| 10                                                                                                                                                                                                | 4. Noise      | 2        | There is a large telephone service section within the premises and construction noise will interfere with the operations of this section of the business. Adequate mitigations in relation to noise and noise monitoring have not been made available.                                                                                                                                                                       | <p>The impact from construction noise on the Hertz building is assessed in EIAR Chapter 13 Airborne Noise and Vibration. The noise levels during construction are predicted to be between 76 to 80 dB at the external facade depending on the construction activity. This is above the acceptable threshold limit of 75dB, resulting in a Moderate to Very Significant impact on the Hertz building during the Construction Phase. As a result, noise mitigation will be implemented including a specific measure in the case of Seatown Station compound to use a 4m high construction site hoarding instead of standard 2.4 m high. However, as outlined in Section 13.7.1.1.1 of Chapter 13, there will be residual impacts at the Hertz building facade (upper floor of western facade). This will require additional measures to be applied at this location as per the Transport Infrastructure Ireland (TII) Airborne Noise and Ground-borne Noise Mitigation Policy (Appendix A14.6 of EIAR Chapter 14) i.e. Noise Insulation. TII are consulting with Hertz to explore possible additional mitigation measures that will be put in place in advance of the commencement of construction. It is anticipated that that the required mitigatios measures (if any) may include additional noise insulation and/or temporary relocation of staff to areas within the exiting premises will be agree with Hertz and implemented pre commencement of construction.</p> <p>Monitoring - During the Construction Phase the contractor will be required to carry out noise and vibration monitoring at representative noise sensitive locations (NSLs) to evaluate and inform the requirement and/or implementation of noise and or vibration management measures. A full monitoring and auditing programme will form part of the Construction Noise and Vibration Management Plan (CNVMP) which will be agreed with the Local Authority prior to the commencement of the Construction Phase. As a minimum, the monitoring programme will include an alert system for threshold exceedances, remote access and a platform for sharing monitoring results between the contractor, TII, and the relevant local authority.</p> |
| 11                                                                                                                                                                                                | 5. Vibrations | 2        | Vibrations caused from excavations and construction work may have very serious consequences for the sensitive IT equipment and servers within the premises. There is an IT development centre located in the main building and this will also be severely impacted by the excessive vibrations that are likely to arise from construction. No details have been provided as to how vibrations can be mitigated or monitored. | Predictions of vibration during piling are at approximately 1.2 mm/s at the building facade. This would reduce to approximately 0.6mm/s inside the building which is below vibration limits proposed by IBM for servers ( <a href="https://www.ibm.com/docs/en/power7?topic=sppp-vibration-shock-25">https://www.ibm.com/docs/en/power7?topic=sppp-vibration-shock-25</a> ) once the frequency is below 65hz. However due to the proximity of the building to the proposed pilling operation, it is proposed that monitoring would be appropriate with a red-amber-green alert system to ensure that the acceptability criterion are not exceeded.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

| RE: Metrolink Railway Order Application and Supporting Documentation, Client: Hertz Europe Service Centre Limited, Address: 25-28 North Wall Quay, Dublin 2, Ref No: ML1L-A1, ML1K-A7 and ML1K-A6 |              |          |                                                                                                                                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |  |
| 12                                                                                                                                                                                                | 6. Dust      | 3        | Construction dust has the potential to cause very serious issues in relation the premises given the sensitive IT equipment and servers and outside cooling units for the servers. This is a matter of major concern to the business.                                                                                                                                  | <p>TII acknowledge your concern and will put measures into place to ensure your property and equipment is not damaged by dust. As outlined in EIAR Chapter 16, Air Quality, section 16.6.1, an Air Quality Management Plan, detailing dust mitigation methods will be prepared prior to the commencement of construction works. This plan will be used to manage and minimise dust emissions from the construction works, with limits (Alert levels) set for locations along the alignment. If these levels are exceeded (triggers) there will be a process in place to notify those affected and works will cease until measures are put in place to ensure limits are not exceeded. A summary of dust mitigation measures (section 16.6.1.1) to be implemented include:</p> <ul style="list-style-type: none"><li>• Material handling systems and site stockpiling of materials designed and laid out to minimise exposure to wind. Water misting or sprays will be used as required if particularly dusty activities are necessary during dry or windy periods;</li><li>• Hoardings provided around the construction compounds; and</li><li>• Liaison with local authorities and community groups.</li></ul> <p>When the dust minimisation measures detailed in the mitigation section 16.6 are implemented, fugitive emissions of dust from the site are not predicted to be significant. In addition, it is understood that at this location, the air intake location for the computer servers is significantly remote from the construction site. As such, the potential impacts on computer servers are not considered a significant risk arising from the proposed Project. However, dust monitoring will be included at the air intake location and alert levels set (with a notification process) to ensure that mitigation measures are sufficient to keep dust levels sufficiently low at this location.</p> |  |
| 13                                                                                                                                                                                                | 7. Drainage  | 3        | Adequate details have not been provided in relation to the control of surface water and drainage during the construction period. Any negative consequences in relation to temporary flooding or interfering with drainage, would have serious impacts on the business.                                                                                                | <p>TII can confirm that there will be no negative consequences for Hertz in relation to temporary flooding or interfering with drainage. The requirements that will be placed on the appointed contractors are detailed within the Outline Construction Management Plan (EIAR Appendix 5.1), and specifically at this location: the Water Management Plan; Groundwater Management Plan; and Construction Flood Protection Plan.</p> <p>The following principles of water management will apply: All surface water or increases in the risk of flooding within site compounds will be managed using temporary drainage facilities. There will be no negative drainage or flooding impact to areas adjacent or in close proximity to construction sites, and any potential flooding risk will be designed out through the development of construction drainage and flood mitigation measures. Water management tools employed by TII's contractor will include storage tanks or basins, drained to existing drainage infrastructure or removed from site.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |  |
| 14                                                                                                                                                                                                | 8. Access    | 3        | As currently proposed, one of the main access points for the carparking area is being blocked off by the temporary acquisition area. This is the assembly point for a fire evacuation. In addition, having only one access point, will potentially cause future problems given that there is an intention to expand the use of the premises by letting surplus space. | As noted by response (7) above TII are agreeable to the alternative site proposed by Hertz. In the unlikely event that it is not possible to enact this alternative land take, TII will work with and ensure Hertz is provided with a suitable alternative location for the building fire assembly point.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |  |
| 15                                                                                                                                                                                                | 9. Security  | 3        | Site security is a matter of major concern for the business as large volumes of sensitive data are stored on the premises. Details in relation to how security will be controlled have not been properly provided.                                                                                                                                                    | TII confirm that the MetroLink site will not compromise the security of the Hertz site. The site compound for Seatown Station construction will be secured with hoarding varying in height from between 2.4 to 4m depending on noise attenuation requirements together with secure gates, site security and CCTV. TII's contractor will liaise with Hertz to ensure that the hoarding and security provision around the boundary of the site interfaces with your existing systems to maintain your site security. Further details of site security requirements are available EIAR Appendix 5.1, sections 5.4 to 5.9 of the Outline Construction Environmental Management Plan.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |

| 16                                                                                                                                                                                                | 10. Design and Build Construction | 6        | Because this will be a design and build project, there are serious concerns in relation to how the contractor will be controlled. On other design and build projects, it would appear that the Acquiring Authority’s main aim is to reduce construction costs regardless of the negative consequences for property owners. This is a major concern to the owner. | <p>TII can confirm that the design and build contractor will be required to design and construct the works in accordance with consent Railway Order and the EIAR for the scheme. The contracts being put in place with potential contractors will be designed to ensure compliance with the consented Railway Order and ensure that the works are carried out in a controlled fashion and do not not exceed the predicted environmental impacts detailed in the EIAR. In addition TII will have a strong supervisory role in the delivery of the contract and will have a strong presence on site to ensure compliance with all relevant standards and constraints.</p> <p>TII as Sponsoring Agency are responsible for the delivery of the MetroLink project. We can confirm that our main aim is to deliver the construction of the scheme in a safe and efficient manner, whilst minimising the environmental impacts of the scheme on property owners during the construction phase. TII therefore do not accept that its main aim is to "reduce construction costs regardless of the negative consequences for property owners".</p> |

| Ref: Submission by Hibernia Real Estate Group Limited on the intended application by the National Roads Authority (operating as Transport Infrastructure Ireland) for the Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022. |              |          |                                                                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| 1                                                                                                                                                                                                                                                  | Cover letter | 2        | <p>We note that the proposed TII “Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022” is indicated as running under part of our building and this may have implications for its existing structure and fabric,</p> <p>(1 Earlsfort, Block B, Earlsford Terrace, Dublin 2).</p> | <p>On the MetroLink Project, the approach to ground movement and building damage assessment follows the industry standard three-phased ground movement impact assessment process that is undertaken on tunnelling and underground projects around the world, that includes Channel Tunnel Rail Link (CTRL), Dublin Port Tunnel, Crossrail and High Speed 2. The MetroLink tunnel has been assessed going under these properties at the depth and on the alignment proposed and TII are satisfied that the assessed movements will not lead to structural damage to these properties.</p> <p>EIAR Appendix A 5.17, Building Damage Report, covers the assessed impacts of construction generated ground movements and settlement on property. Table 5-2 of this report shows that your building has been assessed as falling within the "Very Slight damage" category currently (building reference B -53), an explanation for which can be found in Table 4-4 of the aforementioned report.</p> <p>The building has been classified under "Damage category 2 or below" following the Refined Phase 2a Building Damage Assessment. EIAR Appendix 5.17 specifies that all buildings that have been subject to a Phase 2a assessment will be reviewed and reassessed by the D&amp;B Contractor. This Phase 2b assessment will use refined and updated parameters available to the D&amp;B contractor as a result of him progressing the development of the detail design and finalising his construction methodology and planning. All buildings that have been classified at the end of the Phase 2b assessment as Damage Category 3 (Moderate) or above (or where there exists any uncertainty after the Phase 2b assessment) will be the subject of a Phase 3 assessment by the D&amp;B Contractor.</p> <p>The Phase 3 assessment will take account of final design and construction methodology details. For the Phase 3 assessment, each building will be subject to detailed assessment on an individual basis. A detailed survey will be carried out as part of the Phase 3 assessment to provide the necessary additional information to inform this detailed analysis of how the individual elements of the building would be affected by the predicted ground movements. The method and extent of the detailed analysis will be determined on a case-by case basis and may include a more sophisticated semi-empirical or a detailed soil-structure interaction using finite element modelling methods. It is likely that the Phase 3 assessment will yield further improvement to the damage category determined by the Phase 2b assessment. The results of this refined assessment typically show that earlier assessments are conservative and over estimate the likely impact of construction generated ground movements.</p> <p>Details on the subsequent Phase 2b and Phase3 building damage assessments are presented in the EIAR Appendix A 5.17, Building Damage Report.</p> |
| 2                                                                                                                                                                                                                                                  | Cover letter | 2        | <p>as well for the extent to which we can refurbish or redevelop it.</p>                                                                                                                                                                                                                            | <p>MetroLink will be a catalyst for and provide opportunity for future development and regeneration. While the MetroLink Railway Order does not include for future neighbouring or overhead development, the tunnels and stations are designed to support appropriate future imposed loads.</p> <p>TII will be required to make submissions in relation to planning applications for proposed future developments on or adjacent to MetroLink and there will necessarily be some engineering constraints (such as permissible loadings) required. However MetroLink is committed to engaging with known development proposals and new development proposals as they emerge with the intent of facilitating such developments as they emerge to the maximum extent consistent with the safe operation of the proposed Project.</p> <p>Again in common with other existing rail and tunnel projects, following grant of the Railway Order and development of detailed design, TII will produce “Guidance Note for Developers” that will be the subject of bye-laws following the grant of Railway Order and which is designed to facilitate future adjacent or over-site development while protecting the integrity and safety of the MetroLink works and operations.</p> <p>Therefore at this stage TII is dealing with known development proposals on a case by case basis, TII will work with parties in the future to assist with the wider development of sites over and above stations and tunnels. In this context TII has successfully engaged with a number of developers over the last two years to accommodate development over and in proximity to the alignment and there have been no material restrictions on development subject to the implementation of agreed design and mitigation measures and it is not anticipated that MetroLink will have a material impact on the development potential of sites above and in proximity to the alignment in future.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

| Ref: Submission by Hibernia Real Estate Group Limited on the intended application by the National Roads Authority (operating as Transport Infrastructure Ireland) for the Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022. |              |          |                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| 3                                                                                                                                                                                                                                                  | Cover letter | 2        | We also wish to note that we are currently in the process of preparing a planning application for the full re-development of our building and we advise that we retain the right to attend any future oral hearing in relation to the above referenced metrolink. | <p>The Board may, at its absolute discretion, hold an oral hearing on the RO application. An overview of the Oral Hearing process is provided in the EIAR Chapter 8.9.2. The Board has confirmed that it intends to hold an Oral Hearing for this project.</p> <p>The purpose of the oral hearing will be to allow issues relevant to an application for approval be examined. The oral hearing can be attended by anyone, but only those that have made a written application may make an oral submission at the oral hearing. The oral hearing is managed by the An Bord Pleanála inspector.</p> |

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| Re : Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022, Aercaip House (former 65-68 St. Stephens Green) |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| 1                                                                                                                             | Submission 1 | 3        | <p>The route selection including horizontal alignment, vertical alignment and depth of MetroLink below ground in the area between Chainage 18+600 and Chainage 18+700 should be reviewed by NTA / TII to satisfy themselves and to ensure that</p> <p>(a) MetroLink does not cause structural damage to the foundation system supporting our client's building which comprises a mixture of CFA piles (some extending 12.5m below ground level) and pads foundations which are founded on the competent rock.</p> <p>(b) MetroLink does not cause structural damage to our client's building at the basement level. The basement structure forms the waterproof envelope to our Clients building and any damage would result in the ingress of water into the basement.</p> <p>(c) MetroLink does not cause damage to the bespoke cladding; glazing and fragile finishes of our client's building.</p> <p>(d) MetroLink provides the necessary vertical and/or horizontal clearance between the existing basements and the tunnels.</p> | <p>TII are satisfied that the approach adopted to date for assessment of building damage follows an industry standard approach undertaken on tunnelling and underground projects around the world including on the Channel Tunnel Rail Link and Crossrail in London, the Dublin Port Tunnel and currently on High Speed 2 in England, and therefore that further assessment does not need to be delivered prior to the route being consented. The purpose of the Stage 1 and Stage 2a assessments has been to provide/ensure confidence that the Works will not induce unacceptable damage to buildings/structures along the Route. The primary objective has been to confirm that the structural integrity of each building/structure will not be compromised by the Works.</p> <p>EIAR Appendix A 5.17, Building Damage Report, covers the assessed impacts of construction generated ground movements and settlement on property. Table 5-4 of this report shows that the building (AB-37) has been assessed as falling within the "Negligible damage" category currently, an explanation for which can be found in Table 4-4 of the aforementioned report. According to this Table, the Negligible damage category refers to hairline cracks. TII would also like to confirm that the assessment has additionally taken into account the presence of the basement as noted.</p> <p>Despite the low predicted impact of the tunnelling works on your building, it will progress to a subsequent Phase 3 assessment due to the piled foundations and basement structures noted.</p> <p>The Phase 3 assessment will take account of final design and construction methodology details. For the Phase 3 assessment, each building will be subject to detailed assessment on an individual basis. A detailed survey will be carried out as part of the Phase 3 assessment to provide the necessary additional information to inform this detailed analysis of how the individual elements of the building would be affected by the predicted ground movements. The method and extent of the detailed analysis will be determined on a case-by case basis and may include a more sophisticated semi-empirical or a detailed soil-structure interaction using finite element modelling methods. It is likely that the Phase 3 assessment will yield further improvement to the damage category determined by the Phase 2b assessment. The results of this refined assessment typically show that earlier assessments are conservative and over estimate the likely impact of construction generated ground movements.</p> <p>Ancillary features in each building/structure, which themselves do not contribute to the structural integrity of the building/structure, are considered in the subsequent Phase 3 assessment. The Designer/Contractor is responsible to further investigate the sensitivities of each building/structure to identify those elements within the building/structure curtilage that may not contribute to the structural integrity of the building/structure itself, but will most likely in themselves be sensitive to the excavation and construction processes.</p> <p>In each instance, engaging with the building/structure owner (or their delegated representative) the Designer/Contractor will be responsible for identifying further mitigations if mitigation measures are required. These mitigations might relate directly to the excavation and construction processes (at source measures), or they might relate to a direct protection of the non-structural elements for which damage related concern remain.</p> <p>If, based on the detailed Phase-3 assessment, the impacts are deemed to be unacceptable to items such as building cladding or basement waterproofing (or any other ancillary features) further mitigation measures would then be assessed and implemented. For example enhanced control the TBM slurry pressure in this zone would further reduce face loss and hence impacts. Additionally, there is the ability to increase the separation of the tunnel from your basement structures within the limits of deviation and rail design constraints. Lowering the tunnel alignment would further reduce the settlement but for your building this is unlikely to be needed as it is already in the Negligible damage category.</p> <p>During the Phase-3 assessment, TII will reduce the impacts from those conservatively stated to date such that any unacceptable impacts are negated. This process has been used successfully across major projects elsewhere with buildings of similar cladding and basement detailing.</p> |

| Re : Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022, AerCap House (former 65-68 St. Stephens Green) |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |  |
| 2                                                                                                                            | Submission 2 | 3        | The construction information provided by MetroLink has been reviewed. We refer to the following points:<br>a) Metrolink has assessed the "Groundborne Noise from Tunnel Boring Machine" and presents its findings on drawing no. ML1-JAI-EIA-ROUT-XX-DR-Y-14009 (a copy is attached to this submission). This drawing indicates MetroLink will generate an additional 50db directly under the location of our client's building which is unacceptable.                                                                                                                                                                                                                         | Appendix 14.5 Groundborne Noise and Vibration Blasting Modelling Results presents predicted groundborne noise and vibration levels during the construction and operation phase of the project. The prediction of groundborne noise during TBM passage for the AerCap House (65 St. Stephen's Green) is 49 dB LASmax, which is above the 45 dB LASmax threshold, resulting a significant impact on the buildings operation for the limited duration of TBM passage. Unfortunately, there are no effective methods available to reduce groundborne noise or vibration from TBMs at source, but noting that the duration of this impact will be in the order of up to two weeks as the TBM passes. It is important to note that the noise level as the TBM passes will be noticeable and perhaps disturbing for some, but will not cause any damage to the property. TII will liaise with Hines Real Estate Ireland Limited to ensure the timing of these impacts are known.<br>The principal mitigation measures aimed at minimising impacts are as follows:<br>- Advance public consultation and stakeholder engagement can greatly reduce the significance of groundborne noise effects, as building occupants would be prepared for the passage of the TBM and resultant elevated noise and vibration levels.<br>- TII will accept and consider applications for additional measures on a case-by case basis, in accordance with its Noise and Vibration Mitigation Policy (see EIAR Appendix A14.6, Airborne Noise & Groundborne Noise Mitigation Policy). |  |
| 3                                                                                                                            | Submission 2 | 4        | b) Metrolink has assessed the predicted "Settlement" and presents its findings on drawing no. ML1-JAI-EIA-ROUT-XX-DR-Y-21149 (a copy is attached to this submission). This drawing indicates MetroLink will be causing a 20mm settlement directly under the location of our client's building which is unacceptable. Settlements of this magnitude cannot be accommodated by the building's structure and will cause damage to foundations; basement; superstructure; façade and internal finishes. As previously stated, the basement structure forms the waterproof envelope to our client's building and any damage would result in the ingress of water into the basement. | Please refer to Item 1. The settlement contours calculated were used to undertake the building damage assessment and conclude that typical damage would be Negligible and likely forms of repair would be limited to hairline cracks only. This is a conservative estimate. The Phase 3 assessment which will be undertaken for this building will refine the parameters and generally reduce the potential impacts further.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |  |
| 4                                                                                                                            | Submission 3 | 4        | The operational information provided by MetroLink has been reviewed. We refer to the following point:<br>a) Metrolink has assessed the "Groundborne Noise from Operation" and presented its findings on drawing no. ML1-JAI-EIA-ROUT-XX-DR-Y-14041 (a copy is attached to this submission). This drawing indicates MetroLink will be generating an additional 30db directly under the location of our Clients building which is unacceptable.                                                                                                                                                                                                                                  | Appendix 14.5 Groundborne Noise and Vibration Blasting Modelling Results presents predicted groundborne noise and vibration levels during the construction and operation phase of the project. The prediction of groundborne noise and vibration for AerCap House (65-68 St. Stephen's Green) during railway operation are as follows:<br>- The predicted level of groundborne noise during the railway operation for 65-68 St. Stephen's Green is 34 dB LASmax, which is below the 40 dB LASmax threshold.<br>- The predicted level of groundborne vibration during the railway operation for 65-68 St. Stephen's Green is 0.009 ms-1.75, much lower than the VDV (Vibration Dose Value is a parameter that combines the magnitude of vibration and the time for which it occurs) threshold of 0.8 ms-1.75.<br>As a result, we consider that no significant impact is expected on the building as a result of Metrolink operation.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |  |

| Re : Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022, Aercaip House (former 65-68 St. Stephens Green) |              |          |                                                                                                                                                                                                                                                                                                                                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |  |
| 5                                                                                                                             | Submission 4 | 4        | MetroLink has proposed to acquire the substratum land located under our client's building, which is outlined in drawing no. ML1-JAI-EIA-ROUT-XX-DR-Y-01096 (a copy is attached to this submission). This is unacceptable to our client, as the future potential to develop this prominent commercial site in the future will be damaged. | <p>TII note your concerns about the potential impact of MetroLink Project on future potential development of your site. The acquisition of substratum land beneath the Hines Real Estate Ireland Limited building is to enable the construction of the Metrolink tunnel and protect it from future uncontrolled development.</p> <p>MetroLink will be a catalyst for and provide opportunity for future development and regeneration. While the MetroLink Railway Order does not include for future neighbouring or overhead development, the tunnels and stations are designed to support appropriate future imposed loads.</p> <p>TII will be required to make submissions in relation to planning applications for proposed future developments on or adjacent to MetroLink and there will necessarily be some engineering constraints (such as permissible loadings) required. However MetroLink is committed to engaging with known development proposals and new development proposals as they emerge with the intent of facilitating such developments as they emerge to the maximum extent consistent with the safe operation of the proposed Project.</p> <p>Again in common with other existing rail and tunnel projects, following grant of the Railway Order and development of detailed design, TII will produce "Guidance Note for Developers" that will be the subject of bye-laws following the grant of Railway Order and which is designed to facilitate future adjacent or over-site development while protecting the integrity and safety of the MetroLink works and operations.</p> <p>Therefore at this stage TII is dealing with known development proposals on a case by case basis, TII will work with parties in the future to assist with the wider development of sites over and above stations and tunnels. In this context TII has successfully engaged with a number of developers over the last two years to accommodate development over and in proximity to the alignment and there have been no material restrictions on development subject to the implementation of agreed design and mitigation measures and it is not anticipated that MetroLink will have a material impact on the development potential of sites above and in proximity to the alignment in future.</p> |  |
| 6                                                                                                                             | Summary      | 4        | In summary, our client requests that the route of the proposed MetroLink tunnels are diverted away from their current proposed location (under our client's building) to either below the public carriageway or buildings that will not be damaged or compromised by the presence of the tunnels located under.                          | <p>TII do not intend to alter the alignment as the building damage assessments undertaken support the validity of the alignment. Refer to Item 1 above.</p> <p>The proposed vertical alignment has already been determined to provide sufficient rock cover to the tunnel and therefore to limit the ground movement impact on the building above to a sufficiently low level.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |  |

| Letter Re: Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022 |                                                                                                               |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                                                                                                                                                                                                                                                                      |
| 1                                                                                  | Letter                                                                                                        | 2        | TII also note in this correspondence that HSE may be an owner, or occupier of the land, or have rights over or an interest in the land, referred in the documents which will accompany the Railway Order application.<br>30/31 Pearse St. is a HSE property that accommodates the National Drug Treatment Centre (NDTC) and the NDTC Laboratory. Whilst the HSE are supportive of vital infrastructure such as MetroLink we also remain concerned about the potential risks and impacts on our site and service delivery at this location, both during the construction phase and post completion of the Metrolink project.<br>To this end, we attach with this submission a Technical Note from OCSC (dated 21st Nov'22) summarising their findings within the short time frame available for review and outlining the concerns of the HSE regarding the potential impacts on the building and services provided. The HSE requests the Bord to have regard for the general concerns as set-out within the above referenced Technical Note including seeking the Requests for Further Information (RFI's), together with directing the Applicant to agree and incorporate satisfactory mitigation, amend designs and construction proposals accordingly for the MetroLink. We further ask the Bord to include and impose the (non-exhaustive list) recommended conditions also set-out in this Note. | TII note the concerns with regard to 30/31 Pearse Street and responses to the specific issues in the technical note are outlined below.                                                                                                                                              |
| 2                                                                                  | Letter                                                                                                        | 2        | We further ask the Bord to include and impose the (non-exhaustive list) recommended conditions also set-out in this Note.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | Please note, any conditions applied to the application, if granted, are at the discretion of An Bord Pleanála. Whilst TII do not believe the requested conditions are necessary, we are happy to engage further with HSE on the requested conditions in advance of the Oral Hearing. |
| 3                                                                                  | Technical note Section 3 - 30/31 PEARSE STREET—NATIONAL DRUG TREATMENT CENTRE (NDTC) 3.1 Building Description | 7        | Building Description (with Plan shown on PDF)<br>30/31 Pearse St. which is currently occupied by the National Drug Treatment Centre (NDTC) is thought to have been built around 1970's. The building oriented primarily in a North/South direction is a 5 Storey brick clad concrete frame building approx. 40m x 15m (fronting onto Pearse St) as indicated per below extract plan. Of particular note are;<br>a) The National Drug Treatment Centre Laboratory ("NDTC Lab" see 3.2 below) and;<br>b) A new lift enclosure and glazed link, thought to have been built late 2000's to early 2010's, located in the North/East corner and directly above the proposed MetroLink tunnel alignment (see below blue shaded)<br>We understand the ESB Sub-station although feeds the NDTC is not in ownership of HSE                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | TII appreciate the information provided and are keen to work closely to with the HSE National Drug Treatment Centre to address concerns raised. See below for responses to the specific issues in the technical note.                                                                |
| 4                                                                                  | Technical note Section 3.2 Building Occupancy—HSE National Drug Treatment Centre Laboratory (NDTC Lab)        | 7        | Building Occupancy—HSE National Drug Treatment Centre Laboratory (NDTC Lab)<br>The HSE National Drug Treatment Centre Laboratory (NDTC Lab) is located at 3rd Floor level occupying the northern third of the building as indicated in the extract below.<br>This laboratory is the largest specialist provider of drugs screening for drug treatment services providing an essential nationwide service to the HSE Addiction Services, hospitals, General Practitioners, voluntary organizations, Department of Education (juvenile detention centres), the Probation Service, the Courts Service, the Medical Council, an Bord Altranais and various occupational health departments. The HSE NDTC Laboratory contains much sensitive equipment including Microscopes and High Performance Mass Spectrometers and is accredited by the Irish National Accreditation Board (INAB) to undertake testing in conformity with ISO/IEC 17025:2017 as detailed in Figure 9 above and in the Schedule bearing the Registration number 169T which is available at: <a href="http://www.inab.ie/Directory-of-Accredited-Bodies/Laboratory-Accreditation/Testing/HSE-National-Drug-Treatment-Centre.html">http://www.inab.ie/Directory-of-Accredited-Bodies/Laboratory-Accreditation/Testing/HSE-National-Drug-Treatment-Centre.html</a>                                                                      | TII appreciate the information provided and are available to work closely with the HSE National Drug Treatment Centre to address concerns raised. See below for responses to the specific issues in the technical note.                                                              |
| 5                                                                                  | Technical note Section 3.2 Building Occupancy—HSE National Drug Treatment Centre Laboratory (NDTC Lab)        | 8        | The Laboratory also performs an essential trend monitoring role including the first ever back of house drug testing service in Ireland at Electric Picnic Festival 2022 membership and the first Irish Syringe Analysis Project as part of the European Escape Syringe Testing Project 202. The laboratory contributes to Early Warning Emerging Trends Committee and the Working Group set up by HSE under action 1.3.11 under National Drug Strategy 2017-2025 (map as shown on PDF )                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | TII appreciate the information provided and are available to work closely to with the HSE National Drug Treatment Centre to address concerns raised. See below for responses to the specific issues in the technical note.                                                           |

| Letter Re: Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022 |                                                                                                  |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                                           |
| 6                                                                                  | Technical note Section 4<br>- METROLINK ALIGNMENT under NDTC BUILDING - 4.1 Alignment & Details  | 9        | The proposed MetroLink tunnel alignment will consist of a single bore bi-directional tunnel, approx. 8.5m internal diameter and primarily constructed by means of a tunnel boring machine (TBM).<br>Reviewing the extract below from the proposed MetroLink Alignment drawings, it can be seen that the proposed alignment extends diagonally across the Northeast corner of 30/31 Pearse St, but most particularly under the new lift shaft enclosure as referenced earlier under 3.1 above. Tara Station is also in relatively close proximity to the rear of the building. (map shown on PDF)<br>The depth of the tunnel where it passes underneath 30/31 Pearse St is approx.: The depth of the tunnel where it passes underneath 30/31 Pearse St is approx.: <ul style="list-style-type: none"><li>• c.24m below existing ground/road to proposed track level</li><li>• c.15-16m below existing ground/road to crown of tunnel (map shown on PDF)</li></ul>                                                     | The details provided in this submission item are correct. |
| 7                                                                                  | Technical note Section 4<br>- METROLINK ALIGNMENT under NDTC BUILDING - 4.1 Property Acquisition | 10       | Property Acquisition<br>Property Acquisition<br>The Railway Order, if granted, will allow the Applicant, TII to proceed with the construction & operation of MetroLink, It also includes powers for TII to acquire compulsorily land or rights in, under and over land or any Substratum of land specified in the order. This will include Substratum lands at 30/31 Pearse St. and TII have forwarded the below relevant extracted drawings indicating the extent of the lands or rights affected as part of the Substratum acquisition relating to 30/31 Pearse St. with a unique land take reference number "ML60-U29". It can be seen that the substratum acquisition includes land both within and outside the building footprint. (See Map in PDF)<br>In the Railway Order, Substratum is defined as;<br>“substratum of land” means any subsoil or anything beneath the surface of land required —<br>a. for the purposes of the authorised works, or<br>ii. for any other purposes connected with this Order; | The details provided in this submission item are correct. |

| Letter Re: Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022 |                                                                              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |  |
| 9                                                                                  | Technical note Section 5<br>Potential Impacts<br>Section 5.2.1<br>Settlement | 12       | Impacts During Construction<br>5.2.1 Settlement<br>The potential for building settlement to occur during construction will predominantly arise from the tunnel construction (TBM or Blasting) and de-watering proposals.<br>As part of the Railway Order application, the Applicant has prepared a Building Damage Assessment (Appendix A5.17) which has set-out the process for Assessment of Settlement.<br>The methodology used to predict ground movements and assess building damage has been adopted using the well-recognized worldwide Industry Standard three phase ground movement impact assessment, noted to have been undertaken for tunnels and underground projects including the Dublin Port Tunnel, Channel Tunnel Rail Project, Crossrail and High Speed 2 (HS2) with other worldwide examples.<br>Section A5.17 further describes and assesses this approach. In summary;<br>• Phase 1: Generic assessment of "Greenfield" settlement contours using generic ground parameters, screening of sensitive receptors including building, structures and services<br>• Phase 2: Assessment of potential damage to receptors identified from Phase 1 based on standard assumptions and classified into damage categories 0-5, receptors placed in damage category of 3 or greater carried to Phase 3; and<br>• Phase 3: Each receptor from Phase 2 considered individually to determine its behaviour using detailed information, refined ground characteristics + modelling together with sophisticated finite element assessment methods. The Applicant notes that this assessment is likely to be carried out by the D&B Contractor. | Any potential ground movements affecting 30/31 Pearse St will arise from TBM tunnelling. - No impacts to this building from blasting and dewatering at Tara Station are predicted. The settlement contours generated at Phase 1 conservatively predict settlement and the Phase 2a assessment has been undertaken on your building. This assessment, still considered conservative, predicts Negligible impacts due to the predicted settlement. No Phase 3 assessment is therefore required.                                                                                                                                                                                                                                                                                                                                                                                                                   |  |
| 10                                                                                 | Technical note Section 5<br>Potential Impacts<br>Section 5.2.1<br>Settlement | 12       | A marked-up extract (extract Fig 20.16 below) of the Phase 1 assessed "Greenfield" settlement contours relating to 30/31 Pearse St. is set-out below and from this assessment, it can be seen that the MetroLink has the potential to generate settlements of between 1mm to 20mm(plus) across the building footprint. More particularly, the assessment predicts a potential differential settlement varying between the 10mm-20mm contours across the area of the new lift shaft thus rendering vulnerable to out-of-plumbness. Such differential settlements have the potential to cause damage across the building and will thus necessitate the more detailed Phase 3 building damage impact assessment (map in PDF)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | The assessment details are given in the Chapter 4 of the Damage Assessment Report of Buildings and Other Assets.<br><br>The settlement contours shown on Figure 20.16 of Appendix B are based on Phase-1 assessment with very conservative (absolute worst case) tunnelling volume loss parameters and its purpose is to define the boundaries for the buildings for subsequent assessments. However, Phase 2a has been carried with refined (but still conservative) tunnelling volume loss parameters with the consequent reduction in the greenfield settlements. This assessment identified that negligible impacts are predicted for this building.                                                                                                                                                                                                                                                        |  |
| 11                                                                                 | Technical note Section 5<br>Potential Impacts<br>Section 5.2.1<br>Settlement | 13       | Section 4,7 "Settlement Effects Due to De-Watering" (Appendix A5.17) focuses primarily on Station Box construction and indicates that "No external dewatering (outside of the site boundaries) will be permitted during the construction of the station boxes, that increases the impact due to settlement on others, beyond the natural ground water fluctuations. Any settlement due to the short-term lowering of the water table outside the station box will therefore be constrained to within the site boundaries." This needs to be clarified in the context of Tara Station construction which is in close proximity to 30/31 Pearse St.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | Tara Street dewatering will be internal to the station box excavation minimising external drawdown and hence there is no impacts on 30/31 Pearse Street predicted.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |  |
| 12                                                                                 | Technical note Section 5<br>Potential Impacts<br>Section 5.2.1<br>Settlement | 14       | The Applicant does not appear to have given any specific consideration to 30/31 Pearse St. building which according to the Phase 1 "Greenfield" assessment seems to have the potential to cause damage which might affect the building, levels of service and its Occupants. As per section 4.1 of Appendix A5.17, 30/31 Pearse St. should be classified as a Type D "Sensitive" building with a Phase 3 damage assessment undertaken.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | 30/31 Pearse Street has been considered in the EIAR assessments. TII would refer you to the Building Damage Report in Appendix 5.17 of the EIAR. This building is referenced as B49 McCarthy Centre and specifically listed in Appendix B1 of that document. Furthermore, Table 5.2 in the same document presents the results of the Phase 2a assessment and concludes that the building would remain within the negligible damage category and hence does not require a stage 3 assessment.<br><br>If a Phase 3 assessment is permitted, this will set a precedent for other building owner/occupiers along the tunnel alignment whose buildings have been assessed as being negligibly impacted to request Stage 3 assessments also. Given the extent of time required for these additional building assessments which have been identified as not required, this could represent a risk of programme impact. |  |

| Letter Re: Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022 |                                                                                             |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| 13                                                                                 | Technical note Section 5<br>-Potential Impacts<br>Section 5.2.2 Noise and Vibration         | 19       | EIAR Chapter 14 "Ground-borne Noise and Vibration" assesses the impact of the MetroLink Project arising from Ground-borne Noise & Vibration during the Construction and Operational Phase. As noted earlier for other aspects and whilst there are references to properties either side, there does not appear to be any specific reference to 30/31 Pearse St.                                                                                                                                                                                    | TII recognises the importance of the National Drug Treatment Centre and the service it provides. Buildings included in the noise and vibration assessment near 30/31 Pearse Street (e.g. 35 Pearse Street) have been included as they are residential buildings and are therefore sensitive to noise and vibration. 30/31 Pearse Street is not referenced as it is an outpatient / non-residential service and therefore less sensitive to noise and vibration. TII are happy to engage further with the NDTC to address their concerns about effects of MetroLink construction or operations on potential sensitive equipment.                                                                                                                                                                                                                                                                                                                                      |
| 14                                                                                 | Technical note Section 5<br>Potential Impacts<br>Section 5.2.2 Noise and Vibration          | 19       | From a Noise perspective and using No. 35 Pearse St by way of a benchmark reference (Noise only), the assessed impact is described in table 14.28 as "Noticeable to all and disturbing to some over a number of days" This is a matter of some concern to the HSE and the NDTC occupancies.                                                                                                                                                                                                                                                        | TII understand your concern regarding ground borne noise during the TBM passage, however this would only be for a short period of time, of up to 2 weeks. Noise and vibration levels will not be evenly distributed over that period as it would peak for 2 to 3 days when the TBM is closest (Section 10.5.1.3 Chapter 10 Human Health)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| 15                                                                                 | Technical note Section 5<br>- Potential Impacts<br>Section 5.2.2 Noise and Vibration        | 19       | Similarly, the rear of 30/31 Pearse St is not too far away from parts of the proposed Tara St station for which as described in section 14.4.1.10, "Blasting" may be used for excavation at underground stations. Table 14.14 "Construction Activities Considered" notes "Effects on highly sensitive laboratory equipment could occur at up to 1000m if not mitigated."<br>The Applicant should assess the effect of Construction activities (including TBM passage & "Blasting") on the NDTC building and its occupancies for Vibration & Noise. | Where blasting is necessary, the blasts will be designed by a specialist contractor to avoid significant effects. If this cannot be achieved, an alternative to blasting will be employed (Section 14.6.1.3 Chapter 14). The effects of blasting will be mitigated. As Dublin Fire Brigade HQ (nearby building) is a sensitive receptor, minimisation of the maximum instantaneous charge weight or alternatives to blasting will be used.<br><br>TII are happy to engage further with the NDTC to address their concerns about effects on construction on sensitive equipment.                                                                                                                                                                                                                                                                                                                                                                                      |
| 16                                                                                 | Technical note Section 5<br>- Impacts During Operations<br>Section 5.3.1 Noise & Vibrations | 19       | Noise & Vibration<br>EIAR Chapter 14 "Ground-borne Noise and Vibration" assesses the impact of the MetroLink Project arising from Ground-borne Noise & Vibration during the Construction and Operational Phase. As noted earlier for other aspects and whilst there are references to properties either side, there does not appear to be any specific reference to 30/31 Pearse St.                                                                                                                                                               | Please refer to response item (13).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 17                                                                                 | Technical note Section 5<br>- Impacts During Operations<br>Section 5.3.1 Noise & Vibrations | 19       | From a Noise perspective and using No. 35 Pearse St by way of a benchmark reference, the assessed impact is described in table 14.43 as "No significant impact".                                                                                                                                                                                                                                                                                                                                                                                   | In this instance 'no significant impact' means that during the operational phase, there will be no predicted negative effects from ground borne noise on this building or its occupants.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| 18                                                                                 | Technical note Section 5<br>- Impacts During Operations<br>Section 5.3.1 Noise & Vibrations | 19       | From a Vibration perspective, there doesn't appear to be any appropriate impact assessment for 30/31 Pearse St. The closest similar comparison would relate to some of the buildings and occupancies assessed within the TCD building stock, with description in table 14.46 of potential impact as "Potential impact on sensitive equipment"                                                                                                                                                                                                      | 30/31 Pearse Street has been considered in the assessments carried out to date. We would refer you to the Building Damage Report in Appendix 5.17 of the EIAR. This building is referenced as B49 McCarty Centre and specifically listed in Appendix B1 of that document. Furthermore, table 5.2 in the same document presents the results of the Phase 2a assessment and concludes that the building would remain within the Negligible damage category and hence does not require a stage 3 assessment.<br><br>TII would also like to note that they have previously engaged in consultation in 2019 by means of a sensitive receptor/equipment questionnaire. Following initial issuing of the questionnaire and subsequent follow up a response was not received and therefore was not included. However, TII are happy to engage further with the NDTC to address their concerns about effects on construction and operations on potential sensitive equipment. |

