and the Department of Arts, Heritage and the Gaeltacht (now the Department of Housing, Local Government and Heritage) Advice Series Paving _The conservation of historic ground surfaces and best conservation practice.</p> | <p>TII confirm their commitment to taking all practicable measures to avoid loss of, or damage to historic materials and features, and that TII and their contractors will comply with the guidelines and guidance set out by this observation. The potential for impact on Historic Stone Setts as Listed in Volume 2, Appendix 6 of the Development Plan, where present within the proposed MetroLink station locations have been assessed in Chapter 26 of the EIAR and have been subject to a condition survey as a component of the MetroLink PCA Scope of Works and as a component of the MetroLink Street Furniture Survey.</p> <p>Each Contractor will be required to appoint their own Conservation Architect to ensure that all conservation or protection measures are covered by the Construction Environmental Management Plan (CEMP) for each relevant works contract. An outline version of this document is included in EIAR Appendix A5.1, and will be developed to a detailed level by the relevant works contractor once appointed. TII and their contractors will consult with DCC when finalising the detailed version of this Plan.</p> <p>Where historic stone setts, paving/kerbing cannot be protected in situ or where their condition deems removal to be a more appropriate protection measure, they will be removed and stored in a safe location until construction is complete. They will then be reinstated in accordance with a conservation method statement and the detailed hard landscaping design, in the original location or a new location agreed by the PCA and the local planning authority. Where the condition of such paving may deem it unsuitable for reuse (e.g. due to excessive existing damage), this will be brought to the relevant authorities attention for agreement. All works will be undertaken in accordance with relevant heritage guidelines and best practice.</p>                                                                                                                       |
| 10                                                                                                                                                                                                                      | Conservation Section - summary of report | 26       | <p>-The benefits of the Metrolink which will augment the provision of public transport within the city are acknowledged, but .....-The comprehensive assessment on architectural heritage, streetscape and the urban environment submitted as part of the EIAR across the scheme is acknowledged. Further details will be required of proposed mitigation measures, particularly in relation to landscaping where existing mature trees are to be removed.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | <p>A key element of the landscape design for the Project has involved the identification and retention of valuable landscape and visual assets where practicable. With regards to existing mature trees, an Arboriculture Impact Assessment was carried out (EIAR Appendix 27.3). This contains information on the existing tree conditions and the arboricultural impact of the proposed Project. EIAR Chapter 27 Landscape &amp; Visual, section 27.6.1 includes for a number of mitigation measures to reduce the impact of MetroLink, including:</p> <ul style="list-style-type: none"><li>• Identification and retention of existing mature trees of good quality, through the adjustment of the alignment, location of structures/buildings and the outline design of the proposed Project;</li><li>• Comprehensive proposals for hard and soft landscape works, including tree and hedgerow planting to offset the effects of net loss due to the proposed Project;</li><li>• Where cut and cover sections of track and/or station boxes underground are to be planted over, the inclusion of sufficient appropriate substrate and adequate drainage to allow tree planting and growth for posterity. There is a general requirement for a minimum depth of 1.5m growing medium in such circumstances.</li><li>• To improve biodiversity, the inclusion of species rich planting and wildflower meadows of primarily native species (and pollinator friendly plant species where deemed appropriate) as part of the planting strategy;</li><li>• A detailed design of the incorporated biodiverse planting that will be developed with the project ecologist;</li><li>• In sensitive locations, residual landscape and visual effects will be significantly reduced through the inclusion in the proposed planting of relatively mature specimen trees.</li></ul> <p>TII will continue to consult and work with DCC to demonstrate that everything is being done so far as practicable to minimise the impact of the Project on mature trees.</p> |

| Written Submission from Dublin City Council's Chief Executive to An Bord Pleanála in relation to the National Transport Application for the Railway (MetroLink - Estuary to Charlemont via Dublin Airport) Order [2022] |                                                        |          |                                                                                                                                                                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |  |
| 11                                                                                                                                                                                                                      | Conservation Section - summary of report - Collins Ave | 27       | Whilst Our Lady of Victories Church, Ballymun Road (Constraint No. BH-18) is not a Protected Structure, it is included in the National Inventory of Architectural Heritage (NIAH) Reg. No. 50130121, and has been afforded a Regional Rating and Architectural, Artistic, Social and Technical Categories of Special Interest and is an interesting example of 20th century architectural heritage. | <p>Our Lady of Victories Church (OLV) Church was assessed as part of the EIAR Chapter 26, Architectural Heritage. It's status as part of the NIAH was noted and a baseline rating of Medium was assigned to reflect its designations. Impacts on the Church have been assessed and the following mitigation measures (EAIR Chapter 26, section 26.7.1) were assigned to reduce the level of impacts from the proposed Project.