| Re: Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022 Case Reference Number NA29N. 314724 |                        |          |                                                                                                                                                                                                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| 21                                                                                                              | Re: Construction Phase | 5        | ■ Intolerable traffic will be generated during construction with HGV traffic on quiet residential roads will have a severe impact upon amenities.                                                          | <p>Responses (11) and (12) explain why "intolerable traffic" will not be generated by MetroLink.</p> <p>Further, EIAR Appendix A9.5 Scheme Traffic Management Plan details the anticipated HGV movements at each station. At Charlemont Station, it is anticipated that vehicle movements will generally range between 20 to 50 per day, however there are a number of weeks with daily vehicle movements lower than this range. The maximum number of daily movements is 210 for a duration of two days only. Associated traffic increases on Grand Parade and Northbrook Road as a result of closures and temporary signals will not translate to any significant increase in driver delay. The largest increase in driver delay of 12 seconds is registered on the westbound approach on Grand Parade to the Ranelagh Road signalised junction.</p> <p>HGV routing to and from Charlemont Station is predominantly via the regional road network (such as the R111, R110, R810 or R811), mitigating any impact to local roads. Localised construction traffic routing to and from the site accesses will require consideration of local traffic considerations. All traffic management plans and HGV routings will be agreed by the Contractor with DCC and relevant stakeholders prior to any works. Traffic noise has also been modelled and assessed in EIAR Chapter 13, Airborne Noise and Vibration as outlined in Table 13.72. Traffic noise during the peak of the construction period will increase by just 1.1dB (above the do minimum scenario).</p>                                                                                                                                                                                                                                                                                                                 |
| 22                                                                                                              | Re: Construction Phase | 5        | ■There will a severe impact upon human health which has not been properly assessed.                                                                                                                        | <p>TII disagree that there will be "a severe impact upon human health which has not been properly assessed". The assessment undertaken in EIAR Chapter 10, Population and Human Health, has been undertaken in line with best practice and all relevant guidelines and policy requirements as outlined in section 10.3.2. The chapter identifies human beings as being sensitive due to their age, health status or for other reasons. The approach used in the assessment is to present residences, schools, workplaces and places of worship as "highly sensitive" as identified in section 10.3.4.2.</p> <p>The EIAR has taken full regard to the construction phasing with the health assessment based on the modelling and assessment outputs of a number of EIAR chapters (see Table 10.3), including Chapter 9 Traffic and Transport, Chapter 11 Population and Land Use, Chapter 12 Electromagnetic Compatibility and Stray Current, Chapter 13 Airborne Noise &amp; Vibration, Chapter 14 Groundborne Noise &amp; Vibration, Chapter 16 Air Quality , Chapter 18 Hydrology, Chapter 19 Hydrogeology and Chapter 20 Soils and Geology. Please refer to response (23) below for details of impacts anticipated on Dartmouth Square as a consequence of the Project and proposals for mitigation where required.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 23                                                                                                              | Re: Construction Phase | 5        | ■ The proposed rail order does not mitigate the profound impact that the proposed scheme will have on residents of Dartmouth Square given the associated scale and time period of the proposed development | <p>TII disagree and consider that the analysis presented in the EIAR does not support this statement. As noted by response (9) above, the Railway Order application comprises a very detailed environmental impact assessment that has identified and assessed the potential environmental impacts of MetroLink and proposed mitigations for these impacts where necessary.</p> <p>No profound impacts have been identified for the residents of Dartmouth Square and mitigation measures proposed will be effective at reducing the impacts on these properties and in general terms impacts will be associated with the construction phase only, as summarised below:</p> <p>(1) EIAR Chapter 9 Traffic and Transport outlines that after mitigation measures have been implemented there will be a residual long term slight impact on pedestrians as there will be more pedestrians in the area. However the use of existing footpaths will be at "acceptable comfort levels". There will be no other residual impacts either in the construction or operational phase related to traffic or transport. Please also refer to response (12) above.</p> <p>(2) EIAR Chapter 10 has identified that from the Human Health perspective, there may be some residual effects after mitigation measures due to the noise and vibration arising from mechanical excavation, TBM advancement and proposed blasting resulting in "annoyance to users, but no health effects". These effects are also addressed in EIAR Chapter 13 Airborne Noise and Vibration where mitigation measures are proposed including 4m high noise barriers and further proposed mitigation in line with the Airborne and Ground borne Noise Mitigation Policy at No's 10 and 11 Dartmouth Square. On the implementation of these measures the residual impacts are predicted to be reduced to moderate.</p> |

| Re: Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022 Case Reference Number NA29N. 314724 |                        |          |                                                                                                                                                                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
|                                                                                                                 |                        |          |                                                                                                                                                                         | <p>(3) EIAR Chapter 13, Airborne Noise and Vibration outlines that mitigation measures proposed include 4m high noise barriers and further proposed mitigation in line with the Airborne and Ground borne Noise Mitigation Policy at 10 &amp; 11 Dartmouth Square. On the implementation of these measures the residual impacts are predicted to be reduced to moderate.</p> <p>(4) Chapter 14 assesses groundborne noise and vibration and identifies a residual impact on Dartmouth Square West of significant during the advancement of the TBM. However, this will be for a limited duration (c.2 weeks and advance notice will be provided to assist with managing this impact). Residual effects from other construction phase activities are not considered significant following the implementation of mitigation measures.</p> <p>(5) Chapter 16 Air Quality identifies that there will be no significant effects once mitigation measures are implemented.</p> <p>(6) Chapter 21 Land Take has identified a significant effect on Dartmouth Square properties due to the requirement for temporary land take for construction and for the erection of noise barriers. However this land will be for a limited duration (not greater than 6 months) and fully reinstated following the completion of the construction phase. Please also refer to response (27) below.</p> <p>(7) Chapter 26 of the EIAR identifies the potential for impacts on Dartmouth Square ACA due to enabling works entailing the redirection of utilities. These works will be managed in accordance with a method statement prepared by the Project Conservation Architect in order to minimise any effects on the historical granite steps, kerbing and lamp standards. The impacts following the implementation of these mitigation measures is assessed to be slight.</p> <p>(8) Chapter 27 identifies potential landscape and visual effects after mitigation associated with the construction phase. These are moderate and negative for the effects on the landscape amenity and slight and negative for the visual effects.</p> |
| 24                                                                                                              | Re: Operational Phase: | 5        | The operation of the trains and associated ventilation systems has the potential to adversely affect the amenities of the residents and has not been properly assessed. | <p>EIAR Chapters 13 and 14 present a comprehensive and detailed assessment of groundborne and airborne noise and vibration. The assessments include for predictive modelling in order to identify the potential impacts on all sensitive receptors during the operational phase. No residual noise impacts are identified at this location during operation. The calculated rail noise levels across the proposed Project are not significant in terms of any widespread community disturbance and results in a not significant to slight impact when added to the prevailing noise environment.</p> <p>Chapter 13, sections 13.2.3.2 and 13.5.3.2.3 recognise that ventilation systems if not designed and mitigated effectively are potential noise sources. Section 13.6.2.3 outlines the detailed considerations that will be included in the design to ensure that the ventilation systems do not exceed limits as per BS 4142, including:</p> <ul style="list-style-type: none"><li>• Reduction of induct flow rates;</li><li>• Reduction of elements in the airflow;</li><li>• In duct attenuators;</li><li>• Orientation of grilles and louvres away from sensitive receptors;</li><li>• Acoustic louvres; and</li><li>• Anti-vibration mountings and couplings will be incorporated into the design to control vibration.</li></ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| 25                                                                                                              | Re: Operational Phase: | 6        | Proposed design will result in significant rat-running between Ranelagh Road and Grand Parade to the detriment of the residents on Dartmouth Square West.               | <p>The assessed impacts on traffic are covered by response (12) above. It is assumed the observation's reference to "rat-running" is with regards the provision of the internal street between Grand Parade and Dartmouth Road. This will be treated as a shared vehicular pedestrian space, access to it will be barrier controlled, and it will be traffic calmed and speed restricted to make it unattractive as a rat-run.</p> <p>In addition, the modelling data shows that there will be significant growth in public transport usage in trips to and from the city centre area, resulting in an increase of up to 43,000 public transport trips over the 12hr day. As a result there will be a corresponding reduction of over 14,000 car trips along the alignment from Northwood to Charlemont, reducing demand on the road network. The provided interchange with the Luas Green Line at this location is also anticipated to reduce vehicle demand from the south of the city (via Ranelagh).</p> <p>During the operational phase, Dartmouth Road will have two new pedestrian crossings, one of which is located towards Ranelagh Road. The provision of this crossing will also act as a traffic calming measure on Dartmouth Road, further deterring its use as a rat run.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

| Re: Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022 Case Reference Number NA29N. 314724 |                         |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| 26                                                                                                              | Re: Operational Phase:  | 6        | <div>■ The overall impact of the both the construction and operational phases of the project, in terms of noise, vibration, visual impacts, traffic, HGV movement, construction activity, operational emissions, anti-social behaviour and general activity around the station will be such as to severely and permanently adversely affect the residential amenities of the residents listed in this submission and would be in material contravention of the Dublin City Development Plan zoning objective for the area, which is Z2: "to protect and/or improve the amenities of residential conservation areas."</div>                                                                                                                                                                                                                                                 | <div>The responses above address the subject matter raised by this observation with the exception of anti-social behaviour.</div> <div>The risk of anti-social behaviour has been considered by the Project and is addressed by EIAR Chapter 6, MetroLink Operations and Maintenance. Section 6.6.5.8 specifically addresses how this will be managed, including how the architectural and urban realm design is designed to discourage anti-social behaviour, for example through the attractive setting, use of public lighting, open sight-lines, and avoidance of areas where individuals and groups of people can hide. Subject to data protection impact assessment and compliance with the General Data Protection Regulation (GDPR) CCTV will also be installed throughout the MetroLink system, including at station entrances and the public realm to provide general security and surveillance of all the public areas. TII would also note Charlemont Station has been deliberately designed without drop-off (with the exception of a drop only for persons of restricted mobility on Grand Parade) and taxi pick-up areas.</div> <div>TII would also note that while the interchange will certainly increase the number of people passing through the area, it is important to note that people will be using MetroLink, similar to Luas as a transport hub, moving quickly in and out of the area. The station will not be a destination attracting people to remain in the area.</div> <div>TII do not agree that the Project is "in material contravention of the Dublin City Development Plan zoning objective for the area, which is Z2: "to protect and/or improve the amenities of residential conservation areas." for the reason explained by response (9) above. ALG: As noted by response (3), Dublin City Development Plan 2022-2028 supports the Charlemont interchange</div> |
| 27                                                                                                              | Re: Property Issues     | 6        | <div>■ The permanent acquisition of part of the rear laneway will legally impede rights of access to the rear of properties.</div> <div>■ The permanent loss of part of the laneway will inevitably impact upon the amenity and value of retained land/property.</div>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | <div>TII can confirm there is no permanent acquisition of part of the rear laneway to the rear of properties. Access to the laneway to the rear of Dartmouth Square West will be maintained, apart for a 33m metre section of the lane to the rear of No.'s 11- 15 which will be occupied by the contractor for a period of 6 months to facilitate construction of part of the MetroLink station box. Accordingly 7 and 7A Dartmouth Square will not permanently lose access to the laneway.</div> <div>TII do not agree that the development will have a long term and permanent negative affect. In fact there is strong evidence to suggest that property values will in fact increase in close proximity to public transport infrastructure and that local residents will greatly benefit from having a world class metro system providing access to the city centre, airport and north city at their door step.</div>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

| 30                                                                                                              | Concluding observations | 6        | <div>My family's specific concerns for this proposed (and present construction/investigative activities already taking place) are being treated as inconsequential for our livelihoods. Our close-knit and very supportive community of families in this cultural heritage residential zone and catchment area of the Charlemont Luas station are being ignored in this Railway Order. We also have founded concerns that this major interchange station would attract anti-social behaviour for up to 19 hours a day. The law enforcement strategy is not equipped nor has the required resources allocated to such upheaval in a change on community circumstances. The potential for late night arrivals, taxi pick-ups, drop-offs and anti-social behaviour would destroy the present community amenities and alter the well managed present nature of the area.</div> | <div>TII do not consider your concerns are inconsequential, and TII do understand why you have these concerns. TII have undertaken a detailed environmental impact assessment, as evidenced by the responses above, to ensure the concerns and observations that you have raised, including those summarised by this observation, have been addressed so that no profound impacts result for the residents of Dartmouth Square.</div>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| 31                                                                                                              | Concluding observations | 7        | <div>We need to be heard and professional due diligence conducted on our behalf regarding this completely inappropriately proposed Terminus location at the Charlemont Luas station. How and why has this Charlemont location been so ineptly strategically located for a Terminus hub and spoke system in such an inappropriate and unreasonable location - this needs to be transparently identified and articulated by An Bord Pleanála.</div>                                                                                                                                                                                                                                                                                                                                                                                                                          | <div>Responses (4) and (5) explain the rationale for the proposed location of Charlemont Station.</div>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

| Re: Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022 Case Reference Number NA29N. 314724 |                                         |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| 32                                                                                                              | Concluding observations                 | 7        | The Environmental Impact Assessment as assessed by professional Planning experts, McCabe Durney Barnes is wholly inadequate in relation the description of development, alternatives, transport assessment, noise, and the cumulative effects of the development on the Charlemont-Dartmouth Community. For a project of this size, scale, investment to date, it is inadequate to propose a Railway Order with so many important studies and analysis missing. | TII, for the reasons noted by responses (9) and (23) above, do not consider the EIAR is inadequate.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| 33                                                                                                              | Concluding observations                 | 7        | As a direct result of the inadequacy of this EIA, Charlemont has gained an erroneous level of traction when St. Stephen's Green is a far superior location. St. Stephen's Green is predominantly a commercial area (Charlemont is predominantly residential.) notwithstanding the obvious advantages in terms of cost-effectiveness and accessibility.                                                                                                          | Responses (4) and (5) explain the rationale for the proposed location of Charlemont Station, and response (6) explains the cost-benefit this section of the alignment delivers for the MetroLink project.                                                                                                                                                                                                                                                                                                                                                                                                          |
| 34                                                                                                              | Requested amendment to An Bord Pleanála | 7        | We request the following amendments:<br><br>1. Omit from the Railway Order the section from Tara Street Station to Charlemont Station and associated onward tunnel extension and intervention tunnel.<br><br>2. Require the submission of a railway order for a section from Tara Street Station to St. Stephens Green to provide for a terminal hub station that can integrate with the Luas Green Line, multiple bus routes and future DART underground.      | The above responses to the observations made explain why TII do not consider it is correct or appropriate that the MetroLink alignment south of the proposed Tara Station should be omitted, and also demonstrates why the proposed Charlemont Station has been selected by TII as the preferred interchange with the Luas Green Line<br><br>A scheme which terminates at Tara Street would not be consistent with the Transport Strategy for Greater Dublin Area (2022-2042). In addition any decision to terminate the scheme at Tara will significantly impact on the overall viability and benefits of scheme. |

| RE: Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022 |              |          |                                                                                                                                                                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |
| 1                                                                           | Letter       | 5        | I wish to object to the above proposal on the following grounds: firstly, it is too expensive and secondly, it serves only to get from the Airport with no local links. | <p>The Board is not responsible for any decisions in relation to the funding the Project. It is solely responsible for assessing whether the Project is consistent with proper planning and sustainable development and that its effects on the environment are acceptable.</p> <p>The responsibility for funding the Project lies with the NTA, the Government and ultimately the Oireachtas. It has received all necessary approvals, including under the Public Spending Code for the making of a Railway Order. It will undergo further scrutiny and approvals, including under the Public Spending Code, before it is funded. It is not appropriate for the Board to make findings in relation to value-for-money that are outside its statutory functions and would cut across those arrangements. Members of the public are entitled to make representations to their TDs in relation to the value-for-money of any element of the Project.</p> <p><u>Need for the Project</u></p> <p>It is incorrect to say that MetroLink only serves to get from the Airport with no local links. As explained by EIAR Chapter 3, Background to the MetroLink Project, the benefits MetroLink will deliver are much wider than this and will address transport challenges within the Greater Dublin Area. The proposed Project will provide significant benefits not only to those who choose to use it, but also to other transport network users, by reducing the demand for road space and creating the opportunity for the road transport system to achieve optimum levels of efficiency and effectiveness. Also as outlined in Chapter 3, the proposed Project is part of an integrated transport network that also includes for BusConnects and DART+ which are all included under Project Ireland 2040. Together, these projects will result in a reliable, sustainable, affordable, integrated public transport network that will support the economy, help Ireland meet its climate change targets in line with Climate Action Plan 2023, and make Dublin a more liveable and sustainable city. Whilst MetroLink is a standalone project that is not dependent on any other projects for its delivery or effective operation, it is nonetheless a critical part of the proposed integrated transport network for the Greater Dublin Area.</p> <p>Attention is also drawn to Chapter 4, Description of the MetroLink Project that confirms the overall project objective for the proposed Project, as established by the National Transport Authority (NTA) and Transport Infrastructure Ireland (TII), and as informed by planning policy context, MetroLink, is to 'provide a sustainable, safe, efficient, integrated and accessible public transport service between Swords, Dublin Airport and Dublin City Centre'. (National Development Plan 2021-2030, Box 9.1).</p> <p>The proposed Project will also improve the performance of the public transport and road networks in North Dublin, including the critical Dublin-Belfast trade corridor, and the supporting infrastructure for Dublin Port and Dublin Airport. By creating a new transport mode choice for passengers, the proposed Project will enhance regional and international connectivity and help optimise the transport network. EIAR Chapter 9, Traffic and Transport, presents an analysis of the capacity of existing public transport corridors, indicating that many of the other bus corridors are currently operating well over its capacity, and therefore an alternative solution is required to accommodate demand.</p> <p>Further, EIAR Chapter 7, Consideration of Alternatives presents in detail the robust decision making process that has led to the proposed Project, including alternative alignment options and feasibility assessments of cost, amongst other considerations. The proposed Project has been designed to ensure maximum interchange with other modes of transport, leading to positive impacts reaching far beyond the alignment through direct connections to both the heavy rail and Luas networks.</p> |  |

| RE: Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022 |              |          |                                                                                                                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 2                                                                           | Letter       | 5        | Could I suggest that the Bord have a look at the tram system in Bordeaux - there are no overhead power lines, the trams run on powered rail lines only activated when the tram is in motion. There are a number of interchanges where you can stay on the existing tram or change to another line. This system allows for local access with one fare for busses and the tram. | <p>The observation is noted, but TII would bring to your attention the development of the Project as outlined in Chapter 3: Background to the MetroLink Project, section 3.6 Background to the Proposed Project. This section presents the project development and policy and strategy support for earlier revisions of MetroLink and the proposed Project presented in the Railway Order application.</p> <p>In the development of the proposed design for MetroLink and assessed in the EIAR submitted for this Railways Order, a number of alternative transport options were analysed to serve the Fingal/North Dublin Corridor. These are set out in EIAR Chapter 7, Consideration of Alternatives.</p> <p>The options assessed included for heavy rail, light rail Bus Rapid Transit (BRT) options, as well as potential combinations of options. These options were assessed in a two-stage analysis, based on feasibility of the option and on the consideration of whether the scheme meets the fundamental project objectives by serving Swords, Dublin Airport and the city centre. A Multi-Criteria Analysis (MCA) was undertaken having regard to Environment, Economy, Safety, Accessibility, and Social Inclusion and Integration. This assessment identified an Optimised Old Metro North as the best medium and long-term transport project for the Greater Dublin Area. The reasons for this choice are presented in section 7.3.2 of Chapter 7.</p> |
| 3                                                                           | Letter       | 5        | I attach a drawing indicating a possible route with feeder links.                                                                                                                                                                                                                                                                                                             | TII would note as referred to by responses (1) and (2) above that alternate alignments and systems have been considered before submitting proposals for the MetroLink project.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

| Re: Submission to the Draft Railway Order 2022 (MetroLink - Estuary to Charlemont via Dublin Airport) |                                              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| 1                                                                                                     | Executive Summary and Section 4.0 Conclusion | 3 & 13   | <p>Our client requires clarity that the construction and overall delivery of the MetroLink does not impact on our client's ongoing projects in the Swords area and as such would be willing to engage with TII on this matter.</p> <p>Swords has developed and grown significantly in recent years; however, the development of public transport has not progressed in tandem with the town's population growth. Whilst it is recognised that some forms of public transport are available within the town, there still remains a high dependency on private car use within Swords and its environs.</p> <p>In light of this, our client welcomes this strategic project and recognises the significance of its delivery to provide for a sustainable, safe, efficient, integrated and accessible public transport service between Swords, Dublin Airport and Dublin City Centre.</p> | <p>TII are grateful for you taking the time to make this submission and confirming your support for the MetroLink project which will deliver the benefits you have noted. The need for the proposed Project to facilitate the public transport network in Swords has been established and supported in National, Regional and Local policy documents. Through the provision of increased travel options it will facilitate a modal shift from car dependency in the area.</p> <p>To provide clarity on how MetroLink will interface with Gerard Gannon Properties, TII propose a meeting is held to discuss ongoing Gerard Gannon projects and, in particular, where Gannon properties holds an interest in lands at Dardistown.</p> |

| Re.: Metro Link Railway Order - Gerhard and Rosemary Mayrhuber/Susan Consgrove - College Gate Apartments |                  |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| 1                                                                                                        | Objection Letter | 1        | I am instructed on behalf of the above named claimant to lodge the within objection to the Making of the above Railway Order for the following reasons:<br>1 . The Railway Order should not be approved until such time as the Bord is satisfied that there is an urgent need for the Scheme and that TII have the funding to complete the Scheme expeditiously if the Railway Order is approved.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | Chapter 03 (Background to the MetroLink Project) of the EIAR details the need for the Project, and how MetroLink will address urgent challenges such as meeting Ireland's climate change targets, and contributing to the achievement of Ireland's National Strategic Outcomes (NSOs) as set out in the National Planning Framework such as compact growth, sustainable mobility, enhanced regional accessibility, high quality international connectivity, enhanced amenity and heritage, transition to a low carbon and climate resilient economy, access to quality childcare, education and health services, a strong economy supported by enterprise, innovation and skills, strengthened rural economies and communities, and sustainable management of water, waste and other environmental resources.<br><br>Further, TII as the Government Agency responsible for delivering MetroLink, are committed to expediting the delivery of this transformative project on receipt of an Enforceable Railway Order as the business case has been approved.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 2                                                                                                        | Objection Letter | 1        | 2. The Railway Order should not be approved until such time as TII have provided drawings to an appropriate scale and my client has had an opportunity to consider same.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | TII have provided the necessary detail. As discussed and agreed with An Bord Pleanála, paper/hard copies and electronic/soft copies of the Railway Order documentation (containing identical information) comprised the following:<br>* The draft Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022;<br>* The associated Book of Reference and Schedules to the draft Railway Order, describing the works and listing owners and occupiers of lands by reference to the relevant plans accompanying the application;<br>* The associated Railway Order Plans and drawings, identifying the proposed railway works and identifying the owners and occupiers of lands listed in the Schedules;<br>* An Environmental Impact Assessment Report (EIAR) on the likely effects on the environment of the Project;<br>* The Natura Impact Statement (NIS) for the Project; and<br>* The Planning Report.<br><br>As noted, electronic versions of the documents specified are available at <a href="http://www.metrolinkro.ie">www.metrolinkro.ie</a> . Paper copies were made available for public access at An Bord Pleanála, Dublin City Council, Fingal County Council, Transport Infrastructure Ireland, and the National Transport Authority offices. Multiple newspaper notices were published regarding the availability of the Railway Order documentation, with the notice also indicating that copies of the documents, including the plans and drawings, could be purchased from TII (contact details for such requests were provided). The dates for consultation, including the extension of the submission deadline, were also noted.                                 |
| 3                                                                                                        | Objection Letter | 1        | 3. My clients have been invited to participate in a voluntary Discretionary Scheme by TII. This Scheme is vague at best and does not alleviate my clients concerns, that the uncertainty caused by the Making of a Railway Order in the absence of a commencement and completion date for the Scheme works, will have a detrimental impact on the value of their property under the definition of Rule 2 of the Acquisition of Land (Assessment of Compensation) Act 1919. You will note that any negative impact on the value of my clients property arising out of the Making of the Railway Order cannot be addressed by the Property Arbitrator, as he has no jurisdiction to deal with the question of sterilisation caused by the Making of the Railway Order. Any Discretionary Scheme that might be contemplated must give certainty to the landowner and must involve a commitment by the acquiring Authority to complete the purchase immediately. In this regard, the Bord will note that TII has already completed the purchase of a number of properties under the first Metro North Railway Scheme, and there is therefore no reason why they cannot continue with the process of advance purchases under the current iteration of the Scheme. | TII understands and acknowledges the importance for residential property owners to be able to plan their affairs with as much notice and certainty as possible. TII powers to aquire the properties concerned are contingent on the scheme obtaining an Enforceable Railway Order and as such it is not possible to enter into advance purchase agreements. As part of the Land Acquisition Strategy, TII has introduced a descretionary scheme to encourage early engagement. Our intention is to enter into a pre-agreement with residential property owners to agree a baseline apartment price and other matters of compensation, which will be payable under the compensation code. This will be detrmind at an early date and provides a commitment from TII to agree terms ahead of the statutory process, locking in a baseline apartment rice, with an agreement to apply an index to reflect any future uplift. The scheme will accelerate the acquisiiton process following as enforceable Railway Order avoiding protracted negotiations. TII advocates that residential property owners are professionally advised aspart of the process and have agreed to meet all reasonable professional fees and costs. The scheme does not prejudice property owners nor are they obligated to participate. TII have appointed external property consultants to assist with the implementation of the discretionary scheme. This also ensures that engagement with residential proeprty owners continues and concerns can be addressed where practicable. Further details on TII's Land Acquisition Strategy can be viewed at <a href="https://www.metrolink.ie">https://www.metrolink.ie</a> . |

| Submission No.                                                                                           |                  |          | 103, 285                                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

| Re.: Metro Link Railway Order - Gerhard and Rosemary Mayrhuber/Susan Consgrove - College Gate Apartments |                  |          |                                                                                                                                                                                                                                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| 4                                                                                                        | Objection Letter | 2        | The Bord should not approve any CPO/Railway Order until an urgent need for the scheme is established and that the Bord is satisfied that the scheme works will commence, and be completed expeditiously, should the Railway Order be confirmed. | Please refer to response (1) above in relation to the need for the Project, and TII's commitment to the delivery of MetroLink once an Enforceable Railway Order is received.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| 5                                                                                                        | Objection Letter | 2        | My client reserves the right to add and/or expand on this objection at the Oral Hearing. In particular, my client reserves the right to comment in detail on the Discretionary scheme which is being promoted by TII.                           | <p>TII wish to thank you for submission. The Railway Order application including the EIAR and associated appendices, will be considered together with any feedback/submissions received during the statutory consultation process (such as your own) by An Bord Pleanála. The Board has noted that it will call an Oral Hearing prior to making a decision on the RO application. TII and its specialists will be given the opportunity to present evidence on the proposed Project and on submissions received. There is also an opportunity for The Board and parties who made submissions (such as yourself) during the statutory consultation process to question TII and its specialists. Following this process and based on the information available to The Board, they will make a decision on the application.</p> <p>Please refer to response item (3) in relation to the Discretionary Scheme as part of the proposed Project.</p> |

| RE: Observation in respect of the MetroLink |              |          |                                                                                                                                                                                                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |  |
| 1                                           | Letter       | 1        | While construction is ongoing, care will need to be taken to minimise the effects on residents of the Village. We expect the contractors to adhere to normal guidelines re construction in urban areas. | <p>As detailed in EIAR Chapter 5, MetroLink Construction Phase, the programme for the construction of the proposed Project has been optimised to minimise the duration of the Construction Phase in order to lessen the duration of potential environment impacts, while ensuring that the areas surrounding the work sites remain operational and functional. Work will run concurrently at all MetroLink site locations to ensure the Project is delivered in an effective and timely manner.</p> <p>Appendix A5.1 of EIAR Chapter 5, MetroLink Construction Phase presents the Outline Construction Environmental Management Plan (CEMP). This document provides a framework that outlines the minimum requirements with regards to the appropriate mitigation, monitoring, inspection and reporting mechanisms that need to be implemented throughout the construction phase that aligns with the EIAR Assessment and proposed mitigations. The contractor(s) will update the Outline CEMP to a prepare a more detailed CEMP for each specific package of works required and for each location such as Glasnevin. The detailed CEMP(s) will be provided to DCC for consultation and approval in advance of any construction works on site. In addition, TII may appoint an Employer Representative to monitor compliance with the CEMP on their behalf. This may involve the appointment of temporary or permanent specialists with appropriate skills and experience as required to implement on-site procedures and monitor construction on behalf of TII to ensure impacts do not exceed those identified in the Railway Order, i.e., competent experts in biodiversity, architecture, archaeology and cultural heritage, noise and vibration, dust, waste, soils, land, ground movements, contamination, and water.</p> <p>In addition, regulatory and statutory bodies may undertake site visits to monitor compliance with legislative and regulatory requirements.</p> <p>A Freephone (e.g., 1800) helpline service will also be maintained during the Construction Phase to deal with enquiries and concerns from the general public.</p> |  |
| 2                                           | Letter       | 1        | In our view, the station at Albert College Park should be called National Botanic Gardens, to reflect the proximity of the station to one of the Dublin City's premier attractions.                     | <p>There is no proposed station at Albert College Park, however there will be an intervention shaft present. Both the proposed Griffith Park Station and Glasnevin Station are located within a short walk of the National Botanic Gardens.</p> <p>The naming of the stations is for the purpose of the Railway Order Application. There are no current plans to change their names.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |  |