| Submission No.                                                                     |                                                                                                           |          | 118                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

| 19                                                                                 | Technical note Section 5<br>- Impacts During Operations<br>Section 5.3.1 Noise & Vibrations               | 19       | Due to the very sensitive nature of the NDTC Lab located within 30/31 Pearse St. consideration shall be given to installing a "floating slab" anti-vibration system within the tunnel for a distance either side under this building to reduce and mitigate the impacts of vibrations on the Occupancies & Equipment— All as described in section 14.5.2 "Operational Phase" & Table 14.47 for sensitive receptors and similar to that proposed for buildings in close proximity i.e. TCD.                                                                                                                                                                                                                                                                                                                                                              | Please refer to response (18).                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 20                                                                                 | Technical note Section 6<br>- Monitoring and Liaison<br>6.1 General                                       | 20       | Apart from reference under Property Acquisition & Ownership, we have not encountered any other specific reference to this property at 30/31 Pearse Street in the more Technical Sections of the Application which might suggest that the Applicant is not aware or familiar with the sensitivity of the building and most particularly, some of the activities undertaken within, namely the NDTC Lab                                                                                                                                                                                                                                                                                                                                                                                                                                                   | Please refer to response item (18).                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| 21                                                                                 | Technical note Section 6<br>- Monitoring and Liaison<br>6.2 Monitoring of Building & Equipment            | 20       | Monitoring of Building & Equipment<br>It is recommended that settlement, noise and vibration monitoring equipment be installed at and within 30/31 Pearse Street building to;<br>i. Assess current background levels to inform appropriate "Trigger" levels<br>ii. Monitor during the Construction Works<br>iii. Monitor during Operation<br>Appropriate "Trigger" levels on a Traffic Light system basis should be established based on background levels together with Best Practice and Industry Standards referenced and predicted within the EIAR.                                                                                                                                                                                                                                                                                                 | As outlined in table 5.2 of the Building Damage Report (EIAR Appendix 5.17), the building would remain within the Negligible damage category having regard to settlement and hence does not require a stage 3 assessment. TII are happy to engage with the NDTC to agree appropriate noise and vibration monitoring at locations of sensitive equipment within the building.                                                                                                          |
| 22                                                                                 | Technical note Section 6<br>- Monitoring and Liaison<br>6.2 Monitoring of Building & Equipment            | 20       | We would suggest (as non-exhaustive) the following instrumentation as a Minimum:<br>Settlement monitoring points, Movement Targets &Tape Extensometer points, Crack Gauges, Electrolevels & Tiltmeters<br>Vibration Monitoring Sensors (Internal & External) Noise Monitoring<br><br>The instrumentation should be logged in "real-time" basis and if/when trigger levels are exceeded, ALL Stakeholders are contacted and pre-agreed mitigation proposals implemented.                                                                                                                                                                                                                                                                                                                                                                                 | Please refer to response item (21).                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| 23                                                                                 | Technical note Section 6<br>- Monitoring and Liaison<br>6.3 Liaison - 24- Hour Emergency Contact Services | 20       | Liaison — 24 Hour Emergency Contact Services<br>A 24-Hour Emergency Contact should be available for relevant Stakeholders (building Owners, Occupiers & Professionals) where cause for concerned arises.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | Details of an emergency response plan are outlined in Section 5.10 of EIAR Appendix A5.1 (Outline CEMP). The contractor(s) will be required to develop an Emergency Response Plan and to detail emergency incident response procedures in the detailed CEMP. The Emergency Response Plan will contain emergency phone numbers and the method of notifying local authorities, statutory authorities and stakeholders. Contact numbers for key personnel will also be included therein. |
| 24                                                                                 | Technical Note Section 7 - PROPOSED RFI's & SUGGESTED CONDITIONS<br>7.1 General                           | 20       | As referred earlier and whilst it is noted that other buildings and properties along Pearse St. (some being further away from the proposed tunnel alignment than the NDTC) are referenced and assessed for Impacts throughout the Application, the HSE as owners of 30/31 Pearse St does not appear to have been consulted to an appropriate level of detail for a building subject to such potential for impact, nor indeed does the building appear to have been given due consideration. As a consequence, the HSE and its Advisers has had little time to consider the possible implications and to review these in advance with the Applicant. We suggest & recommend that particular consideration is focused on this building due to the Sensitivities and Occupancies and propose the following RFTs & Conditions are imposed on the Applicant. | Please refer to response item (18).                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

| Submission No.                                                                     |                                                                                    |          | 118                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                   |

| 31                                                                                 | Technical Note Section 7 -<br>7.2 Proposed requests for Further Information (RFIs)  | 21       | RFI 6<br>Section 14.4.1.10 of Chapter 14 references "Blasting" to be used for excavation at underground station and Table 14.34 assess impact of same at Dublin Fire Brigade HQ as "Significant" describing as "Blasting would be noticeable to people within the building and just above threshold for structures". The rear of 30/31 Pearse St is not too much further away from parts of the proposed Tara St Station. Table 14.14 "Construction Activities Considered" notes "Effects on highly sensitive laboratory equipment could occur at up to 1000m if not mitigated." The Applicant should assess the effect of Blasting on the NDTC building and its occupancies for Vibration & Noise and present the findings with appropriate mitigation measures (if necessary) well in advance of an Oral hearing.                               | Please refer to response item (15).                                                                                                                                                                                                                                                       |
| 32                                                                                 | Technical Note Section 7 -<br>7.2 Proposed requests for Further Information (RFIs)  | 21       | RFI 7<br>The HSE request confirmation to be kept informed throughout the remainder of the An Bord Pleanála process and reserve the right to seek further information on the Construction & Operation of the MetroLink. In addition, the HSE requests that if an Oral hearing is to be conducted into the MetroLink project that they will be invited to attend and reserve the right to make a further submission at this Oral Hearing stage.                                                                                                                                                                                                                                                                                                                                                                                                     | Please refer to response item (25).                                                                                                                                                                                                                                                       |
| 33                                                                                 | Technical Note Section 7 -<br>7.3 Suggested Conditions to be Applied to Application | 21       | Suggested Conditions to be Applied to Application<br>Having regard to the potential for Impacts on 30/31 Pearse Street and the very sensitive nature of its Occupants, namely, the National Drug Treatment Centre Laboratory, we recommend the following conditions be applied to the Application unless clearly demonstrated that no negative impacts will arise from the Construction and or Operation of the MetroLink.                                                                                                                                                                                                                                                                                                                                                                                                                        | Please note, any conditions applied to the application, if granted, are at the discretion of An Bord Pleanála.                                                                                                                                                                            |
| 34                                                                                 | Technical Note Section 7 -<br>7.3 Suggested Conditions to be Applied to Application | 22       | Condition 1 Building Settlement<br>The maximum allowable differential settlement under the NDTC Building at 30/31 Pearse St. shall be limited to avoid any Structural Damage or Interruption to service delivery.<br>The Applicant does not appear to have given any specific consideration to 30/31 Pearse St. building which according to the Phase 1 Generic Assessment Based on "Greenfield" Settlement Contours seems to have the potential to cause damage which might affect the building, levels of service and its Occupants. As per section 4.1 of Appendix A5.17, 30/31 Pearse St. shall be classified as a Type D "Sensitive" building with a more detailed Phase 3 Building Subsidence & Damage Assessment undertaken.<br>Appropriate mitigating & remediation shall be implemented where damage of a "Cosmetic" nature might arise. | TII do not believe the requested condition is necessary. Please refer to response item (12) in relation to the assessment of building damage at this property within the EIAR.<br><br>TII are happy to engage further with HSE on the requested condition in advance of the Oral Hearing. |
| 35                                                                                 | Technical Note Section 7 -<br>7.3 Suggested Conditions to be Applied to Application | 22       | Condition 2 Construction Methods in Rock<br>The method of construction in rock shall be appropriate to avoid damage and noise impacts to the NDTC building and its Occupants. No Blasting shall be used until demonstrated that it will have no negative impacts on the NDTC building and its Occupancies.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | TII do not believe the requested condition is necessary. Please refer to response item (15) in relation to blasting during construction.<br>TII are happy to engage further with HSE on the requested condition in advance of the Oral Hearing.                                           |

| Submission No.                                                                     |                                                                                     |          | 118                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

| Re. Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022, Submission on Behalf of Mr. Hugo Byrne C/O Mr. Joh Byrne on Proposed Scheme and CPO of Client Lands |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| 1                                                                                                                                                                                | Letter       | 1        | We would like to bring to the attention of ABP the likely timeline for the completion of the proposed Metrolink, which we estimate would be completed by the early 2030s at the earliest and more realistically by 2035. Our client wishes to ensure that the retained lands, particularly those to the east of the proposed Metrolink can come forward for development in advance or in tandem with the proposed Metrolink Scheme.                                                                                                                                                                                                                                                                                                                                                                                 | TII have responded below to the matter of access being provided to these retained lands and these retained lands being returned to Mr. Hugo Byrne.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| 2                                                                                                                                                                                | Letter       | 1        | The attached map shows an area of CPO (Compulsory Purchase Order) permanent land take to the east of the proposed Metrolink, which our client feels is unnecessary and excessive for the proposed Metrolink scheme.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | TII understand that the land being referred to is that coloured turquoise shown by Figure A. TII do not agree that the requested lands are unnecessary or excessive. The land take will be required for MetroLink construction phase as explained by EIAR Chapter 21, Landtake, Table 21.6 Construction Phase Land Take Impact Assessment and will be required to support construction of the M50 Motorway viaduct south section and to accommodate part of the construction compound No. 3. Further details on the construction of the M50 motorway viaduct are presented in Section 5.9.2 M50 Viaduct of the EIAR Chapter 5 (MetroLink Construction Phase), and the phasing of the works is detailed further in Section 7 of the EIAR Appendix 5.3 (Construction Sequence Report). |
| 3                                                                                                                                                                                | Letter       | 1        | <p>In addition, the retained lands in this area could not come forward for development in a timely fashion, or at all, as the retained lands in this area are only shown on the scheme drawing as having access to the existing dwelling house, where Mr. Hugo Byrne currently resides.</p> <p>On behalf of our client we are currently seeking change to the access arrangements and the area of permanent land take as set out in Figure A attached.</p> <p>We are on behalf of our client in ongoing with Transport Infrastructure Ireland (TII) in respect to these proposed changes and significant progress was made in respect to same in recent weeks.</p> <p>We would hope an agreement will be put in place between our client and TII over the coming weeks that might resolver our client concerns.</p> | Without prejudice to response (2), TII acknowledge the discussions which are ongoing with Mr Byrne and his represenatives and will seek to reach agreement in relation to this issue.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| 4                                                                                                                                                                                | Letter       | 2        | We would respectfully request ABP to consider the proposed modifications to the proposed Metrolink Scheme and CPO and to include same as part of any scheme approval in the absence of any agreement being reached with TII.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | It is the intention of TII to reach agreement with Mr Hugo Byrne. Request to ABP is noted.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

| Submission No.                                                                                                          |                                |          | 121                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

| 1                                                                                                                       | Cover letter - IE Observations | 1        | While land required for the purposes of transport services may be included in a Compulsory Purchase Order application, Section 130 of the Transport Act 1944 precludes the compulsory acquisition of such land without the previous consent of the Minister for Transport.                                                                                                                                                                                            | TII agree with the interpretation of Section 130 of the Transport Act 1944 which as correctly stated precludes the compulsory acquisition of such land without the previous consent of the Minister for Transport. Accordingly, if the Railway Order is confirmed, and the CPO is granted, no Notice to Treat will be served without Ministerial consent. As is normal practice TII will enter into an agreement with CIE / Irish Rail, at the appropriate time, that addresses and deals with any and all land consideration requirements and which allows for any such consents to be made available on receipt of an Enforceable Railway Order.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| 2                                                                                                                       | Cover letter - IE Observations | 1        | Current indications are that Metrolink will commence construction after DART+ West works are completed, and DART+ Southwest is started and/or completed, and it is on this basis that Iarnród Éireann identified the following issues and observations that will require further resolution and agreement between TII and Iarnród Éireann prior to the commencement of the construction process. Other issues may arise should the sequencing of the projects change. | <p>There is uncertainty around the timing of both projects, and in fact the duration of the planning process for both schemes will have a significant impact on which scheme proceeds to construction first.</p> <p>TII recognise that there is a possibility the Dart + West and Dart+ Southwest may commence in advance of Metrolink. It is working with Iarnród Éireann to seek to present an agreed approach at the oral hearings for each project.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| 3                                                                                                                       | Glasnevin Station 1            | 1        | 1. While it is understood that Metrolink construction will be impactful on Iarnród Éireann services and our customers, every effort must be made to minimise those impacts. The prolonged closures of the MGWR and GSWR lines proposed by TII at Glasnevin, of 21 and 5 months respectively, to allow the construction of the Glasnevin Station for Metrolink will cause significant disruption to Iarnród Éireann passenger, freight and maintenance services.       | <p>The works at Glasnevin are extremely complicated and will require a coordinated approach to ensure successful delivery, particularly given the physical constraints associated with the railway, the canal and fronting residential properties. TII has developed a plan that incorporates a possession regime based on the preliminary design and programme assumptions which were discussed in detail over a number of years with both Iarnród Éireann and the National Transport Authority. The plan is designed to ensure that the works can be delivered safely and efficiently.</p> <p>TII does acknowledge that the plan will lead to disruption of the existing services and will impact on customers. However, TII believe that the planned closures described in the EIAR Chapter 5, MetroLink Construction Phase, Section 5.10.6 and Appendix 5.5 – Glasnevin Station Construction Report, which are 21 months for the Western Commuter Line (Maynooth to Docklands) Midland Great Western Railway (MGWR), and 5 months for the Southwestern Commuter Line, Great Southern and Western Railway (GSWR), represent a worst case construction and customer service impact. TII have been working closely with Iarnród Éireann and the National Transport Authority with a view to reducing the overall duration and impact of the required mainline rail closures, and confirms that every effort will be made to minimise the impacts on the passengers services, especially connection to Connolly station. It is worth noting that during the works taking place on MGWR all trains can still travel to Connolly Station.</p> <p>In both circumstances there will be a number of temporary closures occurring at night-time and weekends fo facilitate track lowering work.</p> <p>TII welcome further discussions with Iarnród Éireann to coordinate any requirements to be included in the main works procurement process and Contract with a view to minimising impacts.</p> |
| 4                                                                                                                       | Glasnevin Station 2            | 2        | 2. Iarnród Éireann is firmly of the view that the prolonged closures proposed are excessive and that, coupled with an appropriate short term track possessions regime, significantly shorter closure periods should be feasible. The disruptive impacts to train operations must be minimised and timed for periods of lower passenger and freight usage on Iarnród Éireann services e.g. summer months.                                                              | Please refer to Response (3) above.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

| 5                                                                                                                       | Glasnevin Station 3 | 2        | 3. It is currently anticipated that Metrolink construction will commence after DART+ works are completed at Glasnevin. As such, the DART+ network will be electrified at Glasnevin and electric and diesel trains will need to be accommodated through Glasnevin, as will access to the Maynooth Depot to stable and maintain trains during the Metrolink construction process.                            | Please refer to Response (2) above.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| 6                                                                                                                       | Glasnevin Station 4 | 2        | 4. Station design and access principles will need to be mutually agreed and validated through an appropriate Safety Assurance Process. In addition, Safety Assurance Process requirements must be adhered to and agreed with stakeholders including the Commission for Railway Regulation (CRR).                                                                                                           | <p>TII note that this is a matter for the CRR's scrutiny of the detailed design and safety plan, which are living documents subject to ongoing review and auditing by the CRR and outside the scope of the Railway Order process.</p> <p>however, TII confirm that Safety Assurance Processes will be adhered to and, to that end, TII have already commenced engagement with the Independent Safety Assessor (ISA) and CRR through the Preliminary Design process, the output of which has been incorporated into the design presented by the Railway Order application. Furthermore, TII are already in consultations with Irish Rail in relation to the APIS heavy rail CRR application process (in accordance with Irish Rail IM-SMS-014 - Safety Approval of Changes in Plant, Equipment, Infrastructure and Operations), that have been agreed with CRR. Station design and assessment of principles of concern to Iarnród Éireann will be progressed and agreed prior to commencement of construction. This engagement will continue through the next stages of the design. TII welcome further discussions with Iarnród Éireann to ensure the Safety Assurance Process meets the requirements of all parties.</p> |
| 7                                                                                                                       | Glasnevin Station 5 | 2        | 5. Operations and management of interface areas between Iarnród Éireann and Metrolink post-construction of Metrolink will need to be mutually agreed, along with day-to-day Operations and Maintenance issues (including commercial / expenditure related matters), so that Iarnród Éireann and the Metrolink Operator are clear on their respective interfaces, responsibilities, rights and obligations. | ABP is entitled to impose conditions ensuring the proper maintenance and operation of Glasnevin station. However, the division of responsibility is a matter of estate management outside the scope of the Railway Order process. TII and Iarnrod Éireann are in the process of putting in place an agreement which will capture the operational and maintenance responsibilities of the parties for this important interface station. The agreement will also address relevant commercial concerns. Both parties have committed to agreeing these interfaces in advance of the commencement of construction.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| 8                                                                                                                       | Glasnevin Station 6 | 2        | 6. Property ownership and access will need to be agreed, understanding what current Iarnród Éireann property Metrolink may subsequently be responsible for.                                                                                                                                                                                                                                                | <p>Property drawings showing the proposed temporary and permanent land take are included with the Railway Order application. Outside of that, this is a matter of estate management that is outside the scope of the RO process.</p> <p>As outlined in Response (1) above, the land consideration requirements will form part of an agreement with CIE/Irish Rail and will be entered into at the appropriate time.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| 9                                                                                                                       | Glasnevin Station 7 | 2        | 7. All the above should be clearly captured, agreed and executed in an appropriate Agreement between TII and Iarnród Éireann as a pre-condition to the commencement of any MetroLink construction works.                                                                                                                                                                                                   | See Response (7) and (8) above.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

| Submission No.                                                                                                          |                       |          | 121                                                                                                                                                                                                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |  |

| IÉ Observations (for submission to ABP) relating to MetroLink Railway Order application - 11 <sup>th</sup> January 2023 |                       |          |                                                                                                                                                                                                                                                                                                                                                                                                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |  |
| 10                                                                                                                      | Tara Street Station 1 | 2        | 1. Iarnród Éireann requires TII to minimise impacts on Iarnrod Eireann's existing services and infrastructure in the vicinity of the Metrolink works at Tara Street.                                                                                                                                                                                                                                       | <p>The proposed Tara Station does not directly impact on Iarnrod Eireann's existing services and infrastructure, indirect environmental impacts have been assessed and are reported in the EIAR, ncluding noise, dust, vibration and ground movement and settlement impacts to ensure impacts are mitigated to acceptable levels.</p> <p>The management and mitigation of construction impacts is set out by the outline Construction Environmental Manager Plan (CEMP) included with the EIAR. TII are also developing an Instrumentation and Monitoring Plan (IMP) which will set out the specific monitoring requirements for works adjacent to Iarnród Éireann Infrastructure. The CEMP and IMP will be further developed by the main works Contractor and upon which Iarnród Éireann will be consulted. TII will continue to work collaboratively with Iarnród Éireann to ensure that the design and construction process is coordinated and controlled such that any residual impacts remain acceptable.</p> |  |
| 11                                                                                                                      | Tara Street Station 2 | 2        | 2. Detailed construction proposals that address the impacts of construction on the operational viaduct and other railway support structures, as well as customer access and egress arrangements to Tara Street Station during construction need to be approved by Iarnród Éireann in advance of construction commencement.                                                                                 | <p>The construction proposals developed by the main works Contractor will comply with the granted Railway Order and any constraints placed on the design and construction methodology included in the main works Contract. [ TII will engage and consult with Iarnród Éireann to ensure that any specific Iarnród Éireann constraints are embedded in the main works Contract.</p> <p>TII will consult with Iarnród Éireann in relation to any construction proposals for any works that could potentially impact Iarnród Éireann infrastructure, property or operations. TII propose to convene regular coordination meetings with Iarnród Éireann to assist with assuring the design and construction methodology, and closer to construction, present plans for upcoming works.</p>                                                                                                                                                                                                                             |  |
| 12                                                                                                                      | Tara Street Station 3 | 2        | 3. Should any interchange connection be proposed between Metrolink and Iarnród Éireann's Dart / commuter rail services, the impacts of such design, construction and / or operations on Iarnród Éireann operations at Tara Street Station will require further discussion and agreement with Iarnród Éireann.                                                                                              | Such an interchange does not form part of the MetroLink Railway Order Application. TII are available to discuss a future interchange connection at the appropriate time.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |  |
| 13                                                                                                                      | Tara Street Station 4 | 2        | 4. Operations and management of interface areas between Iarnród Éireann and Metrolink post-construction of Metrolink will need to be mutually agreed, along with day-to-day Operations and Maintenance issues (including commercial / expenditure related matters), so that Iarnród Éireann and the Metrolink Operator are clear on their respective interfaces, responsibilities, rights and obligations. | Please refer to Response (7) above.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |  |
| 14                                                                                                                      | Tara Street Station 5 | 2        | 5. Property ownership and access will need to be agreed, understanding what Iarnrod Eireann property Metrolink may subsequently be responsible for.                                                                                                                                                                                                                                                        | Please refer to Response (8) above.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |  |
| 15                                                                                                                      | Tara Street Station 6 | 2        | 6. All the above should be clearly captured, agreed and executed in an appropriate Agreement between Til and Iarnrod Eireann as a pre-condition to the commencement of any Metrolink construction works.                                                                                                                                                                                                   | Please refer to Response (7) and (8) above.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |  |

| 1                                                                                                                                                                                                                                                                                                            | Cover letter                                  | 1        | <p>Our client is the owner of 2-4 O’Connell Street Lower in Dublin. While our client fully supports the delivery of this important piece of infrastructure for Dublin, we have identified some concerns with the proposed construction works.</p> <p>This correspondence outlines our client’s concerns, which are as follows:</p> <ul style="list-style-type: none"><li>• The MetroLink tunnel earthworks will be within 30 metres of our client’s property</li><li>• The property is of historical architectural significance and highly sensitive to disturbance</li><li>• A banking vault is located at basement level of the property. Bank vaults can be more prone to adverse issues from vibration disturbance</li><li>• A 'MetroLink Property Owners Protection Scheme' will be established for any residential property within 30-50 metres of the MetroLink works. It is unclear why commercial property owners are not offered a similar level of monitoring and protection. In particular, properties of historic value should be afforded a high level of protection from these significant engineering works.</li></ul> <p>Accordingly, we request that the 'MetroLink Property Owners Protection Scheme' is extended to include commercial properties of historical significance within 30-50 metres of the MetroLink works.</p>                              | <p>We have reviewed the submission and provided response for the observations/ concerns raised in detail below.</p> <p>TII recognize the historical architectural significance of your property and confirm your property has been listed as protected structure in EIAR Chapter 26 (Architectural Heritage), Table 26.21: Architectural Heritage Constraints between O’Connell Street Station and Tara Station. The EIAR Chapter 26 (Architectural Heritage) describes and assesses the likely direct and indirect significant effects of the proposed Project on Architectural Heritage. The protected structure status of your property is known hence your property has been subject to impact assessment and the results are presented in the Section 26.5.4.11 O’Connell Station to Tara Station. According to the findings of impact assessment, there will be no direct or indirect impacts on architectural heritage during Construction and Operational Phase in this section of the study area.</p> <p>As your building is outside the zone of influence if the tunnel there is no risk due to ground movement.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| 2                                                                                                                                                                                                                                                                                                            | Construction Impact on 2-4 O’Connell St Lower | 2 & 3    | <p>From O’Connell Street Station to Tara Station the proposed tunnel alignment crosses from beneath the buildings on the western side of O’Connell Street Upper, running beneath the GPO to cross O’Connell Street Lower, Abbey Street Lower, Harbour Court, Eden Quay, the River Liffey, and George’s Quay to meet the proposed Tara Station at Tara Street. As outlined in Figure 2 below, the distance from the tunnel to the boundary of 2-4 O’Connell St Lower is approximately 30 metres.</p> <p>As noted previously, 2-4 O’Connell St Lower is a five storey over basement property. It is occupied by Ulster Bank, who have operated a retail bank from the building for some time. The basement of the property contains Ulster Bank’s secure vault.</p> <p>The planning application documents indicate that the railway tunnel will be 16 metres below ground level in the area. This does not account for properties with basements, which reduces the distance to the proposed tunnel by a further 4-5 metres. Clearly this increases the potential for disturbance of properties with basements.</p> <p>Our client’s concern is exacerbated by the use of the basement at 2-4 O’Connell St as a secure banking vault. Banking vaults can require seismic monitoring for the purposes of security, making them more sensitive to disturbances from vibration.</p> | <p>TII welcome this additional information in relation to your property, and is happy to engage further with Institutional Investment Partners GmbH regarding this requirement.</p> <p>EIAR Appendix A 5.17, Building Damage Report, covers the assessed impacts of construction generated ground movements and settlement on property. The settlement contours calculated were used to undertake the buildings damage assessment. Please note that your building (B-181) is not on the tunnel alignment and is outside the ground movement contours and will not therefore be impacted by ground movement.</p> <p>With regards to noise and vibration, at this location the predicted groundborne noise level from TBM passage will be 44 dB LASmax at the surface, increasing by 2 dBA to 46 dB LASmax in the lowest basement, which is higher than the 45 dB LASmax threshold for the relatively short duration of the TBM passage through this area. Groundborne vibration from the TBM is predicted to be 0.19 ms-1.75 VDV (Vibration Dose Value is a parameter that combines the magnitude of vibration and the time for which it occurs) at surface level increasing to 0.25 ms-1.75 VDV with the two basements and piles. These are below the threshold level of significant effect of 1.6 ms-1.75 VDV, but could trigger bank vault monitors.</p> <p>Groundborne noise from railway operation will be 22 dB LASmax at ground level, increasing by 2 dBA to 24 dBA taking account of the basements and foundations. The threshold of significant effect is 40 dB LASmax, which will not be exceeded in the basement. For operational vibration the velocity in the vaults will be 5 micrometres/second. This is unlikely to trigger a seismic sensor. In VDV terms it will be 0.004 ms-1.75 .</p> <p>2-4 O’Connell Street Lower property is located near the tunnel area between Chainage 17+000 and Chainage 17+200. The <i>Table 14.47 Location Summary where Track Support Measures will be Required</i> of the EIAR Chapter 14 (Ground-borne Noise and Vibration) indicates the sections of the tunnel where mitigation in the form of floating slab track or other track support measures are required to reduce Groundborne noise and vibration during operation. Floating Slab Track is proposed for a section between Chainage 17+000 to 17+200 as a mitigation measure for the nearby Abbey Theatre. Therefore groundborne noise and vibration at this building will also be lower than has been predicted.</p> |
| 3                                                                                                                                                                                                                                                                                                            | Construction Impact on 2-4 O’Connell St Lower | 3 & 4    | <p>Furthermore, the Environmental Impact Assessment Report (EIAR) submitted with the application confirms that our client’s property is highly sensitive to construction disturbance due to its architectural heritage significance.</p> <p>We note that a ‘MetroLink Property Owners Protection Scheme’ will be established for any residential property within 30-50 metres of the MetroLink works. Owners of these properties can avail of protection and surveys before and after the MetroLink project is completed.</p> <p>It is unclear why commercial property owners are not offered a similar level of monitoring and protection. In particular, properties of historic value should be afforded a high level of protection from this significant engineering works.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | <p>Please refer to response Item (1) above.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

| 4                                                                                                                                                                                                                                                                                                            | Requested Planning Condition | 4        | As stated previously, our client is supportive of the MetroLink project and welcomes its ultimate delivery. Irrespective of this, there are concerns with the construction impact on the property due to its architectural significance and basement banking vault. Accordingly, we request that the 'MetroLink Property Owners Protection Scheme' is extended to include commercial properties of historical significance within 30-50 metres of the MetroLink works. | <p>Please refer to response on Items (1) and (2) above.</p> <p>TII do not intend to put in place a Property Owners Protection Scheme for Commercial Properties along the MetroLink route. To protect commercial properties, TII contractors appointed to carry out the works will, with the agreement of the owners of such properties, commission chartered building surveyors to carry out a precondition survey of commercial properties. In the event that it is determined that damage has occurred. TII's contractor will be required to commission a follow up survey to confirm the extent of the damage and confirm if the damage has been caused by MetroLink works. Where property damage is confirmed to have been caused by MetroLink works the property concerned will have recourse to MetroLink project insurances.</p>                                                                                                                                                                                                                                                                                                                                                                                                      |
| 5                                                                                                                                                                                                                                                                                                            | Requested Planning Condition | 4        | We request that An Bord Pleanála include a condition on the grant of planning permission requiring the following: <ul style="list-style-type: none"><li>• Structural surveys of buildings and other structures of architectural heritage significance to be completed prior to the commencement of works.</li></ul>                                                                                                                                                    | TII do not believe that additional conditions are required as in all cases where the built heritage structures are in the vicinity of the proposed tunnelling and are predicted to be impacted these buildings will be fully assessed, surveyed and monitored. Please refer to response item (1) and (2) in relation to anticipated impacts on your property. As noted, this building is outside the zone of influence.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| 6                                                                                                                                                                                                                                                                                                            | Requested Planning Condition | 4        | <ul style="list-style-type: none"><li>• Appropriate recording, protection, and reinstatement of items of architectural heritage, with method statements to be compiled by the Project Conservation Architect and the works supervised by suitably qualified professionals.</li></ul>                                                                                                                                                                                   | TII do not believe that additional conditions are required as the requested actions are planned to be undertaken as referred in the specific sections of the EIAR, such as Chapter 26 (Architectural Heritage) or EIAR Appendix A5.1, Outline CEMP. It is not applicable to this building as outside the zone of influence.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 7                                                                                                                                                                                                                                                                                                            | Requested Planning Condition | 4        | <ul style="list-style-type: none"><li>• Mitigation in appropriate locations including damage and vibration monitoring to ensure that vibration at the building or other structure does not exceed defined limits.</li></ul>                                                                                                                                                                                                                                            | <p>The requested actions related to vibration monitoring will be undertaken as referred to in the EIAR Appendix A5.1, Outline CEMP. According to this document, the contractor(s) will prepare a Construction Noise and Vibration Management Plan (CNVMP) for the proposed Project which will be a live document. A full monitoring and auditing programme will form part of the CNVMP which will be agreed with the Local Authorities prior to the commencement of the Construction Phase. Table 6.2: Noise and Vibration Measures of the Outline CEMP outlines the monitoring programme requirements. Please refer to response item (1) and (2) in relation to anticipated impacts at your property. As noted, this building is outside the zone of influence and therefore does not require any ground movement monitoring.</p> <p>Appendix A5.1 Outline CEMP also details that the results of all environmental monitoring activities will be reviewed by the Environmental Manager on an ongoing basis to enable trends or exceedance of criteria to be identified and corrective actions to be implemented as necessary. External regulatory and statutory monitoring may also take place to monitor compliance with requirements.</p> |

| Letter Re: Submission by Iona and District Residents Association (IDRA) to An Bord Pleanála on the MetroLink |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 1                                                                                                            | Observations | 1        | Recent minor works on Harts Corner (the intersection of Prospect Road, Botanic Road and the Finglas Road) lead to a meaningful increase in late evening traffic through our residential area. This, and previous experience of traffic around a major project, has lead residents to the conclusion that a major, multi-year infrastructure project will have a substantial detrimental impact on this residential area. We therefore seek a traffic management plan for Iona District to be implemented before, or close to the inception of Metrolink works. | <p>TII have through pre-construction planning in advance of the Railway Order anticipated the implications of the planned works on the locality, particularly traffic and accordingly have provided mitigation strategies in the EIAR for the construction phase. While the works will attract additional traffic to and from Glasnevin Station, the assessments of vehicle movements during the peak construction phase indicate an average of approximately 50 additional daily movements each way to the existing traffic flows.</p> <p>Chapter 5 of the EIAR (MetroLink Construction Phase) explains that traffic management plans for the construction phase of the Project have been developed to minimise the impact on road users, and to maintain access to businesses and other premises. Prior to implementation, all traffic management measures will be agreed with the relevant local authority (DCC for Glasnevin) and where relevant, consultation with An Garda Síochána and other statutory stakeholders will be undertaken. Refer to EIAR Chapter 5 Section 5.4.12. The design of traffic management measures and highways works is based on achieving the key objective of maintaining continual access to all properties during the works. Where necessary, a safe alternative route will be provided for pedestrians and vulnerable road users, such as children, and persons with restricted mobility, to maintain pedestrian access to premises. Where detour routes are required, these will be kept as short as possible and detour signage will be clear and easy to understand. All construction sites will be designed to be as unobtrusive as possible. Please refer to section 5.5 of the EIAR Appendix 5.1.</p> <p>As outlined in Appendix A5.1 Outline Construction Environmental Management Plan - CEMP, the appointed contactor(s) are required to implement the measures in relation to traffic and transportation during construction. Following the appointment, the contractor(s) will be required to develop an updated contract-specific CEMP which will detail all measures to be employed in relation to all potential impacts on traffic and transportation.</p> <p>Other measures include the control of construction vehicles in terms of their hours of operation and restrictions on vehicle size and weight. It has been assumed that regular HGV deliveries to Glasnevin will be restricted outside of standard hours. This is referred to in section Appendix 5.5, 8.6 Traffic Management. Out of hours deliveries at Glasnevin are anticipated, but these typically would be either: abnormal load deliveries requiring an Abnormal Load Permit issued by An Garda Síochána and the local authority; or deliveries during any occasional weekend track possession works planned at Glasnevin.</p> <p>During the Main Works for Glasnevin Station, no road closures or lane reductions are required. During the Enabling Works for Glasnevin Station, the removal of 90m of bus lane on Prospect Road northbound is provided, with priority given to pedestrians. As presented in Appendix A9.5 Scheme Traffic Management Plan, as the construction site boundary is primarily contained away from the traffic network, there is likely to be no significant impact on traffic flows throughout the construction period while temporary traffic management is implemented. Analysis shows that construction traffic movements will likely result in a minor impact on the nearby signalised junctions on Prospect Road, however traffic flow will be generally unaffected. There will be some impact on Prospect Road (R108) where site vehicles routing from the north to the site will be required to take a right into the site, leading to an increase in HGVs in the area.</p> <p>The proposed site entrances will be from Prospect Road and will be adjusted several times during the phasing of the works. In general, where the site access points are relocated, the change in location is minimal and will result in little change in impact to the local or wider transport network.</p> |

| Letter Re: Submission by Iona and District Residents Association (IDRA) to An Bord Pleanála on the MetroLink |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| 2                                                                                                            | Background   | 2        | We suggest that long-term initiatives are needed to reimagine the neighbourhood and ensure a more sustainable and safer neighbourhood inclusive to all demographics within our community. We propose that the neighbourhood is designed for local requirements first - with a view to making the district a safe place to access and move around. The area needs to migrate away from a car centric location.     | <p>Chapter 3 (Background to the MetroLink Project) details the need for the Project. As noted, MetroLink will contribute significantly to the transformation of the lives of the 1.6 million people projected to live in the Dublin region by 2040 (CSO, 2020). The growing population and higher-density housing will create demand for a reliable, high-capacity, sustainable public transport system that helps Ireland meet its climate change commitments of reducing its greenhouse gas (GHG) emissions by 51% by 2030 and reaching net zero no later than the year 2050.</p> <p>MetroLink will address challenges of compact growth, sustainable mobility, enhanced regional connectivity, quality international connectivity, transition to a low carbon and climate-resilient society, enhanced amenity and heritage, maximising sustainability gains, strong economy supported by enterprise innovation and skills, access to quality childcare, education and health services, and strengthened rural economies and communities.</p> <p>It is anticipated that, overall, the proposed Project will provide for improvements to the public transport network, resulting in decreases in car usage/trips, increases in public transport usages, and will facilitate walking and cycling to the stations, without significantly impacting on the operation of the networks in the area.</p> |
| 3                                                                                                            | Metrolink    | 2 and 3  | Metrolink (Glasnevin and Griffith Park stations) and the associated works are very substantial projects with potentially very positive impacts on the district and wider city. The location of the district means that there will be major construction works in our immediate vicinity. There are not yet specific construction timetables, but these works could be expected to continue for close to a decade. | <p>TII notes and appreciates the support for the delivery of MetroLink, and the selected station locations. As detailed in Chapter 5 (MetroLink Construction Phase), the programme for the construction of the proposed Project has been optimised to minimise the duration of the Construction Phase, where possible, in order to lessen the duration of potential environmental impacts, while ensuring that the areas surrounding the works sites remain operational and functional.</p> <p>A summary programme showing the duration and phasing for the construction of the proposed stations and surface works along the alignment is shown in Diagram 5.3 of Chapter 5 (MetroLink Construction Phase), with a detailed construction programme presented in Appendix A5.2.</p> <p>At Glasnevin, the programme sequence developed incorporates the works proposed by Iarnród Éireann for lowering of the MGWR and GSWR tracks, in order to ensure interfacing and timing of works is optimised to suit both parties.</p>                                                                                                                                                                                                                                                                                                                                                                        |

| Letter Re: Submission by Iona and District Residents Association (IDRA) to An Bord Pleanála on the MetroLink |                                                                                         |          |                                                                                                                                                                                                                                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| 4                                                                                                            | Impact during works period                                                              | 4        | During recent road works around Harts Corner (road resurfacing for a few consecutive evenings) it was clear that there was a pickup in traffic through the district in the late evening and early night as drivers diverted around a relatively modest section of works. We have concern regarding an increase in cut-through traffic seeking an escape from major civil works during the multi-year build and implementation phase.   | Please refer to response above (1) related to the traffic management during the Construction Phase. As indicated, analysis shows that construction traffic movements will likely result in a minor impact on the nearby signalised junctions on Prospect Road, however traffic flow will be generally unaffected.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| 5                                                                                                            | Long-term impact, NTA modelling and forecast traffic growth in and around Iona District | 6        | An increase in traffic in a residential area is unwelcome, also it is difficult to see how Whitworth Road and St Annes Road would experience increased traffic without some spill over of cut-through traffic into the remainder of Iona District.<br><br>New traffic flow patterns will create new cut-through routes, a long-term traffic management solution can protect this residential district against future traffic problems. | Please refer to response above (1) related to the traffic management during the Construction Phase. As indicated, analysis shows that construction traffic movements will likely result in a minor impact on the nearby signalised junctions on Prospect Road, however traffic flow will be generally unaffected.<br><br>Figure 6.21 (presented in the submission, excerpt from A9.4 Traffic and Transport Modelling Report) presents a strategic overview of the changes in traffic flow in the operational phase in Scenario A 2035 AM Peak Hour. The thickness of the lines in this image are proportionate to the increase in flows. Therefore, any increases on local roads in this area are minimal, as illustrated by the thin lines. As noted in response item (2) above, it is anticipated that, overall, the proposed Project will provide for improvements to the public transport network, resulting in decreases in car usage/trips, increases in public transport usages, and will facilitate walking and cycling to the stations, without significantly impacting on the operation of the networks in the area. |