</p> <p>Construction Phase - The piling methodology for construction of the station box to the front of the Church will take account of the nature of the construction of the Church, including the stained glass. Prior to construction commencing, The MetroLink PCA supported by their stained glass specialist will have undertaken a condition survey of the Church in order to assess and ensure that the building, including the stained glass windows and associated priests grave, is protected in situ as per the EIAR mitigation measures and MetroLink Cultural Heritage Strategy. If substantial defects are noted as an outcome of this survey that require protective ameliorative measures (e.g. conservation repairs) this will be discussed with the Arch Dioceses and implemented. For each relevant works package vibration and settlement/deformation monitors will be installed in the Church in the vicinity of the works linked to alarms to identify any vibration or settlement activity so that threshold limits are not exceeded. Trigger warnings will be set in a three tier notification hierarchy so as to ensure work practices are paused and amended such that threshold levels are not breached. In the event of a threshold being breached, works will cease until the cause of the -exceedance is identified and systems / methodologies modified to prevent recurrence. Threshold levels will be devised by a competent specialist in consultation with the MetroLink PCA and Environment team, and will be in line with the recommendations of the MetroLink EIAR and relevant British Standards.</p> <p>Operational Phase - The forecourt of the Church will be reinstated in a modified/reduced footprint and provided with new landscaping with the MetroLink access, emergency stairway and intervention shaft sensitively integrated within the forecourt. The design of the new landscaping was devised in consultation with the Archdiocese and is set out and assessed in Chapter 25 Archaeological and Cultural Heritage, Chapter 26 Architectural Heritage and Chapter 27 The Landscape of the MetroLink EIAR.</p> |  |
| 12                                                                                                                                                                                                                      | Conservation Section - summary of report - Collins Ave | 27       | The proposed works will give rise to the loss of trees which is most regrettable and should be mitigated by replanting/landscaping at all station locations where relevant.                                                                                                                                                                                                                         | Please refer to response (10) above.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |  |
| 13                                                                                                                                                                                                                      | Conservation Section - summary of report - Collins Ave | 27       | Introduction of the new structures including the Metro Entrance Canopy, ventilation shafts, Fireman's Lift and other features will interfere with the present harmonious symmetrical setting of the principal elevation of the Church (Refer to Photomontage WM 15.2, 15.2).                                                                                                                        | As outlined in EIAR Chapter 27, The Landscape, section 27.5.4.16, the design of the proposed Collins Avenue Station includes public realm improvements where possible. It is noted that while the entrance canopy, row of three surface mounted skylights, lifts vents and emergency exits will alter the landscape in front of the Church, the Station design incorporates a broad section of new attractive public realm and garden to the front of the Church. This features high quality paving, seating, bike parking, and garden tree planting with swale planting and ornamental ground cover planting to create a green and welcoming public realm. While not a direct reproduction, care has been taken to reference the orthogonal shape of the church in the proposed footpath design. TII consider that the improvement to the overall appearance of the landscape and public realm associated with the front of the church will also assist with the integration of the Station features.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |  |
| 14                                                                                                                                                                                                                      | Conservation Section - summary of report - Collins Ave | 27       | The location of the various structures associated with the Station Box is driven by standard and not bespoke relationships between the different elements. The magnitude of the impact will be high and the potential effect will be significant.                                                                                                                                                   | TII do not concur with this observation. The location of the various structures that are associated with each Station have been particularised at each location taking account of the existing urban realm and the above ground features have been consolidated and integrated where possible to create a legible and clutter free environment. The concept design aims to balance church and station requirements. The proposals do impact the existing environment, however TII believe that the effect is to improve the quality of public realm, addressing both the important church architecture and public thoroughfare to the front of the church, through the careful design of the soft and hard landscaping, as well as the considered integration of the station elements. Please also refer to response (13) above.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |  |