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| 1                                                                                                                              | Letter       | 1        | I am in favour of the broad aim of the Metrolink project to connect Dublin's city centre to our national airport. However, as a resident living in the Dartmouth/Charlemont area, I wish to set out a number of observations for the Board regarding the proposal to locate the terminus station at Charlemont-Dartmouth. My family home abuts the site of the proposed location of the Terminus station. | Thank you for taking the time to make a submission and your overall endorsement of the MetroLink Project. We have reviewed your submission and responded to the observations made below.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| 2                                                                                                                              | Letter       | 1        | 1. Charlemont is the incorrect strategic location for a Terminus hub and spoke system as it is too far out along the Luas Green Line spoke and would prejudice future options for integration of networks and services.                                                                                                                                                                                   | <p>TII do not agree that Charlemont is the incorrect location for an interchange with the Luas Green Line or that it prejudices future options for integration with the wider transport network for the reasons set out below.</p> <p>The Board is required to have regard to the likely consequences for proper planning and sustainable development in the area in which it is proposed to carry out railway works (section 43(1) of the 2001 Act) and as such the following matters are relevant.</p> <p>The connection from St Stephens Green to Charlemont / Ranelagh is supported by the current Transport Strategy for Greater Dublin Area (2022-2042). The Transport Strategies were prepared by the National Transport Authority, scrutinised by the Joint Oireachtas Committee on Transport and approved by the Minister for Transport. It notes in section 12.3.2, "Charlemont offers the optimal location for the primary interchange with the Green Line in response to growing demand in the longer term and is an appropriate location to facilitate any potential future metro extensions to serve the south west, south or south east of the city region should sufficient demand arise."</p> <p>The Transport Strategy is "a consideration material to the proper planning and sustainable development of the area or areas in question." Development Plans are required to be consistent with the Transport Strategy. The Dublin City Development Plan 2022-2028 envisages this station at Charlemont in policy SMT22 "To support the expeditious delivery of key sustainable transport projects so as to provide an integrated public transport network with efficient interchange between transport modes, serving the existing and future needs of the city and region and to support the integration of existing public transport infrastructure with other transport modes. In particular the following projects subject to environmental requirements and appropriate planning consents being obtained: ... MetroLink from Charlemont to Swords".</p> <p>Accordingly, the location of the Charlemont station was a strategic decision made at the highest levels of transport and land use planning and such is fully consistent with the proper planning and sustainable development of the area.</p> <p>The current Transport Strategy considers a range of options for the onward extension of MetroLink to meet the demand for travel over the period of the strategy. This includes consideration of the need for the upgrade of the Luas Green Line to metro with a metro extension to Dublin south west, south or south east. Whilst the strategy envisages that further extensions will be delivered after 2042, MetroLink which terminates at Charlemont allows for the possible extension of the metro in all any of the above directions.</p> <p>The proximity of the metro to the Luas line at Charlemont provides for a positive customer experience for all users with short interchange distance and due to the proximity, clear wayfinding and high visibility of the interchange. The interchange arrangements at Charlemont provide for significantly better interchange arrangements compared to an alternative interchange at St Stephen's Green Station.</p> <p>The section of MetroLink route between St Stephen's Green and Charlemont Stations contributes significantly to the overall benefits of the scheme. It serves a significant area of the south city of Dublin and offers enhanced access from the local area to the city centre and a direct connection to Dublin Airport. It serves key trip attractors including residential areas and offices / workplace locations, with high passenger boarding and alighting figures in the peak hours. During the morning peak, at Charlemont station the flows include 1,800 passengers alighting, 2,300 boarding and 1,229 passengers alighting, 2,276 boarding during the evening peak. The passenger numbers contribute significantly to the overall benefits of the scheme and the effect of these benefits outweigh the additional costs that are associated with the delivery and operation of the section from St Stephen's Green to Charlemont station. Further information is available in Chapter 7: Consideration of the Alternatives, section 7.7.8 MetroLink Southern Terminus Location.</p> <p>The location of the interchange at Charlemont does not preclude onward extension south. An interchange at Charlemont is supported by policy including the Dublin City Development Plan 2022 - 2028 and the Transport Strategy for the Greater Dublin Area. As noted by the GDA Transport Strategy 2022-2042, section 12.3.2, "Charlemont offers the optimal location for the primary interchange with the Green Line in response to growing demand in the longer term and is an appropriate location to facilitate any potential future metro extensions to serve the south west, south or south east of the city region should sufficient demand arise."</p> <p>By extending MetroLink to Charlemont it provides for future proofing of the Green Line, bypassing the capacity constrained Luas on-street running section, and ensures potential future connectivity options are enabled, either to the Green Line or for extensions of the metro.</p> <p>The Charlemont Station interchange provides for increased passenger utilisation of the MetroLink system, thereby increasing the benefits delivered by the Project, reflected by an improved Project Benefit Cost Ration (BCR).</p> |

| Re: Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022 Case Refernece Number NA29N.314724 16 January 2023 |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| 3                                                                                                                              | Letter       | 1        | St. Stephens Green is the most appropriate location as it provides for interchange with bus, Luas and future DART underground. The project incorrectly dismisses St. Stephens Green West as an appropriate terminal station. It only considers St. Stephens Green East and Charlemont. Furthermore, no comprehensive study or investigation has been completed by NTA/TII as part of the entire Metrolink project on the optimal location for a city-centre terminus. | <p>TII do not agree that St Stephen's Green is the most appropriate interchange location for the reasons set out by response (2) above.</p> <p>It is not correct to say that the Project "only considers St. Stephens Green East and Charlemont." A number of route options were considered in the process of identifying the Emerging Preferred Route (EPR). These route options included potential station locations on St. Stephen's Green West. A station on St Stephen's Green West is not preferred for several reasons:</p> <p>If a station was placed on St Stephen's Green West, the alignment between the proposed Tara Station and a station on St Stephen's Green West would result in an undesirable horizontal reverse curve and an alignment greater than a 1000m long that would necessitate an intermediate intervention shaft located somewhere between these stations to comply with the MetroLink Fire Strategy. Additional construction would be required to provide such a facility, similar in size to the proposed Albert College Park Intervention shaft. This could feasibly be situated in the Trinity College Dublin sports grounds.</p> <p>TII note that it is Government policy to provide a station and interchange with the Luas Green Line at Charlemont, as set out by the GDA Transport Strategy 2022 – 2042. Should a station be placed on St Stephen's Green West, the alignment between a station located here and the proposed Charlemont Station would also result in an undesirable horizontal reverse curve and an alignment that is greater than 1000m long, and would thus again require an intervention shaft similar to the proposed Albert College Park Intervention shaft to be provided. This would be expected to result in significant demolition and redevelopment in an existing built-up area.</p> <p>In both cases, compared to the proposed alignment that runs much more directly between Tara, St Stephen's Green and Charlemont, the additional length of tunnel and the addition of two intervention shafts generated by locating a station on St Stephen's Green West is uneconomic in comparison.</p> <p>As a potential station location, St Stephen's Green West itself is a very constrained location due to the presence of buildings, Luas and St Stephen's Green Park. Maintaining the Luas operational during station construction would be complex and challenging with significant disruption expected, whilst the impacts on St Stephen's Green Park would be greater for a station in this location compared to the proposed location on St Stephen's Green East.</p> <p>This would be the result of; the likely need to place more of the station in the Park compared to the proposed station on St Stephen's Green East; it would impact an area of the Park that has greater amenity value than St Stephen's Green East due to the nearby Park entrance adjacent to the southern end of Grafton Street, and there would be a risk of impacting the existing Park lake.</p> <p>In summary, an alignment that links the proposed Tara, St Stephen's Green East and Charlemont stations is a more direct and economic alignment, does not require additional intervention infrastructure, avoids a complex engineering interface with the Luas Green Line, impacts the Park less and has less potential for disruption during the construction phase.</p> <p>As outlined by EIAR Chapter 3, Background to the MetroLink Project, one of the key objectives of the Project is the integration of it with the wider transport network that also includes for BusConnects and DART+ which are all included under Project Ireland 2040. Together, these projects will result in a reliable, sustainable, affordable, integrated public transport network that will support the economy, help Ireland meet its climate change targets in line with Climate Action Plan 2023 and make Dublin a more liveable and sustainable city.</p> <p>Arising from the decision to postpone the future upgrade of the Green Line to metro services, it is being argued that Charlemont station effectively becomes a terminus station in the short to medium term. In this regard, it is true to say that the Metrolink trains will terminate and turn back at Charlemont station, however the public transport service offering for passengers does not terminate, it transfers from Metrolink to LUAS as part of the integrated transport network.</p> |

|                                                                                                                                |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | <p>The terminus station for MetroLink is located at Estuary where all of the activities normally associated with a terminus (train sideways, car-parking etc) take place. At this location the high capacity public transport offering terminates and the public transport offering transfers to a completely different mode, i.e. Bus or car . The environmental effect of the Metrolink terminus are accordingly assessed in the EIAR. Charlemont Station does not have the associated infrastructure and services associated with a terminus location and in fact has more in common with a “system turn back location”. Charlemont Station is located within an area of high public transport accessibility, linking with the Luas Green Line which offers reasonably similar levels of services and frequency for journeys to and from the south of Dublin. As such, public transport service offering is not considered to terminate, but transfers onto the similar service offered by the Luas Green Line, forming part of a transport corridor running from Cherrywood to Estuary. The associated environmental impacts for the turnback and station at Charlemont have been fully assessed in the EIAR.</p> <p>Charlemont station itself was chosen on the basis of its interchange potential with Luas, as well as local bus services, as outlined above. The section of the line between St Stephen's Green and Charlemont generates considerable benefits for the scheme in terms of increased patronage, as detailed in response item (2) above. Operationally, the Station will see people moving quickly in and out of the area, noting that it will act as an interchange, and has been deliberately designed with minimum set down space or room for taxis so that it does not encourage the Station to be used as a terminus. All operational environmental impacts are mitigated so they are not significant, while the impact on amenity will be permanent and positive.</p> <p>The proposed route alignment from Estuary to Charlemont is consistent and compliant with the GDA Transport Strategy 2022-2042 (published in January 2023) in which states that the south city terminus at Charlemont offers the optimal location for interchange with the Green Line in response to growing demand in the longer term and is an appropriate location to facilitate any potential future metro extensions to serve the south west, south or south east of the city region should sufficient demand arise.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| 4                                                                                                                              | Letter       | 1        | 2. Expensive Duplication of Rail infrastructure: - The inclusion of an expensive and costly section between St. Stephens Green and Charlemont is strategically weak and duplicates the existing Luas Green Line services. NTA's cost estimate for this 1km section at €650M is an expensive duplication and significant investment that deprives other parts of Dublin that are in immediate need of rail infrastructure to support housing and urban development. | <p>The Board is not responsible for any decisions in relation to the funding the Project. It is solely responsible for assessing whether the Project is consistent with proper planning and sustainable development and that its effects on the environment are acceptable.</p> <p>The responsibility for funding the Project lies with the NTA, the Government and ultimately the Oireachtas. It has received all necessary approvals, including under the Public Spending Code for the making of a Railway Order. It will undergo further scrutiny and approvals, including under the Public Spending Code, before it is funded. It is not appropriate for the Board to make findings in relation to value-for-money that are outside its statutory functions and would cut across those arrangements. Members of the public are entitled to make representations to their TDs in relation to the value-for-money of any element of the Project.</p> <p>In any event, TII do not agree with this statement for the reasons set out by response (2) above, noting that infrastructure is not being duplicated given the capacity of the Luas south from St. Stephen’s Green is restricted due to on-street running.</p> <p>There is a limit to the potential of the Luas to provide additional capacity in the on-street non-segregated section of the Luas Green Line from Charlemont northwards through the city centre. The nature of this route and the fact that it currently crosses several road junctions (Adelaide Road, Harcourt Street / Hatch Street upper and Harcourt Street / St Stephen’s Green south) limit the service to a maximum of 24 trams per hour per direction. The projected demand for this section would require a higher frequency of up to 30 trams per hour and this demand cannot be met with on-street systems (Luas / bus). The interchange between Luas and MetroLink proposed at Charlemont will provide the necessary capacity to address the demand on this corridor and reduce overall travel time for passengers</p> <p>There is also high passenger demand forecast for a Metrolink station at Charlemont, including from the Ranelagh area, which would be lost if St. Stephen's Green was the MetroLink southern interchange station. The additional fare revenues collected by the Charlemont Station interchange increase the benefits delivered by the Project, reflected by an improved Project Benefit Cost Ration (BCR).</p> <p>Further, to ensure that public investment delivers value for money, the Public Spending Code sets out requirements for the evaluation, planning and management of public investment. The preparation of a Business Case is a key element of meeting these requirements. The Public Spending Code requires that both the Preliminary Business Case and Final Business Case for public investment projects are published.</p> <p>In July 2022, the Government granted Approval in Principle to the NTA to enable the submission of a railway order application by TII to An Bord Pleanála in respect of the MetroLink project (Decision Gate 1). This approval was granted after the Preliminary Business Case (PBC) had undergone significant scrutiny and challenge by bodies that are independent of TII, including DoT and DPER review (including independent review by JASPERS and the Major Projects Advisory Group (MPAG)) of the PBC around timeline, costs and benefits that were updated to inform the Government decision.</p> |

| Submission No.                                                                                                                 |              |          | 105                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |  |
| 5                                                                                                                              | Letter       | 1        | 3. The station box at Charlemont, as constructed in 2021/22 by the developer, Hines, does not have the benefit of planning permission and has not been part of the EIA undertaken for this project. Processing the current Railway Order application, which is reliant on these preliminary and now constructed works, is legally unsafe and contravenes the provisions of the EIA Directive.                                                                                                                                                                                                                                                                                                      | The MetroLink enabling works constructed as part of the Hines development was included in the planning application for the Hines Development and has the benefit of planning permission which was granted in April 2019.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |  |
| 6                                                                                                                              | Letter       | 1        | <p>4. The station box at Charlemont will result in only one possible future tie in with the Luas Green Line to the south, which would result in an option that was previously dismissed as part of the Tie-In study from March 2017. No alternatives to the station box at Charlemont were considered as it had been fixed through the design of the overhead Hines Grand Parade commercial development, sited above the proposed box.</p> <p>The implications of this new alignment has significant impact on our wider community as it will involve top-down construction that will only be possible when several houses on Manders Terrace, Oakley Road and Charleston Road are demolished.</p> | <p>The station box at Charlemont allows for a future tie into the Luas Green Line should it be determined in the future that through running metro services to Sandyford is the required solution to address the public transport needs to the south of the city. It is incorrect to say that the current proposal is based on an option that was previously dismissed as part of the March 2017 Green Line tie in study. The station design is in affect a modification to the preferred Green Line Tie Option 4B which was modified as result of the postponement of the upgrade of the Green Line to metro standard.</p> <p>The station box location was not fixed by the Charlemont Development. The preferred route for MetroLink was published in March 2019 following a comprehensive route options study. The preferred route was based on the emerging preferred route for the scheme which included a station at Charlemont. The Charlemont Metro Enabling Works were constructed to enable the Charlemont Development to proceed whilst simultaneously ensuring there was an option available to construct a station at Charlemont that avoided unnecessary demolition, took advantage of an available site, provided infrastructure that is integrated with planned development rather than necessitating later changes and retrospective adjustments to a new development or even possible demolition of the new development, whilst providing protected provision for the future extension of the scheme south, if required.</p> <p>It is also important to recognise that the station location at Charlemont is influenced by available vacant land and thus avoids unnecessary demolition.</p> <p>The submission seeks to portray the construction of the Metro Enabling Works as prejudicial to future decisions on proper planning and sustainable development of the area. It implies that the counterfactual would have had no effect on such decisions. That is not the case. There was a planning conflict between the EPR and the Grand Parade Development at the time the latter development was proposed. There was no resolution to that conflict that was free of implications for future decisions on the proper planning and sustainable development of the area. The Board could have refused permission for the Grand Parade Development, inevitably creating a underutilised and potentially vacant and idle site in a commercial hub location. The Board could have granted permission with no provision to facilitate a station at this location, resulting in a requirement for the railway order to provide for the demolition of a new office building. The Board's actual decision was reasonable and lawful in seeking to minimise the prejudice to an important office development and a critical piece of national infrastructure. It was also not particularly restrictive of future decisions in relation to the proper planning and sustainable development of the area. Of the three options open at the date of the Grand Parade planning application, two remain open: the Board can still require changes to the station design that require the demolition of the commercial building and it can grant an order that avoids demolition by using the Metro Enabling Works.</p> <p>It is agreed that the short-term implications for local residents will be significant as the scheme progresses through the construction stage, however the EIAR assesses the environmental impacts of the construction phase and commits to the implementation of appropriate mitigation measures that reduce the environmental impacts to not significant. The same is true of the operations phase for the project. TII will work closely with local residents to ensure the required mitigation measures are put in place.</p> <p>If in the future, the metro was extended south, this does not mean that inevitably open cut construction will be required or demolition of property will be necessary. In designing an extension, the promoter will seek to reduce the requirement for demolition by looking for tunnel launch sites at the southern extent of the scheme and, if one can be identified, driving the Tunnel Boring Machine northwards ultimately connecting into the existing tunnel. In that case, even if the new alignment were under the properties identified in the submission, the tunnel underneath them would be constructed by the Tunnel Boring Machine without the need for above ground works.</p> |  |

| Re: Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022 Case Refernece Number NA29N.314724 16 January 2023 |              |          |                                                                                                                                                                                                                                                                                                                                                                                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| 7                                                                                                                              | Letter       | 2        | 5. The Environmental Impact Assessment is inadequate in relation the description of development, alternatives, transport assessment, noise and the cumulative effects of the development on the Charlemont-Dartmouth Community. For a project of this size, scale, investment to date, it is inadequate to propose a Railway Order with so many important studies and analysis missing. | TII do not agree that the Environmental Impact Assessment is deficient, inadequate or missing information. The Railway Order application comprises a very detailed environmental impact assessment that has identified and assessed the potential environmental impacts of Metrolink and proposed mitigations for these impacts where necessary. TII would also draw attention to the detailed project description, construction phase description and operational phase description provided in EIAR Chapters 4 and 5 and 6, and EIAR Chapter 7 and associated appendices that present details of alternatives considered. EIAR Chapter 9 and appendices provides a detailed analysis of transport and traffic effects, and EIAR Chapters 13 Airborne Noise & Vibration, and 14 Groundborne Noise & Vibration provide a detailed assessment of potential noise and vibration effects, while Chapter 29 outlines the assessment of interactions between various environmental aspects, and Chapter 30 covers the cumulative impacts with other projects. This assessment is carried out for the full length of the alignment including relative to potential significant effects on the Charlemont-Dartmouth Community.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| 8                                                                                                                              | Letter       | 2        | 6. The development would result in noise and disturbance during the construction and operational phases and would result in a loss of amenities for the area.                                                                                                                                                                                                                           | <p>The EIAR presents a comprehensive and detailed assessment of both groundborne and airborne noise and vibration in Chapter 13 and 14 of the EIAR. The assessments include for predictive modelling in order to identify the potential impacts on all sensitive receptors during both the construction phase and the operational phase.</p> <p>Noise and disturbance during construction:</p> <p>No profound impacts have been identified for residents and mitigation measures proposed will be effective at reducing the impacts on these properties and in general terms impacts will be associated with the construction phase only. Significant mitigation is proposed to include 4m high noise barriers and further proposed mitigation in line with the Airborne and Groundborne Noise Mitigation Policy. On the implementation of these measures the residual impacts are predicted to be moderate. However, as outlined in Transport Infrastructure Ireland (TII) Airborne and Groundborne Noise Mitigation Policy (Appendix A14.6) there is a process in place whereby further mitigation measures can be implemented at individual properties should this be merited.</p> <p>Noise and disturbance during operation:</p> <p>No residual noise impacts are identified at this location during operation. The calculated rail noise levels across the proposed Project are not significant in terms of any widespread community disturbance and results in a not significant to slight impact when added to the prevailing noise environment.</p> <p>Loss of amenity during construction:</p> <p>EIAR Chapter 11, Population &amp; Land Use provides an assessment of effects on community amenity during construction and operation, which relates to the interaction of impacts on air quality; visual amenity; traffic and transport; and noise and vibration.</p> <p>At this location during construction as outlined in Section 11.5.2 of Chapter 11, no impacts are identified on the retail sector or community and social infrastructure (e.g. schools or hospitals). Any severance/disruption to transport will be limited by site mitigation measures such as alternative routes reducing impacts to not significant.</p> <p>Loss of amenity during operation:</p> <p>No significant residual negative impacts are anticipated on the Population and Land Use from the operation of the proposed Project, following the incorporation of the mitigation measures into the design of the proposed Project and implementation on an ongoing basis throughout the lifecycle. The residual effects that will arise during operation will be permanent and positive as detailed in EIAR Chapter 11, section 11.1.1.</p> <p>The zoning under the Dublin City Development Plan 2022 - 2027 for the residential properties in question is "Z2 Residential Neighbourhoods (Conservation Areas)" with an objective to "protect them from unsuitable new developments or works that would have a negative impact on the amenity or architectural quality of the area (See Table 3.11 of the submitted Planning Report). As outlined in Section 4.5.18.6 of the Planning Report, the element of the Project within the Z2 zoning area will affect a below ground area only and as such will not compromise the land use objective for the lands overhead. The majority of the proposed Charlemont Station and all above ground elements are located within the lands zoned Z5 with the objective "To provide for the creation and protection of enterprise and facilitate opportunities for employment creation". The Station has been designed so that it is integrated with the proposed redevelopment of this site by a third party development, and as such, demonstrates that the proposed Project is consistent with the zoning objective. The Metrolink station design does not result in any segregation of the area, with no surface barriers or walls proposed.</p> |

| 9                                                                                                                              | Letter       | 2        | <p>The Traffic Study for the local Charlemont area is wholly inadequate as it omitted the modelling of the impact of Airport users coming to the only Dublin South Metrolink station at Charlemont. The Traffic Study uses a strategic, generalised regional model that does not take local factors into account.</p> <p>Extract from observation 7) - The EIA did not properly assess the impact of additional local traffic volumes, rather they used a generalised regional model that does not take local factors into account. A key local factor at a Terminus station in Charlemont that runs to the Airport is the huge volume of anticipated airport users from Dublin South and greater Dublin/Leinster that will come to Charlemont via car or taxi with luggage for onward destination to the airport. The is no space for a bus terminus or taxi rank. Grand Parade and the residential area around Charlemont-Dartmouth cannot sustain the significant additional traffic volumes associated with this development.</p> | <p>The MetroLink forms part of an integrated public transport network. The system is designed in an integrated manner so that people travelling from the area south of Dublin to access locations north of Charlemont, such as Dublin Airport, Mater, Swords etc. will utilise public transport to interchange with the MetroLink, or will walk or cycle to access their local station. The system is not designed to encourage people to drive to stations within the City and TII actively discourage people from doing so other than the Park &amp; Ride station at Estuary. TII therefore do not agree with the observation that there will be a “huge volume of anticipated airport users from Dublin South and greater Dublin/Leinster that will come to Charlemont via car or taxi with luggage for onward destination to the airport” as this is not borne out by our transport analysis.</p> <p>The Transport Assessment for MetroLink includes for people travelling to/from Dublin Airport from all areas within the extents of the GDA area, therefore it is incorrect to say "The Traffic Study for the local Charlemont area is wholly inadequate as it omitted the modelling of the impact of Airport users coming to the only Dublin South Metrolink station at Charlemont".</p> <p>The NTA's Eastern regional Model (ERM) incorporates a wide range of data sources, including demographic data, land use data, transportation network data, and travel survey data. The system is designed to model a variety of transportation modes, including private vehicles, public transit, walking, and cycling, and to simulate the interactions between these modes. The ERM model has been validated and calibrated using a range of localised data sources to ensure that the model can accurately represent the transport network, these include public transport and vehicle counts from the canal cordon counts. The outputs from the model have been combined with local survey data to undertake the more localised modelling, such as the pedestrian impact assessments, or the local traffic signals. This does not support the observations made “The Traffic Study uses a strategic, generalised regional model that does not take local factors into account.” or “The EIA did not properly assess the impact of additional local traffic volumes, rather they used a generalised regional model that does not take local factors into account.”</p> <p>Regards the observation there will be a "huge volume of anticipated airport users from Dublin South and greater Dublin/Leinster that will come to Charlemont via car or taxi with luggage for onward destination to the airport. Grand Parade and the residential area around Charlemont-Dartmouth cannot sustain the significant additional traffic volumes associated with this development", this is covered by response (10) below.</p> |
| 10                                                                                                                             | Letter       | 2        | <p>7. The development would have an adverse impact upon traffic during the construction and operational phase, and it has not been properly designed and there is poor integration with other modes of transport. Pedestrian movements in and around the station would be difficult. Grand Parade is an already heavily congested orbital route.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | <p>The MetroLink is designed to form part of an integrated public transport network with Charlemont selected as the preferred interchange location in order to maximise the potential interchange with the existing Luas Green Line. In overall terms, Charlemont Station will provide for improvements to the public transport network resulting in decreases in private car usage/trips, increases in public transport usages and will facilitate walking and cycling to the station, without significantly impacting on the operation of the road network in the area.</p> <p>Construction Phase:</p> <p>EIAR Appendix A9.5 Scheme Traffic Management Plan presents the analysis undertaken to assess the impact of the traffic management measures on the local road network surrounding the proposed Charlemont Station during the construction phase. At the local level the following parameters have been used to assess impacts on general traffic and on pedestrians:</p> <ul style="list-style-type: none"><li>• Increase in walking distance/quality of service for pedestrians (through removal of footpath, reduction of quality of service, removal of a pedestrian crossing or relocation of crossing by more than 100m);</li><li>• Increase in driver delays at junctions;</li><li>• Changes in traffic flows on surrounding streets; and,</li><li>• Additional distance travelled due to diversions.</li></ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

| Re: Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022 Case Refernece Number NA29N.314724 16 January 2023 |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
|                                                                                                                                |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | <p>The analysis undertaken at this location indicates that the increased volume of traffic on Grand Parade and Northbrook Road does not translate into any significant increase in driver delay. The largest increase in driver delay of 12 seconds is registered on the westbound approach on Grand Parade to the Ranelagh Road signalised junction.</p> <p>During the construction phase, pedestrians will experience a reduction in quality of pedestrian infrastructure and space. The construction site boundary will encroach upon footways in the local area, including the northern side of Dartmouth Road, and the southern side of Grand Parade. However, a temporary signalised crossing will be provided west of the Luas to maintain pedestrian access to and from the Stop. Whilst there are partial closures on Dartmouth Road and Grand Parade, pedestrian movements will be maintained on appropriately sized footways through the area.</p> <p>Operational Phase:</p> <p>A microsimulation VisWalk model has been developed for the immediate area surrounding Charlemont Station during the operational phase. The model covers the full extent of the publicly accessible station area, including the immediate vicinity of the station entrance at street level, the Luas stop and nearby junctions at Charlemont Bridge. In order to accommodate the forecast demand from the proposed Charlemont Station, a new staircase with 2.4m stair width is proposed at the south east corner of Charlemont Luas stop. An elevator will also be provided at this location. Both are sized for MetroLink to Luas, and Luas to MetroLink passenger numbers.</p> <p>In addition, it is proposed that the pedestrian crossing on R111 Grand Parade will be repositioned to the front of the building being developed by Hines. With this infrastructure in place, the model indicates that the R111 Grand Parade will have an acceptable level of service overall, with some reductions in service seen at the pedestrian crossing where pedestrians are required to wait for a green phase at the signals. Overall, it is considered that the model displays an acceptable level of network performance.</p> <p>The proposed pedestrian crossing on Grand Parade will have minimal impact on the traffic flow along Grand Parade and can be programmed to operate in sync with the existing signalised junction at Grand Parade /Charlemont Street to maintain the flow of traffic movements. When the Project is operational, car mode share will decrease, with a reduction of up to approximately 830 car tips to and from the zones surrounding Charlemont Station over the 12hr period in 2065. In overall terms, the Charlemont Station will provide for improvements to the public transport network resulting in decreases in private car usage/trips, increases in public transport usages and will facilitate walking and cycling to the station, without significantly impacting on the operation of the road network in the area.</p> <p>Furthermore, TII have deliberately designed the Station with minimum set down space (with the exception of a drop-off on Grand Parade for persons of restricted mobility only) or room for taxi ranks so that it does not encourage the Station to be used for a significant volume of car or taxi trips.</p> |
| 11                                                                                                                             | Letter       | 2        | 8. The development will have an adverse impact upon property values, particularly during the construction phase. For many houses in the area there will be a long term and permanent adverse impact upon property values from noise of the operating rail infrastructure, vents, operational noise and signals, escalators, and large traffic volumes - vehicular and pedestrian using the station 19 hours per day. The adverse impact also extends to the loss of amenity for the wider community changing a residential neighbourhood into a noisy, busy, congested major transport hub. Houses along Dartmouth Square West (including our own) will lose access to the lane at the rear of our properties, abutting the site. | <p>Response (8) above outlines the predicted environmental impacts with regards to noise and vibration, and amenity, while responses (9) and (10) summarise the assessed traffic and pedestrian impacts. TII would note that as explained by response (10) above that in overall terms Charlemont Station will provide for improvements to the public transport network resulting in decreases in private car usage/trips.</p> <p>Regards devaluation, there is evidence to suggest that property values will in fact increase in close proximity to public transport infrastructure and that local residents will greatly benefit from having a world class Metro system providing access to the city centre, airport and north city at their doorstep. The benefits of the project for all communities along the MetroLink route are described in Chapter 3: Background to the MetroLink Project, section 3.4 MetroLink Response to Challenges.</p> <p>Access to the laneway to the rear of Dartmouth Square West will be maintained, apart for a 33m section of the lane to the rear of N0 11- 15 which will be occupied by the contractor for a period of 6 months to facilate construction of part of the station box.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

| Re: Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022 Case Refernece Number NA29N.314724 16 January 2023 |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| 12                                                                                                                             | Letter       | 2        | <p>Accordingly, we are requesting the following amendments of An Bord Pleanála:</p> <p>1. Omit from the Railway Order the section from Tara Street Station to Charlemont Station and associated onward tunnel extension and intervention tunnel.</p> <p>2. Require the submission of a Railway Order for a section from Tara Street Station to St Stephens Green which would effectively provide for a terminal hub station that can integrate with the Luas Green Line, multiple bus routes and future DART underground.</p> | <p>The above responses to the observations made explain why TII do not consider it is correct or appropriate that the MetroLink alignment south of the proposed Tara Station should be omitted, and also demonstrates why the proposed Charlemont Station has been selected by TII as the preferred interchange with the Luas Green Line</p> <p>A scheme which terminates at Tara Street would not be consistent with the Transport Strategy for Greater Dublin Area (2022-2042). In addition any decision to terminate the scheme at Tara will significantly impact on the overall viability and benefits of scheme.</p> |

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| 1                                                                                                                                                                                                 | 1. Warranties and Guarantees | 1        | <p>The TII advised us of their intention to acquire the substratum of part of our property at 28a and 29 Pearse Street. We have requested that they advise us of the warranties and guarantees that will be in place to safeguard us in the event our property is damaged by the tunnelling work immediately adjacent to our site. They have failed to provide us with such information. We are justifiably concerned that such construction works may cause damage to our property.</p> <p>We have therefore serious concerns regarding the lack of warranties, assurances and guarantees in relation to our property. If our building is damaged during the construction period or as a result of the construction work, we maintain that the Acquiring Authority should be responsible and should be prepared to give guarantees, assurances and warranties. It is not acceptable that the Acquiring Authority might delegate all responsibility to the contractor who will be appointed to undertake work on their behalf and that any damage that may arise during the construction period in relation to nearby property might be the sole responsibility of the appointed contractor. The TII can recover any outlay that they have to incur from their contractor under the terms of their contract. A property owner such as ourselves should not have to deal with a contractor that is not acting on our behalf.</p> <p>We submit therefore that any permission granted by An Bord Pleanala in this matter should be subject to the provision by TII to An Bord Pleanala of such guarantees and warranties that will satisfy the Bord that we will be fully indemnified in respect of any costs which may be incurred by us in the event of damage to our property, including but not limited to all costs related to the repair or rebuilding of the property and all costs related to relocation of our activities and those of our tenants in the event that we need to vacate the premises before or during such repair or reconstruction. We submit further that details of such warranties and guarantees should require that these be provided to us before construction begins.</p> | <p>TII are not predicting structural damage to your property from the construction of MetroLink. TII understand the reasons for your concerns and would like to provide the assurance that the potential impact of construction on your property has been carefully assessed. This includes the impact of noise and vibrations from: the tunnel boring machine (TBM), mechanical excavation and blasting; and construction generated ground movements leading to settlement and possible building and property movement. All of which have been assessed and reported in the EIAR and are summarised below.</p> <p><u>Ground Movement</u><br/>EIAR Appendix A 5.17 Building Damage Report, covers the assessed impacts of construction generated ground movements and settlement on your property. Your property is predicted to not exceed the 'Slight' category, an explanation for which can be found in Table 4-4 of the aforementioned report.</p> <p><u>Noise and Vibration</u><br/>EIAR Appendix A14.5, Groundborne Noise and Vibration and Blasting Modelling Results, 14.4 Section AZ4 Northwood to Charlemont, presents the predicted vibration levels during TBM passage for various sensitive receptors.</p> <p>The predicted vibration levels for TBM Passage during the day and night are 0.27ms-1.75 (VDV day) and 0.227ms-1.75 (VDV night). [Vibration Dose Value is a parameter that combines the magnitude of vibration and the time for which it occurs]. Both of these values are lower than the VDV Threshold Levels of 1.0ms-1.75 (VDV day) and 0.5ms-1.75 (VDV night). These threshold levels have been used in relation to human response to vibration, and thresholds for building damage are much higher. As the predicted levels of vibration from TBM passage are below these thresholds then no impact from vibration during TBM passage is predicted to the building.</p> <p>The predicted groundborne noise and vibration from mechanical excavation at Tara Station are also presented. The predicted vibration during mechanical excavation is 0.001 ms-1.75 VDV which is will below the VDV Threshold Levels of 0.8ms-1.75 VDV. There are therefore no adverse impacts predicted at this location during the mechanical excavation at Tara Station.</p> <p>Figure 14.4 of the EIAR Blasting Contours of PPV indicates that vibration from blasting at this location will be less than 1mm/s PPV, which is well below the threshold level of 8mm/s for blasting. Figure 14.5 of the EIAR Blasting Air Overpressure contours shows that this location is outside of the 120dB contour, and below the 125dB threshold levels. There is therefore no significant impact from blasting predicted at this location.</p> <p><u>Monitoring of Potential Impacts</u><br/>To provide further reassurance, monitoring instrumentation will also be installed to monitor the performance of the works and potential environmental impacts, including those discussed above to ensure that acceptable limits are not breached.</p> <p><u>POPS Scheme</u><br/>TII do not intend to put in place a Property Owners Protection Scheme for Commercial Properties along the MetroLink route. To protect commercial properties, TII contractors appointed to carry out the works will, with the agreement of the owners of such properties, commission chartered building surveyors to carry out a precondition survey of commercial properties. In the event that it is determined that damage has occurred. TII's contractor will be required to commission a follow up survey to confirm the extent of the damage and confirm if the damage has been caused by MetroLink works. Metrolink project insurances will be put in place in a manner similar to other large rail projects including Luas, and commercial businesses who suffer damage as a result of the MetroLink works will have access to those insurances"</p> |
| 2                                                                                                                                                                                                 | 2. Route Selection           | 2        | In the event that such warranties, assurances and guarantees are not forthcoming we have serious concerns in relation to the route chosen for the Metrolink in our vicinity. We believe that the route does not need to come under our building or so close to it. An alternative route for this stretch could be (for example) below the railway line which is reasonably close by and we assume the substratum under that property is already available to the Acquiring Authority.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | The routing of the tunnel by your property is due to the proposed station locations at Tara Street and St. Stephen's Green. The routing of the tunnel has been the subject of careful consideration over the course of a number of years and although all possible alternative routes have been considered, the optimum design which accommodates the proposed station locations, is to route in accordance with the current design.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |

