| Letter Re: Proposed Development of Metro [District 7] OBJECTION |                                  |          |                                                                                                                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| 3                                                               | Issues that need to be addressed | 1 and 2  | 1) Being a retail pharmacy in close proximity to both Mater Public and the Mater Private as well as various medical centres on Eccles St. a significant part of our business comes from these locations, yet, with the proposed development the pharmacy will be totally obscured from everyone on Eccles St. this will have a direct impact on the business of the pharmacy. | <p>TII are committed to working with the local business community to ensure that disruption to normal business operations such as yours are kept to a minimum. In Chapter 11 (Population and Land Use), it is acknowledged that there is a healthcare hub around Mater Hospital with significant employment and residential land use in the area.</p> <p>During the Advanced Enabling Works associated with the construction of Mater Station, parking bays will be suspended on the northbound side of Berkeley Road. Footpath use on Berkley Road and Eccles Street will be impacted but pedestrian and cycle access will be maintained on Berkeley Road, with diversions provided around the works. This will maintain access to and from your premises. To minimise disruption to pedestrians and ensure desire lines are maintained, appropriate signage and crossing facilities will be put in place. Refer to EIAR Chapter 09.</p> <p>Chapter 5 of the EIAR (MetroLink Construction Phase), explains that traffic management plans for the construction phase of the Project have been developed to minimise the impact on road users, and to maintain access to businesses and other premises. The design of traffic management measures and highways works is based on achieving the key objective of maintaining continual access to all properties during the works. Where necessary, a safe alternative route will be provided for pedestrians and vulnerable road users, such as children, and persons with restricted mobility, to maintain pedestrian access to premises. Where detour routes are required, these will be kept as short as possible and detour signage will be clear and easy to understand. All construction sites will be designed to be as unobtrusive as possible.</p> <p>As part of the Railway Order application, TII will be seeking Compulsory Purchase Order (CPO) powers to enable the acquisiton of the necessary land and property, rights and interests to construct, operate and maintain the MetroLink project. Where CPO powers are exercised, owners and occupiers whom are displaced are compensated in accordance with the compensation code. Where no property interest is acquired, there is no entitlement to compensation [provided that the works are carried out with reasonable care].</p> |

| Letter Re: Proposed Development of Metro [District 7] OBJECTION |                                  |          |                                                                                                                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 4                                                               | Issues that need to be addressed | 2        | 2) Major disruption will occur with regard to access and egress along with the level of noise and vibration from the ongoing construction. In addition, the pharmacy keeps an open door and there is major concern as to the level of dust that will be generated both internally and externally to the business requiring additional cost in trying to control this problem. | <p>Please refer to response item (3) in relation to access and egress from your premises during the construction works.</p> <p>Potential impacts associated with noise and vibration during the construction and operational phase of MetroLink are addressed in EIAR Chapter 13 (Airborne Noise &amp; Vibration), with mitigation measures proposed where required. EIAR Chapter 14 (Ground-borne Noise and Vibration) includes the specific control measures proposed across the Project to control vibration sources with the potential to result in disturbance to building occupants or building damage.</p> <p>The assessment of airborne noise and vibration during the construction of Mater Station includes the consideration of a number of receptors on Berkeley Road. Table 13.64 of Chapter 13 presents the potential significant airborne noise impacts, which includes receptors on Berkeley Road with predicted Moderate to Significant, and Significant to Very Significant impacts during some of the work phases. EIAR Appendix 14.5 Groundborne Noise and Vibration Blasting Modelling Results presents predicted groundborne noise and vibration levels during the construction phase of the project for buildings on Berkeley Road. In summary:</p> <p><b>Airborne Noise and Vibration</b><br/>EIAR Chapter 13.5.2.6.6 Mater Station sets out the assessment of airborne noise and vibration during the construction of Mater Station and includes the consideration of a number of receptors on Berkeley Road, including no. 18.</p> <p>As stated in EIAR Chapter 13 (Airborne Noise and Vibration), section 13.2.6.1.3, the principles for the management of Airborne Noise &amp; Vibration in the EIAR are based on BS 5228-1. Based on this standard the Construction Noise Threshold (CNT) was calculated for receptors on existing rounded ambient noise levels. In accordance with this standard, the CNT is set at 70 dBA at no. 18 Berkeley Road.</p> <p>In order to manage and mitigate airborne noise, the Contractor will be required to set out their proposals in the Construction Environmental Management Plan (CEMP), an outline of which is included in EIAR Appendix A5.1. The Construction noise threshold will be mandated to the contractors and enshrined in the Railway Order. Before commencing works, Contractors will then need to provide best practice mitigation to reduce the impacts. If the Contractor is unable to reduce the impacts sufficiently, and the residual levels are such that widespread community disturbance or interference with sleep is likely to occur, TII will consider whether the provision of further mitigations would be appropriate. Please refer to the TII Airborne and Groundborne Noise Mitigation Policy (Appendix A14.6).</p> <p><b>Groundborne Noise and Vibration</b><br/>Predicted levels of groundborne noise and vibration are set out in Chapter 14 of the EIAR. Unfortunately, there are no effective methods available to reduce groundborne noise from the TBM at source, but noting that the duration of this impact will be temporary and of the order of up to two-weeks as the TBM passes. TII will undertake advanced consultation and stakeholder engagement to prepare people for the passing of the TBM.</p> |

|                                                                 |              | (4) continued |                                                                                                | <p>Air Quality</p> <p>EIAR Chapter 16 (Air Quality) assesses the likely effects of the Project on Air Quality during the construction phase with mitigation measures proposed where required. Air quality during the construction phase will be impacted by traffic and dust emissions resulting from construction activities at the Mater Station site from Earthworks, Construction and Trackout (Maximum Daily HGV Movements).</p> <p>Strict dust prevention will be in place at all times to minimise any potential emissions and these procedures will be strictly monitored and assessed. In the event of dust nuisance occurring outside the site boundary, movements of materials likely to raise dust will be curtailed and satisfactory procedures implemented to rectify the problem before the resumption of construction operations.</p> <p>As specified in the response item above, before commencing relevant works, the Outline Construction Environmental Management Plan (Appendix A5.1) will also be used to manage the construction phase impacts. As part of the updated Construction Environmental Management Plan in advance of commencing construction, an Air Quality Management Plan will also be produced to include for specific working hour measures at sensitive locations. The plan will include all appropriate dust and emissions mitigation measures applicable to the circumstances of the relevant site, based on the local authority requirements and industry best practices. A plan will be developed by the contractor for each worksite, including Mater.</p> <p>The types of measures that will be implemented to manage dust will include the following:</p> <ul style="list-style-type: none"><li>•Material handling systems and site stockpiling of materials will be designed and laid out to minimise exposure to wind. Water misting or sprays will be used as required if particularly dusty activities are necessary during dry or windy periods;</li><li>•Any blasting will be completed by specialised contractors with a specific blasting dust management plan;</li><li>•Liaison with local authorities and community groups;</li><li>•Hoarding will be provided around the construction compounds; and</li><li>•It is anticipated that methods of collecting rainwater and recycling for general site use, will be adopted where practical. Requirements for dewatering installations at deep station and tunnel portals can also provide a valuable source of water for general site use.</li></ul> |

| Submission No.                                                  |                                  |          | 026                                                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

| Letter Re: Proposed Development of Metro [District 7] OBJECTION |                                  |          |                                                                                                                                                                                                                                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 5                                                               | Issues that need to be addressed | 2        | 3) Traffic is to be diverted away from the pharmacy and parking to be restricted with some spaces totally removed from the location. I do get business from passing trade where people find it easy to park and to attend the pharmacy. | <p>Please refer to response item (3) related to the traffic management during the construction phase.</p> <p>Regards parking availability, this is also covered by the EIAR in Chapter 9 (Traffic and Transport), section 9.6.1.2.4.5, Parking and Loading Construction Impact Assessment, with particular detail provided in EIAR Appendix A9.5 Scheme Traffic Management Plan, section 7.7.</p> <p>There will be slight impacts for loading and parking during the Enabling Works associated with Mater Station. These are in the form of a loss of parking bays for both on street loading facilities (16 &amp; 17 Berkeley Road) and general parking. This loss of parking will at its peak be approximately 7 parking spaces, however generally only one or two spaces will be lost through the phasing of the work.</p> <p>During Phase 1 of the Main Works, the Pay and Display parking spaces along the eastern side of Berkeley Road will be removed, resulting in the removal of 12 on-street parking spaces. Approximately 5 on-street Pay and Display and Resident Permit parking spaces will be removed from the western side of Berkeley Road. A temporary location for the taxi rank will be agreed with DCC. The construction of the ventilation shaft outside of No. 18 Berkeley Road removes one permanent parking space at this location.</p> <p>During Phase 2 and 3 of the Main Works at Mater Station, the Pay and Display parking spaces along the eastern side of Berkeley Road will be removed. This will result in the removal of 12 on-street parking spaces. On the west side of Berkeley Road, five on-street Pay and Display and Resident Permit parking spaces will be removed as well as a loading bay that will be relocated.</p> <p>Once MetroLink is operational, to accommodate the station entrance, the current footways and traffic lanes on Eccles Street will be realigned as part of the proposed Project. The realignment of Eccles Street, and the widening of the footway on Berkeley Road will result in the loss of on-street parking at both locations. Approximately 20 on-street parking spaces will be lost on Eccles Street, while approximately 14 spaces will be lost on Berkeley Road, due to the provision of a signalised crossing in proximity to the Station entrance. While there will be a loss of commercial and residential parking and loading infrastructure as a result of the proposed Project, the modal shift from road to public transport when the proposed Project is in place will reduce the overall demand on parking and loading facilities, thus reducing the severity of the impact.</p> |

| Letter Re: Proposed Development of Metro [District 7] OBJECTION |                                  |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| 6                                                               | Issues that need to be addressed | 2        | 4) It is evident from online images and streetscapes of Berkeley Road recently made available to the public that there will be an extraction air vent feet from my building. This is a potential quagmire of issues!!! Noise, contaminated air venting into a pharmacy, etc. etc...a licenced pharmacy must adhere to many health and safety issues that perhaps other retail businesses do not. I fail to understand why a ventilation shaft would be located only feet from my front door, surely it could be positioned at another location reducing the need to have hoarding in such close proximity to the pharmacy. [Possible solution] | <p>Please refer to response item (4) in relation to the predicted impacts to noise, vibration, air quality and dust during the construction phase.</p> <p>As detailed in Chapter 13 (Airborne Noise and Vibration), the following options will be considered when selecting suitable mitigation for tunnel ventilation systems (in order of priority):</p> <ul style="list-style-type: none"><li>* Selection of low noise rated equipment;</li><li>* Reduction of induct flow rates;</li><li>* Reduction of elements in the airflow;</li><li>* In duct attenuators;</li><li>* Orientation of grilles and louvres away from sensitive receptors;</li><li>* Acoustic louvres; and,</li><li>* Anti-vibration mountings and couplings will be incorporated into the design to control vibration.</li></ul> <p>The Mater station box will be constructed via top-down excavation, several utilities will need to be diverted temporarily to faciliate access. On the western side of Berkeley Road and north of the junction with Sarsfield Street, a ventilation shaft will be constructed as part of the Mater Station under Berkeley Road, and in front of No 18 and 19. The footpath will be reinstated on completion, but the existing parking at this location will be extinguished.</p> <p>Ideally and like the vast majority of the MetroLink deep stations the ventilation shaft would be an integral part of the main structure. However, with limited space to build the station under the park and surrounding roads, a ventilation shaft located on the north west corner of the structure would protrude up into Berkeley Road, and therefore would require the road to be diverted permanently around it where there is limited space to do so. Its proposed location, while not ideal from the prospective of the short term impact on your property during construction and loss of a parking bay, will in the long term be a better location as it allows the streetscape to be returned to its pre construction layout on completion.</p> <p>Chapter 16 (Air Quality) section 16.5.3.11, identifies that, there are no substantial emissions within the tunnels as the trains or the operations do not generate significant emissions to air, therefore the main emission of ventilation shafts in normal operation is akin to warm air. The street level location of the grilles associated with the ventilation shafts is designed to minimise effects on pedestrians and near buildings. They are often situated in slightly elevated median strips (30cm) for drainage purposes or within green spaces, out of the normal transit of pedestrians or other sensitive receptors. Inlet and outlet ventilation grilles are separated in order to minimise the possibility of air recirculation. Consideration is also given to the potential for air pollution to enter from vehicles through the air intake system, in particular in more urban areas where pollutant concentrations are higher. Within the stations a system with air-quality sensors and ventilation controls can be utilised in order to ensure air quality within underground stations remains comfortable and at safe levels for human health. With respect to the potential for emissions from the ventilation shafts during a fire, the materials for the rolling stock or other systems such as wiring are selected during the detailed design of the proposed Project to comply with strict regulations to avoid the emission of irritating or toxic products. These materials are chosen in order to ensure conditions remain tenable during evacuation however it will also minimise the potential for toxic fumes being emitted from the ventilation shaft during a fire within the tunnel. In accordance with the EPA Guidelines (EPA 2022) and considering the potential likely effects of emissions from the ventilation shafts, the impacts are considered overall Neutral, Not Significant and Long-Term.</p> |

| Letter Re: Proposed Development of Metro [District 7] OBJECTION |                                  |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |  |
| 7                                                               | Issues that need to be addressed | 2        | 5) The reports published on the internet provide information in a table format as to how various properties will be impacted yet there is nothing referring to the pharmacy at 18 Berkeley Rd. and thus was excluded from any analysis. It would appear that there may be a serious error in the collation of registered property information at this location which will have had the serious impact of misrepresenting or underrepresenting my particular building and its proximity to the works.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | <p>TII disagree with the statement that your property was excluded from the analysis. A comprehensive Settlement Assessment has been undertaken to determine the potential impacts that construction of the proposed Project will have on sensitive receptors such as buildings and infrastructure from the advance of the TBM. The ground movement predictions and the building damage assessment methodology adopted for MetroLink is based on the approach adopted in most tunnel projects around the world, including London Crossrail and High Speed 2 in England. This is described in EIAR Section 5.4.11 (Ground Settlement Monitoring and Mitigation Works).</p> <p>Excavation for the tunnels and other below ground structures could potentially lead to ground movements at the surface and below ground. An assessment of the effects of ground movements and potential impacts on existing buildings has been carried out as part of the Scheme Design.</p> <p>EIAR Appendix A 5.17 Building Damage Report, covers the assessed impacts of construction generated ground movements and settlement on properties similar to yours. Section 5.2 of this report sets out the rationale for the assessment of properties. The results of the assessment provided in Table 5.2 shows that the property Ref AB-47 located next to your property has been assessed as falling within the 'Slight ' category. The building risk categories shown in Table 4-4 of the aforementioned report are used to define the degree of building damage related to the Risk Category. As your building falls within Damage Category 2 or below, no protection works are anticipated for this building. However, considering the foundation of your property are shallow, a Phase 3 assessment will be undertaken by the appointed Contractor on your property, the results of which and any requirements for monitoring and / or other mitigations that eventuate from that assessment will be shared with you in advance of commencing works.</p> <p>The Phase 3 assessment will take account of final design and construction methodology details. For the Phase 3 assessment, each building will be subject to detailed assessment on an individual basis. A detailed survey will be carried out as part of the Phase 3 assessment to provide the necessary additional information to inform this detailed analysis of how the individual elements of the building would be affected by the predicted ground movements. The method and extent of the detailed analysis will be determined on a case-by case basis and may include a more sophisticated semi-empirical or a detailed soil-structure interaction using finite element modelling methods. It is likely that the Phase 3 assessment will yield further improvement to the damage category determined by the Phase 2b assessment. The results of this refined assessment typically show that earlier assessments are conservative and over estimate the likely impact of construction generated ground movements.</p> |  |
| 8                                                               | Issues that need to be addressed | 2 and 3  | 6) The duration of the disruption is not clear from the information provided but one has to believe that the longer it takes the greater will be the financial strain on the pharmacy thereby increasing the probability of the pharmacy failing. It is quite self-evident that any and all work done on this project at such close quarters, involving such lengthy and disruptive propositions will undoubtedly impact on my business in a negative way... I repeat this is in no doubt. It is our contention therefore that this inevitable outcome must be catered for in any development budget so as to ensure my business and entities such as mine, but more specially mine, are compensated for such pecuniary loss and this must include any increased cost of working and recompense for any detrimental impact. This fact needs to be contractually recognised before planning is considered. It is a fact over the last decade or so that any property development by individuals in this area has required a contribution to the "Metro development fund" surely the same should apply in reverse should our entities suffer? | <p>The programme for the construction of the proposed Project has been optimised to minimise the duration of the Construction Phase, where possible, in order to lessen the duration of potential environmental impacts, while ensuring that the areas surrounding the works sites remain operational and functional.</p> <p>A summary programme showing the duration and phasing for construction of the proposed stations and surface works along the alignment is shown in Chapter 5 (MetroLink Construction Phase) Diagram 5.4. of the EIAR. This shows the duration that each of the proposed construction compounds will be in place, while Appendix A5.2 provides more detailed, including the tunnelling elements. For Mater Station Compound/Deep Station construction the estimated programme is 105 months, that includes the following elements of the works anticipated at Mater: Advance Enabling Works; Main Works to Station; Station Fitout and Completion. It is anticipated that first two stages of the works at Mater, the Advance Enabling Works and Main Works to Station, will take up to 6 years to complete.</p> <p>Outside of localised traffic diversions and parking suspension to facilitate access for works, the access to your business will not be impacted during the Advance Enabling Works period. When the main station works commence and during the first phase, TII intends to maintain access to your business while the main activities outside of your property, the construction of the Stations North West Ventilation Structure under Berkeley Road are completed. This work is anticipated to take a year to complete, after which Berkeley Road will be fully reinstated with full pedestrian access along Berkeley Road restored while Phase 2 and 3 of the Main Stations works proceeds within the Four Square Park area.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |  |

| 9                                                               | Issues that need to be addressed | 3        | 7) It takes years to generate the goodwill in a pharmacy business where good service encourages customer loyalty. As mentioned above, it is obvious that with such disruption will inevitability cause a downturn in the pharmacy's turnover with the resultant risk of a business failure with a complete devaluation of same. The apartments here too will suffer as no one will want to rent an apartment on a building site!                                                                                                                                                                                                                                                                                                                                                                                                                      | TII/NTA do not have a policy of compensation for local business for disruption during the construction stage. As with the installation of Luas line throughout the City, TII believe that any short term disruption to businesses during the works is offset by the eventual benefits of owning and operating a business in close proximate to a Luas or in this case Metro line.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| 10                                                              | Letter                           | 3        | <p>What I don't understand is that despite how obvious it was as to how this development was going to impact on this specific building location nobody has approached me to address my concerns and to offer assurances. This business represents a major investment both financially (1.5m) and in time and effort.</p> <p>With the approach that has been taken this generates mistrust between the parties involved and suggests that the authorities have no regard for the continual viability of my business but the importance of their own objectives. I view this proposal as a direct threat to my livelihood and the livelihood of my staff, I refuse to accept this undertaking and will fight this through the courts if required. Therefore for all of the reasons given above I vehemently object to this development as proposed.</p> | <p>Please refer to response item (2) in relation to the consultation that has taken place with local residents along Berkeley Road.</p> <p>TII's intention is to continue to consult with Local Businesses and Residents through the establishment of local community forums for residents and local buiness.</p> <p>Since the submission of the Railway Order Application, TII have engaged with the local business community and explained the sequencing of works and environmental impacts as set out in the Railway Order submission. TII are committed to addressing your concerns and of the local business community and to continue to address these concerns throughout the projects constructions stage through one on one engagement and through the soon to be established local business forum.</p> <p>Please refer to the response above in relation to the predicted impacts to your property, and the proposed mitigation measures from TII.</p> |

| Ref: Metro planning application no 314724, 25 November 2022 |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 1                                                           | Letter       | 1        | <p>A lot of people get off at Charlemont no doubt headed for the metro. They are holding up the tram bound for Bray crossing the railway line to get to the stairs. And there's people coming up the stairs slowing them down. Someone has got the wheels of his case stuck in the track.</p> <p>The lady announces a slight delay. I'm told that there's persistent problems with turning the Luas that finish at Charlemont and because all the passengers have to get out, they are stopped longer at the station too. However we move off a minute later.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | <p>The Luas stations are designed as a shared space between pedestrians and trams, hence the designated pedestrian crossing between the Charlemont Stop Luas platforms. The interaction between pedestrians and trams will be managed the same as for any other Luas stop.</p> <p>The stairs referred to have been sized to accommodate the combined predicted passenger flows for Luas to Metro, and Metro to Luas. The lift is provided, again sized for the predicted passenger flows, for persons of restricted mobility and so that people are not having to carry luggage of a size that should not be carried on the stairs.</p> <p>Details of the proposed changes at the Charlemont Luas for MetroLink are described in EIAR Chapter 4, Description of the MetroLink Project, section 4.17.12.2, with proposed layouts for access and egress set out on sheets 54 and 55 of the Railway Order: Structure Drawings, Structures Details Book 2 of 3 MetroLink Stations Dublin City Council.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| 2                                                           | Letter       | 2        | <p>On our previous holiday to Lanzarote, we made the mistake of getting off the Luas at Charlemont and transferring to the metro at that point. The metro had just opened. We had massive problems getting the cases down the stairs. Some guy coming up the stairs barged into the missus, even though the signs all say keep to the left. I ended up having to go back up to fetch her case. Not great to have to leave it there as it was a bit of an obstruction. There was a big queue for the lift. I can't get why they didn't put in escalators. Any why didn't they have the metro directly under the Luas with a bank of lifts and escalators. We have to find another way to get to the airport for the pre-Christmas trip.</p> <p>And the return was even worse. Lugging the cases full of the souvenirs for the grandkids up seven flights. That stairs is a nightmare. And when we reached the platform everyone was blocking the platform at the top of the stairs. Took all the benefit out of the holiday. It's like that awful transfer at 168th St Manhattan when you get off the A train from JFK and want to get the 1 to the Bronx.</p> | <p>As noted by response (1) above, the stairs should not be used by passengers carrying luggage of a size not suitable for stairs, and the stairs and lift have been sized for predicted passenger flows, as indicated in Chapter 6 (MetroLink Operations and Maintenance, section 6.4.1), with a lift capacity of 10 passengers.</p> <p>Chapter 6 (MetroLink Operations and Maintenance) indicates that the operation strategy of the proposed Project is driven by the forecasted passenger demand. As such, the peak passenger demand profiles for each station have informed the layout and sizing of platforms and stations to ensure safe and comfortable movements of all users. In recognition of the higher footfall anticipated at this station, two stations entrances are proposed. Additionally, three escalators will be provided at the northern entrance between the station and concourse levels, reflecting the higher footfall predicted with the connection to the Luas line. As presented in Appendix A9.2-B Traffic and Transport Assessment- Charlemont Station, pedestrian modelling of the station indicates that the design has sufficient capacity to accommodate the pedestrian demand generated at the Charlemont MetroLink station.</p> <p>Within the constraints of the site it is not possible to fit escalators in linking ground level to the Luas, and nor would it be feasible to economically place a station beneath the existing Luas that met the MetroLink operational requirements and architectural vision for the Project. It is also highly likely the demolition of buildings would be required around the Luas if such an option was developed and it would not be possible to provide the quality of station entrances that has been achieved for the proposed Charlemont Station.</p> |
| 3                                                           | Letter       | 2        | <p>It was our plan to get off the metro at O'Connell. There's a good chance that there will be a Luas directly across the street which is going to turn around and head south via Parnell. And sure it's a short walk over to Parnell. Again you'd have thought they would have had an underground passage to the Parnell stop from O'Connell metro.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | <p>The investment in designing, constructing and maintaining subsurface connection to the surface that is already provided by lifts and escalators from O'Connell Street Station is not justified or feasible.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| 4                                                           | Letter       | 2        | <p>On the way out they got on the Orbital bus on the South Circular Road and got off at Harcourt Terrace. So far so good. At the canal end of Harcourt Terrace, you'd have thought there should be a bridge or a tunnel, as the metro entrance is directly over the canal. However they didn't bother with one. Instead you have to use the Charlemont station as a sort of bridge.</p> <p>Before they got to the bridge poor Fred nearly got moved down by some cyclist who thought he was in the Tour de France. Why would they have the station entrance blocked by a busy cycle track?</p> <p>They then had to lug the cases up the stairs on the Harcourt Terrace side and down on the Charlemont metro side. It's an awfully narrow platform for a busy station. There were lots of people waiting on the platform for the Sandyford tram, so they had to wheel the cases onto the track to get past them. Fortunately it was quite a nice day, if a bit cold.</p>                                                                                                                                                                                      | <p>The northern Charlemont Station entrance is located just off Grand Parade which is accessible via bridges from the east and west ends of Grand Parade via the R138 and Charlemont Street respectively.</p> <p>The interaction of the Luas Green Line stop entrance with the cycle track is not part of the MetroLink Project, and the MetroLink Charlemont Station has not been designed to be accessed via the Luas Green Line Station entrance on the Harcourt Terrace side, although this route can be used if one so chooses to. The primary access to/from the north and south entrances of Charlemont MetroLink Station is from Grand Parade and Dartmouth Road respectively.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

| Submission No.                                              |              |          | 027                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