| Written Submission from Dublin City Council's Chief Executive to An Bord Pleanála in relation to the National Transport Application for the Railway (MetroLink - Estuary to Charlemont via Dublin Airport) Order [2022] |                                                        |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| 15                                                                                                                                                                                                                      | Conservation Section - summary of report - Collins Ave | 27       | The visual impact of HVM bollards on all stations and surrounding public realm is dominant - recommended that landscaping / raised planters be introduced to improve overall presentation                                                                                                                                                                                                                                                                                                                                                                                                                                                         | TII acknowledge this issue and will reconsider the provision of bollards in entirety at the next design phase. TII will work with DCC and An Garda Síochána to replace as many HVM bollards as possible with alternative solutions such as landscaping or street furniture, at all locations. In addition TII will look at reducing the number of bollards by increasing the spacing, where an alternative solution cannot be found.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| 16                                                                                                                                                                                                                      | Conservation Section - summary of report - Glasnevin   | 27       | The subject site is located within a Red Hatch Conservation Area. The construction of the Glasnevin Metro Station will require a very significant direct intervention with existing historic fabric, which will straddle and incorporate 3no. existing bridges (Cross guns Bridge - formerly Westmoreland Bridge NIAH Reg. No. 50060185, Proposed Protected Structure RPS 8807 and adjacent railway tunnel NIAH Reg. No. 50060112 and bridge) and will be constructed in very close proximity to the 18th century Royal Canal (included in the DCIHR) and the 5th and 6th locks (included in the DCIHR and NIAH Reg. Nos. 50060184 and 50060182). | The location of the proposed Glasnevin Station lies within a non-statutory Conservation Area is understood and considered in both the design and construction of the Station. Architectural and cultural heritage constraints at Glasnevin Station are covered by EIAR Chapter 25 Archaeology and Cultural Heritage and Chapter 26, Architectural Heritage wherein the important cultural significance of these various industrial heritage constraints for the development of the city is recognised. The MetroLink PCA supported by their Industrial Heritage Specialist will have undertaken condition surveys of all heritage constraints within the environs of the proposed station (inclusive of the MGWR/GSWR and Royal Canal) with the full support of Waterways Ireland and Irish Rail before construction commences. These condition surveys will be supplemented by an Underwater Survey of inaccessible areas of the Royal Canal, though visibility and the potential knowledge gain is deemed to be limited. These surveys and arising draft works specifications will be provided to each relevant contractor prior to construction, with each relevant contractor required to engage their own Conservation Architect. The MetroLink PCA will review each contractors Method Statement for compliance with the EIAR mitigation measures and will ensure that all conservation or protection measures are covered by the relevant contractors Construction Environmental Management Plan (CEMP). An outline version of this document is included in EIAR Appendix A5.1, and will be developed to a detailed level by the relevant works contractor once appointed. TII and their contractors will consult with DCC when finalising the detailed version of this Plan particularly in relation to DCC road bridges. All proposed conservation works to the Royal Canal will be in accordance with Waterways Ireland Conservation Guidelines/Specifications/Heritage Plans and Best Practice and the necessary agreement will be in place with Waterways Ireland prior to works commencing. |
| 17                                                                                                                                                                                                                      | Conservation Section - summary of report - Glasnevin   | 27       | The particular industrial and architectural heritage importance of the 18th century Royal Canal and its locks requires careful consideration                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | The architectural and industrial heritage of the Royal Canal is understood and discussed in EIAR Chapter 25 Archaeology and Cultural Heritage and Chapter 26, Architectural Heritage. As outlined in the response to Item 16 above competent experts will be engaged to ensure measures detailed in the CEMP (EIAR Appendix A5.1) are adhered to. A specialist heritage works contractor will be appointed to remove, store, and conserve architectural heritage assets relating to the Royal Canal during construction, to undertake any necessary in situ conservation repairs, and to undertake any necessary reinstatement works on completion of construction. TII have consulted with Waterways Ireland in this regard and have responded to their observations raised on this matter. (Submission No. 312, Waterways Ireland). All heritage constraints and the arising impacts have been given due consideration from pre-EPR project planning. All works to the canal will be in accordance with Waterways Ireland Conservation Guidelines/Specifications/Heritage Plans. No works will be undertaken that cause detriment to the non-statutory Conservation Area designation, to the objectives of the DCC Development Plan (current and proposed). As outlined in Item 16 the MetroLink PCA will have undertaken condition surveys and work specifications for Royal Canal/MGWR/GSWR/Cross Guns Bridge/St Vincent's Orphanage/Historic Paving before construction commences which will be integrated into the final detailed design inclusive of proposals to improve public realm for consideration by DCC. Details of all agreed proposals, which will be discussed iteratively with DCC, will be incorporated into the MetroLink Cultural Heritage Strategy/Detailed Design/Contract Requirements.                                                                                                                                                                                                                                                                                         |