| Letter Re: Submission by Iona and District Residents Association (IDRA) to An Bord Pleanála on the MetroLink |                     |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |  |
| 6                                                                                                            | Residents' concerns | 6        | <p>We are requesting a review of traffic management in the district as part of the wider design of the Metrolink projects to:</p> <ul style="list-style-type: none"><li>- ensure safety for pedestrians and cyclists,</li><li>- apply good quality modern placemaking to help improve accessibility within the locality,</li><li>- apply international best practice to help highlight and address the negative traffic impacts on our community, and in the longer-term</li><li>- bring about the behavioural changes required to address environmental challenges.</li></ul>                                                                                                                 | <p>Please refer to responses above (1 and 5) related to the traffic management during the Construction and Operational Phases of the MetroLink project.</p> <p>Traffic management plans for the construction of MetroLink have been developed to minimise the impact of the scheme on road users, and to maintain access to businesses and other premises. A hierarchical approach to traffic management has been adopted with pedestrian/cyclists, public transport and commercial needs provision taking preference over private car usage. Pedestrian routes will be maintained throughout the construction period, either around or through the construction site, where safety risks to the general public will not increase as a result of construction activity.</p> <p>Chapter 4 (Description of MetroLink Project) details the over-arching architectural, urban realm and landscaping design principles for the Project. As detailed, Glasnevin Station will include enhanced pedestrian and cyclist facilities along Prospect Road. A two-way cycle lane along the east side of the road and widened footpaths on the west side will be provided as well as an additional pedestrian crossing to the north of the station. Enhanced bus stop facilities are proposed outside the station. A new access road from Prospect Road to the drop-off facilities will also provide access to 120 cycle parking spaces. The Glasnevin Station will also offer direct interchange with the heavy rail network through the integrated Iarnród Éireann station at this location.</p> <p>The proposed Project has been designed to ensure maximum interchange with other modes of transport, specifically more sustainable modes of transport such as walking, cycling and public transport. Please refer to response item (2) in relation to the Project's contribution to meeting Ireland's climate change targets.</p> |  |
| 7                                                                                                            | Safety issues       | 6        | <p>Despite the size of the area, there is minimal public communal recreational space within our boundaries. This means that children, local schools, families, dog walkers, and runners must use roads for, and as access routes to, social and recreational facilities.</p> <p>Over the years there has been a noticeable increase in the number of district residents who cycle on a daily basis. Many commuting cyclists choose to pass through the district as they travel to and from the city, or on cross city journeys.</p> <p>A number of older residents use mobility scooters, walking aids and wheelchairs to support independent living and their access to local facilities.</p> | <p>Please refer to response item (6) above in relation to the hierarchical approach to traffic management during the construction phase to prioritise the safety of vulnerable users.</p> <p>Please refer to response item (6) in relation to the proposed cycle facilities to be provided at Glasnevin Station.</p> <p>Chapter 6 (MetroLink Operations and Maintenance) details how the proposed Project has been designed on the principle of Access for All. The design has been developed to meet all legislative requirements relevant to accessibility including the Disability Act 2005 and in turn the Sectoral Plan for Accessible Transport under the Disability Act 2005 (DTTAS 2012). The approaches to the station entrances are positioned to provide convenient access with minimal changes in level. Design features to facilitate safe access to the station entrance include signalised crossings, 'raised tables' within the roadway to reduce traffic speed at pedestrian crossings and dropped kerbs on pavements on both sides of the crossing to remove a trip hazard and aid wheelchair users and people with wheeled luggage. Tactile paving surfaces will warn pedestrians with visual difficulties of the absence of a kerb and guide them in the direction of the crossing.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |  |

| Letter Re: Submission by Iona and District Residents Association (IDRA) to An Bord Pleanála on the MetroLink |                    |          |                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |  |
| 8                                                                                                            | Cut through routes | 8        | The MetroLink project will substantially change vehicle flows in and around the district. There will be multiple phases as drivers seek, and then establish new routes, during the construction phase, and then repeat the process when construction ends.                                                                  | <p>Please refer to response item (1) in relation to the impacts on traffic during the construction phase. Should any issues arise, a Project Construction Traffic Forum will be established allowing local stakeholders, such as residents associations, to voice any concerns and liaise with TII and the contractor(s) on the associated traffic management in the area. Refer to the Outline Construction Environmental Management Plan - EIAR Appendix 5.1.</p> <p>As noted therein, the Dublin City Council urban traffic signal control system will be used to optimise the flow of traffic along diversion routes to mitigate queuing and delay which would otherwise be expected during peak periods, therefore reducing the demand for cut-through traffic.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |  |
| 9                                                                                                            | Pollution Impacts  | 8        | Large volumes of vehicles produce; noise, particulates, and emissions. These outputs have been estimated to travel distances of 50m up to some kilometres. A travel distance of as little as 100m would mean that almost all residences within the district are impacted by vehicle outputs on busier neighbouring streets. | <p>As indicated in response item (1), there is likely to be no significant impact on traffic flows throughout the construction period while temporary traffic management is implemented.</p> <p>As detailed in Chapter 13 (Airborne Noise and Vibration), mitigations measures to reduce noise from construction traffic are limited to restricting speed limits, maintaining road surfaces and ensuring all vehicles are properly maintained. In addition, any coverings on construction vehicles will be securely fastened before leaving site to avoid excessive rattling. These coverings will also mitigate against dust and accidental spoil spillage.</p> <p>Chapter 16 (Air Quality) assesses the impact of construction traffic on air quality and emissions. The modelling of road traffic for impacts on human health and ecological receptors has found no significant impacts that require mitigation measures with respect to the modelling of emissions. However, some mitigation measures can be put in place to minimise emissions:</p> <ul style="list-style-type: none"><li>* Implement a policy which prevents idling of vehicles both on and off-site, including HGV holding sites;</li><li>* Construction Phase traffic should be monitored to ensure construction vehicles are using the designated haul routes;</li><li>* Additional vehicular traffic will be managed through the CEMP and Temporary Traffic Management Plans for the proposed Project and stations as per Chapter 9 (Traffic and Transport);</li><li>* Efficient scheduling of deliveries to minimise number of deliveries required, and in turn their emissions; and,</li><li>* Construction vehicles should conform to the current EU emissions standards and where reasonably practicable, their emissions should meet upcoming standards prior to the legal requirement date for the new standard. This will ensure emissions on haul routes are minimised.</li></ul> <p>Mitigation measures are required for the control of dust with respect of HGV movements on site and deliveries to/from the site:</p> <ul style="list-style-type: none"><li>* HGV traffic leaving site will pass through a wheel wash;</li><li>* Public roads outside the site will be regularly inspected for cleanliness and cleaned as necessary. If public roads are deemed to require additional cleaning where possible a suction device for road cleaning will be utilised which can access spaces around cars and other street furniture more effectively; and</li><li>* During movement of materials both on and off-site, trucks will be stringently covered with tarpaulin at all times. Before entrance onto public roads, trucks will be adequately inspected to ensure no potential for dust emissions.</li></ul> |  |

| Submission No.                                                                                               |                                                |          | 123 - also addresses submission no. 124 (identical submissions with additional queries in 123)                                                                                                                                                                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

| Letter Re: Submission by Iona and District Residents Association (IDRA) to An Bord Pleanála on the MetroLink |                                                |          |                                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| 10                                                                                                           | Impact of cut through traffic on bicycle lanes | 8        | Bicycle routes run along the arterial roads that outline the district. Cut through traffic turning off the arterial roads crosses bicycle lanes at a high volume creating accidental risk and impeding cyclists.                                                                              | <p>As indicated in response item (1), there is likely to be no significant impact on traffic flows throughout the construction period while temporary traffic management is implemented, therefore the volume of cut-through traffic is not expected to increase. Please refer to response item (8) in relation to impacts of the traffic management at this location.</p> <p>As detailed in response item (6), a hierarchical approach to traffic management has been adopted with pedestrian/cyclists, public transport and commercial needs provision taking preference over private car usage.</p> <p>Appendix A9.5 Scheme Traffic Management Plan presents the assessment of impacts to all road users, including cyclists, during the construction works. During the Advanced Enabling Works at Glasnevin, the removal of the bus lane on Prospect Road will impact cyclists who will then be required to utilise the general traffic lane. This will reduce the cycling level of service at this location. During the Main Works, cyclists using the designated primary cycle route will not be affected by the proposed works.</p> |
| 11                                                                                                           | 30km/h speed limit                             | 9        | The district is included in Dublin City Council's 30km/h speed limit zone. There is signage at entrances to the district, but motorists tend to either not notice it or ignore it. There is very little evidence of awareness that this speed limit applies to all roads within the district. | Please refer to response item (8) in relation to the proposed mitigation measures relating to traffic management.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| 12                                                                                                           | Large vehicles                                 | 10       | The district is subject to a 3.5t maximum gross weight restriction. Vehicles larger than 3.5t are regularly seen passing through the district. This happens at all times, including when children are going to and from primary school.                                                       | <p>As detailed in Appendix A5.1 Outline CEMP, construction vehicles will be strictly controlled in terms of the hours of operation, and by imposing restriction on vehicle size and weight to minimise safety risk to other road users.</p> <p>As noted in response item (8), a Project Construction Traffic Forum will be established with representatives from key stakeholders to liaise on issues arising from the construction traffic movements and traffic management plans. Suitable spoil removal routes have been identified in order to direct construction traffic onto suitable roads, and to minimise the negative effects of increased HGV traffic on the environment.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

| Letter Re: Submission by Iona and District Residents Association (IDRA) to An Bord Pleanála on the MetroLink |                  |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| 13                                                                                                           | Car parking      | 11       | There are sections on St Alphonsus Road and St Patrick's Avenue where parking on footpaths (partially and completely) on both sides of the road causes wheelchair users, people with walking aids and parents wheeling children in buggies, to have no alternative but to move out onto the road in order to get past parked vehicles.                                                                                                                                                                     | <p>Traffic management plans are proposed within the vicinity of the construction sites, and therefore will not impact on areas such as St Alphonsus Road and St Patrick's Avenue.</p> <p>As noted in response item (2) it is anticipated that, once operational, the proposed Project will provide for improvements to the public transport network, resulting in decreases in car usage/trips. Appendix A9.2-G Traffic and Transport Assessment Glasnevin Station indicates that in Scenario A 2065 AM Peak Hour, that the zones around Glasnevin Station, including the Iona area, will see reductions in car mode share of up to 5 percentage points, indicating a reduced demand in car trips to and from this area. Therefore, there will be a reduced volume of cars demanding parking in the area and blocking pedestrian footways.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 14                                                                                                           | Narrow footpaths | 11       | Footpaths in the district are generally wide enough. There are some narrow paths in the district, the most problematic are sections of Crawford Avenue near a primary school. Large, mature trees on; Lindsay Road, Iona Road, Hollybank Road, Gartan Avenue, and Iona Park cause narrowing of paths. Narrow footpaths in the district encourage pedestrians onto busy roads. Some path users needing a wider path (those with prams, buggies, on wheelchairs, mobility devices) may be forced onto roads. | <p>As detailed in Appendix A5.1 Outline CEMP, pedestrian routes will be maintained throughout the construction period, either around or through the construction site, where safety risks to the general public will not increase as a result of construction activity. In very sensitive areas, such as in the City Centre or in the vicinity of schools, the designated access and pedestrian routes around the construction sites, particularly at and/or along the hoarding lines, must not be perceived as uninviting by pedestrians. The environment around the sites, therefore, will be designed to ensure that pedestrians and cyclists feel they are entering a safe and accessible environment. Temporary pathways will be installed where appropriate and provision will be made to ensure access for the mobility impaired is maintained. Where the existing level of service cannot be maintained in the vicinity of the construction sites, an alternative route will be designated, be clearly visible, be safe and be signed and have the level of service required to cater for the pedestrian demand.</p> <p>In recognition of the potentially complex routing and road crossing behaviour at Glasnevin Station in the operational phase, a microsimulation VisWalk model was produced for the area surrounding the station. The modelled layout includes the main roads and streets of Whitworth Road, Cross Gun's Bridge and Phibsborough Road. Analysis of the model indicates that the network operates with an acceptable level of service given the expected pedestrian demand in both the AM and PM peak periods. Further results of this analysis are presented in Appendix A9.2-G Traffic and Transport Assessment-Glasnevin Station.</p> |

| Letter Re: Submission by Iona and District Residents Association (IDRA) to An Bord Pleanála on the MetroLink |                         |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| 15                                                                                                           | What we are looking for | 12       | <p>The number of issues we have highlighted are cause of concern in relation [to] the safety of residents, especially children and vulnerable adults and the enjoyment of living spaces by all residents.</p> <p>We are seeking a review, and traffic management plan, for Iona District for the duration of the Metrolink construction period(s) and the longer-term, particularly with a view to traffic calming initiatives.</p> <p>The lengthy construction period and subsequent change in traffic patterns will likely establish different traffic flows in the district, a traffic management plan should set out long-term goals for the post-construction period consistent with Department of Transport guidelines.</p> | <p>Please refer to response item (1) in relation to the impacts on traffic during the construction phase. As indicated in response item (1), there is likely to be no significant impact on traffic flows throughout the construction period while temporary traffic management is implemented, therefore the volume of cut-through traffic is not expected to increase. Should any issues arise, a Project Construction Traffic Forum will be established allowing local stakeholders, such as residents associations, to voice any concerns and liaise with TII and the contractor(s) on the associated traffic management in the area.</p> <p>As noted in Appendix A5.1 Outline CEMP, the Dublin City Council urban traffic signal control system will be used to optimise the flow of traffic along diversion routes to mitigate queuing and delay which would otherwise be expected during peak periods, therefore reducing the demand for cut-through traffic.</p> <p>Please refer to response item (6) in relation to the traffic management and promotion of sustainable modes during the operational phase.</p> |

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| Letter Re: Submission by Iona and District Residents Association (IDRA) to An Bord Pleanála on the MetroLink |                         |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| 16                                                                                                           | What we are looking for | 12       | <p>Some more immediate measures could be introduced, e.g.:</p> <ul style="list-style-type: none"><li>- Specific measures to discourage heavy vehicles from entering the district,</li><li>- Specific measures at times when children are going to and from schools and childcare,</li><li>- Sweeping corners on roads could be made safer so that vehicles cannot 'carry momentum' through corners,</li><li>- Narrow sections of footpath on multiple roads could be widened so that pedestrians are not encouraged to walk on the road,</li><li>- Roads could be narrowed to encourage motorists to moderate their speed, and</li><li>- Adjustment of the mini roundabouts on Iona Road, St Alphonsus Road, and St Patrick's Road.</li></ul> <p>These changes can have impact, but we believe that the range and extent of the problems and high volume of traffic require a more fundamental re-working of street design in the district.</p> | <p>1) During the Advanced Enabling Works at Glasnevin Station, modelling results indicate that the bus lane/general traffic lane removal will result in a slight impact on the section of road where the capacity is decreases, with an increase of volume of 3% in the morning peak and 2% increase during the evening peak. This increase results in a driver delay of approximately 40 seconds in the immediate area of the works. During the Main Works, analysis shows that construction traffic movements will likely result in a minor impact on the nearby signalised junctions on Prospect Road, however traffic flow will be generally unaffected. There will be some impact on Prospect Road (R108) where site vehicles routing from the north to the site will be required to take a right into the site, leading to an increase in HGVs in the area. Model outputs indicate that there will be minimal change in HGV volume as in both the morning and evening peaks, the roads immediately surrounding the station show that there is little change in the HGV flows.</p> <p>2) As detailed in Appendix A5.1 Outline CEMP, where practicable, construction work requiring short-term disruption and road closures will be carried out when traffic volumes are lower, such as at night, at weekends and during to school holidays, to minimise disruption and safety risk. There are no proposed traffic management measures on the R135 Finglas Road in the vicinity of St Vincent's Secondary School and its associated facilities. Therefore, school children and staff will face minimal disruption, with the exception of additional HGVs on this route travelling to and from the designated spoil site. On Prospect Road, construction traffic accessing the site will require access across the footway, however notices will be displayed on all site boundaries, where appropriate, to warn of hazards such as construction access. Appropriate site lines/visibility splays will be maintained to ensure safety of both vehicles and pedestrians.</p> <p>3) As detailed in Appendix A5.1 Outline CEMP, construction vehicles will be strictly controlled in terms of the hours of operation, and by imposing restriction on vehicle size and weight to minimise safety risk to other road users. As part of the mitigation measures during the construction phase, strict speed limits will be imposed on roads adjacent to construction sites in order to ensure the safety of all road users. 50kph speed limit in the city centre will be reduced to 30kph, and 80kph on all other routes will be reduced to 50kph.</p> <p>4) Please refer to response item (14) in relation to pedestrian routing.</p> <p>5) As noted in item (16-3) above, strict speed limits will be imposed on roads adjacent to construction sites in order to ensure the safety of all road users. 50kph speed limit in the city centre will be reduced to 30kph, and 80kph on all other routes will be reduced to 50kph. As noted in response item (2) it is anticipated that, once operational, the proposed Project will provide for improvements to the public transport network, resulting in decreases in car usage/trips. Appendix A9.2-G Traffic and Transport Assessment Glasnevin Station indicates that in Scenario A 2065 AM Peak Hour, that the zones around Glasnevin Station, including the Iona area, will see reductions in car mode share of up to 5 percentage points, indicating a reduced demand in car trips to and from this area.</p> <p>6) Once operational, ultimately the aim of schemes such as BusConnects and MetroLink when completed is to enhance the reliability and use of public transport, thus reducing traffic through the Glasnevin area and Iona District.</p> <p>As part of the BusConnects Core Bus Corridor proposals, the future street level layout at Glasnevin Station reduces the current road network to one lane in each direction to accommodate a designated bus lane and bus stop along R108 Prospect Road. As part of the proposed Project, a taxi/drop-off area will be provided to the north of the station entrance in lands currently occupied by the Brian Boru car park. A new access road from Prospect Road to these facilities will also provide access to the bicycle parking.</p> <p>It is anticipated that, overall, the proposed Project will provide for improvements to the public transport network, resulting in decreases in car usage/trips, increases in public transport usages, and will facilitate walking and cycling to the stations, without significantly impacting on the operation of the networks in the area. There may be a requirement for further work in conjunction with DCC to determine full effective mitigation measures, such as reconfiguration of street furniture or reallocation of space to maximise available width.</p> |

| Letter Re: Submission by Iona and District Residents Association (IDRA) to An Bord Pleanála on the MetroLink |                         |          |                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| 17                                                                                                           | What we are looking for | 13       | We appreciate that Dublin City Council may have workable solutions that could address our concerns and Iona District residents are happy to engage with authorities and agencies involved in the Metrolink project and give whatever support may be required in implementing any solutions. | As noted in response item (8), a Project Construction Traffic Forum will be established with representatives from key stakeholders to liaise on issues arising from the construction traffic movements and traffic management plans. As detailed in Chapter 8 (Consultation), early and continuous public participation has influenced the design and development of the MetroLink project. TII are committed to maintaining engagement with local stakeholders throughout both the construction and operational phases. |

DUBLIN |                                                      |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |  |
| 1                                                                                                                                                                                         | Introduction                                         | 1        | Our clients wish to request an Oral Hearing on the Railway Order application.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | <p>While acknowledging your request, TII advise that the oral hearing process is managed by An Bord Pleanála. An overview of the Oral Hearing process is provided in the EIAR Chapter 8.9.2. An Bord Pleanála have confirmed to TII that an oral hearing on the Railway Order application will be held.</p> <p>The purpose of the oral hearing will be to allow issues relevant to an application for approval be examined. The oral hearing can be attended by anyone, but only those that have made a written application may make an oral submission at the oral hearing.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |  |
| 2                                                                                                                                                                                         | Introduction (page 4 of the Submission)              | 7        | The demolition of Unit 1 (an anchor unit currently occupied by Smyths Toys and Starbucks), and the temporary and permanent loss of car parking associated with the MetroLink project will impact on the operation of the Airside Retail Park (and Phase 1 in our clients' ownership in particular).                                                                                                                                                                                                                                                                                                                                                                                            | <p>The demolition of Unit 1 and loss of car parking are noted as being significant impacts but necessary for the construction of Fosterstown Station which will bring wider benefits to the area as detailed within the EIAR. TII carefully examined the Fosterstown station site alternatives as part of the preliminary design development. In this sense, other station locations and alignment options at this location have been considered to determine whether other feasible options (in terms of station location and alignment) could be adopted that would mitigate the impact on the Airside Retail Park and in particular identify design solutions that would avoid demolition of the end of terrace retail warehouse unit. In each case, a station stop location moved either north or south of the present location that coincides with the end of terrace retail unit, with the associated track alignment moved west resulted in significant impact on the R132, requiring its permanent realignment and further consequential impacts to residential properties to the west of the R132.</p> <p>These factors were considered amongst others in the multi-criteria analysis (two stage) undertaken to identify the optimal location for the Fostertown Station which concluded that the current proposed option for the MetroLink alignment and the Fosterstown station location past Airside is the most suitable option. It was adopted for the Preliminary Design, and forms part of the Railway Order documentation. The full results of station location alternatives assessment are presented in Section 7.7.10.4 Fosterstown of the EIAR Chapter 7 (Consideration of Alternatives) and EIAR Appendix A7.1 Fosterstown Station Options Report.</p> <p>TII will offer compensation to property owners for land that is deemed to be acquired land in accordance with the general compulsory purchase code. In addition, a Land Acquisition Strategy has been prepared by TII which sets out the arrangements proposed for the provision of information and assistance to the residential owners / occupiers of land and property subject to compulsory purchase for the delivery of MetroLink. For details related to the compensation for compulsory purchase and land acquisition strategy, please refer to EIAR Chapter 21 (Land Take), section 21.6.1.2 Compensation for Compulsory Purchase.</p> |  |
| 3                                                                                                                                                                                         | Key grounds of submission (page 4 of the Submission) | 7        | Our clients also have a number of specific concerns in relation to the proposed Railway Order application to An Bord Pleanála and they request that these be addressed by making amendments to the project and Railway Order as set out below.<br>The key grounds of submission relate to the following:<br>1 . The extent of permanent land acquisition<br>2. Extent, alignment and beneficiaries of the proposed wayleaves and rights of way<br>3. Maintaining access to Airside Retail Park during construction works and associated traffic management measures<br>4. Signage during construction and post construction, and fencing<br>5. Facade treatment following demolition of Unit 1 | Thank you for your submission. TII have reviewed your concerns/observations to the project and provided responses in detail below.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |  |

DUBLIN |                                                                                   |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| 4                                                                                                                                                                                         | Grounds of submission, 1. Permanent Land Acquisition (page 5 of the Submission)   | 9        | <p>Our clients have concerns in relation to the permanent acquisition of this area of land (ML1T-A8). It is not clear why it is proposed to acquire this area permanently and respectfully requested that this should be omitted from the permanent land take in any approved Railway Order. This area of land (illustrated in Figure 4 above) poses a critical part of the existing infrastructure of the retail park as it is located on the main access route into this area of the retail park and serves a significant existing car park at this location.</p> <p>This parcel of land should remain in the ownership and control of the owners of Phase 1 , Airside Retail Park i.e. IPUT and Irish Life Assurance pic. It is considered that this area of land is not required for the operation of the Metro and that this matter is best addressed extending the right of way/wayleave along the access road into and through this parcel of land leading to the proposed Fosterstown station.</p> | <p>The location for Fosterstown Station will require the realignment of the internal road network within Airside Retail Park. The realigned internal road network will also be used to provide access to the station, associated drop-off and relocated Airside Retail Park substations and telecommunications mast. The road alignment takes into consideration BusConnects plans for the provision of a core bus corridor along this section of the R132, with a new bus stop on both sides of the R132 carriageway close to the station. To reduce community severance on the east side of the R132, a new walkway on the east side of the alignment will connect the station with the Airside Retail Park.</p> <p>The general arrangement drawings within the area of Airside Shopping Centre (please refer to drawings no. ML1-JAI-ARD-ROUT_XX-DR-Y-03023 and ML1-JAI-ARD-ROUT_XX-DR-Y-03024) have been enclosed to the Notification letter issued on 20th of September 2022 to property owners.</p> <p>The subject lands (ML1T-A8, A7, A5, A4 &amp; A3) is required to support the realignment of the internal road network within Airside Retail Park, locate power substations, provide access to the completed station and lands at the rear of the station, including maintaining access to the rear of Airside Shopping as exists and landscaping around the completed station. Please refer to landscape drawing ML1-JAI-ARL-SC03_XX-DR-Y-00006 (Sheet 2 of 2) Swords Central - Fosterstown Landscape Layout - Railway Order Plans\Drawings Landscaping Drawings (Sheet 8 of 13).</p> <p>The acquisition of subject lands (ML1T-A8, A7, A5, A4 &amp; A3) has been considered as permanent land acquisition, with TII interests for this land as outlined above. Subject to agreement with the landowner TII will provide surface level access through this location during and after construction completion (via a wayleave) and return the unused land following construction completion.</p> |
| 5                                                                                                                                                                                         | Grounds of submission, 1. Permanent Land Acquisition (page 5 of the Submission)   | 9        | Secondly, it is noted that it is proposed to acquire a portion of land to the rear of Unit 1 and Unit 2 (ML1T-A6) and a portion of the land resulting from the demolition of Unit 1 (ML1T- A7) for landscaping purposes as part of the permanent land take for the project (see Figure 5 below). It is understood that this area of land is not required for the permanent and ongoing operation of the MetroLink project post construction. Therefore, it is also requested that it is agreed that this area of land shall be acquired on a temporary basis only if necessary and returned after the completion of construction to its current owners IPUT and Irish Life Assurance pic. It is important for the ongoing operation management and maintenance of the retail park that this area remains permanently in the ownership of our clients, the owners of Phase 1 of Airside Retail Park.                                                                                                        | Please refer to response item (4) above in relation to the land take at this location.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| 6                                                                                                                                                                                         | Grounds of submission, 1. Permanent Land Acquisition (page 5 of the Submission)   | 9        | The extent of lands which are currently shown for permanent acquisition / land take, but which it is submitted should be re-designated as temporary land-take only are indicated approximately on Figure 6 and 7 below.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | Please refer to response item (4) above in relation to the land take at this location.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| 7                                                                                                                                                                                         | Grounds of submission, 2. Right of Way/Wayleaves (page 6 and 7 of the Submission) | 11&13    | Confirmation is requested that TII and users / passengers of MetroLink only will have the benefit of the rights of way/wayleaves which are proposed at Airside Retail Park (Reference nos. ML1U-W1 and ML1U-W2). It is noted that the two proposed wayleaves include the existing access into the retail park and a further wayleave traversing the existing car park to the south of Unit 1. It is important that it is confirmed that the proposed right of way is restricted to TII / MetroLink Passenger use only and is not for the benefit of any other party including adjoining landowners.                                                                                                                                                                                                                                                                                                                                                                                                        | <p>As shown on EIAR Figure 5.1, Sheet 6, both strips of land (ML1U-W1 and ML1U-W2) are required to remain as permanent easement for MetroLink purposes to allow access to the future station and to provide for utility infrastructure routes to the station. Further easements through to the station and rear of the retail centre on CPO subject lands (ML1T-A8, A7, A5, A4 &amp; A3) to be agreed with the landowner.</p> <p>The permanent easements will include a permanent right for TII and its contactors, sub-contractors operators, servants, agents or any other party authorised by it to enter upon and use the relevant part of the Permanent Lands for all purposes in connection with the design, construction, operation etc. including access and egress to and from the station by passengers. The adjoining third party Landowner will be required to agree his owns term directly with Irish Life/IPUT</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

| RE: RAILWAY (METROLINK-ESTUARY TO CHARLEMONT VIA DUBLIN AIRPORT) ORDER 2022, SUBMISSION ON THE METROLINK RAILWAY ORDER APPLICATION IN RELATION TO AIRSIDE RETAIL PARK, SWORDS, CO. DUBLIN |                                                                                                                                |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |  |
| 8                                                                                                                                                                                         | Grounds of submission, 2. Right of Way/Wayleaves (page 7 of the Submission)                                                    | 13       | Further clarification is required in relation to the likely extent of the use of the existing access into the retail park for which the wayleaves/right way of way is sought (ML1U-W1), as this could have a potential impact on the operation of the retail park.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | Please refer to response item (7) above in relation to wayleaves.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |  |
| 9                                                                                                                                                                                         | Grounds of submission, 2. Right of Way/Wayleaves (page 7 of the Submission)                                                    | 13       | Additionally, as noted the further proposed right of way / wayleave (which it is understood is intended to facilitate below-ground services and periodic access for works) proposed through the centre of the existing car park adjacent to Unit 1 (ML1U-W2) will effectively bisect this area of car parking instead of following the boundary of the existing car park. It is requested that this alignment of wayleaves/right of way is realigned parallel to the metro alignment as proposed in order to minimise its potential impact for future disruption to the carpark. This option should be fully investigated by TII.                                                                                                                                                                                                                                                      | TII confirm that this proposed wayleave ML1U-W2 is a requirement for right of access for utilities into the MetroLink station. Any change to the proposed route would require agreement with the utility provider.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |  |
| 10                                                                                                                                                                                        | Grounds of submission, 2. Right of Way/Wayleaves (page 7 of the Submission)                                                    | 13       | In addition to the foregoing, it is submitted that provision should be made for the relocation and alteration of easements (rights of way / wayleaves) in future if required by the co-owners (IPUT and ILA or its successors in title) subject to agreement, at the cost of the beneficiary of the easement.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | TII will consider these on a case by case basis as they arise.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |  |
| 11                                                                                                                                                                                        | Grounds of submission, 3. Access to Airside Retail Park Through Construction and Traffic Management (page 7 of the Submission) | 13       | It is proposed at the existing main access to Airside Retail Park off the R132 Dublin Road will be closed for traffic for a period of 21 months or possibly longer. It is also noted that there will be a very limited temporary junction put in place during construction for traffic to exit onto the R132 Dublin Road heading in a southbound direction only during the construction process.<br>IPUT and Irish Life Assurance pic are extremely concerned that this lengthy closure period of this access will cause severe disruption to the retail park and the retail park's customers and retailers.                                                                                                                                                                                                                                                                           | Appendix A9.5 Scheme Traffic Management Plan illustrates the proposed diversion route to accommodate the partial closure of the R125 at Airside Retail Park. The proposed diversion will route traffic via the Nevinstown signalised junction and Airside roundabout. At its longest distance the diversion will be approximately 1.5km. For vehicles routing from the north or north-east of this area, there is also the option to use Mountgorry Way as an alternative diversion. Commercial and retail delivery vehicles will be subject to the same diversions, however access to the retail park for both customers and retailers will be maintained throughout the construction works.<br><br>As outlined in Appendix A5.1 Outline CEMP, prior to the commencement of the construction phase, a comprehensive publicity and information campaign will take place to ensure all members of the public are informed of the upcoming traffic management measures. A Project Construction Traffic Forum will be established with representatives from key stakeholders, including those from FCC, who can raise any concerns from Airside Retail Park if necessary. The public will be provided with advanced warning of any proposed diversions and disruption through signage on site and continuous updates on construction progress on the project website. |  |
| 12                                                                                                                                                                                        | Grounds of submission, 3. Access to Airside Retail Park Through Construction and Traffic Management (page 8 of the Submission) | 15       | It is noted that the alternate access route (via the L2305 I Nevinstown Lane and the R125 onto the R132) will also traverse a roundabout which is due to be subject to significant construction works during the implementation of MetroLink. This gives rise to a risk of the access to Airside Retail Park being curtailed for a significant period.<br><br>It is requested that revised temporary access arrangements are prepared and proposed which will ensure that access in both directions will be maintained at all times from the Dublin Road / R132 to Airside Retail Park. This should be feasible through appropriate temporary arrangements and phasing arrangements for the construction of this section of the project. Our client's consulting engineers, Roughan O'Donovan, have set out further details in this respect attached to this submission as Appendix 1. | Please refer to response item (11) above in relation to the proposed traffic management at Airside Retail Park.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |  |

DUBLIN |                                                                                                      |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 13                                                                                                                                                                                        | Grounds of submission, 4. Signage, Fencing and Associated Matters (page 8 of the Submission)         | 15       | Finally, the Railway Order application is lacking in necessary information and detail in respect of the temporary and permanent provision of and positioning of signage for the retail park in the vicinity of the Dublin Road / R132, Nevinstown Lane junction during construction and post-construction.<br>It is submitted that it is essential that this detail is included as part of the Railway Order. Signage is critical to the commercial operations of the retail park and for wayfinding and to clearly identify the retail park both during and post-construction.<br>There are two existing signs (a totem sign and a lower level sign) along the frontage of the retail park to the R132, in the absence of a clear strategy for the provision of replacement signage both during construction and post-construction, the removal or relocation of these signs could impact negatively on the operation of the retail park.<br>Therefore, it is important that both temporary and permanent signage arrangements be included within the Railway Order to ensure that appropriate signage will be put in place at all times during and post construction. | Through consultation with the submitter, TII agree that there a requirement for such signage to be provided. Temporary and permanent positioning of signage for the retail park in the vicinity of the Dublin Road / R132, Nevinstown Lane junction will be developed with the appointed contractor at the detailed design and construction stage.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| 14                                                                                                                                                                                        | Grounds of submission, 4. Signage, Fencing and Associated Matters (page 8 of the Submission)         | 15       | In addition, our client requires further information on the perimeter fencing proposed during construction and post- construction and boundary demarcation.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | As presented in Section 5.4.5 of the EIAR Chapter 5 (MetroLink Construction Phase), site hoarding/fencing (2.4m in height as a minimum) and gates to ensure that the sites are secure will be installed at each of the construction compounds, including Fosterstown Station Compound.<br><br>To meet the security requirements, a 600mm high concrete parapet will be provided along the retained cut sections of the MetroLink route to act as the vehicle restraint system with a 1200mm Meshweld fence on top of the parapet. This will result in an overall fence height of 1800mm. This arrangement is proposed where the fence is outside the vehicle restraint system clear zone of a road but there is still a potential risk from errant vehicles.<br><br>Further information on the permanent fencing and boundary treatments can be found in EIAR Chapter 4 (Description of the MetroLink Project), Section 4.12.9. As presented in the EIAR Chapter 4, Table 4.8, 1.8m high boundary wall with H4a containment will be permanently provided along the retained cut section from Fosterstown to the L2305 into the Airside Retail Park. Suitable finishes will be adopted for the barrier. The precise details of the façade will be determined at the next design stage.<br><br>Other details on fencing and boundary treatments applicable to Fosterstown to DANP section, including Airside Retail Park, are presented in Table 4.8 of the EIAR Chapter 4 (Description of the MetroLink Project). |
| 15                                                                                                                                                                                        | Grounds of submission, 5. Façade treatment following demolition of Unit 1 (page 9 of the Submission) | 17       | As noted previously, the alignment and layout of the MetroLink development gives rise to the requirement for the demolition of Unit 1 within Phase 1 of the Airside Retail Park (currently occupied by Smyths Toys and Starbucks).<br>This will result in the dividing wall with the next-door unit being exposed. It is noted that the resulting exposed wall will be highly visible from the R132, the Retail Park, and from the proposed MetroLink station. Therefore it will be required to provide for high-quality façade treatment to this frontage. The provision of high quality façade treatments at this location should form part of the MetroLink project and should be conditioned as part of any Railway Order granted for the project.                                                                                                                                                                                                                                                                                                                                                                                                                  | TII confirm façade treatments will be provided at this location to match the existing building fabric finish.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| 16                                                                                                                                                                                        | Conclusion (page 9 of the Submission)                                                                | 17       | There may be other detailed matters which will require further clarification and information from TII as they relate to the interface of the project with the operation of Airside Retail Park. Our clients wish to reserve their position in this respect.<br><br>Our clients also wish to request that an Oral Hearing is held in respect of the Railway Order application so that the points raised within this submission can be further clarified and addressed at the hearing for the benefit of all parties.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | Please refer to the response to Item (1) above in relation to the Oral Hearing process.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |

| Submission No.                                                                                                                                                                            |                                                                                |          | 125                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |  |

| RE: RAILWAY (METROLINK-ESTUARY TO CHARLEMONT VIA DUBLIN AIRPORT) ORDER 2022, SUBMISSION ON THE METROLINK RAILWAY ORDER APPLICATION IN RELATION TO AIRSIDE RETAIL PARK, SWORDS, CO. DUBLIN |                                                                                |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |  |
| 17                                                                                                                                                                                        | Appendix 1, General Comments (page 1 of Technical Note on Access               | 21       | More detailed localised traffic analysis should be carried out using weekend traffic data at the junctions surrounding Airside Retail Park to ensure that the temporary traffic management proposals can accommodate the peak traffic volumes.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | Weekend traffic volumes are expected to be similar to those recorded at the PM peak and so no further analysis is deemed necessary. Traffic modelling of the traffic management proposals during the construction phase has assessed both the AM and PM peaks. The assessment also utilises the busiest year for the construction generally being the period of peak bulk excavations for the stations. Therefore, traffic modelling presented in Appendix A9.5 Scheme Traffic Management Plan presents a worst-case scenario assessment of impacts.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |  |
| 18                                                                                                                                                                                        | Appendix 1, Nevinstown Signalised Junction (page 2 of Technical Note on Access | 22       | <p>Residual impacts are described in the report as impacts which cannot be further reduced or remediated. Severe residual traffic impacts of this magnitude for an extended period would be of concern, as they could impact on the operation of Airside Retail Park, which is dependent on vehicular access for trade.</p> <p>Further reduction of impacts or remedial actions are considered feasible. Potential solutions that should be investigated include:</p> <p>i. Split phase 1 of the Nevinstown Signalised Junction Traffic Management Plan into several phases, allowing the cut and cover section of the Nevinstown Lane crossing to be completed in two or more parts, while maintaining two-way traffic between Nevinstown Lane and R132 Dublin Road.</p> <p>ii. Use the area for the Nevinstown Lane Construction Compound (circled below) to provide a two-way access road and a full movement three-arm signalised junction with the R132 Dublin Road, i.e. creating a staggered crossroads.</p> <p>iii. Reduce the size of the Fosterstown Compound to provide a two-way access road and a full movement three-arm signalised junction with the R132 Dublin Road.</p> | Full access is consistently maintained to Airside due to the staggering of construction at Nevinstown and Pinnockhill junctions with the longest diversion at Nevinstown Junction found to be 1.5km, Section 5.5.6.2.3.2 of Appendix A9.5 Scheme Traffic Management Plan. Please refer to response item (11) above in relation to the proposed diversion and the proposed mitigation measures to reduce the severity of the impact.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |  |
| 19                                                                                                                                                                                        | Appendix 1, Nevinstown Signalised Junction (page 3 of Technical Note on Access | 23       | b. Phase 2 of the main works traffic management plan at Nevinstown Signalised Junction restricts turning movements onto Nevinstown Lane with traffic likely to divert onto R132 Dublin Road and R125 Pinnockhili. The cumulative impacts on accessibility to Airside Retail Park from the restricted turning movements at Nevinstown Signalised Junction and the additional traffic loading from diverted traffic onto Pinnock Hill Junction and R125 and L2305 Junction have not been adequately addressed in the Construction Traffic Management Plan. These impacts are likely to be severe as the Pinnock Hill Junction and the R125 Pinnockhill / L2305 Junction are currently at or exceeding capacity at peak times, and any significant diversion of traffic onto these junctions without mitigation measures will result in gridlock.                                                                                                                                                                                                                                                                                                                                            | <p>TII to do not agree that "cumulative impacts on accessibility to Airside Retail Park from the restricted turning movements at Nevinstown Signalised Junction and the additional traffic loading from diverted traffic onto Pinnock Hill Junction and R125 and L2305 Junction have not been adequately addressed". The full assessment of impacts to traffic in and around the Airside Retail Park as a consequence of the MetroLink Project proposal on the Nevinstown Signalised Junction are set out in section 5.5.6.2.2. of Appendix A9.5, Phase 2 TTM (Temporary Traffic Management).</p> <p>The plans detailed and assessed recognise severe impacts to general traffic access, if unmitigated. However, it is proposed that these impacts are mitigated through a short diversions to Pinnock Hill Roundabout, resulting in a diversion of approximately 1.5km. Moderate impacts on commercial/parking and public transport are also acknowledged, however access to businesses and properties will be maintained throughout the works. Any impact to public transport services will be mitigated through TII coordination of requirements with Bus Eireann and Dublin Bus for route diversions. As such, accessibility to and from Airside Retail Park has been thoroughly assessed, with access maintained throughout the construction works for all road users.</p> <p>The Nevinstown Signalised junction will be returned to its existing state with full access reinstated on completion of the MetroLink Works.</p> |  |
| 20                                                                                                                                                                                        | Appendix 1, Pinnock Hill Junction (page 4 of Technical Note on Access          | 24       | <p>Severe residual traffic impacts of this magnitude for an extended period would be of concern, as they could impact on the operation of Airside Retail Park, which is dependent on vehicular access for trade.</p> <p>Further reduction in traffic impacts or remedial actions are considered achievable. Potential solutions which should be investigated including:</p> <p>a. Split Phase 2 of the Pinnock Hill Junction traffic management plan into several phases, allowing the cut and cover section of the R125 crossing to be completed in two or more parts. An additional phase could be added which provides a temporary full access signalised junction where the left in and left out is currently proposed while the cut and fill across the R125 south arm is constructed. The area within the red line boundary circled in purple in the image below could be used to connect the temporary two-way access to the R125. A second additional phase could reinstate the permanent signalised junction layout while the remaining cut and cover or cut and retain sections of the metro are constructed.</p>                                                               | Please refer to response item (11) above in relation to the maintenance of access to and from Airside Retail Park, and the proposed diversions for general traffic and commercial access. Response item (11) also details the proposed mitigation measures to reduce the severity of the impacts. As set out in section 5.5.6.2.2. of Appendix A9.5, Phase 2 TTM (Temporary Traffic Management) of Nevinstown Signalised junction will return the junction to its existing state with full access reinstated.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |  |

|                                                                                                                                                                                           |                                                                       |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