| 5                                                           | Letter       | 3        | I had figured out myself that the best route back to Kilmacud for myself and the missus was to get off the metro at Stephen's Green. True we had to walk across the north side of the Green but we managed it in four minutes. I recollect some claim that seems far fetched , back in the day that it took seven minutes. There's a good wide pavement, no street to cross and it's all on the flat so we can wheel the cases. No lugging them up stairs.                                                                                                                                                                                                                                                                                 | TII's role is to deliver the MetroLink project as provided for in the previous Transport Strategy for Greater Dublin Area (2016-2035) and the current Transport Strategy for Greater Dublin Area (2022-2042) and as supported by the Dublin City Development Plan 2022 - 2028. The Charlemont terminus and the connection from St Stephens Green to Charlemont / Ranelagh is provided for by the previous Transport Strategy for Greater Dublin Area (2016-2035) and the current Transport Strategy for Greater Dublin Area (2022-2042) and further the location of the interchange is supported by the Dublin City Development Plan 2022 - 2028. Accordingly, as previously noted, a lift is provided to/from the Luas Green Line for persons with luggage or of restricted mobility. However the option remains for people to interchange with the Luas Green Line at whichever location they prefer. |
| 6                                                           | Letter       | 3        | I do wonder why it never occurred to anyone to move the Luas station at the Green to the bit of track between Grafton and Dawson Street. Indeed would it not have occurred to them to use the siding past Dawson Street to turn some trams? That's a very short hop from the metro.<br><br>I vaguely remember the fuss about a very long walk between metro and Luas at the Green. However we're used to the walk from the Green Line to the Red Line at O'Connell/Abbey on our way to Heuston and it takes about the same time. The problem there is the busy road crossing where you have to wait two goes of the pedestrian lights unless you are very quick on the feet. However if that connection is grand, why isn't the Green one? | TII's role is to deliver the MetroLink project as provided for in policy and this application is in relation to the Railway Order for the Metrolink project only. The feasibility of moving the Luas stop is not part of this application since the Luas is an existing system with services continuing further south from St Stephen's Green that would not be serviced by a spur to St Stephen's Green East. The intent of the Project is to supplement and complement existing infrastructure investment wherever possible. Turning trams to a spur and then turning them back would reduce the level of service / increase headways provided by the Green Line.<br><br>Please refer to response (5) above regards the interchange at St Stephen's Green.                                                                                                                                            |

| Submission No.                                              |              |          | 027                                                                                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

| 7                                                           | Letter       | 3        | I wish someone had brought all this up before they started building the metro. Charlemont is an awful connection between metro and Luas and there are better ways. There would not have been a chunk of change out of a billion in the cost of the last bit of the metro line - the poor taxpayer. | <p>TII have given careful consideration to where MetroLink should best integrate with the Luas Green Line.</p> <p>The Board is required to have regard to the likely consequences for proper planning and sustainable development in the area in which it is proposed to carry out railway works (section 43(1) of the 2001 Act) and as such the following matters are relevant.</p> <p>The connection from St Stephens Green to Charlemont / Ranelagh is supported by the current Transport Strategy for Greater Dublin Area (2022-2042). The Transport Strategies were was prepared by the National Transport Authority, scrutinised by the Joint Oireachtas Committee on Transport and approved by the Minister for Transport. It notes in section 12.3.2, "Charlemont offers the optimal location for the primary interchange with the Green Line in response to growing demand in the longer term and is an appropriate location to facilitate any potential future metro extensions to serve the south west, south or south east of the city region should sufficient demand arise."</p> <p>The Transport Strategy is "a consideration material to the proper planning and sustainable development of the area or areas in question." Development Plans are required to be consistent with the Transport Strategy. The Dublin City Development Plan 2022-2028 envisages this station at Charlemont in policy SMT22 "To support the expeditious delivery of key sustainable transport projects so as to provide an integrated public transport network with efficient interchange between transport modes, serving the existing and future needs of the city and region and to support the integration of existing public transport infrastructure with other transport modes. In particular the following projects subject to environmental requirements and appropriate planning consents being obtained: ... MetroLink from Charlemont to Swords".</p> <p>Accordingly, the location of the Charlemont station was a strategic decision made at the highest levels of transport and land use planning and such is fully consistent with the proper planning and sustainable development of the area.</p> <p>The proposed MetroLink alignment has not been extended south of Charlemont for the reasons set out by the GDA strategy, section 12.3.10, "The challenges associated with the upgrading of the Luas Green Line to a metro standard of service have led to the emergence of an alternative proposal which seeks to meet travel demand from south of Sandyford along a new light rail corridor which serves UCD post-2042.</p> <p>For this reason it has been necessary to determine the most appropriate interchange and termination location for MetroLink. As noted by the GDA Transport Strategy 2022-2042, section 12.3.2, "Charlemont offers the optimal location for the primary interchange with the Green Line in response to growing demand in the longer term and is an appropriate location to facilitate any potential future metro extensions to serve the south west, south or south east of the city region should sufficient demand arise.' This is also reflected by EIAR Chapter 7, section 7.7.8 MetroLink Southern Terminus Location that explains the rationale for selecting Charlemont as the optimum location for interchange with the Green Line.</p> |
| 8                                                           | Letter       | 5        | Note 1 the public transport section of Grater Dublin Area Transport Plan 2022-2042 proposes two Luas lines respectively ex Tallaght and Sandyford converging at Charlemont.                                                                                                                        | TII's role is to deliver the MetroLink project as provided for in the previous Transport Strategy for Greater Dublin Area (2016-2035) and the current Transport Strategy for Greater Dublin Area (2022-2042) and as supported by the Dublin City Development Plan 2022 - 2028. As such, the extension of the Luas falls outside the remit of this application.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

| 10                                                          | Letter       | 5        | Note 3 Dublin City Council Area Committee wanted to discuss the Charlemont terminal with National Transport Authority and passed an emergency resolution asking them to come in. In rejecting that request on 23 May 2022, the Deputy Chief Executive so described the Charlemont experience. | The Charlemont terminus and the connection from St Stephens Green to Charlemont / Ranelagh is provided for by the previous Transport Strategy for Greater Dublin Area (2016-2035) and the current Transport Strategy for Greater Dublin Area (2022-2042) and further the location of the interchange is supported by the Dublin City Development Plan 2022 - 2028. |

| 1                                          | Letter       | 1        | <p>I am the owner and occupier of 5 St Mobhi Road. I see from the enclosed map that it will extend into the substratum of my front garden and part of my house. I object to this structure as from experience of living in London for many years it causes vibration and a rumbling sound inside the houses of some of the places where I lived.</p> <p>It appears from the enclosed map that the infrastructure will be under my hallway and sitting room which will affect my living experience and substantially effect the value of my property.</p> | <p>Thank you for your submission and for sharing your observations with regards to the MetroLink project to which we have responded below.</p> <p>EIAR Appendix 14.5 Groundborne Noise and Vibration Blasting Modelling Results presents the predicted groundborne noise and vibration levels during the construction and operational phases of the Project.</p> <p>The predicted groundborne noise during TBM passage at your property is 47 dB LASmax which is above the Threshold Level of 45 dB and indicates a significant adverse impact for a short-term duration of up to 2-weeks when the TBM is passing your property. The predicted vibration during TBM passage at your property is predicted to be a not-significant level of 0.236 ms-1.75 VDV (Vibration Dose Value is a parameter that combines the magnitude of vibration and the time for which it occurs) which is below the threshold level of 1.0 ms-1.75 VDV.</p> <p>Unfortunately, there are no effective methods available to reduce groundborne noise or vibration from the TBM at source but noting that the duration of this impact will be temporary and of the order of up to two-weeks as the TBM passes. TII will undertake advanced consultation and stakeholder engagement to prepare people for the passing of the TBM and ensure the timing of these impacts are known. TII have put in place a Airborne and Groundborne Noise Mitigation Policy which is detailed in EIAR Appendix 14.6. This policy is available within certain criteria to owners of properties that may be impacted by the works.</p> <p>During operation of the railway, groundborne noise is predicted to be 31 dB LASmax at your property which is below the threshold of 40 dB LASmax. Operational vibration at your property is predicted to be 0.006 ms-1.75 VDV, again well below the threshold level of 0.8 mms-1.75 VDV. As a result there are no predicted significant impacts during the operation of MetroLink at this location. There is strong evidence to suggest that the introduction of a world class metro system greatly benefits established residential areas.</p> |

Dublin (Metrolink), by Brian McGrath, 16 Glenmore Road, Dublin 7 |                                                             |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 1                                                                                                                                                                                                                                                 | Introduction                                                | 1,2      | <p>The Dublin Central application for site servicing plan states that to facilitate the Metrolink plan for (2035) - A structural box (120m length, 26m width, 34.5m depth) beneath the ground floor level has been designed to accommodate the independent construction and operation of the planned O'Connell Street MetroLink Station by Transport Infrastructure Ireland, including provision of the structural envelope and co-ordinated voids to accommodate station entrances, ventilation and fire escape shafts through this part of the Dublin Central proposed development.</p> <p>This, according to the application, is to ensure that the Dublin Central proposed development is structurally independent of, and not prejudicial to, the MetroLink project. The MetroLink project will be the subject of this separate railway order for planning approval to be made by Transport Infrastructure Ireland. This part of the Dublin Central proposed development is referred to as the MetroLink Enabling Works.</p> <p>The proposed rail station is to be constructed under "site 2' of the Dublin Central site. The timeline is 15 years as the application makes it clear that the development is dependent on Metrolink proceeding immediately. If the metro does not proceed, neither can the development in its current form.</p> <p>Since the timeline in relation to Metrolink is unknown, and that this is acknowledged by state agencies, why is a fresh application for site 2 enabling works being pushed through at this time? And since the real timeline is 15 years, why is this not stated on the application page? And why have the developers placed the metro at Upper O'Connell St. Terrace (Site 2), where its removal is necessary for the metro to proceed? Is this simply not to facilitate the development as several of the buildings are protected under Irish law?</p>                                                                                                                                                                                                                                                                     | <p>The Metrolink Railway Order application is for the works that are required to construct the Metrolink project. The works set out in the Dublin Central planning applications, if granted, would allow the Metrolink supporting infrastructure to be constructed as part of the Dublin Central development, allowing the development to proceed should the Metrolink project not be ready to proceed itself under its own powers at that time.</p> <p>Following the granting of the Railway Order, the anticipated construction period for the Metrolink station at O'Connell Street as a standalone scheme independent of the Dublin Central development is 99 months. This is as set out in the Railway Order documentation, EIAR Chapter 5, MetroLink Construction Phase Table 5.5.</p> <p>With the exception of the proposed O'Connell Street Station underground structure, the construction of Dublin Central is not part of the railway order works. However, Metrolink will work with Dublin Central to coordinate construction activity should construction periods align.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| 2                                                                                                                                                                                                                                                 | Questions about Site 2 and the Upper O'Connell St. Terrace' | 2        | <p>This has a special relevance to heritage protection, if the Dublin Central applicants plan to proceed immediately with demolition of the protected structures listed in application 5126/22 and the three previous applications as part of Dublin Central? Also, is this the case with the O'Connell Street and Moore Street buildings listed as part of this and the Hammerson 2022 applications? The EIA Volume 2 report states that the windows are to be retained (where applicable) and that all parts of the protected structures are to be photographed.</p> <p>Demolition of a protected structure is illegal under Irish planning law, there is also the practical reason arises as to where all this material is to be located? The development is proceeding as the application makes clear on the basis that Metrolink will proceed in tandem with the development. That timeline is dubious, and Dublin Central / Metrolink is to proceed on the word of the Government, will this be mean that demolition of the protected structures on O'Connell and Moore Streets will proceed before both the larger Dublin Central and associated Metrolink developments are to proceed?</p> <p>Is this the intention of the developers (the Dublin Central applicant ((5126/22)) and today's railway order, (NA29N.3 14724 - 314724) submitted by Transport Infrastructure Ireland? The question must be asked, because the Dublin Central application and previous applications and this Metrolink application go to some trouble to knit the protected structures and the history of O'Connell and Moore streets into the development process.</p> <p>However, a later application (given the 15 year timeline), could simply alter the plan again, with the historic materials lost or disposed of (given the length of time involved), this is a distinct possibility.</p> <p>In fact, Metrolink was first promised in 2005 in the Transport 21 Plan. When revised plans were announced in 2018, it was scheduled to be operational by 2027. However, the plan will be delayed well beyond that time period or could be cancelled or scaled back at some future time.</p> | <p>While both applications (MetroLink &amp; Dublin Central) are directly linked through the design integration of the O'Connell Street Station underground structure, as noted, Dublin Central developments proposals are subject to a separate application.</p> <p>In the case of MetroLink proceeding before the Dublin Central development at the proposed site for the O'Connell Street station, and in advance of any works commencing, the MetroLink appointed Project Conservation Architect (PCA) will undertake a full Structural and Condition Surveys of any built and cultural heritage items that will be subject to removal or protection within or close to the site.</p> <p>The Project Conservation Architect (PCA) surveys will identify any heritage materials to be removed to secure storage (followed by conservation and reinstatement) or protection in-situ if they are to be retained. The PCA will also prepare specifications for these works. A specialist Heritage Works Contractor will be appointed to remove, store and conserve any required elements.</p> <p>The Main Construction Works Contractors will appoint Consultant Conservation Architects to implement any required preservation in situ including the protection measures for buildings retained.</p> <p>Chapter 26: Architectural Heritage and specifically section 26.4.4.10.1 O'Connell Street Station lists the various buildings impacted at the proposed site as follows:<br/>- Protected Structures within the proposed site.<br/>- Important Buildings that lie close to the proposed site.</p> |
| 3                                                                                                                                                                                                                                                 | Metro Timeline                                              | 2        | <p>The Chief Executive of Transport Infrastructure Ireland (TII), Peter Walsh, told the Dail's Public Accounts Committee (PAC) last February 2022 that he hoped Government approval will be granted and that a submission would be made to An Bord Pleanála in the second half of the year. He said the planning process is out of the TII control and whether there is a judicial review challenge "will add a period of time that we cannot determine".</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | <p>TII's position on this matter remains as outlined by P.Walsh (CEO).</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

| Observation on Dublin Central Site 2 and Metrolink'. Case reference: NA29N.314724 Estuary through Swords, Dublin Airport, Ballymun, Glasnevin and City Centre to Charlemont, Co. Dublin (Metrolink), by Brian McGrath, 16 Glenmore Road, Dublin 7 |                                                     |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |  |
| 4                                                                                                                                                                                                                                                 | Issues with the Dublin Central / Metrolink Proposal | 2,3      | As a result, there is a proposed Timeline of Completion in the 5126/22 application of 2034. (Baseline Programme 4.0 p.19.). There is to be a fresh application to be submitted in March 2023 with construction proposed to commence in August 2023. With Dublin Central clearly tied in to Metrolink, (for purposes of the present application) why is a planning application being tied so clearly together with a rail proposal whose timeline is so vague and unclear and why is it being proposed that a massive building development be allowed to proceed in the city centre for the next fifteen years?                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | The Metrolink station at O'Connell Street has been designed to take account of the plans to develop the Dublin Central project. That project's design and planning permission is independent of Metrolink other than consideration of how Metrolink can tie into the proposed development works.<br><br>The development of the Dublin Central site can take place with or without Metrolink being in place.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |  |
| 5                                                                                                                                                                                                                                                 | Objection                                           | 3        | I object to the proposed Metro link enabling works to be carried out by DCGP Ltd as part of its application of the Dublin Central Project once the proposed railway order has come into operation. This is to enable these preliminary works at Site 2 (Upper O'Connell Street Terrace) on O'Connell Street. This railway order is being proposed by Transport Infrastructure Ireland as part of the Dublin Central proposal. Given that this proposed preliminary construction is to be started in advance of the Metrolink project, (whose timeline is vague and uncertain), Dublin City Council are proposing to grant permission to demolish the Upper O'Connell Street terrace as that is where 'Site 2' is located.<br><br>Dublin City Council (as part of its legal obligations under the Planning and Development Act 2000, maintains a list of protected structures in Dublin City with several of the Upper O'Connell Street terrace buildings included. The proposal to demolish and reconstruct the Upper Terrace is in direct contravention of the protected status of the buildings on O'Connell Street.          | It should be noted that the submission is not correct to say that "This railway order is being proposed by Transport Infrastructure Ireland as part of the Dublin Central proposal". In actual fact, the Metrolink project has selected its O'Connell Street station following a site selection process that identified the proposed site, and is independent of any proposed development on the Dublin Central lands. Metrolink has been designed to allow both projects to take place and coordinate activity where necessary. Metrolink can be constructed with or without Dublin Central being permitted or constructed but has built in the flexibility to be constructed in either scenario. This includes demolition of any structures required to construct the Metrolink station on the proposed site. (See also response to item 6 below).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |  |
| 6                                                                                                                                                                                                                                                 | Objection                                           | 3,4      | The buildings proposed for demolition as part of Site 2 on the Dublin Central site are as follows:<br>43, O'Connell St. Upper, Dublin 1<br>44 O'Connell St. Upper, Dublin 1<br>No. 45 Upper O'Connell Street<br>52-54 O'Connell St. Upper, Dublin 1<br>55-56 O'Connell St. Upper, Dublin 1<br>57 O'Connell St. Upper, Dublin 1   _Commented [BM1]: Make sure that the Byrne building is not No 58.<br>58 O'Connell St. Upper, Dublin 1<br>61 O'Connell St. Upper, Dublin 1<br><br>Removal and rebuilding constitutes destruction of these unique pieces of Dublin architecture, these date from the 18 th century, to the rebuilding after the war of independence, to the art deco (Carlton) cinema of the 1930's.<br><br>The 1916-22 street buildings are fine examples of architecture, and constitute not merely fine facades of cut stone and red and brown brick, but Portland stone on O'Connell Street. These buildings constitute a historic record of O'Connell Street's 18th century origins as well as its subsequent reconstruction post 1916 and 1922 and which were clearly carried out to a very high standard. | Please note, of the buildings listed in the submission, Property No. 61 O'Connell Street Upper is not part of MetroLink's proposed works and is not being acquired, either in whole, or in part by TII.<br><br>The Planning and Development Act 2000 (as amended) requires all Local Authorities to maintain a Record of Protected Structures in their respective development plan 'for the purpose of protecting structures or parts of structures'.<br><br>For the DCC administrative area, the Record of Protected Structures is contained within DCC Development Plan 2022-2028 (Volume 4). Of the properties listed in the submission, No.s 45 and 55-56 O'Connell Street Upper are not included in the DCC Record of Protected Structures. For properties No. 43, 44, 57 and 58 the protected structure status applies to the front facade of the buildings only (RPSs 6023-6027). For No. 52-54 (RPS 6025) the protected structure status applies to the upper front facade of the buildings only.<br><br>Section 57 of the Planning and Development Act 2000 (as amended) does allow for demolition of Protected Structures in exceptional circumstances. However it is important to note that all of the elements of the buildings listed in the submission, that are afforded specific protection by means of inclusion in the Record of Protected Structures, are being proposed for retention in accordance with both the MetroLink Railway Order Application and Dublin Central Site 2 Planning Application. |  |
| 7                                                                                                                                                                                                                                                 | Concluding Objection                                | 4        | Consequently, I object to the Railway order submitted by Transport Infrastructure Ireland as these works would involve the demolition of the Upper O'Connell Street terrace and that the idea of placing a subway station at this site is badly conceived and deserves reconsideration given the uncertain timeline of the Metrolink project.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | The Metrolink Railway Order application is for the works that are required to construct the Metrolink project. That project's design and planning permission is independent of Metrolink, other than consideration of how Metrolink can tie into the proposed development works. With the exception of the proposed O'Connell Street Station underground structure, the construction of Dublin Central is not part of the Railway Order works.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |  |

| Submission No.                                                                                                                |              |          | 030                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

| Letter Re: Submission on: Railway (Metrolink - Estuary to Charlemont via Dublin Airport) Order [2022] Reference: NA29N.314724 |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| 1                                                                                                                             | Letter       | 3        | I write to request that An Bord Pleanála refuses approval for this Railway Order. The proposal to demolish the Markiewicz Sports and Fitness Leisure Centre, the 70 apartments in College Gate and the 8 homes on Townsend Street, is both unacceptable and unnecessary. This is not an objection to the MetroLink project as a whole, but to the planned destruction of this inner city community and extremely valuable public amenity.                                                                                                                                         | TII are aware of the impacts of the works on both the local community and on users of the sports facilities. TII have assessed 12 options for this location and concluded that the proposed option is preferable despite the impacts evident. TII will continue to work with the community and DCC to provide mitigation wherever feasible. The issues are discussed below.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| 2                                                                                                                             | Letter       | 3        | The Markiewicz Leisure centre includes the only 25 metre public swimming pool in the south inner city, and a fantastic gym. This public amenity is vital for the mental and physical health of everyone who lives and works in the city. The pool is used by people traveling from all over the city. Everyone, from school children to senior citizens, from people doing physical rehabilitation to competitive swimmers, rely on this facility. It is also a vital social outlet for all the people who use it. [Ref: Markiewicz Leisure centre 25 metre public swimming pool] | TII note the importance of the Markiewicz Leisure Centre to the local community and the loss of this amenity is regrettable.<br><br>TII will continue to work with DCC in relation to the development of an alternative sports and recreational facility to replace the Markiewicz leisure centre and intends to fund the alternative. However, TII does not have control over that development, which is part of DCC's function to provide public sport and recreational facilities in its function area. DCC may or may not be in a position to deliver it in parallel with the MetroLink project. Accordingly, the Board should assess the MetroLink project on the basis that the alternative may not be available. The impact would then be significant, but nonetheless one that would not outweigh the strategic scale long term benefits that MetroLink will deliver.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| 3                                                                                                                             | Letter       | 3        | The 78 homes proposed to be demolished are all built in recent years and of high quality. The demolition of these homes would mean the clearance of an inner city community, and a significant loss of high quality housing during the state's worst housing crisis                                                                                                                                                                                                                                                                                                               | As detailed in Chapter 11 (Population and Land Use) of the EIAR, for those residential properties that will need to be acquired permanently, suitable measures will be proposed for residents under the provisions of the Railway Order. In particular, a Land Acquisition Strategy has been prepared to provide information to residents and set out the arrangements in place for affected property owners. As detailed in Chapter 21 (Land Take), section 21.6 Mitigation Measures, in recognition of the impact on residential cases where properties are to be acquired and given the unique circumstances surrounding the proposed impacts to the College Gate apartment complex, TII will engage the services of a property advisory company to engage directly with property owners. Property owners will be invited to participate in a Discretionary Scheme. The Discretionary Scheme will offer property owners the opportunity to negotiate and reach a 'Pre-Agreement' on both a baseline residential unit price and other matters of compensation that an owner would normally be entitled to under the compensation stage. This will provide the parties with as much certainty as possible at this early stage.<br><br>TII will use reasonable endeavours to make arrangements to provide residential property owners with as much time as possible in which to relocate, beyond that which is provided for under the statutory process.<br><br>Full details of the Land Acquisition Strategy are contained in Chapter 11 (Population and Land Use) and Chapter 21 (Land Take), and on <a href="http://www.metrolink.ie">www.metrolink.ie</a> . |
| 4                                                                                                                             | Letter       | 3        | Transport Infrastructure Ireland's (TII) own Environmental Impact Assessment Report submitted with the application describes the impact on the population of the area of this proposed demolition as "significant", (Volume 2, Introduction and Project Description, 7.7.10.9.2)                                                                                                                                                                                                                                                                                                  | TII accept there are negative impacts both in the loss of amenity and in housing. As noted in Section 7.7.10.9.2 of the EIAR, the impact of the proposed demolition is significant. This has been further assessed in Chapter 11 of the EIAR and mitigations discussed. However with planned mitigations, TII hopes to reduce the overall impact as noted below as outlined in the responses to item 2 and item 3 above.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

| 5                                                                                                                             | Letter       | 3        | Following objections about the temporary effects during construction on Na Fianna GAA pitches in Glasnevin and on the Luas Green Line service from Dunville Avenue, TII performed extremely significant U-turns in relation to their plans for the Griffith Park Station and the upgrade of the Luas Green Line. And so I cannot accept that they are unable to amend their plans for the Tara MetroLink Station in order to avoid the permanent loss of a significant number of good quality homes and the only public 25 metre swimming pool and gym in the city centre, at such a time of crisis in housing and homelessness.                                                                                                                                                                                                                                                                                                    | TII have undertaken a number of alternative analysis (a total of 12 options were considered) for this location which can be seen in Chapter 7 (Consideration of Alternatives) of the EIAR (7.7.10.9). Through this analysis, Option 0 was chosen as the preferred station location. This option was considered to provide the best combination of cost and programme certainty, reduced impact on traffic and utilities during the Construction Phase and will adopt the safest form of construction. This proposed station location also retains a good interchange facility with the Tara Street Dart Station, which is a key project objective.<br><br>As noted, there is potential for significant environmental effects due to the requirement to remove a number of buildings to facilitate the construction of the proposed station. TII will work closely with residents and building users in order to minimise potential impacts. The main procedures to mitigate impacts as outlined in the responses to Item 2 and Item 3 above. |  |
| 6                                                                                                                             | Letter       | 3        | I am concerned that the proposed demolition is considered necessary because it will result in extremely valuable development land then being available for sale by TII In October 2018, before the public consultation process was complete, Hugh Creegan, Deputy CEO of the National Transport Authority (NTA) wrote to Dublin City Councillors:<br>"the route does require the acquisition of the swimming pool and the block of apartments [approx. 70] with all of the implications that arise from that".<br>"It is worth noting that, following construction of the station, the above-ground space is still available for development," he added.<br>I feel that even the possibility that these 78 homes and the leisure centre are being demolished in order to help fund the project, needs to be thoroughly examined.<br>For the above reasons, I request that An Bord Pleanála refuses approval for this Railway Order. | NTA/TII reject this point in the strongest of terms. Such acquisitions in the absence of any evidence are considered very unhelpful to the planning process and more importantly upsetting to property owners and residents who are already in a very challenging position. TII point to the very significant analysis of alternative options that has been undertaken as part of the design development process as outlined in responses above as evidence that NTA/TII have undertaken exhaustive analysis of options to arrive at the preferred option for Tara Station. The loss of property is very regrettable, however as outlined above in the responses to item 2 and item 3, TII will put in place a comprehensive plan with supporting resources to assist with the relocation of residents and the provision of alternatives to the leisure centre.                                                                                                                                                                              |  |