Supporting Information | 2        | <p>The relevant part of our property is detailed at references ML60-U24 and U27 in the maps provided to us by TII. These show that the edge of the tunnel will be directly below the corner of our building, and the substratum that they seek to acquire will extend up to 10 metres beneath our building. Our building is 7 storeys over basement, and was built in 2018. It is occupied and used 7 days a week.</p> <p>We attach hereto copies of the email correspondence between ourselves and TII in this matter.</p> | TII confirm that the tunnel has been designed to cater for the basement and all floors of the building, and potential environmental impacts have been assessed as noted by response (1), taking account of the particular location of your property. |

| Railway (MetroLink-Estuary to Charlemont via Dublin Airport) Order 2022 Case reference Number NA29N.314724 |                       |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| 1                                                                                                          | Letter - Introduction | 1        | Whilst I am broadly in favour of any well-thought-out transport infrastructure planning (such as the proposed MetroLink to connect the airport to the city centre), I have deep misgivings about the proposed plan and the competence of TII to execute this plan within budget and timescale. As a resident of a home very close to the proposed Charlemont terminus I feel that my views on this aspect of the plan are concrete rather than abstract.                                                                                                                      | It is regrettable that the submitter has such misgivings given TII's record in successful delivery of Road and Public transport projects.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| 2                                                                                                          | Key Submission Points | 1        | 1. Charlemont is the incorrect strategic location for a Terminus. The notion of locating a major rail terminus at a small, congested, residential street such as Dartmouth Road is plainly absurd. Dartmouth Road currently struggles with the current level of through traffic between Ranelagh and Leeson Street. The congestion that will be caused by thousands of passengers transiting the station every hour and connecting with other forms of transport will create enormous issues not only for those same passengers but for the entire community within the area. | <p>TII do not agree that Charlemont is the incorrect location for an interchange with the Luas Green Line for the reasons set out below.</p> <p>The Board is required to have regard to the likely consequences for proper planning and sustainable development in the area in which it is proposed to carry out railway works (section 43(1) of the 2001 Act) and as such the following matters are relevant.</p> <p>The connection from St Stephens Green to Charlemont / Ranelagh is supported by the current Transport Strategy for Greater Dublin Area (2022-2042). The Transport Strategies were was prepared by the National Transport Authority, scrutinised by the Joint Oireachtas Committee on Transport and approved by the Minister for Transport. It notes in section 12.3.2, "Charlemont offers the optimal location for the primary interchange with the Green Line in response to growing demand in the longer term and is an appropriate location to facilitate any potential future metro extensions to serve the south west, south or south east of the city region should sufficient demand arise."</p> <p>The Transport Strategy is "a consideration material to the proper planning and sustainable development of the area or areas in question." Development Plans are required to be consistent with the Transport Strategy. The Dublin City Development Plan 2022-2028 envisages this station at Charlemont in policy SMT22 "To support the expeditious delivery of key sustainable transport projects so as to provide an integrated public transport network with efficient interchange between transport modes, serving the existing and future needs of the city and region and to support the integration of existing public transport infrastructure with other transport modes. In particular the following projects subject to environmental requirements and appropriate planning consents being obtained: ... MetroLink from Charlemont to Swords".</p> <p>Accordingly, the location of the Charlemont station was a strategic decision made at the highest levels of transport and land use planning and such is fully consistent with the proper planning and sustainable development of the area.</p> <p>The current Transport Strategy considers a range of options for the onward extension of MetroLink to meet the demand for travel over the period of the strategy. This includes consideration of the need for the upgrade of the Luas Green Line to metro with a metro extension to Dublin south west, south or south east. Whilst the strategy envisages that further extensions will be delivered after 2042, MetroLink which terminates at Charlemont allows for the possible extension of the metro in all any of the above directions.</p> <p>The proximity of the metro to the Luas line at Charlemont provides for a positive customer experience for all users with short interchange distance and due to the proximity, clear wayfinding and high visibility of the interchange. The interchange arrangements at Charlemont provide for significantly better interchange arrangements compared to an interchange at St Stephen's Green Station.</p> |

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| Railway (MetroLink-Estuary to Charlemont via Dublin Airport) Order 2022 Case reference Number NA29N.314724 |              |          |                                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
|                                                                                                            |              |          |                                         | <p>The detailed analysis done for the Railway Order application further confirms that the section of MetroLink route between St Stephen's Green and Charlemont Stations contributes significantly to the overall benefits of the scheme. It serves a significant area of the south city of Dublin and offers enhanced access from the local area to the city centre and a direct connection to Dublin Airport. It serves key trip attractors including residential areas and offices / workplace locations, with high passenger boarding and alighting figures in the peak hours. During the morning peak, at Charlemont station the flows include 1,800 passengers alighting, 2,300 boarding and 1,229 passengers alighting, 2,276 boarding during the evening peak. The passenger numbers contribute significantly to the overall benefits of the scheme and the effect of these benefits outweigh the additional costs that are associated with the delivery and operation of the section from St Stephen's Green to Charlemont station. Further information is available in Chapter 7: Consideration of the Alternatives, section 7.7.8 MetroLink Southern Terminus Location.</p> <p>The location of the interchange at Charlemont does not preclude onward extension south. An interchange at Charlemont is supported by policy including the Dublin City Development Plan 2022 - 2028 and the Transport Strategy for the Greater Dublin Area. As noted by the GDA Transport Strategy 2022-2042, section 12.3.2, "Charlemont offers the optimal location for the primary interchange with the Green Line in response to growing demand in the longer term and is an appropriate location to facilitate any potential future metro extensions to serve the south west, south or south east of the city region should sufficient demand arise."</p> <p>By extending MetroLink to Charlemont it provides for future proofing of the Green Line, bypassing the capacity constrained Luas on-street running section, and ensures potential future connectivity options are enabled, either to the Green Line or for extensions of the metro.</p> <p>The Charlemont Station interchange provides for increased passenger utilisation of the MetroLink system, thereby increasing the benefits delivered by the Project, reflected by an improved Project Benefit Cost Ration (BCR).</p> <p>Traffic and Pedestrian Congestion<br/>TII have modelled the impact of the potential changes to traffic and pedestrian movements and this shows there will be no significant impacts and instead MetroLink will provide improvements to the transport network as explained below. Please refer to Chapter 9, Traffic and Transport, Appendix A9.2-B Traffic and Transport AssessmentCharlemont Station, summarised in section 7.</p> <p>The MetroLink is designed to form part of an integrated public transport network with Charlemont selected as the preferred interchange location in order to maximise the potential interchange with the existing Luas Green Line. In overall terms, Charlemont Station will provide for improvements to the public transport network resulting in decreases in private car usage/trips, increases in public transport usages and will facilitate walking and cycling to the station, without significantly impacting on the operation of the road network in the area.</p> <p>A microsimulation VisWalk model has been developed for the immediate area surrounding Charlemont Station during the operational phase. The model covers the full extent of the publicly accessible station area, including the immediate vicinity of the station entrance at street level, the Luas stop and nearby junctions at Charlemont Bridge. In order to accommodate the forecast demand from the proposed Charlemont Station, a new staircase with 2.4m stair width is proposed at the south east corner of Charlemont Luas stop. An elevator will also be provided at this location. Both are sized for MetroLink to Luas, and Luas to MetroLink passenger numbers. Please refer to Appendix A9.2-B, section 6.1.3. Pedestrian Impact Assessment.</p> <p>In addition, it is proposed that the pedestrian crossing on R111 Grand Parade will be repositioned to the front of the building being developed by Hines. With this infrastructure in place, the model indicates that the R111 Grand Parade will have an acceptable level of service overall, with some reductions in service seen at the pedestrian crossing where pedestrians are required to wait for a green phase at the signals. Overall, it is considered that the model displays an acceptable level of network performance.</p> <p>The proposed pedestrian crossing on Grand Parade will have minimal impact on the traffic flow along Grand Parade and can be programmed to operate in sync with the existing signalised junction at Grand Parade /Charlemont Street to maintain the flow of traffic movements. When the Project is operational, car mode share will decrease, with a reduction of up to approximately 830 car tips to and from the zones surrounding Charlemont Station over the 12hr period in 2065. In overall terms, the Charlemont Station will provide for improvements to the public transport network resulting in decreases in private car usage/trips, increases in public transport usages and will facilitate walking and cycling to the station, without significantly impacting on the operation of the road network in the area.</p> <p>Furthermore, TII have deliberately designed the Station with minimum set down space (with the exception of a drop-off on Grand Parade for persons of restricted mobility only) or room for taxi ranks so that it does not encourage the Station to be used as a terminus.</p> |

| Railway (MetroLink-Estuary to Charlemont via Dublin Airport) Order 2022 Case reference Number NA29N.314724 |                       |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| 3                                                                                                          | Key Submission Points | 1        | 2. Using Charlemont as a terminus will prejudice the future evolution of the network. For reasons best known to themselves TII have always favoured continuing Metrolink along the Luas Green Line, a policy that implied the destruction and rebuild of some of the best rail infrastructure undertaken in this country. When it was pointed out to them that the depth of the tunnel under the main sewer made this impossible, they changed the plan to make Charlemont a terminus. This appears to be a stubborn refusal to face engineering reality, as well as a shocking indictment of their professional competence. It was a local resident who pointed out the existence of a deep sewer along the canal, something TII had missed in their plans. | <p>For reasons set out in this reposne and reponses to other similar submissions, the decision to locate a station at Charlemont does not prejudice the future evolution of the public transport network.The decision not to progress along the Luas Green Line with MetroLink was not driven by the location of the sewer along Grand Canal and any adjustments to the vertical alignment to de-risk the impacts to the sewer. As noted in response (1) the location of the Charlemont station was a strategic decision made at the highest levels of transport and land use planning and such is fully consistent with the proper planning and sustainable development of the area. It is provided for the in the Transport Strategies and Dublin City Development Plan 2022-2028.</p> <p>The proposed MetroLink alignment has not been extended south of Charlemont for the reasons set out by the GDA strategy , section 12.3.10, "The challenges associated with the upgrading of the Luas Green Line to a metro standard of service have led to the emergence of an alternative proposal which seeks to meet travel demand from south of Sandyford along a new light rail corridor which serves UCD post-2042. As such, the upgrading of the Green Line to metro standard is not being pursued as part of this strategy. Instead, for this strategy period, the capacity and frequency on the current Green Line from Sandyford northwards to the city centre will be incrementally increased through the provision of additional tram fleet and services and associated turnback arrangements to meet forecast passenger demand. The location of the interchange at Charlemont does not preclude onward extension south. An interchange at Charlemont is supported by policy including the Dublin City Development Plan 2022 - 2028 and the Transport Strategy for the Greater Dublin Area.</p> <p>By extending MetroLink to Charlemont it provides for future proofing of the Green Line, bypassing the capacity constrained Luas on-street running section, and ensures potential future connectivity options are enabled, either to the Green Line or for extensions of the Metro.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| 4                                                                                                          | Key Submission Points | 1        | 3. The budget of €650M for the section between St. Stephens Green and Charlemont is an enormous misuse of financial resources when one considers that there is already a perfectly good means of making that short journey - the Luas.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | <p>The Board is not responsible for any decisions in relation to the funding the Project. It is solely responsible for assessing whether the Project is consistent with proper planning and sustainable development and that its effects on the environment are acceptable.</p> <p>In any event, TII do not agree with this statement for the reasons set out by response (2) above, noting that infrastructure is not being duplicated given the capacity of the Luas south from St. Stephen's Green is restricted due to on-street running.</p> <p>There is a limit to the potential of the Luas to provide additional capacity in the on-street non-segregated section of the Luas Green Line from Charlemont northwards through the city centre. The nature of this route and the fact that it currently crosses several road junctions (Adelaide Road, Harcourt Street / Hatch Street upper and Harcourt Street / St Stephen's Green south) limit the service to a maximum of 24 trams per hour per direction. The projected demand for this section would require a higher frequency of up to 30 trams per hour and this demand cannot be met with on-street systems (Luas / bus). The interchange between Luas and MetroLink proposed at Charlemont will provide the necessary capacity to address the demand on this corridor and reduce overall travel time for passengers</p> <p>There is also high passenger demand forecast for a Metrolink station at Charlemont, including from the Ranelagh area, which would be lost if St. Stephen's Green was the MetroLink southern interchange station. The additional fare revenues collected by the Charlemont Station interchange increase the benefits delivered by the Project, reflected by an improved Project Benefit Cost Ration (BCR).</p> <p>Further, to ensure that public investment delivers value for money, the Public Spending Code sets out requirements for the evaluation, planning and management of public investment. The preparation of a Business Case is a key element of meeting these requirements. The Public Spending Code requires that both the Preliminary Business Case and Final Business Case for public investment projects are published.</p> <p>In July 2022, the Government granted Approval in Principle to the NTA to enable the submission of a railway order application by TII to An Bord Pleanála in respect of the MetroLink project (Decision Gate 1). This approval was granted after the Preliminary Business Case (PBC) had undergone significant scrutiny and challenge by bodies that are independent of TII, including DoT and DPER review (including independent review by JASPERS and the Major Projects Advisory Group (MPAG)) of the PBC around timeline, costs and benefits that were updated to inform the Government decision.</p> |

| Railway (MetroLink-Estuary to Charlemont via Dublin Airport) Order 2022 Case reference Number NA29N.314724 |                       |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| 5                                                                                                          | Key Submission Points | 2        | 4. NTA have failed to provide adequate impact studies in relation the proposed project and those that have been supplied have all the appearance of documents hurriedly put together. Witness the extension of the deadline for making submissions to ABP due to the 'inadvertent omission' of such key documents.                                                                                                                                                                                                                   | <p>TII disagree with this assertion. A detailed, robust and comprehensive EIAR and supporting appendices has been prepared for the proposed Project, which has allowed TII to address all questions raised during the statutory consultation from the material provided within the EIAR and supporting documentation.</p> <p>With regards to the extension of deadline referred, when it was found that c.30 pages had been inadvertently omitted from a 12,000 page submission, it was right and proper to extend the submission deadline.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| 6                                                                                                          | Key Submission Points | 2        | 5. NTA's record in managing a project of this scale is highly questionable. As mentioned in 2) they had failed to note the presence of a major sewer along the Grand Canal. The €25 million spent on excavating and building a station box beneath the Mater Hospital which will now have to be simply written off is further evidence that incompetence.                                                                                                                                                                            | <p>TII had not "failed to note the presence of a major sewer". It is a normal part of project design development for amendments to be made as further information becomes available, in this case surveys were undertaken of the sewer, and thus the proposed alignment design and Charlemont Station has full regard to the location of the sewer along Grand Canal.</p> <p>A station box was not built previously at Mater, rather a section of wall was installed to future proof the possible construction of a station. A comprehensive alternatives/options assessment has been undertaken for this Project to ensure that it meets the objectives for this Project (not a previous one). This assessment, as presented in Chapter 7 of the EIAR identified an alternative route for the alignment that did not match the one proposed for "Old Metro North" and as a result it was not possible or desirable to utilise the section of retaining wall constructed at the time.</p> |
| 7                                                                                                          | Requested amendment   | 2        | <p>Requested amendment to An Bord Pleanala</p> <p>We request the following amendments:</p> <p>1. Omit from the Railway Order the section from Tara Street Station to Charlemont Station and associated onward tunnel extension and intervention tunnel</p> <p>2. Require the submission of a railway order for a section from Tara Street Station to St. Stephens Green which would effectively provide for a terminal hub station that can integrate with the Luas Green Line, multiple bus routes and future DART underground.</p> | <p>The above responses to the observations made explain why TII do not consider it is correct or appropriate that the MetroLink alignment south of the proposed Tara Station should be omitted, and also demonstrates why the proposed Charlemont Station has been selected by TII as the preferred interchange with the Luas Green Line.</p> <p>A scheme which terminates at Tara Street would not be consistent with the Transport Strategy for Greater Dublin Area (2022-2042). In addition any decision to terminate the scheme at Tara will significantly impact on the overall viability and benefits of scheme.</p>                                                                                                                                                                                                                                                                                                                                                                |

| RE: Application by the National Roads Authority (operating as Transport Infrastructure Ireland) for the Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order [2022] Case Number: NA29N.314724 |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                                                                                                                                                                                                                                                                                                                                                                                              |
| 1                                                                                                                                                                                                           | Cover letter | 1        | Grand Parade Property Trading Company DAC ("GPPTCD") would like to express its support for the Metrolink Project and in particular the station planned for Charlemont. GPPTDC would however like to raise a number of observations in relation to the particular plans for Charlemont Station. A summary of the observations is listed below, and a more detailed explanation can be found in the submission made by John Spain and Associates on behalf of Union Investment Real Estate GmbH appended to this letter. We hope these observations can be considered as part of the Railway Order process. | TII thank you for your support for the MetroLink Project and the Station planned for Charlemont. TII have reviewed your submission and have responded to each of the observations raised. Noting that this submission is the same as the submission made by Union Investment Real Estate GmbH, please refer to TII's response to the Union Investment Real Estate GmbH submission (No. 305). |

| RE: Submission on Behalf of Greybirch Limited on Proposed Scheme and CPO (Compulsory Purchase Order) of Lands |                    |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| 1                                                                                                             | Cover Letter       | 1        | <p>The subject lands, which are shown in yellow on Figure A attached, have the benefit of an existing planning permission for a hotel (ref: 3560/19) which includes two basement levels.</p> <p>The concern or clarification our client is seeking is in respect to any limitations or impacts that might arise if</p> <ul style="list-style-type: none"><li>• the permitted development was under construction at the same time as the Metrolink construction</li><li>• if the development on the retained lands took place during the operational stage of Metrolink.</li><li>• In addition they are seeking an understanding as to whether a taller development on same lands (subject to planning) might be impacted in the event of same progressing with the Metrolink at construction or at operational stage.</li></ul> <p>We have only recently been in contact with TII in respect to this matter and further meetings are planned with TII in the near future.</p> | <p>MetroLink will be a catalyst for and provide opportunity for future development and regeneration. While the MetroLink Railway Order does not include for future neighbouring or overhead development, the tunnels and stations are designed to support appropriate future imposed loads.</p> <p>TII will be required to make submissions in relation to planning applications for proposed future developments on or adjacent to MetroLink and there will necessarily be some engineering constraints (such as permissible loadings) required. However MetroLink is committed to engaging with known development proposals and new development proposals as they emerge with the intent of facilitating such developments as they emerge to the maximum extent consistent with the safe operation of the proposed Project.</p> <p>Again in common with other existing rail and tunnel projects, following grant of the Railway Order and development of detailed design, TII will produce "Guidance Note for Developers" that will be the subject of bye-laws following the grant of Railway Order and which is designed to facilitate future adjacent or over-site development while protecting the integrity and safety of the MetroLink works and operations.</p> <p>Therefore at this stage TII is dealing with known development proposals on a case by case basis, TII will work with parties in the future to assist with the wider development of sites over and above stations and tunnels. In this context TII has successfully engaged with a number of developers over the last two years to accommodate development over and in proximity to the alignment and there have been no material restrictions on development subject to the implementation of agreed design and mitigation measures and it is not anticipated that MetroLink will have a material impact on the development potential of sites above and in proximity to the alignment in future.</p> <p>The meetings planned for the future should consider the layout of the basements referred to by the observation in relation to the possible location of the MetroLink tunnels and the engineering implications and solutions for this.</p> <p>If a development is planned to be under construction at the same time as MetroLink, then before construction commences a coordination meeting would need to be held to ensure the phasing of development construction does not impact MetroLink construction.</p> |
| 2                                                                                                             | Additional request | 2        | We would ask the ABP to also seek clarification in respect to any limitation that might arise in respect to planned or future development on the retained lands.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | Please refer to response (1) above.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

| Re: Railway (Metrolink - Estuary to Charlemont via Dublin Airport) Order [2022]; Metrolink. Estuary through Swords, Dublin Airport, Ballymun, Glasnevin and City Centre to Charlemont, Co. Dublin |                                                   |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| 1                                                                                                                                                                                                 | Section 1 Introduction                            | 2        | Our Client is requesting that the Board convenes an Oral Hearing prior to making its decision. Further to telephone consultation with An Bord Pleanála, we were advised to and will make this request by email to sids@pleanala.ie. We understand that this request does not attract an additional fee.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | <p>An overview of the Oral Hearing process is provided in the EIAR Chapter 8.9.2. As detailed, An Bord Pleanála may, at its absolute discretion, hold an oral hearing on the Railway Order application. The Board has confirmed that an oral hearing will be held.</p> <p>The purpose of the oral hearing will be to allow issues relevant to an application for approval be examined. The oral hearing can be attended by anyone, but only those that have made a written application may make an oral submission at the oral hearing. The oral hearing is managed by the An Bord Pleanála inspector.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| 2                                                                                                                                                                                                 | Section 2 Executive Summary                       | 2        | <p>It is with grave concern that our Client welcomes the opportunity to make this submission. It raises issues of concern to Hammerson ICAV and Swords Pavilions relating to the impact of proposed Metrolink Railway Order and Compulsory Purchase Order on the 'Pavilions Development Lands' and on the operational Swords Pavilions Shopping Centre.</p> <p>Hammerson and Swords Pavilions, as a key stakeholder, would welcome the opportunity to continue to consult with TII to ensure that the future development plans for the Pavilions lands, the existing and future operational success of Swords Pavilions shopping centre and the retention of safe and efficient access to Swords Pavilions for its customers, employees and the wider community are realised, in harmony with Metrolink.</p> | <p>TII have reviewed the submission and provided response for the observations/ concerns raised in detail below.</p> <p>TII are committed to the continued engagement with stakeholders such as Hammerson and Swords Pavilions, to resolve the concerns presented in this submission.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| 3                                                                                                                                                                                                 | Section 2.1 'Pavilions Development Lands'         | 3        | The entirety of our Client's lands proposed to be acquisitioned by Metrolink are required by Hammerson to make its planned development scheme viable. It would not be plausible to relocate, reduce or limit the number of residential units planned as part of this scheme, as this would jeopardise the viability of the entire mixed use town centre masterplan. The lands to be acquisitioned must be the first phase of any residential development component for a number of legal and operational reasons.                                                                                                                                                                                                                                                                                            | <p>The temporary/permanent acquisition of the lands in the ownership of Hammerson's ICAV are required for the demolition of the footbridge across the R132. The temporary land take lands will be returned to Hammerson's ICAV on completion of these works, which will take approximately 18 - 24 months.</p> <p>The lands in question are zoned as part of the Metro Economic Corridor under the Fingal Development Plan 2023-2029. Therefore, the potential of these lands to develop to the desired density and mix is predicated on the delivery of MetroLink.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| 4                                                                                                                                                                                                 | Section 2.2 Operational Pavilions Shopping Centre | 3        | It is of concern that, for 'major town centre' land that will be immediately adjacent to Metrolink's significant construction and operational works, and where direct land take and traffic impacts are inevitable, Swords Pavilions shopping centre receives no direct consideration in respect of the magnitude and duration of effect of the project on its existing operations and future development potential. The project shows no appreciation of the significant contribution of the current and ongoing success of Swords Pavilions within its community.                                                                                                                                                                                                                                          | <p>Please refer to response item (3) in relation to the return of temporary land take.</p> <p>TII fully recognise the importance of the Swords Pavilions Shopping Centre to the local economy and community of Swords, and fully support its operations and future growth ambitions. As detailed in Chapter 5 (MetroLink Construction Phase), the programme for the construction of the proposed Project has been optimised to minimise the duration of the Construction Phase, where possible, in order to lessen the duration of potential environmental impacts, while ensuring that the areas surrounding the works sites remain operational and functional. Traffic management plans for the construction of the MetroLink have been developed to minimise the impact of the scheme on road users, and to maintain access to businesses and other premises. As such, whilst potential severance and disruption in the area surrounding the shopping centre may occur, mitigation measures such as diversions, alternative routes, and advance notice will reduce the severity of the predicted impact on Swords Pavilions. Land take and traffic impacts on Swords Pavilion have been covered in the EIAR as outlined below.</p> |

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |  |
| Re: Railway (Metrolink - Estuary to Charlemont via Dublin Airport) Order [2022]; Metrolink. Estuary through Swords, Dublin Airport, Ballymun, Glasnevin and City Centre to Charlemont, Co. Dublin |                                                   |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |  |
| 5                                                                                                                                                                                                 | Section 2.2 Operational Pavilions Shopping Centre | 3        | <p>It is submitted that Metrolink should continue to support the role and function of the Swords Pavilions, and its future development ambitions, as part of the Major Town Centre of Swords, in its recognition that:</p> <ul style="list-style-type: none"><li>• Of critical importance to Swords Pavilions continued significant contribution to the growth of the local economy, employment and retail services provision, and its significant contribution to local rates at circa €2.2M, that Swords Pavilions must remain fully accessible by car, with uninterrupted access to its car parks, and no disruption or inconvenience to its customers, tenants and service vehicles. Otherwise this will critically damage a very successful business and major employer in Fingal.</li><li>• Access to Swords Pavilions is primarily via the R132 Swords Bypass and R106 Malahide Road, on which the main vehicular and pedestrian access points to the Centre are currently located, both of which are critical to the 11m customers and 2.85M vehicles that currently enjoy visits to the centre.</li><li>• Swords Pavilions is ideally located for further compact consolidation of town centre development, being well served along the R132 and Malahide Road, by car, existing bus services and pedestrian facilities.</li><li>• The long term sterilisation of its land, pending the commencement or completion of the construction of Metrolink, or due to poor road design, is not acceptable to Swords Pavilions.</li></ul> | <p>Please refer to response item (4) in relation to TII's support for the continued operation of Swords Pavilions during the construction works. As detailed, traffic management plans for the construction of the MetroLink have been developed to minimise the impact of the scheme on road users, and to maintain access to businesses and other premises.</p> <p>As noted in Appendix A9.5 Scheme Traffic Management Plan, alternative HGV routes within the Swords area have been identified to reduce the volume of traffic that is moving through the works. The promotion of these alternative routes for traffic will form part of the construction traffic management for the scheme and has the potential to decrease congestion by 30%. These movements are designed to improve movements within local areas. These routes will primarily be promoted through a combination of signage including static signage, variable signage and community publicity. While these routes will be encouraged throughout the duration of the construction of the MetroLink project, the analysis presented in Appendix A9.5 Scheme Traffic Management Plan does not utilise these alternative routes, and therefore the impacts presented could be reduced (hence further reducing congestion in the area and therefore improving car access to the shopping centre).</p> <p>During enabling works, construction and operation of MetroLink, Swords Pavilions will remain fully accessible by car. Traffic impacts from construction works will be inevitable, however measures will be implemented to reduce negative effects on customers, staff and residents surrounding Swords Pavilions. The Main Works associated with Swords Central Station and the Pavilions Compound did not progress to the stage 2 assessment, as minimal impacts on the road network are expected. At Malahide Junction, there will be reduced capacity on the eastern arm on approach and exit of the junction, resulting in increases in traffic flow on the other junction arms. Redistributed traffic is primarily visible on local roads to the west of the R132 around Swords Town Centre, resulting in slight delays. Construction works will be developed and phased with the aim of avoiding simultaneous road diversions and / or closures at the four major junctions along the R132 Swords Bypass. As the proposed project alignment travels south and under the Malahide Roundabout, it will be necessary to implement temporary diversions via local alternative routes and closure of the R106 Swords Road and Drynam road during cut and cover works (Section 5.7.10.3, EIAR Chapter 5).</p> <p>Bus services will continue to operate along the R132 during construction. To maintain pedestrian access, the footbridge will be replaced by alternative access across the R132 Swords Bypass by the R132 Connectivity Project. Signalised crossings for pedestrians will also be maintained during construction.</p> <p>Further information on traffic management during construction can be found in EIAR Chapter 5 (MetroLink Construction Phase) and EIAR Appendix A9.5 (Scheme Traffic Management Plan).</p> <p>As noted in response item (4) above, lands at this location will not be sterilised, as MetroLink require the lands for 18-24 months only before returning to Hammerson's ICAV.</p> |  |
| 6                                                                                                                                                                                                 | Section 2.3 Compulsory Purchase Order             | 4        | <p>It is clear that the impact of the proposed CPO on Swords Pavilions and the Pavilions Development Lands, in terms of both the location of the proposed Metrolink construction compounds and their intended use (construction compounds accommodating substantial volumes of heavy construction and goods vehicles), has not been properly assessed or thought through.</p> <p>The proposed CPO for both temporary and permanent land acquisition will most certainly severely, adversely impact the existing vehicular operations of Swords Pavilions Shopping Centre, which is estimated to accommodate c. 2.85M customer vehicles per annum (c. 15,600 per day entering and exiting the car park areas via the R132 and Malahide Road).</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | <p>Please refer to response item (4) above in relation to land take at this location. TII confirm that the Permanent CPO landtake is the minimum landtake required to build and operate the scheme and that the Temporary CPO lands are only required for the duration of removing the existing pedestrian bridge across the R132, approximately 18-24 months and will not be utilised for managing construction vehicles.</p> <p>Please refer to response item (5) in relation to the impacts on traffic and vehicular movements at this location during the construction works. The proposed mitigation measures are also detailed. Further information on traffic management during construction can be found in EIAR Chapter 5 (MetroLink Construction Phase) and EIAR Appendix A9.5 (Scheme Traffic Management Plan).</p> <p>Impacts of these works were assessed as part of Chapter 11, proposed mitigation measures such as diversions, alternative routes and advance notice will be in place to reduce these impacts identified, and will result in residual impacts that can be classified as negative, slight and short term (Table 11.54 Chapter 11 Population and Land Use).</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |  |

| Re: Railway (Metrolink - Estuary to Charlemont via Dublin Airport) Order [2022]; Metrolink. Estuary through Swords, Dublin Airport, Ballymun, Glasnevin and City Centre to Charlemont, Co. Dublin |                                       |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 7                                                                                                                                                                                                 | Section 2.3 Compulsory Purchase Order | 4        | Swords Pavilions attracts c. 12M customers per annum. The proposed use of the Pavilions lands for the purpose of a construction compound and construction traffic management will inevitably have an adverse impact on customers, footflow and trade, impacting the overall viability of the Shopping Centre which is a significant employment hub. It is likely to raise construction nuisance effects, including noise, dust and health and safety concerns for customers, who may be put off visiting Swords Pavilions and with a consequent adverse impact on trade and viability over the estimated 5 year construction period for Metrolink Swords Central Station.                                                                                                                                                                                                                                                                                      | <p>Please refer to response items (3) to (6), inclusive, in relation to the land take at this location and the associated impacts. As noted in Chapter 11 (Population and Land Use), the potential severance and disruption during the construction works may result in reduced footfall and//or spending. However, mitigation measures such as diversions, alternative routes and advance notice will be in place to reduce these impacts.</p> <p>TII can confirm that their highest priority at all times is to the Health and Safety of all persons directly or indirectly affected by the MetroLink scheme including construction workers, operational staff, business staff and customers, the general public and anyone else that may interact with the scheme.</p> <p>Chapter 13 (Airborne Noise and Vibration) and Chapter 14 (Groundborne Noise and Vibration) detail that noise levels at Swords Pavilions will be 'not significant'.</p> <p>The potential risk from dust emissions has been reviewed for the most important activities and each of the construction areas. Further details on construction methods can be found in Chapter 5 of the EIAR (MetroLink Construction Phase) which contains an overview of the typical activities and methods that are anticipated to be used during construction and commissioning of the proposed Project. In addition, the mitigation measures document in this section should be considered in parallel with the Outline Construction Environmental Management Plan (Appendix A5.1). Before commencing relevant works, an Air Quality Management Plan shall be prepared and submitted for approval to the relevant planning authority. The plan must include all appropriate dust and emissions mitigation measures including for asbestos and aspergillus, applicable to the circumstances of the relevant site, based on the local authority requirements and industry best practices. The plan will be developed by the contractor and for each worksite shall include:</p> <ul style="list-style-type: none"><li>* An inventory and timetable of activities which may give rise to emissions or dust;</li><li>* Alert levels;</li><li>* Alert system to be used (including notification process);</li><li>* Details of control measures;</li><li>* Details of dust monitoring arrangements, including the location of sensitive receptors, monitoring locations, and monitoring equipment to be used; and</li><li>* Details of the air quality reporting requirements.</li></ul> <p>In order to ensure that no dust nuisance occurs, a series of measures will be implemented, these have been detailed in Appendix A16.4. In summary, the measures which will be implemented will include:</p> <ul style="list-style-type: none"><li>* Material handling systems and site stockpiling of materials will be designed and laid out to minimise exposure to wind. Water misting or sprays will be used as required if particularly dusty activities are necessary during dry or windy periods;</li><li>* Any blasting will be completed by specialised contractors with a specific blasting dust management plan;</li><li>* Liaison with local authorities and community groups;</li><li>* Hoarding will be provided around the construction compounds; and</li><li>* It is anticipated that methods of collecting rainwater and recycling for general site use, will be adopted where practical. Requirements for dewatering installations at deep station and tunnel portals can also provide a valuable source of water for general site use. Strict dust prevention will be in place at all times, to minimise any potential emissions and these procedures will be strictly monitored and assessed. In the event of dust nuisance occurring outside the site boundary, movements of materials likely to raise dust will be curtailed and satisfactory procedures implemented to rectify the problem before the resumption of construction operations.</li></ul> |
| 8                                                                                                                                                                                                 | Section 2.3 Compulsory Purchase Order | 4        | It is expected that the proposed CPO will prevent the delivery of c. 786 new homes (which, assuming an average household size of 2.73 3 could house 2,146 persons) in Swords town centre, during the life of at least the next two County Development Plans. It will sterilize the use of the lands pending the Railway Order and CPO approval, contract and construction stages. It may also result in the permanent acquisition and sterilisation of lands at the north and eastern edges of the Pavilions Development Lands. These are all lands that are essential to properly construct and phase the overall Pavilions masterplan development. The viability of the planned development would be jeopardised by any restriction on the number of residential units planned, or where the 'buildability' of the scheme is hindered by the Metrolink CPO. We therefore ask that the CPO of the Pavilions Development Lands be refused by An Bord Pleanála. | Please refer to response item (3) above in relation to land take at this location.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