DUBLIN |                                                                       |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| 21                                                                                                                                                                                        | Appendix 1, Pinnock Hill Junction (page 5 of Technical Note on Access | 25       | b. The closure of the R125 southern arm during phase two of the traffic management plan will divert traffic to the Nevinstown Signalised Junction. The cumulative accessibility impacts to Airside Retail Park considering the severed connection at Pinnock Hill Junction and the additional congestion at the Nevinstown Signalised Junction have not been adequately addressed. The Nevinstown Signalised Junction is currently at capacity and additional loading from diverted traffic is likely to have severe effects on accessibility to Airside Retail Park.                                                                                                                                                                                             | Impacts of the closure of the R125 Southern Arm on the wider network have been assessed and presented in Figure E-141 to E-144 of Appendix A9.5 showing that impact will be greatest on the R132, with impact to L2305 directly serving airside park being minimal with reductions in delay found to occur for vehicles travelling eastbound on L2305. Please refer to response item (11) in relation to the maintenance of access to and from Airside Retail Park, and the proposed diversions for general traffic and commercial access.                                                                                                         |
| 22                                                                                                                                                                                        | Appendix 1, Construction Sequence (page 5 of Technical Note on Access | 25       | <p>It is crucial to Airside Retail Park accessibility that the construction activities at Nevinstown Lane (Airside Junction) and Pinnock Hill Lane Junction do not overlap as per the proposed construction sequence outlined in the Scheme Traffic Management Plan, Figure 5-3, which is copied below.</p> <p>Section 5.1.1 and section 5.1.2 of the Scheme Traffic Management Plan describes that the R132 Connectivity Project and BusConnects should be completed before the MetroLink construction phases commence. Any delay to these projects should be coordinated with MetroLink as an overlap in construction activities and the associated traffic management could result in gridlock on the surrounding road network and at Airside Retail Park.</p> | <p>Any delays in the MetroLink programme or other relevant projects will be monitored throughout the project.</p> <p>As noted in Appendix A9.5 Scheme Traffic Management Plan, all construction works in the north section have been developed and phased with the aim of avoiding simultaneous road diversions and/or closures at the four major junctions along the R132 Swords Bypass.</p> <p>As outlined in EIAR Appendix A5.1 Outline CEMP, a Project Construction Traffic Forum will be established with representatives from key stakeholders to maintain engagement throughout the construction phase and monitor the ongoing impacts.</p> |

| Re: Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022. Case Reference Number NA29N.314724. 22/11/22 |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| 1                                                                                                                         | Letter       | 1        | Firstly, in general, I am in favour of the broad aim of the Metrolink project to connect Dublin's city centre to our national airport. However, as a resident living in the Dartmouth/Charlemont area, I wish to set out a number of observations for the Board regarding the proposal to locate the Terminus station at Charlemont-Dartmouth. My family home is in the midst of the community where the Terminus station is proposed to be located. | Thank you for taking the time to make a submission and your overall endorsement of the MetroLink Project. We have reviewed your submission and responded to the observations made below.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| 2                                                                                                                         | Letter       | 1        | I believe Charlemont is the incorrect strategic location for a Terminus hub and spoke system as it is too far out along the Luas Green Line spoke and would prejudice future options for integration of networks and services.                                                                                                                                                                                                                       | <p>TII do not agree that Charlemont is the incorrect location for an interchange with the Luas Green Line or that it prejudices future options for integration with the wider transport network for the reasons set out below. The Board is required to have regard to the likely consequences for proper planning and sustainable development in the area in which it is proposed to carry out railway works (section 43(1) of the 2001 Act) and as such the following matters are relevant.</p> <p>The connection from St Stephens Green to Charlemont / Ranelagh is supported by the current Transport Strategy for Greater Dublin Area (2022-2042). The Transport Strategies were prepared by the National Transport Authority, scrutinised by the Joint Oireachtas Committee on Transport and approved by the Minister for Transport. It notes in section 12.3.2, "Charlemont offers the optimal location for the primary interchange with the Green Line in response to growing demand in the longer term and is an appropriate location to facilitate any potential future metro extensions to serve the south west, south or south east of the city region should sufficient demand arise."</p> <p>The Transport Strategy is "a consideration material to the proper planning and sustainable development of the area or areas in question." Development Plans are required to be consistent with the Transport Strategy. The Dublin City Development Plan 2022-2028 envisages this station at Charlemont in policy SMT22 "To support the expeditious delivery of key sustainable transport projects so as to provide an integrated public transport network with efficient interchange between transport modes, serving the existing and future needs of the city and region and to support the integration of existing public transport infrastructure with other transport modes. In particular the following projects subject to environmental requirements and appropriate planning consents being obtained: MetroLink from Charlemont to Swords".</p> <p>Accordingly, the location of the Charlemont station was a strategic decision made at the highest levels of transport and land use planning and as such is fully consistent with the proper planning and sustainable development of the area.</p> <p>The current Transport Strategy considers a range of options for the onward extension of MetroLink to meet the demand for travel over the period of the strategy. This includes consideration of the need for the upgrade of the Luas Green Line to metro with a metro extension to Dublin south west, south or south east. Whilst the strategy envisages that further extensions will be delivered after 2042, MetroLink which terminates at Charlemont allows for the possible extension of the metro in all any of the above directions.</p> <p>The Transport Strategy considers a range of options for the onward extension of MetroLink to meet the demand for travel over the period of the strategy. This includes consideration of the need for the upgrade of the Luas Green Line to metro with a metro extension to Dublin south west, south or south east. Whilst the strategy envisages that further extensions will be delivered after 2042, MetroLink which terminates at Charlemont allows for the possible extension of the metro in all the above directions.</p> <p>The proximity of the metro to the Luas line at Charlemont provides for a positive customer experience for all users with short interchange distance and due to the proximity, clear wayfinding and high visibility of the interchange. The interchange arrangements at Charlemont provide for significantly better interchange arrangements compared to an alternative interchange at St Stephen's Green Station.</p> |

| Re: Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022. Case Reference Number NA29N.314724. 22/11/22 |              |          |                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
|                                                                                                                           |              |          |                       | <p>The detailed analysis done for the Railway Order application further confirms that the section of MetroLink route between St Stephen's Green and Charlemont Stations contributes significantly to the overall benefits of the scheme. It serves a significant area of the south city of Dublin and offers enhanced access from the local area to the city centre and a direct connection to Dublin Airport. It serves key trip attractors including residential areas and offices / workplace locations, with high passenger boarding and alighting figures in the peak hours. During the morning peak, at Charlemont station the flows include 1,800 passengers alighting, 2,300 boarding and 1,229 passengers alighting, 2,276 boarding during the evening peak. The passenger numbers contribute significantly to the overall benefits of the scheme and the effect of these benefits outweigh the additional costs that are associated with the delivery and operation of the section from St Stephen's Green to Charlemont station. Further information is available in Chapter 7: Consideration of the Alternatives, section 7.7.8 MetroLink Southern Terminus Location.</p> <p>The location of the interchange at Charlemont does not preclude onward extension south. An interchange at Charlemont is supported by policy including the Dublin City Development Plan 2022 - 2028 and the Transport Strategy for the Greater Dublin Area. As noted by the GDA Transport Strategy 2022-2042, section 12.3.2, "Charlemont offers the optimal location for the primary interchange with the Green Line in response to growing demand in the longer term and is an appropriate location to facilitate any potential future metro extensions to serve the south west, south or south east of the city region should sufficient demand arise."</p> <p>By extending MetroLink to Charlemont it provides for future proofing of the Green Line, bypassing the capacity constrained Luas on-street running section, and ensures potential future connectivity options are enabled, either to the Green Line or for extensions of the metro. The Charlemont Station interchange provides for increased passenger utilisation of the MetroLink system, thereby increasing the benefits delivered by the Project, reflected by an improved Project Benefit Cost Ration (BCR).</p> |

Case Reference Number NA29N.314724. 22/11/22 |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| 3                                                                                                                         | Letter       | 1        | St. Stephens Green is the most appropriate location as it provides for interchange with bus, Luas and future DART underground. The project incorrectly dismisses St. Stephens Green West as an appropriate terminal station. It only considers St. Stephens Green East and Charlemont. Furthermore, no comprehensive study or investigation has been completed by NTA/TII as part of the entire Metrolink project on the optimal location for a city-centre terminus. | <p>TII do not agree that St Stephen's Green is the most appropriate interchange location for the reasons set out by response (2) above.</p> <p>It is not correct to say that the Project "only considers St. Stephens Green East and Charlemont." A number of route options were considered in the process of identifying the Emerging Preferred Route (EPR). These route options included potential station locations on St. Stephen's Green West. A station on St Stephen's Green West is not preferred for several reasons. If a station was placed on St Stephen's Green West, the alignment between the proposed Tara Station and a station on St Stephen's Green West would result in an undesirable horizontal reverse curve and an alignment greater than a 1000m long that would necessitate an intermediate intervention shaft located somewhere between these stations to comply with the MetroLink Fire Strategy. Additional construction would be required to provide such a facility, similar in size to the proposed Albert College Park Intervention shaft. This could feasibly be situated in the Trinity College Dublin sports grounds.</p> <p>TII note that it is Government policy to provide a station and interchange with the Luas Green Line at Charlemont, as set out by the GDA Transport Strategy 2022 – 2042. Should a station be placed on St Stephen's Green West, the alignment between a station located here and the proposed Charlemont Station would also result in an undesirable horizontal reverse curve and an alignment that is greater than 1000m long, and would thus again require an intervention shaft similar to the proposed Albert College Park Intervention shaft to be provided. This would be expected to result in significant demolition and redevelopment in an existing built-up area. In both cases, compared to the proposed alignment that runs much more directly between Tara, St Stephen's Green and Charlemont, the additional length of tunnel and the addition of two intervention shafts generated by locating a station on St Stephen's Green West is uneconomic in comparison.</p> <p>As a potential station location, St Stephen's Green West itself is a very constrained location due to the presence of buildings, Luas and St Stephen's Green Park. Maintaining the Luas operational during station construction would be complex and challenging with significant disruption expected, whilst the impacts on St Stephen's Green Park would be greater for a station in this location compared to the proposed location on St Stephen's Green East. This would be the result of; the likely need to place more of the station in the Park compared to the proposed station on St Stephen's Green East; it would impact an area of the Park that has greater amenity value than St Stephen's Green East due to the nearby Park entrance adjacent to the southern end of Grafton Street, and there would be a risk of impacting the existing Park lake.</p> <p>In summary, an alignment that links the proposed Tara, St Stephen's Green East and Charlemont stations is a more direct and economic alignment, does not require additional intervention infrastructure, avoids a complex engineering interface with the Luas Green Line, impacts the Park less and has less potential for disruption during the construction phase.</p> |

| Re: Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022. Case Reference Number NA29N.314724. 22/11/22 |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |  |
|                                                                                                                           |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | <p>As outlined by EIAR Chapter 3, Background to the MetroLink Project, one of the key objectives of the Project is the integration of it with the wider transport network that also includes for BusConnects and DART+ which are all included under Project Ireland 2040. Together, these projects will result in a reliable, sustainable, affordable, integrated public transport network that will support the economy, help Ireland meet its climate change targets in line with Climate Action Plan 2023 and make Dublin a more liveable and sustainable city.</p> <p>Arising from the decision to postpone the future upgrade of the Green Line to metro services, it is being argued that Charlemont station effectively becomes a terminus station in the short to medium term. In this regard, it is true to say that the Metrolink trains will terminate and turn back at Charlemont station, however the public transport service offering for passengers does not terminate, it transfers from Metrolink to LUAS as part of the integrated transport network.</p> <p>The terminus station for MetroLink is located at Estuary where all of the activities normally associated with a terminus (train sideways, car parking etc) take place. At this location the high capacity public transport offering terminates and the public transport offering transfers to a completely different mode, i.e. Bus or car . The environmental effect of the Metrolink terminus are accordingly assessed in the EIAR. Charlemont Station does not have the associated infrastructure and services associated with a terminus location and in fact has more in common with a “system turn back location”. Charlemont Station is located within an area of high public transport accessibility, linking with the Luas Green Line which offers reasonably similar levels of services and frequency for journeys to and from the south of Dublin. As such, public transport service offering is not considered to terminate, but transfers onto the similar service offered by the Luas Green Line, forming part of a transport corridor running from Cherrywood to Estuary. The associated environmental impacts for the turnback and station at Charlemont have been fully assessed in the EIAR.</p> <p>Charlemont station itself was chosen on the basis of its interchange potential with Luas, as well as local bus services, as outlined above. The section of the line between St Stephen's Green and Charlemont generates considerable benefits for the scheme in terms of increased patronage as referred to in response (2) above. Operationally, the Station will see people moving quickly in and out of the area, noting that it will act as an interchange, and has been deliberately designed with minimum set down space or room for taxis so that it does not encourage the Station to be used as a terminus. All operational environmental impacts are mitigated so they are not significant, while the impact on amenity will be permanent and positive.</p> <p>If the scheme were to terminate at St Stephen’s Green, it would be inconsistent with the GDA Transport Strategy 2022-2042. The proposed route alignment from Estuary to Charlemont is consistent and compliant with the GDA Transport Strategy 2022-2042 (published in January 2023) in which states that the south city terminus at Charlemont offers the optimal location for interchange with the Green Line in response to growing demand in the longer term and is an appropriate location to facilitate any potential future metro extensions to serve the south west, south or south east of the city region should sufficient demand arise.</p> |  |
| 4                                                                                                                         | Letter       | 1        | <p>Requested amendment to An Bord Pleanála:</p> <p>I request the following amendments:</p> <p>1. Omit from the Railway Order the section from Tara Street Station to Charlemont Station and associated onward tunnel extension and intervention tunnel.</p> <p>2. Require the submission of a Railway Order for a section from Tara Street Station to St Stephens Green which would effectively provide for a terminal hub station that can integrate with the Luas Green Line, multiple bus routes and future DART underground.</p> | <p>The above responses to the observations made explain why TII do not consider it is correct or appropriate that the MetroLink alignment south of the proposed Tara Station should be omitted, and also demonstrates why the proposed Charlemont Station has been selected by TII as the preferred interchange with the Luas Green Line</p> <p>A scheme which terminates at Tara Street would not be consistent with the Transport Strategy for Greater Dublin Area (2022-2042). In addition any decision to terminate the scheme at Tara will significantly impact on the overall viability and benefits of scheme.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |  |

| Observation; TII “Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022” |                                                  |          |                                                                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| 1                                                                                          | Introduction                                     | 1        | <p>The Metrolink Railway Order 2022 highlights possible strategic gaps that could be considered vital for the development and future connectivity with Irelands Premier Gateway - Dublin Airport.</p> <p>Treated in isolation, this RO has the potential to curtail the development and expansion of Dublin Airport.</p>      | <p>The proposed project is identified as a key infrastructure project to serve Dublin Airport in National, Regional and Local policy. MetroLink will integrate transport and land use planning as set out in Chapter 4 (Description of the Metrolink Project) to allow for the future development and expansion of the airport. MetroLink will not curtail future development at Dublin Airport, rather it will enable future development potential. TII will work closely with daa to encourage development over and adjacent to the MetroLink alignment to the benefit of Dublin Airport and the MetroLink scheme.</p>                                                                                                                                                                                                                      |
| 2                                                                                          | Executive Summary                                | 1        | <p>1 . Long term Western Airfield Campus development has been overlooked.</p>                                                                                                                                                                                                                                                 | <p>The proposed Dublin Airport station will be located within the ground transportation hub area in the airport campus. The station entrance will be located close to both Terminal 1 and Terminal 2, which will facilitate rapid connections between the terminals and the Metro service.</p> <p>The MetroLink station location is consistent with the Metro stop identified in the Dublin Airport Masterplan, prepared by daa for the growth and expansion of its facilities into the future, which specifically identifies the station location at the Ground Transportation Hub.</p> <p>Development at the western side of the airport is considered within the Dublin Airport Masterplan as part of the long term expansion proposals and the Proposed Project would not inhibit the ability to connect to this area of the airport.</p> |
| 3                                                                                          | Executive Summary                                | 1        | <p>2. The Dublin Airport Station and platforms may not meet future demand.</p>                                                                                                                                                                                                                                                | <p>Dublin Airport station was sized to accommodate peak future AM and PM weekday flows. These were forecast for 2057/2060, and assumed up to 55 mppa scenario at the airport (with a defined split between transfer and local access and distribution of airport demand across the day). Forecasts were then uplifted by +25% to allow for potential growth beyond the forecast year, up to the 20,000 passenger per hour per direction capacity of the line</p> <p>In addition, Bentley’s Legion Spaceworks was used to review the potential passenger movements for 2057/2060 to identify if there was any potential for congestion at the proposed station. The analysis identified that the proposed layout is shown to offer acceptable performance levels for both the 2057 during both the AM and PM peak hours.</p>                   |
| 4                                                                                          | Executive Summary                                | 1        | <p>3 . MetroLink should not restrict Terminal expansion nor the subterranean APM (Automatic People Mover) adjacent to the Metrolink Line.</p>                                                                                                                                                                                 | <p>As noted in response item (2) above, the station location is entirely consistent with the proposals as set out in the Dublin Airport Masterplan and will not restrict Terminal expansion. The daa’s Masterplan does not include for an Automatic People Mover.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| 5                                                                                          | 1) Long term Western Airfield Campus development | 1        | <p>However, the fact remains that the Metrolink Planning Report gives absolute clarity with respect to “proposals for the western parts of the airport campus”. The FCC Local area development plan objective PT6 “is not applicable” - therefore by deduction, airport capacity expansion plans have not been addressed.</p> | <p>OBJECTIVE PT06 of the Dublin Airport Local Area Plan 2020 states the following "Investigate and provide for connections from the western parts of the airport campus to MetroLink, in the context of potential future planned development to the west of the existing terminals."</p> <p>Integrated connections from the MetroLink station to the existing airport terminals does not form part of this Railway Order application. However, should a future terminal be developed at the Western Campus of Dublin Airport, then the current alignment and design does not preclude a connection to that site as needs arise. TII will work with daa re. integrated connections to the terminals to accommodate potential connections in the future as may be required.</p>                                                                 |

| Submission No.                                                                             |                                                                                                                                       |          | 127                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                                 |  |

| Observation; TII “Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022” |                                                                                                                                       |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                                                                 |  |
| 6                                                                                          | 1) Long term Western Airfield Campus development                                                                                      | 2        | In both our TII Metrolink submissions we highlighted a requirement to future proof a Metrolink connection to the Western Campus. However, this 2022 RO lacks such future proofing connectivity between the Eastern & Western Campus. The East shall be served by an in line Metrolink whilst the West will be served by the existing road network. An oral hearing could explore the content of the “49 consultations” held between the DAA and TII and determine if a future proofing omission linking both Campuses is indeed an anomaly or deliberate?                                                                                                                                                                                                         | Please refer to response item (5) above in relation to the western part of the airport campus. Should a future terminal be developed at the Western Campus of Dublin Airport, then the current alignment and design does not preclude a connection to that site as needs arise. |  |
| 7                                                                                          | 1) Long term Western Airfield Campus development                                                                                      | 2        | S&T believe a Park & Ride adjacent to Dardistown, with future proofed local link (to the western campus) would alleviate pressure on the M5 O/M 1 /Airport Roundabout.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | Provision of park and ride facility is governed by the NTA Park and Ride Strategy: Greater Dublin Area 2021 which does not recommend a P&R location at Dardistown - hence is not deemed suitable for this area.                                                                 |  |
| 8                                                                                          | 2) The Dublin Airport Station and platforms may not meet future demand?                                                               | 3        | The DAA long term airfield masterplan (known to FCC) caters for 50mppa. The DAA assumes all 50 million passengers will be processed from the Eastern Campus which, is currently capped at 32mppa by ABP. Therefore, it's not unreasonable to ask at what stage in DAA expansion does TII anticipate when the 65m Dublin Airport Station platform length could become limiting? As TII and the NTA are unaware of Western Campus development (incorporating a large-scale satellite Pier), an Oral Hearing could determine the suitability of Dublin Airport Station with respect to platforms, internal capacity limits, connections with current and future terminals, and interference with surface vehicular traffic within the GTC (Ground Transport Centre). | Please refer to response to Item (3) in relation to the capacity of the proposed station at Dublin Airport.                                                                                                                                                                     |  |
| 9                                                                                          | 3) Metrolink should not restrict Terminal expansion nor the subterranean APM (Automatic People Mover) adjacent to the Metrolink Line. | 3        | To enable increased passenger processing, the DAA shall have a requirement to expand or replace existing ageing Terminals. As stated, the DAA masterplan has a requirement to process up to 50mppa from the Eastern Campus. Therefore, will TII Metrolinks RO alignment curtail DAA development plans?                                                                                                                                                                                                                                                                                                                                                                                                                                                            | The Proposed project will not curtail the future development potential within the airport campus, as noted in response item (1) and (2) above.                                                                                                                                  |  |
| 10                                                                                         | 3) Metrolink should not restrict Terminal expansion nor the subterranean APM (Automatic People Mover) adjacent to the Metrolink Line. | 3        | In our submission to ABP PL06F.247299, we sought to protect future Terminal expansion and an APM between T1 and T2 by proposing a Metrolink Station East of the T2 MSCP. However, the Metrolink alignment now rests adjacent to and within the GTC. This alignment may now pose challenges or restrict DAA Terminal expansion and screened passenger APM movement. Prior to any notional T3 development, both our Metrolink submissions and indeed the DAA masterplan show a requirement for a satellite Pier on the Western campus. To link a satellite Pier to T1&T2, an APM (Automatic People Mover) shall be required. Therefore, Metrolink cannot be allowed to impede this vital link, otherwise Airport expansion shall be in peril.                       | The Proposed project will not curtail the future development potential within the airport campus, as noted in response item (1) and (2) above.                                                                                                                                  |  |
| 11                                                                                         | 3) Metrolink should not restrict Terminal expansion nor the subterranean APM (Automatic People Mover) adjacent to the Metrolink Line. | 3        | Gaining knowledge from Zurich Airport APM (from the main terminal to its Satellite Dock E), S&T T1&T2 subterranean station is perpendicular to the current Metrolink line with turn back crossing over the Metrolink Line. Whilst The DAA concept drawing has a subterranean station with turn back running under terminal 1. Either way, DAA Pier and terminal replacement and expansion to 50mppa and APM construction shall be required on top of the proposed Metrolink tunnel.                                                                                                                                                                                                                                                                               | This is an issue relating to future extensions to Terminal 1 for DAA and cannot be addressed by TII                                                                                                                                                                             |  |

| Submission No.                                                                             |                                                                                                                                       |          | 127                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |

| 12                                                                                         | 3) Metrolink should not restrict Terminal expansion nor the subterranean APM (Automatic People Mover) adjacent to the Metrolink Line. | 4        | Enabling works to protect Charlemont Station have already been carried out by Haines. Therefore, enabling works maybe required by the DAA to allow Terminal expansion on top of and without damaging the RO Metrolink alignment? To mitigate against these additional costs, should the DAA and TII reconsider the S&T’s Station proposal East of T2 MSCP?                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | The MetroLink station box can facilitate oversite and adjacent development to allow for future terminal expansions. TII will work closely with daa to facilitate such expansion plans when they emerge.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 13                                                                                         | ABP request                                                                                                                           | 4        | We refer TII and ABP to Alignment Drawing ML-RO-302 D-E specifically cross section drawing AA. Similar to Zurich Airports APM design, in order to ensure a subterranean APM station box between T1&T2 at LEVEL-1 (perpendicular to and on top of the Metrolink line) we request that ABP safeguards this critical future APM. TII could therefore be asked to deepen the southbound tunnel (from the Dublin Airport station) towards section AA.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | The MetroLink will not constrain the development of a subterranean APM. TII will work closely with daa when plans for such a service emerge.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| 14                                                                                         | Conclusion                                                                                                                            | 4        | Metrolink when operational, will in theory ease current vehicular access pressures to the Eastern Campus. However, an in-line Dublin Airport Station lacking a local Metro link network link (between both campuses) does not bode well for increased additional congestion on the M1/M50.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | TII would like to note that the Dublin Airport station has been designed with sufficient capacity to meet future passenger demands (based on DAA passenger growth predictions). TII are not in a position to comment on internal connections between the proposed MetroLink station and other areas of the airport.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

An overview of the Oral Hearing process is provided in the EIAR Chapter 8.9.2. An Bord Pleanála may, at its absolute discretion, hold an oral hearing on the Railway Order application and has indicated its intention to do so. The purpose of the oral hearing will be to allow issues relevant to an application for approval be examined. The oral hearing can be attended by anyone, and will be managed by the An Bord Pleanála. IALPA will be entitled to be represented at that oral hearing. Please refer to our previous responses relative to the issue raised concerning restricting future development, see 1 and 2 above.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| 16                                                                                         | Public Consultation: Metrolink “Emerging Preferred Route March 2019”, Status - Dublin Airport Station                                 | 6        | <p>It would appear that at "Emerging Route Stage" the NTA seeks no changes to this crucial Airport Station, in that Ireland's International Gateway Hub Airport shall be designated an in line station.</p> <p>Consequently International passengers will experience serious restrictions and barriers in accessing rail transport by having to initially compete with passenger disembarking Trams. Thereafter enter occupied Trams with luggage to avail of whatever remaining tram space remains if:</p> <p>A) Heading Northbound - Compete with Commuter Belt customers exiting the City.<br/>B) Heading Southbound - Compete with Commuters originating from Irelands most populous/ expanding region (Fingal), a 3000 Space Park and ride facility at Estuary, and possibly with a long term interchange/ transfer to the commuter Northern Line (Thus allowing NE Coast and Northern Ireland residents a Heavy Rail / Metrolink interchange connection to Dublin Airport).</p> <p>As Metrolink is supposedly comparable to Barcelona Airport Line 9, we trust that Dublin Airport Station should have, in addition to Estuary, a Terminus Status. Therefore, an opportunity may be lost by the NTA (At Emerging Route Stage) to upgrade this Station to, in IALPA's view, to Terminus Status.</p> <p>However we deem it important to highlight that at Emerging Route Sheet 6 “Northern Tunnel Portal and Intervention Shaft” there may still be an NTA opportunity to add a tram storage/ Turnback facility because presently this is not detailed (at Sheet 6). We respectfully ask that the NTA review this suggestion.</p> | <p>Please refer to response item (3). As noted, the capacity of MetroLink and the Dublin Airport Station has been designed to facilitate passenger demand from the Airport up to 2060. Appendix A9.2-D presents a Traffic and Transportation Assessment of Dublin Airport Station. In recognition of the potentially complex routing and road crossing behaviour at this site, a pedestrian VisWalk model was produced for the area surrounding the station for the Opening Year. In summary, the microsimulation model for Dublin Airport performs well with no areas of excessive congestion or bottlenecks for pedestrians.</p> <p>As detailed in Chapter 6 (MetroLink Operations and Maintenance), due to the significant difference in passenger demand north of Dublin Airport, a double-loop system may be in operation combining a long loop and a short loop as follows:<br/>* Long Loop - Estuary to Charlemont; and<br/>* Short Loop - Dublin Airport to Charlemont.</p> <p>During off-peak periods a double loop service will be provided. This will result in a greater frequency of trains serving Dublin Airport. This flexibility in the service pattern allows for the more efficient operation of the system with trains running more frequently where and when demand is greatest. The terminus station for MetroLink is located at Estuary where all of the activities normally associated with a terminus take place. As above, a short loop service is proposed, and therefore it is true to say that the MetroLink trains will 'terminate' and turn back at Dublin Airport station. However, Dublin Airport Station does not have the associated infrastructure and services associated with a terminus location. Therefore, Dublin Airport station will not be acting as a terminus station.</p> |

| 17                                                                                         | Public Consultation: Metrolink "Emerging Preferred Route March 2019", Tunnel Design                            | 7        | Since the NTA has elected to develop a single Bore Tunnel design we recommend the following simple split North of the Dublin Airport Station or Alternatively construct a Turn back at Emerging Route "Sheet 6" with an additional Mine for future expansion capability just North of the Airport Station to eventually serve the Western Campus / T3 Terminus?                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | MetroLink has been designed as submitted in the RO to facilitate predicted passenger capacity up to 2060. The design does not require a turn back at Dublin Airport station. In addition should a future terminal be developed at the Western Campus of Dublin Airport, then the current alignment and design does not preclude a connection to that site as needs arise.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |  |
| 18                                                                                         | Public Consultation: Metrolink "Emerging Preferred Route March 2019", Station Platform design - Egress & Entry | 9        | <p>Trams should therefore provide:</p> <ul style="list-style-type: none"><li>• An efficient design providing maximum passenger safety,</li><li>• Efficiency of operation at the design rate of 30 trams per hour.</li><li>• Minimum Station way-finding restrictions for impaired passengers and those unfamiliar with Dublin Airport.</li><li>• Ideally designated "Airport only Trams" should have dedicated Luggage storage facilities akin to the dedicated Dublin Bus Airport service.</li></ul> <p>In order to safely provide for both egress and entry at this in line station then segregation of passengers (Predominately with luggage) may require reconsideration to the adoption of an Island (Exit Only) platform. This safety stratagem of using the outer platforms for Tram entry shall obviously alter the fundamental design/track structure within the Airport Station box.</p> <p>Were this additional Island (triple platform) ease of Tram access / egress proposal be deemed impractical then the NTA may have to consider:</p> <p>A) Our Proposed Terminus Status, whereby airport passengers could avail of empty trams on the platform thus allowing a comfortable one way entry flow onto trams</p> <p>Or</p> <p>B) Make no changes to the Standard in line Platform design, make no provision for Terminus Status and acknowledge that airport passengers with luggage, shall have to endure a contra flow platform melee.</p> | <p>Please refer to Chapter 4 (Description of the MetroLink Project) and Chapter 6 (MetroLink Operations and Maintenance) of the EIAR where the design for MetroLink is presented including details on measures for efficiency, safety, and passenger movement and wayfinding both within and outside the stations. Passenger forecasts together with 'Access for All' design guidelines have been used to design the size and layout of the public areas used by passengers, including the entrances; the escalators, lifts and stairs and the platforms.</p> <p>As detailed in response item (2), the station layout is appropriate for the passenger demand up to 2060. Please refer to response item (16) in relation to the comfort of passenger movements around the station.</p> <p>Please also refer to response item (16) in relation to the frequency of services at Dublin Airport. As above, a short loop service is proposed, and therefore it is true to say that the MetroLink trains will 'terminate' and turn back at Dublin Airport station. However, Dublin Airport Station does not have the associated infrastructure and services associated with a terminus location. Therefore, Dublin Airport station will not be acting as a terminus station.</p> <p>As detailed in Chapter 6 (MetroLink Operations and Maintenance) section 6.4.1, the operation strategy of the proposed Project is driven by the forecasted passenger demand. The peak passenger demand profiles have informed the layout and designs of the stations, ensuring safe and comfortable movements of all users at locations such as the station platforms. Therefore, Dublin Airport station has been designed to accommodate peak passenger profiles, and as such an additional island platform is not required. Please refer to response item (3) in relation to Dublin Airport's capacity</p> |  |
| 19                                                                                         | Public Consultation: Metrolink "Emerging Preferred Route March 2019", Security Considerations                  | 9        | <p>Stating the obvious we trust that:</p> <ul style="list-style-type: none"><li>• The Automated Tram system can be independently securely controlled from both Main and remote back up locations.</li><li>• The secure Metrolink control centre shall have full control of automated Trams, overriding in an emergency, any action initiated on board the Tram.</li><li>• The Automatic transport signalling system shall be protected from cybercrime.</li></ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | As outlined in Chapter 6 (MetroLink Operations and Maintenance) of the EIAR, the system will be managed from an Operational Control Centre (OCC) at Dardistown with a backup OCC also proposed at Estuary. It should be noted that all trains are fully automatic and will be controlled from the OCC. The system will be protected by a high quality IT security system.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |  |
| 20                                                                                         | Public Consultation: Metrolink "Emerging Preferred Route March 2019", Interface with the Airport Complex       | 10       | Whilst Terminals / Metrolink interface is a matter for the DAA we trust that pedestrian access to/from Metrolink shall not restrict nor thwart surface vehicular drop off transport flows entering the Airport Complex.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | The pedestrian modelling undertaken by TII demonstrates that the current proposed at-grade connection between the Station and terminals 1 and 2 permits adequate capacity for vehicles and does not cause unacceptable delays or excessive vehicle queuing for traffic using the Airport, and that such connection provides an acceptable, functioning , efficient and safe Level of Service and route for pedestrians with no excessive queuing or pedestrian crowding or corralling evident for pedestrians travelling to and from the Station.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |  |

| 21                                                                                         | Public Consultation: Metrolink "Emerging Preferred Route March 2019", Expansion capabilities              | 11       | <p>We submit that the combined outstanding decision for both the DAA and the NTA is to define now the eventual location of T3. Given the foregoing we have reviewed our long term integrated transport vision having decided to segregate the traveling public from security screen airline passengers who shall avail of the APM. Hence we now propose that Metrolink should eventually only Link T3 to the Dublin Airport Station.</p> <p>As the DAA shall eventually develop the Western Campus it would be remiss of the NTA not to future proof Metrolink expansion opportunities with the potential of finally developing an airport Terminus i.e On the Western Campus.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | <p>Please refer to response item (1) and (2) in relation to the proposed location for the Dublin Airport Station. TII cannot comment on future expansion plans at Dublin Airport. However it should be noted that MetroLinks current design does not preclude future connections to a Terminal 3 (west campus) location.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| 22                                                                                         | IALPA Safety & Technical, Initial Metrolink Submission, May 2018, Part 1, Comment Sheets 7-10             | 15&16    | <p>Sheet 7 - Dublin Airport North: Alternative Option B: Northwood and Airport indicates a "Depot &amp; Stabling" facility at Dardistown. Were Dardistown designated an underground station then the relocation of the "Depot &amp; Stabling" facility to ideally the construction site at Sheet 7, could allow for a designated Airport Terminus turnaround facility (see Part 2).</p> <p>Sheet 8 - Dublin Airport: Its integration with MetroLink is by far one of the most critical stations on the network. Whilst originally designated as a Metro terminus, this station has over time subtly morphed into an in-line station. We outline our MetroLink concerns for this critical in-line station at Part 2.</p> <p>Sheet9 - Dublin Airport South: In order to alleviate existing M1 access pressure to the Airport, consideration could be given to aligning the Metro at surface grade in the central meridian of the re-aligned dual carriageway. A cost benefit analysis may provide both infrastructures for the same cost to the stand alone bored tunnel option from Dublin Airport South to Northwood.</p> <p>Sheet 10 - Dardistown (Future Station): Whilst a cost benefit study may dictate the ultimate design, we deduce that the indicative "Depot &amp; Stabling" is a moveable piece of associated infrastructure. Hence our comment at Sheet 7 to facilitate an Airport Terminus.</p> | <p>Please refer to response items (1) and (2) in relation to the proposed location for the Dublin Airport Station.</p> <p>Please refer to the MetroLink alignment and details in Chapter 4 (Description of the MetroLink Project) of the EIAR. Chapter 7 (Consideration of Alternatives) provides an overview of the alternatives assessment that has led to the current alignment and design. TII are confident that the alignment and station location at Dublin Airport are the optimum location to service Dublin Airport. It should be noted that a station is being proposed as part of MetroLink at Dardistown which will become an active public station in the future when demand requires. As above in response item (16), a short loop service is proposed, and therefore it is true to say that the MetroLink trains will 'terminate' and turn back at Dublin Airport station. However, Dublin Airport Station does not have the associated infrastructure and services associated with a terminus location. Therefore, Dublin Airport station will not be acting as a terminus station.</p> |
| 23                                                                                         | IALPA Safety & Technical, Initial Metrolink Submission, May 2018, Part 2, Analysis Dublin Airport Station | 17&18    | <p>Presently, two very important report/plans relating to the Dublin Airport gateway are expected during 2018.</p> <p>1) The government commissioned "Irish Airports Capacity Review report* undertaken by Oxford Economics and Cambridge Economic Associates and.</p> <p>2) The Dublin Airport Authority (DAA) Airport Campus Masterplan.</p> <p>IALPA stress to TII and to the “separate study group’ the paramount importance of these reports and for TII to take cognisance of their findings in order to dovetail MetroLink with Ireland’s premier gateway towards 2050.</p> <p>In relation to 2) above one could look on MetroLink as either an asset or indeed a liability to the DAA. An asset, whereby MetroLink delivers domestic and international travellers efficient access io the Airport Campus inner core. Conversely, a DAA liability whereby MetroLink has the potential to i) severely impact on revenues associated with DAA operated car parks and ii) given the predictability of MetroLink travel time reduce planned passenger loiter shopping time airside at the Airport.</p>                                                                                                                                                                                                                                                                                                    | <p>TII are very much of the view that MetroLink will provide an efficient and sustainable link to the core of Dublin Airport thereby improving access to this key gateway. The development of the design for the proposed MetroLink station has been designed to meet future predicted demand arising from Airport growth predictions, as noted in response item (2) and (3).</p> <p>Chapter 3 (Background to the MetroLink Project) details the proposed Project will enhance international connectivity. The proposed Project will improve international connectivity as tourists will be able to arrive at Dublin Airport and then access the rest of the rail network efficiently and effectively, confident in the time their journey will take and when they will arrive. Business travellers will be able to access Dublin City Centre more easily, increasing and improving the likelihood that international businesses will continue to make Ireland their European base of operations.</p>                                                                                                    |
| 24                                                                                         | IALPA Safety & Technical, Initial Metrolink Submission, May 2018, Part 2, International trends            | 17       | <p>We recommend that TII study the London Piccadilly and Paddington service to London’s Heathrow and thereafter strike a balance between the requirements for a Northbound Estuary and /or an Airport service e.g. does an Airport express service from Sandyford have to stop at all enroute stations?.</p> <p>In keeping with international norms we recommend that Dublin Airport Station should be designated a terminus stop with select express route from Sandyford to the Airport. Such trams on this service must cater for larger pieces of luggage as Airport Passenger access to MetroLink (with associated luggage) must be provided for in a safe spacious unrushed platform.</p> <p>The Airport interchange requires extensive scrutiny to ensure its viability to cater as a dedicated Airport service, in that City bound passenger should not compete with Park and ride passenger from Estuary nor the population from north of the airport stop.</p> <p>One must not forget that passenger numbers are expected to increase significantly in the coming decades which further enforced the argument to safeguard a dedicated Airport Terminus.</p>                                                                                                                                                                                                                                       | <p>It should be noted that MetroLink will not progress as far south as Sandyford and instead will terminate at Charlemont.</p> <p>Please refer to response item (16) in relation the operational strategy and frequency of services at Dublin Airport. Please also refer to response item (16) and (20) in relation to the assessment of pedestrian movements around Dublin Airport Station. MetroLink has been designed as submitted in the RO to facilitate predicted passenger capacity up to 2060.</p> <p>However, that is not to say that when the system becomes operational that express services to and from the airport could not be facilitated.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                           |

| Submission No.                                                                             |                                                                                                |          | 127                                                                                                                                                                                                                                                                                                                                                                                                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |  |

| Observation; TII “Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022” |                                                                                                |          |                                                                                                                                                                                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |  |
| 25                                                                                         | IALPA Safety & Technical, Initial Metrolink Submission, May 2018, Part 2, International trends | 18       | IALPA suggested Metrolink shunt to provide a four track dedicated Airport North I Southbound priority carriageway. Use of the TII on-site Tunnel Boring Machine (TBM) could facilitate a long overdue stand- alone DAA funded link to the western Campus. This strategically located DAA link has the potential to feed passengers from Terminal 1 and Terminal 2 to the IALPA proposed satellite Pier 5.           | Development at the western side of the airport is considered within the Dublin Airport Masterplan as part of the long term expansion proposals. The Proposed Metrolink Project would not inhibit any future connection to a potential western campus of Dublin Airport should it be required in the future.                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |  |
| 26                                                                                         | IALPA Safety & Technical, Initial Metrolink Submission, May 2018, DAA Declared position        | 18&19    | IALPA confidentially expects the capacity report to endorse our prophesise that there is an immediate requirement for an additional satellite pier 5 to cater for wide bodied long haul airport in order for Dublin airport to develop as a secondary hub towards 2050.<br><br>Airport expansion to the Western Campus can only be achieved via an access tunnel under the existing operational cross Runway 16/34. | This is an issue for DAA, and is not within the remit of TII to comment on it. Metrolink has been designed as submitted in the RO to facilitate predicted passenger capacity up to 2060.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |  |
| 27                                                                                         | IALPA Safety & Technical, Initial Metrolink Submission, May 2018, DAA Declared position        | 19       | Finally, cost efficiency for the DAA and TII can be obtained by integrating in tandem these two strategic infrastructure projects, (Metro and Terminal/Pier). In addition further boring out West could ensure long term Terminal 3 and T1 T2 link.                                                                                                                                                                 | The optimum station location has been identified for Metrolink to serve the existing airport terminals. The station entrance will be located close to both Terminal 1 and Terminal 2, which will facilitate rapid connections between the terminals and the Metro service.<br><br>Please refer to response items (1), (2) and (3) in relation to the chosen location for Dublin Airport, and the anticipated passenger demand.<br><br>Development at the western side of the airport is considered within the Dublin Airport Masterplan as part of the long term expansion proposals. As noted in the responses above, the proposed Metrolink Project would not inhibit any future connection to a potential western campus of Dublin Airport should it be required in the future. |  |