| Observation on a Strategic Infrastructure Development Application |                                       |          |                                                                                                                                                                                                                                                                                                                                                                                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| 1                                                                 | Observation details<br><br>5. Grounds | 3        | We, the committee of Butterfield Residents' Association, wish to make a submission on behalf of our residents relating solely to the permission sought to locate the terminus of MetroLink at Mander's Terrace, Charlemont. BDRA would request that the terminus be located initially at Stephen's Green for the moment so that further excavation can be deferred to allow other options to be explored. | <p>An end of line station at Charlemont, rather than St Stephen's Green has been proposed for the following reasons.</p> <p>The connection from St Stephens Green to Charlemont / Ranelagh is supported by the previous Transport Strategy for Greater Dublin Area (2016-2035) and the current Transport Strategy for Greater Dublin Area (2022-2042). The connection from St Stephens Green to Charlemont / Ranelagh is supported by the current Transport Strategy. The Transport Strategies were prepared by the National Transport Authority, scrutinised by the Joint Oireachtas Committee on Transport, and approved by the Minister for Transport. It notes in section 12.3.2, "Charlemont offers the optimal location for the primary interchange with the Green Line in response to growing demand in the longer term and is an appropriate location to facilitate any potential future metro extensions to serve the southwest, south or southeast of the city region should sufficient demand arise.</p> <p>The proximity of the metro to the Luas line at Charlemont provides for a positive customer experience for all users with short interchange distance and due to the proximity, clear wayfinding and high visibility of the interchange. The interchange arrangements at Charlemont provide for significantly better interchange arrangements compared to an interchange at St Stephen's Green Station. Passengers wishing to interchange between Luas and metro at an alternative St Stephen's Green terminus would face a 500m-walk along a route either through St Stephen's Green park or along the footpath north of the park, which adds significantly to the time for interchange and therefore the overall journey time for passengers and a less positive customer experience for all interchange users. This passenger experience would be reduced further for those with mobility or visual impairments as well as those travelling to/from the airport with luggage.</p> <p>The section of MetroLink route between St Stephen's Green and Charlemont Stations contributes significantly to the overall benefits of the scheme. It serves a significant area of the south city of Dublin and offers enhanced access from the local area to the city centre and a direct connection to Dublin Airport. It serves key trip attractors including residential areas and offices / workplace locations, with high passenger boarding and alighting figures in the peak hours. During the morning peak, at Charlemont station the flows include 1,800 passengers alighting, 2,300 boarding and 1,229 passengers alighting, 2,276 boarding during the evening peak. The passenger numbers contribute significantly to the overall benefits of the scheme and the effect of these benefits outweigh the additional costs that are associated with the delivery and operation of the section from St Stephen's Green to Charlemont station. Further information is available in Chapter 7: Consideration of the Alternatives, section 7.7.8 MetroLink Southern Terminus Location.</p> <p>The location of the interchange at Charlemont does not preclude onward extension south. An interchange at Charlemont is supported by policy including the Dublin City Development Plan 2022 - 2028 and the Transport Strategy for the Greater Dublin Area. As noted by the GDA Transport Strategy 2022-2042, section 12.3.2, "Charlemont offers the optimal location for the primary interchange with the Green Line in response to growing demand in the longer term and is an appropriate location to facilitate any potential future metro extensions to serve the south west, south or south east of the city region should sufficient demand arise."</p> <p>By extending MetroLink to Charlemont it provides for future proofing of the Green Line, bypassing the capacity constrained Luas on-street running section, and ensures potential future connectivity options are enabled, either to the Green Line or for extensions of the metro.</p> <p>The Charlemont Station interchange provides for increased passenger utilization of the MetroLink system, thereby increasing the benefits delivered by the Project, reflected by an improved Project Benefit Cost Ratio (BCR).</p> |
| 2                                                                 | Observation details<br><br>5. Grounds | 3        | BDRA considers a terminus located at Rathmines rather than Charlemont to be a more suitable option for the future. We would like to emphasize that we are fully supportive of MetroLink from Estuary to St Stephen's Green and would wish for work to begin as soon as possible.                                                                                                                          | TII would note that the proposed route alignment from Estuary to Charlemont is consistent and compliant with the GDA Transport Strategy 2022-2042 (published in January 2023) which states that the south city terminus at Charlemont offers the optimal location for interchange with the Green Line in response to growing demand in the longer term and is an appropriate location to facilitate any potential future metro extensions to serve the south west, south or south east of the city region should sufficient demand arise. Further southern extension does not form part of this RO application.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

| Submission No.                                                    |                                       |          | 031                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |  |
| 3                                                                 | Observation details<br><br>5. Grounds | 4        | <p>The following reasons apply:</p> <p>1. Lack of Bus connectivity at Charlemont.</p> <p>Charlemont is not served by many buses. When the BusConnects plan is fully in place Rathmines will be served by the A Spine at a rate of 33 buses per hour at peak times. Passengers using these buses could alight at Portobello and easily access the Rathmines terminus. Conversely, for Charlemont, the same passengers, many bound for the airport with luggage, would face a considerable walk along the canal on pathways not designed for the use of large numbers of pedestrians to use at once.</p> <p>The Railway Order plan contains no proposal for a proper infrastructure to facilitate these commuters. In addition, on arrival in Charlemont, those passengers must also use lifts/escalators to negotiate level changes. Such a scenario has obvious and needless negative consequences for those with mobility difficulties.</p> | <p>Response (1) above explains the rationale for the proposed MetroLink station at Charlemont noting it was chosen on the basis of its interchange potential with Luas, as well as local bus services. The section of the line between St Stephen's Green and Charlemont generates considerable benefits for the scheme in terms of increased patronage.</p> <p>In overall terms, Charlemont Station will provide for improvements to the public transport network resulting in decreases in private car usage/trips, increases in public transport usages and will facilitate walking and cycling to the station, without significantly impacting on the operation of the road network in the area.</p> <p>Future Metro services south of Charlemont do not form part of the Railway Order application. TII's role is to deliver Metrolink as supported by the Transport Strategy for Greater Dublin Area (2022-2042) and Dublin City Development Plan 2022-2028. The connection from St Stephens Green to Charlemont / Ranelagh is supported by the current Transport Strategy. The Transport Strategies were prepared by the National Transport Authority, scrutinised by the Joint Oireachtas Committee on Transport, and approved by the Minister for Transport. It notes in section 12.3.2, "Charlemont offers the optimal location for the primary interchange with the Green Line in response to growing demand in the longer term and is an appropriate location to facilitate any potential future metro extensions to serve the southwest, south or southeast of the city region should sufficient demand arise."</p> <p>A microsimulation VisWalk model has been developed for the immediate area surrounding Charlemont Station during the operational phase. The model covers the full extent of the publicly accessible station area, including the immediate vicinity of the station entrance at street level, the Luas stop and nearby junctions at Charlemont Bridge. In order to accommodate the forecast demand from the proposed Charlemont Station, a new staircase with 2.4m stair width is proposed at the south east corner of Charlemont Luas stop. An elevator will also be provided at this location for persons of restricted mobility. Both are sized for MetroLink to Luas, and Luas to MetroLink passenger numbers.</p> <p>In addition, it is proposed that the pedestrian crossing on R111 Grand Parade will be repositioned to the front of the building being developed by Hines. With this infrastructure in place, the model indicates that the R111 Grand Parade will have an acceptable level of service overall, with some reductions in service seen at the pedestrian crossing where pedestrians are required to wait for a green phase at the signals. Overall, it is considered that the model displays an acceptable level of network performance.</p> <p>The proposed pedestrian crossing on Grand Parade will have minimal impact on the traffic flow along Grand Parade and can be programmed to operate in sync with the existing signalized junction at Grand Parade /Charlemont Street to maintain the flow of traffic movements. When the Project is operational, car mode share will decrease, with a reduction of up to approximately 830 car tips to and from the zones surrounding Charlemont Station over the 12hr period in 2065. In overall terms, the Charlemont Station will provide for improvements to the public transport network resulting in decreases in private car usage/trips, increases in public transport usages and will facilitate walking and cycling to the station, without significantly impacting on the operation of the road network in the area.</p> <p>Furthermore, TII have deliberately designed the Station with minimum set down space (with the exception of a drop-off on Grand Parade for persons of restricted mobility only) or room for taxi ranks so that it does not encourage the Station to be used as a terminus.</p> <p>TII would also note that all MetroLink stations have been designed in accordance with the principle of "Access for All", noting the reason for the provision of lifts within the stations is to provide access to all levels of the station for persons of restricted mobility.</p> <p>Current BusConnect routes run through Camden Street (A Spine) and Leeson Street Upper (E spine), both in a short walking distance from the proposed MetroLink Station therefore is no interaction issues between both project.</p> |  |
| 4                                                                 | Observation details<br><br>5. Grounds | 4        | <p>This proposal is supported in Jasper's report for the NTA</p> <p><i>"The connection to Ranelagh could feasibly be deferred until there is clarity on the future of the Green Line (subject to an improved understanding of how this could physically be delivered in a scenario with Metro operational) "</i></p> <p>For these reason BDRA strongly supports a future terminus at Rathmines rather than Charlemont.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | <p>TII are proposing a station at Charlemont for the reasons set out by responses (1) and (2) above, noting that a station at Charlemont is strategically optimally positioned to extend metro beyond Charlemont in the future, and that the section of the line between St Stephen's Green and Charlemont generates considerable benefits for the scheme in terms of increased patronage.</p> <p>TII do not agree with that the connect to Charlemont/ Ranelagh could be feasibly be deferred until there is clarity on the future of the Green Line.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |  |

| Submission No.                                                    |                                       |          | 031                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |  |

| Observation on a Strategic Infrastructure Development Application |                                       |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |  |
| 5                                                                 | Observation details<br><br>5. Grounds | 4        | 2.Further options for MetroLink have not been explored fully.<br><br>Three options were identified by the NTA:<br>•Continuing the Metro along the Green Luas line<br>•Extending the Metro to UCD<br>•Extending the Metro to South West Dublin                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | As noted by response (2) above, none of the options for extending metro south in the future are precluded should the need arise.<br><br>As noted in response item (3), future Metro services south of Charlemont do not form part of the Railway Order application.                                                                                                                                                                                                                                                                                                                                                                                         |  |
| 6                                                                 | Observation details<br><br>5. Grounds | 4        | The third option is of most interest to BDRA and its residents.<br><br>BDRA contends that the area in between the two Luas lines is very poorly served by public transport at present and that BusConnects alone will not satisfy the future transport needs of this rapidly growing area.<br><br>The feasibility study already made did not capture/reference all the transport needs of the entire area. The study confined itself to a possible Metro to Knocklyon thereby neglecting consideration of the travel needs of the wider area including much of Greater Tallaght/ Ballycullen whose residents have no easy access to the Luas. We would therefore request that a proper feasibility study with appropriate parameters be undertaken to explore this option.<br><br>BDRA considers that the building of terminus at Charlemont would preclude any possibility of further development of this option in the future.                                                                                                                          | As noted by the GDA Transport Strategy 2022-2042, section 12.3.2, "Charlemont offers the optimal location for the primary interchange with the Green Line in response to growing demand in the longer term and is an appropriate location to facilitate any potential future metro extensions to serve the south west, south or south east of the city region should sufficient demand arise.'<br><br>TII assessed the routes within a specific corridor in line with the GDA strategy at that time, this did not include looking at options for metro southwest. Future extensions south of Charlemont do not form part of this Railway Order Application. |  |
| 7                                                                 | Observation details<br><br>5. Grounds | 4        | 3. The environmental benefits for extending the MetroLink to the south-west are many.<br><br>BDRA recognizes that the population of Rathfarnham and its surrounding areas is growing rapidly. Extensive housing development is taking place in Scholarstown and ..... It is already apparent that traffic is seriously gridlocked on local roads because many people rely on cars due to the woefully inadequate bus service in this area. This situation will deteriorate as more people move into these residences with the inevitable rise in carbon emissions.<br><br>The issue of carbon emissions cannot be adequately addressed by excluding the Metrolink to the south west as commuters will still have to rely on cars to commute to work, for family visits, social events etc. thus adding to daily gridlock and longer journey times and all the while producing further harmful emissions.<br><br>BDRA believes that the case for extending the MetroLink to the south-west is a very strong one. The human and economic benefits are many. | As noted by the responses above, the proposed station at Charlemont does not preclude the future extension of metro (including to the south-west) and is consistent and compliant with the GDA Transport Strategy 2022-2042 (published in January 2023) in which states that the south city terminus at Charlemont offers the optimal location for interchange with the Green Line in response to growing demand in the longer term and is an appropriate location to facilitate any potential future metro extensions to serve the south west, south or south east of the city region should sufficient demand arise.                                      |  |

| RE: Metrolink Railway Order from Estuary through Swords, Dublin Airport, Ballymun, Glasnevin and City Centre to Charlemont, Co. Dublin |                                    |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                                                                                                                                                                                                                                                                                                                                                                                    |
| 1                                                                                                                                      | Associated infrastructure upgrades | 2        | Cairn also welcome and support the associated infrastructure upgrades which will be undertaken to facilitate the Metro. We recognise that the majority of associated infrastructure upgrades such as works to the Estuary Roundabout, and provision of enhanced pedestrian and cycle connectivity towards the proposed stations are outside the scope of this proposed development. However we would request that these works are proritised to ensure they are in place for the delivery of Metrolink. | While the infrastructure upgrades referred to by the observation do not form part of the MetroLink Railway Order application or fall under the control of TII, the MetroLink project will work closely with the National Transport Authority and Fingal Co Council to realise the benefits of an integrated transport network, a key strategic objective of the MetroLink project. |
| 2                                                                                                                                      | Delivery of other developments     | 2        | Metrolink is viewed as a critical development for unlocking the development potential of parts of the city. However Cairn would request that the delivery of Metrolink is not tied to the delivery of any other development in the city, such as through phasing requirements for either Metro or individual developments.                                                                                                                                                                              | TII have developed the MetroLink project so that it will be constructed independently of other developments                                                                                                                                                                                                                                                                        |
| 3                                                                                                                                      | Request for further engagement     | 2        | We would welcome the opportunity to engage further on this project and request we are updated as appropriate regarding this development.                                                                                                                                                                                                                                                                                                                                                                | The MetroLink project will continue to consult and engage with stakeholders as the Project progresses. In addition regular Project updates are provided at <a href="http://www.metrolink.ie">www.metrolink.ie</a>                                                                                                                                                                  |

| 2                                                                                                                                           | Preamble                | 1        | Notwithstanding this, we have concerns regarding elements of the proposed scheme, in particular the lack of privacy to our property, anti-social behaviour and the level of baseline information and assessment carried out in relation to noise and vibration.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | We have reviewed your concerns and have provided responses below.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |  |
| 3                                                                                                                                           | 1.3, 1.4, 1.5, 1.6, 1.9 | 2        | ...the Fingal County Development Plan (the “FCCDP”) which states that 'Open spaces must be designed to a high specification. Great emphasis must be placed on the quality of open space and details of the proposed landscaping, hard and soft, of these spaces will be required at the planning application stage. Public open spaces should be overlooked and designed in such a way that anti-social behaviour is reduced through passive surveillance [ . . .]’.<br><br>The Open Space proposed ... does not conform to best practice and is contrary to the FCCDP.<br>...have included mark ups which illustrate:<br>a. The specific Open Space area of concern (area shaded in red, and black dotted line)<br>We are concerned that the current design which has not taken into consideration Best Practice and with the absence of passive surveillance will result in anti-social behaviour.<br>The potential for the proposed Open Space to increase anti-social behaviour and reduce privacy and residential amenity is contrary to the Zoning Objective and Vision set out in the FCCDP for this area. | TII note your concerns, but the design has been developed fully in accordance with best practice and particularly in relation to passive surveillance. The planned outcome of the Metrolink architectural and urban realm design as set out in the EIAR documents supporting the Railway Order has been developed in discussions with Fingal County Council (FCC) to align and compliment the proposed R132 Connectivity Project in accordance with the Fingal County Development Plan. The open space is set to discourage anti-social behaviour, through the attractive setting, use of public lighting, open sightlines, and avoidance of areas where individuals and groups of people can hide. TII intentions in relation to the final landscape proposals around your property are further detailed in response number (4) below. Therefore the proposed Project does not contravene the Open Space designation within the FCCDP.<br><br>More broadly across the proposed MetroLink, Safety and Security is addressed by EIAR Chapter 6, MetroLink Operations and Maintenance. Section 6.6.5.8 specifically addresses managing the risk of "Vandalism or Anti-Social Behaviour on the Trains or within the Stations", and the wider chapter also addresses the broader design proposals for managing security challenges.                                                                                                                                                                                                                                                                                                                                                               |  |
| 4                                                                                                                                           | 1.3, 1.4, 1.5, 1.6, 1.9 | 2        | The Open Space proposed ... does not conform to best practice and is contrary to the FCCDP.<br>...have included mark ups which illustrate:<br><br>b. The location and orientation of adjoining properties, which highlight that this Open Space will not be overlooked, and will instead be exposed to gable walls and rear gardens<br>We are concerned that the current design which has not taken into consideration Best Practice and with the absence of passive surveillance will result in anti-social behaviour.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | By keeping within the Local Landscape Character Area (LLCA), the proposed MetroLink landscape reinstatement along the R132 between the Estuary and Pinnock Hill Roundabouts provides an integrated series of small local parks complete with play facilities, seating, and planting, adjacent to the residential areas and which interconnects, encouraging pedestrian and cycle use, to form part of the longer green ribbon connecting the broader Swords community with MetroLink and across the R132.<br><br>The proposed Project has been designed taking into account the R132 Connectivity Project promoted by Fingal County Council. The R132 Connectivity Project received approval by An Bord Pleanála on 20 January 2022 (planning application reference number JP06F.310145). The R132 Connectivity Project aims to improve the connectivity and safety of pedestrians and cyclists moving along, and across, the R132 and enhance facilities for all road users with particular benefits for those choosing sustainable modes of transportation such as bus users, cyclists and pedestrians. The planned outcome of the Metrolink architectural and urban realm design for this linear park is to discourage anti-social behaviour, through the attractive setting, use of public lighting, open sightlines, and avoidance of areas where individuals and groups of people can hide.<br><br>Further acknowledging your concerns, TII is committed to working with local resident’s groups to align with Fingal County Council plans for urban connectivity across the R132 with local residents concerns and hope to reach agreement on these matters ahead of the oral hearing. |  |

| Letter Re: NA29N.314724 - Estuary through Swords, Dublin Airport, Ballymun, Glasnevin and City Centre to Charlemont, Co. Dublin (MetroLink) |               |                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |               |                |         |      |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| 5                                                                                                                                           | 1.7           | 2              | <p>Privacy</p> <p>The applicants acknowledge that residents closest to Open Space would view the intervisibility as a reduction of their privacy. Notwithstanding this acknowledgement, no apparent meaningful measures are proposed for residents directly adjoining the proposed open space.</p> <p>It is unclear from the information provided in the planning application and associated drawings, what boundary treatments, if any, are being proposed for the southwest boundary of the Open Space which adjoins our property and rear garden. There is no apparent proposal for screening or fencing. The boundary of our rear garden which directly adjoins the proposed Open Space consists of a dwelling built up against our boundary wall that is under compulsory purchase order for the metro north (is therefore due to be demolished) and hedging.</p> <p>A lack of appropriate screening will result in an unacceptable intrusion of our privacy. The potential for the proposed Open Space to increase anti-social behaviour and reduce privacy and residential amenity is contrary to the Zoning Objective and Vision set out in the FCCDP for this area. Zoning type, Objective and Vision are summarised below.</p> <p><i>Zoning</i><br/>RS' Residential:<br/><i>Objective</i><br/>Provide for residential development and protect and improve residential amenity<br/><i>Vision</i><br/>Ensure that any new development in existing areas would have a minimal impact on and enhance existing residential amenity.</p> | <p>Across the proposed MetroLink, safety and security is addressed by EIAR Chapter 6, MetroLink Operations and Maintenance. Section 6.6.5.8 specifically addresses managing the risk of "Vandalism or Anti-Social Behaviour on the Trains or within the Stations", and the wider chapter also addresses the broader design proposals for managing security challenges, including:</p> <ul style="list-style-type: none"><li>•The architectural and urban realm design is designed to discourage anti-social behaviour, for example through the attractive setting, use of public lighting, open sight-lines, and avoidance of areas where individuals and groups of people can hide.</li><li>•The Operational Control Centre (OCC) will be the central communications and operational hub, located in the administrative building at the Dardistown Depot. The role of the OCC will include monitoring and managing passenger safety and security and antisocial behaviour. The OCC will direct and deploy staff to manage incidents when required.</li><li>•The access control and intrusion detection (ACID) system will identify intruders trying to enter locations where unauthorised access is prohibited.</li><li>•CCTV will be installed throughout the MetroLink system including at station entrances, public realm and on trains to provide general security and surveillance of all the public areas, and to inform, if required, the directing and sending of staff to manage the situation.</li><li>•There will be a MetroLink staff presence along the route for assisting passengers, security and deterring anti-social behaviour.</li></ul> |               |                |         |      |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| 6                                                                                                                                           | 2.2 - 2.4     | 3, 4           | <p>Noise and vibration concerns</p> <p>It is our opinion that the EIAR submitted does not identify and describe adequately the direct and indirect significant impacts on the environment. It appears that the document is deficient and inadequate in terms of the statutory requirement for: the description of the likely significant effects of the project on the environment; a description of the required mitigation measures</p> <p>2.2 AT50 Attended Noise Monitoring is the most representative of all noise monitoring locations for our property. AT50 is situated at a Cul-de-sac at end of Seatown West, bordering roundabout linking R132 and R125.</p> <p>2.3 The baseline noise recorded at this location is set out in the EIAR and detailed in the Table below.</p> <p>2.4 It would appear that this attended survey only recorded day-time measurements. There is an absence of information on baseline night-time (2300-0700) levels relative to this location.</p> <table><tr><td>Attended Location</td><td>dB LAeq,15min</td><td>dB LA90, 15min</td><td>dB Lden</td></tr><tr><td>AT50</td><td>59</td><td>61</td><td>62</td></tr></table>                                                                                                                                                                                                                                                                                                                                                                             | Attended Location                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | dB LAeq,15min | dB LA90, 15min | dB Lden | AT50 | 59 | 61 | 62 | <p>TII would like to provide the assurance that the potential noise disturbance impact on your property as a result of the proximity of the proposed retained open cut section. The impacts has been carefully assessed against an established baseline, as reported in the EIAR and are summarised below, for both construction and operation of the completed MetroLink. Mitigation measures are also described within Chapters 13 &amp; 14, Appendix A5.1 Outline CEMP and Appendix A14.6 TII Airborne and Groundborne Noise Mitigation Policy.</p> <p>Baseline Surveys and Construction Noise Thresholds</p> <p>EIAR Chapter 13.3.1.3, Baseline Noise Environment AZ1: Northern Sections provides details on the baseline noise surveys undertaken in preparing the EIAR for the Railway Order. Table 13.24 further lists the locations of both: the Unattended (Long term – one week) Noise Surveys, of which UT4 to UT7 are representative of the environment of your property; and supplementary daytime Attended Noise Surveys, of which AT3 to AT6 are representative of the environment of your property, with AT50 closest to your property. The noise survey results from these locations are listed in Table 13.25. As referenced in Section 13.2.4.2, 20 long term noise surveys were undertaken along the alignment (in addition to the unattended surveys referenced by UT codes). These surveys lasted approximately 1 week at each location and included night time measurements. These locations include AT4,5,6 and UT7 which are in close proximity to your property allowing us to have excellent daytime and nighttime baseline noise data for your area.</p> |