| Re: Railway (Metrolink - Estuary to Charlemont via Dublin Airport) Order [2022]; Metrolink. Estuary through Swords, Dublin Airport, Ballymun, Glasnevin and City Centre to Charlemont, Co. Dublin |                                                             |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| 9                                                                                                                                                                                                 | Section 3.3 Pavilions Access                                | 6&7      | <p>The Malahide Road and R132, sharing the access burden for Pavilions, are likely to be significantly impacted by Fingal County Council's R132 Connectivity Project and TII's Metrolink Railway Order. This submission seeks to highlight that the ongoing operational success of Pavilions is and will remain heavily reliant on vehicular access via the R132 left-in left-out access road. It is therefore critical that this access point continue to operate at maximum efficiently for car borne customers and visitors to Pavilions and Swords Town Centre, as well as by Metrolink and associated pedestrian and cycle links.</p> <p>Having regard to all of the above, and noting again that Swords Pavilions attracts 12M footfall and 2.85M vehicles per annum, it is of great concern to our Client that the significant daily footfall and traffic movements through Pavilions, which support its viability and success as a dynamic component of Swords Town Centre, should be duly recognised and protected in any assessment and determination of the Metrolink Railway Order and CPO.</p> | <p>Please refer to response item (5) in relation to the anticipated impacts on traffic during the construction works. The proposed MetroLink works will maintain the left-in-left-out vehicular access to Pavilions from the R132 Swords Bypass. A pedestrian crossing will be provided on this link to maintain pedestrian safety and desire lines.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 10                                                                                                                                                                                                | Section 3.4 Future Development Potential at Pavilions Lands | 8        | <p>(1)As discussed further in Section 7 of this submission, none of this existing or planned development has been taken into account in the impact of land take (Metrolink EIAR Chapter 21), which assumes the lands are brownfield, vegetated open land with no significant development potential. Furthermore, the significance of permanent loss or long term sterilisation of potential 'residential development land' is not assessed.</p> <p>(2 ) It is not either considered in Ch30 Cumulative Development, where the extant permission for the R132 access road, the existing permitted outdoor event space, and the</p> <p>(3) significant planning precedent for the redevelopment of the Pavilions expansion lands are not mentioned.</p>                                                                                                                                                                                                                                                                                                                                                       | <p>(1) Chapter 21 Land-Take assesses the impact of the temporary and permanent acquisition of lands at this location. Baseline Ratings &amp; Impact Magnitude was applied to these areas based on the criteria outlined in Section 21.3.5.1 of the Chapter. For the lands in question, a baseline rating of very low and an impact magnitude of medium was applied to the temporary land take areas. The baseline rating was assigned due to its current status as a brownfield site which as per the Chapter has a "significantly greater capacity to accommodate change". The impact magnitude of medium was assigned as it was assessed that the "current use of the property can continue during and after permanent acquisition or temporary acquisition". In relation to the land designated as permanent land-take, this is required to facilitate the demolition of the footbridge across the R132 (noting that any permanent works such as this require TII to specify permanent landtake in order to have the powers to carry out the works). A baseline rating of medium and an impact magnitude of medium was applied. The lands at this location will not be sterilised and as such development potential is considered.</p> <p>(2) For Cumulative Impacts, in relation to extant permissions, F22A/0053 (Permitted outdoor space) was not assessed as it was minor in nature (erection of temporary structures). F08A/1057/E1 (Pavilions Phase 3) - This was not assessed as the granted planning had expired in August 2021. F20A/0180 - This was not assessed cumulatively as it was permission for continuation of use of the access road which is considered in the baseline assessments.</p> <p>(3) The Planning Report that forms part of the Railway Order documentation has taken all of the planning permissions within the MetroLink development area into account.</p> |

| Re: Railway (Metrolink - Estuary to Charlemont via Dublin Airport) Order [2022]; Metrolink. Estuary through Swords, Dublin Airport, Ballymun, Glasnevin and City Centre to Charlemont, Co. Dublin |                                                                    |          |                                                                                                                                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| 11                                                                                                                                                                                                | Section 4 Fingal County Council R132 Connectivity Project          | 10       | While there is now more shared spaces for multi-modal use, it is expected that the loss of priority for car use will lead to an increase in traffic. This in combination with 60 months of construction works for the Swords Central Metro Station has potential to increase traffic volumes in the area, which will have a negative impact on customer experience. | <p>Please refer to response item (5) in relation to the anticipated impacts on traffic and transport during the construction phase.</p> <p>To clarify, the R132 Connectivity Project already has approval from the Board (Ref JP06F.310145) and is expected to be in place prior to the works associated with MetroLink, and therefore cumulative construction stage impacts will not arise. The traffic management has been designed adopting a hierarchical approach in line with the road user hierarchy identified in the Transport Strategy for the Greater Dublin Area. This prioritises pedestrian, cyclist, public transport and commercial needs provision over private vehicles.</p> <p>Appendix A9.5 provides the Scheme Traffic Management Plan, for which section 5.4 refers to sections along the R132, Malahide Junction to Pinnockhill Junction. While the works through this area will attract additional traffic, the assessments of vehicle movement during the peak construction phase will add a range of between 50 and 125 additional daily movements each way to the existing local traffic flows. The proposed access route to Swords Station to and from the M1 is provided on Figure 5-32.</p> <p>While moderate traffic impacts are anticipated to be managed for the construction of the Swords Station and alignment (Table 5-69), no impact is anticipated when accessing the Pavilions Compound to remove the pedestrian bridge.</p> <p>Prior to implementation, all traffic management measures will be agreed with FCC and where relevant, consultation with An Garda Síochána and other statutory stakeholders will be undertaken. The design of traffic management measures and highways works is based on achieving the key objective of maintaining continual access to all properties during the works. Where necessary, a safe alternative route will be provided for pedestrians and vulnerable road users, such as children, and persons with restricted mobility, to maintain pedestrian access to premises. Where detour routes are required, these will be kept as short as possible and detour signage will be clear and easy to understand. All construction sites will be designed to be as unobtrusive as possible.</p> |
| 12                                                                                                                                                                                                | Section 5.2 Retail Strategy for the Greater Dublin Area, 2008-2016 | 11       | Metrolink now replaces the previous Metro North project. It should recognised the role of Pavilions in delivering retail use, as part of Swords town centre, in line with the strategic retail policy position outlined above.                                                                                                                                      | <p>As noted in response item (4), TII fully recognise the importance of the Swords Pavilions Shopping Centre to the local economy and community of Swords, and fully support its operations and future growth ambitions. Please refer to response items (3) to (6) above in relation to the anticipated impacts at this location and the proposed mitigation measures.</p> <p>As noted in Chapter 7 (Consideration of Alternatives), the proposed Project presents an 'Optimised Metro North'. It follows the same alignment as Metro North but includes a number of significant variations such as shorter platforms, smaller stations, reduced rolling stock, fewer stations and vertical alignment changes.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| 13                                                                                                                                                                                                | Section 5.3.2 Landuse Zoning                                       | 12       | There is an objective to prepare a masterplan for the this high density mixed use development at the 'ME' lands, integrated with Swords Metro Stop and multi-modal connectivity with Swords Town Centre (see Barrysparks and Crowcastle Masterplan 2019).                                                                                                           | <p>As noted in the Planning Report, the Masterplan for the Barrysparks and Crowcastle Masterplan was adopted in 2019. The MetroLink project has been designed having regard to the Masterplan and facilitates its objectives.</p> <p>TII have undertaken a full assessment of the planning policy and planning guidelines in the Planning Report that was submitted as part of the Railway Order Application. As planning and policy and strategy are being updated constantly, TII will undertake a further review of planning policy in advance of any oral hearing to allow for an updated presentation on the projects consistency with active policy requirements to be presented to An Bord Pleanála.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |

| Re: Railway (Metrolink - Estuary to Charlemont via Dublin Airport) Order [2022]; Metrolink. Estuary through Swords, Dublin Airport, Ballymun, Glasnevin and City Centre to Charlemont, Co. Dublin |                                                      |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| 14                                                                                                                                                                                                | Section 7.1 Overarching Submission                   | 17       | The continued patronage, enjoyment and safety of its customers is of paramount importance to Swords Pavilions. Our Client has significant concerns regarding the proposal to use its lands for a Metrolink construction compound. The likely impact of construction activities within the temporary satellite construction compound on the Swords Pavilions access and car parking facilities is not clearly addressed.                                                                                                                                                                                                                                                                                                                                                                                          | <p>As detailed in response item (5), it is TII's intention for Swords Pavilions will remain accessible and that existing car parks will remain in use during the construction phase of MetroLink.</p> <p>As detailed in response item (11), prior to implementation, all traffic management measures will be agreed with FCC and where relevant, consultation with An Garda Síochána and other statutory stakeholders will be undertaken.</p> <p>Other construction stage impacts are addressed in response item (7).</p>                                                                                                                                                                      |
| 15                                                                                                                                                                                                | Section 7.1 Overarching Submission                   | 17       | The continued successful operations at Swords Pavilions, as a significant convenience and comparison retail and employment provider, is also heavily dependent on vehicular access via its left-in, left-out junction with the R132. It is critical that the Metrolink project, at construction or operational stage, does not adversely affect the capacity of the R132 or R106 Malahide Road to reasonably accommodate car borne movement into and out of Swords Pavilions, to the significant inconvenience of Swords Pavilions' existing customers and to the detriment of its future expansion and diversification potential as part of Swords major town centre. The R132 and R106 handle 80% of Swords Pavilions customer travel movements.                                                               | Please refer to response item (5) above in relation to vehicular access to Swords Pavilions.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| 16                                                                                                                                                                                                | Section 7.1 Overarching Submission                   | 17       | This submission also questions the adequacy of the Metrolink assessment of the seventy of impact of the project on land use and land take on Swords Pavilions operating centre and on Pavilions Development Land. This relates to the quantum of Pavilions land to be permanently and temporarily sterilised to facilitate the Metrolink project, particularly where there is any significant delay in commencing and completing the 5 year construction phase for Metrolink Swords Central Station.                                                                                                                                                                                                                                                                                                             | Please refer to response items (3) and (10) in relation to land take at this location. TII as the Government Agency responsible for delivering MetroLink, are committed to expediting the delivery of this transformative project on receipt of an Enforceable Railway Order.                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 17                                                                                                                                                                                                | Section 7.1 Overarching Submission                   | 17       | It would be totally unacceptable to our Client that Metrolink would negatively impact in any way the operational success of Swords Pavilions and undermine the significant investment expended to date to achieve this.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | Please refer to response items (3) to (6), inclusive, in relation to the land take at this location and the associated impacts.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| 18                                                                                                                                                                                                | Section 7.2 Temporary and Permanent Land Acquisition | 18       | It should be acknowledged that the lands subject of the temporary construction compound area lie within the Swords Pavilions operational area and the Pavilions Development Lands. As previously mentioned, they are subject of an extant permission for a seasonal event space, which provides active use and a revenue stream from the site at key holiday periods not currently. Furthermore, their use for Metrolink construction activities during Swords Pavilions trading hours, will conflict with and negatively impact customer (pedestrian, cycle and vehicular) and deliveries access to Swords Pavilions shopping centre via the R132 and R106 for at least the 5 year Metrolink construction period for Swords Central. This is critical to the continued successful operation of Swords pavilions | <p>Please refer to response items (3) and (10) above in relation to the planning context at this location, and the associated land take.</p> <p>Extant permissions for the event spaces are outside of the temporary land take for the proposed Project and therefore it is not impacted at this location. The impact of the construction phase on the Pavilions Shopping Centre has been assessed in Chapter 11. With mitigation measures proposed such as diversions, alternative routes and advance notice with impacts are reduced to negative, slight, short-term.</p> <p>Please refer to response item (5) and (11) in relation to the anticipated impacts on traffic and transport.</p> |
| 19                                                                                                                                                                                                | Section 7.2 Temporary and Permanent Land Acquisition | 18       | It further ignores the significant and immediate development potential of these lands. Planning precedent for significant mixed use development, including residential use, was established under F08A/1057 (ABP-PL06F. 232710) and has only relatively recently withered. The land remains appropriately zoned for Major Town Centre uses and its redevelopment is anticipated in Fingal County Council's Draft Sustainable Swords Strategy.                                                                                                                                                                                                                                                                                                                                                                    | Please refer to response items (3) and (10) above in relation to the planning context at this location.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

| Submission No.                                                                                                                                                                                    |                                                                                                           |          | 110                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

| Re: Railway (Metrolink - Estuary to Charlemont via Dublin Airport) Order [2022]; Metrolink. Estuary through Swords, Dublin Airport, Ballymun, Glasnevin and City Centre to Charlemont, Co. Dublin |                                                                                                           |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| 20                                                                                                                                                                                                | Section 7.2 Temporary and Permanent Land Acquisition                                                      | 19       | <p>The lands subject of proposed permanent acquisition accommodate existing footpaths, the pedestrian footbridge over the R132 and the Pavilions lands. The loss of these facilities at an early stage of the Metrolink Construction Programme conflicts with and negatively impacts customer access to Swords Pavilions via the R132 and R106, for at least the 5 year Metrolink construction period for Swords Central Station. The impact is reasonably identified as "very significant", but this must also identify the impact on Swords Pavilions.</p> <p>While Condition 5 of the recently withered Pavilions Phase 3 permission required a 10m setback from the western edge of the R132, the Metro North proposal is now replaced with Metrolink Swords Central Station and track alignment located to the east of the R132. On this basis it is not clear why the land aligned along the western edge of the R132 is proposed to be permanently acquired and sterised for use by the Pavilions land owners.</p> | <p>Please refer to response items (5) and (11) in relation to the anticipated impacts on traffic and transport, including impacts on access to Swords Pavilions.</p> <p>In relation to required permanent landtake, as noted in Chapter 5 (MetroLink Construction Phase) &amp; Chapter 21 (Land Take), land will be required permanently to demolish and remove the pedestrian footbridge and connected footways. Lands will not be sterilised as a result of these works and the lands will be reinstated post-construction without the footbridge as existing landscape. TII are happy to continue ongoing discussions in relation to the landtake at this location.</p> |
| 21                                                                                                                                                                                                | Section 7.2 Temporary and Permanent Land Acquisition                                                      | 19       | <p>The permanent acquisition of the lands then similarly takes no account of the aforementioned development potential of the Pavilions Development Lands. It is submitted that the sensitivity rating of the lands is misrepresented, in terms of its failure to address the Pavilions Development Lands mixed use retail, commercial and residential development potential, which exists under the life of the current and next Fingal County Development. The rating and impact assessment should be 'very sensitive' in recognition of their residential development potential and the long term sterilisation of the lands. The permanent acquisition and sterilisation of the Pavilions lands is unacceptable to our Client.</p>                                                                                                                                                                                                                                                                                     | <p>Please refer to response items (3) and (10) in relation to the planning context at this location.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| 22                                                                                                                                                                                                | Section 7.2 Temporary and Permanent Land Acquisition                                                      | 19       | <p>In summary, the lands identified for temporary and permanent acquisition by TII to facilitate Metrolink conflict with the existing operations and emerging masterplan design for Pavilions future expansion and development at this location. It is submitted that the sensitivity of the lands to be acquired is misrepresented in the Metrolink EIAR. The removal or severe disruption of an existing active commercial use and the sterilisation of the lands for future redevelopment, pending the commencement and completion of the construction of Metrolink Swords Central station and associated R132 works, is unacceptable to our clients who would seek to have the 'temporary*' construction compound and permanent acquisition of its lands removed from the Metrolink CPO.</p>                                                                                                                                                                                                                          | <p>Please refer to response item (10) in relation to the assessment of landtake in the EIAR. Please refer to response item (3) and (10) in relation to the planning context at this location.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| 23                                                                                                                                                                                                | Section 7.3 Commencement and Construction Duration of Swords Central Station and Metrolink R132 Alignment | 24       | <p>While it is stated that the FCC's R132 Connectivity Project and TII's MetroLink project can proceed independently of each other, the assumption of TII is that MetroLink will progress after the R132 Connectivity Project works promoted by Fingal County Council. As the R132 works shown on the Metrolink plans broadly reflect those permitted under the R132 Connectivity Project (with the exception of the omission of the dedicated northbound left turn lane to access Pavilions and the inclusion of a pedestrian and cycle toucan crossing immediate south of the Pavilions access), it is assumed that these works will be undertaken by whichever authority commences its project first.</p> <p>The construction works for Swords Central Station area (from Malahide Road junction to Pinnock Hill junction) are projected to take up to 5 years to complete. However, the commencement and completion dates are not clarified for this section of Metrolink.</p>                                        | <p>The commencement and completion dates of the construction works are not confirmed at this stage of design (preliminary design) and are subject to the granting of the Railway Order. TII as the Government Agency responsible for delivering MetroLink, are committed to expediting the delivery of this transformative project on receipt of an Enforceable Railway Order.</p> <p>TII are committed to working with FCC around the timing and coordination of the relevant works proposed by both organisations.</p>                                                                                                                                                   |
| 24                                                                                                                                                                                                | Section 7.3 Commencement and Construction Duration of Swords Central Station and Metrolink R132 Alignment | 24       | <p>The standard construction of Swords Central Metrolink station will be 7am to 7pm (Mon-Fri) and 7am to 1pm Saturday. Activities at the temporary construction compound, such as at Pavilions, are identified as being restricted to these standard hours. It is noted that these hours are broadly commensurate with the peak operational hours of Swords Pavilions. It is not clear how construction access and activities within the compound will impact the operation of Pavilions R132 access road, car parking and service areas, or the R106 Malahide Road, so as not to inconvenience customer access and egress from the R132 and/or the R106 Malahide Road. Hindrance to either of the existing Swords Pavilions entrances is unacceptable to our Client, as it would have a significant adverse impact on the success and viability of Swords Pavilions as a going concern and area of future development potential.</p>                                                                                     | <p>During enabling works, construction and operation of MetroLink, Swords Pavilions will remain fully accessible by car. With regards to traffic impacts, please refer to response items (4), (5), (6), (11), and (38).</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                |

| Re: Railway (Metrolink - Estuary to Charlemont via Dublin Airport) Order [2022]; Metrolink. Estuary through Swords, Dublin Airport, Ballymun, Glasnevin and City Centre to Charlemont, Co. Dublin |                                                                                                              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |  |
| 25                                                                                                                                                                                                | Section 7.3<br>Commencement and Construction Duration of Swords Central Station and Metrolink R132 Alignment | 24&25    | Furthermore, exceptional construction works outside these hours may include tunnel boring, rock excavation for tunnelling, large concrete pours, dewatering, track laying, M&E fit out, special (abnormal) deliveries, some utilities and roadworks, subject to agreement. It is likely that these construction activities will rely on construction access, to the Swords Central Station main compound, via the R132 and R106. It is not clear how this will impact traffic movement on the R132 and R106 in the evenings and weekends, when Pavilions retail and leisure facilities (e.g. cinema and food offerings) are also in operation.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | Appendix A9.5 Scheme Traffic Management Plan details the two-stage assessment undertaken on the impacts of the temporary traffic management measures during the construction phase. This assessment takes into consideration the duration of the works to determine the potential magnitude of the impact. For works occurring on evenings and weekends, the impact was considered to be slight due to the off-peak timings, and therefore the works were removed from any further assessment and were not deemed to require a Stage 2 Assessment or any further mitigation measures. As the impact of works during peak hours has been assessed, it is considered that off-peak works will have reduced impacts.                                                                                                                                                                                                                                                             |  |
| 26                                                                                                                                                                                                | Section 7.4<br>Development Potential at Pavilions Development Lands                                          | 26       | <p>It is paramount that no part of the submission lands should be sterilized, in order to ensure that these much needed homes could be delivered in the short to medium term (estimated delivery within 3 to 7 years, for potential occupancy by 2026). However, given the time it will take to approve the Metrolink Railway Order and CPO, contract, commence and complete the works, the development potential of the Pavilions Development Lands will likely be sterilised for at least the life of the next Fingal County Development Plan.</p> <p>The entirety of our Client's lands proposed to be acquisitioned by Metrolink are required by Hammerson to make its planned development scheme viable. It would not be plausible to relocate, reduce or limit the number of residential units planned as part of this scheme, as this would jeopardise the viability of the entire mixed use town centre masterplan. The lands to be acquisitioned must be the first phase of any residential development component for a number of legal and operational reasons.</p> <p>We would query why the Pavilions lands are subject of CPO for Metrolink construction, rather than the undeveloped greenfield lands at Barrysparks to the east of the R132, or to the north at Lissenhall. We request that the CPO is removed from the Pavilions Development Lands.</p>                                                                                                                                                                                                                                                                                                                                                               | Please refer to response items (3) and (10) in relation to the planning context at this location.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |  |
| 27                                                                                                                                                                                                | Section 7.5 Access, Permeability and Connectivity, 7.5.1 Construction Stage                                  | 26&27    | <p>The residual impact is then identified as "negative, slight, short term". There is however little to no discussion of how Pavilions Operational Centre specifically, particularly access to same, will be impacted for the significant duration of the construction period of Metrolink Swords Central Station and R132 route alignment.</p> <p>It is noted that the R132 footbridge is proposed to be demolished and it is assumed this will be included with the early stage Site Enabling Works demolition noted in Figure 10 above. At present, a 120m footbridge over the R132 ensures that pedestrians travelling from east of the R132 can cross the road safely, while also avoiding an impact on R132 / Malahide Road Roundabout vehicular traffic flow.</p> <p>Under the R132 Connectivity Project, Fingal County Council is to replace this footbridge with controlled crossing points at the Malahide Road junction. However, if the R132 Connectivity Project is not complete before the commencement of the Metrolink Swords Central station works, the demolition of the footbridge at early construction stage is likely to give rise to severance for pedestrians and cyclists and adversely affect trading at the Pavilions Shopping Centre during at least the 5 year construction period.</p> <p>We would highlight our Client's concern regarding the likely adverse impact of a significant quantum of heavy construction vehicles entering the R132/R106 junction, on major east-west pedestrian route along the R106, in addition to impacting significantly on Swords Pavilions vehicular traffic and giving rise to potential environmental nuisance factors (noise, dust, health and safety, etc.).</p> | <p>Appendix A9.5 Scheme Traffic Management Plan indicates that the R132 Connectivity Project will be in place prior to the commencement of MetroLink construction works, and as such is considered to make up the baseline receiving environment. A hierarchical approach has been adopted when designing the temporary traffic management measures, with priority given to pedestrian/cyclist, public transport and commercial needs provision over private car usage. This approach would be maintained in the event that the traffic management measures need to be revised if the R132 Connectivity Study was not in place prior to the commencement of MetroLink construction works.</p> <p>Please refer to response items (5) and (11) in relation to the anticipated impacts on traffic and transport, including pedestrians.</p> <p>Please refer to response item (7) in relation to impacts of noise and dust at Swords Pavillion during the construction phase.</p> |  |

| Submission No.                                                                                                                                                                                    |                                                                             |          | 110                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |  |

| Re: Railway (Metrolink - Estuary to Charlemont via Dublin Airport) Order [2022]; Metrolink. Estuary through Swords, Dublin Airport, Ballymun, Glasnevin and City Centre to Charlemont, Co. Dublin |                                                                             |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |  |
| 28                                                                                                                                                                                                | Section 7.5 Access, Permeability and Connectivity, 7.5.1 Construction Stage | 27       | For Swords Pavilions Shopping Centre, a key metric will also be to ensure the total number of vehicle kilometres travelled on the local road network do not unreasonably increase, arising from road closures and diversions during construction stage. It seems clear that there will need to be road or lane closures along the R132 and at Malahide Roundabout to facilitate construction, and it is of significant concern to our Client that the impact of this on Pavilions operating centre is made fully transparent. Ongoing and detailed consultation on traffic management will be critical for Pavilions operations during the construction phase.                                                                                                                                                                                                                                                                                                                                                                                                            | Please refer to response items (5) and (11) in relation to the anticipated impacts on traffic and transport.<br><br>TII confirm that the assessment undertaken indicated that a minimal impact is expected in the direct vicinity of the Pavilions Shopping Centre during the course of the main works (See Section 5.4.6.3.2 of Appendix A9.5). Works relating to Malahide Junction will impact on the location with the largest predicted delay being 55 seconds on the R132 Northbound approach (Section 5.4.5.3.1 Appendix A9.5).                                                                                                                                                                                                                                                                                                                                                                                                                                  |  |
| 29                                                                                                                                                                                                | Section 7.5.2 Operational Stage                                             | 27       | <p>The successful operation of Swords Pavilions relies fundamentally upon the ease of access to and availability of car parking to support increased customer 'dwell time' (i.e. period of time to browse and shop) and an easy way to transport multiple or heavy goods home (particularly food shopping). A decrease in dwell time due to inconvenient or convoluted access to customer car parking would significantly adversely impact the operation of Swords Pavilions, as customers will seek a more favourable alternative shopping destination.</p> <p>It is essential that this total quantum of 2,000 spaces is maintained, in order to protect the operational requirements of Swords Pavilions and its current customer shopping experience.</p>                                                                                                                                                                                                                                                                                                             | As presented in Section 5.4 of Appendix A9.5 Scheme Traffic Management Plan, there will be no impact on commercial parking and loading during the construction works.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |  |
| 30                                                                                                                                                                                                | Section 7.5.2 Operational Stage                                             | 27       | It is imperative to the ongoing success of Pavilions, as a recognisable and accessible destination within Swords town centre and the wider catchment area, that its existing physical access by customer and service vehicles, as well as by pedestrians, bicycles and public transport, be maintained and protected.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | Please refer to response items (5) and (11) in relation to the anticipated impacts on traffic and transport.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |  |
| 31                                                                                                                                                                                                | Section 7.5.2 Operational Stage                                             | 27&28    | It is noted that the dedicated left turn lane to this junction (provided in the R132 Connectivity Project) has been removed, necessitating difficult vehicular movement across a bus lane, cycle lane and the toucan pedestrian crossing to access the junction. The reduced vehicular lanes and potential for conflicting movement across the carriageway to access the R132 junction is likely to result in traffic safety and congestion issues arising at Metrolink operational stage. We would submit that the dedicated left turn lane into Pavilions should be reinstated, to reduce potential for traffic conflict.                                                                                                                                                                                                                                                                                                                                                                                                                                               | Please refer to response item (9) in relation to the left-in-left-out access road. The prioritisation of pedestrian and cyclist movements, and public transport needs above private cars is in line with the Road User Hierarchy defined in the Transport Strategy for the Greater Dublin Area. As outlined in Appendix A9.2-N Traffic and Transportation Assessment-Swords Central Station, in the operational phase Swords Central Station will provide for improvements to the public transport network resulting in decreases in private car usage/trips, increases in public transport usage/trips and will facilitate walking and cycling to the station, without significantly impacting on the operation of the road network in the area.                                                                                                                                                                                                                      |  |
| 32                                                                                                                                                                                                | Section 7.5.2 Operational Stage                                             | 27&28    | <p>It is also critical that the project design ensures the safest passageway for pedestrians and cyclists to cross the R132 to and from Swords Central Station. We note that the proposed toucan crossing is a Metrolink proposal and was not included in the R132 Connectivity Project. Its current position in the Metrolink drawings makes little sense, on the basis that there is currently no direct pedestrian link to the Pavilions shopping centre from the R132 access road. Pedestrians and cyclists would therefore be better directed towards the approved new pedestrian and cycle crossing facilities at the Malahide Road junction (see R132 Connectivity Project), approximately 170m to the north.</p> <p>Failing that, and in the interests of greater pedestrian and cyclist safety, future connectivity and improved free flow of left turning vehicles into Pavilions, we would submit that an alternative preferred solution would be to reintroduce a pedestrian / cycle bridge over the R132 connecting the Barrysparks and Pavilions lands.</p> | <p>Fingal County Council proposals at modernising the Malahide Junction under the R132 Connectivity Project recently consented is to urbanise the R132 under the Fingal Development Plan 2017-2023 (Draft Development Plan 2023-2029). The proposed Malahide junction modifications when completed will make the existing pedestrian bridge spanning the R132 redundant.</p> <p>MetroLink will remove this bridge to create access for the Works, but as a consequence of the R132 Connectivity upgrade, this bridge will not be required to be reinstated on the completion of MetroLink.</p> <p>In keeping with the Fingal Development Plan and as presented in EIAR Appendix A9.2-N Traffic and Transportation Assessment-Swords Central Station, the proposed pedestrian crossing on the R132 will be located to the north of the station entrance, providing a direct route between the proposed station and the future proposed Pavilions Development Lands.</p> |  |

|                                                                                                                                                                                                   |                                       |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |  |
| 33                                                                                                                                                                                                | Section 7.6 Transportation Assessment | 28&29    | <p>Understandably great focus is directed to prioritising pedestrians and cyclist movement. However, failure to address Pavilions reliance and need to accommodate into the future its car borne customers is a significant omission from the assessment In this respect we would highlight the following:</p> <ul style="list-style-type: none"><li>• Page 81: Malahide roundabout junction - Swords Pavilions not identified as a key design consideration for traffic generation.</li><li>• Page 86: R132 Corridor interventions - Existing R132 slip road not identified, notwithstanding this is a key access point for Pavilions. This demonstrates a lack of understanding that 80% of Pavilions customer arrive by car and are key to sustaining successful business operations, which in turn is significant to the success of Swords town centre.</li><li>• Page 114: It is stated that by 2030 Metrolink will reduce traffic by 4 to 5% (2,750 cars) and by 2045 between 1 and 3%. However, Pavilions currently handles approx. 53,000 cars per week. Even assuming a 60:40 ratio split between Malahide Road and the R132 slip road, this appears to totally disregard Pavilions operational car levels and how the customers access the site. On this basis, the Metrolink reference to annual average daily traffic is questionable, including only 13,212 cars using the Malahide Road to access Pavilions. Rather, as previously noted in this submission, average daily traffic into the centre in 2019 was 7,842 vehicles, who would then also exit the centre (representing 1% increase on 2018 average day).</li><li>• Page 117; Charts are wrongly labelled and therefore misleading. When labelled correctly the charts would identify that traffic will be up by 13% in 2030 DS+M and up 13% in 2045 on 2018 levels</li><li>• Page 119: Point 5.4.18 states that there will be more pressure on East to West traffic movement on the Malahide Road. This will negatively impact Pavilions operations due to lanes being taken away and the facility to supplement traffic flow via the R132 slip road being eroded due to the designs of R132 and Metro around pedestrian movement and carriageway redesigns.</li><li>• Page 136: Positive gains for pedestrian of 5 mins into the centre walking time identified. However, there is no walking time gains as seen on Page 137 from the Swords Central Metro stop. What is referenced is the walking time gains from the Seatown stop. However, there is very little walking traffic currently from the Seatown area, as its mainly all industrial sites. The reasoning appears flawed.</li><li>• Page 174: It is stated that no cars turn left at Malahide Road Roundabout to head down the Malahide Road to access Pavilions. It should be evident that this is because they have used the R132 slip road to enter the centre. All left turning traffic at the roundabout is then limited to trips to Swords Main Street or Dublin Road. This again highlights the importance of maintaining the performance of the R132 slip road in the smooth running of local transportation links.</li><li>• Page 204: Conclusions: Whereas Sustainable Swords recognises realistically that car trips to Pavilions will remain high notwithstanding the implementation of alternative transport strategy measures, the simplistic, inaccurate and misplaced assumption of the Metrolink transportation assessment is that access to Pavilions will be pedestrian / cyclist driven in the future not cars. Also, while the benefits to the area for both residents and new development is highlighted, there is no mention of the significant current or future Pavilions operations that sustain Swords and its hinterland and which are put at risk by failure to acknowledge the transportation needs of Pavilions.</li></ul> | <p>The page numbers and comments provided do not correlate to those of EIAR Chapter 09 Traffic and Transport, Appendix A9.2 Overall Traffic and Transport Assessment, Appendix A9.2 N Traffic and Transportation Assessment Swords Central Sation or Appendix A9.5 Scheme Traffic Management Plan (which assesses traffic impacts during the construction phase). Additionally, the Opening Year assessed in each of these documents is taken to be 2035, with a Design Year of 2050, and therefore the comments in your submission do not correlate with any of the analysis presented in these documents as part of the EIAR.</p> <p>The page numbers and comments you are referring to have been cross-checked and wholly correlate with the Traffic and Transportation Assessment as part of the R132 Connectivity Project (available at <a href="https://consult.fingal.ie/en/consultation/application-bord-pleanala-fingal-county-council-r132-connectivity-project">https://consult.fingal.ie/en/consultation/application-bord-pleanala-fingal-county-council-r132-connectivity-project</a>). Therefore, these comments are not in relation to the MetroLink transport assessment provided in the Railway Order, and will not be commented on by TII or NTA.</p> <p>In the above-mentioned documents, Swords Pavilions has been recognised as a key trip attractor in the area, and has been used as a key point of origin/destination in much of the analysis, such as demonstrating journey time improvements once the MetroLink is operational. The Project will result in public transport journey time savings of up to 50 minutes from Swords Pavilions to Glasnevin, with up to 30 minute public transport journey time savings between Swords Pavilions and Dublin City Centre locations such as O'Connell Street and St. Stephen's Green. It is predicted that up to 18,500 passengers movements will be facilitated at Swords Central Station over the 12hr period. The origins and destinations of passengers at Swords Central Station is shown in Figure 5.2 and 5.3 of Appendix A9.2N, indicating that a high proportion of passengers will have origins or destinations at Swords Pavilions, and therefore will not be requiring car parking facilities at Swords Pavilions. Car mode share in the zones around Swords Central Station is also anticipated to reduce by 3-4 percentage points, with a corresponding 7 percentage point increase in public transport at this location when MetroLink is operational.</p> <p>As noted in Chapter 06 (MetroLink Operations and Maintenance), the Project has been designed to ensure maximum interchange with other modes of transport, specifically sustainable modes such as public transport, as well as walking and cycling. Therefore, the demand for vehicle trips to and from this area will be reduced by the provision of MetroLink. In overall terms, the Swords Central Station will provide for improvements to the public transport network, resulting in decreases in private car usage/trips, increases in public transport usage/trips and will facilitate walking and cycling to the station without significantly impacting on the operation of the road network in the area.</p> <p>Please refer to response items (5) and (11) in relation to the anticipated impacts on traffic and transport during the construction phase.</p> |  |
| 34                                                                                                                                                                                                | Section 7.7 Cumulative Development    | 29       | <p>None of the Pavilions Shopping Centre operations, R132 access road and event space permissions, or the 'Pavilions Development Lands' development potential is mentioned in the cumulative impacts chapter of the EIAR (Ch. 30). We consider the failure to acknowledge and consider the existing and potential development at Pavilions in EIAR Chapter 30 'Cumulative Development' to be an oversight that should be addressed.</p> | Re: Railway (Metrolink - Estuary to Charlemont via Dublin Airport) Order [2022]; Metrolink. Estuary through Swords, Dublin Airport, Ballymun, Glasnevin and City Centre to Charlemont, Co. Dublin |                      |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                                                                                                                                               |
| 35                                                                                                                                                                                                | Section 8 Conclusion | 29       | For 'major town centre' land, in Swords 'Key Town', that will be immediately adjacent to significant construction and operational works related with MetroLink, and where direct land take and traffic impacts are inevitable, it is very concerning to our Client that Swords Pavilions and Pavilions Development Lands receive no direct consideration in respect of the magnitude and duration of effect of the project on its existing operations and future development potential. The project shows no appreciation of the current and future success of Swords Pavilions within its community, or its strategic role as a driver of Swords town and hinterland economy and employment.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | Please refer to response items (3), (4), (5), (10), and (11) above.                                                                                           |
| 36                                                                                                                                                                                                | Section 8 Conclusion | 29&30    | <p>The principal areas of concern for Pavilions operational centre arising from the proposed Metrolink project primarily include:</p> <ul style="list-style-type: none"><li>• Temporary and Permanent land take.</li><li>• Duration of construction stage and severance to Pavilions Shopping Centre.</li><li>• Traffic Management and Access during construction and operational stages.</li><li>• Impact on future significant development potential, including prevention of delivery of 786 homes (for c.2,146 residents) within the next 3 to 7 years.</li></ul> <p>It is evident from the review of the current planning context that the Swords Pavilions plays a critical role in the realisation of Fingal County Council's aspirations for Swords and its wider catchment aspirations for Swords. These aspirations align with the current stated objectives at the Regional level, where Swords is identified as a Key Town in the Metropolitan Area. This is not reflected in consideration of the significance of the Metrolink project impact on successful operations of Pavilions Shopping Centre, in particular in respect of land take, construction, access, development potential and cumulative development</p> | Thank you for sharing your observations related to the MetroLink project. TII have provided responses to the observations raised in the response items above. |