Refer to response (1).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |  |
| 3                                                                                  | 3            | 2        | Permanent removal of elements of architectural interest<br>The IGS has considerable concerns about the planned permanent removal of parts of structures of architectural interest as these will forever lose their originally intended context. In such case, the Society is of the view that a long-term plan for such items should be put in place and agreed with the Dublin City Council Conservation Office prior to the commencement of works.                                                                                                                        | As outlined in EIAR Chapter 26 (Architectural Heritage) a MetroLink Cultural Heritage Strategy (the current draft of which is provided in Appendix A25.1) has been prepared by TII and will be updated by the TII Project Archaeologist and MetroLink PCA team throughout the course of MetroLink to outline TII's approach and management of all Cultural Heritage constraints and impacts on MetroLink. This reflects the long term plan to manage elements of architectural interest. This is an outcome of the Code of Practice as agreed with TII and the now Minister for Housing, Local Government and Heritage (HLGH). The Planning Authority for MetroLink is An Bord Pleanála, however TII will engage with relevant divisions of each Local Authority on the management of any relevant structures of interest.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |  |
| 4                                                                                  | 4            | 2        | Temporary removal of elements of architectural interest<br>It is noted that in a number of instances it is proposed to temporarily remove features of architectural interest and to reinstate these at a later stage. The IGS has concerns about such proposals as past experience suggests that the reinstatement of such items does not always go ahead. As such, it is recommended that as part of the planning process, a clear agreement for the removal, storage and reinstatement of relevant features is put in place with Dublin City Council Conservation Office. | A grant of an Enforceable Railway Order obliges TII to undertake all EIAR commitments in full, including the reinstatement of heritage items unless conditioned otherwise by An Bord Pleanála who are the Planning Authority for all Railway Works. TII have a good record of re-instating items previously removed on Light Rail Projects.<br><br>As set out by EIAR Chapter 26, Architectural Heritage, section 26.7, the dismantling, transportation, storage, conservation or repairs and reinstatement are to be carried out in accordance with the specification compiled by the MetroLink Project Conservation Architect and that the works, by specialist Heritage Works Contractor(s), are supervised by appropriately qualified professionals.<br><br>As set out in response to Item 3 above the MetroLink Cultural Heritage Strategy (the current draft of which is provided in Appendix A25.1 of the EIAR) will be updated by the TII Project Archaeologist and MetroLink PCA team as agreed with TII and the now Minister for Housing, Local Government and Heritage (HLGH). Prior to commencement of removal and reinstatement works, TII will engage with relevant divisions of each Local Authority on the management and reinstatement of relevant elements of architectural and heritage interest. |  |

| Re: Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022 19-20 Earlsfort Terrace (former Seagrave House) and 65A Adelaide Road (former Davitt House) |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |  |
| 1                                                                                                                                                                       | Submission 1 | 3        | <p>The route selection including horizontal alignment, vertical alignment and depth of MetroLink below ground in the area between Chainage 18+900 and Chainage 19+100 should be reviewed by NTA/TII to satisfy themselves and to ensure that:</p> <p>(a) MetroLink does not cause structural damage to the foundation system supporting our client's building which comprises a mixture of CFA piles (some extending 16.5m below ground level) and pads foundations which are founded on the competent rock.</p> <p>(b) MetroLink does not cause structural damage to our client's building at the basement level. The basement structure forms the waterproof envelope to our Clients building and any damage would result in the ingress of water into the basement.</p> <p>(c) MetroLink does not cause damage to the bespoke cladding; glazing and fragile finishes of our client's building.</p> <p>(d) MetroLink provides the necessary vertical and/or horizontal clearance between the existing basements and the tunnels.</p> <p>(e) We note the existing piles and tension anchors appear to clash with the proposed route of the MetroLink route, these elements form part of the substructure and cannot be ignored. We believe that these elements have not been correctly assessed by MetroLink and the impact the proposed route will have on our Client's building. We have enclosed a copy of our drawing EARL-WMS-ZZ- ZZ-DR-S-21209, for your information and reference.</p> | <p>TII notes the additional drawings provided included piles and tension anchors. On the MetroLink Project, the approach to ground movement and building damage assessment follows the industry standard three-phased ground movement impact assessment process that is undertaken on tunnelling and underground projects around the world, that includes Channel Tunnel Rail Link (CTRL), Dublin Port Tunnel, Crossrail and High Speed 2.</p> <p>EIAR Appendix A 5.17, Building Damage Report, covers the Phase 2 assessment of construction generated ground movements and settlement on property. Tables 5-2 and 5-4 of this report show that the building has been assessed as falling within the "Slight/Very Slight damage". An explanation for which can be found in Table 4-4 of the aforementioned report. Nonetheless a Phase 3 Assessment will be undertaken for this building.</p> <p>The Phase 3 assessment will be a more detailed building specific assessment. A detailed survey will be carried out as part of the Phase 3 assessment to provide the necessary additional information to inform this detailed analysis of how the individual elements of the building would be affected by the predicted ground movements. The method and extent of the detailed analysis will be determined on a case-by case basis and may include a more sophisticated semi-empirical or a detailed soil-structure interaction using finite element modelling methods. Normally a Stage 3 assessment results in lower predicted settlement estimates than the Stage 2 assessment (which is more conservative). It should also be noted that TII will commit to monitoring and mitigation measures will be employed as developed at detailed design and referenced with Appendix 5.1 and 5.17.</p>                                                                                                                                                                                                                                                                                                                              |  |
| 2                                                                                                                                                                       | Submission 2 | 4        | <p>We note that drawing ML1-JAI-EIA-ROUT-XX-DR-Y-13038 (a copy is attached to this submission) does not identify any potential receivers in the area of our Clients building, therefore essentially ignoring potential damage to our client's building. We refer to the following points:</p> <p>a) Metrolink has assessed the "Ground Borne Noise from Tunnel Boring Machine" and presents its findings on drawing no. ML1-JAI-EIA-ROUT-XX-DR-Y-14009 (a copy is attached to this submission). This drawing indicates MetroLink will generate an additional 50db directly under the location of our client's building which is unacceptable.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | <p>The drawing ML1-JAI-EIA-ROUT-XX-DR-Y-13038 presents the receptors considered in the assessment of airborne noise during construction works at the overground sites, where the closest receptors are modelled. According to Chapter 13 Section 13.2.3.1 the key study areas during the Construction Phase include all surrounding sensitive receptors (occupied buildings) to surface construction works areas. Depending on the sources in question and the local area under consideration, the study area extends out to between 50m from construction works to 300m from construction works. However, it should be noted in this case, that the site is located a significant distance from any above ground works area and as a result there is not predicted to be any exceedances of airborne noise levels resulting from the proposed works.</p> <p>The drawing ML1-JAI-EIA-ROUT_XX-DR-Y-14009 indicates the groundborne noise contours of the passage of the tunnel boring machine. The predicted level of groundborne noise at the named building is predicted to be 50 dB LASmax, exceeding the threshold level of 45 dB LASmax during a relatively short term period of 2-weeks when the TBM passes. These noise levels may be audible for a short period as the TBM passes beneath the building but will not cause any building damage.</p> <p>Unfortunately, there are no effective methods available to reduce groundborne noise from TBMs at source. The principal mitigation measures aimed at minimising impacts are as follows:</p> <ul style="list-style-type: none"><li>• Advance public consultation and stakeholder engagement can greatly reduce the significance of groundborne noise effects during construction, as building occupants would be prepared for the passage of the TBM and resultant elevated noise and vibration levels.</li><li>• TII will accept and consider applications for additional measures on a case-by case basis, in accordance with its Noise and Vibration Mitigation Policy (see EIAR Appendix A14.6 Airborne Noise &amp; Groundborne Noise Mitigation Policy).</li></ul> |  |
| 3                                                                                                                                                                       | Submission 2 | 4        | <p>b) Metrolink has assessed the predicted "Settlement" and presents its findings on drawing no. ML1-JAI- EIA-ROUT-XX-DR-Y-21149 (a copy is attached to this submission). This drawing indicates MetroLink will be causing a 45mm settlement directly under the location of our client's building which is unacceptable. Settlements of this magnitude cannot be accommodated by the building's structure and will cause damage to foundations; basement; superstructure; facade and internal finishes. As previously stated the basement structure forms the waterproof envelope to our client's building and any damage would result in the ingress of water into the basement.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | <p>Please refer to Item 1. The settlement contours calculated were used to undertake the building damage assessment and conclude that damage would be limited "slight / very slight" damage. The damage categories are described in section 4.3.2 of the EIAR Appendix A 5.17, Building Damage Report. However, given the additional details provided this assessment would be taken to Phase 3.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |  |

| Submission No.                                                                                                                                                          |              |          | 129                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

| Re: Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022 19-20 Earlsfort Terrace (former Seagrave House) and 65A Adelaide Road (former Davitt House) |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| 4                                                                                                                                                                       | Submission 3 | 4        | We note that drawing ML1-JAI-EIA-ROUT-XX-DR-Y-13038 (a copy is attached to this submission) does not identify any potential receivers in the area of our Clients building. We refer to the following point:<br>a) Metrolink has assessed the "Groundborne Noise from Operation" and presented its findings on drawing no. ML1-JAI-EIA-ROUT-XX-DR-Y-14041 (a copy is attached to this submission). This drawing indicates MetroLink will be generating an additional 35db directly under the location of our Clients building which is unacceptable. | <p>The drawing ML1-JAI-EIA-ROUT-XX-DR-Y-13038 presents the receptors considered in the assessment of airborne noise during construction works at the overground sites, where the closest receptors are modelled. According to Chapter 13 Airborne Noise &amp; Vibration, 13.2.3.1 Study Area Construction Phase from an airborne noise and vibration point of view, the key study areas during the Construction Phase include all surrounding sensitive environments to surface construction compounds. Depending on the sources in question and the local area under consideration, the study area extends out to between 50m from construction works to 300m from construction works.</p> <p>The drawing ML1-JAI-EIA-ROUT_XX-DR-Y-14041 presents contours of groundborne noise during railway operation. The predicted level of groundborne noise during the railway operation is 37 dB LASmax, which is below the 40 dB LASmax threshold, resulting in a not significant impact on the building.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| 5                                                                                                                                                                       | Submission 4 | 4        | MetroLink has proposed to acquire the substratum land located under our client's building, which is outlined in drawing no. ML1-JAI-EIA-ROUT-XX-DR-Y-01097 (a copy is attached to this submission). This is unacceptable to our client, as the future potential to develop this prominent commercial site in the future will be damaged.                                                                                                                                                                                                            | <p>TII notes the concerns about the potential impact of MetroLink Project on future potential development of your site. The acquisition of substratum land beneath the Irish Life Assurance plc. building and premises is to enable the construction of the Metrolink tunnel.</p> <p>MetroLink will be a catalyst for and provide opportunity for future development and regeneration. While the MetroLink Railway Order does not include for future neighbouring or overhead development, the tunnels and stations are designed to support appropriate future imposed loads.</p> <p>TII will be required to make submissions in relation to planning applications for proposed future developments on or adjacent to MetroLink and there will necessarily be some engineering constraints (such as permissible loadings) required. However MetroLink is committed to engaging with known development proposals and new development proposals as they emerge with the intent of facilitating such developments as they emerge to the maximum extent consistent with the safe operation of the proposed Project.</p> <p>Again in common with other existing rail and tunnel projects, following grant of the Railway Order and development of detailed design, TII will produce "Guidance Note for Developers" that will be the subject of bye-laws following the grant of Railway Order and which is designed to facilitate future adjacent or over-site development while protecting the integrity and safety of the MetroLink works and operations.</p> <p>Therefore at this stage TII is dealing with known development proposals on a case by case basis, TII will work with parties in the future to assist with the wider development of sites over and above stations and tunnels. In this context TII has successfully engaged with a number of developers over the last two years to accommodate development over and in proximity to the alignment and there have been no material restrictions on development subject to the implementation of agreed design and mitigation measures and it is not anticipated that MetroLink will have a material impact on the development potential of sites above and in proximity to the alignment in future.</p> |
| 6                                                                                                                                                                       | Summary      | 4        | In summary, our client requests that the route of the proposed MetroLink tunnels are diverted away from their current proposed location (under our client's building) to either below the public carriageway or buildings that will not be damaged or compromised by the presence of the tunnels located under.                                                                                                                                                                                                                                     | <p>The design includes for a limit of deviation which is required to allow for unforeseen obstructions and construction tolerances which may necessitate a change to the alignment. In the highly unlikely event that this were to occur, any resulting environmental impacts will comply with the limits set by the enforceable Railway Order.</p> <p>TII has carried out a comprehensive set of ground investigations in accordance with relevant guidelines and best practice. It has a high confidence that MetroLink can be constructed along the proposed alignment without requiring vertical or horizontal adjustment. However, in order to guard against rare and undetectable subterranean conditions that might interfere with construction, the Railway Order provides for limits of deviation (as have other railway authorisation since at least the 1840s). The impacts of potential changes within the Limits of Deviation are considered in the Wider Effects Report (Appendix A5.19).</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

| 1                                                                                                                                          | Submission 1 | 3        | The route selection, including horizontal alignment, vertical alignment and depth of MetroLink below ground in the area between Chainage 18+800 and Chainage 18+900, should be reviewed by NTA / TII to satisfy themselves and to ensure that (a) MetroLink does not cause structural damage to the foundation system supporting our client's building.<br>(b) MetroLink does not cause structural damage to our client's building at the basement level, any damage would result in the ingress of water into the basement.<br>(c) MetroLink does not cause damage to the cladding; glazing and fragile finishes of our client's building.<br>(d) MetroLink provides the necessary vertical and/or horizontal clearance between the existing basements and the tunnels. | TII appreciates the submission. A Phase 2 Settlement Analysis has been done for the MetroLink alignment and this assessment identified that your building is outside the ground movement contours and will not there be impacted by ground movement.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| 2                                                                                                                                          | Submission 2 | 3        | a) Metrolink has assessed the "Groundborne Noise from Tunnel Boring Machine" and presents its findings on drawing no. ML1-JAI-EIA-ROUT-XX-DR-Y-14009 (a copy is attached to this submission). This drawing indicates MetroLink will generate an additional 45db directly under the location of our client's building which is unacceptable.                                                                                                                                                                                                                                                                                                                                                                                                                              | Appendix 14.5 Groundborne Noise and Vibration Blasting Modelling Results presents predicted groundborne noise and vibration levels during the construction and operation phase of the project. The prediction of groundborne noise during TBM passage for the 4 Earlsfort Terrace building is 46 dB LASmax, which is slightly above the 45 dB LASmax threshold, resulting a significant impact on the building for the limited duration of TBM passage (less than 2 weeks). This level of noise will be noticeable for the short duration of time when the TBM is underneath the building but will not cause any structural damage to the building.<br><br>The principal mitigation measures referenced in EIAR Appendix 5.1 aimed at minimising impacts are as follows:<br>- Advance public consultation and stakeholder engagement can greatly reduce the significance of groundborne noise effects, as building occupants would be prepared for the passage of the TBM and resultant elevated noise and vibration levels.<br>- TII will accept and consider applications for additional measures on a case-by case basis, in accordance with its Noise and Vibration Mitigation Policy (see EIAR Appendix A14.6, Airborne Noise & Groundborne Noise Mitigation Policy). |
| 3                                                                                                                                          | Submission 3 | 4        | a) Metrolink has assessed the "Groundborne Noise from Operation" and presented its findings on drawing no. ML1-JAI-EIA-ROUT-XX-DR-Y-14041 (a copy is attached to this submission). This drawing indicates MetroLink will be generating an additional 25db directly under the location of our Clients building which is unacceptable.                                                                                                                                                                                                                                                                                                                                                                                                                                     | Appendix 14.5 Groundborne Noise and Vibration Blasting Modelling Results presents predicted groundborne noise and vibration levels during the construction and operation phase of the project. For 4 Earlsfort Terrace building, the prediction of groundborne noise and vibration during railway operation are as follows:<br>- The predicted level of groundborne noise during the railway operation for4 Earlsfort Terrace building is 24 dB LASmax, which is below the 40 dB LASmax threshold.<br>- The predicted level of groundborne vibration during the railway operation for 4 Earlsfort Terrace building is 0.003 ms-1.75, much lower than the VDV (Vibration Dose Value is a parameter that combines the magnitude of vibration and the time for which it occurs) threshold of 0.8 ms-1.75.<br>As a result, we consider that no significant impact is expected on the building as a result of Metrolink operation.                                                                                                                                                                                                                                                                                                                                              |
| 4                                                                                                                                          | Summary      | 4        | In summary, our client requests that the route of the proposed MetroLink tunnels are diverted away from their current proposed location to either below the public carriageway or buildings that will not be damaged or compromised by the presence of the tunnels located under.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | This building is not on the alignment, nor impacted by ground movement. TII do not propose to alter the alignment.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

| Re: Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022, 70 St Stephens Green (formally known as Hainault House Nos. 69-71 St. Stephens Green, Dublin 2) |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |  |
| 1                                                                                                                                                                            | Submission 1 | 2        | <p>The route selection including horizontal alignment, vertical alignment and depth of MetroLink below ground in the area between Chainage 18+600 and Chainage 18+700 should be reviewed by NTA / TII to satisfy themselves and to ensure that</p> <p>(a) MetroLink does not cause structural damage to the foundation system supporting our client's building which comprises a mixture of CFA piles (some extending c.14.0m below ground level) and pads foundations which are founded on the competent rock.</p> <p>(b) MetroLink does not cause structural damage to our client's building at the basement level. The basement structure forms the waterproof envelope to our Clients building and any damage would result in the ingress of water into the basement.</p> <p>(c) MetroLink does not cause damage to the bespoke cladding; glazing and fragile finishes of our client's building.</p> <p>(d) MetroLink provides the necessary vertical and/or horizontal clearance between the existing basements and the tunnels.</p> | <p>The approach taken by TII to ground movement and building damage assessment follows the industry standard three-phased ground movement impact assessment process that is undertaken on tunnelling and underground projects around the world, that includes Channel Tunnel Rail Link (CTRL), Dublin Port Tunnel, Crossrail and High Speed 2.</p> <p>EIAR Appendix A5.17 Building Damage Report details the Phase 2 assessment process and the damage categories are explained in section 4.3.2. The building is assessed at damage category 2 (Slight Damage). The MetroLink tunnel has been assessed adjacent to this property at the depth and on the alignment proposed and TII are satisfied that the assessed movements will not lead to structural damage and that the necessary clearance has been provided to this property.</p> <p>The Phase 3 assessment will be a more detailed building specific assessment. A detailed survey will be carried out as part of the Phase 3 assessment to provide the necessary additional information to inform this detailed analysis of how the individual elements of the building would be affected by the predicted ground movements. The method and extent of the detailed analysis will be determined on a case-by case basis and may include a more sophisticated semi-empirical or a detailed soil-structure interaction using finite element modelling methods. Normally a Stage 3 assessment results in lower predicted settlement estimates than the Stage 2 assessment (which is more conservative). However in the event that building specific detail identifies that the building is more vulnerable to settlement than predicted at Stage 2, then the tunnel will need to be lowered to reduce any potential impacts. It should also be noted that TII will commit to monitor the building for settlement and to repair any damage caused by settlement arising from the advancement of the TBM.</p> |  |
| 2                                                                                                                                                                            | Submission 2 | 2        | <p>a) Metrolink has assessed the "Groundborne Noise from Tunnel Boring Machine" and presents its findings on drawing no. ML1-JAI-EIA-ROUT-XX-DR-Y-14009 (a copy is attached to this submission). This drawing indicates MetroLink will generate an additional 50db directly under the location of our client's building which is unacceptable.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | <p>EIAR Appendix 14.5 Groundborne Noise and Vibration Blasting Modelling Results presents predicted groundborne noise and vibration levels during the construction and operation phase of the project. The prediction of groundborne noise during TBM passage for 70 St Stephen's Green building is 49 dB LASmax, which is above the 45 dB LASmax threshold, resulting in a temporary significant impact on the building for the limited duration of TBM passage (less than 2 weeks).</p> <p>Unfortunately, there are no effective methods available to reduce groundborne noise or vibration from the TBM at source. As a result, the principal mitigation measure to minimise effects on 70 St Stephen's Green will be advance public consultation and stakeholder engagement to reduce the significance of groundborne noise effects during construction so that your client is prepared for the passage of the TBM and resultant elevated noise levels. TII will accept and consider applications for additional measures on a case-by case basis, in accordance with its Noise and Vibration Mitigation Policy (see Appendix A14.6 of the EIAR).</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |  |
| 3                                                                                                                                                                            | Submission 2 | 2        | <p>b) Metrolink has assessed the predicted "Settlement" and presents its findings on drawing no. ML1-JAI-EIA-ROUT-XX-DR-Y-21149 (a copy is attached to this submission). This drawing indicates MetroLink will be causing a 15mm settlement directly under the location of our client's building which is unacceptable. Settlements of this magnitude cannot be accommodated by the building's structure and will cause damage to foundations; basement; superstructure; facade and internal finishes. As previously stated the basement structure forms the waterproof envelope to our client's building and any damage would result in the ingress of water into the basement.</p>                                                                                                                                                                                                                                                                                                                                                      | <p>The eastern boundary of 70 St Stephens Green is just outside the 10mm contour and no structural impacts are assessed. However, despite being just outside the 10mm contour, TII will implement a Phase 3 assessment due to the building features noted in this response. Refer to response (1).</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |  |

| Submission No.                                                                                                                                                               |              |          | 131                                                                                                                                                                                                                                                                                                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

| Re: Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022, 70 St Stephens Green (formally known as Hainault House Nos. 69-71 St. Stephens Green, Dublin 2) |              |          |                                                                                                                                                                                                                                                                                                                                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| 4                                                                                                                                                                            | Submission 3 | 3        | a) Metrolink has assessed the “Groundborne Noise from Operation” and presented its findings on drawing no. ML1-JAI-EIA-ROUT-XX-DR-Y-14041 (a copy is attached to this submission). This drawing indicates MetroLink will be generating an additional 35db directly under the location of our Clients building which is unacceptable.     | <p>EIAR Appendix 14.5 Groundborne Noise and Vibration Blasting Modelling Results presents predicted groundborne noise and vibration levels during the construction and operation phase of the project. The predicted groundborne noise and vibration at the 70 St Stephen's Green building during railway operation is for:</p> <p>- Groundborne noise is 33 dB LASmax, which is below the 40 dB LASmax threshold.</p> <p>- Groundborne vibration is 0.008 ms-1.75, much lower than the VDV (Vibration Dose Value is a parameter that combines the magnitude of vibration and the time for which it occurs) threshold of 0.8 ms-1.75.</p> <p>As a result, TII have assessed that no significant impact is expected on the building as a result of Metrolink operation.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| 5                                                                                                                                                                            | Submission 4 | 3        | MetroLink has proposed to acquire the substratum land located under our client's building, which is outlined in drawing no. ML1-JAI-EIA-ROUT-XX-DR-Y-01096 (a copy is attached to this submission). This is unacceptable to our client, as the future potential to develop this prominent commercial site in the future will be damaged. | <p>TII note your concerns about the potential impact of MetroLink Project on the future potential development of your site.</p> <p>MetroLink will be a catalyst for and provide opportunity for future development and regeneration. While the MetroLink Railway Order does not include for future neighbouring or overhead development, the tunnels and stations are designed to support appropriate future imposed loads.</p> <p>TII will be required to make submissions in relation to planning applications for proposed future developments on or adjacent to MetroLink and there will necessarily be some engineering constraints (such as permissible loadings) required. However MetroLink is committed to engaging with known development proposals and new development proposals as they emerge with the intent of facilitating such developments as they emerge to the maximum extent consistent with the safe operation of the proposed Project.</p> <p>Again in common with other existing rail and tunnel projects, following grant of the Railway Order and development of detailed design, TII will produce “Guidance Note for Developers” that will be the subject of bye-laws following the grant of Railway Order and which is designed to facilitate future adjacent or over-site development while protecting the integrity and safety of the MetroLink works and operations.</p> <p>Therefore at this stage TII is dealing with known development proposals on a case by case basis, TII will work with parties in the future to assist with the wider development of sites over and above stations and tunnels. In this context TII has successfully engaged with a number of developers over the last two years to accommodate development over and in proximity to the alignment and there have been no material restrictions on development subject to the implementation of agreed design and mitigation measures and it is not anticipated that MetroLink will have a material impact on the development potential of sites above and in proximity to the alignment in future.</p> |
| 6                                                                                                                                                                            | Summary      | 3        | In summary, our client requests that the route of the proposed MetroLink tunnels are diverted away from their current proposed location (under our client's building) to either below the public carriageway or buildings that will not be damaged or compromised by the presence of the tunnels located under.                          | <p>The proposed alignment is required in order to allow the tunnel to connect the proposed St. Stephen's Green station to the proposed Charlemont station having regard to ensuring the optimum operation of MetroLink. While there is an opportunity for minor amendments in the alignment within the Limits of Deviation, the analysis presented within the EIAR does not support the requirement for a realignment here - Please refer to the responses above for further details.</p> <p>The design includes for a limit of deviation which is required to allow for unforeseen obstructions and construction tolerances which may necessitate a change to the alignment. In the highly unlikely event that this were to occur, any resulting environmental impacts will comply with the limits set by the enforceable Railway Order.</p> <p>TII has carried out a comprehensive set of ground investigations in accordance with relevant guidelines and best practice. It has a high confidence that MetroLink can be constructed along the proposed alignment without requiring vertical or horizontal adjustment. However, in order to guard against rare and undetectable subterranean conditions that might interfere with construction, the Railway Order provides for limits of deviation (as have other railway authorisation since at least the 1840s). The impacts of potential changes within the Limits of Deviation are considered in the Wider Effects Report (Appendix A5.19).</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

| Submission No.                                                                                                                           |              |          | 132                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

| Re: Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022Earlsfort Centre Block C, Earlsfort Terrace, Dublin, D02 X668 |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| 1                                                                                                                                        | Submission 1 | 2        | <p>The route selection, including horizontal alignment, vertical alignment and depth of MetroLink below ground in the area between Chainage 18+800 and Chainage 18+900, should be reviewed by NTA / TII to satisfy themselves and to ensure that</p> <p>(a) MetroLink does not cause structural damage to the foundation system supporting our client's building which comprises a two-storey basement founded on the competent rock.</p> <p>(b) MetroLink does not cause structural damage to our client's building at the basement level, any damage would result in the ingress of water into the basement.</p> <p>(c) MetroLink does not cause damage to the cladding; glazing and fragile finishes of our client's building.</p> <p>(d) MetroLink provides the necessary vertical and/or horizontal clearance between the existing basements and the tunnels.</p> | <p>On the MetroLink Project, the approach to ground movement and building damage assessment follows the industry standard three-phased ground movement impact assessment process that is undertaken on tunnelling and underground projects around the world, that includes Channel Tunnel Rail Link (CTRL), Dublin Port Tunnel, Crossrail and High Speed 2. The MetroLink tunnel has been assessed going under these properties at the depth and on the alignment proposed and TII are satisfied that the assessed movements will not lead to structural damage to these properties.</p> <p>EIAR Appendix A 5.17, Building Damage Report, covers the assessed impacts of construction generated ground movements and settlement on property. Table 5-2 of this report shows that the building has been assessed as falling within the "Very Slight damage" category currently (building reference B -53), an explanation for which can be found in Table 4-4 of the aforementioned report.</p> <p>The building has been classified under "Damage category 2 or below" following the Refined Phase 2a Building Damage Assessment. EIAR Appendix 5.17 specifies that all buildings that have been subject to a Phase 2 assessment will be reviewed and reassessed by the D&amp;B Contractor. This Phase 2b assessment will use refined and updated parameters available to the D&amp;B contractor as a result of him progressing the development of the detail design and finalising his construction methodology and planning. All buildings that have been classified at the end of the Phase 2b assessment as Damage Category 3 (Moderate) or above (or where there exists any uncertainty after the Phase 2b assessment) will be the subject of a Phase 3 assessment by the D&amp;B Contractor.</p> <p>If the building has a basement we would take your building to a Phase 3 Assessment at detailed design stage to confirm the current results. TII would undertake surveys and collate building drawings to confirm the assessment.</p> |
| 2                                                                                                                                        | Submission 2 | 2        | <p>a) Metrolink has assessed the "Groundborne Noise from Tunnel Boring Machine" and presents its findings on drawing no. ML1-JAI-EIA-ROUT-XX-DR-Y-14009 (a copy is attached to this submission). This drawing indicates MetroLink will generate an additional 50db directly under the location of our client's building which is unacceptable.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | <p>Appendix A14.5 Groundborne Noise and Vibration Blasting Modelling Results presents predicted groundborne noise and vibration levels during the construction and operation phase of the project. The prediction of groundborne noise during TBM passage for Earlsfort Terrace Block C is 49 dB LASmax, which is above the 45 dB LASmax threshold, resulting a significant impact on the building for the limited duration of TBM passage. It is important to note however that there will be no potential for damage to the building resulting. The duration of this impact will be in the order of up to two weeks as the TBM passes. TII will liaise with Irish Life Assurance plc. to ensure the timing of these impacts are known.</p> <p>The principal mitigation measures aimed at minimising impacts are as follows:</p> <ul style="list-style-type: none"><li>- Advance public consultation and stakeholder engagement can greatly reduce the significance of groundborne noise effects, as building occupants would be prepared for the passage of the TBM and resultant elevated noise and vibration levels.</li><li>- TII will accept and consider applications for additional measures on a case-by case basis, in accordance with its Noise and Vibration Mitigation Policy (see EIAR Appendix A14.6, Airborne Noise &amp; Groundborne Noise Mitigation Policy).</li></ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| 3                                                                                                                                        | Submission 2 | 2&3      | <p>b) Metrolink has assessed the predicted "Settlement" and presents its findings on drawing no. ML1-JAI-EIA-ROUT-XX-DR-Y-21149 (a copy is attached to this submission). This drawing indicates MetroLink will be causing a 40mm settlement directly under the location of our client's building which is unacceptable. Settlements of this magnitude cannot be accommodated by the building's structure and will cause damage to foundations; basement; superstructure; facade and internal finishes. As previously stated the basement structure forms the waterproof envelope to our client's building and any damage would result in the ingress of water into the basement.</p>                                                                                                                                                                                   | <p>Please refer to Item 1. The settlement contours calculated were used to undertake the building damage assessment and conclude that damage would be limited to "slight / very slight" damage. The damage categories are described in section 4.3.2 of the EIAR Appendix A5.17, Building Damage Report. However, if the basement details are confirmed this assessment would be taken to Phase 3 as part of the further assessment procedure outlined in the EIAR Appendix A5.17.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

| Re: Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022Earlsfort Centre Block C, Earlsfort Terrace, Dublin, D02 X668 |              |          |                                                                                                                                                                                                                                                                                                                                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| 4                                                                                                                                        | Submission 3 | 3        | a) Metrolink has assessed the “Groundborne Noise from Operation” and presented its findings on drawing no. ML1-JAI-EIA-ROUT-XX-DR-Y-14041 (a copy is attached to this submission). This drawing indicates MetroLink will be generating an additional 35db directly under the location of our Clients building which is unacceptable.     | Appendix 14.5 Groundborne Noise and Vibration Blasting Modelling Results presents predicted groundborne noise and vibration levels during the construction and operation phase of the project. The prediction of groundborne noise and vibration for Earlsfort Terrace Block C during railway operation are as follows:<br>- The predicted level of groundborne noise during the railway operation for Earlsfort Terrace Block C is 35 dB LASmax, which is below the 40 dB LASmax threshold.<br>- The predicted level of groundborne vibration during the railway operation for Earlsfort Terrace Block C is 0.009 ms-1.75, much lower than the VDV (Vibration Dose Value is a parameter that combines the magnitude of vibration and the time for which it occurs) threshold of 0.8 ms-1.75.<br>As a result, we consider that no significant impact is expected on the building as a result of Metrolink operation.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| 5                                                                                                                                        | Submission 4 | 3        | MetroLink has proposed to acquire the substratum land located under our client's building, which is outlined in drawing no. ML1-JAI-EIA-ROUT-XX-DR-Y-01096 (a copy is attached to this submission). This is unacceptable to our client, as the future potential to develop this prominent commercial site in the future will be damaged. | <p>TII note your concerns about the potential impact of MetroLink Project on future potential development of your site. The acquisition of substratum land beneath the Irish Life Assurance plc. building is to enable the construction of the Metrolink tunnel. The site referred to is zoned Z6 - Employment / Enterprise, however there is no extant planning permission on the site of Block C. The submission does not refer to a specific future development, only to the generality of future development.</p> <p>MetroLink will be a catalyst for and provide opportunity for future development and regeneration. While the MetroLink Railway Order does not include for future neighbouring or overhead development, the tunnels and stations are designed to support appropriate future imposed loads. TII will be required to make submissions in relation to planning applications for proposed future developments on or adjacent to MetroLink and there will necessarily be some engineering constraints (such as permissible loadings) required. However MetroLink is committed to engaging with known development proposals and new development proposals as they emerge with the intent of facilitating such developments as they emerge to the maximum extent consistent with the safe operation of the proposed Project.</p> <p>Again in common with other existing rail and tunnel projects, following grant of the Railway Order and development of detailed design, TII will produce a “Guidance Note for Developers” that will be the subject of bye-laws following the grant of Railway Order and which is designed to facilitate future adjacent or over-site development while protecting the integrity and safety of the MetroLink works and operations.</p> <p>Therefore, at this stage TII is dealing with known development proposals on a case by case basis, TII will work with parties in the future to assist with the wider development of sites over and above stations and tunnels. In this context TII has successfully engaged with a number of developers over the last two years to accommodate development over and in proximity to the alignment and there have been no material restrictions on development subject to the implementation of agreed design and mitigation measures and it is not anticipated that MetroLink will have a material impact on the development potential of sites above and in proximity to the alignment in future.</p> |
| 6                                                                                                                                        | Summary      | 3        | In summary, our client requests that the route of the proposed MetroLink tunnels are diverted away from their current proposed location (under our client's building) to either below the public carriageway or buildings that will not be damaged or compromised by the presence of the tunnels located under.                          | TII do not intend to alter the horizontal alignment as the building damage assessments currently undertaken support the validity of the alignment. Refer also to Item 1 above.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