Dublin (MetroLink) |              |          |                                                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
|                                                                                                                                             |              |          |                                                                                | <p>As stated in EIAR Chapter 13: Airborne Noise and Vibration, section 13.2.6.1.3, the principles for the management of Airborne Noise &amp; Vibration in the EIAR are based on the BS 5228-1 standard. From these survey results the Construction Noise Threshold (CNT) for daytime and night-time was calculated using this standard for receptors based on existing rounded ambient noise levels. In accordance with this standard, the CNT for all receptors Estuary to Seatown is set at 75 dBA (Days 0700 to 1900) for the Cut &amp; Cover construction, and 55 dBA (Nights 2300 – 0700) for above ground track laying.</p> <p>Before commencing works, Contractors will develop a Construction Noise &amp; Vibration Management Plan. This will involve a detailed investigation of potential noise and vibration impacts associated with each construction compound. The assessment will identify through modelling and calculation, predicted construction noise levels, identification of potential exceedance of Construction Noise Thresholds (CNTs), identification of required noise mitigation measures specific to each work area to minimise noise and vibration impacts so far as is reasonably practicable.</p> <p>As part of the CNVMP a further baseline noise study will be undertaken prior to the commencement of construction works to characterise the prevailing noise environment at impacted noise sensitive locations (NSLs). This information will be used to inform the relevant CNTs. Given the extensive nature of the proposed Project and the number of construction sites and sensitive receptors, the CNT will vary across the project on a site by site and receptor by receptor basis. If the Contractor is unable to reduce the impacts sufficiently, and the residual levels are such that widespread community disturbance or interference with sleep is likely to occur, TII will consider whether the provision of further Noise Insulation (NI) or Temporary Rehousing (TRH) would be appropriate at locations where eligibility for either has been established. Please refer to the TII Airborne and Groundborne Noise Mitigation Policy (Appendix A14.6). Night time baseline noise mesuares have been also concluded and they are provided in Appendic A 13.1 table 7</p> <p>Construction Phase – Airborne Noise and Vibration<br/>Airborne noise impacts will occur along sections of retained cut section during the day time. Tracklaying activities within cut and cover sections will be enclosed with minimal noise emissions at either end of the section opening. This activity will take place typically one-night duration at any one location resulting in a brief to temporary duration of effect.<br/>EIAR Chapter 13 Airborne Noise and Vibration, Table 13.39 summarises the potential significant noise impacts from the construction of the proposed alignment cut and cover and retained sections, which includes receptor 16 for Seatown West. The predicted impact without additional noise mitigation is Significant to Very Significant during some of the work phases. Noise mitigation measures are detailed in section 13.6.1 and include for plant selection, reduction of noise at source and a proposed 4m enhanced construction hoarding at the Seatown West construction boundary. With these mitigations, the construction impacts are reduced to below significant.</p> <p>Construction Phase – Groundborne Noise and Vibration<br/>EIAR Chapter 14 Groundborne Noise and Vibration, Section 14.4.1.1 indicates that there are not predicted to be any significant impacts for the Seatown West buildings.</p> |

Dublin (MetroLink) |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
|                                                                                                                                             |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | <p>Noise Mitigation Plans Approval</p> <p>The use of a standard 2.4m high construction site hoarding will be used as standard around all construction compounds including linear work areas along the R132 during the construction of the above ground rail and retained cut stations. The use of enhanced construction hoarding, acoustic screening or enclosures will be required at a number of construction compounds across the proposed Project. Use of 4m hoarding have been identified at you location as a primary noise mitigation measures together with other noise control at source options.</p> <p>Nevertheelss, prior to the commencement of the construction works at each compound, the Contractor will conduct an individual site assessment as part of the CNVMP to verify the height and position of screening to control noise impacts based on the most up to date construction methodologies and input data TII's appointed contractor(s) will prepare for Fingal County Council consultation and approval a Construction Noise and Vibration Management Plan (CNVMP) for the proposed Project as referred to in EIAR Appendix A5.1, Outline Construction Environmental Management Plan (CEMP). The CNVMP will be a live document and will include a full monitoring and auditing programme which will be agreed with Fingal County Council prior to the commencement of the Construction Phase, including predetermined monitoring trigger levels to ensure noise and vibration limits are not breached. Table 6.2: Noise and Vibration Measures of the Outline CEMP outlines the monitoring programme requirements.</p> <p>The Transport Infrastructure Ireland (TII) Airborne Noise and Ground-borne Noise Mitigation Policy (Appendix A14.6 of EIAR Chapter 14) also sets out the construction noise insulation and temporary rehousing measures to be implemented where required.</p> <p>Operational Noise and Vibration</p> <p>EIAR Chapters 13 and 14 present a comprehensive and detailed assessment of operational ground borne and airborne noise and vibration. No residual noise impacts are identified at this location during operation. The calculated rail noise levels across the proposed Project are not significant in terms of any widespread community disturbance and results in a not significant to slight impact when added to the prevailing noise environment (Please refer to "Baseline Surveys and Construction Noise Thresholds" above).</p> |
| 7                                                                                                                                           | 2.5 - 2.6    | 3        | <p>2.5 Having regard to the location of our property in proximity to the above ground section of the Metro Scheme, and taking into consideration the proposed operating hours of the Metro (05:30 and 00:30 for 365 days per year ), it is not acceptable to carry out a noise assessment for properties in this location without the appropriate baseline information for the operating hours associated with the development.</p> <p>2.6 Furthermore, it is stated in the EIAR that ‘Due to the nature and duration of the proposed Project, even where all reasonable measures have been taken to reduce noise levels, at some locations residual levels mean widespread community disturbance or interference with sleep is likely to occur. In such circumstances, Til will consider whether the provision of further Noise Insulation (NI) or Temporary Rehousing (TRH) will be appropriate at locations where eligibility for either has been established.’. It is imperative that residents who are likely to be subject to interference with sleep must be identified at this stage of the planning process. It is also submitted that definitive satisfactory mitigation measures to reduce any identified significant impact are set out as this stage. It is unacceptable that such assessment and mitigations measures are detailed after an EIA has been carried out.</p> | <p>EIAR Chapter 13.3.1.3, Baseline Noise Environment AZ1: Northern Sections provides details on the baseline noise surveys undertaken in preparing the EIAR for the Railway Order. Table 13.24 further lists the locations of both: the Unattended (Long term – one week) Noise Surveys, of which UT4 to UT7 are representative of the environment of your property; and supplementary daytime Attended Noise Surveys, of which AT3 to AT6 are representative of the environment of your property, with AT50 closest to your property. The noise survey results from these locations are listed in Table 13.25. The baseline noise surveys results have been used to model the potencial operational noise impact. Please refer to section 13.2.5.2 of the EIAR in relation to noise where the operational hours are referenced including nighttime hours which are Monday to Sunday 05:30 to 00:30.</p> <p>The impact assessment has been carried out as part of the EIAR and can be seen within Chapters 13 &amp; 14. This assessment provides an identification of anyone who is affected with residual noise impacts and are eligible to apply for the noise mitigation policy. This results of this assessment within your area is in Section 13.7.1.1.1 of Chapter 13. As stated within Appendix A14.6 TII Airborne &amp; Groundborne Noise Mitgation Policy, there will be additional assessments carried out following the completion of the detailed design stage and finalisation of the proposed construction methodology. Where the updated predicted airborne noise levels still exceed the trigger values as presented in Appendix A, the owner/occupier of properties in close proximity to the works will be contacted and advised that they are eligible to enter into discussions with TII in respect to further mitigation measures to be put in place. This will be at least 6 months in advance of the commencement of construction works.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

| Letter Re: NA29N.314724 - Estuary through Swords, Dublin Airport, Ballymun, Glasnevin and City Centre to Charlemont, Co. Dublin (MetroLink) |                 |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                   |
| 8                                                                                                                                           | 2.7             | 4        | 2.7 It is also stated in the EIAR that 'The outline CEMP will encompass a Noise and Vibration Management Plan (CNVMP) which will be formulated for the construction phase and used by all contractors based on the mitigation measures outlined in this chapter, in Chapter 14 (Groundborne Noise & Vibration) and the outline CEMP (Appendix A5.1). The CNVMP will be a live document. This will involve a detailed investigation of potential noise and vibration impacts associated with each construction compound. The assessment will identify through modelling and calculation, predicted construction noise levels, identification of potential exceedance of CNTs, identification of required noise mitigation measures specific to each work area to minimise noise and vibration impacts so far as is reasonably practicable'. It is again unacceptable that such assessments and mitigation measures are proposed to be carried out post-consent. | TII disagree with the statement that assessment and mitigation measure are left post consent. The detail of the assessments and mitigation proposal within the EIAR supporting the Railway Order have been outlined in response number (6) above. |
| 9                                                                                                                                           | Final Paragraph | 4        | <p>Closing Statement</p> <p>We respectfully request that An Bord Pleanála request Further Information from the applicant which would:</p> <p>1. Provide for revised plans and particulars in relation to the Open Space referred to above, ensuring that a safe-by-design approach is taken to avoid anti-social behaviour and to ensure residential amenity is not negatively affected.</p> <p>2. Provide revised noise and vibration surveying and assessment to ensure that all potential significant effects of the Metro Scheme are addressed during the planning process and appropriate mitigation are detailed in the EIAR for any such significant impact, such as interference with sleep, as referred to by the applicant.</p> <p>Yours faithfully,</p> <p>Caitriona and Ciaran Byrne</p>                                                                                                                                                           | See response numbers (1 to 6) above.                                                                                                                                                                                                              |

                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| 1                                                                                                                                            | Letter       | 1        | <p>Since the original " emerging proposed route "from Swords to Sandyford was first proposed, there have been a large number of factors which have had a modifying effect on the proposed route:</p> <p>1) The original study was done on the basis of Swords to Sandyford : there has been no major study done on the proposed terminal at Charlemont. For something so vital to the success of Metrolink : in my view, this is a very serious omission.</p> | <p>TII would disagree with your assertion that "there has been no major study done on the proposed terminal at Charlemont". TII have undertaken considerable analysis, as set out by EIAR Chapter 7, Consideration of Alternatives, section 7.7.8 and Appendix A7.9 that concluded Charlemont was a better interchange than St Stephen's Green for the reasons set out below.</p> <p>The Board is required to have regard to the likely consequences for proper planning and sustainable development in the area in which it is proposed to carry out railway works (section 43(1) of the 2001 Act) and as such the following matters are relevant.</p> <p>The connection from St Stephens Green to Charlemont / Ranelagh is supported by the current Transport Strategy for Greater Dublin Area (2022-2042). The Transport Strategies were was prepared by the National Transport Authority, scrutinised by the Joint Oireachtas Committee on Transport and approved by the Minister for Transport. It notes in section 12.3.2, "Charlemont offers the optimal location for the primary interchange with the Green Line in response to growing demand in the longer term and is an appropriate location to facilitate any potential future metro extensions to serve the south west, south or south east of the city region should sufficient demand arise."</p> <p>The Transport Strategy is "a consideration material to the proper planning and sustainable development of the area or areas in question." Development Plans are required to be consistent with the Transport Strategy. The Dublin City Development Plan 2022-2028 envisages this station at Charlemont in policy SMT22 "To support the expeditious delivery of key sustainable transport projects so as to provide an integrated public transport network with efficient interchange between transport modes, serving the existing and future needs of the city and region and to support the integration of existing public transport infrastructure with other transport modes. In particular the following projects subject to environmental requirements and appropriate planning consents being obtained: ... MetroLink from Charlemont to Swords".</p> <p>Accordingly, the location of the Charlemont station was a strategic decision made at the highest levels of transport and land use planning and such is fully consistent with the proper planning and sustainable development of the area.</p> <p>The proximity of the metro to the Luas line at Charlemont provides for a positive customer experience for all users with short interchange distance and due to the proximity, clear wayfinding and high visibility of the interchange. The interchange arrangements at Charlemont provide for significantly better interchange arrangements compared to an interchange at St Stephen's Green Station.</p> <p>The section of MetroLink route between St Stephen's Green and Charlemont Stations contributes significantly to the overall benefits of the scheme. It serves a significant area of the south city of Dublin and offers enhanced access from the local area to the city centre and a direct connection to Dublin Airport. It serves key trip attractors including residential areas and offices / workplace locations, with high passenger boarding and alighting figures in the peak hours. During the morning peak, at Charlemont station the flows include 1,800 passengers alighting, 2,300 boarding and 1,229 passengers alighting, 2,276 boarding during the evening peak. The passenger numbers contribute significantly to the overall benefits of the scheme and the effect of these benefits outweigh the additional costs that are associated with the delivery and operation of the section from St Stephen's Green to Charlemont station.</p> <p>The location of the interchange at Charlemont does not preclude onward extension south. An interchange at Charlemont is supported by policy including the Dublin City Development Plan 2022 - 2028 and the Transport Strategy for the Greater Dublin Area. As noted by the GDA Transport Strategy 2022-2042, section 12.3.2, "Charlemont offers the optimal location for the primary interchange with the Green Line in response to growing demand in the longer term and is an appropriate location to facilitate any potential future metro extensions to serve the south west, south or south east of the city region should sufficient demand arise."</p> <p>By extending MetroLink to Charlemont it provides for future proofing of the Green Line, bypassing the capacity constrained Luas on-street running section, and ensures potential future connectivity options are enabled, either to the Green Line or for extensions of the metro.</p> <p>The Charlemont Station interchange provides for increased passenger utilization of the MetroLink system, thereby increasing the benefits delivered by the Project, reflected by an improved Project Benefit Cost Ration (BCR).</p> |

| Re: Railway (MetroLink-Estuary to Charlemont via Dublin Airport) Order 2022 Case Reference Number NA29N.314724 10 <sup>th</sup> January 2023 |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |  |
| 2                                                                                                                                            | Letter       | 1        | <p>2) Since the initial proposals have been published, there has very substantial increase in proposed housing developments to the west of Dublin including the proposed “ City Edge” development which is for circa 40,000 units. In order to keep costs down, these units are proposed to have NO underground car parks and they state:</p> <p>“ while the area is served by the Red Luas line, buses and a rail station at Park West, growing the area will require the development of the Lucan Luas line which is included in the Greater Dublin Transport Strategy as well as a new rail station at Kylemore. A new Luas stop on Naas Road and potentially a new Luas line to Kimmage. “ ( source : Irish Times report 17 August 2022)</p> <p>It is inconceivable that this new development will not be linked into the new Metro.</p> | <p>As set out by EIAR Chapter 4, Description of the MetroLink Project, the overall project objective for the proposed Project, as established by the National Transport Authority (NTA) and Transport Infrastructure Ireland (TII), and as informed by policy context, MetroLink is to 'provide a sustainable, safe, efficient, integrated and accessible public transport service between Swords, Dublin Airport and Dublin City Centre'. (National Development Plan 2021-2030, Box 9.1). The geographic areas described by the observation do not fall within the scope of the MetroLink Project. TII's role is to deliver the MetroLink project as provided for in the previous Transport Strategy for Greater Dublin Area (2016-2035) and the current Transport Strategy for Greater Dublin Area (2022-2042) and as supported by the Dublin City Development Plan 2022 - 2028. The Board is required to have regard to the likely consequences for proper planning and sustainable development in the area in which it is proposed to carry out railway works (section 43(1) of the 2001 Act).</p> <p>Your concern regarding increase of housing developments to the west of Dublin is noted. Additionally, extending the existing Luas network is under the NTA's remit and consideration.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |  |
| 3                                                                                                                                            | Letter       | 2        | <p>3) The original proposal was to utilize part of the Luas Green line in order to build the new Metro line: that the green line would terminate at Charlemont. It would appear that the population on the south side would not merit putting the Metro underground and therefore that the principle used would be to have 5km of cut and cover or retained sections. While this proposal appears to be in abeyance, the idea of cutting off these communities by having a track bisecting area which have had orbital roads for many hundreds of years is most reprehensible: in every draft development plan, the “15 minute “city is touted: to cut off areas in this way does NOT give this 15 minute framework to communities.</p>                                                                                                      | <p>Response (1) details the policy justification for the proposed MetroLink terminus at Charlemont, as approved by the Minister for Transport and in particular notes that the location of the Charlemont station was a strategic decision made at the highest levels of transport and land use planning and such is fully consistent with the proper planning and sustainable development of the area. The proposed MetroLink alignment has not been extended south of Charlemont for the reasons set out by the GDA strategy, section 12.3.10, "The challenges associated with the upgrading of the Luas Green Line to a metro standard of service have led to the emergence of an alternative proposal which seeks to meet travel demand from south of Sandyford along a new light rail corridor which serves UCD post-2042. As such, the upgrading of the Green Line to metro standard is not being pursued as part of this strategy. Instead, for this strategy period, the capacity and frequency on the current Green Line from Sandyford northwards to the city centre will be incrementally increased through the provision of additional tram fleet and services and associated turnback arrangements to meet forecast passenger demand."</p> <p>Further information on the challenges associated with connecting to the existing Luas Green Line can be found in the TII published report: "Constructability Report - Green Line Closure, April 2019, ref <a href="https://www.metrolink.ie/media/ox0p3cjb/constructabilityreportgreenlineclosure.pdf">https://www.metrolink.ie/media/ox0p3cjb/constructabilityreportgreenlineclosure.pdf</a>". This showed that construction works to connect the metro from Charlemont to the Green Line would incur line closures over a period of up to 3-4 years, depending on construction methodology.</p> <p>For this reason it has been necessary to determine the most appropriate interchange and termination location for MetroLink. As noted by the GDA Transport Strategy 2022-2042, section 12.3.2, "Charlemont offers the optimal location for the primary interchange with the Green Line in response to growing demand in the longer term and is an appropriate location to facilitate any potential future metro extensions to serve the south west, south or south east of the city region should sufficient demand arise.' This is also reflected by EIAR Chapter 7, section 7.7.8 MetroLink Southern Terminus Location that explains the rationale for selecting Charlemont as the optimum location for interchange with the Green Line.</p> <p>As noted by the GDA Strategy the selection of Charlemont does not preclude any future connections to the west or south of the city.</p> |  |
| 4                                                                                                                                            | Letter       | 2        | <p>4) The Luas is an incredibly successful piece of infrastructure - but there is another factor not spoken of: in Sandyford, there are several “Park and Ride” car parks which are almost always full: it is presumed that these people drive from another area (west Dublin?) in order to take the Luas. There is then a huge exodus from the Luas each morning at Charlemont with people streaming down along the canal bank – presumably to Grand Canal basin area: it would seem that these people enjoy this walk - and in most European cities, these walking routes are actively encouraged: why would anyone think that to modify the Luas by cutting it off at Charlemont makes any sense?</p>                                                                                                                                     | <p>There are no proposals "modify the Luas by cutting it off at Charlemont". With regards to how MetroLink interfaces with the Luas Green Line please refer to responses (1) and (3) above.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |  |

| 5                                                                                                                                            | Letter       | 2        | 5) If the Metro were to be terminated at St Stephens Green, it would surely give the most potential to link in with these major new developments to the west of the city as well as other potential new sites (the barracks at Rathmines) and the proposed Player Wills housing (287 units) which is not connected or proposed to connect to any Luas or metro?                                                           | Please refer to response (1) above that explains the policy justification, as approved by the Minister for Transport for locating the southern interchange at Charlemont rather than St Stephen's Green.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |  |
| 6                                                                                                                                            | Letter       | 2        | 6) If O'Connell Street and St Stephens Green were to be the central terminus points, it would have an impact on these areas. With future new plans for rejuvenation in this area (proposed refurbishment of the St Stephens Green shopping centre) it surely makes way more sense to locate a major terminus/hub at this point to help improve the further diversification of use.                                        | As noted by response (1) above, by extending MetroLink to Charlemont it provides for future proofing of the Green Line, bypassing the capacity constrained Luas on-street running section, and ensures potential future connectivity options are enabled, either to the Green Line or for extensions of the metro.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |  |
| 7                                                                                                                                            | Letter       | 3        | 7) It is noted that the proposed Metrolink is capable of carrying 20,000 people per hour IN EACH DIRECTION: if the Metrolink terminates at Charlemont, there is a very narrow warren of streets around it and the barrier of the canal with narrow footpaths which makes dissipation of large throngs problematic : if the terminus were at St Stephen's Green, there are many possible options - Luas, buses, taxis etc. | <p>The rationale for locating the southern MetroLink interchange at Charlemont rather than St Stephen's Green is explained by response (1) above.</p> <p>With particular regards to the pedestrian comfort in the vicinity of the proposed Charlemont Station. A microsimulation VisWalk model has been developed for the immediate area surrounding Charlemont Station during the operational phase. The model covers the full extent of the publicly accessible station area, including the immediate vicinity of the station entrance at street level, the Luas stop and nearby junctions at Charlemont Bridge. In order to accommodate the forecast demand from the proposed Charlemont Station, a new staircase with 2.4m stair width is proposed at the south east corner of Charlemont Luas stop. An elevator will also be provided at this location. Both are sized for MetroLink to Luas, and Luas to MetroLink passenger numbers.</p> <p>In addition, it is proposed that the pedestrian crossing on R111 Grand Parade will be repositioned to the front of the building being developed by Hines. With this infrastructure in place, the model indicates that the R111 Grand Parade will have an acceptable level of service overall, with some reductions in service seen at the pedestrian crossing where pedestrians are required to wait for a green phase at the signals. Overall, it is considered that the model displays an acceptable level of network performance.</p> <p>The proposed pedestrian crossing on Grand Parade will have minimal impact on the traffic flow along Grand Parade and can be programmed to operate in sync with the existing signalized junction at Grand Parade /Charlemont Street to maintain the flow of traffic movements. When the Project is operational, car mode share will decrease, with a reduction of up to approximately 830 car tips to and from the zones surrounding Charlemont Station over the 12hr period in 2065. In overall terms, the Charlemont Station will provide for improvements to the public transport network resulting in decreases in private car usage/trips, increases in public transport usages and will facilitate walking and cycling to the station, without significantly impacting on the operation of the road network in the area.</p> <p>Furthermore, TII have deliberately designed the Station with minimum set down space (with the exception of a drop-off on Grand Parade for persons of restricted mobility only) or room for taxi ranks so that it does not encourage the Station to be used as a terminus.</p> |  |

| Re: Railway (MetroLink-Estuary to Charlemont via Dublin Airport) Order 2022 Case Reference Number NA29N.314724 10 <sup>th</sup> January 2023 |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| 8                                                                                                                                            | Development  | 3        | 8) The draft development plan appears to be a well-balanced plan which seeks to create thriving communities all around the city, each with their own characteristics: this proposal which seeks to drop a major hub into a residential area without developing the ancillary facilities such as cafes, shops and public open space. It is not clear how the boundary with the former Carroll's building will be handled - whether it will be secured at evening times which would segregate the area further . | <p>The draft development plan falls outside of the scope of the MetroLink Project and the remit of TII. The proposed MetroLink Station at Charlemont has been integrated with the public realm, however the wider development of the area is a matter for Dublin City Council.</p> <p>As set out by EIAR Chapter 4, Description of the MetroLink Project, section 4.17.12.2 "The Charlemont station is an underground cut and cover station with two public access points, located beside and integrated with an adjacent development (currently under construction). It has surface connectivity to the Luas Green Line along Grand Parade and has two entrance/exits from the station, one onto Grand Parade and one onto Dartmouth Road. The Grand Parade exit provides connectivity to the Luas stop with additional path width provided between the two modes of transport. The site is also characterized by the presence of the Carroll's Building, which is an office building completed in 1964 and listed on the DCC Record of Protected Structures. A landscape avenue of trees and low-level planting segregates pedestrians from the road, creating a safer environment for pedestrian movement in this area. The path widths and circulation routes are improved between the entrance and a Luas stairs and access lift on the western side of the Charlemont Luas stop. The second exit/entrance onto Dartmouth Road has a public plaza integrating seating, raised planters, large mature trees and cycle parking. The station box itself sits adjacent to an office development that is within private ownership. The landscape design within this area is coordinated with the development currently under construction and integrated with the infrastructural requirements. The landscape design here consists of pockets of planting and strategically placed mature trees to integrate and soften the human experience within this zone. Parking spaces and cycle parking are also provided here, as well as ramp access to private parking and office basement." (Chapter 4, section 4.17.12.2).</p> <p>The securing of the Carrolls Building is a matter for the owners of the property, however TII can confirm that any securing of the Carrolls property will not limit access to the MetroLink Station. Access will be maintained to both entrances of the Station, including via the access linking Dartmouth Road to Grand Parade.</p> |

| 1                                                                                                                        | Letter       | 1        | When Dublin City Council and subsequently An Bord Pleanála gave permission for the construction of the Hines Development located between Dartmouth Road and Grand Parade they acted "ultra-Vires" and exceeded their powers. They essentially attempted to predetermine the route of the Metro and the location of the station box when they granted permission for the construction of the roof of a station. | <p>The preferred route for MetroLink was published in March 2019 following a comprehensive route options study. The preferred route was based on the emerging preferred route for the scheme which included a station at Charlemont. The Charlemont Metro Enabling Works were constructed to enable the Charlemont Development to proceed whilst simultaneously ensuring there was an option available to construct a station at Charlemont that avoided unnecessary demolition, took advantage of an available site, provided infrastructure that is integrated with planned development rather than necessitating later changes and retrospective adjustments to a new development or even possible demolition of the new development, whilst providing protected provision for the future extension of the scheme south, if required. As such it was consistent with proper planning and sustainable development at this location.</p> <p>The MetroLink enabling works at Charlemont did not predetermine the route for MetroLink. The location for the MetroLink station at Charlemont was determined as part of the Greenline Tie In Study and at the route option selection stage.</p> <p>It is also important to recognise that the proposed station location at Charlemont is influenced by available vacant land and thus avoids unnecessary demolition.</p> |