| Re: Railway (Metrolink - Estuary to Charlemont via Dublin Airport) Order [2022]; Metrolink. Estuary through Swords, Dublin Airport, Ballymun, Glasnevin and City Centre to Charlemont, Co. Dublin |                      |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| 37                                                                                                                                                                                                | Section 8 Conclusion | 30       | <p>It is clear that the impact of the proposed CPO on Swords Pavilions and the Pavilions Development Lands, in terms of both the location of the proposed Metrolink construction compounds and their intended use (construction compounds accommodating substantial volumes of heavy construction and goods vehicles), has not been properly assessed or thought through.</p>                                                                                                                                                                                                                                                                                                                                                                                            | <p>TII do not agree that the potential impacts of the construction works has not be properly assessed or thought through.</p> <p>EIAR Chapter 21 (Land Take) assesses the impact of the temporary and permanent acquisition of lands. The land take impacts at this location are summarised at Item 10 above.</p> <p>EIAR Chapter 7 (Description of the Alternatives) outlines the evolution of the proposed Project and of how alternatives to the alignment, station locations/layout and construction methods have been considered and assessed. This process of assessment and refinement of the route and station layouts has largely determined the proposed requirements for permanent land take. Temporary land take required for construction activities has been minimised wherever possible and boundaries adjusted to avoid and/or minimise impacts as far as possible. The siting of construction compounds is considered in Section 7.8 of EIAR Chapter 7 (Description of the Alternatives).</p> <p>Construction compounds have been located in proximity to the required working areas to ensure the maximum efficiency of the Construction Phase works and to minimise potential environmental effects. In the case of the Pavilions Compound this is required to remove the existing footbridge across the R132, minimising impact to existing landscape and no other alternative is available. The rationale for this compound was an area of open accessible space for construction activities adjacent to the Pedestrian Bridge to be removed.</p> <p>The location of the Swords Central Main Construction Compound was the only feasible option and is located in current undeveloped grassland area. The compound size has been reduced at Landowner request to current minimum size required to manage works in this area. The rationale was that the construction area has to be located immediately by the station, and no other alternative has been considered.</p> <p>Construction impacts (traffic, noise and vibration, air quality and dust, etc.) within the construction compounds will be controlled and managed in accordance with the Construction Environmental Management Plan (CEMP) and will be kept to a minimum. The EIAR (Chapter 9 to Chapter 31) fully details all impacts, mitigation techniques and the types of measures to be employed to minimise the impacts generated by the proposed Project during the Construction Phase (including due to site establishment of construction compounds).</p> |
| 38                                                                                                                                                                                                | Section 8 Conclusion | 30       | <p>The proposed CPO for both temporary and permanent land acquisition will most certainly severely, adversely impact the existing vehicular operations of Swords Pavilions Shopping Centre, which is estimated to accommodate c. 2.85M customer vehicles per annum (c. 7,800 per day entering and exiting the car park areas / 15,600 vehicle journeys via the R132 and Malahide Road). While the future development of Pavilions can also facilitate the enhancement of pedestrian and cycle connectivity, where possible, its existing and future development will continue to rely heavily on vehicular access for car borne customers via the R132 left-in left-out road and the Malahide Road, for its existing and future operational success and development.</p> | <p>Please refer to response items (3), (4), (5), (6), (9), (10) and (32) in relation to the associated landtake at this location and the impacts on all modes of transport.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| 39                                                                                                                                                                                                | Section 8 Conclusion | 30       | <p>The proposed use of the Pavilions lands for the purpose of a construction compound and construction traffic management will inevitably have an adverse impact on customers, footflow and trade, impacting the overall viability of the Shopping Centre which is a significant employment hub. It is likely to raise construction nuisance effects, including noise, dust and health and safety concerns for customers, who may be put off visiting Pavilions and with a consequent adverse impact on trade and viability over the estimated 5 year construction period for Metrolink Swords Central Station.</p>                                                                                                                                                      | <p>Please refer to response items (3) to (6) above in relation to the anticipated impacts of the construction works at this location.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

| Re: Railway (Metrolink - Estuary to Charlemont via Dublin Airport) Order [2022]; Metrolink. Estuary through Swords, Dublin Airport, Ballymun, Glasnevin and City Centre to Charlemont, Co. Dublin |                      |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                                                                                                                                          |
| 40                                                                                                                                                                                                | Section 8 Conclusion | 30       | <p>Part of the attraction of Pavilions is that it is highly accessible locally by car, bus, foot and bicycle, and in the future by BusConnects and Metrolink. Pavilions is therefore ideally located for further compact consolidation of town centre development. Hammerson can confirm that considerable resources and expenditure have been spent to date in preparation for the delivery of a mixed use town masterplan with critical residential component (c.786 new dwellings, which assuming an average household size of 2.737 could house 2,146 persons) on the specific site which is the subject of the Metrolink CPO. The timeline from Pavilions project commencement to delivery of residential accommodation on site is on average 3 to 7 years, or by approximately 2026. However, pending the completion of Railway Order and CPO approval, contract and construction stages, the Metrolink CPO would sterilise the land for the period of at least the next Fingal County Development Plan, thus jeopardising the Pavilions potential to deliver urgently needed houses to Swords.</p> <p>It may also result in the permanent acquisition and sterilisation of lands at the north and eastern edges of the Pavilions Development Lands. These are all lands that are essential to properly construct and phase the overall Pavilions masterplan development. The viability of the planned development would be jeopardised by any restriction on the number of residential units planned, or where the 'buildability' of the scheme is hindered by the Metrolink CPO. It is not clear why the Pavilions lands to the west of the R132 are required to accommodate the construction of the proposed Metrolink project at greenfield undeveloped lands to the east of the R132. We therefore ask that the CPO of the Pavilions Development Lands be refused by An Bord Pleanála.</p> | <p>Thank you for sharing your concerns related to the land sterilisation. TII have reviewed your concerns and provided responses above at Items (3) to (6) and (10).</p> |

| Letter Re: Hampstead Residents CLG, Metrolink Submission 22/11/2022 (case number 314724) |                                        |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| 1                                                                                        | Independent Engineering Expert Service | 3 and 4  | <p>In relation to the current Metrolink project, Local Residents Associations (e.g.: -GADRA) requested Independent Engineering Expert Advice at the initiation of the Metrolink Project, however TII/NTA (Transport Infrastructure Ireland and National Transport Authority) did not act! Eventually TII/NTA provided Independent Expert service (RINA). However this expert advice was provided late in the project cycle! This delayed decision by TII/NTA, fundamentally limited the service's usefulness to residents.</p> <p>Additionally, it appears that the 'terms of reference' was provided to RINA exclusively by TII/NTA. Shockingly the public/residents/stakeholders (for whom the service is for) had absolutely no part in developing the terms of reference. This 'anti-inclusive' approach by TII/NTA resulted in the 'Independent expert' advice (when it was eventually provided) -being restricted and limited. Frustratingly, this experience of 'anti-inclusiveness' by our residents persisted throughout the process, and seems to be a mainstay approach by TII/NTA.</p> | <p>Thank you for your submission and for sharing your observations with regards to the MetroLink project to which we have responded below.</p> <p>As presented in the EIAR Chapter 8 (Consultation), in order to ensure the protection of the residential amenities and commercial operations along the proposed route TII have implemented a number of measures to assist residents and business owners during the pre-planning and construction period of the proposed Project, including appointment of an Independent Engineering Expert for the MetroLink Project.</p> <p>Access to the Independent Expert was provided in September 2021, following the appointment of RINA. This appointment coincided with the completion of the preliminary design and was the most appropriate time for the Independent Expert to begin their review of the MetroLink Preliminary Design proposals.</p> <p>Stakeholder groups who may be affected by the construction and/or operation of the proposed Project have been invited to avail of independent engineering advice from the IEE in order to better understand the potential impacts of the project's design and the reasons behind any design decisions along the proposed alignment. All resident groups on the route were invited to meet with RINA and there has been a strong take up of the invitation.</p> <p>The appointment of the IEE provides a key step in ensuring the independent explanation of the design and its impacts to stakeholder groups. RINA have provided clear information and advice and an understanding of the design, to enable the stakeholder groups to submit an observation to the Board. The IEE has sought additional information from TII following its meetings with the groups and this information has been promptly furnished to them.</p> <p>The appointment of an Independent Engineer to provide advice and guidance to residents groups has been broadly welcomed by Residents Groups route wide. Whilst TII fund the Independent Engineer they act in dependently in accordance with thier scope of works which can be accessed via the following link <a href="https://www.metrolink.ie/en/your-property/independent-engineering-expert-rina/">https://www.metrolink.ie/en/your-property/independent-engineering-expert-rina/</a>.</p> <p>The terms of reference for the Independent Engineer confirm the following "It is imperative that the independent Expert understands that its role is to provide independent, impartial, and objective analysis of the documents provided by the Client.</p> <p>In the administration of thier contract TII have not acted in anyway to affect the independent reporting of RINA and believe this is refected in thier final report which provides a fair and reasonable representation Stakeholder Concerns and thier own indepedent view any technical shortcomings of the scheme and the overall EIAR.</p> |

| Letter Re: Hampstead Residents CLG, Metrolink Submission 22/11/2022 (case number 314724) |                                        |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |  |
| 2                                                                                        | Independent Engineering Expert Service | 4        | R.O. Condition - Request 1:<br>- Notwithstanding the damage that has already has been done in relation to our residents confidence and trust in TII/NTA and its agents, we ask that Independent expert advice must be made available to residents and stakeholders, during ALL the upcoming phases of the Metrolink project (enabling works, construction and commissioning). An appropriate government dept should be the sponsor, and definitely NOT the TII/NTA.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | <p>The services of the Independent Engineering Expert (RINA) are due to be concluded on completion of the Railway Order process (expected in 2024). The continuation of provision of independent engineering advice for residential stakeholder groups throughout the enabling works and main construction stages of the MetroLink project is currently being considered as part of an overall comprehensive community engagement plan, which will include amongst other initiatives, the appointment of dedicated MetroLink liaison representatives and local community forums which will provide detailed updates on construction activities in their areas.</p> <p>The EIAR Chapter 5, MetroLink Construction Phase, Section 5.12.4.5 sets out TII Plans for Community and Engagement during the Construction Phase. A Stakeholder and Community Engagement Plan has been developed which has guided the frequency and means of communication to date. The proposed Project will continue to progress community engagement by:</p> <ul style="list-style-type: none"><li>• Regularly reviewing and updating stakeholder and community engagement plans;</li><li>• Actively maintaining partnerships and design focus groups established with the community; and</li><li>• Communicating in a timely and open manner.</li></ul> <p>TII and its appointed contractor(s) will ensure that local residents, occupiers, businesses, local authorities and all other stakeholders affected by the proposed construction works, as outlined in the EIAR, will be informed in advance of work taking place. The notifications will detail the estimated duration of the works, the working hours and the nature of the works. In the case of works required in response to an emergency, the local authority, local residents and businesses will be advised as soon as reasonably practicable. All notifications will include a local helpline number. In addition, information on the works will also be available on the proposed Project website. TII will further develop the Community Engagement Plan to encompass the construction and operational phases of MetroLink.</p> |  |
| 3                                                                                        | Consultation' process                  | 4        | As per TII/NTA recently published 'Introduction letter', and EIAR from the Railway Order application. TII/NTA states "Public participation has been an integral part of Metro Link from the outset" "The consultation of the public and stakeholders ensured the views of various groups, individuals and stakeholders were taken into consideration throughout the development of Metro Link"... "To ensure that the design of Metro Link has been undertaken having regard to the consultation responses received." etc..<br>Sadly despite this 'theatrical' public rhetoric, the residents of Hampstead Avenue, and many nearby Residents Associations have NOT had such an 'open and inclusive Consultation' experience with TII/NTA and were in general NOT made feel integral to the above mentioned process.                                                                                                                                                                                                                                                                                                                                              | <p>TII have undertaken extensive consultation across the route of MetroLink and has listened carefully to the concerns of stakeholders and the community, as documented by EIAR Chapter 8, Consultation, as well as undertaking a detailed and an extensive Environmental Impact Assessment that identifies and addresses environmental concerns as evidenced by the submitted EIAR, including proposed mitigations to reduce environmental impacts, that accompanies the MetroLink RO application.</p> <p>Consultations took place with residential property/landowners and resident associations in particular which are affected by the proposed Project. Since 2018, members of the MetroLink Engineering and Environment team have continuously engaged with landowners, residential property owners and resident associations potentially affected by the proposed Project. A summary of the main concerns raised at these meetings can be found in Table 8.4 of the EIAR Chapter 8. Two meetings with Hampstead Residents Group representatives took place in 11/11/2021 and 22/03/2021, as presented in Appendix A8.19 of the EIAR Report.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |
| 4                                                                                        | Consultation' process                  | 5        | The issues raised during this public consultation (from March 26th 2019 to May 21st 2019) having been considered as part of the final PR (Preferred Route) and formed the basis of the design. In this process, and as a consequence of lobbying on the part of the wider GAA community and others, the Metrolink station location originally proposed in Na Fianna GAA grounds (on St Mobhi Road) was moved south to Griffith Park. Note: -many of these respondents were living and based in different counties across the country! As a direct consequence of this station being moved (and only 2 days before closure of consultation) there emerged from TII/NTA 'a hand drawn sketch' of a proposed intervention shaft for Albert College Park. This was the first time our residents heard of a planned intervention shaft in the Park, and absolutely NO consultation took place on this decision! An extension was formally requested by our Residents Associations, in order that basic and reasonable consultation on this proposed new structure could happen. Astonishingly, this very reasonable request by our residents, was refused by TII/NTA. | <p>During the Preferred Route public consultation in 2019 more information was requested on the proposed intervention shaft at Albert College Park. Subsequently, a specific Albert College Park Local Area Consultation was initiated in early 2020 to explain in more detail the function and need for the intervention shaft at this location. The Consultation Report can be found in the EIAR Appendix A8.16. The local area consultation process is detailed in the EIAR Chapter 8 (Consultation), Section 8.7.</p> <p>An extention was not granted as TII considered the configuration appearance and rational for the intervention shaft could be further explained in consultation with residents from the concuision of the second non statutory public consulation (March 2019 and the submission of the Railway Order in September 2023.])</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |  |

| Submission No.                                                                           |                       |          | 111                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

| Letter Re: Hampstead Residents CLG, Metrolink Submission 22/11/2022 (case number 314724) |                       |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| 5                                                                                        | Consultation' process | 5        | <p>Additional to the above, the original twin tunnel alignments suddenly changed to a single bore tunnel. We see no clear information in the Metrolink published documentation outlining exactly why this decision was made. This is unbelievable stuff!</p> <p>The decision by TII/NTA of including the Albert College Intervention shaft emerged as a 'final decision'. Absolutely No consultation, discussion, investigations of other potential options were advanced by TII/NTA to our local residents, or representatives.</p> | <p>While fully recognising that matters of concern have been raised through the consultation process in 2019 and 2020, TII strongly disagree with any suggestion that these matters have not been addressed in advance of the submission of the Railway Order. The process of the preliminary design, together with the proposed construction arrangements upon which the EIAR for the RO is based have incorporated feedback, where appropriate, from the consultation process undertaken in 2019 and 2020.</p> <p>The timings and the decision to change from Twin to Single Bore tunnel are set out in EIAR Chapter 8 Consultation, Section 8.4.5 How Public Participation has Informed and Influenced the Project Development Process. See also response (7) below for further details on Single v Twin Bore tunnel.</p> <p>Following a review of the EPR and the issues raised during the EPR Consultation, the Preferred Route (PR) was determined. The purpose of this Preferred Route consultation was to present the Preferred Route and the key changes that were implemented following the consideration of feedback received during the consultation for the EPR, and to receive further feedback from the public on the design development.</p> <p>Beside the distribution of the PR Public Consultation Report, the PR consultation process included: the issuance of a stakeholder email to public representatives and stakeholders who had made a submission to the previous consultation and/or registered their interest in the proposed Project (please refer to EIAR Appendix A8.8), the placement of newspaper advertisements in national and regional newspapers (please refer to EIAR Appendix A8.9), the distribution of flyers with details of the information events, a map of the route and how to make a submission (please refer to EIAR Appendix A8.10), submission forms in both Irish and English language (please refer to the EIAR Appendix A8.12).</p> <p>Five public consultation events were held so that local communities and stakeholders from all areas along the route could participate. Feedback provided to the Project Team during all consultations held for the MetroLink project has added to the knowledge of the Project Team and has informed the decision-making and design processes for the final proposed Project design now being submitted for RO.</p> <p>The PR Public Consultation Document detailed the background to the proposed Project and a station-by-station description of the PR. The document was available to download from the project website and hard copies were provided to attendees at the events. A copy of the Public Consultation Report can be found in EIAR Appendix A8.11. Section 5.3 of the Public Consultation Report included a description of the two tunnel options and the rationale for decision to proceed with the with the single bore tunnel. In addition, section 5.4 of the PR Consultation report included the safety considerations for the Single Bore Tunnel option. With regards to Albert College Intervention shaft, please refer to Section 7.11. Griffith Park of the PR Consultation Report.</p> <p>The PR consultation process is detailed in the EIAR Chapter 8 (Consultation), Section 8.6.</p> |

| Letter Re: Hampstead Residents CLG, Metrolink Submission 22/11/2022 (case number 314724) |                                                                |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 6                                                                                        | Consultation' process - Albert College Park Intervention Shaft | 5 to 11  | <p>The 'Albert College Park Intervention Shaft Local Area Consultation' was launched by TII on February 12th 2020 and ran for four weeks until March 11th 2020. An Info-leaflet/feedback form including colourful drawings/'artistic impressions' of the proposed intervention shaft plus a freepost envelope, were delivered to approximately 4,250 local residents' homes (4250 homes - as per the TII/NTA). We were also told that these leaflets were delivered in the area surrounding Albert College Park. We, (or our residents association) were not informed of the actual leaflet distribution spread -on a map. In these delivered leaflets. ..residents were asked questions ONLY about the aesthetics/appearance, park amenity (construction phase) etc. of the proposed Intervention shaft and NOT about any other potential options or ideas. We strongly believe that this process was a total 'paper exercise' , misleading , a sham, a waste of tax payers money, an insult to residents intellect, and certainly does not even get close to the meaning of the word Consultation!</p> <p>We are astonished that TII/NTA thus far, have not held open and fair discussion /consultation in relation to this proposal and perhaps other ideas.</p> <p>In Summary: A station would fulfil all of the safety criteria of the shaft, and would meet the zoning requirements, and would benefit the local area. Additionally we believe there is a clear and distinct lack of future planning here. e.g.:- If this 'proposed shaft' was made a station for future use. There is a precedent! - it could act in the manner of Dardistown to remain inactive until these sites are developed.</p> | <p>As stated in Section 8.7.2.2 of the EIAR Chapter 8 (Consultation), the Albert College Park Local Area Consultation brochure was delivered to approximately 4,250 local residents' homes surrounding Albert College Park. 300 brochures were delivered to local libraries, council offices and local public representatives for display purposes. In addition, an email was sent to 216 public representatives and 6,140 stakeholders who signed up for project updates and thus notifying them of the consultation on the Albert College Park Intervention Shaft.</p> <p>Details of the 'Albert Collge Park Public Consultation 2020' can be found at <a href="https://www.metrolink.ie/en/consultations/albert-college-park-public-consultation-2020/">https://www.metrolink.ie/en/consultations/albert-college-park-public-consultation-2020/</a>, including 'The Albert College Park Tunnel Intervention Shaft Report', which provided more information on the purpose of the shaft.</p> <p>The EIAR Appendix A8.16, Report on the ACP Tunnel Intervention Shaft, explains the need for the tunnel intervention shaft and the rational for its proposed location in the south-western corner of the Albert College Park. The report includes a description of the surface features associated to the tunnel intervention shaft, an explanation of its function, a description of the typical construction methodology and the likely environmental impacts during and post construction.</p> <p>At the PR consultation stage the details of the proposal were not at the level of detail to undertake an EIAR, and the subsequent development of the design to preliminary stage has formed the basis of the EIAR assessment for the RO, noting that the preliminary design was developed with input feedback gathered during the consultations in 2019 and 2020.</p> <p>The requirement for an intervention shaft is a function of the distance between Collins Avenue and Griffith Park stations. It is also noted that this submission proposes that a station is located at this site. Such a proposal would bring with it a greater potential environmental impact during the construction phase to be managed, and therefore many of the observations (objections) to Albert College Park Shaft would apply to a station if constructed at this location.</p>                                                                              |
| 7                                                                                        | Consultation process                                           | 12       | <p>R.O. Condition REQUEST 2:</p> <p>- We call on the Inspector to instruct TII/NTA to adhere to the meaning of Consultation. Instruct TII/NTA to formally and openly investigate other potential options other than an Intervention/ventilation shaft for Albert College Park. All respective residents and stakeholders opinions should be part of this process equally and fairly. This should happen using up to date data such as current foot-fall statistics, journey modelling and future proof -projections. We strongly believe this should promptly happen and obviously prior to the Railway Order process advancing any further.</p> <p>- Additionally we ask the Inspector to request detailed information relating to the decision by TII/NTA of changing the proposed Metrolink tunnels from twin bore to single bore. This information should be made public. It has been requested by our residents association some time ago....Sadly, so far we have not attained an answer.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | <p>TII would reiterate that adequate consultation has been undertaken and that there is no need to revisit the rationale for the location of the ventilation shaft in Albert College Park as the benefits have been clearly demonstrated in the EIAR. Similarly, there is no need to revisit footfall, journey modelling and future projections as these have been presented in the EIAR and incorporated into the Preliminary Design. With regard to the specific points raised, please see below.</p> <p><u>Albert College Park (ACP) Intervention Shaft Consultation</u></p> <p>The Public Consultation Document for the Preferred Route, published as part of the public consultation held in March 2019, included reference to an intervention shaft required in Albert College Park (ACP), with the location indicated in Section 10, Appendix B, Sheet 15 ACP Intervention &amp; Ventilation Shaft. However, feedback was received following the PR consultation in 2019 that there was not sufficient information provided on the intervention shaft at ACP. TII thus subsequently held a Local Area consultation solely on the intervention shaft at ACP for 4 weeks in early 2020. This was supported by a detailed report explaining the rationale and construction and operational requirements for the shaft - see the EIAR Appendix A8.16. The main topics raised during this consultation related to aesthetics, environment, amenities, and parking. Please refer to the EIAR Chapter 8, Diagram 8.10 and Appendix A8.14 and A8.15 for further details. TII would therefore contest that they have not undertaken sufficient consultation or withheld information as suggested by the observation made.</p> <p>The design for the Albert College Park Intervention Shaft has been developed having regard to the submissions received and further discussions with Dublin Fire Brigade and other stakeholders with the site layout and the landscaping also developed to mitigate the visual impact. The size of the facility has been designed to accommodate the necessary ventilation facilities and access to the tunnels; to provide space for maintenance vehicles; and emergency vehicles space adjacent to the building entry point as required by Dublin Fire Brigade. Summary information is provided in EIAR Chapter 4, Section 4.17.5 Albert College Park Intervention Shaft with full details in EIAR Appendix A8.16.</p> |

| Letter Re: Hampstead Residents CLG, Metrolink Submission 22/11/2022 (case number 314724) |              |          |                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|                                                                                          |              |          |                         | <p>The EIAR Chapter 7 Consideration of Alternatives, section 7.7.11.1 explains the location options that were considered for the Intervention Shaft before determining that the south-west corner of Albert College Park was the preferred solution.</p> <p>Single v Twin Bore<br/>The EIAR provides the rationale and benefits of a single bore tunnel.</p> <p>A detailed comparative analysis of single versus twin bore tunnel has been undertaken, that has included consultation with Barcelona Metro that currently successfully operates a single bore configuration. EIAR Chapter 7, section 7.7.2.2.1 Overall Conclusions, notes that this analysis identified that a single bore tunnel option offered significant benefits for the proposed Project when compared to the twin bore solution that was considered at the Emerging Preferred Route (EPR) stage. These benefits include:</p> <p>Passenger Evacuation and Incident Management Benefits</p> <ul style="list-style-type: none"><li>• The single bore configuration enables faster passenger evacuation from the ends of the train directly onto tracks, rather than more challenging lateral evacuation on to an elevated walkway along the sides of the tunnel required for a twin bore configuration.</li><li>• The single bore provides increased space for emergency services access and working space adjacent to a train in the tunnel.</li><li>• Conditions can be created within a larger single bore diameter tunnel that facilitates smoke stratification at a high level in the bore for a longer period of time when compared to that in a twin bore configuration. Therefore, the single bore configuration facilitates enhanced evacuation conditions for passengers and provides better tunnel visibility during fire events when compared to the twin bore solution.</li><li>• The single bore configuration offers a more flexible system throughout the life cycle of the asset in that it allows operational adjustments such as additional track crossovers without the need to build new infrastructure / tunnels.</li></ul> <p>Programme and Cost Benefits - A single bore tunnel can be constructed at lower cost and quicker than a twin bore configuration due to:</p> <ul style="list-style-type: none"><li>• The overall reduced volume of structure to be constructed i.e. twin bore tunnels will require more concrete and steel, and an overall greater volume of excavation.</li><li>• Not only can the single bore tunnel itself be constructed more quickly, and hence reduce the construction programme as less overall volume of material needs to be excavated, but also there is no requirement for cross-passages, which are slow to construct and need to be mined as separate construction activities after the main tunnel has been built, adding time to the programme and a complex activity dependency to be managed..</li><li>• There is no requirement to construct extra mined/cut &amp; cover sections required to accommodate track crossovers since these can be accommodated in the single bore tunnel, that the twin-bore cannot accommodate.</li></ul> <p>(It is recognised that the single bore configuration unlike the twin bore arrangement means there is a need for intervention shafts where the distance between stations is greater than 1000m. This only occurs at one location on the Project between Griffith Park and Collins Avenue stations and overall is offset by the benefits listed.)</p> <ul style="list-style-type: none"><li>• As there is only one TBM to drive or pull through stations under construction, the station programme durations are reduced together with schedule interface risks with other programme critical construction activities.</li></ul> <p>Environmental Benefits</p> <ul style="list-style-type: none"><li>• The reduction in excavation means spoil quantities, handling and disposal is reduced and hence traffic on the roads and the follow on volume of land fill disposal is reduced.</li><li>• The reduction in concrete and steel that will be used to manufacture the tunnel lining precast segments will be reduced for a single bore tunnel and will therefore reduce the traffic on the roads.</li><li>• There is an overall reduced environmental impact since the construction programme is quicker, less materials are needed for construction (reduced use of natural resources and traffic to transport materials to site), less excavation (spoil disposal volumes are reduced resulting in less traffic on the roads and reduced landfill), and an overall reduction in embedded carbon as a result of the reduced volume of material (steel and concrete) required compared to a twin bore configuration.</li></ul> |