| Letter Re: Railway Order Application- Metro North: Estuary through Swords, Dublin Airport, Ballymun, Glasnevin and City Centre to Charlemont, Co. Dublin |                                                                |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| 1                                                                                                                                                        | Cover letter                                                   | 2        | Irish Water is cognisant of the significant number of interactions the MetroLink scheme will have with both existing Irish Water infrastructure and future planned infrastructure. It is imperative that Irish Water’s infrastructure, both existing and planned, is protected and future proofed to ensure continued provision of critical services. Examples of these interactions include, but are not limited to, multiple diversions and crossings of existing Irish Water assets, interactions with the Greater Dublin Drainage Project, Swords Pumping Station, Catchment Drainage Area Plans and infrastructure projects such as Fosterstown Wastewater Sewer upgrade, North Fringe Sewer and the Dublin City Sewerage Scheme.                                                                                                           | <p>TII commit to protecting existing IW infrastructure and to continuing to engage with Irish Water to ensure the detailed designs for MetroLink incorporate either the appropriate protection measures for existing Irish Water assets as detailed in the EIAR Chapter 22 (Infrastructure and Utilities) and EIAR Appendix A22.1 (Summary of Utilities Settlement Analysis Study) or as developed in the detailed design, and to include for agreed future proofing measures where required and as appropriate to ensure future planned Irish Water infrastructure can be delivered in proximity to the MetroLink scheme.</p> <p>The Preliminary design undertaken to date is appropriate for the RO application stage with detailed designs to be developed by the contractor(s) and agreed with Irish Water subsequently.</p>                                                                                                                                                                                                                                                                                                      |
| 2                                                                                                                                                        | Irish Water Observations - Provision of Public Services        | 3        | <p>In order to enable Irish Water to facilitate future growth within the required timeframe, TII must commit to protecting locations for future key Irish Water infrastructure including the provision of necessary culverts and crossing points, ahead of any works commencing. In this regard, TII will need to agree, at the Detailed Design stage of the MetroLink, and prior to any construction works taking place, the manner in which the proposed MetroLink works will interact with existing and planned future Irish Water infrastructure, including but not limited to wayleaves and/or rights of way and provision of necessary culverts for future crossing points.</p> <p>To date, Irish Water has not received Detailed Designs from TII for each of the specific interaction(s) between MetroLink and Irish Water’s assets;</p> | <p>1. For existing infrastructure, TII will apply all requisite protection measures as outlined in the EIAR Chapter 22 or as developed and agreed with IW during the detailed design phase.</p> <p>2. For future infrastructure planned by UE and in respect of which details have been furnished to TII, TII will engage with UE’s engineering team to agree solutions which protect both UE’s future planned infrastructure and all elements of the MetroLink project.</p> <p>3. Clearly, while specific commitments cannot be given with respect to future infrastructure planned by UE but in respect of which no details have been furnished to TII or are publicly available, TII will continue to engage with UE to address any such works as it does on all of its other transport systems e.g. Luas.</p> <p>Though not required for the purpose of the Railway Order application TII have begun submitting detailed designs for consideration since July of 2023 for each of the specific asset between MetroLink and Irish Waters Assets and are seeking to engage collaboratively with Irish Water to agree solutions.</p> |
| 3                                                                                                                                                        | Irish Water Observations - Recommendations to An Bord Pleanála | 4        | Based on the information available, Irish Water is of the opinion that many of the interactions proposed could be facilitated subject to a Detailed Design being agreed with Irish Water, a comprehensive legal agreement between Irish Water and TII being executed in advance of any works, together with other valid agreements including easements for private lands and transfer of ownership, and continued engagement with Irish Water both on any approval of this Railway Order and on a continuous basis throughout the process of Detailed Design proposals.                                                                                                                                                                                                                                                                          | While TII will continue to engage with UE througout the detailed design and construction phase of the project, the EIAR identifies, describes and assesses potential significant impacts on UE assets and the required mitigation measures and protections which will be applied. Please refer to EIAR Chapters 5 and 22.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

| Letter Re: Railway Order Application- Metro North: Estuary through Swords, Dublin Airport, Ballymun, Glasnevin and City Centre to Charlemont, Co. Dublin |                                                                                                     |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |  |
| 4                                                                                                                                                        | Irish Water Observations - Recommendations to An Bord Pleanála                                      | 4        | <p>Irish Water is of the opinion that Further Information is required to be provided by TII on certain aspects of the proposals, which may have the potential to impact Irish Water’s delivery of critical water infrastructure. In particular, Irish Water considers that further information is necessary regarding the MetroLink’s interactions with the Greater Dublin Drainage Project (GDD), which is a live Strategic Infrastructure Development application and a critical strategic water infrastructure project. Irish Water provides details in Section M below on the specific concerns, summarised as principally relating to the following points;</p> <p>o The significant overlap of the MetroLink and GDD Planning (redline boundary)/Compulsory Purchase Order (CPO) areas at the proposed Dardistown Main Compound and appropriate consideration of both projects; and in particular Irish Waters confirmed CPO during what is noted as an extensive construction period (up to nine years)</p> <p>o The proposed Embankment where MetroLink interfaces with GDD (during previous discussions with TII it had been agreed that an overbridge would be the optimal interface solution)</p> <p>o The GDD project is represented incorrectly on the drawings and does not appear to be referenced in the Planning Report</p> <p>o Constructability – greater detail is required on the likely interactions between GDD and MetroLink during construction (i.e., Programme Scenarios)</p> | <p>The MetroLink project has been developed based on the GDD project being constructed and operational before MetroLink construction commences. This is a reasonable and valid assumption although it is recognised there remains uncertainty around the precise delivery schedule for both projects given neither have planning approval at this time.</p> <p>TII have engaged with Irish Water in relation to the GDD pipeline and have reached agreement on how the issues raised shall be dealt with between the parties as follows:</p> <p>(i) TII and Irish Water/Uisce Eireann to discuss in further detail on the principles of the interface in relation to land take, CPO requirements, and programme and have agreed to collaboratively engage on the interface in a timely manner at an appropriate time to agree construction, operation and maintenance methodologies.</p> <p>(ii) TII do not agree that an overbridge will be required at this location. Any protection measures in relation to the embankmennt, if required, shall be agreed collaboratively between the parties at detailed design stage.</p> <p>(iii) The horizontal alignment of the GDD scheme is correctly shown however the number of manholes and their associated levels shall be rectified on the MetroLink drawings.</p> <p>(iv) The constructability interface principles have been agreed as well as what the responsibilities of each party shall be depending on the timing of the projects. Both parties intend to agree to a memorandum of understanding to reflect this.</p> |  |
| 5                                                                                                                                                        | Description of the Known and Future Likely Interactions<br><br>A) Diversion of Irish Water's Assets | 5        | <p>Irish Water would like to specifically note to ABP that while the known diversions required to facilitate the proposed development are listed in Appendix 1a and 1b at length, this list is not exhaustive and is based on the best information available to, and provided by, the applicant at this time. It should not be considered an exhaustive list of all diversions that may be required. Designs for all diversions, including any additions in excess of those listed below, are required to be agreed with Irish Water at the Detailed Design stage, and in all instances prior to the commencement of development in order to allow Irish Water to continue to provide critical public services.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | <p>TII have based their assessment of diversions required based on asset record information provided by Irish Water and GPR surveys undertaken by TII to date. TII confirm that as they continue to develop the design, a list of required diversions will be maintained under review and updated as required. TII will continue to engage with and keep IW informed of any changes to the proposed list of IW diversions and agree the detail design of IW diversions with IW. See also Response (1) above.</p> <p>TII note IW request that all designs are agreed prior to the commencement of the development. Given the scale of the development, TII would ask that rather than condition all designs are agreed prior to the commencement of the development, that instead diversion designs must be agreed with IW before the diversion works concerned are commenced. The reason for this request is to prevent the overall construction schedule being unnecessarily constrained. UE and TII are currently working through an updated legal agreement to cover the works which sets out the framework for exchange and agreement of designs.</p>                                                                                                                                                                                                                                                                                                                                                                                                                     |  |
| 6                                                                                                                                                        | Description of the Known and Future Likely Interactions<br><br>A) Diversion of Irish Water's Assets | 5        | <p>TII must, as part of the MetroLink works, take account of the location of all Irish Water Assets both below and above ground and in some cases, where those assets are attached to bridges. TII must protect Irish Water’s assets over the course of the project, both during the construction and operational phases, to allow Irish Water to continue to provide critical public services.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | <p>TII confirm that they will take account of all known IW assets both below and above ground that could potentially be impacted by MetroLink and protect them both during the construction and operational phases. TII have reviewed asset record drawings provided by IW and have undertaken GPR surveys to validate the location of existing services. TII confirm that as they continue to develop the design a list of assets that could potentially be impacted by MetroLink will be maintained and kept under review and updated as required. TII will continue to engage with and keep IW informed of any changes to the proposed list of impacted IW assets identified by the RO drawings and schedules.</p> <p>EIAR Chapter 22 details the methodologies which will be followed in any diversions or changes required to existing Utilities and Infrastructure and the mitigation methods which wil be applied.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |  |

| Letter Re: Railway Order Application- Metro North: Estuary through Swords, Dublin Airport, Ballymun, Glasnevin and City Centre to Charlemont, Co. Dublin |                                                                                                                               |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |  |
| 7                                                                                                                                                        | Description of the Known and Future Likely Interactions<br><br>B) Ground Movement and Locations Requiring protection Measures | 5        | Based on initial analysis and modelling carried out by the applicant, protection measures may be required for 268 no. watermain locations and 80 no. sewer locations. These locations are set out in detail in Appendix 2 below. This list is based on the information provided by TII at this time. It should not be considered an exhaustive list of all locations where protection measures may be required. Further detailed analysis is to be carried out by the applicant at Detailed Design phase to determine the full list of locations at which protection measures are required. This full list of locations at which protection measures are required, and all associated designs, are required to be agreed with Irish Water at the Detailed Design stage, and in all instances prior to the commencement of development. These requirements will be subject to a Detailed Design being agreed with Irish Water, a comprehensive legal agreement between Irish Water and TII being executed in advance of any works. | An Initial analysis for the purpose of preliminary design and to inform the EIAR has been carried out based on asset record information received from IW. This analysis will be further progressed through the detail design phase and shall incorporate ground investigation data gathered by TII during 2023. It would be expected that in many cases as a result of detail design and construction methodology refinement that the number of assets requiring protection measures will reduce. TII confirm that as they continue to develop the design the list of assets that could potentially be impacted by MetroLink will be maintained under review and updated as required. TII will continue to engage with and keep IW informed of any changes to the proposed list of impacted IW assets identified by the RO drawings and schedules.<br><br>TII note IW request that all protection measures and designs are agreed prior to the commencement of the development. Given the scale of the development, TII would ask that rather than condition all protection measures and designs are agreed prior to the commencement of the development, that instead designs must be agreed with IW before any works are commenced that could impact IW infrastructure. The reason for this request is to prevent the overall construction schedule being unnecessarily constrained. |  |
| 8                                                                                                                                                        | Description of the Known and Future Likely Interactions<br><br>C) New Pumping Station Seatown/Swords                          | 6        | Pre-application consultation has been held with the applicant regarding the proposed new wastewater pumping station in the vicinity of the Estuary Roundabout on the R132 and R125 roads in Swords. Based on the details provided by TII, Irish Water can confirm that subject to Detailed Design being agreed with Irish Water, a comprehensive legal agreement between Irish Water and TII being executed in advance of any works, and other valid agreements including Easements for Irish Water pipes on private lands being put in place, the proposals can be facilitated. This comprehensive legal agreement will include the requirement that ownership of the new wastewater pumping station and associated lands must be transferred to Irish Water in advance of operation and that any assets transferred will be in accordance with Irish Water commissioning standards.                                                                                                                                             | Please see Response (3) above.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |
| 9                                                                                                                                                        | Description of the Known and Future Likely Interactions<br><br>D) Railway Works & Related Provisions                          | 6        | Where road upgrades, widening, alignments etc are being undertaken, the applicant must consult with Irish Water regarding impact on existing and future planned Irish Water assets ahead of any works commencing. For example, if the proposed works involve road widening, thereby potentially changing the location of a below ground Irish Water asset from a non-trafficable area to a trafficable area then diversions or alterations may be required. Also, the raising or lowering of footpath/road levels could impact on Irish Water assets.                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | TII confirm that Irish Water will be consulted on any impact on existing and future planned Irish Water assets resulting from any alterations proposed to roads and pavements as part of the MetroLink works.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |  |
| 10                                                                                                                                                       | Description of the Known and Future Likely Interactions<br><br>D) Railway Works & Related Provisions                          | 6        | Where road closures are necessary, Irish Water Operations Staff will still require access to carry out emergency repairs of watermains or to clear sewer blockages etc. Early consultation and notification from TII is required to enable Irish Water to plan works accordingly and ultimately minimise disruption to the public. These requirements will be subject to a Detailed Design being agreed with Irish Water, a comprehensive legal agreement between Irish Water and TII being executed in advance of any works.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | TII confirm this is understood and that this obligation will be included in the Contract specification, including the requirement to consult with IW to plan both IW and TII works.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |  |

| Letter Re: Railway Order Application- Metro North: Estuary through Swords, Dublin Airport, Ballymun, Glasnevin and City Centre to Charlemont, Co. Dublin |                                                                                                                                                                      |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| 11                                                                                                                                                       | Description of the Known and Future Likely Interactions<br><br>E) Wastewater Sewer, Water Mains, Culverts Requirements & Culvert Crossing(s) to Service Future Lands | 7        | For likely locations of future Irish Water network pipes crossing above/below the MetroLink infrastructure, additional Culverts (or sleeves) are required to be provided. The design for the location, size and specification of these additional Culverts is required to be agreed by Irish Water at Detailed Design phase in advance of any physical works on the ground. The applicant will be required to engage with Irish Water during the Detailed Design and construction stages to agree culvert requirements & crossings to ensure that the servicing of future strategic reserves and zoned lands is catered for through the incorporation of these culverts at agreed locations. | Please refer to Response (1) above regarding future proofing and planning.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| 12                                                                                                                                                       | Description of the Known and Future Likely Interactions<br><br>E) Wastewater Sewer, Water Mains, Culverts Requirements & Culvert Crossing(s) to Service Future Lands | 7        | TII must protect locations for future key Irish Water infrastructure including the provision of necessary culverts and crossing points, ahead of any works commencing. TII will be required to agree, at the Detailed Design stage of the MetroLink, and prior to any construction works taking place, wayleaves and/or rights of way and provision of necessary culverts for future crossing points.                                                                                                                                                                                                                                                                                        | Please refer to Response (1) above regarding future proofing and planning.<br><br>TII note IW request that 'wayleaves and/or rights of way and provision of necessary culverts for future crossing points' must be agreed prior to any construction works taking place. Given the scale of the development, TII would ask that rather than condition this must all be agreed ahead of any works taking place, that instead this must be agreed with IW before works are commenced that could impact access for future crossing points that it is agreed will be provided for by MetroLink. The reason for this request is to prevent the overall construction schedule being unnecessarily constrained. |
| 13                                                                                                                                                       | Description of the Known and Future Likely Interactions<br><br>F) Easements & Wayleaves                                                                              | 7        | In relation to acquisition and possession of land rights, where TII require the acquisition of lands, at a minimum, Irish Water will seek to maintain our wayleave rights over pipeline routes, to ensure access is facilitated for maintenance works. TII must engage with Irish Water at design stages to discuss wayleave rights and access and any other protection measures required to ensure the continued provision of water services. Wayleaves for all pipe work will be required in favour of Irish Water.                                                                                                                                                                        | It is agreed sufficient access provision will be provided to enable IW to maintain their assets wherever TII are able to do so.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| 14                                                                                                                                                       | Description of the Known and Future Likely Interactions<br><br>F) Easements & Wayleaves                                                                              | 7        | The applicant shall provide and arrange registration of Easements, in accordance with Irish Water requirements, for all locations where diversions / protection measures / new assets for the Irish Water network are proposed for private lands. It is Irish Water's opinion that all land with Irish Water infrastructure in closed off sites should transfer to Irish Water. These requirements will be subject to a Detailed Design being agreed with Irish Water, a comprehensive legal agreement between Irish Water and TII being executed in advance of any works.                                                                                                                   | TII confirm that they will continue to consult with Irish Water with regard to the registration of easements. All such land within closed off sites which is permanently acquired by TII under the Railway Order will be transferred to IW following completion of the relevant works subject to situations where MetroLink Operation and Maintenance requirements require otherwise. In these limited cases, TII will consult with UE to ensure that a workable solution is found so as to ensure all required access rights of both TII and UE are provided for.                                                                                                                                      |

| Submission No.                                                                                                                                           |                                                                                                             |          | 133                                                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

Dublin |                                                                                                             |          |                                                                                                                                                                                                                                                                                                                                                                                                                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 15                                                                                                                                                       | Description of the Known and Future Likely Interactions<br><br>G) Discharge of Water                        | 7        | In relation to Article 15 discharge of water, the Greater Dublin Area Planning Authorities have policies regarding Sustainable Urban Drainage (SUDs). In support of appropriate management of discharge of water, Irish Water would like to see a reduction in stormwater runoff from all existing roads, hardstanding & paved areas. No additional surface water is to be discharged to existing foul/combined sewer networks. | TII confirm as part of the design that they will endeavour to reduce the volume of stormwater run-off and additional surface discharge to existing foul/combined sewer networks so far as is practicable, noting this will be limited to MetroLink infrastructure that TII is responsible for.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| 16                                                                                                                                                       | Description of the Known and Future Likely Interactions<br><br>G) Discharge of Water                        | 8        | Irish Water would like to see the MetroLink project promote Blue and Green Infrastructure and SUDs wherever possible, to include, planting along road and railway verges and canal banks as these form important corridors for both storm water management, biodiversity, and carbon capture.                                                                                                                                   | The MetroLink drainage design has been developed to incorporate SUDs components and techniques that are in line with CIRIA SuDS manual C753 (2015), Great Dublin Regional Code of Practice and associated GDSDS Technical Documents and Fingal CC Blue/Green infrastructure for Development Guidance Note.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| 17                                                                                                                                                       | Description of the Known and Future Likely Interactions<br><br>H) Wastewater Section 16 Temporary Discharge | 8        | Irish Water does not recommend dewatering to Foul sewers including the North fringe Sewer (NFS) and/or the Swords Wastewater Treatment Plant foul network. Ahead of any proposals to discharge to the public network, a full assessment with Irish Water is required to be carried out and any arrangements agreed with Irish Water prior to works commencing.                                                                  | <p>As outlined in Section 18.3.5.4 of Chapter 18 of the EIAR, during the excavation of stations and/or cut sections there will be some temporary dewatering which will require collection, treatment and attenuation prior to off-site discharge. This discharge of “dewatering water” will be for a limited duration until such time that the base slab to the excavation has been cast, at which point groundwater ingress will be extremely limited. Measures to further reduce the discharge of groundwater will include the re-use of the water on-site for activities such as dust suppression, general cleaning and surface washdown.</p> <p>The key rationale for sending construction phase discharges to sewer is to minimise the potential environmental effects on local receiving waters, particularly along the surface sections of the alignment. The rivers and streams along the alignment are particularly sensitive for the following reasons:</p> <ul style="list-style-type: none"><li>•They include a number of streams identified for salmonid populations such as Atlantic Salmon and Brown Trout. These include the Broadmeadow and Sluice rivers;</li><li>•In addition, all streams that the MetroLink alignment crosses, discharge to the Irish Sea in close proximity to a number of European protect sites including the following: Malahide Estuary SAC, Malahide SPA, Baldoyle Bay SAC, Baldoyle SPA, North Bull Island SAC, North Bull Island SPA and Rockabill to Dalkey Island SAC.</li></ul> <p>The majority of these streams are already degraded, with sections designated as being of poor ecological status. Under the European Union Environmental Objectives (Surface waters) (Amendment) Regulations 2009, as amended it is required to implement measures “requiring the restoration of surface water bodies of less than good status (or good potential as the case may be) to not less than good status (or good potential)”. This is challenging to achieve in these catchments considering the significance of the already degraded water quality.</p> <p>Having regard to the value of the streams (salmonid potential) and the receiving environment (European sites), and the already degraded water status, these streams are considered very sensitive. For these reasons it is considered appropriate to discharge to sewer rather than risk further degradation of these sensitive waterbodies.</p> <p>Ahead of any proposals to discharge to the public network, TII will carry out the required assessment of the affected sewer and proposed discharge. It would be helpful if IW could make available its full assessment criteria so TII and its designers and contractors can ensure all the information IW require is provided.</p> |

| Letter Re: Railway Order Application- Metro North: Estuary through Swords, Dublin Airport, Ballymun, Glasnevin and City Centre to Charlemont, Co. Dublin |                                                                                                      |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 18                                                                                                                                                       | Description of the Known and Future Likely Interactions<br><br>I) Drinking Water Protection Measures | 8        | It is noted that Irish Water’s internal assessment of the subject development, identified 3 no. potential abstraction points the development has the potential to impact on. These points are all located in close proximity to the proposed Dublin Airport Metro Station. While the application should have consideration for these abstraction points and any potential impacts, it is noted that none of these abstraction points are in the ownership of Irish Water, nor are they connected to Irish Water’s network. Given these points are not owned by Irish Water, they have not formed part of the subject assessment. However, Irish Water notes that an assessment of these points is included in Chapter 20.3.3.7 of the EIAR. Irrespective of above, the applicant must ensure that proposals do not impact any Irish Water Drinking Water Source and/or waters used for the abstraction of drinking water nor cause any deterioration in quality during the construction and operational phase of the proposed development.                                                                                                                   | As noted by the observation, TII have assessed these abstraction points and can confirm that none of the MetroLink proposals will impact any Irish Water drinking water source and/or waters used for the abstraction of drinking water nor cause any deterioration in quality during the construction and operational phase of the proposed development.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| 19                                                                                                                                                       | Description of the Known and Future Likely Interactions<br><br>J) Catchment Drainage Area Plan       | 9        | <p>The MetroLink runs through four DAP areas of the catchment. Irish Water is assessing these four areas in respect to growth requirements. The City Center Sewerage Scheme (CCSS) initial project scoping under the DAP is complete and is inclusive of growth projections agreed with Dublin City Local Authority. The Swords DAP is in the final stages of initial project scoping with growth provisions agreed with Fingal Local Authority. There has been an additional growth scenario created for the MetroLink densification based on discussions with both Fingal and Dublin City Local Authorities.</p> <p>Irish Water is progressing planned assessments for the remaining North Fringe Sewer (NFS) and Main lift DAP areas and Irish Water will adopt the same approach with respect to inclusion of growth projections. Any densification in areas of the Main lift DAP catchment will be captured and all projects in these DAP areas will take into account the full future growth figures when designing infrastructure for the long-term horizons. Areas expected to be relevant include Rathmines and Pembroke drainage catchment(s).</p> | <p>TII confirm that the discharges from MetroLink have been calculated and are applicable to the c100 year design life of MetroLink. The assessments have been issued to IW by way of Pre Connection enquiry forms (as requested by IW) and it is for IW to ascertain if their network is sufficient to receive the MetroLink discharges, combined with any other (non MetroLink) discharges that TII are not sighted on. As is normal with requests to discharge to IW network, the issue will be dealt with in the course of the preconnection process.</p> <p>Future development and impacts of same on the drainage network along the catchment is a matter for Local Authorities and their respective development plans. Any requirements to cater for future growth projections within the Irish Water Network should be confirmed by IW to TII in sufficient time so as to capture them in our designs (at detailed design stage) so as to prevent delays to the overall project programme.</p> |
| 20                                                                                                                                                       | Description of the Known and Future Likely Interactions<br><br>K) Capital Infrastructure Projects    | 9        | <p>The following Irish Water projects must be considered in the context of MetroLink.</p> <p>The Swords Wastewater Pumping Station discussed above,</p> <p>the Rosie Hackett Bridge which is located beside an existing Siphon. The Rosie Hackett siphon project is at early design stage. The main risk is a future construction risk of two major projects occurring in the same area of the quays.</p> <p>The Fosterstown wastewater sewer upgrade (Appendix 3, Figure 1) shows the area interacting with the MetroLink route on R132 bypassing Swords. The carriageway to the Southeast has been ear-marked already for MetroLink therefore Irish Water requires a clear route for our pipe on the other side of the R132 road. This design has been agreed with Fingal Local Authority and Irish Water’s works are planned to start and finish on site in 2023. The applicant is required to continue engagement with Irish Water to ensure there is no impact to the delivery of this public infrastructure.</p>                                                                                                                                       | <p>This is understood and TII is committed to working with IW to ensure the interfaces between these IW projects and MetroLink are managed to enable both parties to achieve their required outcomes. Irish Water have forwarded details of the schemes referenced and TII would propose that a meeting is held with IW to discuss the Rosie Hackett siphon project to ensure that risks to the respective works are coordinated.</p> <p>TII is aware that carriageway to the Southeast has been ear-marked already for MetroLink and will provide a clear route for the pipe on the other side of the R132 road. TII will continue engagement with Irish Water to ensure there is no impact to the delivery of this public infrastructure.</p>                                                                                                                                                                                                                                                        |

Any temporary service connections throughout the construction phase will also be subject to a connection agreement with Irish Water.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | This is understood and agreed. These obligations will also be included within the relevant TII contract specifications.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| 22                                                                                                                                                       | Description of the Known and Future Likely Interactions<br><br>Summary Observations on Paragraphs A-L | 10       | In respect to paragraphs A-L above, and based on the information available, Irish Water is of the opinion that many of the interactions could be supported subject to a Detailed Design being agreed with Irish Water, a comprehensive legal agreement between Irish Water and TII being executed in advance of any works, and other valid agreements including easements for private lands and transfer of ownership, being put in place.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | Please see Responses (3) and (14) above.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 23                                                                                                                                                       | Description of the Known and Future Likely Interactions<br><br>Summary Observations on Paragraphs A-L | 10       | Detailed Design proposals must be in accordance with Irish Water’s Technical Standards, Codes of Practice, and Standard Details and other associated Irish Water requirements. This includes, but is not restricted to, requirements for separation distances between the existing Irish Water assets and proposed structures, other services, trees, etc. Additionally, where a watermain or wastewater sewer is proposed in an area of future restricted access, such as crossing above or below the MetroLink tunnel or tracks, a duplicate watermain or wastewater sewer will be designed and installed to maintain supply in the event of a problem with the future live Irish Water Network, until access is available to carry out repairs.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | <p>It is agreed that detail design proposals for IW infrastructure will be in accordance with IW Technical Standards, Codes of Practice, and Standard Details and other associated Irish Water requirements. However, there will be some locations where due to the congested nature of the environment, IW standards cannot be met. Where this occurs, TII will follow IW’s derogation procedures. It would be helpful if IW could provide a list of all relevant documents to be taken account of, and access to said documents, so that these can be provided to TII designers and contractors.</p> <p>Regarding provision of duplicate infrastructure, TII understand the requirement for this. TII propose that for each location where access to a watermain or wastewater sewer could be restricted that this is reviewed on a case by case basis to determine how access can be best managed. However, TII believe that there are alternatives to simple duplication, including oversized sleeving, or additional valve installation for example. TII are available to consider such alternatives in advance of construction.</p> |
| 24                                                                                                                                                       | Description of the Known and Future Likely Interactions<br><br>Summary Observations on Paragraphs A-L | 10       | The applicant will be required to arrange registration of easements, in accordance with Irish Water requirements, for all locations where diversions / protection measures / new assets for the Irish Water network are proposed for private lands. Where the applicant acquires lands, the applicant is required to engage with Irish Water to agree easements and wayleaves and any other protection measures required to ensure the continued provision of water services. At any locations where infrastructure (pipework and/or above ground assets) for the Irish Water network are proposed, e.g., new wastewater pumping station in the vicinity of the Estuary Roundabout on the R132 and R125 roads in Swords, the associated land is required to be transferred to the ownership of Irish Water. Furthermore, the applicant will be required to ensure access to Irish Water’s existing infrastructure is maintained for Irish Water employees, representatives and contractors during the construction and operational phases of the development and that in the event any Irish Water owned asset being impacted or damaged as a result of the proposed construction and operation of the proposed development, the effects of any impacts or damage will be adequately addressed by TII any damage to Irish Water’s network will be reinstated, to the satisfaction of Irish Water. | Easement/Wayleaves will be provided as appropriate and where TII are able to do so. Please also refer to Responses (12), (13) and (14).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

Dublin |                                                                                                                                                        |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| 25                                                                                                                                                       | Description of the Known and Future Likely Interactions<br><br>Summary Observations on Paragraphs A-L                                                  | 10       | As part of the works TII will need to facilitate third party oversight and/or on-site supervision as required by Irish Water. It should be noted that Irish Water reserve the right to 'step in' and to carry out certain works for example, vibration monitoring or any other specific piece of work (this will be detailed in the legal agreement to be entered into between TII and Irish Water).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | TII will facilitate reasonable IW access to MetroLink works (subject to standard condiitons with regard to health and safety etc) that could have a potential impact on IW infrastructure and or are associated with the provision of IW infrastructure.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

| 27                                                                                                                                                       | Description of the Known and Future Likely Interactions<br><br>M) Greater Dublin Drainage (GDD) Project<br><br>GDD and MetroLink Interaction – Details | 13       | It is highly likely these construction works will coincide, at least for part of this period, with the construction of the GDD project, including construction of the strategically important orbital sewer. This is generally acknowledged in Chapter 30 Cumulative impacts of interaction between other projects and MetroLink, where the GDD project is widely referenced. Based on the extensive discussions that have taken place between TII and Irish Water and the existence of Irish Water’s CPO it assumed that provision has been made by TII to ensure that both projects can be constructed simultaneously.                                                                                                                                                                                                                                                                                                                                                                                                              | <p>Please also refer to Response (4) above. Whether the construction of both projects coincides remains to be seen, given neither project yet has planning approval. Therefore, as set out by our Response (4) above it is important IW and TII work together, with each party equally sharing joint responsibility such that both projects can proceed unconstrained, including ensuring the necessary access required by each party is provided and maintained.</p> <p>Regarding EIAR Chapter 30 and cumulative impacts, whilst as noted above there remains some uncertainty around the respective construction programmes for GDD and MetroLink and hence the interaction of these programmes, it was nonetheless important and necessary to assess the cumulative environmental impact of these projects given coincident construction is a possible scenario.</p> |

| Letter Re: Railway Order Application- Metro North: Estuary through Swords, Dublin Airport, Ballymun, Glasnevin and City Centre to Charlemont, Co. Dublin |                                                                                                                                                                                                                                                                    |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |  |
| 28                                                                                                                                                       | <p>Description of the Known and Future Likely Interactions</p> <p>M) Greater Dublin Drainage (GDD) Project</p> <p>GDD and MetroLink Interaction – Details</p> <p>(i) Constructability: Permanent Wayleaves, Temporary Working Areas and Construction Compounds</p> | 14       | <p>There is a significant overlap of the proposed MetroLink compound at Dardistown (EIAR Chapter 5 MetroLink Construction Phase, diagram 5.43 – figure 2) with the 20m wide permanent wayleave, permanent right of way and the temporary working areas for the proposed GDD project as indicated in Appendix 4, Figure 5. The proposed MetroLink compound also overlaps a temporary working area for the proposed GDD tunnelling works at the Ballymun junction/ R108 crossing. It can be anticipated from the timelines outlined by MetroLink that the construction of both projects is likely to coincide and should be considered by the Applicant and ABP in its assessment. Ongoing access will be required by Irish Water to the permanent wayleave and temporary working areas. In the event that the permanent right of way included in Irish Water's CPO is impacted by the Railway Order, a suitable alternative permanent Right of Way would need to be provided by TII through any lands permanently acquired. It is imperative that Irish Water's ability to construct the proposed pipeline is not impeded by any permanent TII infrastructure. In the event that the pipeline is constructed in advance of the TII works, appropriate measures would need to be put in place to protect the pipeline during TII works. MetroLink drawings should be updated to show the GDD CPO and planning boundaries and for these to be considered in any further assessments.</p> | <p>Please refer to Response (4) and (27) above.</p> <p>In the event that the pipeline is constructed in advance of MetroLink both parties agree to provide for interface collaboration between design teams and provide any details of any construction restrictions that may apply in a timely manner for incorporation into both projects. TII will be responsible for the reasonably and properly incurred cost of the provision and installation etc of such necessary protection measures.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |  |
| 29                                                                                                                                                       | <p>Description of the Known and Future Likely Interactions</p> <p>M) Greater Dublin Drainage (GDD) Project</p> <p>GDD and MetroLink Interaction – Details</p> <p>(ii) Status of GDD Orbital Sewer</p>                                                              | 14       | <p>The proposed GDD orbital sewer is shown on the Applicant's utility drawings as an existing sewer (drawing reference ML1-JAI-URD-SC01_XX-DR-Y-01050 – extract shown in Appendix 4, Figure 4). It is noted that this pipeline has yet to be constructed (as set out above the GDD project is currently the subject of a SID planning application). In addition, it is noted that details and levels as shown in the MetroLink application are inconsistent with those provided by Irish Water in the GDD planning application (GDD planning drawing reference 32102902-2102 – figure 3). The MetroLink application should be updated to reflect the correct details for the GDD orbital sewer.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | <p>Please refer to (4) above, the horizontal alignment is correctly shown, the drawing shall be updated to reflect the correct number of manholes and invert levels and an erratum to the Railway Order Submitted.</p> <p>The details and levels shown for the GDD were previously provided by IW and used in the RO submission. However, subsequent to the submission of the Railway Order application, TII updated the drawings and information to reflect the GDD planning drawings.</p> <p>It will be important that the horizontal and vertical alignment is precisely defined where it crosses the MetroLink alignment for the purpose of design and construction coordination (and these will be provided to ABP at the oral hearing). TII note that the updated correct alignment has been assessed, and whilst it is not considered that an updated GDD alignment has a material impact on the MetroLink Railway Order application, it will be required and used for the detailed design phase.</p> <p>Subsequent detailed discussions with IW have been based on the correct information</p> |  |

| Letter Re: Railway Order Application- Metro North: Estuary through Swords, Dublin Airport, Ballymun, Glasnevin and City Centre to Charlemont, Co. Dublin |                                                                                                                                                                                                                                |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                                                                                       |
| 30                                                                                                                                                       | Description of the Known and Future Likely Interactions<br><br>M) Greater Dublin Drainage (GDD) Project<br><br>GDD and MetroLink Interaction – Details<br><br>(iii) Proposed Embankment: Constructability & Operability Issues | 15       | It is assumed that the timing of construction activities at this location have been considered in combination with the construction of the GDD project. The MetroLink crosses over the GDD pipeline and, depending on timing, may be constructed before, during or after GDD. Consideration should be given by the Applicant to constructability, permanent wayleaves, temporary working areas etc. It should be noted that the GDD project team have engaged extensively with TII since 2013 (previously RPA). Through the course of these discussions, it was envisaged that the MetroLink would pass via a viaduct over the GDD pipeline. The current proposal included in the MetroLink Railway Order application is different and it is now proposed that the MetroLink will cross the GDD corridor via a raised embankment (see figure 4). The embankment solution is expected to result in greater difficulties for construction, operation and maintenance of GDD. The viaduct solution crossing GDD would result in less conflict and would provide greater construction certainty to both Irish Water and TII. It is recommended that this should be resolved in advance of a planning decision to reduce risks to both projects at construction stage. | Please refer to Response (4) above.                                                                                                                                                                                                                                                                   |
| 31                                                                                                                                                       | Description of the Known and Future Likely Interactions<br><br>M) Greater Dublin Drainage (GDD) Project<br><br>GDD and MetroLink Interaction – Details<br><br>(iii) Planning Report                                            | 15       | Irish Water submitted the SID application for the GDD project to An Bord Pleanála in June 2018. This application, as noted above, is a current application with ABP (planning reference PA06F.31213) but does not appear to be referenced as an existing application within the MetroLink Planning Report.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | This is an omission. TII confirm that the GDD planning application has been considered in all of the consideration of alternatives, cumulative impacts and other work in relation to the Dardistown lands. This will be addressed in an erratum to the Railway Order application at the oral hearing. |

| Letter Re: Railway Order Application- Metro North: Estuary through Swords, Dublin Airport, Ballymun, Glasnevin and City Centre to Charlemont, Co. Dublin |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                                     |
| 33                                                                                                                                                       | Conclusion   | 16       | <p>Irish Water is of the opinion that Further Information is required to be provided by TII on certain aspects of the MetroLink proposal, which may have the potential to impact Irish Water's delivery of critical strategic infrastructure. In particular, Irish Water respectfully requests that Further Information be sought in respect of MetroLink interactions with the GDD project, namely:</p> <p>Interactions / constructability of both projects – there is a need for certainty in the interest of orderly developments – particularly having regard to Irish Water's confirmed CPO for the GDD project.</p> <p>o The provision of an overbridge (in place of currently proposed embankment) where both projects interact (as previously discussed with TII) in the interest of constructability and operability</p> <p>o The correct detailing of GDD project on drawings and references to same in TIIs Planning Report is required</p> <p>o Constructability – greater detail is required on the likely interactions between GDD and MetroLink during construction (i.e., Programme Scenarios)</p> | Please refer to Response (4) above. |