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| 2                                                                                                                        | Letter       | 1        | I am not opposed in principle to the construction of a Metrolink however I believe that creating a Terminus at Charlemont is a mistake. The line should terminate at St Stephen's Green which would form a hub - as is the case in other main cities. | <p>TII do not agree that Charlemont is the incorrect location for an interchange with the Luas Green Line for the reasons set out below.</p> <p>The Board is required to have regard to the likely consequences for proper planning and sustainable development in the area in which it is proposed to carry out railway works (section 43(1) of the 2001 Act) and as such the following matters are relevant.</p> <p>TII's role is to deliver the MetroLink project as provided for in the previous Transport Strategy for Greater Dublin Area (2016-2035) and the current Transport Strategy for Greater Dublin Area (2022-2042) and as supported by the Dublin City Development Plan 2022 - 2028.</p> <p>The connection from St Stephens Green to Charlemont / Ranelagh is supported by the current Transport Strategy for Greater Dublin Area (2022-2042). The Transport Strategies were was prepared by the National Transport Authority, scrutinised by the Joint Oireachtas Committee on Transport and approved by the Minister for Transport. It notes in section 12.3.2, "Charlemont offers the optimal location for the primary interchange with the Green Line in response to growing demand in the longer term and is an appropriate location to facilitate any potential future metro extensions to serve the south west, south or south east of the city region should sufficient demand arise."</p> <p>The Transport Strategy is "a consideration material to the proper planning and sustainable development of the area or areas in question." Development Plans are required to be consistent with the Transport Strategy. The Dublin City Development Plan 2022-2028 envisages this station at Charlemont in policy SMT22 "To support the expeditious delivery of key sustainable transport projects so as to provide an integrated public transport network with efficient interchange between transport modes, serving the existing and future needs of the city and region and to support the integration of existing public transport infrastructure with other transport modes. In particular the following projects subject to environmental requirements and appropriate planning consents being obtained: ... MetroLink from Charlemont to Swords".</p> <p>Accordingly, the location of the Charlemont station was a strategic decision made at the highest levels of transport and land use planning and such is fully consistent with the proper planning and sustainable development of the area.</p> <p>The Transport Strategy considers a range of options for the onward extension of MetroLink to meet the demand for travel over the period of the strategy. This includes consideration of the need for the upgrade of the Luas Green Line to metro with a metro extension to Dublin south west, south or south east. Whilst the strategy envisages that further extensions will be delivered after 2042, MetroLink which terminates at Charlemont allows for the possible extension of the metro in all the above directions.</p> <p>The proximity of the metro to the Luas line at Charlemont provides for a positive customer experience for all users with short interchange distance and due to the proximity, clear wayfinding and high visibility of the interchange. The interchange arrangements at Charlemont provide for significantly better interchange arrangements compared to an interchange at St Stephen's Green Station.</p> <p>The detailed analysis done for the Railway Order application further confirms that the section of MetroLink route between St Stephen's Green and Charlemont Stations contributes significantly to the overall benefits of the scheme. It serves a significant area of the south city of Dublin and offers enhanced access from the local area to the city centre and a direct connection to Dublin Airport. It serves key trip attractors including residential areas and offices / workplace locations, with high passenger boarding and alighting figures in the peak hours. During the morning peak, at Charlemont station the flows include 1,800 passengers alighting, 2,300 boarding and 1,229 passengers alighting, 2,276 boarding during the evening peak. The passenger numbers contribute significantly to the overall benefits of the scheme and the effect of these benefits outweigh the additional costs that are associated with the delivery and operation of the section from St Stephen's Green to Charlemont station.</p> <p>The location of the interchange at Charlemont does not preclude onward extension south. An interchange at Charlemont is supported by policy including the Dublin City Development Plan 2022 - 2028 and the Transport Strategy for the Greater Dublin Area.</p> <p>By extending MetroLink to Charlemont it provides for future proofing of the Green Line, bypassing the capacity constrained Luas on-street running section, and ensures potential future connectivity options are enabled, either to the Green Line or for extensions of the metro.</p> <p>The Charlemont Station interchange provides for increased passenger utilisation of the MetroLink system, thereby increasing the benefits delivered by the Project, reflected by an improved Project Benefit Cost Ration (BCR).</p> |

                                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |  |
| Reference Number:NA29N.314724 Railway (Metrolink. Estuary to Charlemont) via Dublin Airport Order 2022, 22 December 2022 |              |          |                                                                                                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |  |
| 3                                                                                                                        | Letter       | 1        | No study has been completed by NTA/TII as part of the entire Metrolink project on the optimal for a city centre terminus. | <p>TII and NTA have carefully considered the options for an interchange with the Luas Green Line as noted by response (2) above, and further expanded on below. Please refer to response item (2) in relation to policy requirements and Charlemont terminus.</p> <p>A number of route options were considered in the process of identifying the Emerging Preferred Route (EPR). These route options included potential station locations on St. Stephen's Green West and St. Stephen's Green East. St. Stephen's Green West was ruled out as the alignment between the proposed Tara Station and a station on St Stephen's Green West would result in an undesirable horizontal reverse curve and an alignment greater than a 1000m long that would necessitate an intermediate intervention shaft located somewhere between these stations to comply with the MetroLink Fire Strategy. Further, as a potential station location, St Stephen's Green West itself is a very constrained location due to the presence of buildings, Luas and St Stephen's Green Park. Maintaining the Luas operational during station construction would be complex and challenging with significant disruption expected, whilst the impacts on St Stephen's Green Park would be greater for a station in this location compared to the proposed location on St Stephen's Green East. This would be the result of; the likely need to place more of the station in the Park compared to the proposed station on St Stephen's Green East; it would impact an area of the Park that has greater amenity value than St Stephen's Green East due to the nearby Park entrance adjacent to the southern end of Grafton Street, and there would be a risk of impacting the existing Park lake. In summary, an alignment that links the proposed Tara, St Stephen's Green East and Charlemont stations is a more direct and economic alignment, does not require additional intervention infrastructure, avoids a complex engineering interface with the Luas Green Line, impacts the Park less and has less potential for disruption during the construction phase. As outlined by EIAR Chapter 3, Background to the MetroLink Project, one of the key objectives of the Project is the integration of it with the wider transport network that also includes for BusConnects and DART+ which are all included under Project Ireland 2040. Together, these projects will result in a reliable, sustainable, affordable, integrated public transport network that will support the economy, help Ireland meet its climate change targets in line with Climate Action Plan 2023 and make Dublin a more liveable and sustainable city.</p> <p>Arising from the decision to postpone the future upgrade of the Green Line to metro services, it is being argued that Charlemont station effectively becomes a terminus station in the short to medium term. In this regard, it is true to say that the Metrolink trains will terminate and turn back at Charlemont station, however the public transport service offering for passengers does not terminate, it transfers from Metrolink to LUAS as part of the integrated transport network.</p> <p>The terminus station for MetroLink is located at Estuary where all of the activities normally associated with a terminus take place. At this location the high capacity public transport offering terminates and the public transport offering transfers to a completely different mode, i.e. Bus . The environmental effect of the MetroLink terminus are accordingly assessed in the EIAR. Charlemont Station does not have the associated infrastructure and services associated with a terminus location and in fact has more in common with a "system turn back location". Charlemont Station is located within an area of high public transport accessibility, linking with the Luas Green Line which offers reasonably similar levels of services and frequency for journeys to and from the south of Dublin. As such, public transport service offering is not considered to terminate, but transfers onto the similar service offered by the Luas Green Line, forming part of a transport corridor running from Cherrywood to Estuary. The associated environmental impacts for the turnback and station at Charlemont have been fully assessed in the EIAR.</p> <p>Charlemont station itself was chosen on the basis of its interchange potential with Luas, as well as local bus services, as outlined above. The section of the line between St Stephen's Green and Charlemont generates considerable benefits for the scheme in terms of increased patronage.</p> <p>If the scheme were to terminate at St Stephen's Green, it would be important to determine where the next station south of St Stephen's Green would be located for a future extension as required in the Draft Transport Strategy for Greater Dublin Area (2022-2042). With single bore tunnel configuration, the maximum distance between stations is 1,000m. If the distance between stations extends beyond 1,000m there is a need for an intervention shaft or separate escape tunnel. Selecting a different station location other than Charlemont within a 1,000m arch south of St Stephen's Green Station will be challenging given the limited space available for a station within this area and it is reasonable to assume that the Station may be located outside the 1km arch, thus requiring the construction of an intervention shaft similar to that currently proposed at Albert College Park between St Stephen's Green and the proposed station location.</p> <p>If a decision was taken to terminate MetroLink at St Stephen's Green, significant changes would be required to the scheme. These would include design changes at St Stephen's Green Station and provision of alternative turnback facilities immediately south of the station.</p> <p>The proposed route alignment from Estuary to Charlemont is consistent and compliant with the GDA Transport Strategy 2022-2042 (published in January 2023) in which states that the south city terminus at Charlemont offers the optimal location for interchange with the Green Line in response to growing demand in the longer term and is an appropriate location to facilitate any potential future metro extensions to serve the south west, south or south east of the city region should sufficient demand arise.</p> |  |

Estuary to Charlemont) via Dublin Airport Order 2022, 22 December 2022 |              |          |                                                                                                                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| 4                                                                                                                        | Letter       | 1        | Continuing the line from St Stephen's Green to Charlemont, at a proposed cost of €650m is an outrageous cost to duplicate the existing infrastructure. | <p>The Board is not responsible for any decisions in relation to the funding the Project. It is solely responsible for assessing whether the Project is consistent with proper planning and sustainable development and that its effects on the environment are acceptable.</p> <p>The responsibility for funding the Project lies with the NTA, the Government and ultimately the Oireachtas. It has received all necessary approvals, including under the Public Spending Code for the making of a Railway Order. It will undergo further scrutiny and approvals, including under the Public Spending Code, before it is funded. It is not appropriate for the Board to make findings in relation to value-for-money that are outside its statutory functions and would cut across those arrangements. Members of the public are entitled to make representations to their TDs in relation to the value-for-money of any element of the Project.</p> <p>TII do not agree with this statement for the reasons set out by response (2) above, noting that infrastructure is not being duplicated given the capacity of the Luas south from St. Stephen's Green is restricted due to on-street running.</p> <p>There is a limit to the potential of the Luas to provide additional capacity in the on-street non-segregated section of the Luas Green Line from Charlemont northwards through the city centre. The nature of this route and the fact that it currently crosses several road junctions (Adelaide Road, Harcourt Street / Hatch Street upper and Harcourt Street / St Stephen's Green south) limit the service to a maximum of 24 trams per hour per direction. The projected demand for this section would require a higher frequency of up to 30 trams per hour and this demand cannot be met with on-street systems (Luas / bus). The interchange between Luas and MetroLink proposed at Charlemont will provide the necessary capacity to address the demand on this corridor and reduce overall travel time for passengers</p> <p>There is also high passenger demand forecast for a Metrolink station at Charlemont, including from the Ranelagh area, which would be lost if St. Stephen's Green was the MetroLink southern interchange station. The additional fare revenues collected by the Charlemont Station interchange increase the benefits delivered by the Project, reflected by an improved Project Benefit Cost Ration (BCR).</p> <p>Further, to ensure that public investment delivers value for money, the Public Spending Code sets out requirements for the evaluation, planning and management of public investment. The preparation of a Business Case is a key element of meeting these requirements. The Public Spending Code requires that both the Preliminary Business Case and Final Business Case for public investment projects are published.</p> <p>In July 2022, the Government granted Approval in Principle to the NTA to enable the submission of a railway order application by TII to An Bord Pleanála in respect of the MetroLink project (Decision Gate 1). This approval was granted after the Preliminary Business Case (PBC) had undergone significant scrutiny and challenge by bodies that are independent of TII, including DoT and DPER review (including independent review by JASPERS and the Major Projects Advisory Group (MPAG)) of the PBC around timeline, costs and benefits that were updated to inform the Government decision.</p> |
| 5                                                                                                                        | Letter       | 1        | The Environmental Impact Study is inadequate and further studies are essential.                                                                        | <p>TII do not agree that the Environmental Impact Assessment is inadequate. The Railway Order application comprises a very detailed environmental impact assessment that has identified and assessed the potential environmental impacts of MetroLink and proposed mitigations for these impacts where necessary. TII would also draw attention to the detailed project description, construction phase description and operational phase description provided in EIAR Chapters 4 and 5 and 6, and EIAR Chapter 7 and associated appendices that present details of alternatives considered. EIAR Chapter 9 and appendices provides a detailed analysis of transport and traffic effects, and EIAR Chapters 13 Airborne Noise &amp; Vibration, and 14 Groundborne Noise &amp; Vibration provide a detailed assessment of potential noise and vibration effects, while Chapter 29 outlines the assessment of interactions between various environmental aspects, and Chapter 30 covers the cumulative impacts with other projects. This assessment is carried out for the full length of the alignment including relative to potential significant effects on the Charlemont-Dartmouth Community.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

| 1                                                                                                                          | Letter Introduction | 1        | <p>1. I reside at 26 Dartmouth Road, in Ranelagh, with my young children and partner. Our home is directly beside the old tram bridge where the NTA and TII propose to situate the MetroLink terminus. Our family supports the objective of Metrolink project, but we raise several concerns about the proposal that its southern terminus should be at Charlemont.</p> <p>2. We endorse the submission by our residential community “Dartmouth Road Submission” of 13 January 2023. In addition, we set out further observations.</p> | <p>Thank you for taking the time to make a submission and your overall endorsement of the MetroLink Project. We have reviewed your submission and responded to the observations made below. We have also similarly responded to all other submissions received.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| 2                                                                                                                          | A. Health Issues    | 1        | <p>3. The MetroLink Environmental Impact Assessment Report (EIAR) estimates “significant” and “very significant” noise and vibration impacts on our home and family, including “disturbance of sleep”,<sup>1</sup> for at least 102 months (eight years), according to NTA and TII<sup>2</sup></p> <p>4. “Significant impact” is equated in places in the EIAR to “very high impact”<sup>3</sup></p>                                                                                                                                   | <p>Please refer to responses (3) and (4) below which summarise the assessed noise and vibration impacts noting that with the exception of TBM groundborne noise which will only be experienced for around 2 weeks. The 102 months (eight years) period is the total construction duration for the works rather than the duration of the impacts.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| 3                                                                                                                          | A. Health           | 1        | <p>5. The EIAR estimates that “station piling works” and “south station works below slab” will cause up to “very significant” noise and vibration in our home from 7am every day, including weekends.<sup>4</sup> “Finishing &amp; fit out” and “Advance enabling utility and site preparation” are estimated to cause up to significant impact, too.<sup>5</sup></p>                                                                                                                                                                  | <p>Chapter 13 Airborne Noise and Vibration includes an assessment of airborne noise and vibration from the construction of the project. The potential significant airborne noise impacts from the construction of nearby Charlemont Station is presented in Table 13.68 where a 'Significant' to 'Very Significant' magnitude of impact is predicted at this location prior to the implementation of noise mitigation measures.</p> <p>Noise mitigation, as summarised in section 13.6.1 of the EIAR, includes for boundary hoarding around the station working area, comprising 7m high hoarding at the north boundary, and 4m at the remaining boundaries. In addition, the above ground support works for below sprayed concrete tunnelling works will be enclosed within an acoustically clad steel framed building to control noise breakout to surrounding receptors. With these mitigation measures in place, the magnitude of impact at 26 Dartmouth Road is reduced to "Slight to Moderate" during piling works and excavation below slab, and "Not Significant" during enabling works and finishing and fit-out works as indicated on pages 23-28 of EIAR Appendix 13.7 Construction Phase Modelling.</p> |

| 4                                                                                                                          | A. Health    | 1        | 6. The EIAR also anticipates that works will surpass the threshold level in our home during i) the movement of the tunnel boring machine, ii) mechanical excavation, and iii) blasting. <sup>6</sup> The first two will occur 24 hours a day. <sup>7</sup> Underground activities are anticipated to occur 24/7 and heavy concrete delivery will be at night. <sup>8</sup> | <p>The Proposed Working Hours are outlined in EIAR Chapter 5, MetroLink Construction Phase, section 5.2.4. Standard working hours will generally be the norm for all above ground works i.e. Monday to Friday 07:00 to 19:00 and Saturday 07:00 to 13:00. Only tunnelling and other works underground will be undertaken 24 hours a day. The only exception to this is the requirement for work above ground outside standard working hours for exceptional events such as concrete pours, and abnormal deliveries. In the exceptional event these are necessary, the contractor will engage with the local community and local authority before such works are undertaken.</p> <p>All planned night-time work activities will have to be undertaken, controlled and mitigated under the detailed Construction Environmental Management Plan to maintain impacts below the agreed construction noise thresholds. Examples of mitigation measures that can be used to reduce impact are detailed within Chapter 13, section 13.6, including the use of enclosure structures for planned activities outside of the standard working hours.</p> <p>The rationale for 24/7 working on activities such as Mechanical Electrical Power (MEP) installation, TBM strip out, and tunnel clean and track laying, is that they can be managed underground without causing disturbance at night. While activities below ground are progressed on a 24/7 basis, site level activities such as deliveries etc will be limited to standard working hours (Chapter 5, Section 5.5.17.3 refers).</p> <p>Owing to the nature of the sprayed concrete intervention tunnel construction and to ensure a safe and stable method of excavation, the sprayed concrete intervention tunnel construction will be undertaken 24 hours per day, seven days per week. The groundborne noise and vibration arising from mechanical excavation of the tunnel will not exceed threshold limits. During night-time support works at the surface, an acoustically clad steel framed building will be used within the compound to control airborne noise breakout to surrounding sensitive properties. All concrete to support the sprayed concrete tunnel lining operation will be batched on site within the acoustic enclosure and will not require night-time delivery.</p> <p>The predicted level of groundborne noise during TBM Passage is 47dB, above the Threshold Level of 45 dB indicating a potential significant impact to occupants for the limited duration of TBM passage, which is estimated to be 2-weeks. Unfortunately there are no effective methods available to reduce groundborne noise from TBMs at source and therefore the principal mitigation measure is advance consultation and engagement to inform residents of the timing of the TBM passing to allow building occupants to prepare for the temporary elevated noise levels.</p> <p>Therefore with the exception of some temporary disturbance (c. 2 weeks) resulting from the TBM passing. All other activities are not predicted to cause significant impact. (please also refer to response (3) above regards airborne noise)</p> <p>As outlined in Transport Infrastructure Ireland (TII) Airborne and Groundborne Noise Mitigation Policy (Appendix A14.6) there is a process in place whereby further mitigation measures can be implemented at individual properties should this be merited.</p> |

|                                                                                                                            |              |          | Response (4) continued.                                                                                                                                                                        | <p>Other Noise and Vibration</p> <p>EIAR Appendix A14.5, Groundborne Noise and Vibration and Blasting Modelling Results, 14.4 Section AZ4 Northwood to Charlemont, presents the predicted day and night groundborne noise and vibration levels for the construction and operational phases. The results for 26 Dartmouth Road are summarised below.</p> <p>(Vibration Dose Value is a parameter that combines the magnitude of vibration and the time for which it occurs)</p> <ul style="list-style-type: none"><li>• The predicted day and night levels of groundborne vibration during TBM Passage are 0.226ms-1.75 (VDV day) and 0.190ms-1.75 (VDV night). Both of these values are lower than the VDV Threshold Levels of 1ms-1.75 (VDV day) and 0.5ms-1.75 (VDV night), meaning that no significant impact is expected on the property or occupants as a result of vibration during TBM passage.</li><li>• The predicted day and night levels of groundborne vibration during Mechanical Excavation are 0.003ms-1.75 (VDV day) and 0.002ms-1.75 (VDV night). Both of these values are lower than the VDV Threshold Levels of 0.8ms-1.75 (VDV day) and 0.4ms-1.75 (VDV night), meaning that no significant impact is expected to the property or occupants during mechanical excavation.</li><li>• The predicted levels of groundborne vibration during blasting activities is 7mm/s (PPV - peak particle velocity) and air overpressure 110.9 (AOpdB). Both of these values are lower than the Threshold Levels of 8mm/s PPV and 125 AOpdB meaning that no significant impact is predicted to the property during Blasting.</li><li>• The predicted level of groundborne noise during mechanical excavation is 39 dB, below the Threshold Level of 40 dB, meaning that no significant impact is expected on the building occupants from groundborne noise during mechanical excavation.</li></ul> <p>Construction Traffic Noise</p> <p>Construction traffic noise impact is assessed and presented in Chapter 13, Section 13.5.2.6.9 AZ4: Construction Traffic. This shows that construction traffic noise impacts are neutral to not significant based on the peak construction month in 2028. As noted above, the construction traffic volumes used in the assessment are based on the reasonable worst case peak scenario which reflects a 'worst case month' under which the construction of multiple work sections are taking place concurrently as part of the proposed Project in AZ3 and AZ4.</p> <p>A further sensitivity assessment was undertaken for each of the main site compounds in AZ4 during the AM peak period using data for the most impacted traffic road section during this period as advised by the traffic team. During the assessed AM peak hour for each construction site compound within AZ4, the highest change in noise levels are all below 3dB resulting in a negligible to minor change in traffic noise level along the local roads.</p> <p>The calculated noise level along the road edge, whilst categorised as medium to high will not be altered to any perceptible level as a result of construction traffic flows and hence the overall impact is not significant.</p> |
| 5                                                                                                                          | A. Health    | 1        | 7. The Construction Sequence Report also notes that Stage 2 of the three stage project will make the front of our house the “lorry holding area” for the heavy vehicles involved in the works. | <p>The lorry holding area referred to is an area that will be temporarily closed off with traffic management during mainly off peak periods as and when required to off load major items of plant and equipment. It is not a permanent holding area and will only be used by exception for the reasons noted. Safe access to the footpath will be maintained for pedestrians.</p> <p>Appendix A5.1 Outline CEMP details the proposed mitigation and monitoring measures that the contractor(s) will be required to adhere to during the construction phase. As detailed, there will be strict controls and regulations at the site entrances/exits for construction vehicles in order to ensure the safety of other road users and pedestrians. This is standard practice for all construction site accesses and egresses.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

| Observation Re: Railway (Metrolink-Estuary to Charlemont via Dublin Airport) order 2022 Case Reference Number NA29N.314724 |              |          |                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| 6                                                                                                                          | A. Health    | 2        | 8. The NTA/TII's proposed mitigation measures include “potential temporary relocation”. It is not explained what this means, nor what the duration or our family's displacement from our home may be. It is not clear whether there is provision for retrofitting our home with sound insulation. | As noted by responses (3) and (4) above, including allowing for any necessary mitigation measures, noise and vibration levels at 26 Dartmouth Road will not be significant with the exception of TBM groundborne noise for a short temporary duration of approximately 2 weeks. Therefore it is considered relocation will not be necessary. Following mitigation measures the airborne construction noise levels at 26 Dartmouth Road will be below the threshold value of 70 dB and as such mitigation in the form of noise insulation to the windows of this property will not be required.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| 7                                                                                                                          | A. Health    | 2        | 9. We could not find any reference to effective measures to limit airborne dust and dirt from the construction site in the Railway Order.                                                                                                                                                         | <p>Please refer to EIAR Chapter 16 Air Quality, section 16.6.1 which outlines the construction phase mitigation measures required for the proposed project. This section also refers to a dust mitigation plan which can be reviewed in Appendix A14.6. The Construction Environmental Management (appendix A15.1) also provides an overview of all construction phase mitigation measures including those required for the management of dust.</p> <p>It is of note that dust tends to be quite large in size in relative terms (greater than 30 microns in diameter) and falls to the ground relatively quickly. This gives the potential for soiling of cars or windows in the vicinity, but from a human health perspective would not be deemed to have a significant adverse health impact as the dust does not stay airborne and is not inhaled. Fugitive emissions of dust from the site are not predicted to be significant and to pose no nuisance to human health. Further details of how construction generated dust will be managed is summarised below.</p> <p>Dust / Air Quality Construction Phase</p> <p>EIAR Chapter 16, Air Quality, section 16.6 Mitigation Measures. The potential risk from dust emissions has been reviewed for the most important activities and each of the construction areas. Before commencing relevant works, an Air Quality Management Plan will be prepared and submitted for approval to the planning authority. The plan will take account of all relevant dust and emissions applicable to the circumstances of the relevant site, based on the local authority requirements and industry best practices. The plan will be developed by the contractor and for each worksite shall include:</p> <ul style="list-style-type: none"><li>- An inventory and timetable of activities which may give rise to emissions or dust;</li><li>- Alert levels;</li><li>- Alert system to be used (including notification process);</li><li>- Details of control measures;</li><li>- Details of dust monitoring arrangements, including the location of sensitive receptors, monitoring locations, and monitoring equipment to be used; and</li><li>- Details of the air quality reporting requirements.</li></ul> <p>In order to ensure that no dust nuisance occurs, a series of measures will be implemented, as detailed in Appendix A16.4. In summary, the measures will include:</p> <ul style="list-style-type: none"><li>- Material handling systems and site stockpiling of materials designed and laid out to minimise exposure to wind. Water misting or sprays will be used as required if particularly dusty activities are necessary during dry or windy periods;</li><li>- Any blasting will be completed by specialised contractors with a specific blasting dust management plan; and</li><li>- Hoarding will be provided around the construction compounds.</li></ul> <p>Strict dust prevention will be in place at all times to minimise any potential emissions and these procedures will be strictly monitored and assessed. In the event of dust nuisance occurring outside the site boundary, movements of materials likely to raise dust will be curtailed and satisfactory procedures implemented to rectify the problem before the resumption of construction operations. Consistent implementation of good dust minimisation practices will ensure that the impact from construction dust is Long-Term, Localised, Reversible and not significant when considered with respect to the Environmental Protection Agency (EPA) description of effects (EPA 2022).</p> |