| Letter Re: Hampstead Residents CLG, Metrolink Submission 22/11/2022 (case number 314724) |                                              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| 8                                                                                        | In respect to the EIAR - Noise and Vibration | 12 to 15 | <p>In respect to the TII/NTA published EIAR Vol 3 ENV Baseline noise and vibration, and with particular reference to geographical sections in "Albert College Park" (Section AZ4 assessment zones) Unattended Location Daytime locations UT31 and UT32 (Table 13.30) - These assessment zone locations are not in or next to Albert College Park. Thus there are NO baseline monitoring points which cover adequately the Hampstead Avenue receptors.</p> <p>So in summary:- there appears to be NO baseline noise data in the EIAR, for the entire length of Hampstead Avenue. ..even though the TII/NTA propose that Hampstead Avenue will be within meters of one of the biggest excavations and construction sites on the entire Metrolink line.</p> <p>We find this absence of baseline noise locations, near sensitive receptors, absolutely unbelievable! It is our opinion any serious Noise and Vibration study must have continuous sampling taken over a prolonged time period (e.g., 7 days) and on a 24x7 basis. There should be several sampling sites and they must be positioned close to local noise sensitive receptors ...i.e.:- residents houses located on Hampstead Avenue!</p> | <p>The baseline noise readings are suitable and sufficient. Please refer to Figure 13.1 (Sheet 5 of 7) of the EIAR where all baseline monitoring locations are identified. We have a number of both attended and unattended monitoring locations in this area that gives us an excellent understanding of the current baseline noise environment in the area. This includes monitoring point AT64 at the junction of the Ballymun road and Hampstead Avenue, very close the nearest noise receptor on Hampstead Avenue.</p> <p>The assessments combine both MetroLink baselines with baseline data included in published noise mapping. As presented in Section 13.3.1.1 of the EIAR Chapter 13 (Airborne Noise &amp; Vibration), the publicly available baseline data included published noise mapping studies undertaken by CIE, TII and DAA which feed into the strategic noise mapping requirements of the Environmental Noise Regulations (S.I. 549 / 2018), based on noise modelled data from 2016. These are published and available via the EPA geo portal for Noise Maps Round 3 (2016) (<a href="https://gis.epa.ie/EPAMaps/">https://gis.epa.ie/EPAMaps/</a>). The modelled noise maps include existing sources of major rail, road and aircraft noise within the Dublin Agglomeration area. Since the road traffic along the surrounding road network is the dominant noise source noted across Albert College Park study area, this information provided a useful high-level overview of noise levels in the Albert College Park area.</p> <p>Baseline noise surveys have been conducted at locations representative of the nearest noise sensitive areas which have the potential to be impacted by construction works and/or those likely to be impacted during the operational phase. Baseline noise measurements were made over both long-term (unattended measurements, typically one week in duration) and short-term periods (attended day-time measurements) to supplement the long-term surveys to inform the assessment.</p> <p>Several noise sensitive locations (NSLs) along the Hampstead Avenue (including residential dwellings such as 1-4 Hampstead Avenue, 5-8 Hampstead Avenue, 9-10 Hampstead Avenue, 11-14 Hampstead Avenue, 15-18 Hampstead Avenue), located in the vicinity of Albert College Park compound working areas, have been modelled. These construction noise receiver locations are displayed in EIAR Figure 13.2 (Sheet 19) while the full suite of calculation results are given in Appendix 13.7 Construction Phase Modelling to the EIAR.</p> <p>Additionally, as part of the Construction Noise and Vibration Management Plan prepared by the Contractor (please refer to EIAR Appendix A5.1 Outline CEMP), a baseline noise study will be undertaken prior to the commencement of construction works to characterise the prevailing noise environment at impacted noise sensitive locations (NSLs).</p> |
| 9                                                                                        | In respect to the EIAR - Noise and Vibration | 15       | <p>R.O. condition REQUEST 3:</p> <p>- It is our opinion the baseline noise environment monitoring readings for Albert College park/Hampstead Avenue are incomplete/missing/fundamentally flawed. Based on this we have NO confidence in the EIAR presented noise and vibration study.</p> <p>- We request that the Inspector instructs that this study must be seriously reviewed/examined and performed again to provide valid and accurate empirical data. We strongly believe this condition s/b imposed as a condition of the Railway Order.</p> <p>- We request that the inspector places a condition in the R.O., that proposed excavation/construction in Albert College Park is a 'dark &amp; quiet' site at night.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | <p>The noise assessment process is not flawed and does not need review, please refer to response (8). No condition is required as the RO already includes for further baselining prior to construction.</p> <p>With regard to nighttime working, MetroLink have already considered the receiving environment and will implement measures to mitigate nighttime noise.</p> <p>The EIAR Chapter 13, Airborne Noise &amp; Vibration, Table 13.60 identifies the activities that will have an impact locally, with the mitigation measures proposed detailed in Section 13.6.1 and specifically for night-time works will require all fixed items of plant to be enclosed. It is proposed that during SCL night-time support works, an acoustically clad steel framed building will be used within the compound to control airborne noise breakout to surrounding sensitive properties. Refer to Outline CEMP Table 6.2 "Noise and Vibration Measures - Topic: Acoustic Barriers ANV8".</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| 10                                                                                       | In respect to the EIAR - Noise and Vibration | 16       | <p>R.O. condition REQUEST 4:</p> <p>- We request the Inspector ensures ALL respective residents must also be included in the above described 'report sharing system'. We strongly believe that in respect to mitigation for noise/dust/vibration etc...the paramount mitigation MUST be operational control (hours and periods). Attenuation targets, should aim to go far below 'significant thresholds', and in sympathy with proper baseline noise measurements. Deliveries, traffic movement, etc. should be contained to working hours. It's critical that proper baseline measurements for All times of the day/week should be established. Calibrated and maintained Sensors s/b put in place (permanently -during construction phase) close to sensitive residential zones on Hampstead Avenue, to monitor noise, vibration, light, dust (air) etc. The above mentioned 'alert system' and live data from these sensors should also be made public ...or be freely available to selected residents representatives or independent experts (that the public can access).</p> <p>- An appropriate penalty scheme should be in place in order to ensure contractors proper adherence.</p> <p>- An appropriate fund should be 'ring fenced'... To finance (for example) cleaning of affected residents properties/windows from dust contamination, insulation from noise, cleaning roads, etc. These actions should be included in the Construction Environmental Management Plan (CEMP).</p> <p>- We ask the Inspector that all these conditions s/b imposed as part of the Railway Order.</p> | <p>1. TII acknowledge that there is potential for environmental effects on the surrounding area due to the proposed MetroLink station if not mitigated effectively. However, as detailed in the relevant chapters of the EIAR, TII's assessment shows that it is possible to mitigate the potential impacts identified for all potential sensitive receptors surrounding Albert College Park during the construction period. The Pre-Construction planning for the preliminary design as assessed under this EIAR has provided for the majority of the works to be undertaken during standard working hours. However, for the Sprayed Concrete Lining (SCL), 24 hour 7 day a week works are required. It should be noted these works will generally take place underground and any noise emanating from surface activities to support the tunnelling will be suitably attenuated to mitigate the impacts. Deliveries to and from the site will be generally limited to standard working hours. Chapter 5, Section 5.5.17.3 refers.</p> <p>As set out in Appendix 5.1 of the EIAR, the Outline Construction Environmental Management Plan, to be included in the contract documents, will place requirements upon the Contractor undertaking the works to adhere to strict working hours and site conditions to minimise the impacts from the Construction activities. All planned night-time work activities will have to be undertaken, controlled and mitigated under the detailed Construction Environmental Management Plan to maintain impacts below the agreed construction noise thresholds.</p> <p>The Outline CEMP also sets out the arrangements for establishing the baseline noise sound study to be undertaken by the contractor prior to commencing construction works. The baseline noise study forms part of the Construction Noise Vibration Management Plan (CNVMP) to be prepared for each construction compound. Refer to Outline CEMP Table 6.2 "Noise and Vibration Measures - Topic: Method Statement ANV2 &amp; 3".</p> <p>Noise and vibration monitoring at representative noise sensitive locations (NSLs) to evaluate and inform the requirement and / or implementation of noise and or vibration management measures is proposed within the Outline Construction Environmental Management Plan, Volume 5, Appendix 5.1 (please refer to table 6.2: Noise and Vibration Measures, Topic Monitoring Programme ANV 11). The monitoring and auditing programme will form part of the CNVMP which will be agreed with the Local Authorities prior to the commencement of the Construction Phase. As a minimum the monitoring programme will include an alert system for threshold exceedances, remote access, and a platform for sharing monitoring results between the contractor(s), TII, DCC and FCC. The contractor(s) will adhere to any site-specific noise and vibration monitoring-related conditions imposed by the local authority. Monitoring data will be made available to the local authorities at an agreed frequency. TII confirm that monitoring will be undertaken in accordance with the CNVMP. Monitoring and auditing will be transparent. It is envisaged that monitoring data and audit results will be presented and shared in community forums. TII will consider options for sharing that data and results with the public and stakeholders in a timely and transparent way which may include the use of online portals and tools. It proposes that is not fixed by way of condition so that the content and manner of can be adapted to the changing circumstances of the project over time.</p> <p>TII confirm that the results of the monitoring programme will be available to Independent Engineer and Hampstead Avenue residents. The monitoring programme will include for air pollution as well as for noise.</p> <p>2. When appointed by TII the Design &amp; Construction Contractor must adhere to the environmental limits enshrined in the Railway Order, including Noise and Vibration, for this location. The contract documents for the contractor(s) will include penalties and incentives to Contractor to ensure adherence.</p> <p>3. As outlined in the EIAR Appendix 5.1, Outline CEMP, the Contractor will be required to submit a monthly environmental compliance report to TII for review and approval. The report will address the following as a minimum:</p> <ul style="list-style-type: none"><li>• Interpretation of the results of ongoing monitoring;</li><li>• Summary of compliance with the CEMP(s) including identification of any non-conformances;</li><li>• Detailed description of any issues and/or non-conformances identified during inspections and/or audits;</li><li>• Record of incidents and corrective actions (including CARs as appropriate);</li><li>• Summary of any environmental complaints received and/queries raised by stakeholders; and</li><li>• Records of environmental training undertaken (as appropriate).</li></ul> |

| Submission No.                                                                           |                                                    |          | 111                                                                                                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

|                                                                                          |                                                    |          |                                                                                                                                                                                                                                                                                                                                         | <p>The contractor(s) will inform TII of all emergency incidents immediately and prepare an initial report within 24 hours setting out the details and cause (if known) of the incident. The contractor(s) will be required to complete an Environmental Incident Report and any further documentation requested by TII within seven days of the incident occurring. The report will define the scale and effects as well as required corrective actions and mitigation/remediation/compensation measures (as appropriate).</p> <p>In case of any environmental incidents attributable to MetroLink works, remediation works will be undertaken and compensation (as appropriate) will be provided.</p> <p>TII will work with established Community Groups through the local community liaison officers along the route to identify projects at local level that would involve the Community in the delivery of MetroLink and its legacy. Such projects could include:</p> <p>- A local school learning programme.<br/>- Enhancement of community amenity within agreed funding limits.<br/>- Engagement with final landscape and finishing options, including aspects of biodiversity.</p> <p>TII are willing to explore mechanisms for investing in local initiatives to support affected communities during the works, such initiatives will be subject to funding being made available.</p> |
| 11                                                                                       | Operational Noise/Vibration and Dust (Air quality) | 16       | In respect to the proposed 'Intervention/ventilation shaft in Albert College Park", - when the Metro is operational. We understand that attenuators will be employed to mitigate negative noise effects. We believe there is a lack of detail provided in the EIAR in this area, relating to the operational monitoring and management. | <p>The requirements for the selection and attenuation of the Albert College Park Intervention Shaft ventilation systems, will be based on background noise level at the nearest and most exposed NSLs to each fixed item of plant and determined for day and night-time periods, with the methodology described in the EIAR Chapter 13, Section 13.2.5.2.4. All baseline noise values will be confirmed prior to the design and selection of the operational plant items with requisite attenuation determined after the updated baseline noise surveys.</p> <p>Suitable noise attenuation will be provided for the intermittent fan operation and will be developed at detailed design to ensure best practical means and equipment are employed.</p> <p>As presented in the EIAR Chapter 13, Section 13.6.2.3, the following will be considered when designing the equipment:</p> <p>- Selection of low noise rated equipment;<br/>- Reduction of induct flow rates;<br/>- Reduction of elements in the airflow;<br/>- In duct attenuators;<br/>- Orientation of grilles and louvres away from sensitive receptors;<br/>- Acoustic louvres; and<br/>- Anti-vibration mountings and couplings will be incorporated into the design to control vibration.</p>                                                                                                                                  |

| Submission No.                                                                           |                                                                                                                           |          | 111                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

| Letter Re: Hampstead Residents CLG, Metrolink Submission 22/11/2022 (case number 314724) |                                                                                                                           |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 12                                                                                       | Operational Noise/Vibration and Dust (Air quality) - In relation to dust/air emanating from the grilles, at surface level | 16,17    | In case of normal operation:- in our opinion the EIAR does not provide detail on how the hot air/fumes will be managed, e.g.:- during cold winter months hot air/fumes will meet the cold air outside and may cause plumes of 'smoke'. The air grilles are proposed to be located close to many residential houses and adjacent to a very busy road (Ballymun road). Any potential 'plumes' could be dangerous to traffic. How will this hot air be managed, and will it be monitored using sensors/and filters for potential pollutants? | <p>During normal operations there will not plumes of smoke impacting on traffic or the nearest receptors - there is a negligible impact on all modelled receptors.</p> <p>The Albert College Park Intervention Shaft is required to provide appropriate tunnel ventilation and to comply with tunnel fire safety strategy by providing egress between the tunnel and the ground surface so that passengers can escape, and fire fighters can enter the tunnel.</p> <p>As noted in Chapter 16, Section 16.5.3.11, the main emission of ventilation shafts in normal operation is akin warm air. The street level location of the grilles associated with the ventilation shafts are designed to minimise effects on pedestrians and nearby buildings. Inlet and outlet ventilation grilles are separated in order to minimise the possibility of air recirculation. Consideration is also given to the potential for air pollution to enter from vehicles through the air intake system.</p> <p>Chapter 6, Section 6.6.4 provides an overview of ventilation systems for the proposed Project. It note that fresh air will be provided through ventilation which will be filtered. The air inlets and outlets at surface level shall be sufficiently low so that they do not present a risk to people or surroundings and the position of the inlets and outlets will be such as to prevent recirculation of air or intake of polluted air. Should there be a need to remove heat from the upper levels of the station, which can occur in some peak summer months, the ventilation system can exhaust the hot air. The noise emanating from the ventilation system will also be limited to acceptable values through design.</p> <p>The ventilation shaft contains three reversible axial fans, one of them on stand-by, which can inject air in or extract air out of the tunnel. The fans will be fitted with silencers to attenuate operational noise. The fans in the ventilation shaft are also used for the Over-track exhaust systems (OTE) systems in the tunnels.</p> <p>Temperature sensors in the tunnels and at the underground stations will provide the necessary information to activate the tunnel ventilation system. Anemometers will monitor air flow speeds and in normal operating conditions will adjust the fans if required and in the case of a tunnel fire will confirm achievement of the required air speed in tunnels. Opacimeters will measure the opacity (clarity) of the air and be used as smoke detectors when CCTV is not operative.</p> <p>During normal operation, ventilation will control the difference in temperature between the underground sections and the open air. This control will be based on real-time temperature measurements along the enclosed parts of the track and measures at street level near each station.</p> <p>During a fire emergency mode, if there is a fire on a stationary train in the station, the ventilation system will draw exhaust from above the train and from the platform. It is unlikely for a fire to occur on a stationary train in the tunnel, and the aim would be to move the train to the next station. However, if this happens, the ventilation will draw the smoke in one direction and evacuation should proceed in the opposite direction. With respect to the potential for emissions from the ventilation shafts during a fire, the materials for the rolling stock or other systems such as wiring will be selected to comply with strict regulations to avoid the emission of irritating or toxic products. These materials are chosen in order to ensure conditions remain tenable during evacuation however it will also minimise the potential for toxic fumes being emitted from the ventilation shaft during a fire within the tunnel.</p> <p>The EIAR Chapter 16 (Air Quality), Section 16.6.2 outlines that as all ambient air pollutants will remain in compliance with the ambient air quality standards and the proposed Project has negligible impacts at all modelled receptors, no specific operation phase mitigation measures are required.</p> |

| Letter Re: Hampstead Residents CLG, Metrolink Submission 22/11/2022 (case number 314724) |                                                    |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |  |
| 13                                                                                       | Operational Noise/Vibration and Dust (Air quality) | 17       | RO condition REQUEST 5:<br>- Calibrated and maintained Noise/Air/Vibration monitoring sensors should be integrated into the Albert College Park Metro structure at ground level, and constantly operating during the life of Metrolink. Data should be made public. This condition should be included in the Environmental Management Plan (EMP). This condition s/b imposed as part of the Railway Order.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | No noise and vibration or air monitoring sensors are currently integrated in the preliminary design for the Albert College Park Intervention Shaft. As noted in Chapter 13, Section 13.5.3.2.3 the specific noise level from ventilation systems will be calculated as part of the further design development. Specifically, the operational noise level from the shaft and surface grill will be calculated to the nearest sensitive areas and specific attenuation designed for each system to not exceed the relevant design criteria for each location. In Chapter 16, Section 16.5.3.11 it is noted that the street level location of the grilles associated with the ventilation shafts is designed to minimise effects on pedestrians and near buildings. They are often situated in slightly elevated median strips (30cm) for drainage purposes or within green spaces, out of the normal transit of pedestrians or other sensitive receptors. Inlet and outlet ventilation grilles are separated in order to minimise the possibility of air recirculation. Therefore sensors are not required post-commissioning of the project.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |  |
| 14                                                                                       | Public liaison                                     | 17       | RO condition Request 6:<br>- The above 3rd party (a designated noise liaison officer) only 'community relations' is simply NOT good enough! We formally request the TII/NTA are part of this, and they also provide an escalation point within TII/NTA itself. The TII/NTA contact should also be available on a 24x7 basis, and answerable to senior management level within TII/NTA. They should be permanent TII/NTA staff members. A trouble ticket system should be employed that is fully transparent between contractor/TII/NTA and the residents. The trouble ticket system, should be of 'Customer Service industry' standard and ISO (International Standards Organisation) accredited. However, the ultimate overall responsibility must remain with our elected representatives and the appropriate Government department.<br>We firmly believe that a Metrolink 'Residential Monitoring Group', should be set up ASAP, which will have influence and be formally supported by government. Additionally a 'Community fund' must be created in order to give something back!<br>- We request strongly that these condition s/b imposed as part of the Railway Order. | TII staff will remain responsible and will implement a process as described in the EIAR to ensure staff remain accessible. Appendix A5.1 Outline CEMP details the external communication procedures proposed with the public and key stakeholders.<br><br>TII and the contractor(s) will take all reasonable steps to engage with stakeholders in the local community, especially those who may be affected by the construction works, including residents, businesses, community resources and specific vulnerable groups. The contractor(s) will be responsible for putting in place a Stakeholder Communications Plan which will developed under the consent of a designated Public Liaison Officer appointed by TII. This will provide a two-way mechanism for members of the public to communicate with a designated member of the contractor(s)'s staff, and for the contractor to communicate important information on various aspects of the proposed Project to the general public. A 24 hour helpline will be established.<br><br>TII will work with established Community Groups through the local community liaison officers along the route to identify projects at local level that would involve the Community in the delivery of MetroLink and its legacy. Such projects could include:<br><br>- A local school learning programme.<br>- Enhancement of community amenity within agreed funding limits.<br>- Engagement with final landscape and finishing options, including aspects of biodiversity.<br><br>TII are willing to explore mechanisms for investing in local initiatives to support affected communities during the works, such initiatives will be subject to funding being made available. |  |

| Letter Re: Hampstead Residents CLG, Metrolink Submission 22/11/2022 (case number 314724) |                                                        |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 15                                                                                       | Temporary land take - proposed for Albert College Park | 18       | <p>Please refer to the construction compound as defined in detail in the Construction Report (page 94 and 95 of Vol. 5, Chapters, A5.3/ <i>Ref the dark blue areas in the three figures from page 18 of the submission/page 20 of the received submission PDF document</i> .</p> <p>In respect to these dark blue areas: - they don't just cover 'existing pitches' they also include woodland and hedging (approximately 35 meters deep), which grows north of and adjoins the 'winding footpath' that runs in parallel to Hampstead Avenue. This significant amount of mature trees and hedgerows are clearly NOT part of the current football pitch set-up in Albert College Park, but are obviously included by the TII/NTA in the 'Proposed Temporary site'.</p> <p>We totally reject any aspiration of TII/NTA to incorporate this band of trees and hedging into a proposed new football pitch alignment/reconfiguration.</p> | <p>TII can confirm that the blue areas referred to do not relate to removal of trees and hedges - these are property boundaries. To see the extent of the tree removal please refer to the Aboricultural Impact Assessment in Appendix A 27.3. It should be noted that none of the trees along the Hampstead Avenue boundary are planned to be removed.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| 16                                                                                       | Temporary land take - proposed for Albert College Park | 20       | <p>RO condition Request 7:</p> <p>- We believe the Inspector should include an exact condition on this (or any) 'extra land use' in the Railway Order. In this particular instance... this land in the 'shaded dark blue area' in referenced appendix maps above, is specifically allocated for football pitch re-instatement and should not at any stage during the build process be used for temporary construction, storage or support uses for any Metrolink facility in Albert College Park.</p> <p>NOTE: - In the above R.O. condition it must also include:</p> <p>- that any trees and hedging that are within the dark blue areas above (i.e.: areas not currently in football pitch use) should remain untouched, and fully protected.</p>                                                                                                                                                                                 | <p>Please see response (15).</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| 17                                                                                       | Hydrogeology and the management of flood risk          | 20,21    | <p>The EIAR mentions water gathering/holding etc., but lacks detail in exactly how flood water will be managed in the specific area of the currently installed DCC flood drains in Albert College Park and directly adjacent to Hampstead Avenue.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | <p>The risk of flooding is minimal and the EIAR includes for provision to manage the risk. Table 18.16 of EIAR Chapter 18, Hydrology provides a summary of the construction and compound sites along the full route together with the planned discharge point (surface water/storm sewer) and the estimated daily rate of discharge to that receiving feature. Including Albert College Park, none of the planned construction or compound sites are located immediately within areas designated as Flood Zone A or B, in accordance with the OPW 'Planning System and Flood Risk Management Guidelines' (November 2009). The management of flood risk during construction is detailed in Chapter 18 (Hydrology, Section 18.6.1.3) and in the outline CEMP (Appendix 5.1). Any local drainage impacted will be diverted to suit such that flood risk is managed.</p> <p>In order to manage and mitigate all environmental risk at Albert College Park, and as part of the preparation for the construction phase, the appointed Contractor for these works will be required to set out their proposals in the Construction Environmental Management Plan (CEMP), an outline of which is included in EIAR Appendix A5.1. The Contractors CEMP will include a Construction Flood Protection Plan, with minimum requirements set out in EIAR Appendix A5.1, Table 6.4 Water Measures.</p> |

| 19                                                                                       | Management of potential Rodent infestation    | 22       | Due to planned Metro link activity in the park (including potential football pitch 're alignments'), substantial soil and clay and hedgerow will be disturbed and moved during excavations. All this will likely disturb the local rodent population. The EIAR lacks detail in exactly how TII/NTA proposes to monitor and manage potential rodent 'migration' due to the major earth works proposed for Albert College Park. | As is standard practice vermin control will be implemented on all MetroLink sites. Chapter 10, Section 10.5.1.10 notes that while rodents will be temporarily displaced as a result of initial construction activities, there is nothing in the Construction Phase which would lead to an increase in the number of rodents. It could be argued that with the rodent control policies in place, there will be a reduction in the level of rodents and the subsequent risk. Because there will be no increase in vermin numbers and more likely a decrease because of vermin control measures there will be no increase in vermin transmitted disease over and no significant adverse effect on human health.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

| 21                                                                                       | Fire, emergencies and drills                  | 23       | In our opinion:- the EIAR does not provide details on what mitigation measures will be taken in respect to toxic smoke/fumes. e.g.: - How will such toxic fumes be managed/filtered?<br>The EIAR does not provide details on how a fire situation or emergency would (or may be) managed, e.g.: - could local residents be evacuated from their homes, or what is the procedure for fire drills, etc.?                        | <p>The construction contractor and MetroLink operator will prepare and implement an Environmental Management Plan and a Health and Safety Plan to protect workers, control environmental pollution, and protect members of local communities from construction and operational activities.</p> <p>An Emergency Response Plan has been developed as part of the Outline Construction Environmental Management Plan (please refer to the EIAR Appendix A5.1). This will be further developed by the Principal Contractor, in consultation with the emergency services and other relevant third parties and will be submitted to TII for approval. The Emergency Response Plan will contain incident response procedures which will outline the detailed procedures for dealing with any potential emergency.</p> <p>In the event of a fire during operational phase, the MetroLink ventilation system will be capable of exhausting the smoke without affecting adjacent station platforms or the following tunnel sections. The tunnel emergency exits and the firefighting accesses to tunnels will be over-pressurised to create safe paths for evacuation of passengers and entry of the emergency services.</p> <p>Should a fire break out on a stationary train in the station, the ventilation and Over-track exhaust (OTE) systems will exhaust smoke from above the train and from the platform. It is unlikely for a fire to occur on a stationary train in the tunnel, and the aim would be to move the train to the next station. However, if this happens, the ventilation system will draw the smoke in one direction and evacuation should proceed in the opposite direction.</p> |

| 23                                                                                       | Construction Traffic and Parking | 23       | Residents are concerned that any Metrolink construction site will compound the parking problem, as workers/agents/visitors etc, who do not or cannot use public transport, will look locally to park. The EIAR is very weak on how these situations will be managed, and to be honest very gullible in proposing that all folks that work or want access to an Albert College Park Metrolink site, will use public transport. | <p>The Scheme Traffic Management Plan (STMP) (Appendix A9.5) of the EIAR includes details of the proposed Mobility Management Plan (MMP) which supports and promotes sustainable travel for construction staff and constrains the use of private cars to access work compounds. This will be a contractual requirement that the appointed contractor will have to comply with during the Construction Phase. TII therefore do not envisage MetroLink impacting local existing parking arrangements or there being a requirement to change the local parking regime.</p> <p>In order to manage and mitigate all environmental risk at Albert College Park, and as part of the preparation for the construction phase, the appointed Contractor for these works will be required to set out their proposals in the Construction Environmental Management Plan (CEMP), an outline of which is included in EIAR Appendix A5.1. The Contractors CEMP, submitted to Dublin City Council for approval will include plans to mitigate construction worker parking locally with the preparation of the Construction Mobility Plan, one of the key aspect of which is to encourage all forms of transport with the exception of car use.</p> <p>Chapter 5 of the EIAR, MetroLink Construction Phase, explains that traffic management plans for the construction phase of the Project that have been developed to minimise the impact on road users, and to maintain access to businesses and other premises. Prior to implementation, all traffic management measures will be agreed with Dublin City Council and where relevant, consultation with An Garda Síochána and other statutory stakeholders will be undertaken.</p> |

| 24                                                                                       | Construction Traffic and Parking              | 25       | <p>R.O. condition Request 11:</p> <ul style="list-style-type: none"><li>- We strongly believe the Inspector should include a condition in the R.O. requiring TII/NTA to detail plans of any potential traffic restrictions/management at the Hampstead Ave intersection with Ballymun road, and provide a realistic solution to how parking will be managed for those Metrolink workers (visitors or associates) that do not use public transport.</li><li>- Additionally we strongly object to any Metrolink emergency exit or any proposed site access onto Hampstead Avenue.</li><li>- We believe that the inspector must also include the following condition in the R.O. The Ballymun road hard shoulder must be used as an emergency vehicle parking area, for any Metrolink structure placed in Albert College Park, and thus eliminate the need for a 'car park'/emergency vehicle parking - within the park.</li></ul>                                                                                                              | <p>TII can also confirm no access is provided off Hampstead Avenue, with both accesses now provided off the Ballymun Road. (See Railway Order Drawings, Structures Book 3 of 3, ML1-JAI-SRD-ROUT_XX-DR-Y-03001).</p> <p>The planned work at Albert College Park will have limited impact on the existing junction of Hampstead Avenue with the Ballymun Road. For the construction phase, the EIAR Chapter 5 (MetroLink Construction) and Appendix A9.5 Scheme Traffic Management Plan details the potential impact of the temporary traffic management measures and associated construction traffic. As the Intervention Shaft is wholly located within the Albert College Park, with the exception of access and egress points into the construction compound, there are no temporary traffic management measures on the R108 Ballymun Road associated with the construction of this site, causing no impact to road users.</p> |
| 25                                                                                       | Non disclosure of information and enforcement | 25 to 29 | <p>Throughout the life of Metrolink project thus far, there are many examples where we feel the TII/NTA have behaved poorly, were very slow at providing information (until forcefully requested under FOI), and had in fact shown some indifference for our residents.</p> <p><i>5 examples are presented on pages 25 and 26 of the submission (pages 27 and 28 of the received submission PDF document).</i></p> <p>Please see an exact copy of two emails (<i>on pages 27 to 29 of the submission/pages 29 to 31 of the received submission PDF document</i>) sent to TII/NTA (Tom Manning) requesting an explanation and extension of 25th November deadline, in order this new information can be reviewed by the public/residents. No reply from TII/NTA received (at time of posting submission).</p> <p>As from the above email examples we hope the inspector can get a sense of our difficulty attaining, basic and reasonable information, understanding/flexibility, in a timely manner from the TII/NTA (and their agents).</p> | <p>TII has at all times sought to engage regularly with affected stakeholders. TII note that it has conducted three non-statutory consultation events and has also met with the Hampstead Residents group twice in this time.</p> <p>The Railway Order Statutory Public Consultation was initially set at six weeks but was further extended on 25 November 2022 to 16 January 2023 due to the submission of information that was inadvertently omitted from the EIAR (Appendix A9-2, A9-2-M Traffic and Transportation Assessment – St Stephen’s Green Station). Newspaper notices were also published on 25 November 2022 providing notification that this information was being submitted and was again accompanied by TII writing to the same circa 2400 property owner/occupiers notifying them of this new information.</p>                                                                                                 |
| 26                                                                                       | Non disclosure of information and enforcement | 29       | <p>R.O. condition request 12:</p> <ul style="list-style-type: none"><li>- We request that the Inspector should include a governing clause in the R.O. on how the conditions themselves will be monitored and enforced.</li></ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | <p>TII do not agree that the conditions requested are appropriate]</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| 27                                                                                       | Submission Closing statement                  | 30       | <p>Our residents (most with fulltime jobs and other commitments) had an arduous task of trying to read through the Metrolink project 1000's of online pages (many technical). Our residents found it extremely stressful to try and understand exactly the implications of this highly technical and intrusive project, is going to have for their quality of life and that of their children and indeed their property, in the coming approx. 10 years.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | <p>TII note difficulties encountered by Hampstead Avenue residents in reading the full RO documentation and inform you that a Non-Technical Summary has been included as part of the Environmental Impact Assessment Report (EIAR). Please refer to Volume 1, Book 1 of the Railway Order (RO) documentation.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

| Letter Re: Hampstead Residents CLG, Metrolink Submission 22/11/2022 (case number 314724) |                              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| 28                                                                                       | Submission Closing statement | 30       | The independent expert (RINA), while helpful, was provided far too late in this project phase. Disappointingly, residents involvement was excluded from the "Scope of work" that the TII/NTA provided to RINA. Thus, the overall benefit of RINA to our residents was much subdued. As clearly outlined in the initial pages of this submission, we strongly believe that TII/NTA have failed in delivering proper "consultation" in respect to the proposed Metrolink structure planned in our area.                                                                                                                                                                                                                                                                                                                                                                                          | <p>The appointment of independent expert engagement (RINA) coincided with the completion of the preliminary design and was the most appropriate time for the Independent Expert to begin their review of the MetroLink Preliminary Design proposals.</p> <p>TII does not agree with the assertion that a proper consultation has not been delivered. The EIAR Chapter 8, Consultation, provides details of the consultation process undertaken in 2019 and 2020 in relation to the proposed intervention shaft at Albert College Park. Also please refer to responses (3, 4, 5, 6 and 7) above.</p> |
| 29                                                                                       | Submission Closing statement | 30       | In addition we believe that the EIAR is incomplete and lacking in several aspects such as, noise sampling, reasoning for moving to single bore tunnel, reasoning for use of Z9 parkland for an intervention shaft/ car park, lack of proper definition of problem management, flood mitigation, emergency parking located within a public park, ...etc.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | Responses to the concerns noted here are contained within the responses above.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| 30                                                                                       | Submission Closing statement | 30       | <p>Thus, we believe the assigned Inspector will be burdened unduly with the addition of many conditions to the R.O. and ensuring fairness for all citizens equally, while trying to expedite the planning process at the same time.</p> <p><u>However, we formally ask the Inspector to include all our conditions into the R.O. However first of all, address the key issue of lack of "consultation" visited on our residents by the TII/NTA</u> and thus ensure our residents are treated as equal, to other groups on the Metrolink route. It is with this objective that the 'Hampstead residents CLG' was formed!</p> <p>The "Hampstead residents CLG", Mission statement:- the main formal objective of our Company is to achieve for our residents, the same basic right of consultation, as afforded to many other citizens/groups in the vicinity and along the Metro link line.</p> | TII regret that residents feel that there has been a lack of consultations however TII would note that as noted previously, three non-statutory consultation events were conducted along with two direct meetings held with Hampstead Residents.                                                                                                                                                                                                                                                                                                                                                    |

| 1                                                                                                                         | 1.0 Introduction (page 1 of the Submission)                | 3        | <p>From the outset, this submission requests that An Bord Pleanála duly consider the negative implications arising on our clients' business. It is strongly contended that the proposed development has had no regard to the viability of our client's business at the Brian Boru House, 5 Prospect Road, Glasnevin, Dublin 9.</p> <p>The grounds of objection are set out in the following sections of this submission and within Appendix A which has been prepared by Dermot Flanagan SC, which is to be read in conjunction with this planning submission.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | TII thank you and acknowledge your submission response referred to as "Planning Observations ABP Ref NA29S.314724". We have reviewed this submission and provided detailed responses for the issues and concerns raised below.                                                                                                                                                                                                                                                                                                                                                                                       |
| 2                                                                                                                         | 2.0 Site description (page 2 of the Submission)            | 4        | <p>The premises has been in use as a business for over 200, with the Hedigan family occupying it and providing a public house from 1906 onwards. In addition to the business's heavy ties to the community and to the local history, it is also of note that the premises contains high quality works including the existing signage at front elevation, as well as an existing painting located above the signage. The signage itself was prepared by a craftsman and required carving out of the letters, the utilisation of gold leaf and glass. This form of signage is no longer commonly found and should the demolition of the building proceed, this would be lost.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | Section 26.5.4.6.2 of Chapter 26 Architectural Heritage has identified that the unavoidable demolition of the Brian Boru will result in a very significant effect. The building which is listed on the National Inventory of Architectural Heritage (NIAH) is given a baseline rating of "medium" in terms of its architectural heritage merit.                                                                                                                                                                                                                                                                      |
| 3                                                                                                                         | 3.0 Site Planning History (page 5 and 6 of the Submission) | 7&8      | <p>Reg. Ref. 4258/05: Permission refused by Dublin City Council for the demolition of the public house and the construction of a mixed use development comprising a public house (538.4 sq.m), media and associated uses (1732 sq.m) and 57 no. residential units (9 no. three bed duplexes, 4 no. three bed apartments, 1 no. two bed duplex, 39 no. two bed apartments and 4 no. one bed apartments) in a block ranging in height from six storeys in the east to three storeys in the west.</p> <p>The demolition of the structure was considered to be inappropriate by the Planning Authority, who refused permission for the following 2 no. reasons:</p> <p><i>1. Having regard to the location of the site adjacent to a protected structure, adjoining and within a designated Conservation Area along the Royal Canal and in a very prominent location on Prospect Road, it is considered that the proposed development, by reason of its design, bulk and scale, does not integrate physically or visually with its context and fails to take account of the proximity of and relationship to the protected structure (Prospect Lodge), the environmental quality of the Conservation Area and fails to respect the streetscape. As proposed, the development constitutes overdevelopment of the site and would seriously injure the amenities of the area and of property in the vicinity. The proposed development would therefore, be contrary to the proper planning and sustainable development of the area and to the provisions of the City Development Plan 2005-201 1.</i></p> <p><i>2. The demolition of the Brian Boru public house, which is of some architectural and streetscape value, as well as literary associations, has not been justified by sufficient evidence and would, therefore, be contrary to Section 15.10.3 of the Dublin City Development Plan 2005-2011, which provides for the retention and re-use of older buildings of significance which are not protected. Therefore, the proposed development would be contrary to the proper planning and sustainable development of the area.</i></p> <p>Thus, the structure is considered to be of historic value and should not be subject to a demolition. The refusal above is considered to set a precedent for retaining the building.</p> | <p>The value of the building as a Protected Structure has been acknowledged and assessed within the EIAR.</p> <p>The demolition is unavoidable to deliver the proposed Glasnevin station, which is supported in principle in Objective SMT017 of the Dublin City Development Plan 2022-2028.</p> <p>The decision in respect of demolition as part of the Railway Order will be taken in the context of the proposed development at the site, taken on its own merits, taking into account scheme-wide and site-specific matters, all of which is sufficient evidence to justify the demolition in this instance.</p> |