| Letter Re: Submission on the Railway (MetroLink to Charlemont via Dublin Airport) Order [2022], dated 16 <sup>th</sup> January 2023 |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| 1                                                                                                                                   | Letter       | 1        | I support and reiterate the content of the submission of my colleague and Labour’s Spokesperson for Transport, Duncan Smith TD. It is essential that completion dates for flagship public transport projects like MetroLink are confirmed and delivered on. The development and strengthening of our public and active transit infrastructure is a valuable tool for the democratisation of transport and vital for the necessary achievement of our climate emissions reduction targets.                                                                                                                                                                                                                              | TII wish to thank you for taking the time to make this submission. Your positive support is gratefully appreciated, and for the reasons you have set out, TII are committed to realising the MetroLink Project to deliver the benefits it will bring. Upon the granting of an Enforceable Railway Order and in accordance with Government direction, TII will aim to deliver the MetroLink Project as soon and as quickly as possible.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 2                                                                                                                                   | Letter       | 1        | It is important that this significant investment is durable to meet the needs of the population. The Luas became overburdened within mere years of its construction. Avoiding such a situation arising with the planned MetroLink project must be a priority.                                                                                                                                                                                                                                                                                                                                                                                                                                                          | <p>To ensure that MetroLink provides sufficient capacity, and as outlined in EIAR Chapter 6, MetroLink Operations and Maintenance, the operational strategy of the proposed Project is driven by the forecasted passenger demand. Passenger demand modelling has been used to predict the numbers of passengers boarding and alighting at each station, and the resulting passenger load on the whole Project, for up to 30 years after opening. Passenger modelling identified that passenger numbers may peak at over 18,000 passengers for the AM peak hour southbound . As is common practice MetroLink has been designed to accommodate these peak hour levels irrespective of when they may occur. On the basis of the modelling prepared for the proposed Project and allowing for future growth in capacity beyond the projection year, the proposed Project is designed to accommodate 20,000 passengers per hour per direction and a train fleet comprising 40 trains for the Forecast Year (2065).</p> <p>Further details to the above figures is provided in EIAR Chapter 9: Traffic and Transport, Appendix A9.4 Traffic and Transport Modelling Plan, with the data refer to above summarised within section 8.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| 3                                                                                                                                   | Letter       | 1        | With that in mind, I draw attention to the views of some of my constituents who are concerned at the dearth of light rail options for residents of South-West Dublin - a matter which has been brought to my attention on many occasions by those residing in Terenure and Kimmage, in particular. I am further aware of the submissions made by persons who advocate a terminus at St. Stephen’s Green as a superior location for such future extensions to South-West Dublin. If these concerns are found to be material, the NTA should take due account of them. Most importantly, a mix of transport modes must be prioritised to rapidly end the overreliance on cars in Dublin, and in the City, in particular. | <p>The views of your constituents are noted, with the issue of "Metro to South West Dublin" referred to within the Greater Dublin Area (GDA) Transport Strategy 2022-2042.</p> <p>The connection from St Stephens Green to Charlemont / Ranelagh is supported by the previous Transport Strategy for Greater Dublin Area (2016-2035) and the current Transport Strategy for Greater Dublin Area (2022-2042). The latter considers a range of options for the onward extension of MetroLink to meet the demand for travel over the period of the strategy. This includes consideration of the need for the upgrade of the Luas Green Line to metro with a metro extension to Dublin south west, south or south east. Whilst the strategy envisages that further extensions will be delivered after 2042, MetroLink which terminates at Charlemont allows for the possible extension of the metro in all the above directions.</p> <p>With regards to the consideration of providing the MetroLink southern interchange at St. Stephen’s Green, TII have undertaken considerable analysis, as set out by EIAR Chapter 7, Consideration of Alternatives, section 7.7.8 and Appendix A7.9 that concluded that Charlemont was a better interchange location than St. Stephen’s Green for the reasons set out below.</p> <p>The proximity of the metro to the Luas line at Charlemont provides for a positive customer experience for all users with short interchange distance and due to the proximity, clear wayfinding and high visibility of the interchange. The interchange arrangements at Charlemont provide for significantly better interchange arrangements compared to a proposed interchange at St Stephen’s Green Station.</p> |

| Letter Re: Submission on the Railway (MetroLink to Charlemont via Dublin Airport) Order [2022], dated 16 <sup>th</sup> January 2023 |              |          |                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
|                                                                                                                                     |              |          | (3) continued         | <p>The section of MetroLink route between St Stephen's Green and Charlemont Stations contributes significantly to the overall benefits of the scheme. It serves a significant area of the south city of Dublin and offers enhanced access from the local area to the city center and a direct connection to Dublin Airport. It serves key trip attractors including residential areas and offices / workplace locations, with high passenger boarding and alighting figures in the peak hours. During the morning peak, at Charlemont station the flows include 1,800 passengers alighting, 2,300 boarding and 1,229 passengers alighting, 2,276 boarding during the evening peak. The passenger numbers contribute significantly to the overall benefits of the scheme and the effect of these benefits outweigh the additional costs that are associated with the delivery and operation of the section from St Stephen's Green to Charlemont station. Further information is available in EIAR Chapter 7: Consideration of the Alternatives, section 7.7.8 MetroLink Southern Terminus Location.</p> <p>The location of the interchange at Charlemont does not preclude onward extension south. An interchange at Charlemont is supported by policy including the Dublin City Development Plan 2022 - 2028 and the Transport Strategy for the Greater Dublin Area. As noted by the GDA Transport Strategy 2022-2042, section 12.3.2, "Charlemont offers the optimal location for the primary interchange with the Green Line in response to growing demand in the longer term and is an appropriate location to facilitate any potential future metro extensions to serve the south west, south or south east of the city region should sufficient demand arise."</p> <p>By extending MetroLink to Charlemont it provides for future proofing of the Green Line, bypassing the capacity constrained Luas on-street running section, and ensures potential future connectivity options are enabled, either to the Green Line or for extensions of the metro.</p> <p>The Charlemont Station interchange provides for increased passenger utilisation of the MetroLink system, thereby increasing the benefits delivered by the Project, reflected by an improved Project Benefit Cost Ration (BCR).</p> <p>The observation made regards "Most importantly, a mix of transport modes must be prioritised to rapidly end the overreliance on cars in Dublin, and in the City, in particular." is a key objective of the MetroLink Project. EIAR Chapter 3, Background to the MetroLink Project, explains how the proposed Project will provide significant benefits not only to those who choose to use it, but also to other transport network users, by generating a modal shift from private car use, thereby reducing the demand for road space and creating the opportunity for the road transport system to achieve optimum levels of efficiency and effectiveness. Also as outlined in Chapter 3, the proposed Project is part of an integrated transport network that also includes for BusConnects and DART+ which are all included under Project Ireland 2040. Together, these projects will result in a reliable, sustainable, affordable, integrated public transport network that will support the economy, help Ireland meet its climate change targets in line with Climate Action Plan 2021 and make Dublin a more live able and sustainable city. Whilst MetroLink is a standalone project that is not dependent on any other projects for its delivery or effective operation, it is nonetheless a critical part of the proposed integrated transport network for the Greater Dublin Area.</p> |

| 1                                                                                                                                                                                            | Relevant Context (paragraph 3)      | 1        | A Strategic Housing Development application (ABP Ref.: 313331-22) was submitted to An Bord Pleanála on the 14th April 2022 relating to our client's lands and is currently awaiting a decision. The proposed development comprises a Strategic Housing Development of 645 no. residential units, in 10 no. apartment buildings, with heights ranging from 4 no. storeys to 10 no. storeys, including undercroft/basement levels (for 6 no. of the buildings). The proposals include 1 no. community facility in Block 1, 1 no. childcare facility in Block 3, and 5 no. commercial units in Blocks 4 and 8, and all associated infrastructure. As discussed further below, the proposed SHD was designed to ensure it will not have any implications for the strategic function of the R132, the planned BusConnects proposals or the proposed MetroLink.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | This information has been noted by the project team and your support is gratefully appreciated.                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |  |
| 2                                                                                                                                                                                            | Grounds of submission (paragraph 1) | 2        | Our client made a previous submission on the Metrolink Preferred Route Public Consultation published in March 2019, and continues to welcome and fully supports the provision of the high capacity, high frequency public transport link.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | See response to Item (1).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |  |
| 3                                                                                                                                                                                            | Grounds of submission (paragraph 4) | 2        | In summary and in accordance with the objectives of the Fosterstown Masterplan 2019, the proposed SHD development has been designed to include a public plaza, located opposite the proposed MetroLink station. A proposed signalised crossing across the Dublin Road (R132) also forms part of the SHD development proposals to provide linkage from the development to the future MetroLink station and will be an arrival destination for people alighting from the MetroLink.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | See response to Item (1).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |  |
| 4                                                                                                                                                                                            | Grounds of submission (paragraph 5) | 3        | Whilst the MetroLink proposals include the pedestrian crossing of the R132 slightly north of that provided for in the proposed SHD, with a bus stop located south of the crossing, this layout remains compatible with the overall SHD proposals, including the proposed public plaza and facilitation of pedestrian crossing in a safe environment to the MetroLink station.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | See Item (1). Further details of how the Fosterstown Station aligns with the relevant planning context can be found in the Planning Report submitted as part of the Railway Order.                                                                                                                                                                                                                                                                                                                                                                                     |  |
| 5                                                                                                                                                                                            | Grounds of submission (paragraph 5) | 3        | The final details of the crossing could be agreed with the NTA, TII and FCC as a condition attached to the Railway Order.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | As noted in response item (4) above, the proposed pedestrian infrastructure aligns with the relevant local planning context, with details provided in the MetroLink Planning Report submitted as part of the Railway Order. TII have engaged with the NTA, and FCC throughout the preliminary design stage to ensure the provisions are compatible with local objectives. This engagement will continue through the detailed design phase of MetroLink. Further details are available within the Planning Report submitted with the MetroLink Railway Order Documents. |  |
| 6                                                                                                                                                                                            | Grounds of submission (paragraph 6) | 3        | In addition to the above, we note that EIAR Chapter 9- Traffic and Transport submitted with the MetroLink Railway Order application, refers to the Fosterstown Masterplan which anticipates the main vehicular access to the masterplan lands from the new Fosterstown Link Road to the north through third party lands. As the new Fosterstown Link Road and the access via the lands to the north are not yet delivered, the proposed Fosterstown North SHD (ABP Ref.: 313331-22) proposes a left-in, left-out temporary junction to the Dublin Road (R132), in order to facilitate much needed residential development on these residential zoned lands adjacent to an existing and planned public transport corridor. The left in / left out junction will be an uncontrolled junction which will not allow right turning vehicles so it will not obstruct the flow of traffic. Access to the proposed development will only be permitted from the northbound lane of the R132. Vehicles exiting the proposed development to travel southbound will be able to use the Pinnock Hill Roundabout to access the southbound side of the R132. To facilitate the left in/left out access, this only requires a break in the bus lane (in both the existing road layout and the future Bus Connects proposals) and to install plastic bollards along the existing central reservation, to prevent right turning. | This information has been noted by the project team and your support is gratefully appreciated.                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |  |

|                                                                                                                                                                                              |                                     |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                                    |

| 1                                                                                                                                                | Letter       | 1        | I wish to extend my support to submissions made by the MetroSouthWest Group, MetroRethink Group and the residents of Dartmouth Road, Dartmouth Square and Cambridge Terrace.<br><br>I ask that the content of these submissions be given the utmost consideration.                                                                                                                                                                                                                                                | TII can confirm that all submissions made have been reviewed and considered.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| 2                                                                                                                                                | Letter       | 1        | <p>The single biggest concern for Dublin arising from this proposed Railway Order is the decision to locate the terminus at Charlemont, which has a knock-on effect on the future expansion of Metrolink.</p> <p>Inexplicably, there has been no assessment of continuing the MetroLink as far as Tallaght Town Centre and this proposal clearly merits consideration if we are going to be ambitious about our future planning for Dublin City and make the 15 minute city vision a reality for our capital.</p> | <p>TII do not agree that Charlemont is the incorrect location for an interchange with the Luas Green Line or that it prejudices future options for integration with the wider transport network for the reasons set out below.</p> <p>In the Emerging Preferred Route Report, Charlemont was identified as the last station prior to the tie-in to the Green Luas Line which was intended to be upgraded to Metro standard. as outlined in EIAR chapter 7, decision to terminate at Charlemont instead was driven by three factors:</p> <p>(a) the additional impacts that would be involved in upgrading the Luas south of Charlemont as a result of the proposed adoption of a high degree of automated operations (GoA4);</p> <p>(b) the development of alternatives to accommodate increased capacity on the Luas line south of Charlemont without that upgrade; and</p> <p>(c) Feedback received during the EPR non-statutory consultation.</p> <p>St Stephen's Green West was not considered a feasible terminus location as it would prejudice the delivery of a station at Tara Street, which is the DART interchange for the project.</p> <p>The proximity of the metro to the Luas line at Charlemont provides for a positive customer experience for all users with short interchange distance and due to the proximity, clear wayfinding and high visibility of the interchange. The interchange arrangements at Charlemont provide for significantly better interchange arrangements compared to an alternative interchange at St Stephen's Green Station.</p> <p>The detailed analysis done for the Railway Order application further confirms that the section of MetroLink route between St Stephen's Green and Charlemont Stations contributes significantly to the overall benefits of the scheme. It serves a significant area of the south city of Dublin and offers enhanced access from the local area to the city centre and a direct connection to Dublin Airport. It serves key trip attractors including residential areas and offices / workplace locations, with high passenger boarding and alighting figures in the peak hours. During the morning peak, at Charlemont station the flows include 1,800 passengers alighting, 2,300 boarding and 1,229 passengers alighting, 2,276 boarding during the evening peak. The passenger numbers contribute significantly to the overall benefits of the scheme and the effect of these benefits outweigh the additional costs that are associated with the delivery and operation of the section from St Stephen's Green to Charlemont station. Further information is available in Chapter 7: Consideration of the Alternatives, section 7.7.8 MetroLink Southern Terminus Location.</p> <p>The location of the interchange at Charlemont does not preclude onward extension south. An interchange at Charlemont is supported by policy including the Dublin City Development Plan 2022 - 2028 and the Transport Strategy for the Greater Dublin Area.</p> <p>By extending MetroLink to Charlemont it provides for future proofing of the Green Line, bypassing the capacity constrained Luas on-street running section, and ensures potential future connectivity options are enabled, either to the Green Line or for extensions of the metro.</p> <p>The Charlemont Station interchange provides for increased passenger utilisation of the MetroLink system, thereby increasing the benefits delivered by the Project, reflected by an improved Project Benefit Cost Ratio (BCR).</p> <p>The connection from St Stephens Green to Charlemont / Ranelagh is supported by the current Transport Strategy for Greater Dublin Area (2022-2042). The Transport Strategy was prepared by the National Transport Authority, scrutinised by the Joint Oireachtas Committee on Transport and approved by the Minister for Transport. It notes in section 12.3.2, "Charlemont offers the optimal location for the primary interchange with the Green Line in response to growing demand in the longer term and is an appropriate location to facilitate any potential future metro extensions to serve the south west, south or south east of the city region should sufficient demand arise."</p> |

Dublin |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
|                                                                                                                                                  |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | <p>Under the Planning and Development Act 2000, the Transport Strategy is "a consideration material to the proper planning and sustainable development of the area or areas in question." Development Plans are required to be consistent with the Transport Strategy. The Dublin City Development Plan 2022-2028 envisages this station at Charlemont in policy SMT22 "To support the expeditious delivery of key sustainable transport projects so as to provide an integrated public transport network with efficient interchange between transport modes, serving the existing and future needs of the city and region and to support the integration of existing public transport infrastructure with other transport modes. In particular the following projects subject to environmental requirements and appropriate planning consents being obtained: ... MetroLink from Charlemont to Swords".</p> <p>Accordingly, the location of the Charlemont station is supported by detailed project-level analysis and the strength of that location is reflected at the highest levels of transport and land use planning and such is fully consistent with the proper planning and sustainable development of the area.</p> <p>The current Transport Strategy considers a range of options for the onward extension of MetroLink to meet the demand for travel over the period of the strategy. This includes consideration of the need for the upgrade of the Luas Green Line to metro with a Metro extension to Dublin south west, south or south east. Whilst the strategy envisages that further extensions will be delivered after 2042, MetroLink which terminates at Charlemont allows for the possible extension of the Metro in all any of the above directions.</p> |
| 3                                                                                                                                                | Letter       | 2        | <p>The existing feasibility study makes clear that the continuation of MetroLink to Southwest Dublin is technically feasible but not necessary to consider until the period after 2042.</p> <p>This is a deeply dissappointing conclusion, particularly when the communities of Terenure and Harold's Cross were promised so much more by the now Minister for Transport when he was an opposition TD.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | <p>As noted by response (2) above, the proposed station at Charlemont provides the flexibility for future extension of the Metro south if sufficient demand rises.</p> <p>The Transport Strategy considers a range of options for the onward extension of MetroLink to meet the demand for travel over the period of the strategy. This includes consideration of the need for the upgrade of the Luas Green Line to Metro with a Metro extension to Dublin south west, south or south east. Whilst the strategy envisages that further extensions will be delivered after 2042, MetroLink which terminates at Charlemont allows for the possible extension of the metro in all the above directions.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 4                                                                                                                                                | Letter       | 2        | <p>In 2019, the now Minister for Transport and the Green Party advertised on bus shelters plans for a Metro South West as well as a plan for Metro to Knocklyn and UCD. In opposition in 2019, Eamon Ryan TD, as he was then, made clear that his "preferred route" was to prioritise the Metro for "Harold's Cross, Terenure, Knocklyon, Firhouse and Tallaght. " In explaining his rationale, in a speech to Dail Eireann the now Minister rightly observed that this is "an area that is atrociously served by public transport. "</p> <p>We simply have to demonstrate the type of bold ambition that Eamon Ryan TD as a member of the opposition rightly lambasted his predecessor for lacking, but which has not been improved upon in this proposed Railway Order.</p> <p>'Maybe* in 2042 is not a laudable aspiration to make the type of transformative change to our public transport system that is so desperately needed.</p> | <p>As noted above, MetroLink is being delivered in accordance with the policy set by the GDA Transport Strategy which does not preclude future extension of the Metro to the south.</p> <p>TII would also note that MetroLink is also a transformative project, and will, as noted by EIAR Chapter 3, divert 6.8 million car trips per annum in the early years, growing to 12 million per annum by 2045, resulting in a strong modal shift from private car use along all sections of the alignment</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

| Submission No.                                                                                                                                   |              |          | 136                                                                                                                                                                                                                                                                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |

| Re: Case reference: NA29N.314724 - 314724: Estuary through Swords, Dublin Airport, Ballymun, Glasnevin and City Centre to Charlemont, Co. Dublin |              |          |                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| 5                                                                                                                                                | Letter       | 2        | If the tunnel is bored as far as Manders Terrace, it is difficult to see how MetroLink could be extended to include suburbs such as Portobello, Lr. Rathmines, and Harold's Cross.                                                                                          | Future Metro services south of Charlemont do not form part of the Metrolink scheme as presented under the Railway Order. TII's role is to deliver Metrolink as supported by the Transport Strategy for Greater Dublin Area (2022-2042) and Dublin City Development Plan 2022-2028. The connection from St Stephens Green to Charlemont / Ranelagh is supported by the current Transport Strategy. The Transport Strategies were prepared by the National Transport Authority, scrutinised by the Joint Oireachtas Committee on Transport, and approved by the Minister for Transport. It notes in section 12.3.2, "Charlemont offers the optimal location for the primary interchange with the Green Line in response to growing demand in the longer term and is an appropriate location to facilitate any potential future metro extensions to serve the southwest, south or southeast of the city region should sufficient demand arise."                                                                                                                                                                                                                                                                                                                             |
| 6                                                                                                                                                | Letter       | 2        | I would ask the Board to consider which parts of the proposed Railway order should be granted now to allow construction to proceed as soon as possible, and which parts could be either amended or request for reconsideration considered, namely after St Stephen's Green. | <p>TII would note that an end of line station at Charlemont, rather than St Stephen's Green has been proposed for the reasons set out below. TII would also further note that a scheme which terminates at St Stephen's Green would not be consistent with the Transport Strategy for Greater Dublin Area (2022-2042). In addition any decision to terminate the scheme at St Stephen's Green will significantly impact on the overall viability and benefits of scheme.</p> <p>The connection from St Stephens Green to Charlemont / Ranelagh is supported by the previous Transport Strategy for Greater Dublin Area (2016-2035) and the current Transport Strategy for Greater Dublin Area (2022-2042). The latter considers a range of options for the onward extension of MetroLink to meet the demand for travel over the period of the strategy. This includes consideration of the need for the upgrade of the Luas Green Line to Metro with a metro extension to Dublin south west, south or south east. Whilst the strategy envisages that further extensions will be delivered after 2042, MetroLink which terminates at Charlemont allows for the possible extension of the metro in all the above directions.</p> <p>Please refer to response item (2).</p> |
| 7                                                                                                                                                | Letter       | 2        | This application should be futureproofed so that a decision taken today, does not limit the possibilities of the Metro line into the future.                                                                                                                                | As noted by the responses above, the proposed station at Charlemont does not preclude the future extension of metro (including to the south-west) and is consistent and compliant with the GDA Transport Strategy 2022-2042 (published in January 2023) in which states that the south city terminus at Charlemont offers the optimal location for interchange with the Green Line in response to growing demand in the longer term and is an appropriate location to facilitate any potential future metro extensions to serve the south west, south or south east of the city region should sufficient demand arise.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

However, there needs to be recognition that it is a second-best project which results from the political failure to recognise the necessity for substantial and sustained rail investment in the GDA (Greater Dublin Area).</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | <p>TII thank you for your submission and stated support for the delivery of MetroLink. TII as the Government Agency responsible for delivering MetroLink, are committed to expediting the delivery of this transformative project on receipt of an Enforceable Railway Order.</p> <p>EIAR Chapter 7 (Consideration of Alternatives) details the decision-making process that has led to the development of the proposed Project, including the assessment of alternative modes of transport such as rail. The assessment identified an Optimised Metro North (LR7) as the best medium- and long-term transport project for the Greater Dublin Area for the following reasons:</p> <ul style="list-style-type: none"><li>* It was the most economically advantageous scheme when compared to other options, delivering the highest benefit to cost ratio (BCR) of 1.5, almost double the BCR of the next best scheme (Tunnelled Luas);</li><li>* It generated the highest level of transport benefits when compared to other options, with the highest number of additional public transport trips generated in the morning peak travel period;</li><li>* It provided a new strategic public transport corridor, avoiding reliance on either the existing heavy rail lines or the Luas Cross City line;</li><li>* It delivered a connection right into the centre of the city, serving O'Connell Street and St. Stephen's Green;</li><li>* It retained the opportunity to extend Luas Cross City to Finglas, which would not be feasible if the tunnelled Luas options were selected, and it avoided reducing the service level on Luas Cross City to Cabra and Broombridge;</li><li>* Due to the high level of segregation, it was considered to significantly increase capacity to allow for potential future growth along the corridor, when compared to other options;</li><li>* It could potentially be extended southwards in the longer term to alleviate high travel demand on the Luas Green Line, and ultimately form a complete north south metro corridor traversing both the north and south city; and</li><li>* This option delivered the highest safety benefits when compared to other options.</li></ul>                                                                                                                                                                                                                                                                                                                                                                                                       |
| 2                                                                                                                                                           | Outstanding controversies: (1) Tara Street and Stephens Green | 1        | <p>Outstanding controversies: (1) Tara Street and Stephens Green</p> <p>Both of these are changes from the original plans for Metro North as originally approved by ABP which had no Tara Street station and Stephen's Green station was on the West side of the Green. These changes have been partly justified in terms of reducing construction disruption, but appear in fact to derive from the assumption that Dart Underground (the 'Interconnector') will never be built. This necessitates some interchange with suburban rail, hence the Tara Street station. Given the effective abandoning of Stephens Green as an underground station for the Interconnector the Stephen's Green Metrolink station can be more easily constructed on the East side of the Green. It is claimed that this 'interconnects' with the Luas but this is an exaggeration and stretches the meaning of 'interconnection'. Passengers wishing to change from Metrolink to Luas will have to walk the length of Stephens Green in the open air.</p> | <p>As outlined by EIAR Chapter 3 (Background to the MetroLink Project) one of the key objectives of the Project is the integration of it with the wider transport network that also includes for BusConnects and DART+ which are all included under Project Ireland 2040. Together, these projects will result in a reliable, sustainable, affordable, integrated public transport network that will support the economy, help Ireland meet its climate change targets in line with Climate Action Plan 2023 and make Dublin a more liveable and sustainable city. A station at Tara Street provides good interchange opportunities, serves important key trip attractors in the study area with high potential passenger trips. This option also takes a direct and short route through areas of high demand in the centre of the study area.</p> <p>A station on St Stephen's Green West is not preferred for several reasons:</p> <p>If a station was placed on St Stephen's Green West, the alignment between the proposed Tara Station and a station on St Stephen's Green West would result in an undesirable horizontal reverse curve and an alignment greater than 1000m long that would necessitate an intermediate intervention shaft located somewhere between these stations to comply with the MetroLink Fire Strategy. Additional construction would be required to provide such a facility, similar in size to the proposed Albert College Park Intervention shaft. This could feasibly be situated in the Trinity College Dublin sports grounds but would import additional environmental impacts and cost.</p> <p>TII note that it is Government policy to provide a station and interchange with the Luas Green Line at Charlemont, as set out by the GDA Transport Strategy 2022 – 2042. Should a station be placed on St Stephen's Green West, the alignment between a station located here and the proposed Charlemont Station would also result in an undesirable horizontal reverse curve and an alignment that is greater than 1000m long, and would thus again require an intervention shaft similar to the proposed Albert College Park Intervention shaft to be provided. This would be expected to result in significant demolition and redevelopment in an existing built-up area.</p> <p>In both cases, compared to the proposed alignment that runs much more directly between Tara, St Stephen's Green and Charlemont, the additional length of tunnel and the addition of two intervention shafts generated by locating a station on St Stephen's Green West is uneconomic in comparison.</p> |

| Re: Case reference: NA29N.314724 - MetroLink. 314724: Estuary through Swords, Dublin Airport, Ballymun, Glasnevin and City Centre to Charlemont, Co. Dublin |                                                            |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
|                                                                                                                                                             |                                                            |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | <p>As a potential station location, St Stephen's Green West itself is a very constrained location due to the presence of buildings, Luas and St Stephen's Green Park. Maintaining the operation of the Luas during station construction would be complex and challenging with significant disruption expected, whilst the impacts on St Stephen's Green Park would be greater for a station in this location compared to the proposed location on St Stephen's Green East. This would be the result of; the likely need to place more of the station in the Park compared to the proposed station on St Stephen's Green East; it would impact an area of the Park that has greater amenity value than St Stephen's Green East due to the nearby Park entrance adjacent to the southern end of Grafton Street, and there would be a risk of impacting the existing Park lake.</p> <p>In summary, an alignment that links the proposed Tara, St Stephen's Green East and Charlemont stations is a more direct and economic alignment, does not require additional intervention infrastructure, avoids a complex engineering interface with the Luas Green Line, impacts the Park less and has less potential for disruption during the construction phase.</p> <p>It is acknowledged that passengers wishing to interchange between Luas and MetroLink at the St. Stephen's Green station will have a 500m-walk along a route either through St Stephen's Green Park or along the footpath north of the park. The interchange time is calculated at 7.58 minutes. However, the interchange arrangements at Charlemont provide for a significantly better connection with Luas compared to St. Stephens Green Station, where the interchange time is calculated at 2.9 minutes. Interchange times and routes are detailed in Appendix A7.9 (Terminus Station at Charlemont compared to St. Stephen's Green).</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 3                                                                                                                                                           | Outstanding controversies (2)<br>Termination at Charlemont | 2        | <p>Outstanding controversies (2) Termination at Charlemont</p> <p>One reason for the opposition to the upgrading of the Green Line through Ranelagh and further South was the complete failure of the NTA to consider the extent of 'community segregation' (XXX) that this would entail. Thus while a light rail / tram can weave through streets and even enhance the streetscape, an above ground metro with ATO has to be completely separated from its immediate surroundings. The NTA has to understand that transport systems inevitably involve issues of urban design. . . The proposed routing of the Metrolink extension to the South West as a primarily underground route would not raise these issues. However, such an extension cannot remain just another fantasy on the NTA's maps. Such an extension would make it more logical for there to be a genuine interconnection with the Luas at Stephen's Green with the station (see above) located on the West side of the Green.</p> | <p>The connection from St Stephens Green to Charlemont is supported by the previous Transport Strategy for Greater Dublin Area (2016-2035) and the current Transport Strategy for Greater Dublin Area (2022-2042). The latter considers a range of options for the onward extension of MetroLink to meet the demand for travel over the period of the strategy. This includes consideration of the need for the upgrade of the Luas Green Line to metro with a metro extension to Dublin south west, south or south east. Whilst the strategy envisages that further extensions will be delivered after 2042, MetroLink which terminates at Charlemont allows for the possible extension of the metro in all the above directions.</p> <p>The proximity of the metro to the Luas line at Charlemont provides for a positive customer experience for all users with short interchange distance and due to the proximity, clear wayfinding and high visibility of the interchange. The interchange arrangements at Charlemont provide for significantly better interchange arrangements compared to an interchange at St Stephen's Green Station.</p> <p>The section of MetroLink route between St Stephen's Green and Charlemont Stations contributes significantly to the overall benefits of the scheme. It serves a significant area of the south city of Dublin and offers enhanced access from the local area to the city centre and a direct connection to Dublin Airport. It serves key trip attractors including residential areas and offices / workplace locations, with high passenger boarding and alighting figures in the peak hours. During the morning peak, at Charlemont station the flows include 1,800 passengers alighting and 2,300 boarding, and 1,229 passengers alighting and 2,276 boarding during the evening peak. The passenger numbers contribute significantly to the overall benefits of the scheme and the effect of these benefits outweigh the additional costs that are associated with the delivery and operation of the section from St Stephen's Green to Charlemont station. Refer to EIAR Chapter 3.</p> <p>The location of the interchange at Charlemont does not preclude onward extension south. An interchange at Charlemont is supported by policy including the Dublin City Development Plan 2022 - 2028 and the Transport Strategy for the Greater Dublin Area. As noted by the GDA Transport Strategy 2022-2042, section 12.3.2, "Charlemont offers the optimal location for the primary interchange with the Green Line in response to growing demand in the longer term and is an appropriate location to facilitate any potential future metro extensions to serve the south west, south or south east of the city region should sufficient demand arise."</p> <p>By extending MetroLink to Charlemont it provides for future proofing of the Green Line, bypassing the capacity constrained Luas on-street running section, and ensures potential future connectivity options are enabled, either to the Green Line or for extensions of the metro.</p> <p>The Charlemont Station interchange provides for increased passenger utilisation of the MetroLink system, thereby increasing the benefits delivered by the Project, reflected by an improved Project Benefit Cost Ration (BCR).</p> <p>Please refer to response Item (2) regarding the siting of St. Stephen's Green East as the preferred location for the MetroLink station over St. Stephen's Green West.</p> |

| 4                                                                                                                                                           | A good but isolated project instead of connecting GDA | 2        | <p>A good but isolated project instead of connecting GDA</p> <p>Discussion of Metrolink has become just another isolated project justified purely in terms of the predicted numbers travelling along and within this specific corridor (see the NTA GDA plan). It is only marginally part of any broader transport network. By contrast the interconnector was the centrepiece of a proposed transport network for Dublin as a whole. It is important to notice that a 'Midterm Review' of Transport 21 back in 2010 suggested that given the new (then) financial constraints, the T21 programme should be re-configured with DART Underground and Luas Cross-City prioritised over Metro North. This was in terms of value for money, equity and the impact on the city as a whole.</p>                                                                                                                                                                                                                                                                                                                                                                  | <p>TII disagree that MetroLink is an isolated project. As detailed in Chapter 3 (Background to the MetroLink Project), the proposed Project is part of an integrated transport solution that also includes for BusConnects and DART+ which are all included under Project Ireland 2040. Together these projects will result in reliable, sustainable, affordable, integrated public transport that will support the economy, help Ireland meet its climate change targets in line with Climate Action Plan 2023 and make Dublin a more liveable and sustainable city.</p> <p>The Planning Report submitted with the Railway Order application identifies and considers the existing policy framework for the MetroLink project in the context of relevant national, regional and local planning strategies, plans and policy documents. It concludes that the Project complies with and supports the policies set out in NTA's Transport Strategy for the GDA 2016-2035 through the commitment to deliver a high-capacity high-frequency cross-city public transport link to serve Dublin Airport, institutions, facilitate multi-modal interchange with other cross city transport modes to enhance connectivity and the provision of a strategic P&amp;R Facility north of Swords.</p> <p>MetroLink will interchange with key existing and planned high-capacity public transport infrastructure proposed for the region. It will not preclude the future delivery of DART+ Tunnel, formerly known as the DART Underground project, which will be subject to a route selection process for a new project.</p> <p>MetroLink will align with the bus network along the scheme and enhance the interchange between the various modes of public transport operating in the city and wider metropolitan area, both now and in the future. The design has been developed with this in mind and, in so far as possible, is seeking to provide for improved existing or new interchange opportunities with other transport services.</p> |
| 5                                                                                                                                                           | A good but isolated project instead of connecting GDA | 2        | <p>Nearly twenty years ago a study used interviews with transport experts to explore possible future scenarios for Dublin in 2026. The experts' 'realistic' scenario suggested that by then the 'prestige project' of a metro to the airport would:</p> <p>'Ensure that the city centre remains attractive enough and accessible enough to serve as a recreational centre and tourist destination. However the city centre is an island in a vast suburban sprawl for expanding the rail network for inhabitants has been defined as too expensive compared with a single line to the airport for visitors' (Wickham, 2006. p. 205).</p> <p>In all fairness Metrolink as currently planned will give accessibility North of the airport (Swords etc). However that does not detract from the key point that the current route will make creation of a public transport network even more disjointed. It is too late to change it, but there should be a public recognition - not least by transport ministers - that prioritising Metrolink over the Interconnector has removed a key component of any public transport system for the GDA as a whole.</p> | <p>Please refer to response item (4) above in relation to MetroLink interconnectivity and compliance with national, regional and local transport strategy and policy.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| 6                                                                                                                                                           | Delays have made the need for investment even greater | 2        | <p>Delays have made the need for investment even greater</p> <p>International experience shows that the possibility of shifting large numbers of car journeys to more sustainable modes is greatest where there is a transport network which makes much of the city accessible to as many people as possible without a car. This is possible not only in very large metropolitan areas (e.g. London) but also in somewhat smaller metropolitan areas such as Dublin (Newman et al, 2013). Consequently meeting Ireland's climate change targets for transport requires sustained investment in rail in the GDA. Further delays exacerbate the problem and increase the need for such expenditure down the line. Cancelling and postponing transport projects has already made the situation for worse than it need be (Caulfield et al, 2020).</p>                                                                                                                                                                                                                                                                                                         | <p>Please refer to response item (1) in relation to the delivery of the Project and the consideration of rail alternatives.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

| Submission No.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |              |          | 139                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |  |

Dublin                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |  |
| 1                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | Letter       | 1        | We are writing to make an objection in relation to the Metrolink proposed to be constructed under our property at 80 Botanic Road, Glasnevin, Dublin 9, land tag/reference number: ML4M-U32, area number 304. As the tunnel is proposed for under our property I believe we did not need to include the €50 fee as it is free of charge for us to make an objection.                                                                                                                                                                                                                                        | That is correct, as a directly affected property owner, no fee is due for your submission.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |  |
| 2                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | Letter       | 1        | We are very happy for the MetroLink station to be located nearby as it is a wonderful opportunity for our area. Our main concern is the schedule of works during construction, as we are located on Botanic Road and it will involve the movement of significant additional construction related traffic on the route to the Metro station site for a prolonged period of time. This traffic could seriously impact our quality of daily life and our quality of sleep at night, if the traffic and construction were permitted to take place 24 hours a day as it appears is being suggested in the plans. | TII welcome your support for the proposed nearby MetroLink station and recognise your outstanding concerns which we will address below.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |  |
|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | As referred to in EIAR Appendix A9.2 Overall Project Traffic & Transport Assessment, TII have, through pre-construction planning in advance of the Railway Order, anticipated the implications of the proposed works on the locality, particularly traffic and accordingly have provided mitigation strategies in the EIAR for the construction phase. The proposed traffic management mitigation measures during the construction phase are outlined in section 7.1 of Appendix A9.2 Overall Project Traffic and Transport Assessment. During the Main Works for Glasnevin Station, no road closures or lane reductions are required. During the Enabling Works for Glasnevin Station, the removal of 90m of bus lane on Prospect Road northbound is required, with priority given to pedestrians. The anticipated impacts on traffic and transport as a result of the works are detailed below.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |  |
|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | EIAR Appendix A9.5 Scheme Traffic Management Plan section 7.6 details the impacts to road users in the vicinity of the proposed Glasnevin Station. The works will attract additional traffic to and from this station location, with anticipated vehicle movements during the peak construction phase adding an average of approximately 50 additional daily movements each way to the existing traffic flows. The pre-construction planning and construction approvals process for traffic management at Glasnevin Station are set out below. The Advanced Enabling works for Glasnevin Station result in a slight impact for general traffic. Results indicate that the bus lane/general traffic lane removal will result in a slight impact on the section of road where the capacity is decreased, with an increase of volume of 3% in the morning peak and a 2% increase during the evening peak. This increase in volume, primarily due to public transport using the general traffic lane, results in a slight increase in driver delay on Prospect Road (which links to Botanic Road), of approximately 40 seconds, in the immediate area of the works during the morning peak. During the evening peak, a similar impact is shown in the results, however there is also additional delay on the Prospect Road/Whitworth Road junction, specifically on the southern and eastern approach arms where the additional delay time is 30 seconds and 21 seconds respectively. |  |
| During the Main Works, as the construction site boundary is primarily contained away from the traffic network, there is likely to be no significant impact on traffic flows throughout the construction period while temporary traffic management is implemented. Analysis shows that construction traffic movements will likely result in a minor impact on the nearby signalised junctions and on Prospect Road (R108), however traffic flow will be generally unaffected. There will be some impact on Prospect ROad (R108) where site vehicles routeing from the north to the site will be required to take a right turn into the site, leading to an increase in HGVs in the area. |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |  |

|                                                                                                                                                           |              |          |                                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

| Letter Re: Railway Order Application - Metro North: Estuary through Swords, Dublin Airport, Ballymun, Glasnevin and City Centre to Charlemont, Co. Dublin |              |          |                                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|                                                                                                                                                           |              |          | (2) continued                                                       | <p>Model outputs indicate that there will be minimal change in HGV volume as in both the morning and evening peaks, the roads immediately surrounding the station show there is little change in the HGV flows.</p> <p>Chapter 5 of the EIAR (MetroLink Construction Phase) explains that traffic management plans for the construction phase of the Project have been developed to minimise the impact on road users, and to maintain access to businesses and other premises.</p> <p>The control of construction vehicles in terms of their hours of operation and restrictions on vehicle size and weight have also been considered. This is detailed in section 6.1. of Appendix A5.1 Outline CEMP. It has been assumed that regular HGV deliveries to Glasnevin will be restricted outside of standard hours, and therefore 24hr traffic and construction impacts are not anticipated. As such, impacts to sleep or quality of life as a result of traffic movements are not anticipated. This is referred to in EIAR Appendix 5.5, 8.6 Traffic Management. Out of hours deliveries at Glasnevin are anticipated, but these typically would be either: abnormal load deliveries requiring an Abnormal Load Permit issued by An Garda Síochána and DCC; or deliveries during any occasional weekend track possession works planned at Glasnevin.</p> <p>Prior to implementation, all traffic management measures will be agreed with DCC and where relevant, consultation with An Garda Síochána and other statutory stakeholders will be undertaken. The design of traffic management measures and highways works is based on achieving the key objective of maintaining continual access to all properties during the works. Where necessary, a safe alternative route will be provided for pedestrians and vulnerable road users, such as children, and persons with restricted mobility, to maintain pedestrian access to premises. Where detour routes are required, these will be kept as short as possible and detour signage will be clear and easy to understand. All construction sites will be designed to be as unobtrusive as possible. See EIAR section 11.6.1.2 detailing construction activity mitigations for the population in general.</p> <p>As outlined in EIAR Appendix A5.1 Outline Construction Environmental Management Plan - CEMP, the appointed contactor(s) will be required to implement the appropriate mitigation measures in relation to traffic and transportation during construction. Following appointment, the contractor(s) will be required to develop an updated contract-specific CEMP which will detail all measures to be employed in relation to all potential impacts on traffic and transportation.</p> |

| Letter Re: Railway Order Application - Metro North: Estuary through Swords, Dublin Airport, Ballymun, Glasnevin and City Centre to Charlemont, Co. Dublin |              |          |                                                                                                                                                                                                                                                                                                                                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| 3                                                                                                                                                         | Letter       | 1        | We are worried about vibration from this traffic and how this could affect our property, and the dust and pollution it will also cause. We have huge concerns over this as currently our road is very quiet in terms of traffic flow from 7pm onwards in the evening until 7.30am in the mornings. We suggest a residents monitoring group to keep an eye on this. | <p>TII notes concerns in relation to your property as a result of traffic impacts. Please note that as your property is located approx. 400m away from the Construction Site, impacts such as vibration, dust, emissions and noise are unlikely as per study areas set out within Chapters 13 &amp; 16 of the EIAR which have assessed traffic impacts respectively. Appendix A9.5 STMP also outlined HGV haulage routes to Glasnevin. HGVs going towards the site will only join the R108 Botanic Road from Prospect Way and therefore will not pass your property. In relation to monitoring, the appointed Contractor will be required to undertake monitoring measures to ensure compliance throughout the duration of works. As detailed in Appendix A5.1 Outline CEMP, a Project Construction Traffic Forum will be established for local stakeholders to address any concerns regarding construction traffic.</p> <p>On a general note of impacts from traffic as a result of construction, the following paragraphs outline the general assessment done within the Glasnevin area and the respective mitigation measures that will be employed.</p> <p><u>Noise &amp; Vibration</u><br/>Potential impacts associated with noise and vibration during the construction phase of the proposed Project are addressed in Chapter 13 (Airborne Noise &amp; Vibration) of the EIAR with mitigation measures proposed where required. The assessment of airborne noise and vibration during the construction of Glasnevin Station includes the consideration of the closest noise sensitive receptors to the works. Mitigation measures to reduce noise from construction traffic are limited to restricting speed limits, maintaining road surfaces and ensuring all vehicles are properly maintained. In addition, any coverings on construction vehicles will be securely fastened before leaving site to avoid excessive 'rattling'. Chapter 13, Section 13.5.2.6.9 notes that construction traffic noise impacts in this area are neutral to not significant based on the peak construction month in 2028.</p> <p><u>Air Quality</u><br/>The EIAR has fully assessed the potential air quality impacts on the local population, (including dust and other air quality emissions impacts) and proposed mitigation measures in EIAR Chapter 16 (Air Quality) in relation to traffic. As detailed in EIAR Chapter 16 (Air Quality), the modelling of road traffic for impacts on human and ecological receptors has found no significant impacts that require mitigation measures with respect to the modelling of emissions. The Outline Construction Environmental Management Plan (Appendix A5.1 of the EIAR) will be used to manage the construction phase dust emissions. In addition, before commencing works, an Air Quality Management Plan shall be prepared and submitted in advance to the relevant planning authority.</p> <p>Chapter 16, Section 16.6.1 outlines mitigation measures that are generally required for the control of dust with respect to HGV movements on site and deliveries to/from the sitesuch as;<br/>* HGV traffic leaving site will pass through a wheel wash;<br/>* Public roads outside the site will be regularly inspected for cleanliness and cleaned as necessary. If public roads are deemed to require additional cleaning where possible a suction device for road cleaning will be utilised which can access spaces around cars and other street furniture more effectively; and,<br/>* During movement of materials both on and off site, trucks will be stringently covered with tarpaulin at all times. Before entrance onto public roads, trucks will be adequately inspected to ensure no potential for dust emissions.</p> |