| Observation Re: Railway (Metrolink-Estuary to Charlemont via Dublin Airport) order 2022 Case Reference Number NA29N.314724 |                      |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 8                                                                                                                          | A. Health            | 2        | 10. I am diagnosed with and suffer from Chronic Daily Migraine. My husband has Long Covid. We have two young children. The estimated impacts set out in the EIAR will have life changing consequences for our health, and presumably or others who live near us, too.                                                                                                                                                                                                                                                                                                         | With the exception of TBM groundborne noise for a short temporary duration of approximately 2 weeks, with the appropriate mitigation measures in place, no other significant impacts are predicted. However TII appreciate that there are circumstances where further consideration may be required. As outlined in EIAR Appendix A14.6 Section 3.4, in circumstances where temporary disturbance or nuisance occurs for certain sensitive individuals (e.g., for medical reasons or work patterns/night working), during the construction phase of the proposed project alternative interventions may also be available. In these circumstances arrangements will be agreed locally, at the relevant time, with TII when an assessment of impact will be undertaken.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 9                                                                                                                          | A. Health            | 2        | 11. McCabe Durney Barnes, independent experts contracted by our local community of residents, examined the EIAR and concluded that it is inadequate. (See our community submission for detail). I am therefore concerned that the EIAR may underestimate of the impact to our home and family.                                                                                                                                                                                                                                                                                | TII do not agree that the Environmental Impact Assessment is inadequate. The Railway Order application comprises a very detailed environmental impact assessment that has identified and assessed the potential environmental impacts of MetroLink and proposed mitigations for these impacts where necessary. TII would also draw attention to the detailed project description, construction phase description and operational phase description provided in EIAR Chapters 4 and 5 and 6, and EIAR Chapter 7 and associated appendices that present details of alternatives considered. EIAR Chapter 9 and appendices provides a detailed analysis of transport and traffic effects, and EIAR Chapters 13 Airborne Noise & Vibration, and 14 Groundborne Noise & Vibration provide a detailed assessment of potential noise and vibration effects, while Chapter 29 outlines the assessment of interactions between various environmental aspects, and Chapter 30 covers the cumulative impacts with other projects. This assessment is carried out for the full length of the alignment including relative to potential significant effects on the Charlemont-Dartmouth Community.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 10                                                                                                                         | B. Structural impact | 2        | 12. The eastern wall of our house is directly at the edge of the proposed terminus' large underground cavity. We draw to your attention the independent expert view from McCabe Durney Barnes, that “it is evident that a very limited assessment of settlement and subsidence has been carried out” in the EIAR. This is of utmost concern.<br><br>13. It is essential that our house is surveyed in detail to determine whether it is at high risk, and to measure settlement and other impacts, before construction. Our home is a protected structure (RPS ref no. 2138). | <p>Your property is separated from the station box excavation by the Green Line structures but is in close proximity to the works - circa 10m.</p> <p>The approach taken by TII for assessing the impact of construction generated ground movements reflects the industry standard three-phased ground movement impact assessment process that is undertaken on tunnelling and underground projects around the world, that includes Channel Tunnel Rail Link (CTRL), Dublin Port Tunnel, Crossrail and High Speed 2.</p> <p>EIAR Appendix A 5.17 Building Damage Report, covers the assessed impacts of construction generated ground movements and settlement and includes for the impact on 26 Dartmouth Road which crosses the 10mm settlement contour. EIAR Appendix 5.17 refers. The Phase 2 assessment of the ground movement impact to this building is "slight" (an explanation for which can be found in Table 4-4), please refer building B151 (34 Dartmouth Road) in table 5-2 of that appendix. Please note that the assessed building is closer to the excavation than your property and therefore subject to greater settlement impacts.</p> <p>Your property has been designated as “special”, and hence a further Stage 3 refined assessment, despite the impact only being assessed as 'slight', will be undertaken that will take account of final design and construction methodology details most likely utilising advanced numerical modelling techniques and further surveys of the building. The results of this refined assessment typically show that earlier assessments are conservative and overestimate the likely impact of construction generated ground movements.</p> <p>Monitoring instrumentation will also be installed in the area to monitor the performance of the works and potential environmental impacts, including those discussed above to ensure that acceptable limits are not breached. TII would also draw attention to the fact that private properties within 50m of the station excavation, or 30m of the tunnel are eligible to subscribe to the Property Owners Protection Scheme (POPs) which includes for pre and post-construction condition surveys and repair of damage up to a value of €45,000. Details of the mitigation measures proposed for property owners can be found in Chapter 11 (Population and Land Use), section 11.6.1.</p> |

| 11                                                                                                                         | C. Traffic   | 2        | 14. We emphasise the community submission “Dartmouth Road Submission” comments regarding the closure of Dartmouth Road throughout the enabling works, and the need to provide for resident access and parking both during construction and after the terminus enters operation. | <p>The closure of Dartmouth Road will take place in two stages, the total duration of which is 4 years, noting the first closure of 18 months will be partial .</p> <p>1. Partial closure of Dartmouth Road to enable utilities to be diverted. Subject to Statutory Undertaker approvals (ESB, Eircom etc.) this process is estimated to take up to 18 months, while access is maintained along Dartmouth Road via a proposed single lane closure.</p> <p>2. Full closure. Once the utilities have been diverted, the road is then shut to through traffic (pedestrian access is maintained) and is estimated to take up to 30 months to complete the piling, and roof slab of the station. The utilities and road will then be reinstated and the road reopened.</p> <p>Diversions will be put in place for local access, including deliveries, emergency services, bin collection, and pedestrian access maintained to all properties. The impacts on parking will be monitored during construction to reinstate any disrupted areas as soon as practicable. On completion of construction and reopening of Dartmouth Road, parking will be reinstated.</p> <p>During the closure of Dartmouth Road, approximately 30 on street parking spaces will be lost during the main works, however there will be no impact to on-street loading bays. EIAR Chapter 5, MetroLink Construction Phase specifies the 5 residential properties that will be impacted during the works. The closure will be monitored to determine if it is required at all points, or if the spaces can be temporarily reinstated temporarily throughout the works. Once the construction works are complete and Charlemont Station is operational, the remaining on-street spaces will be fully reinstated.</p> <p>As outlined in Appendix A5.1 Outline Construction Environmental Management Plan, the contractor(s) will be required to maintain emergency access routes throughout the construction phase. These will be developed in consultation with the emergency services and documented as part of the detailed CEMP(s). All required diversions will be appropriately signed, and a comprehensive publicity and information campaign will take place prior to the Commencement of works to minimise the severity of the impact.</p> |

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| 12                                                                                                                         | D. Dublin City's needs | 2        | <p>15. There is a broader concern beyond the impacts listed above: The terminus for Dublin's MetroLink should be in the city centre, and should be located to allow interoperation or connection to other transport systems in the future. The NTA/TII have not undertaken a study that fully considers this. Instead they have only studied a limited scenario in which a terminus would be located at the East side of St. Stephen's Green. They have not properly studied St. Stephen's Green as a location.</p> <p>16. This must be corrected. Positioning MetroLink's terminus at St. Stephen's Green's (non-East) side would create a natural hub location to which other transport can be joined in the future. In contrast, placing MetroLink's terminus at Charlemont forecloses the possibility of integrating with the City's other transport systems. The strategic benefit to the City from locating the terminus at St. Stephen's Green is likely to be profound and must be examined.</p> | <p>TII do not agree that Charlemont is the incorrect location for an interchange with the Luas Green Line or other transport systems, or that it impacts future options for integration with the wider transport network for the reasons set out below.</p> <p>The Board is required to have regard to the likely consequences for proper planning and sustainable development in the area in which it is proposed to carry out railway works (section 43(1) of the 2001 Act) and as such the following matters are relevant.</p> <p>TII's role is to deliver the MetroLink project as provided for in the previous Transport Strategy for Greater Dublin Area (2016-2035) and the current Transport Strategy for Greater Dublin Area (2022-2042) and as supported by the Dublin City Development Plan 2022 - 2028.</p> <p>The connection from St Stephens Green to Charlemont / Ranelagh is supported by the current Transport Strategy for Greater Dublin Area (2022-2042). The Transport Strategies were prepared by the National Transport Authority, scrutinised by the Joint Oireachtas Committee on Transport and approved by the Minister for Transport. It notes in section 12.3.2, "Charlemont offers the optimal location for the primary interchange with the Green Line in response to growing demand in the longer term and is an appropriate location to facilitate any potential future metro extensions to serve the south west, south or south east of the city region should sufficient demand arise."</p> <p>The Transport Strategy is "a consideration material to the proper planning and sustainable development of the area or areas in question." Development Plans are required to be consistent with the Transport Strategy. The Dublin City Development Plan 2022-2028 envisages this station at Charlemont in policy SMT22 "To support the expeditious delivery of key sustainable transport projects so as to provide an integrated public transport network with efficient interchange between transport modes, serving the existing and future needs of the city and region and to support the integration of existing public transport infrastructure with other transport modes. In particular the following projects subject to environmental requirements and appropriate planning consents being obtained: ... MetroLink from Charlemont to Swords".</p> <p>Accordingly, the location of the Charlemont station was a strategic decision made at the highest levels of transport and land use planning and such is fully consistent with the proper planning and sustainable development of the area. The Transport Strategy considers a range of options for the onward extension of MetroLink to meet the demand for travel over the period of the strategy. This includes consideration of the need for the upgrade of the Luas Green Line to metro with a metro extension to Dublin south west, south or south east. Whilst the strategy envisages that further extensions will be delivered after 2042, MetroLink which terminates at Charlemont allows for the possible extension of the metro in all the above directions.</p> <p>The proximity of the metro to the Luas line at Charlemont provides for a positive customer experience for all users with short interchange distance and due to the proximity, clear wayfinding and high visibility of the interchange. The interchange arrangements at Charlemont provide for significantly better interchange arrangements compared to an interchange at St Stephen's Green Station.</p> <p>The detailed analysis done for the Railway Order application further confirms that the section of MetroLink route between St Stephen's Green and Charlemont Stations contributes significantly to the overall benefits of the scheme. It serves a significant area of the south city of Dublin and offers enhanced access from the local area to the city centre and a direct connection to Dublin Airport. It serves key trip attractors including residential areas and offices / workplace locations, with high passenger boarding and alighting figures in the peak hours. During the morning peak, at Charlemont station the flows include 1,800 passengers alighting, 2,300 boarding and 1,229 passengers alighting, 2,276 boarding during the evening peak. The passenger numbers contribute significantly to the overall benefits of the scheme and the effect of these benefits outweigh the additional costs that are associated with the delivery and operation of the section from St Stephen's Green to Charlemont station.</p> <p>The location of the interchange at Charlemont does not preclude onward extension south. An interchange at Charlemont is supported by policy including the Dublin City Development Plan 2022 - 2028 and the Transport Strategy for the Greater Dublin Area. As noted by the GDA Transport Strategy 2022-2042, section 12.3.2, "Charlemont offers the optimal location for the primary interchange with the Green Line in response to growing demand in the longer term and is an appropriate location to facilitate any potential future metro extensions to serve the south west, south or south east of the city region should sufficient demand arise."</p> |

| Observation Re: Railway (Metrolink-Estuary to Charlemont via Dublin Airport) order 2022 Case Reference Number NA29N.314724 |              |          |                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
|                                                                                                                            |              |          | Response (12) continued.                      | <p>By extending MetroLink to Charlemont it provides for future proofing of the Green Line, bypassing the capacity constrained Luas on-street running section, and ensures potential future connectivity options are enabled, either to the Green Line or for extensions of the metro.</p> <p>The Charlemont Station interchange provides for increased passenger utilisation of the MetroLink system, thereby increasing the benefits delivered by the Project, reflected by an improved Project Benefit Cost Ration (BCR).</p> <p>It is not correct to say that "The NTA/TII have not undertaken a study that fully considers this. Instead they have only studied a limited scenario in which a terminus would be located at the East side of St. Stephen's Green. They have not properly studied St. Stephen's Green as a location." A number of route options were considered in the process of identifying the Emerging Preferred Route (EPR). These route options included potential station locations on St. Stephen's Green West.</p> <p>St. Stephen's Green West was ruled out as the alignment between the proposed Tara Station and a station on St Stephen's Green West would result in an undesirable horizontal reverse curve and an alignment greater than a 1000m long that would necessitate an intermediate intervention shaft located somewhere between these stations to comply with the MetroLink Fire Strategy. Further, as a potential station location, St Stephen's Green West itself is a very constrained location due to the presence of buildings, Luas and St Stephen's Green Park. Maintaining the Luas operational during station construction would be complex and challenging with significant disruption expected, whilst the impacts on St Stephen's Green Park would be greater for a station in this location compared to the proposed location on St Stephen's Green East. This would be the result of; the likely need to place more of the station in the Park compared to the proposed station on St Stephen's Green East; it would impact an area of the Park that has greater amenity value than St Stephen's Green East due to the nearby Park entrance adjacent to the southern end of Grafton Street, and there would be a risk of impacting the existing Park lake. In summary, an alignment that links the proposed Tara, St Stephen's Green East and Charlemont stations is a more direct and economic alignment, does not require additional intervention infrastructure, avoids a complex engineering interface with the Luas Green Line, impacts the Park less and has less potential for disruption during the construction phase.</p> <p>As outlined by EIAR Chapter 3, Background to the MetroLink Project, one of the key objectives of the Project is the integration of it with the wider transport network that also includes for BusConnects and DART+ which are all included under Project Ireland 2040. Together, these projects will result in a reliable, sustainable, affordable, integrated public transport network that will support the economy, help Ireland meet its climate change targets in line with Climate Action Plan 2023 and make Dublin a more liveable and sustainable city.</p> <p>Arising from the decision to postpone the future upgrade of the Green Line to metro services, it is being argued that Charlemont station effectively becomes a terminus station in the short to medium term. In this regard, it is true to say that the Metrolink trains will terminate and turn back at Charlemont station, however the public transport service offering for passengers does not terminate, it transfers from Metrolink to LUAS as part of the integrated transport network.</p> |

| Observation Re: Railway (Metrolink-Estuary to Charlemont via Dublin Airport) order 2022 Case Reference Number NA29N.314724 |                        |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |  |
|                                                                                                                            |                        |          | Response (12) continued.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | <p>The terminus station for MetroLink is located at Estuary where all of the activities normally associated with a terminus take place. At this location the high capacity public transport offering terminates and the public transport offering transfers to a completely different mode, i.e. Bus . The environmental effect of the Metrolink terminus are accordingly assessed in the EIAR. Charlemont Station does not have the associated infrastructure and services associated with a terminus location and in fact has more in common with a “system turn back location”. Charlemont Station is located within an area of high public transport accessibility, linking with the Luas Green Line which offers reasonably similar levels of services and frequency for journeys to and from the south of Dublin. As such, public transport service offering is not considered to terminate, but transfers onto the similar service offered by the Luas Green Line, forming part of a transport corridor running from Cherrywood to Estuary. The associated environmental impacts for the turnback and station at Charlemont have been fully assessed in the EIAR.</p> <p>Charlemont station itself was chosen on the basis of its interchange potential with Luas, as well as local bus services, as outlined above. The section of the line between St Stephen's Green and Charlemont generates considerable benefits for the scheme in terms of increased patronage. The fact that the Charlemont Station is now being referred to and considered as a “terminus station” rather than an interchange station, does not increase the environmental impacts the station has on its local environment, in terms of passenger demand, airborne noise. vibration and other environmental effects.</p> <p>If the scheme were to terminate at St Stephen’s Green, it would be important to determine where the next station south of St Stephen’s Green would be located for a future extension as required in the Draft Transport Strategy for Greater Dublin Area (2022-2042). With single bore tunnel configuration, the maximum distance between stations is 1,000m. If the distance between stations extends beyond 1,000m there is a need for an intervention shaft or separate escape tunnel. Selecting a different station location other than Charlemont within a 1,000m arch south of St Stephen’s Green Station will be challenging given the limited space available for a station within this area and it is reasonable to assume that the Station may be located outside the 1km arch, thus requiring the construction of an intervention shaft similar to that currently proposed at Albert College Park between St Stephen’s Green and the proposed station location.</p> <p>The proposed route alignment from Estuary to Charlemont is consistent and compliant with the GDA Transport Strategy 2022-2042 (published in January 2023) in which states that the south city terminus at Charlemont offers the optimal location for interchange with the Green Line in response to growing demand in the longer term and is an appropriate location to facilitate any potential future metro extensions to serve the south west, south or south east of the city region should sufficient demand arise.</p> |  |
| 13                                                                                                                         | D. Dublin City's needs | 3        | 17. The construction of the large underground “station box” at Charlemont has already been substantially completed by Hines, a private development company, before the Railway Order was drafted. NTA and TII describe “Stage 1” of the development of Charlemont as “the Hines Development”. <sup>12</sup> That first stage of construction was unlawful. At least three difficulties arise: i) the construction was outside of the context of a Railway Order; was ii) undertaken without planning permission; and iii) without an environmental impact assessment. As a result, constructing MetroLink’s terminus at Charlemont would therefore expose the entire MetroLink project to acute legal hazard. | The MetroLink enabling works constructed as part of the Hines development was included in the planning application for the Hines Development and has the benefit of planning permission which was granted in April 2019.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |  |
| 14                                                                                                                         | Request                | 3        | 18. Therefore, we request An Bord Pleanala order the following amendments:<br><br>i. Omit the section from Tara Street Station to Charlemont Station and associated onward tunnel extension and intervention tunnel from the Railway Order; and<br><br>ii. Require the submission of a railway order for a section from Tara Street Station to St. Stephens Green that enables a terminal hub station that can integrate with the Luas Green Line, bus routes and future DART underground.                                                                                                                                                                                                                    | <p>The above responses to the observations made explain why TII do not consider it is correct or appropriate that the MetroLink alignment south of the proposed Tara Station should be omitted, and also demonstrates why the proposed Charlemont Station has been selected by TII as the preferred interchange with the Luas Green Line</p> <p>A scheme which terminates at Tara Street would not be consistent with the Transport Strategy for Greater Dublin Area (2022-2042). In addition any decision to terminate the scheme at Tara will significantly impact on the overall viability and benefits of scheme.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |  |

| Submission No.                                                                                                                                                                   |                        |          | 039                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |  |
| Letter Re: Observation Regarding Case reference: NA29N.314724: Estuary through Swords, Dublin Airport, Ballymun, Glasnevin and City Centre to Charlemont, Co. Dublin (Metrolink) |                        |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |  |
| 1                                                                                                                                                                                | Structural Damage Risk | 1        | We are greatly concerned about the potential for structural damage to our home, given the fact that the building has no foundations, is c. 117 years old, and is less than 30m to the nearest tunnel. Fellow residents of the Prospect Square / De Courcy Square (ACA) have been engaging with the Independent Expert provided by TII, and the expert expressed concerns that not enough work has been done by TII to demonstrate that the tunneling will not cause structural damage to homes in the ACA, particularly as the type of boulder clay in the area may be particularly problematic for this type of project. More information on this is provided in the objection lodged on behalf of Prospect Square / De Courcy Square and Environs Architectural Conservation Area. | <p>Thank you for your submission and for sharing your observations with regards to the MetroLink project to which we have responded below.</p> <p>The EIAR Appendix A 5.17 Building Damage Report, covers the assessed impacts of construction generated ground movements and settlement on property. Section 5.2 of this report sets out the rationale for the assessment of properties similar to yours. The results of the assessment provided in Table 5.2 show that property Ref B - 141, as one of the representative properties selected similar to your property, has been assessed as falling within the '<i>Negligible</i>' category. The building risk categories shown in Table 4-4 of the aforementioned report are used to define the degree of building damage related to the Risk Category. Therefore, based on the current design no further settlement assessments are required at your property.</p> <p>The assessment of the buildings from Prospect ACA is presented in Table 5-2: Result of Phase 2a Building Damage Assessment – Representative Buildings from the EIAR Appendix 5.17 include building numbers B-119, B-120, B-139, B140, B122, B141 and B123. None of these buildings exceed the '<i>slight</i>' damage category. This category indicates that any damage will be limited to non structural impacts potentially requiring cracks to be repaired.</p> <p>As presented in the EIAR Appendix A5.17, ground conditions are a part of the calculation for settlement with different local conditions presented in Table 5-1: Details of Ground Conditions, VL and K Values by Chainage. The mixed face ground conditions as referenced are therefore taken into account. Furthermore, the Phase 2a assessment is moderately conservative and over estimates impacts. The onset of settlement is closely related to the timing of the passage of the TBM and settlement is not anticipated to continue beyond construction. TII will monitor the area until settlement is shown to have ceased and hence all impacts will be picked up. The approach adopted follows the industry standard for the assessment of ground movements, please refer to EIAR appendix 5.17.</p> <p>Regarding the noise and vibration from TBM Passage, as presented in the EIAR Chapter 14 (Groundborne Noise and Vibration), none of the construction activities proposed for MetroLink will have potential to meet the thresholds levels of vibration for buildings damage in this area. The only noise and vibration impact from TBM Passage will be on the residents of Prospect ACA, the levels for each building are detailed in the EIAR Appendix 14.5. For some of the buildings located above or in close proximity of the tunnel, the noise level from TBM Passage will be above the 45 dB threshold level, resulting a significant impact on the residents for the limited duration during TBM passage. Unfortunately, there are no effective methods available to reduce groundborne noise or vibration from TBMs at source, but noting that the duration of this impact will be in the order of up to two weeks as the TBM passes. TII will liaise with the residents to ensure the timing of these impacts are known.</p> <p>TII want to reaffirm that the local geological conditions were considered during the settlement assessment. Refer to appendix 5.17 and EIAR Chapter 20 Soils and Geology.</p> <p>As your property is within 30m of the tunnel alignment, the Property Owner Protection Scheme (POPS) committed to by TII will apply to your property and will be in place prior to construction works commencing. The scheme allows residential property owners to register with TII if the property is within thirty (30) metres of the edge of the MetroLink alignment or fifty (50) metres of station structures. The POPS comprises condition surveys of residential properties along the route of the proposed Project. The purpose of the condition surveys is to ascertain the condition of the properties before, during (if deemed necessary), and after the completion of the proposed Project to determine whether there has been any deterioration of any of the properties surveyed and whether same may be attributable to the proposed Project, and subsequently to recommend repairs as appropriate. Condition survey data gathered pre and post construction, and possibly during construction, will be used to assist the property owner and TII in swift and accurate verification of any property damage claims which may be received from property owners. The POPS is designed to cater for / address repair work which may be necessary for any damage (attributable to the proposed Project) to a qualifying residential property up to a threshold of €45,000. The POPS will be introduced by TII through public consultation and will be formally advised to eligible property owners by the Public Relations Department.</p> <p>Further information on POPS is available in Chapter 11 (Population &amp; Land Use). Useful information on POPS can also be found in the MetroLink Frequently Asked Questions document which can be found on-line at:<br/><a href="https://www.metrolink.ie/assets/downloads/MetroLink_FAQ.pdf">https://www.metrolink.ie/assets/downloads/MetroLink_FAQ.pdf</a></p> |  |

| Submission No.                                                                                                                                                                   |                                                                                                              |          | 039                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

| Letter Re: Observation Regarding Case reference: NA29N.314724: Estuary through Swords, Dublin Airport, Ballymun, Glasnevin and City Centre to Charlemont, Co. Dublin (Metrolink) |                                                                                                              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| 2                                                                                                                                                                                | Structural Damage Risk                                                                                       | 2        | Significantly more work is required to ensure our home and others in the ACA will not experience structural damage, due to risks of vibration, impact of drilling on the water table, blasting at Glasnevin station, and potential settlement and subsidence. Detailed evaluations of the ACA (with a focus on the age and types of foundationless structures, the waterways beneath the ACA and the boulder clay beneath us) should be undertaken before the Railway Order is approved and in close consultation with residents.                                                                                                                                                                                                                                    | <p>Please refer to response item (1) above in relation to the predicted levels of ground movements and vibrations at your property and those of Prospect ACA. The tunnel methods planned to be employed will negate impacts on the water table due to the passage of the TBM.</p> <p>As presented in the EIAR Appendix A 5.17 Building Damage Report, Phase 1 of the assessment has identified the buildings that could be potentially impacted by the project. It involves the calculation of the greenfield settlement contours using ground model parameters derived from published case history data and ground investigation work undertaken, and the identification of buildings, which were further assessed in Phase 2a, that are:</p> <p>a) enclosed within the 10mm contour or with a ground settlement slope &gt; 1 in 500, and</p> <p>b) enclosed within the 1mm contour and subject to 'special' considerations. E.g., Designated Protected Structures, or prominent or sensitive buildings.</p> <p>The assessment considered the local geological conditions and the settlement effects due to dewatering.</p> <p>Suitable and sufficient assessment has been undertaken to date with details included within Appendix 5.17 including the overall process though detailed design to ensure that the stated impacts are not exceeded.</p> <p>Regarding blasting impact, as presented in the EIAR Chapter 14 and Figure 14.4 Blasting Contours of PPV, no blasting activities will take place at Glasnevin Station and as a result no impact on the buildings will arise as a result of this.</p> <p>The calculated vibration levels from Mechanical Excavation and TBM Passage are below the threshold for structural damage for any building type - please refer to Chapter 14 Groundborne Noise and Vibration.</p> |
| 3                                                                                                                                                                                | Lack of Engagement                                                                                           | 2        | There has been a distinct lack of engagement from TII with potentially affected homeowners and the ACA in general. Despite the fact that our home is within 28m of the tunnel, and therefore within the radius that is of enough concern for structural issues to qualify for surveys under the Metrolink POPS programme, we have received no direct engagement from TII on the matter. The only reason we even found out our home was that close to the tunnel was reaching out to TII repeatedly. We were told our home was not close enough to qualify for POPS in 2021 , and only by chasing the matter up again recently were we finally advised that the tunnel is close enough that we qualify for POPS, with no further information supplied.                | Please refer to response item (1) above in relation to you eligibility for POPS, and the predicted impacts to your property.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| 4                                                                                                                                                                                | Only Vague Information Provided on Structural Damage Risks and Mitigation Measures to Foundation-less Houses | 2        | <p>There has been only vague information provided about structural concerns for period houses without foundations. No evidence/ studies of other such tunnelling projects where there was no damage to structures of the same age/ condition has been included in the Railway Order application. Applicable mitigation measures are not outlined in any detail.</p> <p>No consideration is referenced in the Railway Order application to the additional implications of period structures in relation to either the higher risk to structural concerns due to the lack of foundations, or the the higher cost of repair to such buildings to the conservation standards expected in an ACA (tradition lime plasters/ mortars/ brick repair/ underpinning etc.).</p> | <p>Please refer to response items (1 and 2) above related to the assessed impacts of construction generated ground movements and settlement on property.</p> <p>In Appendix A5.17 Building Damage Report, the industry standard three-phased ground movement impact assessment that has been undertaken on tunnelling and underground projects around the world, including the Channel Tunnel Rail Link (CTRL), Dublin Port Tunnel, Crossrail and High Speed 2, and has been applied to the MetroLink Project.</p> <p>It is wholly incorrect to state that the period nature of these buildings and the shallow foundations have not been taken into account - these are embedded in the assessment undertaken. With regard to the cost of repair please refer to the POPs scheme identified above. If any repairs are required they will be to the appropriate conservation standards.</p> <p>Furthermore, EIAR Chapter 26 (Architectural Heritage) describes and assesses the likely direct and indirect significant effects of the proposed Project on Architectural Heritage including Prospect Square/De Courcy Square and Environs ACAs.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