| Submission No.                                                                                                                                                                                                          |                                                      |          | 071                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |

| Written Submission from Dublin City Council's Chief Executive to An Bord Pleanála in relation to the National Transport Application for the Railway (MetroLink - Estuary to Charlemont via Dublin Airport) Order [2022] |                                                      |          |                                                                                                                                                                                                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| 18                                                                                                                                                                                                                      | Conservation Section - summary of report - Glasnevin | 27       | The architectural materiality and language of the proposed new station will contrast with the architecture of the receiving environment and adjacent Protected Structures.                                                           | TII believe the commissioning of internationally renowned architect Nicholas Grimshaw and Partners, has delivered a contemporary station design which is appropriate for a state of the art metro system such as Metrolink. Appropriately, significant emphasis is placed on the public spaces. Where feasible, the station concourse is a soaring space illuminated from above with natural light. Dublin's rich architectural heritage has been respected, but not copied in pastiche. In accordance with best conservation principles, as set out in the ICOMOS Venice Charter of 1964, the stations are architecturally distinguishable so as not to falsify the existing historic context. Reference and due respect to that context is made through the choice of high quality and appropriate materials and the scale of the interventions. TII believe the current station and surface level designs greatly enhance the public realm at all locations along the MetroLink route. There is a unifying commonality in the design of all stations, providing a consistent and coherent architectural language, which assists with orientation and wayfinding, and contributes a new architectural lexicon to the cultural iconography of the city. |

| 20                                                                                                                                                                                                                      | Conservation Section - summary of report - Glasnevin | 27       | Particular concerns about the physical impacts on the historic bridges and Royal Canal, as it is not possible to assess the interconnections between proposed and existing fabric to be retained based on the information submitted. | Please refer to responses (16) and (17) above. All historic bridge fabric underlying Prospect Road is to be retained in situ. Detailed plans and methodologies for works demonstrating the exact interconnections will be prepared by the appointed main works contractor, informed by relevant detailed condition surveys, and all necessary divisions of DCC (inclusive of DCC Conservation), Waterways Ireland, Irish Rail and the relevant divisions of the Department of Housing, Local Government and Heritage will be briefed and consulted on any proposals, which in turn will be incorporated into the MetroLink Cultural Heritage Strategy. The impacts on historic bridges and the Royal Canal have been identified and assessed within Chapter 25 Archaeology and Cultural Heritage and Chapter 26 Architectural Heritage of the EIAR.                                                                                                                                                                                                                                                                                                                                                                                                      |
| 21                                                                                                                                                                                                                      | Conservation Section - summary of report - Glasnevin | 27       | Detailed drawings are requested for the temporary bridge that will facilitate access for the occupants of Coke Oven Cottages during construction of the works                                                                        | The detail design of the temporary bridge will be undertaken by the main works contractor. DCC will be consulted during the detail design of this temporary bridge, which will be designed both in accordance with DCC traffic requirements and Waterways Ireland Bye-laws.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| 22                                                                                                                                                                                                                      | Conservation Section - summary of report - Glasnevin | 27       | Magnitude of the potential direct impacts during construction is predominantly high and the significance of effect are profound, very significant and significant                                                                    | TII have responded to the individual observations raised with regards to Glasnevin Station (see responses (16) to (21) above). Glasnevin Station is a critical interchange with Irish Rail that is essential to deliver the benefits of the project, but as a result it is a complex element of the Project that interfaces with other key infrastructure stakeholders. Potential environmental impacts of the construction activities at the proposed Glasnevin Station and Interchange have been assessed within the relevant environmental chapters of the EIAR along with proposed mitigation measures that set out how construction phase impacts will be mitigated so far as practicable.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |

| Written Submission from Dublin City Council's Chief Executive to An Bord Pleanála in relation to the National Transport Application for the Railway (MetroLink - Estuary to Charlemont via Dublin Airport) Order [2022] |                                                  |          |                                                                                                                                                                                                                                                                                                                                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| 23                                                                                                                                                                                                                      | Conservation Section - summary of report - Mater | 27       | The baseline sensitivity of the Mater Hospital, St. Joseph's Church and the Four Masters Park and surrounding Eccles Street, Berkeley Road, O'Connell Avenue is high and the magnitude of the potential direct impacts during construction is predominantly high and the significance of effect are profound, very significant and significant. | <p>The baseline sensitivity of Mater Hospital, St. Joseph's Church and the Four Masters Park is understood and recognised by EIAR Chapter 25 Archaeology and Cultural Heritage and Chapter 26, Architectural Heritage, Table 26.51. The magnitude of potential direct impacts during construction at Mater Station prior to mitigation have been assessed as Medium, Profound and Very Significant respectively for the aforementioned built heritage receptors prior to the implementation of mitigation measures. The proposed construction mitigations for each are summarised below:</p> <p>Mater Hospital (Table 26.66):</p> <ul style="list-style-type: none"><li>• The methodology for the construction of the diaphragm walls for the Station box to the front of the Mater Hospital is to be devised in conjunction with the Metrolink PCA;</li><li>• For each relevant works package vibration and settlement/deformation monitors will be installed at appropriate locations within the hospital environs in the vicinity of the works linked to alarms to identify any vibration or settlement activity approaching unacceptable levels / triggers so that vibration threshold limits are not exceeded. Trigger warnings will be set in a three tier notification hierarchy so as to ensure work practices are paused and amended such that threshold levels are not breached. In the event of a trigger threshold being breached, works will cease until the cause of the vibration exceedance is identified and systems / methodologies modified to prevent recurrence. Threshold levels will be devised by a competent specialist in consultation with the MetroLink PCA and Environment team, and will be in line with the recommendations of the MetroLink EIAR and relevant British Standards. Vibration and settlement monitoring instrumentation will be installed in the hospital building in the vicinity of the works linked to alarms to identify any limits approaching unacceptable levels / triggers so that limits are not exceeded. In the event of a trigger being breached, works will cease until the cause of the breach is identified and systems / methodologies modified to prevent recurrence.</li><li>• Following the completion of the Project Conservation Architect (PCA) undertaking condition surveys in advance of the construction phase, a hierarchy of mitigation measures for necessary interventions will be developed and noise and air quality specialists to safeguard the heritage of these buildings and importantly the physical and mental wellbeing of the building occupants. Such measures will equally be discussed with DCC Environmental Health Unit and with DCC Conservation and where a potential heritage implication is identified. Such measures must be in keeping with HSE National Guidelines for the Prevention of Nosocomial Aspergillosis.</li></ul> <p>As detailed in Chapter 31 (Summaries of the Route Wide Mitigation and Monitoring), mitigations and monitoring measures set out in the Railway Order have been identified as environmental commitments and overarching requirements which shall avoid, reduce or offset potential impacts. Mitigation measures have been proposed for all impacts resulting in a moderate significance or above. Furthermore, mitigation measures have also been proposed for some impacts with a lower significance where such measures are routinely applied (for example in the management of construction-related impacts), or where, based on professional judgement, there would be a material benefit to the receptor.</p> <p>The impact is assessed to decrease to slight following the above mitigation.</p> <p>St. Joseph's Church (Table 26.66):</p> <ul style="list-style-type: none"><li>• The methodology for the construction of the diaphragm wall for the station box to the side of St. Joseph's Church has been devised in consultation with the Metrolink PCA;</li><li>• Vibration and settlement monitoring instrumentation will be installed in the Church in the vicinity of the works linked to alarms to identify any limits approaching unacceptable levels / triggers so that limits are not exceeded. In the event of a trigger being breached, works will cease until the cause of the breach is identified and systems / methodologies modified to prevent recurrence.</li></ul> |

| Written Submission from Dublin City Council's Chief Executive to An Bord Pleanála in relation to the National Transport Application for the Railway (MetroLink - Estuary to Charlemont via Dublin Airport) Order [2022] |                                                  |          |                                                                                                                                                                                                                                                                                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