Dublin |              |          |                                                                                                                                                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 4                                                                                                                                                         | Letter       | 1        | We also would like to see a Community Fund is set up similar to the children's hospital fund.                                                                                  | <p>TII intends to establish a minimum of 3 local community liasons offices along the MetroLink Route. It is proposed to locate these offices in the city centre, Glasnevin and Swords Areas. The offices will be established at least 3 months prior to the commencement of Major Infrastructure works.</p> <p>TII will work with established Community Groups through the local community liaison officers along the route to identify projects at local level that would involve the Community in the delivery of MetroLink and its legacy. Such projects could include:</p> <ul style="list-style-type: none"><li>- A local school learning programme.</li><li>- Enhancement of community amenity within agreed funding limits.</li><li>- Engagement with final landscape and finishing options, including aspects of biodiversity.</li></ul> <p>TII are willing to explore mechanisms for investing in local initiatives to support affected communities during the works, such initiatives will be subject to funding being made available.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| 5                                                                                                                                                         | Letter       | 1        | We are also concerned about our house as a structure and it's safety in terms of moving foundations or subsidence during the tunnelling out under our property and afterwards. | <p>Excavation for the tunnels and other below ground structures could potentially lead to ground movements at the surface and below ground. An assessment of the effects of ground movements and potential impacts on existing buildings has been carried out as part of the Scheme Design.</p> <p>EIAR Appendix A5.17 Building Damage Report covers the assessed impacts of construction generated ground movements and settlement on property. Section 5.2 of this report sets out the rationale for the assessment of properties similar to yours. The results of the assessment provided in Table 5.2 shows that property Ref B - 123, as one of the representative properties selected similar to your property, has been assessed as falling within the 'Negligible' category. The building risk categories shown in Table 4-4 of the aforementioned report are used to define the degree of building damage related to the Risk Category. According to this Table, the Negligible damage category refers to hairline cracks.</p> <p>As your property is within the negligible category no further assessment beyond the Phase 2a Building Damage Assessment is required.</p> <p>Appendix A5.17 Appendix C contains the predicted settlement contour drawings. Sheet 22 of 30, drawing ML1-JAI-EIA-Rout_XX-DR-T-21142 refers to the tunnel alignment relevant to your property.</p> <p>The Property Owner Protection Scheme (POPS), committed to by TII, allows residential property owners to register with TII if their residential property is within thirty (30) metres of the edge of the MetroLink alignment or fifty (50) metres of station structures. The POPS comprises condition surveys of residential properties along the route of the proposed Project. The purpose of the condition surveys is to ascertain the condition of the properties before, during (if deemed necessary), and after the completion of the proposed Project to determine whether there has been any deterioration of any of the properties surveyed and whether same may be attributable to the proposed Project, and subsequently to recommend repairs as appropriate. Condition survey data gathered pre and post construction, and possibly during construction, will be used to assist the property owner and TII in swift and accurate verification of any property damage claims which may be received from property owners. The POPS is designed to cater for / address repair work which may be necessary for any damage (attributable to the proposed Project) to a qualifying residential property up to a threshold of €45,000. The POPS will be introduced by TII through public consultation and will be formally advised to eligible property owners by the Public Relations Department.</p> <p>Further information on POPS is available in Chapter 11 (Population &amp; Land Use). Useful information can also be found in the MetroLink Frequently Asked Questions document which can be found online at: <a href="https://www.metrolink.ie/en/your-property/property-owners-protection-scheme/">https://www.metrolink.ie/en/your-property/property-owners-protection-scheme/</a> , and this is where useful updates will be made available as the proposed Project progresses.</p> |

| 1                                                                                                                                                                            | Cover letter                                  | 2        | <p>Our client, Jerdip Properties Unlimited Company, welcomes the opportunity to make a submission on the Railway Order for the Metrolink line. Our client has a number of observations and concerns in relation to impact of the proposed Railway Order and the MetroLink project on its above property and would ask An Bord Pleanála fully review same.</p> <p>Our client also wishes to request that an Oral Hearing is held in respect of the Railway Order application so that the points raised within this submission can be further clarified and addressed at the hearing for the benefit of all parties. The proposal is of both national and local significance and accordingly warrants an Oral Hearing.</p> | <p>Thank you for the submission and request for Oral Hearing. We have reviewed the submission and provided response for the observations/ concerns raised in detail below.</p> <p>An overview of the Oral Hearing process is provided in the EIAR Chapter 8.9.2. The Board has confirmed that it intends to hold an Oral Hearing for this project.</p> <p>The purpose of the oral hearing will be to allow issues relevant to an application for approval be examined. The oral hearing can be attended by anyone, but only those that have made a written application may make an oral submission at the oral hearing. The oral hearing is managed by the An Bord Pleanála inspector.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| 2                                                                                                                                                                            | 1.0 Introduction (page 1 of PUNCH Memorandum) | 5        | We understand Earldev Properties Unlimited Company (EPUC), as building owner and landlord, may also make a submission to ABP in relation to the building. We request that both submissions are read in conjunction with each other. The most relevant parts of the EPUC submission concerning JPUC are outlined and further developed in Section 2.0 below.                                                                                                                                                                                                                                                                                                                                                              | Thank you for sharing this information. TII have reviewed both submissions and provided responses for the observations/ concerns raised by the Submitters.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| 3                                                                                                                                                                            | 1.0 Introduction (page 2 of PUNCH Memorandum) | 6        | <p>It is essential that each of the points raised in this submission are addressed in full by TII. It is noted that the comments in this submission will expand following further engagement with TII It is vital to JPUC that the building remains fully operational during the works and cannot accept any interruption to its business.</p> <p>It is our belief that The Arthur Cox Building requires individual attention from TII as a standalone structure and we request that ABP condition same in any grant of the Railway Order.</p>                                                                                                                                                                           | TII note JPUC request and prior to any commencement of construction are happy to engage further regarding your concerns. It should be noted that having regard to settlement risk, this building will be subject to a detailed Phase 3 assessment, referred to in EIAR Chapter 5, Appendix A5.17 Building Damage Report section 4.5, to ensure that any effects on the building are understood and mitigated. Please see response below to Item (12) for further details.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| 4                                                                                                                                                                            | 1.0 Introduction (page 2 of PUNCH Memorandum) | 6        | <p>As the Headquarters of a leading firm of solicitors, the building has been designed and fitted out to a very high standard with acoustic treatments a principal design parameter. Hence, the potential noise and disruption from the proposed works is a huge concern that needs to be fully explained and addressed by TII to avoid negative impacts on our client's business.</p> <p>Similarly the impact of vibration on the building is of equal concern to our client and this issue must also be fully explained and addressed by TII as part of the process.</p>                                                                                                                                               | <p>TII note your concerns in relation to the noise and vibration related potential impacts on your property.</p> <p>EIAR Appendix 14.5 Groundborne Noise and Vibration Blasting Modelling Results presents predicted groundborne noise and vibration levels during the construction phase of the project, with the results for 10 Earlsfort Terrace summarised below:</p> <ul style="list-style-type: none"><li>• The predicted level of groundborne noise during TBM passage at surface level is 50 dB LASmax, which is above the 45 dB LASmax threshold, resulting in a significant impact on the buildings occupants for the short duration of the TBMs passage which is estimated to be 2-weeks.</li><li>• The predicted level of groundborne vibration during TBM passage is 0.269 ms-1.75, which is lower than the VDV (Vibration Dose Value is a parameter that combines the magnitude of vibration and the time for which it occurs) Threshold Level of 1.6 ms-1.75, resulting in a not significant impact on the building.</li></ul> <p>Unfortunately, there are no effective methods available to reduce groundborne noise from TBMs at source. TII will liaise with Jerdip Properties Unlimited Company to ensure the timing of these impacts are known. The principal mitigation measures aimed at minimising impacts are as follows:</p> <ul style="list-style-type: none"><li>• Advance public consultation and stakeholder engagement can greatly reduce the significance of groundborne noise effects during construction, as building occupants would be prepared for the passage of the TBM and resultant elevated noise and vibration levels.</li><li>• TII will accept and consider applications for additional measures on a case-by case basis, in accordance with its Noise and Vibration Mitigation Policy (see EIAR Appendix A14.6).</li></ul> |

| RE: SUBMISSION ON THE METROLINK ON BEHALF OF JERDIP PROPERTIES UNLIMITED COMPANY IN RELATION TO PROPERTY AT THE ARTHUR COX BUILDING, 10 EARLSFORT TERRACE, DUBLIN 2, D02T380 |                                                            |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |  |
| 5                                                                                                                                                                            | 1.0 Introduction (page 2 of PUNCH Memorandum)              | 6        | Of particular concern is the fact that all drawings in the Railway Order relate to an old building layout on this site, which was demolished circa 2014 and does not take any account of the actual design and structure of the Arthur Cox Building. This is a concern as The Arthur Cox Building has complex and sensitive basement, pile and facade structures which must be carefully considered in the proposed tunnel design. We would expect The Arthur Cox Building to be shown on all relevant drawings and the correct building parameters used in all assessments of the tunnel design. | The assessments undertaken relate to the new building and the detailed information provided to TII in 2019. This included the bkd planning drawings and an inspection undertaken by ORS of the property (including the basements). This will be refreshed for the Phase 3 assessment (please refer to Item 12 below with regards to Phase 3 assessment process). The drawings to which your submission refers are the OS mapping.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |  |
| 6                                                                                                                                                                            | 2.0 Technical Observations, point a (page 3 of Memorandum) | 7        | a. What is the Tunnel detail design procurement approach i.e. client design or contractor design?<br><br>i) A detailed design programme for the tunnel under the building is required.                                                                                                                                                                                                                                                                                                                                                                                                            | The detailed design and construction programme (in so far as it relates to the Arthur Cox Building) will be provided once developed by the TII Contractor. Please also refer to response (10) below.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |  |
| 7                                                                                                                                                                            | 2.0 Technical Observations, point a (page 3 of Memorandum) | 7        | ii) If the tunnel design is by the main contractor, TII to confirm how soon after the grant of the Railway Order a Main Contractor be appointed?                                                                                                                                                                                                                                                                                                                                                                                                                                                  | It is anticipated that the Contractor will be procured within 18 months of the grant of the RO. It should be noted it may be a further 60 months prior to the TBM being within the zone of influence of your building.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |  |
| 8                                                                                                                                                                            | 2.0 Technical Observations, point a (page 3 of Memorandum) | 7        | iii) TII to confirm estimated construction programme from when Arthur Cox are likely to experience noise and vibration from the Tunnel Construction Works?                                                                                                                                                                                                                                                                                                                                                                                                                                        | Tunnelling from St Stephen's Green to Charlemont is expected to take approximately 6 months, covering Q1 and Q2 of Year 7 Construction (see EIAR Appendix A5.2 Construction programme Including Tunnel Elements). Noise and vibration impacts from the advancement of the TBM beneath Arthur Cox building location will occur for a very short period of days (up to 2-weeks). Currently, a detailed timeline for TBM passage is not available as the appointed contractor(s) will prepare the programme for the TBM. Once the programme has been prepared, advance public consultation and stakeholder engagement will take place to prepare building occupants or the passage of the TBM and resultant elevated noise and vibration levels (see EIAR Appendix A5.1 Outline CEMP, Table 6.1 Tunnel Boring GNV1).                                                                                                                                                                                                           |  |
| 9                                                                                                                                                                            | 2.0 Technical Observations, point a (page 3 of Memorandum) | 7        | iv) TII to confirm what information JPUC will receive prior to the Oral Hearing?                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | There are no plans to issue any further information prior to the Oral Hearing apart from these responses. However, TII are happy to engage in consultation to provide further detail as required and prior to construction commencement.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |  |
| 10                                                                                                                                                                           | 2.0 Technical Observations, point a (page 3 of Memorandum) | 7        | v) Assuming the detailed design is by the Main Contractor, TII to confirm the extent to which the Main Contractor will be required to engage with JPUC during the detailed design process?                                                                                                                                                                                                                                                                                                                                                                                                        | TII will engage a design team to prepare the detailed design for the proposed project. The construction of this design will be the responsibility of the main contractor. However, all designated designs will be independently checked and TII will accept the design. TII will provide the assurance to JPUC that the design and modelling, together with proposed instrumentation and monitoring is fit for purpose and will not result in impacts greater than that assessed in the EIAR. If monitoring is to be installed on or in your properties, then the methodology and timing of the installations will be agreed with JPUC together with any ongoing maintenance of the monitoring. The Contractor and TII will provide updates as required during the construction process. Additionally, condition surveys will be coordinated with JPUC including any close out condition surveys and the identification of any remedial measures needed. If required by JPUC TII will issue the Phase 3 Assessment details. |  |

| RE: SUBMISSION ON THE METROLINK ON BEHALF OF JERDIP PROPERTIES UNLIMITED COMPANY IN RELATION TO PROPERTY AT THE ARTHUR COX BUILDING, 10 EARLSFORT TERRACE, DUBLIN 2, D02T380 |                                                        |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 11                                                                                                                                                                           | Technical Observations, point b (page 3 of Memorandum) | 7        | <p>b. Confirmation that a full copy of the detail design and construction package will be issued by TII in relation to The Arthur Cox Building.</p> <p>i) We expect to see a full copy of the detailed design and construction package which allows for an independent assessment to be carried out by JPUC as they wish. We request confirmation of timelines from TII for this but note this needs to allow sufficient time for our client to fully review the proposals.</p> | <p>TII would welcome a meeting with JPUC to further explore the details presented here and to collate the relevant information to educate the further assessment.</p> <p>Specifically with regard to the point noted, TII will issue JPUC with the detailed Phase 3 assessment when completed. With regard to timeline, this will be confirmed once the main contract is let but likely to be approximately 24 -30 months after the grant of the RO.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| 12                                                                                                                                                                           | Technical Observations, point b (page 3 of Memorandum) | 7        | <p>ii) It is vital for JPUC that the building is not damaged during these works and the extent of building damage suggested by TII in the Railway Order is not acceptable.</p>                                                                                                                                                                                                                                                                                                  | <p>This response here also relates to Items 14, 15, 17 and 20 below.</p> <p>The assessment of building damage follows an industry standard approach undertaken on tunnelling and underground projects around the world including on the Channel Tunnel Rail Link and Crossrail in London, the Dublin Port Tunnel and currently on High Speed 2 in England, and therefore that further assessment does not need to be delivered prior to the route being consented. The purpose of the Stage 1 and Stage 2a assessments has been to provide/ensure confidence that the Works will not induce unacceptable damage to buildings/structures along the Route. The primary objective has been to confirm that the structural integrity of each building/structure will not be compromised by the Works.</p> <p>EIAR Appendix A 5.17, Building Damage Report, covers the assessed impacts of construction generated ground movements and settlement on properties. Table 5-2 of this report shows that the building has been assessed as falling within the "Slight damage" category currently, an explanation for which can be found in Table 4-4 of the aforementioned report.</p> <p>TII does recognise the importance of your buildings and hence they are designated as special buildings which will move forward to further Phase 3 assessment at the detailed design phase. The Phase 3 assessment will take account of final design and construction methodology details. For the Phase 3 assessment, each building will be subject to detailed assessment on an individual basis. A detailed survey will be carried out as part of the Phase 3 assessment to provide the necessary additional information to inform this detailed analysis of how the individual elements of the building would be affected by the predicted ground movements. The method and extent of the detailed analysis will be determined on a case-by case basis and may include a more sophisticated semi-empirical or a detailed soil-structure interaction using finite element modelling methods. It is likely that the Phase 3 assessment will yield further improvement to the damage category determined by the Phase 2b assessment. The results of this refined assessment typically show that earlier assessments are conservative and over estimate the likely impact of construction generated ground movements.</p> <p>Ancillary features in each building/structure, which themselves do not contribute to the structural integrity of the building/structure, are considered in the subsequent Phase 3 assessment. The D&amp;B Contractor is responsible to further investigate the sensitivities of each building/structure to identify those elements within the building/structure curtilage that may not contribute to the structural integrity of the building/structure itself, but will most likely in themselves be sensitive to the excavation and construction processes.</p> <p>In each instance, engaging with the building/structure owner (or their delegated representative) the D&amp;B Contractor will be responsible for identifying further mitigations that will further reduce the potential for damage if needed. These mitigations might relate directly to the excavation and construction processes (at source measures), or they might relate to a direct protection of the non-structural elements for which damage related concern remain.</p> <p>The Phase 3 assessment is undertaken to minimise the impact of the tunnelling operation beneath your property. | 13                                                                                                                                                                           | Technical Observations, point b (page 4 of Memorandum) | 8        | iii) The efficient running of the business operations of The Arthur Cox Building is of paramount importance to JPUC. Whilst some disruption in terms of noise and vibration is likely, these levels cannot be such that they affect the company's daily operations. We would request that TII provide detailed reassurances on these matters.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | <p>Noise and vibration impacts from the advancement of the TBM beneath Arthur Cox building will occur for a very short period of approximately 2 weeks, as referred to in Chapter 14: Groundborne Noise and Vibration, section 14.6.1.1 Tunnel Boring, with the impacts described in response 16 below.</p> <p>To mitigate impacts, advance public consultation and stakeholder engagement will take place which will greatly reduce the significance of groundborne noise effects, as building occupants would be prepared for the passage of the TBM and resultant elevated Noise and Vibration levels (see Table 11.70 of EIAR Chapter 11 Population and Land Use).</p> <p>The impact on your commercial activity due to Groundborne Noise and Vibration as a result of tunnelling activities following mitigation will be negative, slight and short term to medium term</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| 14                                                                                                                                                                           | Technical Observations, point c (page 4 of Memorandum) | 8        | <p>c. Details and frequency of proposed condition surveys for The Arthur Cox Building by TII, both in advance of and during the construction works as well as during operational phase.</p> <p>i) In the Damage Assessment Report of Building document on <a href="https://www.metrolinkro.ie/">https://www.metrolinkro.ie/</a>, it places the Arthur Cox Building (B-238) in Damage Category B (Refer to Appendix A) . This cannot be accepted by JPUC and will likely affect the buildings basement, frame and facades which in turn affects the operations of the business.</p> <p>ii) The query relates to visual condition surveys of the building prior to and during construction works. There must be photographic condition surveys carried out by TII/Main Contractor to ensure any potential damage to the building is accurately recorded.</p> <p>iii) It is expected that the condition surveys continue post construction and in the tunnel operational stages and request frequency of these surveys to be confirmed by TII.</p> <p>iv) We request this information from TII as soon as possible to ensure the integrity of the building is maintained during all phases of the works.</p> <p>v) We request TII to confirm when guidelines regarding the process for remediation will be released, should remediation be required. It is our understanding these guidelines are under development by TII based on information from <a href="https://www.metrolinkro.ie/">https://www.metrolinkro.ie/</a> . We reiterate that damage to the building cannot be accepted but we need to understand the guidelines nonetheless.</p> | <p>TII would respond to the points raised as follows:</p> <p>Response to point i): Slight damage is predicted at the Arthur Cox building (B-238) following the Refined Phase 2a Damage Assessment. This building has been identified as a 'special' building and will be subject to a detailed assessment (Phase-3 assessment) and appropriate control measures will be implemented to protect the building. Please refer to Item 12 above. Please note that any damage identified as caused by the advancement of the TBM will be repaired.</p> <p>Response to point ii): TII note and agree, this is as planned.</p> <p>Response to point iii): Condition surveys will commence before the construction phase, during (as required) and after the construction phase is complete. Long term impacts during the operational phase are not anticipated and so there is no requirement for further condition surveys at this point.</p> <p>Response to point iv): TII agree that the surveys and assessment are to be undertaken in time such that the integrity of the building is maintained. This is TII's stated position.</p> <p>Response to point v): TII do not intend to put in place a Property Owners Protection Scheme for Commercial Properties along the MetroLink route. To protect commercial properties, TII contractors appointed to carry out the works will, with the agreement of the owners of such properties, commission chartered building surveyors to carry out a precondition survey of commercial properties. In the event that it is determined that damage has occurred. TII's contractor will be required to commission a follow up survey to confirm the extent of the damage and confirm if the damage has been caused by MetroLink works. Where property damage is confirmed to have been caused by MetroLink works the property concerned will have recourse to MetroLink project insurances.</p> |

                                     |          | 140                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | | RE: SUBMISSION ON THE METROLINK ON BEHALF OF JERDIP PROPERTIES UNLIMITED COMPANY IN RELATION TO PROPERTY AT THE ARTHUR COX BUILDING, 10 EARLSFORT TERRACE, DUBLIN 2, D02T380 |                                                              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| 15                                                                                                                                                                           | Technical Observations, point d (page 4 and 5 of Memorandum) | 8&9      | <p>d. Vertical settlement of the existing structure at The Arthur Cox Building from the proposed works.</p> <p>i) The predicted settlement is a concern from available information on <a href="https://www.metrolinkro.ie/">https://www.metrolinkro.ie/</a>. The settlement contours on Volume 4, Chapter 20- Fig 20.16, sheet 29 of 30 (Refer to Appendix B), suggest settlement of 40-45mm in the calculated settlement trough. We request details from TII on how they established this deflection data.</p> <p>ii) There appears to be no evidence of undertakings on <a href="https://www.metrolinkro.ie/">https://www.metrolinkro.ie/</a> to confirm the quality of the rock at the tunnel level beneath The Arthur Cox Building. We request that geophysical surveys are carried out by TII on the rock at tunnel level from the existing basement. 2d Resistivity and Seismic Refraction surveys are suggested to determine the rock mass characteristics.</p> <p>iii) If a dense rock with little fractures is encountered during this testing, this potentially magnifies the noise and vibration levels through the building which is a concern. This would have further detrimental impacts on the operations of our client's business and we request detailed analysis of this issue by TII.</p> | <p>Please also refer to Item 12 above. The assessment details are given in the Chapter 4 of the Damage Assessment Report of Buildings and Other Assets.</p> <p>The settlement contours shown on Figure 20.16 of Appendix B is based on Phase-1 assessment with very conservative (absolute worst case) tunnelling volume loss parameters and its purpose is to define the boundaries for the buildings for subsequent assessments. However, Phase 2a has been carried with refined (but still conservative) tunnelling volume loss parameters with the consequent reduction in the greenfield settlements (to less than 30mm). Further, the Phase 2a assessment is based on the ground movements at the formation level of the basement (underside of the basement slab) - for the Damage Categorisation. The method of assessment is fully explained in EIAR Appendix 5.17. In summary, the settlement contours shown on Figure 20.16 of Appendix B are based on Phase-1 assessment with very conservative (absolute worst case) tunnelling volume loss parameters; 1.5% when the tunnel is with less than half the tunnel diameter of rock cover and 0.75% when the tunnel is with greater than half the tunnel diameter. The purpose of Phase-1 assessment is to define the boundaries for the buildings for subsequent assessments. However, Phase 2a has been carried with refined (but still conservative) tunnelling volume loss parameters; 1.0% when the tunnel is with less than half the tunnel diameter of rock cover and 0.5% when the tunnel is with greater than half the tunnel diameter - Phase 2a assessment shows less than 16mm settlement under these buildings with Damage Category 0 (Negligible). The details of assessment are given in Section 4 of the Damage Assessment Report. The protected buildings have been identified as 'special' buildings and will be subject to a detailed assessment (Phase-3 assessment) and appropriate control measures will be implemented to protect the building if considered necessary - unlikely in this case as already categorised as in the Negligible damage category. Phase-3 assessment will utilize the site specific ground model, particularly that the tunnel face is in rock strata in this area, which will result in significant reduction in the volume loss due to tunnelling compared to that was assumed in the Phase 2a assessment and thus reduction in the greenfield ground movements.</p> <p>Detailed ground investigations (GI) have been undertaken to produce the geological profile of the proposed MetroLink route and this data has supplemented existing desk based GI to give an excellent understanding of the geotechnical conditions. This GI data and existing available desk based data has been used in the assessment. At detailed design the contractor will undertake further investigation as necessary to verify the ground conditions and as required to validate the basis of assessment be prescribed as part of the recommendations from the Phase-3 assessment works.</p> <p>Arthur Cox Buildings is identified for Phase-3 assessment. The Phase-3 assessment will utilize the site specific ground model, particularly that the tunnel face is in rock strata in this area, which will result in significant reduction in the volume loss compared to that adopted for the Phase-2a assessment for tunnelling works - this will lead to lower damage category.</p> <p>Any additional ground probing works etc required to validate the basis of assessment will be prescribed as part of the recommendations from the Phase-3 assessment works.</p> <p>The basements are known and the separation from these structures to the crown of the tunnel has been used in the current assessment. This will be updated at detailed design incorporating final design alignment.</p> |

| RE: SUBMISSION ON THE METROLINK ON BEHALF OF JERDIP PROPERTIES UNLIMITED COMPANY IN RELATION TO PROPERTY AT THE ARTHUR COX BUILDING, 10 EARLSFORT TERRACE, DUBLIN 2, D02T380 |                                                              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |  |
| 16                                                                                                                                                                           | Technical Observations, point e (page 5 and 6 of Memorandum) | 9&10     | <p>e. Vibration and Noise Impacts under the existing structure at The Arthur Cox Building from the proposed works.</p> <p>i) There is a concern in relation to the identified noise and associated disruption contained within https://www.metrolinkro.ie/. A "Very High Adverse (significant)" residual impact is identified in the documentation. This is not acceptable to JPUC and will be detrimental to our client's daily operations. TII should access this further and mitigate this impact.</p> <p>ii) Whilst this impact is noted as being "short term", there is no clarity or estimate provided beyond this in relation to the duration of these works and associated negative impacts. We request TII to confirm duration of the proposed works and associated impacts on our client's building</p> <p>iii) We request An Bord Pleanála to condition an independent noise and vibration assessment of the building based on the individual site specifics and the building form itself.</p> <p>iv) It is assumed that these noise levels of 50dB (Refer to Appendix C) are calculated on a Phase 1 Greenfield base level. The building and its secant piles are founded in rock. The concrete frame is also a very dense form of construction. If the rock is dense, there is a very efficient direct transmission path for noise and vibration through the building. Therefore, we are concerned noise levels could be greater than calculated and we need this concern to be robustly allayed by TII prior to commencement of work.</p> <p>v) The building has been designed and fitted out to a very high standard with acoustic treatments a principal design parameter. This is to reduce background noise in the building. If noise is transferred up through the building, the existing acoustic fabric in the facades and internal partitions may magnify acoustic levels within the building. We need this concern to be robustly investigated and concerns allayed by TII prior to commencement of work.</p> <p>vi) Vibration levels appear low in the documentation 0.269 VDV/day. Based on item e (iv) above, we are concerned vibration levels could be greater than calculated and we need this concern to be robustly investigated and concerns allayed by TII prior to commencement of work.</p> | <p>With regard to the points raised, TII would respond as follows:</p> <p>(i) TII acknowledge your concern and will put measures in place to reduce impacts to your property as much as reasonably practicable. It is correct that there is potential for significant effects from groundborne noise from the TBM operation along the route of the tunnel without mitigation (Section 14.5.1, Chapter 14 Groundborne Noise and Vibration). Unfortunately, there are no effective methods available to reduce groundborne noise or vibration from TBMs at source, but mitigation measures can be implemented to minimise impacts (please refer to Items 4 and 13 above).</p> <p>(ii) Please refer to Item 8 above.</p> <p>(iii) The assessment results presented in Appendix 14.5 Groundborne Noise and Vibration and Blasting modelling results present predicted levels of groundborne noise and vibration during construction and operation of the named building. No additional assessment is considered necessary.</p> <p>(iv) At Arthur Cox's offices the level of TBM noise at surface level is shown as 50 LAmaxS in the EIAR contours, and operational noise is shown as 35 LAmaxS. The effect of two basements and piles down to the rockhead is an increase of 5 LAmaxS for TBM noise to 55 LAmaxS and 4dB for operational noise to 39 LAmaxS. For TBM noise the threshold of significant effects for offices is 45 LAmaxS. More relevant is that the duration of significant effect will be approximately 2-weeks depending on the rate of advance in this area. For operational noise the impact remains in the "not significant" category.</p> <p>For TBM the VDV is 0.269 ms-1.75 day at ground level increasing to 0.398 ms-1.75 with the two basements and piles. The threshold of significant effect is 1.6 ms-1.75.</p> <p>No further mitigation is necessary for operational effects. No mitigation is available for the TBM groundborne noise anticipated at ground level and within the basement as detailed above except through consultation with the owner/occupier of the timings of the TBM arrival, anticipated duration of the TBM progress and programming.</p> <p>(v) and (vi) Please refer to response to point (iv) above</p> |  |
| 17                                                                                                                                                                           | Technical Observations, point f (page 6 and 7 of Memorandum) | 10&11    | <p>f. Confirmation that the tunnel can be constructed in the proposed position/depth considering the depth of the existing rock, existing piles and formation level of the double basement at The Arthur Cox Building.</p> <p>i) We have concerns about the proposed tunnel level relative to that of the double basement structure and secant piled wall of 10 Earlsfort Terrace. Refer Appendix D of this submission for drawings illustrating the close proximity of the tunnel to the existing basement structure.</p> <p>ii) The proposed tunnel is approximately 6m below the lowest structural element and 5.35m below the lowest pile level. This proximity of significant engineering works to the underside of the structural support for The Arthur Cox Building is of serious concern.</p> <p>iii) The existing double basement is waterproofed with a Rascor White Tank Injection System and relies solely on the reinforced concrete structure to prevent water ingress. Hence, this form of waterproofing is very sensitive to ground movements and the design of the tunnel must take this into account.</p> <p>iv) The basement structure is below the water table level and the basement slab is very sensitive to vibrations and any adverse cracking to the slab would cause significant water ingress issues.</p> <p>v) We request that TII comment on each of the items above and confirm the integrity of the building will not be compromised by the proposed works</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | <p>Please refer to Items 12, 15 and 16 above.</p> <p>Having regard to potential settlement, the Phase-3 assessment will utilize the site specific ground model, particularly that the tunnel face is in rock strata in this area, which will result in significant reduction in the volume loss due to tunnelling and thus reduction in the greenfield ground movements - this will lead to a lower damage category. Any requirements to impose restrictions to the tunnel vertical alignment (upwards) will be considered as part of Phase-3 assessment.</p> <p>This building has been identified as a 'special' building and therefore will be subjected to a detailed assessment (Phase-3 assessment) which will utilize the site specific ground model and the structural details/features of the building to determine any mitigation measures required to protect the building and these measures will be agreed with the buildings owners and their advisers prior to commencement of tunnelling in the area. Any requirements to lower the tunnel vertical alignment will be considered as part of Phase-3 assessment.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |  |

| 18                                                                                                                                                                           | Technical Observations, point g (page 7 of Memorandum) | 11       | <p>g. Written confirmation from TII of any anticipated negative impacts on the building and its tenants at 10 Earlsfort Terrace during the construction phase.</p> <p>i) PUNCH request TII to issue details and timelines of any negative impacts for JPUC on the normal execution of their business operations during construction phase of the works.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | <p>TII confirm that there will be a temporary but very high adverse (significant) impact for groundborne noise at 10 Earlsfort Terrace during TBM passage. Where eligibility is established, there will be an opportunity to apply the TII Airborne Noise and Groundborne Noise Mitigation Policy (EIAR Appendix A14.6). Additionally, advance public consultation and stakeholder engagement will be carried out and TII will continue to communicate timelines and construction details as the project progresses. TII are happy to discuss the application of the TII Airborne Noise and Groundborne Noise Mitigation Policy further.</p> <p>The impact on your commercial activity due to Groundborne Noise and Vibration as a result of tunnelling activities following mitigation will be negative, slight and short term to medium term (Table 11.70, Chapter 11 Population and Land Use). Currently, a detailed timeline for TBM passage is not available as the appointed contractor(s) will prepare the programme for the TBM once they have been appointed. TII will continue to communicate with landowners as the project progresses.</p> <p>The EIAR fully details all impacts during construction phase of the MetroLink. Please refer to, inter alia, EIAR Appendix 5.17 for Ground movement impacts, EIAR Chapter 11 Population and Land Use, EIAR Chapter 13 Airbourne Noise and Vibration and Chapter 14 for Groundborne Noise and Vibration.</p> |

Written confirmation from TII of any anticipated negative impacts on the building and its tenants at The Arthur Cox Building during the operational phase.</p> <p>i) PUNCH request TII to issue details and timelines of any negative impacts for JPUC on the normal execution of their business operations during the operational phase of the works.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | <p>No significant noise and vibration effects are predicted at 10 Earlsfort Terrace during the operational phase (Section 14.5.2, Chapter 14 Groundborne Noise and Vibration).</p> <p>Business operations of JPUC will not be negatively impacted during the operational phase (Section 11.7.2, Chapter 11 Population and Land Use).</p> <p>The EIAR fully details all impacts during operational phase of the MetroLink. Please refer to, inter alia, EIAR Chapter 11 Population and Land Use, EIAR Chapter 13 Airbourne Noise and Vibration and Chapter 14 for Groundborne Noise and Vibration. Once operational, demand will vary through the day and week, with different service levels provided to meet varying demand. Services will operate between 05:30 and 00:30 every day. Service frequency is reduced on weekends and public holidays to reflect lower demand during these periods.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| 20                                                                                                                                                                           | Technical Observations, point i (page 8 of Memorandum) | 12       | <p>i. Confirmation that that the structural integrity of the building at The Arthur Cox Building will not be affected in any way by the proposed works during the construction and operational phase.</p> <p>i. In the Damage Assessment Report of Building document on <a href="https://www.metrolinkro.ie/">https://www.metrolinkro.ie/</a>, it places the Arthur Cox Building (B-238) in Damage Category B . We note that because of the foundations proximity to the tunnel the building is classed as an "At Risk" building and that the Phase 3 assessment be undertaken. This Phase 3 assessment, as we understand it, will be a detailed assessment of the Ground Movement Response for the Arthur Cox Building specifically. We request timelines of when this will be carried out by TII.</p> <p>ii. JPUC will not accept building damage and the integrity of the building and particularly the basement cannot be compromised in any way. The basement is designed as part habitable for staff of the building and cannot allow any water ingress.</p> <p>iii. The superstructure and facades cannot be damaged. Should remediation be required to the superstructure, the work practices and daily operations of the company will be hugely affected.</p> | <p>TII would respond to the points raised as follows:</p> <p>Response to point i): Please refer to Items 11, 12, 14. 15 and 17 above.</p> <p>Response to point ii) and iii): The damage predicted is outlined in Items 12 and 14 above. TII commit to undertaking the condition surveys pre and post construction and will remediate damage caused such that the building basement, superstructure and facades are not compromised.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

| RE: SUBMISSION ON THE METROLINK ON BEHALF OF JERDIP PROPERTIES UNLIMITED COMPANY IN RELATION TO PROPERTY AT THE ARTHUR COX BUILDING, 10 EARLSFORT TERRACE, DUBLIN 2, D02T380 |                                          |          |                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                            |
| 21                                                                                                                                                                           | Conclusions (page 8 of Memorandum)       | 12       | i) The project is of both Local and National significance and accordingly warrants an Oral Hearing. Our client wishes to request that an Oral Hearing is held in respect of the Railway Order application, so that the points raised within this submission can be further clarified and addressed in detail at the hearing for the benefit of all parties. | Thank you for the request for Oral Hearing. The oral hearing process is managed by the An Bord Pleanála. Please refer to response to Item 1 above.                                                                                                         |
| 22                                                                                                                                                                           | Conclusions (page 8 of Memorandum)       | 12       | ii) We wish to develop and resolve each of the observations made in this submission in advance of any future Oral Hearing and request immediate engagement with TII accordingly. We request that ABP condition same in any grant of the Railway Order.                                                                                                      | TII are available to meet in advance of the Oral hearing.                                                                                                                                                                                                  |
| 23                                                                                                                                                                           | Conclusions (page 8 and 9 of Memorandum) | 12&13    | iii) JPUC primary concern is the effect the proposed works will have on the business operations of its company. As a leading firm of solicitors, its operations cannot be negatively impacted by the proposed Metrolink works. We would request immediate engagement with TII to allay these concerns.                                                      | TII are available to meet in advance of the Oral hearing.                                                                                                                                                                                                  |
| 24                                                                                                                                                                           | Conclusions (page 9 of Memorandum)       | 13       | iv) There are serious concerns based on information received that the building will be damaged by the proposed Metrolink works. We would request immediate engagement with TII to allay these concerns.                                                                                                                                                     | Thank you for the submission. We have reviewed your submission and provided responses for the observations/ concerns raised in detail above. TII are happy to engage further with JPUC regarding your observations and concerns raised in this submission. |