                                                                                |          | 039                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| Letter Re: Observation Regarding Case reference: NA29N.314724: Estuary through Swords, Dublin Airport, Ballymun, Glasnevin and City Centre to Charlemont, Co. Dublin (Metrolink) |                                                                                                     |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| 5                                                                                                                                                                                | Lack of Consideration given to the tunnel's proximity to the Prospect Square / De Courcy Square ACA | 2        | <p>Despite noting ACA's as being of a "High" Evaluation Level/Sensitivity in the Environmental Impact Assessment Report, minimal consideration seems to have been given to the Prospect/ De Courcey ACA in the planning of the Metrolink Route. Section 10.18 on Architectural Heritage in the EIAR MetroLink Non-Technical Summary doesn't even list the Prospect/ DeCourcey ACA in its list of important sites, despite purporting to have examined areas within 50m of the tunnel in urban areas (begging the question why only structures within 30m will be surveyed). In the Architectural Heritage document, the ACA is only listed in passing and is not looked at in the same detail as other examples.</p> <p>Ideally, the tunnel should be rerouted to mitigate potential settlement in the ACA (for example, the original route with a station at Drumcondra).</p> <p>Otherwise, the 30m radius applying to POPS surveys should be extended, due to historic significance of ACA, and the fact that all of the buildings in the area have either no foundations whatsoever, or very shallow foundations.</p> | <p>The Non-Technical Summary document summarises in non-technical language the Environmental Impact Assessment Report (EIAR), including the likely significant effects identified, the mitigation and monitoring measures proposed, as well as any residual effects arising from MetroLink that have been identified during the Construction and Operational Phases to inform the planning consent process. The specific chapters of the EIAR present details on the impact assessment of the MetroLink Project on the receiving environment during the Construction Phase and Operational Phase. In this sense, the EIAR Chapter 26 (Architectural Heritage) describes and assesses the likely direct and indirect significant effects of the proposed Project on Architectural Heritage including Prospect Square/De Courcy Square and Environs ACAs. Please refer to response item (1) in relation to the assessment of properties within Prospect ACA.</p> <p>Regarding the Drumcondra location, as presented in the EIAR Chapter 7, Consideration of Alternatives, the Glasnevin Station location was chosen instead of Drumcondra because the provision of a station at Glasnevin will better meet the requirements of the Transport Strategy for the GDA for the following reasons:</p> <ul style="list-style-type: none"><li>•It will facilitate a seamless transfer/interchange with both the Maynooth (Western Commuter line) and Kildare railway line (South-Western Commuter line) because the PPT and Maynooth lines are at their closest point horizontally and vertically at Glasnevin, thereby providing the opportunity for a MetroLink station to capture transfer to and from these lines more effectively than at Drumcondra.</li><li>•The Glasnevin location also facilitates the construction of an integrated metro station as the two heavy rail lines are beneath the existing ground level, making it possible to connect via an underground concourse to all three rails in a short plan distance. At Drumcondra, the connection to both lines would require a connection of approximately 110m with more significant vertical connections between the two lines also required.</li><li>•The further advantage of Glasnevin is that it is located approximately 1km to the west of Drumcondra. This saves over 2 minutes in journey time by offering the opportunity for passengers to transfer sooner from heavy rail to MetroLink at Glasnevin to access city centre locations to the south or to the Airport/Swords to the north.</li><li>•Route options serving the Glasnevin station are forecast to have approximately 6000 additional passengers per day when compared to an interchange station at Drumcondra. This is largely due to the increased interchange opportunity at Glasnevin.</li><li>•Passengers transferring from the Maynooth or Kildare lines to MetroLink and travelling on to Dublin city centre will experience shorter journey times (approximately 3 minutes).</li></ul> <p>For the Phase 1 survey for the damage report, a zone of influence of the tunnel and other works was taken as 30m width on either side of the tunnel plus half the tunnel diameter. This is equivalent to a 45-degree influence line from the tunnel axis level at a depth of 30m. As noted in response item (1), the POPS allows residential property owners to register with TII if the property is within thirty metres of the edge of the MetroLink alignment or fifty metres of station structures. If any buildings are outside the zone of influence (i.e. they are not impacted by settlement or vibration) it is not necessary to undertake further assessment as that assessment would simply say that no impacts are predicted.</p> |
| 6                                                                                                                                                                                | Lack of Consideration given to the tunnel's proximity to the Prospect Square / De Courcy Square ACA | 3        | <p>A Steering and Monitoring group should be put in place so that there will be engagement and transparency between the ACA and project managers.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | <p>A Stakeholder and Community Engagement Plan has been developed which has guided the frequency and means of communication to date. The proposed Project will continue to progress community engagement by:</p> <ul style="list-style-type: none"><li>• Regularly reviewing and updating stakeholder and community engagement plans;</li><li>• Actively maintaining partnerships and design focus groups established with the community; and</li><li>• Communicating in a timely and open manner.</li></ul> <p>TII and its appointed contractor(s) will ensure that local residents, occupiers, businesses, local authorities and all other stakeholders affected by the proposed construction works, as outlined in the EIAR, will be informed in advance of work taking place. The notifications will detail the estimated duration of the works, the working hours and the nature of the works. In the case of works required in response to an emergency, the local authority, local residents and businesses will be advised as soon as reasonably practicable. All notifications will include a local helpline number. In addition, information on the works will also be available on the proposed Project website. TII will further develop the Community Engagement Plan to encompass the construction and operational phases of MetroLink. Please refer to the Outline CEMP in EIAR Appendix 5.1.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

Dublin (Metrolink) |                                                                                                     |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |  |
| 7                                                                                                                                                                                | Lack of Consideration given to the tunnel's proximity to the Prospect Square / De Courcy Square ACA | 3        | The entire ACA should be designated as a group of “Special” Buildings for monitoring purposes, as per EIAR Chapter 5 (5.4.11 Ground Settlement Monitoring and Mitigation Works), as these are similar to the cited listed buildings due to their ACA status, and are “Buildings with historical and cultural relevance.” The ACA should be monitored throughout the process (not just at beginning and end).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | <p>Please refer to response item (4) in relation to the classification of 'special' buildings. Appendix A5.1 Outline CEMP details that mitigation and monitoring will be carried out in accordance with the requirements of the EIAR and NIS so that construction activities are undertaken in a manner that does not give rise to significant negative effects. Suitable monitoring programmes will need to be developed, implemented, documented and assessed in accordance with the specification outline in the detailed CEMP(s). The results of all environmental monitoring activities will be reviewed by the Environmental Manager on an ongoing basis to enable trends or exceedance of criteria to be identified and corrective actions to be implemented as necessary.</p> <p>Appendix A5.1 Outline CEMP also details the noise and vibration monitoring programme that will be undertaken to ensure impacts to buildings and sensitive receptors are minimised. The mitigation measures proposed cover impacts arising from construction vibration, tunnel boring, and blasting. As detailed, vibration (and noise) control audits will be conducted at regular intervals throughout the construction programme to ensure criteria is not exceeded and to identify opportunities for improvement, where required.</p> <p>Please refer to response item (2) in relation to the predicted impacts to settlement at this location.</p> |  |
| 8                                                                                                                                                                                | Insufficient Property Owners Protection Scheme (POPS)                                               | 3        | The Property Owners Protection Scheme is not sufficient to protect period properties from potential structural damage, for the following reasons:<br>o The documentation about the scheme demonstrates no understanding or consideration for the different structural considerations and repair requirements of Protected or ACA period properties. There are very few Conservation accredited structural engineers in Ireland who are properly qualified to survey period properties such as those in a conservation area (see Conservation Register for Engineers (CARE)). Only CARE qualified Conservation Engineers should be undertaking POPS surveys of Protected and ACA buildings, and there is no reference to the surveyors being provided under the POPS scheme having these specialities. Additionally, the cost of repairs in a period house are generally much higher due to the requirement to use appropriate materials and specialist skills to apply them (lime plasters and renders, matching cracked period bricks). There is no indication that these requirements have been considered and will be respected in instances where repairs are to be funded by TII. | <p>Please refer to response item (1) in relation to POPS. The buildings included in the Property Owner Protection Scheme (POPS) will have condition surveys carried out prior to the commencement of works and again after completion. In those cases where the POPS survey identifies that damage has occurred as a result of the works repairs are to be prepared in accordance with method statements prepared by the POPS Conservation Architects where necessary.</p> <p>TII have issued letters to everyone who is eligible for POPs scheme. Once registered surveys will be undertaken in advance of the construction.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |  |
| 9                                                                                                                                                                                | Insufficient Property Owners Protection Scheme (POPS)                                               | 3        | o The cost covered by the scheme is insufficient for the currently very high cost of construction, which is particularly high for period properties, and especially so for significant works like underpinning. Specifically, page 5 of the MetroLink Property Owners' Protection Scheme, October 2022 document states that repairs recommended by the appointed surveyor will only be covered up to the cost of €45,000. It also states “If you do not agree with this recommendation you are free to pursue the matter through normal legal procedures. ”                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | The threshold for repair work under the POPS has been recommended by our professional advisers and has been approved by the Metrolink Project Board.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |  |
| 10                                                                                                                                                                               | Insufficient Property Owners Protection Scheme (POPS)                                               | 3        | o The potential repair costs covered should be increased to reflect current construction costs for specialist work on period houses, and to reflect worst case scenarios for structural damage caused by settlement. Assurances should also be made that the repair funds will cover repairs done to the conservation standards expected in an ACA.<br><br>o Additional avenues to contesting survey findings should be put in place other than legal proceedings.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | Please refer to responses 8 and 9 above.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |  |
| 11                                                                                                                                                                               | Insufficient Property Owners Protection Scheme (POPS)                                               | 3        | o The scheme only applies to properties which are 30m from the tunnel. My Neighbour’s house in the same terrace does not qualify, while ours does, which seems preposterous, given that they are attached (and indeed structural damage to one building in the terrace could have a knock on effect across the terrace). The 30m rule is insufficient given the architectural significance of the Prospect Square / De Courcy Square ACA and the fact that most structures in it do not have foundations.<br><br>o The scheme should apply to the entire ACA, or at the very least, structures within a much greater distance to the tunnel.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | <p>As noted in response item (1), the POPS allows residential property owners to register with TII if the property is within thirty meters of the edge of the MetroLink alignment or fifty meters of station structures. Please note no structural impacts are predicted.</p> <p>The 30m zone above the tunnel is deemed appropriate and reflects the width of the settlement contours as presented in EIAR Appendix 5.17. Buildings outside this zone are unimpacted due to settlement.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |  |

Dublin (Metrolink) |                                                           |          |                                                                                                                                                                                                                                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |  |
| 12                                                                                                                                                                               | Glasnevin Station Not In Keeping with Local Aesthetic     | 4        | The station design at Glasnevin is completely out of character with the historic neighbourhood of Hart’s corner with its late 19th C and early 20th C structures. The design should be revised to blend with the existing architecture of Hart’s Corner.  | TII disagree with this statement and believe that the commissioning of internationally renowned architect Nicholas Grimshaw and Partners, has delivered a contemporary station design which is appropriate for a state of the art metro system such as Metrolink. Appropriately, significant emphasis is placed on the public spaces. Where feasible, the station concourse is a soaring space illuminated from above with natural light. Dublin's rich architectural heritage has been respected, but not copied in a pastiche imitation. In accordance with best conservation principles, as set out in the ICOMOS Venice Charter of 1964, the stations are architecturally distinguishable so as not to falsify the existing historic context. Reference and due respect to that context is made through the choice of high quality and appropriate materials and the scale of the interventions Please refer to EIAR Chapter 4.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |  |
| 13                                                                                                                                                                               | Length of Construction Period and Associated Disturbances | 4        | Up to a 10 year construction period will have a massive impact on the quality of life of those living along the proposed line. This in addition to the risk to homes and businesses along the route is not in any way worth the enhanced transport links. | <p>Please refer to response item (1) in relation to the predicted impacts to your property.</p> <p>The EIAR provides details of the plans to mitigate any risks to the local community, property and business as a consequence of the proposed Project. With these plans in place, TII believe that the delivery of the enhanced transport links will in itself hugely benefit the community through the reduction of traffic and associated traffic pollution. As detailed in Chapter 3 (Background to the MetroLink Project), the delivery of MetroLink will address challenges of compact growth, sustainable mobility, enhanced regional connectivity, quality international connectivity, transition to a low carbon and climate-resilient society, enhanced amenity and heritage, maximizing sustainability gains, strong economy supported by enterprise innovation and skills, access to quality childcare, education and health services, and strengthened rural economies and communities.</p> <p>The EIAR details in full the proposed environmental protection measures to be implemented during construction. One of the key aspects of environmental control during the construction phase is the requirement for the appointed contractor to prepare a detailed design and construction methodologies plan in the form of a detailed Construction Environmental Management Plan (CEMP) to ensure all environmental impacts are managed and mitigated in accordance with the EIAR and Railway Order, assuming an Enforceable Railway Order is granted. This detailed CEMP(s) will be provided to DCC for consultation and approval in advance of any construction works on site. An Outline CEMP is included in Appendix A5.1 of the EIAR that will be developed further by the appointed contractors. Monitoring instrumentation will also be used throughout the works to monitor potential environmental impacts, including those discussed above to ensure that acceptable limits are not breached.</p> <p>Furthermore, as detailed in EIAR Chapter 5, MetroLink Construction Phase, the programme for the construction of the proposed Project has been optimised to minimise the duration of the Construction Phase in order to lessen the duration of potential environment impacts, while ensuring that the areas surrounding the work sites remain operational and functional. Work will run concurrently at all MetroLink site locations to ensure the Project is delivered in an effective and timely manner.</p> <p>The potential impacts associated with the construction phase activities of the proposed Project on the residences and businesses are addressed in Chapter 11 (Population &amp; Land Use) of the EIAR, with mitigation measures proposed where required. This includes potential noise and vibration impacts from construction activities as detailed in Chapter 13 (Airborne Noise &amp; Vibration) and Chapter 14 (Groundborne Noise &amp; Vibration), disturbances to the local road network as detailed in Chapter 9 (Traffic &amp; Transport), and dust risk as detailed in Chapter 16 (Air Quality).</p> <p>Measures to mitigate and monitor these impacts as a result of construction activity across the proposed Project are also detailed in Chapter 5 (MetroLink Construction Phase) and summarised in Chapter 31 (Summaries of the Route Wide Mitigation &amp; Monitoring Proposed).</p> |  |

| Submission No.                                                                                          |                                               |          | 040                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

| Charlemont & Dartmouth Community Group MetroLink Submission - Dartmouth Road Submission 13 January 2023 |                                               |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| 1                                                                                                       | EXECUTIVE SUMMARY<br><br>Policy and Procedure | 1        | <ul style="list-style-type: none"><li>• The submission is fully supportive of the CDCG General Area Submission which seeks the removal of the Tara Street to Charlemont section of the rail order.</li><li>• Specifically the Charlemont station should not form part of the rail order as it will severely and demonstrably adversely affect the residential amenities of the Dartmouth Road residents both during the construction phase and the operational phase.</li><li>• The reliance on an element of the railway works in the form of the station box previously constructed as part of the office development fundamentally prejudices the entire process and is non-compliant with the EIA Directive.</li></ul> | <p>TII disagree and are of the view Charlemont Station should form part of the Railway Order application for the wider strategic reasons summarised below, noting that as outlined by the responses below, the environmental impacts of both the construction and operational phase can be mitigated with the exception of groundborne noise generated by the TBM passing which will be temporary for a period of c. 2 weeks at any single location. It is acknowledged that the proximity of the works to Dartmouth Road residents is an understandable concern and TII commit to working closely with local residents to ensure the required mitigation measures are put in place. While TII are of the view that the environmental impacts can be mitigated, temporary relocation of affected residents on Dartmouth road immediately adjacent to the construction works could be facilitated under certain conditions. TII are available to discuss this option if that is something the property owner would like to explore and consider.</p> <p>The MetroLink enabling works constructed as part of the Hines development has the benefit of planning permission which was granted in April 2019. The station box location was not fixed by the Charlemont Development. The preferred route for MetroLink was published in March 2019 following a comprehensive route options study. The preferred route was based on the emerging preferred route for the scheme which included a station at Charlemont. The Charlemont Metro Enabling Works were constructed to enable the Charlemont Development to proceed whilst simultaneously ensuring there was an option available to construct a station at Charlemont that avoided unnecessary demolition, took advantage of an available site, provided infrastructure that is integrated with planned development rather than necessitating later changes and retrospective adjustments to a new development or even possible demolition of the new development, whilst providing protected provision for the future extension of the scheme south, if required.</p> <p>There is no inconsistency with the EIA Directive. All options remain open to the Board in relation to this location. The critical factor in favour of the station at this location are the policy decisions and supporting analysis outlined above and not the permitted enabling works.</p> <p>TII rejects the assertion that the inclusion of a roof slab at Two Grand Parade has prejudiced the EIA process. There were no "neutral" alternatives available to ABP when it made a decision on the application for permission for Two Grand Parade. It had three options, all of which had significant consequences for proper planning and sustainable development and the environment:</p> <p>*grant permission without the roof slab, which would have required TII to demolish Two Grand Parade or another development in this area to deliver a Metro station in the location that was emerging from the contemporary optioneering reports;<br/>*refuse permission for Two Grand Parade, sterilising the site a frustrating the zoning objective for the site<br/>*grant permission with the roof slab, securing the zoning objective and leaving open the option of a station at this location.</p> <p>The Board opted for the third option having regard to submissions from the NTA and revised designs from the developer. That decisions was challenged by way of judicial review, but the judicial review was withdrawn. The objections now raised attack the validity of that decision, which is prohibited by Section 50 of the Planning and Development Act 2000.</p> |

| Charlemont & Dartmouth Community Group MetroLink Submission - Dartmouth Road Submission 13 January 2023 |              |          |                                                                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
|                                                                                                         |              |          | (1) continued                                                                                       | <p>Rationale for the Proposed Charlemont Station</p> <p>The connection from St Stephens Green to Charlemont / Ranelagh is supported by the previous Transport Strategy for Greater Dublin Area (2016-2035) and the current Transport Strategy for Greater Dublin Area (2022-2042). The latter considers a range of options for the onward extension of MetroLink to meet the demand for travel over the period of the strategy. This includes consideration of the need for the upgrade of the Luas Green Line to metro, with a metro extension to Dublin south west, south or south east. Whilst the strategy envisages that further extensions will be delivered after 2042, MetroLink which terminates at Charlemont allows for the possible extension of the metro in all the above directions.</p> <p>The proximity of the MetroLink station to the Luas stop at Charlemont provides for a positive customer experience for all users with short interchange distance and due to the proximity, clear wayfinding and high visibility of the interchange. The interchange arrangements at Charlemont provide for significantly better interchange arrangements compared to an alternative interchange at St Stephen's Green Station. Passengers wishing to interchange between Luas and metro at an alternative St Stephen's Green terminus would face a 500m-walk along a route either through St Stephen's Green park or along the footpath north of the park, which adds significantly to the time for interchange and therefore the overall journey time for passengers and a less positive customer experience for all interchange users. This passenger experience would be reduced further for those with mobility or visual impairments as well as those travelling to/from the airport with luggage.</p> <p>The section of MetroLink route between St Stephen's Green and Charlemont Stations contributes significantly to the overall benefits of the scheme. It serves a significant area of the south city of Dublin and offers enhanced access from the local area to the city centre and a direct connection to Dublin Airport. It serves key trip attractors including residential areas and offices / workplace locations, with high passenger boarding and alighting figures in the peak hours. During the morning peak, at Charlemont station the flows include 1,800 passengers alighting, 2,300 boarding and 1,229 passengers alighting, 2,276 boarding during the evening peak. The passenger numbers contribute significantly to the overall benefits of the scheme and the effect of these benefits outweigh the additional costs that are associated with the delivery and operation of the section from St Stephen's Green to Charlemont station. Please refer to Chapter 7: Consideration of the Alternatives, section 7.7.8 MetroLink Southern Terminus Location, Table 7-16 Summary to Identify Southern Termination Point for MetroLink.</p> <p>The location of the interchange at Charlemont does not preclude onward extension south. An interchange at Charlemont is supported by policy including the Dublin City Development Plan 2022 - 2028 and the Transport Strategy for the Greater Dublin Area. As noted by the GDA Transport Strategy 2022-2042, section 12.3.2, "Charlemont offers the optimal location for the primary interchange with the Green Line in response to growing demand in the longer term and is an appropriate location to facilitate any potential future metro extensions to serve the south west, south or south east of the city region should sufficient demand arise."</p> <p>By extending MetroLink to Charlemont it provides for future proofing of the Green Line, bypassing the capacity constrained Luas on-street running section, and ensures potential future connectivity options are enabled, either to the Green Line or for extensions of the metro.</p> <p>The Charlemont Station interchange provides for increased passenger utilisation of the MetroLink system, thereby increasing the benefits delivered by the Project, reflected by an improved Project Benefit Cost Ration (BCR).</p> |

| Charlemont & Dartmouth Community Group MetroLink Submission - Dartmouth Road Submission 13 January 2023 |                                                                                                               |             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |  |
| 2                                                                                                       | EXECUTIVE SUMMARY<br><br>Policy and Procedure                                                                 | 1           | <ul style="list-style-type: none"><li>As is described in detail in the CDCG General Area Submission, the Charlemont Station Box is an unauthorised development that also required an EIA. Clearly Charlemont Station is an integral part of the Metrolink proposal and the subject Rail Order Application. The Board, therefore, cannot grant the current Rail Order as to do so would a) facilitate the circumvention of the EIA Directive by the splitting of projects and b) amount to a retention permission which it is compelled to refuse. Effectively, Charlemont Station cannot be considered as usable for the Metrolink project because it will remain legally unsafe.</li></ul> | <p>Please refer to response (1) above. TII would also note as presented in EIAR Chapter 30 the cumulative potential of the Charlemont works has been assessed.</p> <p>We understand the reference to the Charlemont Station Box to be a reference to the MetroLink advance enabling works.</p> <p>The MetroLink advanced enabling works is not an integral part of the MetroLink proposal. The construction of these works allowed a key site with commercial zoning to proceed without prejudicing the delivery of a MetroLink station at this location. It was clearly entitled to do so as part of its statutory remit to safeguard the proper planning and sustainable development of the area. The Board remains entitled to refuse permission for a station at this location or seek revised designs if it has any concerns with the effects of the MetroLink advanced enabling works-on the environment. TII has already outlined why, in its view, the Board can and should grant a Railway Order for the construction of the station at this location.</p> <p>The reference to retention permission is fundamentally mistaken. The MetroLink advanced enabling works are permitted by the permission for the office development. Its construction does not require any retrospective consent. The Railway Order will not purport to authorise any development retrospectively.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |  |
| 3                                                                                                       | EXECUTIVE SUMMARY<br><br>Policy and Procedure<br><br>2.2.1 Operational Phase<br><br>2. Size of Charlemont Box | 1, 8 and 10 | <ul style="list-style-type: none"><li>The documentation and in particular the drawings submitted are misleading and do not illustrate the relationship between the proposed station works and the houses on the southern side of Dartmouth Road. The deep construction required immediately adjacent to residential houses is wholly inappropriate and will result in a very severe loss of amenity and devaluation of property.</li></ul> <p>2.2.1 We contend that the submitted drawings are inadequate as they do not clearly illustrate the above ground elements.....</p>                                                                                                              | <p>TII disagree that the documentation and drawings submitted are misleading and do not illustrate the relationship between the proposed station works and the houses on the southern side of Dartmouth Road. Drawing ML1-JAI-SRD-ROUT_XX-DR-Z-02090 (Structures Details Book 2 of 3) shows the outline of the underground station, property Drawing ML-P 307 0-A (Property Details, Book 2 of 2) also shows the footprint of the station in relation to surrounding property, as does Alignment drawing ML1-JAI-ARD-ROUT_XX-DR-Y-03096 (Alignment Details Book 2 of 2). Regards drawing ML1-JAI-SRD-ROUT_XX-DR-Y-02096, the relationship of the section shown to Dartmouth Road is a function of where the long section has been taken and is therefore correct.</p> <p>Neither do TII agree that deep construction adjacent to the residential houses is inappropriate and would also note the environmental impacts have been carefully considered. TII would also note that while TII are of the view that the construction environmental impacts can be mitigated, relocation is an available option for Dartmouth Road residents immediately adjacent to the construction site during peak construction. TII are available to discuss this option if that is something the property owner would like to explore and consider.</p> <p>Regards loss of amenity during construction, Dartmouth Road will be closed between Dartmouth Place and Dartmouth Square West during the enabling works and main works (please also see response (31) below) but diversions will be put in place for local access, including deliveries, emergency services, bin collection, and pedestrian access will be maintained to the property.</p> <p>The impacts on parking will be monitored during construction to reinstate any disrupted areas as soon as practicable. As referenced in the Scheme Traffic Management Plan, Appendix A9.5 section 7.11.6.2, while Dartmouth Road is closed during the construction phase (either partially or fully), existing parking levels along this road will be impacted. The existing parking will be fully reinstated on the reopening of Dartmouth Road,.</p> <p>The benefits of the proposed MetroLink Project are provided in Chapter 3: Background to the MetroLink Project, section 3.4 MetroLink Response to Challenges provides the benefits of the project. TII are of the view that the proposed development will have a long term positive affect in terms of property value. There is possibility that property values will in fact increase in close proximity to public transport infrastructure and that local residents will greatly benefit from having a world class metro system providing access to the city centre, airport and north city at their door step.</p> |  |

| Submission No.                                                                                          |                                                                                                                             |          | 040                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