|                                                                                                                                                                                                                         |                                                  |          | Response item (23) continued                                                                                                                                                                                                                                                                                         | <p>For each relevant works package vibration and settlement/deformation monitors will be installed at appropriate locations within the hospital environs in the vicinity of the works linked to alarms to identify any vibration or settlement activity approaching unacceptable levels / triggers so that vibration threshold limits are not exceeded. Trigger warnings will be set in a three tier notification hierarchy so as to ensure work practices are paused and amended such that threshold levels are not breached. In the event of a trigger threshold being breached, works will cease until the cause of the vibration exceedance is identified and systems / methodologies modified to prevent recurrence. Threshold levels will be devised by a competent specialist in consultation with the MetroLink PCA and Environment team, and will be in line with the recommendations of the MetroLink EIAR and relevant British Standards</p> <ul style="list-style-type: none"><li>• The impacted sections of the church boundary (where shared with Mater/Four Masters Park) stone pier, gate, railings and plinth wall are to be removed by a specialist heritage contractor in accordance with a conservation method statement to be prepared by the PCA and are to be brought to a place of secure storage during the works;</li><li>• The grotto is to be temporarily relocated within the grounds of the Church on a short-term basis and in a modified format in accordance with a method statement to be prepared by the PCA and in consultation with the Church authorities; and</li><li>• Following construction of the station box, the stone pier, gate, railings and plinth wall and grotto are to be reinstated to their original locations in accordance with a conservation method statement prepared by the PCA.</li></ul> <p>The impact is assessed to decrease to slight to moderate following the above mitigation.</p> <p>Four Masters Park (Table 26.66):</p> <ul style="list-style-type: none"><li>• A good quality hoarding with images of the Park or images sensitive to the receiving environment will be in place and maintained in good order for the duration of the works;</li><li>• The Park is to be reinstated following completion of the construction of the Station, though the park site will now incorporate an access to the Station, ventilation shafts and other structures related to the Station and a revised layout to the Park and railings will be implemented;</li><li>• Four Masters Cross and Healing Hands Sculpture is to be lifted and removed to a place of secure storage in accordance with a conservation method statement prepared by the PCA (it will receive the necessary conservation and repairs before reinstatement). On completion of the construction of the Station, the Cross and Healing Hands sculpture will be returned to the Park and re-erected in a place to be agreed (in consultation with Mater Hospital, DCC and local residential groups) as part of the final landscaping design of the Park. This Reinstatement works will be carried out in accordance with a conservation method statement prepared by the PCA; and</li><li>• The gates, railings and plinth walls will be removed in accordance with a conservation method statement prepared by the PCA and brought to a place of secure storage during the works (elements to be reinstated will receive the necessary conservation and repairs before reinstatement). Following construction of the Station box, the gates, railings and plinth walls will be reinstated on a revised alignment in accordance with a conservation method statement prepared by the PCA. Surplus railings will not be subject to conservation unless they can be immediately reused elsewhere on the MetroLink scheme. They will be novated to the Hospital (as owner) or other agreed party for reuse following appropriate consultation.</li></ul> <p>The impact on the overall park is assessed to decrease to moderate to significant following mitigation.</p> |
| 24                                                                                                                                                                                                                      | Conservation Section - summary of report - Mater | 27       | The visual impact of the new Metro Station and associated dark brick upstands/vents, lifts and other features on the Mater Hospital, St. Joseph's Church and Four Masters Park is dominant and adverse and it is not clear how this impact could be improved without a radical relocation or screening of key items. | <p>TII disagree and believe the commissioning of internationally renowned architect Nicholas Grimshaw and Partners, has delivered a contemporary station design which is appropriate for a state of the art metro system such as Metrolink. Appropriately, significant emphasis is placed on the public spaces. Where feasible, the station concourse is a soaring space illuminated from above with natural light. Dublin's rich architectural heritage has been respected, but not copied in a pastiche imitation. In accordance with best conservation principles, as set out in the ICOMOS Venice Charter of 1964, the stations are architecturally distinguishable so as not to falsify the existing historic context. Reference and due respect to that context is made through the choice of high quality and appropriate materials and the scale of the interventions. At Mater station, the canopy entrance evokes the scale of park structures. TII believe the current station and surface level designs greatly enhance the public realm at all locations along the MetroLink route. There is a unifying commonality in the design of all stations, providing a consistent and coherent architectural language, which assists with orientation and wayfinding, and contributes a new architectural lexicon to the cultural iconography of the city.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