No. NA29N.314724 - Railway (Metrolink - Estuary to Charlemont via Dublin Airport) Order |                                                                                  |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 4                                                                                                                         | 4.0 Proposed Railway Order (page 11 of the Submission)                           | 13       | As indicated above the proposal directly interferes with our clients' premises and involves the demolition of their public house, ending their longstanding family business and resulting in unmeasurable concerns regarding their livelihood.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | Businesses which are subject to the compulsory acquisition of their property will be compensated in accordance with the statutory compensation code. The principle of code is to seek to place the affected party in no better or worse position than prior to the compulsory acquisition. The nature and amount of compensation will depend on the specific circumstances but the typical heads of claim are as follows: (i) value of legal interest in land to be acquired such as freehold/leasehold (ii) severance or other injurious affection which relates to devaluation of retained lands, if any, caused as a consequence of the acquisition (iii) disturbance and any other matters such as professional fees and the loss sustained or expenses incurred by an owner following the compulsory acquisition. As part of the Land Acquisition Strategy, TII are introducing an agency service to support businesses whom may be displaced as a consequence of the scheme proposals. This will be introduced following confirmation of the MetroLink RO. |
| 5                                                                                                                         | 5.1.2 Neighbourhood Centre (page 12 of the Submission)                           | 14       | Our clients' premises plays a key role in the neighbourhood, both as an employment generator, as well as providing a service to locals and visitors to the area. The public house has been a landmark of the area since the early 1900s and its loss would be detrimental to the area.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | TII acknowledge the impact the MetroLink Project will have on this property, business, and the local community. As identified in Table 11.54 of Chapter 11 Population and Land Use, the loss of this property by demolition will have a negative significant permanent effect.<br><br>While the loss is regrettable, businesses which are subject to the compulsory acquisition of their property will be compensated in accordance with the statutory compensation code, while the creation of an integrated transport hub at Glasnevin will bring long term economic and social improvement to the local area.                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| 6                                                                                                                         | 5.1.3 Permitted and Open for Consideration Land Uses (page 13 of the Submission) | 15       | As is evident, our clients' premises has the potential to accommodate a wide variety of land uses. The proposed Metrolink will hinder any form of development and reduce the existing services provided at the Neighbourhood Centre.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | As outlined in Chapter 11 Population and Land Take, Overall, the impact on the retail industry is considered to be a positive, moderate, permanent effect for the local and regional economy and for each of the locations listed during operation of the proposed Project. The proposal to introduce a major interchange station here will increase footfall through the area, benefiting local businesses.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| 7                                                                                                                         | 5.1 .4 Built Heritage Assets of the City (page 13 of the Submission)             | 15       | <p>Many of the older buildings and structures in the city, whilst not included on the Record of Protected Structures or located within an Architectural Conservation Area or Conservation Area, make a positive contribution to the historic built environment of the city. The retention and reuse of these buildings add to the streetscape and sense of place and has a role in the sustainable development of the city. There will be a presumption against demolition of individual structures of vernacular or historic/ social interest that contribute to the character of an area.</p> <p>The development seeks to demolish the Brian Boru public house which is considered to be of local historic merit. This was the stated reason for the refusal of the previous application. Thus, it is considered that a robust justification for the demolition of the premises would be required and this has not been provided. As noted, the premises is mentioned in many Irish songs and books including James Joyce's 'Ulysses' and The Chieftain's 'Hedigan's Fancy'. The demolition of the premises will thus remove a building noted for its heritage and connection to the local area.</p> | Please refer to response to Item number (2) above.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

| Submission No.                                                                                                            |                                                                                  |          | 112                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

No. NA29N.314724 - Railway (Metrolink - Estuary to Charlemont via Dublin Airport) Order |                                                                                  |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| 8                                                                                                                         | 5.2 Project Ireland 2040 National Planning Framework (page 14 of the Submission) | 16       | The Metrolink application has not had appropriate regard to the above as it relates to the our clients' site. It is contended that the scheme will hinder any comprehensive development at the lands in due course, such a development would maximise the potential of the lands, providing for community facilities as well as higher density accommodation. The application as submitted does not accord with the National Planning Framework. | <p>As outlined above in response item number (5), the loss of the Brian Boru pub will have a negative significant and permanent effect. However, the provision of the MetroLink will enhance commercial activity in the surrounding area by providing increased footfall through the area, which will benefit local businesses. Furthermore, the MetroLink will be the highest capacity public transport system in Dublin and as such will facilitate the intensification of development on greenfield or brownfield sites, as a sustainable high transport link will be provided into the area. As such the proposed Project supports the aims of the National Planning Framework and it should be noted that the NPF supports the MetroLink project.</p> <p>MetroLink will be a catalyst for and provide opportunity for future development and regeneration. While the MetroLink Railway Order does not include for future neighbouring or overhead development, the tunnels and stations are designed to support appropriate future imposed loads.</p> <p>TII will be required to make submissions in relation to planning applications for proposed future developments on or adjacent to MetroLink and there will necessarily be some engineering constraints (such as permissible loadings) required. However MetroLink is committed to engaging with known development proposals and new development proposals as they emerge with the intent of facilitating such developments as they emerge to the maximum extent consistent with the safe operation of the proposed Project.</p> <p>Again in common with other existing rail and tunnel projects, following grant of the Railway Order and development of detailed design, TII will produce "Guidance Note for Developers" that will be the subject of bye-laws following the grant of Railway Order and which is designed to facilitate future adjacent or over-site development while protecting the integrity and safety of the MetroLink works and operations.</p> <p>Therefore at this stage TII is dealing with known development proposals on a case by case basis, TII will work with parties in the future to assist with the wider development of sites over and above stations and tunnels. In this context TII has successfully engaged with a number of developers over the last two years to accommodate development over and in proximity to the alignment and there have been no material restrictions on development subject to the implementation of agreed design and mitigation measures and it is not anticipated that MetroLink will have a material impact on the development potential of sites above and in proximity to the alignment in future.</p> |
| 9                                                                                                                         | 5.3 Housing for All - A New Housing Plan for Ireland (page 15 of the Submission) | 17       | As noted above, it is considered that the lands have not been maximised to their full potential, thus wasting lands. The Glasnevin Station could have been included as part of a larger structure which provides for services at floor levels and working or living spaces at upper levels. This has not occurred and as a result the lands have not been utilised. This is considered against the provisions of the Housing For All plan.       | <p>TII do not agree that the lands are being wasted at this location. As detailed in Chapter 4 (Description of the MetroLink Project) section 4.17.7.2, the following considerations were addressed in developing the architectural and urban design for Glasnevin Station:</p> <ul style="list-style-type: none"><li>* Provide an intermodal concourse at street level, designed as an open space under a light canopy;</li><li>* Provide a potential café or shops for passengers;</li><li>* Rebuild the Dalcassian Downs car park over the station roof slab;</li><li>* Provide a car park/ large cycle park area and drop-off on the area of the existing Brian Boru car park;</li><li>* Design landscaping with green integration on slopes;</li><li>* Integrate station ventilation grilles in green areas; and,</li><li>* Consider the requirements for revenue protection for the different modes, as well as safety in design, specifically regarding adherence to Iarnród Éireann's codes of practice.</li></ul> <p>TII note that Metrolink does not include for oversite development in the Railway Order. However, MetroLink does not preclude any future oversite development, but any consideration would be post Railway Order and be subject to An Bord Pleanála consent as a separate consent to MetroLink.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

| 10                                                                                                                        | 5.4 Regional Spatial and Economic Strategy for the Eastern and Midlands Region 2019-2031 (page 15 of the Submission) | 17       | Dublin plays a key role in attracting internationally mobile talent and investment and combines vibrant urban living, a rich heritage and character and access to nature including Dublin Bay, the coastline and Dublin-Wicklow mountains. It is considered that the proposed Metrolink does not take full advantage of our clients' lands.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | Please refer to response Item number (9) above.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 11                                                                                                                        | 6.0 Concerns on Submitted Application (page 15 of the Submission)                                                    | 17       | As stated throughout this submission, the principal concern of our clients arising from the proposed railway order application relates to functionality and viability of our clients' business which has operated on site since the early 1900s. The application as submitted, seeks to demolish the premises in its entirety, thus forcing the closure of the business and raising uncertainties on our clients' futures. This planning submission is to be read in conjunction with the outline legal submission at Appendix A of Dermot Flanagan S.C.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | Please refer to response Item number (5) above.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 12                                                                                                                        | 6.1 Demolition of Building (page 15 and 16 of the Submission)                                                        | 17&18    | <p>Having regard to the location of the site adjacent to a protected structure, adjoining and within a designated Conservation Area along the Royal Canal and in a very prominent location on Prospect Road, it is considered that the proposed development, by reason of its design, bulk and scale, does not integrate physically or visually with its context and fails to take account of the proximity of and relationship to the protected structure (Prospect Lodge).</p> <p>The demolition of the Brian Boru public house, which is of some architectural and streetscape value, as well as literary associations, has not been justified by sufficient evidence and would, therefore, be contrary to Section 15.10.3 of the Dublin City Development Plan 2005-2011, which provides for the retention and re-use of older buildings of significance which are not protected. Therefore, the proposed development would be contrary to the proper planning and sustainable development of the area.</p> <p>The structure is considered to be of local historic merit and would require a strong rationale, including a conservation assessment, in support of the demolition. This has not been provided with the application.</p> | <p>Please note that Chapter 26 Architectural Heritage has assessed the potential direct and indirect impacts on the area surrounding the proposed station during the construction phase. (Please refer to Table 26.49 and Table 26.50 in that chapter). However Section 26.5.4.6.3 of the chapter identifies that there will be no significant direct impact on the architectural or industrial heritage on completion of the works.</p> <p>The demolition of the Brian Boru, although regrettable, is justified on the wider benefits afforded by the MetroLink station at Glasnevin and the critical transport interchange it affords. The broader benefits of MetroLink are clearly stated within Chapter 3 of the EIAR: Background to the MetroLink Project.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| 13                                                                                                                        | 6.2 Underutilisation of Lands (page 16 of the Submission)                                                            | 18       | The lands owned by our client are a clear example of lands which have the potential to facilitate significant redevelopment. The application does not avail of this opportunity and seeks to demolish a public house which serves a locality. The Glasnevin Station building is an under provision on the lands as it would be more suitable to support a mix of uses. It is our opinion that the station should have been provided with a more significant form of development which provides accessible services at ground floor level and office or residential units at upper floor levels. This would be more in line with the zoning objective which seeks to provide a variety of uses to serve the locality. The proposed Glasnevin Station, in its current form, does not facilitate the vision of the zoning objective.                                                                                                                                                                                                                                                                                                                                                                                                         | <p>Metrolink is the single biggest investment in transport infrastructure in the history of the State and is part of an integrated transport solution that also includes for BusConnects and Dart+ are all included under Project Ireland 2040, part of the NTA Transport Strategy for Greater Dublin Area 2022-2042. Together these projects will result in reliable, sustainable, affordable, integrated public transport that will support the economy, help Ireland meet its climate change targets in line with Climate Action Plan 2023 and make Dublin a more liveable and sustainable city.</p> <p>MetroLink is a critical part of the proposed integrated transport system for the Greater Dublin Area and the need for the project has been described in details in Chapter 3 of EIAR Background of the Project and 3.6 Need for the Project. Glasnevin is a major interchange station for Metro and DART. Demolition of concerned property and the landtake for access/egress is required for the Metrolink works and for the integration with DART to serve as an Interchange Station.</p> <p>As noted in the Planning Report that forms part of the Railway Order documentation, a station is Permissible under the Z3 zoning of the lands, and will directly deliver objective SMT017 of the Dublin City Development Plan 2022-2028.</p> <p>Please refer to response Item number (9) above with regard to development opportunities.</p> |

| Re: Planning Observation ABP Ref. No. NA29N.314724 - Railway (Metrolink - Estuary to Charlemont via Dublin Airport) Order |                                                                    |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| 14                                                                                                                        | 6.3 Proportion of Lands to be Acquired (page 20 of the Submission) | 22       | The full impact of the proposal on our clients' premises has not been adequately demonstrated in the submitted documentation as it does not include an aerial overlay of the scheme and the fact that the full building is to be demolished is not fully accurate. Such a drawing would have made it more evident to An Bord Pleanála that the scheme directly abolishes the operations of the business.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | The full impact (as noted in comments above) has been demonstrated in the draft Railway Order documents. Relevant drawings are provided within the Railway Order Submission. Please refer to the Property Drawing (Plan Number: ML-P 304 N-O) and the related Alignment Drawing (ML-RO-304-N-O) which annotates the extent of proposed acquisition of land and buildings to be demolished which includes Brian Boru House at 5 Prospect Road.                                                                                                                            |
| 15                                                                                                                        | 6.3 Proportion of Lands to be Acquired (page 20 of the Submission) | 22       | As acknowledged in the Planning Report submitted with the Railway Order Application, our client's premises will be subject of land acquisition which is considered to impact on quite a significant amount of our clients lands. The lands to be acquired affects our client's lands comprises approximately 3,217sq.m, consisting of: parcels of lands sizing at 35sq.m, 64sq.m, 125sq.m, 160sq.m and 708sq.m currently in use as a car park and a parcel of land sizing at 2,125sq.m comprising the Brian Boru public house. Our clients are set to lose their property and livelihood which has operated for a significant number of years. The public house is an easily identifiable business in Glasnevin which has operated since 1904. The business has significant local importance while also being contained within a historic building. Its demolition is unwarranted and unjust and will have irreversible impacts on the streetscape as well as our clients.                                                                                                                                      | Further to response item numbers (3) and (13) above, the buildings and subject lands are being acquired to deliver an integrated station for MetroLink and Dart + services. The details of the interchange station proposed at this location, which has been carefully considered, are fully described in the EIAR, please refer to Structure Drawings Book 2 of 3 Dublin City Council, sheets 21 to 28 (ML1-JAI-SRD-ROUT_XX-DR-Y-02057 to 02064).<br><br>Please see response to item number (4) above in relation to the loss to business, relocation and compensation. |
| 16                                                                                                                        | 7.0 Conclusion (page 20 and 21 of the Submission)                  | 22&23    | The proposed railway has been designed without due regard to our client's existing property and business at Hedigan's Brian Boru Public House located Prospect Road, along the route. This business has existing in some extent since 1906 and has become well renowned within the area by locals and tourists alike. The scheme seeks to demolish our clients' property resulting in a significant loss, both financially and also sentimentally. The proposal results in unmeasurable impacts arising from the loss of their business and property. The lands subject to the acquisition are considered to be disproportionate and severely impacts any development potential of lands remaining within our clients' ownership.                                                                                                                                                                                                                                                                                                                                                                               | Please refer to response item number (15)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| 17                                                                                                                        | 7.0 Conclusion (page 21 of the Submission)                         | 23       | As per the document prepared by Dermot Flanagan S.C., the following conclusions may also be made:<br>No attempt has been made to return land to the landowner post construction;<br>The construction compound is not a justification for the acquisition of the full landholding;<br>The design of access/egress to the rear is an overprovision and sterilises the development opportunity offered to the rear of the station;<br>There has been a failure to consider alternative designs and the minimisation of land acquisition;<br>There has been a failure to integrated the development potential of the landholding, along with the construction of the station; There has been a failure to secure the planning policy objective for the area in a consistent and transparent manner;<br>There has been failure to adequately assess the impacts of the proposed Metrolink, either at construction or operational phases; and<br>There has been no attempt to seek to return land to the landowners such that a disproportionate acquisition arises, in breach of constitutional and ECHR principles. | These concerns have been responded to individually. Please refer to response item numbers (18 ), (19), (20) and (22).<br><br>As part of TII response to loss of business, relocation and compensation, please refer to response items (4) and (15).                                                                                                                                                                                                                                                                                                                      |

No. NA29N.314724 - Railway (Metrolink - Estuary to Charlemont via Dublin Airport) Order |                                                                                  |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 19                                                                                                                        | Appendix A, Memo prepared by Dermot Flanagan, Barrister-at-Law, point 1 (page 2) | 26       | <p>It is submitted that the acquisition of land contained in the Schedule to the Railway Order comprising the entirety of the landholding is disproportionate and excessive in the following circumstances the footprint of the station proposed that this location represents a portion of the landholding. The balance of the land acquired appears to be for the purposes of a construction compound and following the construction phase, for access/egress to and from the station.</p> <p>Despite various discussions with the landowner in relation to the proposed acquisition, no opportunity has been given to the landowner to enter into an arrangement or agreement with TII in relation to the potential redevelopment of the site of the station or the balance of the site post construction;</p> | Please refer to response item number (4) and (15) above.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| 20                                                                                                                        | Appendix A, Memo prepared by Dermot Flanagan, Barrister-at-Law, point 2 (page 2) | 26       | <p>The proposed development has not considered any alternative design or access/egress arrangements at this location.</p> <p>It would appear that the primary justification for the acquisition of the entirety of the property is as a construction compound during the lengthy construction phase.</p> <p>The proposed development has not considered the alternative design elements for the proposed permanent station as discussed at Paragraph 7.6.5 of Chapter 7 of the EIAR.</p>                                                                                                                                                                                                                                                                                                                          | <p>The location of the impacted property is at the location of the proposed Metrolink Station which integrates with the DART + and forms a major interchange for public transport. No other alternatives afford such an interchange. Demolition of concerned property and the landtake for access/ egress is required for the Metrolink works and for the integration with DART + to serve as an Interchange Station.</p> <p>The construction activities will progress over an extended period requiring the lands referred to. The construction site area is highly constrained bounded by residential developments to the north and the railway and canal to the south and there is no scope to reduce this area further.</p> <p>Chapter 7: Consideration of the Alternatives, section 7.6.5 Drumcondra v Glasnevin describes the rationale for the final location selection of an interchange station for MetroLink and Dart +. The design presented in the EIAR supporting the draft Railway Order represents the preliminary station design within the available lands assessed for the purpose of the Railway Order. Alternative design elements that might become feasible for development post completion of MetroLink were not considered for the EIAR and Railway Order.</p> |
| 21                                                                                                                        | Appendix A, Memo prepared by Dermot Flanagan, Barrister-at-Law, point 3 (page 3) | 27       | No opportunity has been provided to the landowner for an alternative design that would integrate with the balance of the land in question having regard to its significant pre-existing development potential. In referring to the consideration of alternatives at Table 7 - 19, it is regarded as the only feasible option.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | Please refer to response Item number (20) above.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| 22                                                                                                                        | Appendix A, Memo prepared by Dermot Flanagan, Barrister-at-Law, point 4 (page 3) | 27       | It is submitted that there has been a failure in this design to consider the integration of the new station with the rear area comprising the existing carpark of the Hedigan's Brian Bora Public House such that its pre-existing development potential is maximised in conjunction with the construction of the new station at Glasnevin.                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | The location of the impacted property is at the location of the proposed Metrolink Station which integrates with the DART + and forms a major interchange for public transport. Demolition of concerned property and residual car park area is required for the Metrolink works and for the integration with DART + to serve as an Interchange Station including for access/ egress. The existing car park at the rear is required for overall Metrolink works including drop-off for accessible vehicles, access to maintenance vehicle, cyclists parking, utilities and drainage works.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

| Re: Planning Observation ABP Ref. No. NA29N.314724 - Railway (Metrolink - Estuary to Charlemont via Dublin Airport) Order |                                                                                  |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                                                                                      |
| 23                                                                                                                        | Appendix A, Memo prepared by Dermot Flanagan, Barrister-at-Law, point 6 (page 4) | 28       | It is submitted that this is a disproportionate acquisition of land with pre-existing significant development potential in conjunction with the provision of the station. There has been a failure to consider alternative designs and/or alternative acquisitions to the east and west of the Hedigan Brian Boru Public House and related carpark facilities such that portion of the land could be retained by the landowners post construction to facilitate high density development, consistent with the overall planning and transport objectives of the Project. | Please refer to response Item numbers (20) and (22) above.                           |
| 24                                                                                                                        | Appendix A, Memo prepared by Dermot Flanagan, Barrister-at-Law, point 7 (page 5) | 29       | It is submitted that alternative designs, with the acquired and retained lands, would reduce this impact by retaining part of the landholding post construction, for development in accordance with the land uses and zoning objectives for the area.                                                                                                                                                                                                                                                                                                                   | Please refer to response Item numbers (20) and (22) above.                           |
| 25                                                                                                                        | Appendix A, Memo prepared by Dermot Flanagan, Barrister-at-Law, point 8 (page 5) | 29       | It is submitted that insufficient analysis has been given of the manner in which this could be mitigated by retaining portion of the Hedigan landholding for potential redevelopment albeit whether as residential, commercial or other consistent with the provision of the station to the front.                                                                                                                                                                                                                                                                      | Please refer to response Item number (20) above.                                     |
| 26                                                                                                                        | Appendix A, Memo prepared by Dermot Flanagan, Barrister-at-Law, point 8 (page 5) | 29       | While it is stated that the loss of the Brian Bonu premises due to acquisition will result in a negative significant permanent effect, the only response is that compensation will be in place reducing the impacts to negative/permanent.                                                                                                                                                                                                                                                                                                                              | Please refer to response item number (4) and (15) above in relation to compensation. |
| 27                                                                                                                        | Appendix A, Memo prepared by Dermot Flanagan, Barrister-at-Law, point 8 (page 5) | 29       | It is submitted that this is a wholly inadequate response in circumstances where the land use has significant pre-existing potential and where a re- design would allow a retention of portion of the landholding to the rear of the proposed Glasnevin station thereby allowing a collaborative approach to redevelopment of the rear carparking area consistent with high density development for the benefit of both the retained and acquired lands.                                                                                                                | Please refer to response Item numbers (20) and (22) above.                           |

| Submission No.                                                                                                            |                                                                                  |          | 112                                                                                                                                                                                                                                                                                                                                                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

No. NA29N.314724 - Railway (Metrolink - Estuary to Charlemont via Dublin Airport) Order |                                                                                  |          |                                                                                                                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| 28                                                                                                                        | Appendix A, Memo prepared by Dermot Flanagan, Barrister-at-Law, point 8 (page 5) | 29       | It is submitted that it cannot be said that there is a medium term impact to the landholding. The impact is profound, negative and long term in circumstances where there has been a failure to consider alternative designs and alternative acquisitions which would minimise that impact. The assessment is in breach of the EIA Directive as transposed into domestic law. | <p>The EIAR has taken a considered view and weighed the undoubted benefits of the MetroLink station at Glasnevin to the community against the loss of the Brian Boru..</p> <p>As presented in Table 21.6 of Chapter 21 (Land Take), it is stated that there will be a permanent land take and demolition of the Brian Boru public house and car park to allow for the construction and operation of Glasnevin Station and interchange with Irish Rial. The impact magnitude of this is stated as 'High', leading to a 'Very Significant' impact on the this property and land.</p> <p>In Chapter 11 (Population and Land Use), it is stated that the impact on population and land use during the construction works at this location is considered negative, significant and medium term. It is considered a medium term impact on population and land use as in the long term, the Glasnevin station in the operational phase will bring considerable benefits to the surrounding population. As stated in response item (16) above, MetroLink stations will also be a catalyst for surrounding development in the area, and therefore the surrounding population and land uses will benefit greatly from its presence</p> |

| Reference number: NA29N.314724         |              |          |                                                                                                                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| 1                                      | Letter       | 1        | Firstly, we would like to state that we do not object to the MetroLink project which will provide much needed public transport links with the city centre. However, we do object to the destruction of the Markievicz Leisure Centre and 78 homes.                                                                     | TII wish to thank you for your submission and stated support for the delivery of the MetroLink Project. TII also acknowledge your concerns around the demolition of the College Gate Apartments and the Markievicz Leisure Centre. Please refer to response (2) below in relation to the Markievicz Leisure Centre. Please refer to response (3) below in relation to the alternatives considered for Tara Street Station, and the reasons why the proposed location has been identified as the preferred option.                                                                                                                                                                                                                                                                                              |
| 2                                      | Letter       | 1        | We are a mother and son who each use the swimming pool and gym 3-4 times weekly. It is a key part of our lifestyle. It was upgraded a few years ago and is very well run and a great amenity. We meet many regular users who either live or work locally. It is an especially important social space for older locals. | TII acknowledge the amenity value provided by the Markievicz Centre. TII will continue to work with DCC in relation to the development of an alternative sports and recreational facility to replace the Markievicz leisure centre and intends to fund the alternative. However, TII does not have control over that development, which is part of DCC's function to provide public sport and recreational facilities in its function area. DCC may or may not be in a position to deliver it in parallel with the MetroLink project. Accordingly, the Board should assess the MetroLink project on the basis that the alternative may not be available. The impact would then be significant, but nonetheless one that would not outweigh the strategic scale long term benefits that MetroLink will deliver. |

| 3                                      | Letter       | 1        | <p>In a time of a housing crisis, it seems madness to demolish 78 homes which are in good condition. We are particularly concerned that alternatives to the demolition were not properly considered, with Transport Infrastructure Ireland stating from the outset that they would be demolished.</p> | <p>Please refer to response item (4) below in relation to the consultation with residential property/landowners and residents associations that has taken place throughout the duration of the Project.</p> <p>TII acknowledge the significant impact of the proposed project at this location and have fully examined numerous options to avoid said impacts.</p> <p>Chapter 07 (Consideration of Alternatives) details the decision-making process that has led to the development of the proposed Project, including the route alignment and station locations. Appendix A7.2 Tara Street Station Report presents in detail the various options that were considered by TII for this location.</p> <p>Concerns had been raised during the public consultation on the Emerging Preferred Route (EPR) regarding the demolition required for the station in the location proposed, and concerns were again raised during the consultation on the Preferred Route. A number of alternative station locations were considered to try and address these concerns. Option 0 is the proposed station location, with a further 11 options assessed. Three options as submitted by College Gate residents, with the station relocated either to the north or south of the EPR proposed location, have been reviewed in detail. In addition, other options developed through the Preferred Route design process including a mined option and realignment of the route to the east of Tara Street Station have also been reviewed. All were assessed against the EPR proposed station location (Option 0) as a base case, adjusted to suit the single bore and reduced station box length.</p> <p>The various options were taken through a Mutli Criteria Analysis to compare aspects of each different option. Assessment of options considered the viability of the rail alignment, the quality/ease of interchange with Tara DART Station (a key requirement given that this will be one of the busiest stations on MetroLink with high passenger interchange with the DART), demolition/construction impacts (including minimising impacts on the existing DART infrastructure/operations), other environmental and planning issues, including traffic and utility impacts, and urban integration, health and safety issues, and potential construction costs.</p> <p>A mined station option at Tara was considered as a solution to avoid the demolition of the College Gate building. The option comprises the construction of two deep shafts either side and immediately adjacent to the College Gate apartments to provide construction access for mining the tunnel under College Gate apartments and to subsequently provide permanent access, ventilation and back of house facilities for the operation of the station. It was established that 24-hour working would be the only realistically feasible approach to construct the cavern beneath the building. Therefore, the nature of the work, drill and blast with mechanical excavation would generate a level of groundborne noise and vibration which would mean it would not be possible to reasonably inhabit the College Gate apartment block due to the disturbance caused. This would lead to a relocation of residents for a minimum of two years.</p> <p>However, there are possible risks that could extend the duration further, and therefore this option has a similar impact on College Gate residents as the cut and cover preferred option. TII consider that when balanced against the significant direct construction cost increase compared to the preferred cut and cover option, that demolition and redevelopment of the area around the site of the proposed Tara Station as part of the wider integrated development and regeneration of the site provides a better option.</p> <p>This assessment has identified that for a number of reasons including constructability, cost, and retention of a good interchange facility, that Option 0, including demolition of College Gate and Markiewicz Centre, remains the preferred station location:</p> <ul style="list-style-type: none"><li>* This location retains a good interchange facility with Tara DART Station;</li><li>* It reduces risk to the overall construction programme;</li><li>* It offers cheaper overall construction cost;</li><li>* It retains opportunity for future adjacent development by others;</li><li>* Mitigation for the loss of the College Gate apartments is being addressed as part of the Project with the support of DCC. In particular, TII, in consultation with DCC, will support rehousing and provide compensation for the loss of the residential units.</li></ul> |

| Submission No.                         |              |          | 113                                                                                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

| 4                                      | Letter       | 1        | We are concerned that financial considerations are being put ahead of the needs of the city centre community. | <p>Please refer to response item (3) in relation to the multi-criteria assessment of alternative options (considering their environmental, social and economic impact), and the reasons for identification of the proposed location as the preferred option.</p> <p>A station at Tara Street provides good interchange opportunities, serves important key trip attractors in the study area with high potential passenger trips. This option also takes a direct and short route through areas of high demand in the centre of the study area.</p> <p>As Dublin's public transport network grows through the implementation of higher capacity bus routes, more frequent heavy rail services and coverage, and the expansion of the light rail network it is critically important that to achieve the full benefits and capitalise on these investments that they are integrated fully where appropriate to attain "the network effect". High quality interchanges can significantly broaden the transport offer for their catchment and add to the appeal and attractiveness of sustainable transport by ensuring that people can easily change services to access a wider range of places by these modes, and each scheme should be designed to ensure that these are as seamless as possible.</p> |

| Re: Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022 Case Refernece Number NA29N.314724 13/01/2023 |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 1                                                                                                                         | Letter       | 1        | Firstly, in general, I am in favour of the broad aim of the Metrolink project to connect Dublin's city centre to our national airport. However, as a resident living in the Dartmouth/Charlemont area, I wish to set out a number of observations for the Board regarding the proposal to locate the terminus station at Charlemont-Dartmouth. My family home is in the midst of the community where the Terminus station is proposed to be located. | Thank you for taking the time to make a submission and your overall endorsement of the MetroLink Project with the exception of Charlemont Station. We have reviewed your submission and responded to the observations made below.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| 2                                                                                                                         | Letter       | 1        | 1. Charlemont is the incorrect strategic location for a Terminus hub and spoke system as it is too far out along the Luas Green Line spoke and would prejudice future options for integration of networks and services.                                                                                                                                                                                                                              | <p>TII do not agree that Charlemont is the incorrect location for an interchange with the Luas Green Line or that it prejudices future options for integration with the wider transport network for the reasons set out below.</p> <p>The connection from St Stephens Green to Charlemont / Ranelagh is supported by the previous Transport Strategy for Greater Dublin Area (2016-2035) and the current Transport Strategy for Greater Dublin Area (2022-2042). The latter considers a range of options for the onward extension of MetroLink to meet the demand for travel over the period of the strategy. This includes consideration of the need for the upgrade of the Luas Green Line to metro with a metro extension to Dublin south west, south or south east. Whilst the strategy envisages that further extensions will be delivered after 2042, MetroLink which terminates at Charlemont allows for the possible extension of the metro in all the above directions.</p> <p>The proximity of the metro to the Luas line at Charlemont provides for a positive customer experience for all users with short interchange distance and due to the proximity, clear wayfinding and high visibility of the interchange. The interchange arrangements at Charlemont provide for significantly better interchange arrangements compared to an interchange at St Stephen's Green Station.</p> <p>The section of MetroLink route between St Stephen's Green and Charlemont Stations contributes significantly to the overall benefits of the scheme. It serves a significant area of the south city of Dublin and offers enhanced access from the local area to the city centre and a direct connection to Dublin Airport. It serves key trip attractors including residential areas and offices / workplace locations, with high passenger boarding and alighting figures in the peak hours. During the morning peak, at Charlemont station the flows include 1,800 passengers alighting, 2,300 boarding and 1,229 passengers alighting, 2,276 boarding during the evening peak. The passenger numbers contribute significantly to the overall benefits of the scheme and the effect of these benefits outweigh the additional costs that are associated with the delivery and operation of the section from St Stephen's Green to Charlemont station.</p> <p>The location of the interchange at Charlemont does not preclude onward extension south. -An interchange at Charlemont is supported by policy including the Dublin City Development Plan 2022 - 2028 and the Transport Strategy for the Greater Dublin Area. As noted by the GDA Transport Strategy 2022-2042, section 12.3.2, "Charlemont offers the optimal location for the primary interchange with the Green Line in response to growing demand in the longer term and is an appropriate location to facilitate any potential future metro extensions to serve the south west, south or south east of the city region should sufficient demand arise."</p> <p>By extending MetroLink to Charlemont it provides for future proofing of the Green Line, bypassing the capacity constrained Luas on-street running section, and ensures potential future connectivity options are enabled, either to the Green Line or for extensions of the metro.</p> <p>The Charlemont Station interchange provides for increased passenger utilisation of the MetroLink system, thereby increasing the benefits delivered by the Project, reflected by an improved Project Benefit Cost Ration (BCR).</p> |