| Written Submission from Dublin City Council's Chief Executive to An Bord Pleanála in relation to the National Transport Application for the Railway (MetroLink - Estuary to Charlemont via Dublin Airport) Order [2022] |                                                  |          |                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |  |
| 25                                                                                                                                                                                                                      | Conservation Section - summary of report - Mater | 28       | The significant alterations required to accommodate the station within the Four Master’s Park including removal of the historic railings, grotto and relocation of sculptures and general shape of the park will be irreversible.           | <p>As noted by EIAR Chapter 26, Architectural Heritage, (Table 26.66), the railings, gates and plinth walls enclosing the Four Master’s Park are a designated Protected Structure under reference 737 in the Record protected Structures (RPS) for Dublin City along with the Cross commemorating the Four Masters. As a result they will be removed and placed in secure storage in accordance with the conservation method statement produced by the PCA.</p> <p>On completion of construction the railings, gates, plinth walls and cross will be returned to the Park and re-erected in a place agreed by the landscaping design in accordance with a conservation method statement prepared by the PCA. Four Master’s Park will be reinstated with the additional structures associated with the Station. A revised layout of the Park incorporating these changes will be implemented. The impact on the railings, gates, plinth walls and Cross is assessed to decrease to moderate following mitigation.</p> <p>It is noted that the grotto is an integral component of St Joseph's Church, and does not lie within the lands of the Park or ownership of Mater Hospital. As per EIAR Chapter 26, Architectural Heritage the grotto will be temporarily relocated in modified form elsewhere within the church grounds to accommodate continued veneration and the taking of outdoor confessions. The grotto will be fully reinstated at its original location on completion of the works.</p> <p>The overall impact on the Four Master’s Park has been mitigated through design of the station and the landscaping and therefore the impact will decrease to moderate from significant following mitigation. See Item 26 for further information.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |  |
| 26                                                                                                                                                                                                                      | Conservation Section - summary of report - Mater | 28       | Further careful consideration and a conservation method statement is required of the proposed reinstatement of the historic railings, relocation of The Healing Hands, Four Masters Cross and Grotto and the overall realigned park layout. | <p>TII consider, as noted by responses (23), (24) and (25) above that they have already carefully considered the reinstatement of the historic railings, relocation of The Healing Hands, Four Masters Cross and the overall realigned park layout. The treatment of the grotto is addressed as a component of the curtilage so St Joseph's Church at response</p> <p>As outlined in EIAR Appendix A5.1, Construction Environmental Management Plan, (CEMP), where required, specialists with appropriate skills and experience will monitor on-site construction on behalf of TII. As previously noted above, in terms of reinstatement/relocation, this will include the MetroLink Project Conservation Architect with all heritage works being undertaken by a specialist heritage contractor.</p> <p>Prior to the commencement of construction, the Cultural Heritage Strategy will also be updated by TII's Project Archaeologist and the Project Conservation Architect in relation to built heritage, who will remain involved during the duration of the project. The Cultural Heritage Strategy will remain live and will be revised as and when required following stakeholder consultation and further refinement of the design and construction procurement process</p> <p>TII commit to procuring the relevant works contractors supported by their own Conservation Architects to undertake any further necessary surveys and undertake the detailed structural assessments/method statements to protect sensitive sites in situ from the MetroLink works. If these assessments dictate that protection measures are required, TII will develop the form and nature of any measures required in accordance with Best Practice and all applicable guidelines and consult with key stakeholders in doing so. The assessments and mitigations will respect the sites historic setting and cultural significance. As noted above any required removals, conservation and reinstatement works will be done by a Specialist Heritage Contactor overseen by the MetroLink PCA.</p> <p>As detailed in Chapter 31 (Summaries of the Route Wide Mitigation and Monitoring), mitigations and mornioring measures set out in the Railway Order have been identified as environmental commitments and overarching requirements which shall avoid, reduce or offset potential impacts. Mitigation measures have been proposed for all impacts resulting in a moderate significance or above. Furthermore, mitigation measures have also been proposed for some impacts with a lower significance where such measures are routinely applied (for example in the management of construction-related impacts), or where, based on professional judgement, there would be a material benefit to the receptor.</p> |  |