| Re: Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022 Case Refernece Number NA29N.314724 13/01/2023 |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| 3                                                                                                                         | Letter       | 1        | <p>St. Stephens Green is the most appropriate location as it provides for interchange with bus, Luas and future DART underground. The project incorrectly dismisses St. Stephens Green West as an appropriate terminal station. It only considers St. Stephens Green East and Charlemont. Furthermore, no comprehensive study or investigation has been completed by NTA/TII as part of the entire Metrolink project on the optimal location for a city-centre terminus.</p> | <p>TII do not agree that St Stephen's Green is the most appropriate interchange location for the reasons set out by response (2) above.</p> <p>It is not correct to say that the Project "only considers St. Stephens Green East and Charlemont." A number of route options were considered in the process of identifying the Emerging Preferred Route (EPR). These route options included potential station locations on St. Stephen's Green West. A station on St Stephen's Green West is not preferred for several reasons:</p> <p>If a station was placed on St Stephen's Green West, the alignment between the proposed Tara Station and a station on St Stephen's Green West would result in an undesirable horizontal reverse curve and an alignment greater than a 1000m long that would necessitate an intermediate intervention shaft located somewhere between these stations to comply with the MetroLink Fire Strategy. Additional construction would be required to provide such a facility, similar in size to the proposed Albert College Park Intervention shaft. This could feasibly be situated in the Trinity College Dublin sports grounds.</p> <p>TII note that it is Government policy to provide a station and interchange with the Luas Green Line at Charlemont, as set out by the GDA Transport Strategy 2022 – 2042. Should a station be placed on St Stephen's Green West, the alignment between a station located here and the proposed Charlemont Station would also result in an undesirable horizontal reverse curve and an alignment that is greater than 1000m long, and would thus again require an intervention shaft similar to the proposed Albert College Park Intervention shaft to be provided. This would be expected to result in significant demolition and redevelopment in an existing built-up area.</p> <p>In both cases, compared to the proposed alignment that runs much more directly between Tara, St Stephen's Green and Charlemont, the additional length of tunnel and the addition of two intervention shafts generated by locating a station on St Stephen's Green West is uneconomic in comparison.</p> <p>As a potential station location, St Stephen's Green West itself is a very constrained location due to the presence of buildings, Luas and St Stephen's Green Park. Maintaining the Luas operational during station construction would be complex and challenging with significant disruption expected, whilst the impacts on St Stephen's Green Park would be greater for a station in this location compared to the proposed location on St Stephen's Green East. This would be the result of; the likely need to place more of the station in the Park compared to the proposed station on St Stephen's Green East; it would impact an area of the Park that has greater amenity value than St Stephen's Green East due to the nearby Park entrance adjacent to the southern end of Grafton Street, and there would be a risk of impacting the existing Park lake.</p> <p>In summary, an alignment that links the proposed Tara, St Stephen's Green East and Charlemont stations is a more direct and economic alignment, does not require additional intervention infrastructure, avoids a complex engineering interface with the Luas Green Line, impacts the Park less and has less potential for disruption during the construction phase.</p> <p>As outlined by EIAR Chapter 3, Background to the MetroLink Project, one of the key objectives of the Project is the integration of it with the wider transport network that also includes for BusConnects and DART+ which are all included under Project Ireland 2040. Together, these projects will result in a reliable, sustainable, affordable, integrated public transport network that will support the economy, help Ireland meet its climate change targets in line with Climate Action Plan 2023 and make Dublin a more liveable and sustainable city.</p> <p>Arising from the decision to postpone the future upgrade of the Green Line to metro services, it is being argued that Charlemont station effectively becomes a terminus station in the short to medium term. In this regard, it is true to say that the Metrolink trains will terminate and turn back at Charlemont station, however the public transport service offering for passengers does not terminate, it transfers from Metrolink to LUAS as part of the integrated transport network.</p> |

| Re: Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022 Case Refernece Number NA29N.314724 13/01/2023 |              |          |                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
|                                                                                                                           |              |          | Response (3) continued | <p>The terminus station for MetroLink is located at Estuary where all of the activities normally associated with a terminus take place. At this location the high capacity public transport offering terminates and the public transport offering transfers to a completely different mode, i.e. Bus . The environmental effect of the Metrolink terminus are accordingly assessed in the EIAR. Charlemont Station does not have the associated infrastructure and services associated with a terminus location and in fact has more in common with a “system turn back location”. Charlemont Station is located within an area of high public transport accessibility, linking with the Luas Green Line which offers reasonably similar levels of services and frequency for journeys to and from the south of Dublin. As such, public transport service offering is not considered to terminate, but transfers onto the similar service offered by the Luas Green Line, forming part of a transport corridor running from Cherrywood to Estuary. The associated environmental impacts for the turnback and station at Charlemont have been fully assessed in the EIAR.</p> <p>Charlemont station itself was chosen on the basis of its interchange potential with Luas, as well as local bus services, as outlined above. The section of the line between St Stephen's Green and Charlemont generates considerable benefits for the scheme in terms of increased patronage. The fact that the Charlemont Station is now being referred to and considered as a “terminus station” rather than an interchange station, does not increase the environmental impacts the station has on its local environment, in terms of passenger demand, airborne noise. vibration and other environmental effects.</p> <p>If the scheme were to terminate at St Stephen's Green, it would be important to determine where the next station south of St Stephen's Green would be located for a future extension as required in the Draft Transport Strategy for Greater Dublin Area (2022-2042). With single bore tunnel configuration, the maximum distance between stations is 1,000m. If the distance between stations extends beyond 1,000m there is a need for an intervention shaft or separate escape tunnel. Selecting a different station location other than Charlemont within a 1,000m arch south of St Stephen's Green Station will be challenging given the limited space available for a station within this area and it is reasonable to assume that the Station may be located outside the 1km arch, thus requiring the construction of an intervention shaft similar to that currently proposed at Albert College Park between St Stephen's Green and the proposed station location.</p> <p>The proposed route alignment from Estuary to Charlemont is consistent and compliant with the GDA Transport Strategy 2022-2042 (published in January 2023) in which states that the south city terminus at Charlemont offers the optimal location for interchange with the Green Line in response to growing demand in the longer term and is an appropriate location to facilitate any potential future metro extensions to serve the south west, south or south east of the city region should sufficient demand arise.</p> |

| Re: Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022 Case Refernece Number NA29N.314724 13/01/2023 |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| 4                                                                                                                         | Letter       | 1        | 2. Expensive Duplication of Rail infrastructure: - The inclusion of an expensive and costly section between St. Stephens Green and Charlemont is strategically weak and duplicates the existing Luas Green Line services. NTA's cost estimate for this 1km section at €650M is an expensive duplication and significant investment that deprives other parts of Dublin that are in immediate need of rail infrastructure to support urgently required housing and urban development. | <p>TII do not agree with this statement for the reasons set out by response (2) above, noting that infrastructure is not being duplicated given the capacity of the Luas south from St. Stephen's Green is restricted due to on-street running.</p> <p>There is a limit to the potential of the Luas to provide additional capacity in the on-street non-segregated section of the Luas Green Line from Charlemont northwards through the city centre. The nature of this route and the fact that it currently crosses several road junctions (Adelaide Road, Harcourt Street / Hatch Street upper and Harcourt Street / St Stephen's Green south) limit the service to a maximum of 24 trams per hour per direction. The projected demand for this section would require a higher frequency of up to 30 trams per hour and this demand cannot be met with on-street systems (Luas / bus). The interchange between Luas and MetroLink proposed at Charlemont will provide the necessary capacity to address the demand on this corridor and reduce overall travel time for passengers</p> <p>There is also high passenger demand forecast for a Metrolink station at Charlemont, including from the Ranelagh area, which would be lost if St. Stephen's Green was the MetroLink southern interchange station. The additional fare revenues collected by the Charlemont Station interchange increase the benefits delivered by the Project, reflected by an improved Project Benefit Cost Ratio (BCR).</p> <p>Further, to ensure that public investment delivers value for money, the Public Spending Code sets out requirements for the evaluation, planning and management of public investment. The preparation of a Business Case is a key element of meeting these requirements. The Public Spending Code requires that both the Preliminary Business Case and Final Business Case for public investment projects are published.</p> <p>In July 2022, the Government granted Approval in Principle to the NTA to enable the submission of a railway order application by TII to An Bord Pleanála in respect of the MetroLink project (Decision Gate 1). This approval was granted after the Preliminary Business Case (PBC) had undergone significant scrutiny and challenge by bodies that are independent of TII, including DoT and DPER review (including independent review by JASPERS and the Major Projects Advisory Group (MPAG)) of the PBC around timeline, costs and benefits that were updated to inform the Government decision.</p> |
| 5                                                                                                                         | Letter       | 1        | 3. The station box at Charlemont, as constructed in 2021/22 by the Developer Hines, does not have the benefit of planning permission and has not been part of the EIA undertaken for this project. Processing the current Railway Order application, which is reliant on these preliminary and now constructed works, is legally unsafe and contravenes the provisions of the EIA Directive.                                                                                         | The MetroLink enabling works constructed as part of the Hines development was included in the planning application for the Hines Development and has the benefit of planning permission which was granted in April 2019.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

| Re: Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022 Case Refernece Number NA29N.314724 13/01/2023 |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| 6                                                                                                                         | Letter       | 1        | <p>4. The station box at Charlemont will result in only one possible future tie in with the Luas Green Line to the south, which would result in an option that was previously dismissed as part of the Tie-In study from March 2017. No alternatives to the station box at Charlemont were considered as it had been fixed through the design of the overhead Hines Grand Parade commercial development.</p> <p>The implications of this new alignment is very significant on our wider community as it will involve top-down construction that will only be possible when many houses on Manders Terrace, Oakley Road and Charleston Road are demolished.</p> | <p>The station box at Charlemont allows for a future tie into the Luas Green Line should it be determined in the future that through running metro services to Sandyford is the required solution to address the public transport needs to the south of the city. It is incorrect to say that the current proposal is based on an option that was previously dismissed as part of the March 2017 Green Line tie in study. The station design is in affect a modification to the preferred Green Line Tie Option 4B which was modified as result of the postponement of the upgrade of the Green Line to metro standard.</p> <p>The station box location was not fixed by the Charlemont Development. The preferred route for MetroLink was published in March 2019 following a comprehensive route options study. The preferred route was based on the emerging preferred route for the scheme which included a station at Charlemont. The Charlemont Metro Enabling Works were constructed to enable the Charlemont Development to proceed whilst simultaneously ensuring there was an option available to construct a station at Charlemont that avoided unnecessary demolition, took advantage of an available site, provided infrastructure that is integrated with planned development rather than necessitating later changes and retrospective adjustments to a new development or even possible demolition of the new development, whilst providing protected provision for the future extension of the scheme south, if required.</p> <p>It is also important to recognise that the station location at Charlemont is influenced by available vacant land and thus avoids unnecessary demolition.</p> <p>It is agreed that the short-term implications for local residents will be significant as the scheme progresses through the construction stage, however the EIAR assesses the environmental impacts of the construction phase and commits to the implementation of appropriate mitigation measures that reduce the environmental impacts to not significant. The same is true of the operations phase for the project. TII will work closely with local residents to ensure the required mitigation measures are put in place.</p> <p>If in the future, the metro was extended south, this does not mean that inevitably open cut construction will be required or demolition of property will be necessary. It is possible that in the event of a tunnel being constructed to connect to Charlemont Station that this would be undertaken from a site further south.</p> |
| 7                                                                                                                         | Letter       | 2        | <p>5. The Environmental Impact Assessment is inadequate in relation the description of development, alternatives, transport assessment, noise and the cumulative effects of the development on the Charlemont-Dartmouth Community. For a project of this size, scale, investment to date, it is inadequate to propose a Railway Order with so many important studies and analysis missing.</p>                                                                                                                                                                                                                                                                 | <p>TII do not agree that the Environmental Impact Assessment is deficient, inadequate or missing information. The Railway Order application comprises a very detailed environmental impact assessment that has identified and assessed the potential environmental impacts of MetroLink and proposed mitigations for these impacts where necessary. TII would also draw attention to the detailed project description, construction phase description and operational phase description provided in EIAR Chapters 4 and 5 and 6, and EIAR Chapter 7 and associated appendices that present details of alternatives considered. EIAR Chapter 9 and appendices provides a detailed analysis of transport and traffic effects, and EIAR Chapters 13 Airborne Noise &amp; Vibration, and 14 Groundborne Noise &amp; Vibration provide a detailed assessment of potential noise and vibration effects, while Chapter 29 outlines the assessment of interactions between various environmental aspects, and Chapter 30 covers the cumulative impacts with other projects.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

| 8                                                                                                                         | Letter       | 2        | 6. The development would result in noise and disturbance during the construction and operational phases and would result in a loss of amenities for the area. | <p>The EIAR presents a comprehensive and detailed assessment of both groundborne and airborne noise and vibration in Chapter 13 and 14 of the EIAR. The assessments include for predictive modelling in order to identify the potential impacts on all sensitive receptors during both the construction phase and the operational phase.</p> <p>Noise and disturbance during construction:</p> <p>No profound impacts have been identified for residents and mitigation measures proposed will be effective at reducing the impacts on these properties and in general terms impacts will be associated with the construction phase only. Significant mitigation is proposed to include 4m high noise barriers and further proposed mitigation in line with the Airborne and Groundborne Noise Mitigation Policy. On the implementation of these measures the residual impacts are predicted to be moderate. However, as outlined in Transport Infrastructure Ireland (TII) Airborne and Groundborne Noise Mitigation Policy (Appendix A14.6) there is a process in place whereby further mitigation measures can be implemented at individual properties should this be merited.</p> <p>Noise and disturbance during operation:</p> <p>No residual noise impacts are identified at this location during operation. The calculated rail noise levels across the proposed Project are not significant in terms of any widespread community disturbance and results in a not significant to slight impact when added to the prevailing noise environment.</p> <p>Loss of amenity during construction:</p> <p>EIAR Chapter 11, Population &amp; Land Use provides an assessment of effects on community amenity during construction and operation, which relates to the interaction of impacts on air quality; visual amenity; traffic and transport; and noise and vibration.</p> <p>At this location during construction as outlined in Section 11.5.2 of Chapter 11, no impacts are identified on the retail sector or community and social infrastructure (e.g. schools or hospitals). Any severance/disruption to transport will be limited by site mitigation measures such as alternative routes reducing impacts to not significant.</p> <p>Loss of amenity during operation:</p> <p>No significant residual negative impacts are anticipated on the Population and Land Use from the operation of the proposed Project, following the incorporation of the mitigation measures into the design of the proposed Project and implementation on an ongoing basis throughout the lifecycle. The residual effects that will arise during operation will be permanent and positive as detailed in EIAR Chapter 11, section 11.1.1.</p> <p>The zoning under the Dublin City Development Plan 2022 - 2027 for the residential properties in question is "Z2 Residential Neighbourhoods (Conservation Areas)" with an objective to "protect them from unsuitable new developments or works that would have a negative impact on the amenity or architectural quality of the area (See Table 3.11 of the submitted Planning Report). As outlined in Section 4.5.18.6 of the Planning Report, the element of the Project within the Z2 zoning area will affect a below ground area only and as such will not compromise the land use objective for the lands overhead. The majority of the proposed Charlemont Station and all above ground elements are located within the lands zoned Z5 with the objective "To provide for the creation and protection of enterprise and facilitate opportunities for employment creation". The Station has been designed so that it is integrated with the proposed redevelopment of this site by a third party development, and as such, demonstrates that the proposed Project is consistent with the zoning objective. The MetroLink station design does not result in any segregation of the area, with no surface barriers or walls proposed.</p> |

| Re: Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022 Case Refernece Number NA29N.314724 13/01/2023 |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| 9                                                                                                                         | Letter       | 2        | <p>The Traffic Study for the local Charlemont area is wholly inadequate as it omitted the modelling of the impact of Airport users coming to the only Dublin South Metrolink station at Charlemont. The Traffic Study uses a strategic, generalised regional model that does not take local factors into account.</p> <p>Extract from observation 7) - The EIA did not properly assess the impact of additional local traffic volumes, rather they used a generalised regional model that does not take local factors into account. A key local factor at a Terminus station in Charlemont that runs to the Airport is the huge volume of anticipated airport users from Dublin South and greater Dublin/Leinster that will come to Charlemont via car or taxi with luggage for onward destination to the airport. Grand Parade and the residential area around Charlemont-Dartmouth cannot sustain the significant additional traffic volumes associated with this development.</p> | <p>The MetroLink forms part of an integrated public transport network. The system is designed in an integrated manner so that people travelling from the area south of Dublin to access locations north of Charlemont, such as Dublin Airport, Mater, Swords etc. will utilise public transport to interchange with the MetroLink, or will walk or cycle to access their local station. The system is not designed to encourage people to drive to stations within the City and TII actively discourage people from doing so other than the Park &amp; Ride station at Estuary. TII therefore do not agree with the observation that there will be a “huge volume of anticipated airport users from Dublin South and greater Dublin/Leinster that will come to Charlemont via car or taxi with luggage for onward destination to the airport” as this is not borne out by our transport analysis.</p> <p>The Transport Assessment for MetroLink includes for people travelling to/from Dublin Airport from all areas within the extents of the GDA area, therefore it is incorrect to say "The Traffic Study for the local Charlemont area is wholly inadequate as it omitted the modelling of the impact of Airport users coming to the only Dublin South Metrolink station at Charlemont".</p> <p>The NTA's Eastern regional Model (ERM) incorporates a wide range of data sources, including demographic data, land use data, transportation network data, and travel survey data. The system is designed to model a variety of transportation modes, including private vehicles, public transit, walking, and cycling, and to simulate the interactions between these modes. The ERM model has been validated and calibrated using a range of localised data sources to ensure that the model can accurately represent the transport network, these include public transport and vehicle counts from the canal cordon counts. The outputs from the model have been combined with local survey data to undertake the more localised modelling, such as the pedestrian impact assessments, or the local traffic signals. This does not support the observations made "The Traffic Study uses a strategic, generalised regional model that does not take local factors into account." or "The EIA did not properly assess the impact of additional local traffic volumes, rather they used a generalised regional model that does not take local factors into account."</p> <p>Regards the observation there will be a "huge volume of anticipated airport users from Dublin South and greater Dublin/Leinster that will come to Charlemont via car or taxi with luggage for onward destination to the airport. Grand Parade and the residential area around Charlemont-Dartmouth cannot sustain the significant additional traffic volumes associated with this development", this is covered by response (10) below.</p> |

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| 10                                                                                                                        | Letter       | 2        | 7. The development would have an adverse impact upon traffic during the construction and operational phase, and it has not been properly designed and there is poor integration with other modes of transport. Pedestrian movements in and around the station would be difficult. Grand Parade is an already heavily congested orbital route. | <p>The MetroLink is designed to form part of an integrated public transport network with Charlemont selected as the preferred interchange location in order to maximise the potential interchange with the existing Luas Green Line. In overall terms, Charlemont Station will provide for improvements to the public transport network resulting in decreases in private car usage/trips, increases in public transport usages and will facilitate walking and cycling to the station, without significantly impacting on the operation of the road network in the area.</p> <p>Construction Phase:<br/>EIAR Appendix A9.5 Scheme Traffic Management Plan presents the analysis undertaken to assess the impact of the traffic management measures on the local road network surrounding the proposed Charlemont Station during the construction phase. At the local level the following parameters have been used to assess impacts on general traffic and on pedestrians:</p> <ul style="list-style-type: none"><li>• Increase in walking distance/quality of service for pedestrians (through removal of footpath, reduction of quality of service, removal of a pedestrian crossing or relocation of crossing by more than 100m);</li><li>• Increase in driver delays at junctions;</li><li>• Changes in traffic flows on surrounding streets; and,</li><li>• Additional distance travelled due to diversions.</li></ul> <p>The analysis undertaken at this location indicates that the increased volume of traffic on Grand Parade and Northbrook Road does not translate into any significant increase in driver delay. The largest increase in driver delay of 12 seconds is registered on the westbound approach on Grand Parade to the Ranelagh Road signalised junction.</p> <p>During the construction phase, pedestrians will experience a reduction in quality of pedestrian infrastructure and space. The construction site boundary will encroach upon footways in the local area, including the northern side of Dartmouth Road, and the southern side of Grand Parade. However, a temporary signalised crossing will be provided west of the Luas to maintain pedestrian access to and from the Stop. Whilst there are partial closures on Dartmouth Road and Grand Parade, pedestrian movements will be maintained on appropriately sized footways through the area.</p> <p>Operational Phase:<br/>A microsimulation VisWalk model has been developed for the immediate area surrounding Charlemont Station during the operational phase. The model covers the full extent of the publicly accessible station area, including the immediate vicinity of the station entrance at street level, the Luas stop and nearby junctions at Charlemont Bridge. In order to accommodate the forecast demand from the proposed Charlemont Station, a new staircase with 2.4m stair width is proposed at the south east corner of Charlemont Luas stop. An elevator will also be provided at this location. Both are sized for MetroLink to Luas, and Luas to MetroLink passenger numbers.</p> <p>In addition, it is proposed that the pedestrian crossing on R111 Grand Parade will be repositioned to the front of the building being developed by Hines. With this infrastructure in place, the model indicates that the R111 Grand Parade will have an acceptable level of service overall, with some reductions in service seen at the pedestrian crossing where pedestrians are required to wait for a green phase at the signals. Overall, it is considered that the model displays an acceptable level of network performance.</p> <p>The proposed pedestrian crossing on Grand Parade will have minimal impact on the traffic flow along Grand Parade and can be programmed to operate in sync with the existing signalised junction at Grand Parade /Charlemont Street to maintain the flow of traffic movements. When the Project is operational, car mode share will decrease, with a reduction of up to approximately 830 car tips to and from the zones surrounding Charlemont Station over the 12hr period in 2065. In overall terms, the Charlemont Station will provide for improvements to the public transport network resulting in decreases in private car usage/trips, increases in public transport usages and will facilitate walking and cycling to the station, without significantly impacting on the operation of the road network in the area.</p> <p>Furthermore, TII have deliberately designed the Station with minimum set down space (with the exception of a drop-off on Grand Parade for persons of restricted mobility only) or room for taxi ranks so that it does not encourage the Station to be used as a terminus.</p> |

| Re: Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022 Case Refernece Number NA29N.314724 13/01/2023 |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| 11                                                                                                                        | Letter       | 2        | 8. The development will have an adverse impact upon property values, particularly during the construction phase. For many houses in the area there will be a long term and permanent adverse impact upon property values from noise of the operating rail infrastructure, vents, operational noise and signals, escalators, and large traffic volumes - vehicular and pedestrian using the station 19 hours per day. The adverse impact also extends to the loss of amenity for the wider community changing a residential neighbourhood into a noisy, busy, congested major transport hub. | <p>Response (8) above outlines the predicted environmental impacts with regards to noise and vibration, and amenity, while responses (9) and (10) summarise the assessed traffic and pedestrian impacts. TII would note that as explained by response (10) above that in overall terms Charlemont Station will provide for improvements to the public transport network resulting in decreases in private car usage/trips.</p> <p>TII do not agree that the development will have a long term and permanent negative affect. In fact there is strong evidence to suggest that property values will in fact increase in close proximity to public transport infrastructure and that local residents will greatly benefit from having a world class metro system providing access to the city centre, airport and north city at their door step.</p>                                                                                                   |
| 12                                                                                                                        | Letter       | 2        | 9. The development would lead to Anti-Social behaviour. I have significant concerns that this major interchnage station will attract anti-social behaviour for up to 19 hours a day. This is commenon with many European capital interchnages. This currently relatively quiet residential area that benefits from amneities, but the potential for late nifght arrivals, taxi pick-ups, drop-offs and anti-social behaviour would disturb these amenties and alter the nature of the area.                                                                                                 | <p>The risk of anti-social behaviour has been considered by the Project and is addressed by EIAR Chapter 6, MetroLink Operations and Maintenance. Section 6.6.5.8 specifically addresses how this will be managed, including how the architectural and urban realm design is designed to discourage anti-social behaviour, for example through the attractive setting, use of public lighting, open sight-lines, and avoidance of areas where individuals and groups of people can hide. Subject to data protection impact assessment and compliance with the General Data Protection Regulation (GDPR) CCTV will also be installed throughout the MetroLink system, to provide general security and surveillance of all the public areas. TII would also note Charlemont Station has been deliberately designed without drop-off (with the exception of a drop only for persons of restricted mobility on Grand Parade) and taxi pick-up areas.</p> |
| 13                                                                                                                        | Letter       | 2        | <p>Accordingly, we are requesting the following amendments of An Bord Pleanála:</p> <p>1. Omit from the Railway Order the section from Tara Street Station to Charlemont Station and associated onward tunnel extension and intervention tunnel.</p> <p>2. Require the submission of a Railway Order for a section from Tara Street Station to St Stephens Green which would effectively provide for a terminal hub station that can integrate with the Luas Green Line, multiple bus routes and future DART underground.</p>                                                               | <p>The above responses to the observations made explain why TII do not consider it is correct or appropriate that the MetroLink alignment south of the proposed Tara Station should be omitted, and also demonstrates why the proposed Charlemont Station has been selected by TII as the preferred interchange with the Luas Green Line</p> <p>A scheme which terminates at Tara Street would not be consistent with the Transport Strategy for Greater Dublin Area (2022-2042). In addition any decision to terminate the scheme at Tara will significantly impact on the overall viability and benefits of scheme.</p>                                                                                                                                                                                                                                                                                                                            |

| 1                                                                                                                                                                                                 | 1. Surplus Lands - Permanent                                                    | 1        | There appears to be an acquisition of surplus lands on a permanent basis. This is particularly the case at the bicycle hub building and at the attenuation area at the southern side.                                                                                                                                                                                                                                                                                                                                            | <p>The permanent landtake as detailed is required to accommodate the bicycle hub building on the northern side of the Hertz building; and for the attenuation pond and underground attenuation tanks to the south of the Hertz building. These elements have been sized appropriately to accommodate the forecast cycle storage requirements and the infrastructure necessary to accommodate forecast drainage flows.</p> <p>Details of the proposed landscape finishes to both the bicycle hub, attenuation pond and underground tanks are provided within the Railway Order Plans\Drawings - Landscaping Drawings - Landscaping details FCC &amp; DCC, sheet 3 of 13 (Drawing reference ML1-JAI-ARL-SC01_XX-DR-Y-00003, sheet 3 of 3). The area set aside for the bicycle hub allows for bicycle parking and a structure to house a cafe and changing facilities. Further details of the proposed attenuation pond, together with the adjacent underground attenuation storage, are provided on Plan Drawing number ML-UN 301 K-L (Railway Order Plans of Proposed Railway Works Utilities - Surface Water FCC ML 301 to 303) EIAR Book 3 of 4.</p> |
| 2                                                                                                                                                                                                 | 2. Surplus Lands - Temporary                                                    | 1        | The acquisition of temporary lands is completely excessive and unless it is modified, will have extreme consequences for the daily operations of the premises. As currently planned, the following severe problems are being created:                                                                                                                                                                                                                                                                                            | TII have responded below to the individual observations raised and would note that while they do not consider the acquisition of temporary land is excessive, TII are committed to working with Hertz, as demonstrated by the responses below to ensure the severe problems referred to do not occur.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| 3                                                                                                                                                                                                 | Surplus Lands - Temporary, (a) Health and Safety                                | 1        | The temporary acquisition area runs right up to the fire exits on the western side of the main building. The fire exits will be blocked by the temporary acquisition. This is completely unacceptable. As the acquisition is currently planned, the premises would not be operational because it would not be compliant with fire regulations and health and safety regulations.                                                                                                                                                 | TII have previously walked the site with Hertz and can confirm that the works will not prevent the use of the existing fire exits through the land temporarily acquired for construction. As requested by Hertz, a minimum 2m access width will be maintained for fire and emergency access and egress, to and from Hertz premises throughout construction. These requirements will be specified by the Main Works Contract.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| 4                                                                                                                                                                                                 | Surplus Lands - Temporary, (b) Computer Systems and Cooling Units               | 1        | For the continued operation of the business, it is critical that there is access at all times to the cooling units which are on the south west corner of the main building. These cooling units are essential for the large comms rooms that are located immediately inside the building at the location of the cooling units. Hertz is a major international company and the subject premises in Swords serves the European market. The continued operation of the IT's section of the business is critical for its operations. | TII have previously walked the site with Hertz and can confirm that the works will not prevent access to the cooling units on the south-west corner of the main building. This requirement will also be included in the Main Works Contract.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| 5                                                                                                                                                                                                 | Surplus Lands - Temporary, (c) Access to Power Supply Services and Storage Area | 2        | It is critical that the power location point on the south west side is accessible at all times. All of the manholes to the various services, that are located in the temporary acquisition area, will need to be accessible at all times.                                                                                                                                                                                                                                                                                        | TII and their contractors will maintain access and protect (or divert if required) all incoming services to your premises prior to construction starting in the area. This will be a specified contract requirement. Please also see Response (8) below.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

| 6                                                                                                                                                                                                 | Surplus Lands - Temporary, (d) Mitigation in Relation to Temporary Areas | 2        | An alternative location for a temporary area is at the south east side of the Hertz owned lands. This would facilitate a storage and parking which could reduce the requirement for temporary acquisition areas to the west and south of the main building. In addition, the temporary areas must be set back at all locations around the perimeter of the building so that all the hard surfaces are not being interfered with and there is a minimum pathway of three metres around the entire perimeter of the building.                                                                                                                                                                                                                                                  | <p>Temporary land take is required to facilitate construction works, however, please refer to Response (7) below regarding possible alternative land take to reduce the impact on the existing car parking area.</p> <p>The temporary hoarding line will be adequately set back at all locations around the perimeter of the building so that all the hard surfaces are not being interfered with and there is a minimum available pathway provided around the entire perimeter of the building at all times. Where feasible a 3m clearance from the building to the hoarding line will be maintained. However during the piling operation along the western edge of the building it will not be feasible to provide a 3m offset to the hoarding. During this phase, a minimum 2m offset will be provided from the building to maintain the necessary emergency fire exits and pedestrian flows to the nearest fire assembly point. The hoarding line will then be realigned to a 3m offset on the completion of the adjacent piled wall and ground beam with any damage to the hard surfaces repaired.</p> <p>Please refer to Response (3) above on the 2m minimum requirements for fire/emergency access requirements.</p> |
| 7                                                                                                                                                                                                 | Surplus Lands - Temporary, (e) Temporary Acquisition of Car Parking Area | 2        | There is a completely excessive temporary acquisition of the car parking area to the northern end of the site. This will cause major problems as the area is the visitor car parking area. In addition, it will have a serious impact on the business plan for this Hertz location as it is the intention of the company to lease further space and this leased space will greatly increase the car parking requirements. One of the main issues here is that there is no current start date indicated for the Metrolink Project that is in any way definite. Everything ultimately will be subject to funding and as it stands at the moment, all these temporary areas could be in existence for very many years with negative consequences for the future plans of Hertz. | The land take as detailed is required for the construction of MetroLink, and in particular for the management of traffic marshalling through the main construction phase between Seatown Station and Estuary Roundabout. With regards the lorry holding area, TII would note this is a temporary acquisition and only takes part of a very large site.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| 8                                                                                                                                                                                                 | Surplus Lands - Temporary, (f) Power and Data Network                    | 2        | At this point in time, there is no clarity with regard to how power and data networks and other services including sprinkler piping and so on, will be relocated into the building. Clarity around this point is essential. Currently these services are in the area proposed for the station that will be permanently acquired.                                                                                                                                                                                                                                                                                                                                                                                                                                             | The plans for utility diversion required to facilitate access to construct Seatown Station have been included within the section of the Railway Order Plans\Drawings, Utility Drawings - Utility Diversion Book 1 of 4 Fingal County Council. The specific drawing for this location is ML1-JAI-URD-Rout_XX-DR-Y-01014 Plan Drawing ML-UC 301 K-L. These details make provision for maintaining all of the existing services to the Hertz business as the works are progressed. TII's appointed contractors will be required to maintain services to your building as they sequence the works to suit their construction methodology.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 9                                                                                                                                                                                                 | 3. Scheme Time Frames and Funding                                        | 2        | There is no definite time frames in relation to the Metrolink Project. As a consequence of this, the Hertz premises is blighted as a property.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | <p>In July 2022, the Government granted Approval in Principle to the NTA to enable the submission of a railway order application by TII to An Bord Pleanála in respect of the MetroLink project (Decision Gate 1). This approval was granted after the Preliminary Business Case (PBC) had undergone significant scrutiny and challenge by bodies that are independent of TII, including DoT and DPER review (including independent review by JASPERS and the Major Projects Advisory Group (MPAG)) of the PBC around timeline, costs and benefits that were updated to inform the Government decision.</p> <p>Work will commence once the statutory planning process has been completed and an Enforceable Railway Order is in place. The timescale then envisaged for construction is indicated in EIAR Appendix A5.2 Construction Programme. Once complete the Hertz buisness will benefit greatly from its proximity to the Seatown Station and high frequency metro services.</p> <p>See also Response (7) above.</p>                                                                                                                                                                                                   |