| Written Submission from Dublin City Council's Chief Executive to An Bord Pleanála in relation to the National Transport Application for the Railway (MetroLink - Estuary to Charlemont via Dublin Airport) Order [2022] |                                                         |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| 27                                                                                                                                                                                                                      | Conservation Section - summary of report - Mater        | 28       | The proposed development which includes the removal of trees, is most regrettable and should be mitigated by re-planting/landscaping, particularly to screen the vents and lifts which dominate the setting of the park, which will be reduced in size as a result of the works                                                                                                                                                                                                                      | Please refer to response (10) above.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| 28                                                                                                                                                                                                                      | Conservation Section - summary of report - Mater        | 28       | Significant concerns regarding the vulnerability of the historic fabric of the Mater Hospital and boundary balustrade to damage during the enabling and construction works because of the close proximity of the site. A detailed method statement will be required to demonstrate how the historic fabric will be protected to prevent damage.                                                                                                                                                      | The potential impact of the works on the Mater Hospital and balustrade was assessed in EIAR Chapter 26 Architectural Heritage. The MetroLink PCA will prepare draft specifications for works before construction commences, as identified in Table 26.66 (AHI-44) . Please refer to item 26 above in relation to contractor requirements to demonstrate how all historic elements will be safeguard and note that method statements for the works will be in accordance with the MetroLink EIAR and ERO and must also be discussed with the property owners and their Conservation Architects.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| 29                                                                                                                                                                                                                      | Conservation Section - summary of report - Mater        | 28       | Similarly, the proximity of the proposed construction to St. Joseph's Church gives rise to concerns regarding the vulnerability of the historic fabric during the enabling and construction works - a detailed method statement will be required to demonstrate how the historic fabric will be protected to prevent damage.                                                                                                                                                                         | Please refer to response (28) above noting the Church is also subject to a condition survey/specification of works by the MetroLink PCA and their stained glass specialist.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| 30                                                                                                                                                                                                                      | Conservation Section - summary of report - O'Connell St | 28       | The proposed extent of demolition is significant in terms of the irreversible loss of extant historical architectural built heritage of O'Connell Street and its environs and is of concern in terms of architectural conservation. However, it should be noted that most of these structures/buildings are the subject of a separate current planning application (Plan No.5126/22). As part of this application, it is proposed to retain and protect all structures on site which are on the RPS. | <p>TII are aware of the planning application (Plan No.5126/22). During design of the O'Connell Street Station the baseline environment was considered for scenarios with and without Hammersons' Dublin Central 2 development for each of the specialist environmental topics due to the intrinsic nature of the projects-and to ensure that both projects could be built independently of each other if required. It is to be noted that the application is to retain all buildings that are Protected Structures, or elements of buildings that are specifically included within the Record of Protected Structures and No 59 (main building O'Connell Street which is of architectural heritage significance but not listed on the RPS.</p> <p>At the time of writing of EIAR Chapter 30, Cumulative Impacts, the planning applications for Dublin Central (2861/21, 2862/21 &amp; 2863/21) had been submitted to DCC for approval, although these applications had not been granted at the time TII's assessment list was completed in May 2022. As is standard procedure, prior to the Oral Hearing, TII will undertake a gap assessment to identify and list projects that are deemed valid since the last data gathering exercise was carried out and present this at the Oral Hearing. This will include the Dublin Central planning applications (excluding Site 2 for reasons above) assuming they have been granted at this stage.</p> <p>TII and Hammersons will continue to work together, and regardless of the additional Dublin Central 2 development going forward, the facades on O'Connell Street, being the only protected structures affected by the project at this location, will be protected and retained.</p> |
| 31                                                                                                                                                                                                                      | Conservation Section - summary of report - O'Connell St | 28       | The proposed interventions at the O'Connell Street Station to facilitate the propping of facades of Protected Structures to be retained includes the proposed removal of c.13 no. trees, which is most regrettable and should be mitigated by replanting/landscaping                                                                                                                                                                                                                                 | Please refer to response (10) above.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