The first component is 'design' which should be undertaken prior to submission for a Railway Order consent. By following a 'design and build' approach NTA/TII is failing to provide the required level of detail under which a) affected residents can adequately understand the implications of the proposals and b) a Rail Order could be granted by An Bord Pleanála (ABP).</li></ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | There is no connection between the selected procurement method and the level of design for the Railway Order application. The level of design undertaken is appropriate for a Railway Order application, noting that the design to inform the Railway Order application has been developed to Preliminary Design level. This Preliminary Design provides the required level of detail to inform the EIAR, and the level of design presented and used to inform the EIAR is consistent with previous successful Railway Order applications.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

The construction noise thresholds (CNTs) have only been applied to the facades of buildings (section 13.2.6.1.3. of the EIAR).</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | <p>Noise and vibration assessments have not been deferred until after an enforceable railway order is granted.</p> <p>The EIAR presents a comprehensive and detailed assessment of both groundborne and airborne noise and vibration in Chapter 13 and 14 of the EIAR in accordance with best practice and the guidance cited in those chapters of the EIAR. The assessments includes for predictive modelling in order to identify the potential impacts on sensitive receptors during both the construction phase and the operational phase. Where necessary, mitigation measures are proposed to reduce any identified effects. Section 13.2.6.1.3 simply identifies that the project will develop within the confines of the consent as contractors are appointed and translate the designs and methods developed for the purpose of the Railway Order and EIAR into detailed designs and methods. The EIAR proposes monitoring and mitigation measures that will ensure that the proposed construction and operation of the proposed Project is in line with that presented in the EIAR. The Board can also impose any requirements of an enforceable Railway Order if it considers it necessary.</p> <p>The assessment of noise levels at building facades is normal best practice for this type of analysis noting the assessment criteria generated from best practice guidance (BS5228) all refers to noise levels at building facades.</p> <p>We refer further in response (14) below.</p> |
| 6                                                                                                       | EXECUTIVE SUMMARY<br><br>Inadequate EIAR<br><br>Section 4.2.4 Mitigation                                                    | 1 and 27 | <ul style="list-style-type: none"><li>The impacts of construction noise and vibrations on internal dwelling environments has not been assessed.</li></ul> <p>Referring to Metro North Railway Order 2010 and the conditions appended to schedule 14 of that order:</p> <p>- Condition 15 of the previous metro north railway order specified that the airborne construction noise levels that should be applied at the facade of any residence.</p> <p>- From the evidence submitted (this EIAR), it is apparent that it will not be possible to achieve these thresholds, particularly when the cumulative impacts of noise and vibration, both air borne and ground borne, are taken into account.</p> <p>Condition 12 and 13 of the aforementioned Metro North relate to vibration impacts. They reference German Standard DIN 4150-3:2016 "Vibrations in buildings - Part 3: Effects on structures". The ability of the project to comply with any such standard needs to be fully explored by the Board and at any oral hearing held.</p> <p>For this reason, we request that the Board appoints specialist noise and vibration consultancy advice in order to assist it in conducting this element of the assessment.</p> | <p>The assessment undertaken in EIAR were completed by internationally recognized specialist consultants and is in line with best practice and with all relevant guidelines and policy requirements as laid out in EIAR Chapter 13 Airborne Noise and Vibration, section 13.2.2. The assessment of noise levels at building facades is normal for this type of analysis as the assessment criteria generated from best practice guidance all refers to noise levels at building facades, as referred to in response (5) above.</p> <p>As per "Old Metro North", the assessment has been presented in Chapter 13 of the EIAR in terms of the potential effects at the façade of all properties potentially impacted (as detailed in other responses above). As also stated it is generally possible to achieve the criteria at the majority of facades. The exceptions are presented in Section 13.7 Residual Impacts. Having regard to groundborne vibration, the DIN 4150 standard is also utilised to determine the potential for building damage in the assessment presented in Chapter 14. (Please refer to Table 14.5 of Chapter 14).</p>                                                                                                                                                                                                                                                                                                                                                       |

The Proposed Working Hours are outlined in EIAR Chapter 5, MetroLink Construction Phase, section 5.2.4. Standard working hours will generally be the norm for all above ground works i.e. Monday to Friday 07:00 to 19:00 and Saturday 07:00 to 13:00. Only tunnelling and other works underground will be undertaken 24 hours a day. The only exception to this is the requirement for work above ground outside standard working hours for exceptional events such as concrete pours, and abnormal deliveries. In the exceptional event that these night time works are necessary, the contractor will engage with the local community and local authority before such works are undertaken.</p> <p>All planned night-time work activities will have to be undertaken, controlled and mitigated under the detailed Construction Environmental Management Plan to maintain impacts below the agreed construction noise thresholds. Examples of mitigation measures that can be used to reduce impact are detailed within Chapter 13, section 13.6, including the use of enclosure structures for planned activities outside of the standard working hours.</p> <p>The rationale for 24/7 working on underground activities such as Mechanical Electrical Power (MEP) installation, TBM strip out, and tunnel clean and track laying, is that they can be managed underground without causing disturbance at night. While activities below ground are progressed on a 24/7 basis, site level activities such as deliveries etc will be limited to standard working hours (Chapter 5, Section 5.5.17.3 refers). In addition progressing this work 24 hours a day will ensure that the construction phase is completed much more quickly, thereby reducing the duration of effect on nearby sensitive receptors, including dwellings on Dartmouth Road.</p> <p>Owing to the nature of the sprayed concrete intervention tunnel construction and to ensure a safe and stable method of excavation, and minimising settlement impact, the sprayed concrete intervention tunnel construction will be undertaken 24 hours per day, seven days per week. The groundborne noise and vibration arising from mechanical excavation of the tunnel will not exceed threshold limits. During night-time support works at the surface, an acoustically clad steel framed temporary building located above the access to the SCL work site on the south east corner of the compound will control airborne noise breakout to surrounding sensitive properties. All concrete to support the sprayed concrete tunnel lining operation will be batched on site within the acoustic enclosure and will not require night-time delivery.</p> <p>The predicted level of groundborne noise during Tunnel Boring Machine (TBM) passage is 49 dB LASmax at 33 Dartmouth Road which is above the 45 dB LASmax threshold, resulting in a significant impact on the occupants of this address for the relatively short period estimated at up to 2-week duration of the TBM passage beneath this property where it can be anticipated that occupants of certain properties identified in the EIAR will experience noise impact. Unfortunately there are no effective methods available to reduce groundborne noise from TBMs at source and therefore the principal mitigation measure is advance consultation and engagement to inform residents of the timing of the TBM passing to allow building occupants to prepare for the temporary elevated noise levels.</p> <p>Therefore with the exception of some temporary disturbance (c. 2 weeks) resulting from the TBM passing. All other activities are not predicted to cause significant impact at night.</p> <p>As outlined in Transport Infrastructure Ireland (TII) Airborne and Groundborne Noise Mitigation Policy (Appendix A14.6) there is a process in place whereby further mitigation measures can be implemented at individual properties should this be merited.</p> |
| 8                                                                                                       | EXECUTIVE SUMMARY<br><br>Inadequate EIAR<br><br>Section 4.5<br>Construction of Intervention Tunnel. | 1 and 30 | <ul style="list-style-type: none"><li>The blasting impacts of tunnelling directly under the houses on Dartmouth Road has not been assessed in terms of amenities, noise, vibration and human health.</li></ul> <p>The construction of this tunnel is by mechanical excavation and by blasting. As noted above the blasting impacts are not assessed. The use of hydraulic breakers will be required, although for limited periods of time.....</p> <p>Of particular concern for the residents in the area is the SCL nigh time support works (i.e. concrete mixing) will be required on the compound site at Charlemont. A steel clad building is required to provide acoustic attenuation, but details of this building are not provided and no actual modelling or assessment is undertaken of this operation.</p> | <p>Section 13.6.1.2.4 discusses the proposed steel clad building, in the fourth bullet point under Table 13.85. To reduce reverberant noise build up, the requirements of this building are that it will be suitably clad to achieve a minimum sound reduction index of 24dB Rw.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

At the local level the following parameters have been used to assess impacts on general traffic:</p> <ul style="list-style-type: none"><li>* Increase in driver delays at junctions;</li><li>* Changes in traffic flows on surrounding streets; and,</li><li>* Additional distance travelled due to diversions.</li></ul> <p>Local traffic impacts have been assessed against key performance indicators, including the removal of one or more lanes of traffic, increase in traffic flow of +10% (PCUs), where there is predicted to be a permanent increase in journey length of 500m, or a new signalised junction. Local modelling undertaken at this location indicates that the increased volume of traffic on Grand Parade and Northbrook Road does not translate into any significant increase in driver delay. The largest increase in diver delay of 12 seconds is registered on the westbound approach on Grand Parade to the Ranelagh Road signalised junction.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| 10                                                                                                      | EXECUTIVE SUMMARY<br><br>Inadequate EIAR<br><br>Section 4.3 Settlement & Subsistence: 4.3.1 Methodology | 1 and 28 | <ul style="list-style-type: none"><li>• The EIAR fails to properly assess the settlement impacts of the tunnelling upon the houses on Dartmouth Road and there may be settlement of between 35mm and 45 mm which would severely affect these protected buildings.</li></ul> <p>From a review of the EIAR and associated appendices, it is evident that a very limited assessment of settlement and subsidence has been carried out. It can be seen from the above diagram that the houses directly over the tunnels on Dartmouth Road fall within the 35mm to 45mm settlement zone.....</p> <p>However, given that all bar one of the buildings covered by this submission are protected structures, they should be classed as damage category risk 3 (moderate).</p> <p>However, the protected buildings on Dartmouth Square West and on Dartmouth Road are excluded.</p> <p>Appendix A5.17 provides an assessment of 'representative' buildings. It is unclear why these buildings were selected. There is no map illustrating the location of reference numbers/properties. The presentation of the information is opaque and unclear and does not facilitate a full and proper examination of the true impacts upon the houses on Dartmouth Road. Again, this is a significant inadequacy in the EIAR.</p> <p>The assessment effectively defers most of the assessment of subsidence and settlement to a further assessment. Such an assessment if undertaken after the railway order is issued, removes property owners' rights to review the actual impact of the development on their properties. This is wholly contrary to the principle of protecting third party rights.</p> | <p>TII do not agree that that "a very limited assessment of settlement and subsidence has been carried out". The assessment undertaken covers the whole route of the proposed Project. In addition, as is standard with a long linear project, buildings were selected to provide a representative sample and coverage to inform the EIAR, and TII can confirm that the protected buildings on Dartmouth Square West and on Dartmouth Road were not excluded from the assessment. Please refer to Figure 20.16 in Appendix A5.17 where the settlement contours can be examined to identify the predicted level of ground movement for each property.</p> <p>As stated in Appendix A5.17, the approach taken by TII for assessing the impact of construction generated ground movements reflects the industry standard three-phased ground movement impact assessment process that is undertaken on tunnelling and underground projects around the world, that includes Channel Tunnel Rail Link (CTRL), Dublin Port Tunnel, Crossrail and High Speed 2. The level of assessment, Phase 2, is appropriate for this stage of the Project to inform the Railway Order application.</p> <p>TII does not agree that the EIAR fails to properly assess the settlement impacts of the tunnelling upon the houses on Dartmouth Road or that the EIAR has assessed the impact of settlement on the houses on Dartmouth Road. EIAR Appendix 5.17 refers. The settlement predicted for the buildings directly over the tunnel are of up to 45mm as stated. The Phase 2 assessment of the damage for these buildings is "Slight" - please refer to building B151 (32 Dartmouth Road, the representative building) in table 5-2 of that appendix, the representative building (section 5.2.1 of Appendix A5.17 refers) for the assessment along Dartmouth Road. It is also important to note that the Property Owner Protection Scheme (POPs) scheme (as outlined in section 5.4.11.4 of the EIAR) which will entail undertaking pre and post construction surveys of every property within the zone of influence of the alignment. The Property Owners' Protection Scheme is in addition to the existing legal rights of property owners and is in place to provide a simple and prompt way of rectifying any damage caused under the project up to the ceiling of €45,000. If the sum should exceed this amount the normal claims process would be used with the insurance companies for TII and/or the contractor.</p> <p>The protected nature of a building does not alter the classification of damage from slight to moderate as stated. The protected buildings along Dartmouth Road, within the zone of influence of the works, will be subject to a further Phase 3 refined assessment (despite the impact only being assessed as 'slight') to take account of final design and construction methodology details, most likely utilising advanced numerical modelling techniques and further surveys of the building. The results of this refined assessment typically show that earlier assessments are conservative and overestimate the likely impact of construction generated ground movements.</p> |

| 11                                                                                                      | EXECUTIVE SUMMARY<br><br>Inadequate EIAR<br><br>Section 4.4<br>Hydrogeology | 2 and 30 | <ul style="list-style-type: none"><li>The hydrogeological impact assessment is inadequate as it has not been based upon local bore hole logs and no local impact assessment has been undertaken around the Charlemont station.</li></ul> <p>No detailed specific localised groundwater modelling has been undertaken as part of the EIAR. Water depth reading from boreholes some 550m from the proposed station are used in the broad assessment (Table 19.15). The data on which the assessment is undertaken does not relate to the site concerned. It is a requirement of the EIA process to provide relevant up-to-date and accurate information in relation to impacts of any aspect of the development. As such relying on bore hole data which is some considerable distance from the area of the works, has resulted in a wholly inadequate assessment. Hydrogeological information along the line of the underground elements should have been collected, particularly in an around a major intervention such as Charlemont Station.</p> | <p>TII have undertaken localised and specific groundwater modelling, and TII can also confirm that hydrogeological information along the line of the underground elements has been collected.</p> <p>Please refer to Figure 19.6 of the EIAR which identifies the location of a boreholes at Charlemont. Pump tests were undertaken here and groundwater samples were taken (from 3 boreholes here) and analysed in order to inform the baseline conditions presented in the EIAR. Furthermore calculations were undertaken to estimate the effects of excavations on the groundwater for every station including Charlemont (refer to Table 19.35 Table 19.41 and Charlemont subsection under section 19.5.3.6.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

All plant associated with ventilation are housed within back of house plant rooms below ground level within the stations and hence will not generate any measurable airborne noise emissions at ground level. The key potential noise source relates to breakout noise from ventilation shafts and grilles at surface level. The assessment shows that without mitigation there are potential significant noise impacts from surface grills.</p> <p>The final airborne noise impact at sensitive receptors is very sensitive to small changes in the final construction and design of the ventilation systems. As a result, modelled impacts and mitigation will have to be updated in parallel with the detailed design. Section 13.6.2.3 outlines the detailed considerations that will be included in the design to ensure that the ventilation systems do not exceed limits as per BS 4142, including:</p> <ul style="list-style-type: none"><li>Reduction of induct flow rates;</li><li>Reduction of elements in the airflow;</li><li>In duct attenuators;</li><li>Orientation of grilles and louvres away from sensitive receptors;</li><li>Acoustic louvres; and</li><li>Anti-vibration mountings and couplings will be incorporated into the design to control vibration.</li></ul> <p>Once the Project moves into the next phase of design development then the detailed design of each shaft and surface grill will include measurements of background and ambient noise at the closest noise sensitive receptors to each of these fixed items of plant, this data will be used to establish a noise threshold level in accordance with BS 4142, that each item of plant must be below, with bespoke noise mitigation at each location.</p> <p>We comment further in responses (22), (057) and (058) below.</p> |

EIAR Appendix A14.5, Groundborne Noise and Vibration and Blasting Modelling Results, Section 14.4 AZ4 Northwood to Charlemont, presents the predicted vibration levels during railway operation for sensitive receptors. The predicted groundborne noise at 33 Dartmouth Road (a property directly above the alignment) is 28 dB LASmax, which is below the threshold level of 40 dB LASmax, indicating no significant impact during railway operation. The predicted VDV (Vibration Dose Value is a parameter that combines the magnitude of vibration and the time for which it occurs) during railway operation is 0.005 ms-1.75 (VDV day) and 0.003ms-1.75 (VDV night). Both of these values are well below the VDV Threshold Levels of 0.8ms-1.75 (VDV day) and 0.4ms-1.75 (VDV night) indicating no significant impact for the building or for residents of this address.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

| Charlemont & Dartmouth Community Group MetroLink Submission - Dartmouth Road Submission 13 January 2023 |                                                                                                   |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| 14                                                                                                      | EXECUTIVE SUMMARY<br><br>Construction Phase                                                       | 2        | <ul style="list-style-type: none"><li>The construction noise impact assessment is wholly inadequate as it fails to consider the internal noise impact over a 9 year period, defers assessments to the design and construction stage, fails to properly assess night time impacts, incorrectly categorises impacts as very significant as opposed profound</li></ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | <p>Further to response (5) above, the assessments presented in Chapter 13 and Chapter 14 of the EIAR are undertaken in line with best practice and all relevant guidelines and policy requirements as laid out in Section 13.2.2 of the EIAR. Further to response (5) above, the assessment of noise levels at building facades is normal best practice for this type of analysis as the assessment criteria used is based on predicting the noise levels at building facades as per the relevant guidelines and standards including BS 5228.</p> <p>EIAR Chapter 2, Methodology used in Preparation of the EIAR provides the details of the durations of effect utilised in the analysis throughout the EIAR. The assessment in EIAR Chapter 13 has noise and vibration impacts over shorter durations to reflect the duration of the actual activity i.e. excessive noise effects resulting from the construction will not last 9 years, and will be of short durations for each of the activities on site: Piling, Excavation, building and MEP etc and mitigated through the measures described in the EIAR.The majority of the most impactful noise activities are completed within the first 5 years of the construction programme.</p> <p>In EIAR Chapter 5, MetroLink Construction Phase, Table 5.5, the proposed working hours for this site are outlined. The assessments presented in Chapters 13 and 14 are based on these proposed working hours with no works proposed above ground occurring during the night time (Refer to response (7) above for further detail). As outlined in Table 5.5 of the EIAR, there will be underground works during the night time period and these have been assessed in both Chapter 13 and 14. The impact of support activities for those works and associated mitigation has also been assessed in Chapters 13 and 14. Chapter 13 assesses potential impacts associated with the operation of plant above ground only i.e. ventilation fans at the surface to facilitate this work, while Chapter 14 covers the potential impacts associated with underground works.</p> <p>TII do not agree that impacts are incorrectly categorised as very significant rather than profound. EIAR Chapter 13, section 13.2.6 outlines the appraisal methodology and along with Tables 13.12, 13.13 and 13.14 shows 'very significant' rather than 'profound' is the correct categorisation.</p> |
| 15                                                                                                      | EXECUTIVE SUMMARY<br><br>Construction Phase<br><br>Section 4.2.3 Ground-borne Noise and Vibration | 2 and 26 | <ul style="list-style-type: none"><li>Construction vibration impact assessment fails to assess the evacuation tunnel. This element of the project is likely to have a significant effect upon the Dartmouth Road residents. It will not be possible to meet airborne noise condition limits that may be reasonably set by An Bord Pleanála.</li><li>Construction of the intervention tunnel will give rise to significant noise and disturbance, 24/7 during the period of its construction.</li></ul> <p>Intervention Tunnel:<br/>The assessment of the impacts of the intervention tunnel have not been undertaken. Table 14.13 assumes that the construction methodology for the intervention tunnel will be "Drill-and-blast". The impacts associated with either blasting or drilling of this 360m tunnel, which passes under the properties at Dartmouth Road, have not been assessed.</p> <p>Table 14.11 of the EIAR indicates that the construction of the intervention tunnel is assessed under airborne impacts in Chapter 13, notwithstanding that the construction method would be blasting (i.e. Air overpressure). Both Figures 14.4 and 14.5 (extracts above) clearly do not assess the impacts of this intervention tunnel on any properties on Dartmouth Road or further south into Ranelagh.</p> | <p>As referred to in response to Item (8) above, there is an error in Table 14.13 of the EIAR where it is outlined that drill and blast will be used at "all underground stations and intervention tunnels". A number of amendments were made to the proposed construction methodology for the intervention tunnel and these were assessed in the EIAR. These amendments included moving the intervention tunnel deeper and excavating the tunnel by mechanical means only. Both of these interventions were proposed to reduce potential effects arising from the construction of the intervention tunnel. The assessment of the mechanical excavation for the evacuation tunnel and intervention tunnel has been carried out, and is included within Chapter 14 of the EIAR. The assessment of groundborne noise and vibration from mechanical excavation for a number of representative receptors is presented in Table 14.31 and Table 14.33, with predictions for a greater number of receptors in the area presented in Appendix 14.5 Groundborne Noise and Vibration Blasting Modelling Results.</p> <p>Owing to the nature of the sprayed concrete intervention tunnel construction and to ensure a safe and stable method of excavation minimising any potential for settlement, the sprayed concrete intervention tunnel construction will be undertaken 24 hours per day, seven days per week. The groundborne noise and vibration arising from mechanical excavation of the tunnel will not exceed threshold limits. During night-time support works at the surface, an acoustically clad steel framed building will be used within the compound to control airborne noise breakout to surrounding sensitive properties. All concrete to support the sprayed concrete tunnel lining operation will be batched on site within the acoustic enclosure and will not require night-time delivery.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

| Charlemont & Dartmouth Community Group MetroLink Submission - Dartmouth Road Submission 13 January 2023 |                                             |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 16                                                                                                      | EXECUTIVE SUMMARY<br><br>Construction Phase | 2        | <ul style="list-style-type: none"><li>The construction phase on Dartmouth Road, assuming no delays, will last 8.5 years (102 months). This is a medium-term effect which has not been properly considered in the EIAR. This may be termed "medium-term" from a broad community perspective, but in the lives of the residents of Dartmouth Road the impact is profound. Especially when the cumulative effect of the ongoing construction of the Office Building at 2 Grand Parade that will last for 4-5 years is considered. The residents of Dartmouth Road will have to endure almost a decade and a half of major scale construction within meters of their houses in an area zoned as residential.</li></ul> | <p>As outlined in EIAR Appendix A5.2 Construction Programme, Including Tunnel Elements, the proposed construction activities from advance works through to completion assessed for the EIAR will progress at this site for a period of 8.5 years. TII are of the view, as demonstrated by the detailed EIAR submitted that the environmental impacts have been carefully assessed and mitigation measures proposed where necessary. As detailed in the relevant environmental chapters and the Outline Construction Environmental Management Plan (CEMP) in Appendix A5.1, a significant suite of mitigation measures and monitoring has been proposed to mitigate the effects of this construction period so far as possible.</p> <p>TII would also note that while TII are of the view that the construction environmental impacts can be mitigated to levels consistent with residential amenity for the vast majority of the construction period, relocation is an available option for Dartmouth Road residents immediately adjacent to the construction site during peak construction. TII are available to discuss this option if that is something the property owner would like to explore and consider.</p> <p>Please refer to Transport Infrastructure Ireland (TII) Airborne and Groundborne Noise Mitigation Policy (Appendix A14.6) for further information.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| 17                                                                                                      | Executive Summary<br><br>Construction Phase | 2        | <ul style="list-style-type: none"><li>The hours of construction proposed include 12 hour working days and significant element of 24 hour working during certain periods of the contract.</li></ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | <p>Proposed Working Hours are outlined in Section 5.2.4 of Chapter 5 of the EIAR. Standard working hours will generally be the norm for all above ground works i.e. Monday to Friday 07:00 to 19:00 and Saturday 07:00 to 13:00. Only tunnelling (please see response (15) above) and other works underground will be undertaken 24 hours a day. The only exception to this is the requirement for other noisy work above ground outside standard working hours for events such as concrete pours, abnormal deliveries etc. TII and their Contractor will engage with the local community and local authority to advise of any such upcoming events such as this, and will do their best to minimise any such occurrence so far as practicable.</p> <p>All planned night-time work activities will have to be undertaken, controlled and mitigated under the detailed Construction Environmental Management Plan to maintain impacts below the agreed construction noise thresholds. Examples of mitigation measures that can be used to reduce impact are detailed within Chapter 13, section 13.6, including the use of enclosure structures for planned activities outside of the standard working hours.</p> <p>The rationale for 24/7 working on activities such as Mechanical Electrical Power (MEP) installation, TBM strip out, and tunnel clean and track laying, is that they can be managed underground without causing disturbance at night. While activities below ground are progressed on a 24/7 basis, site level activities such as deliveries etc will be limited to standard working hours (Chapter 5, Section 5.5.17.3 refers).</p> <p>Owing to the nature of the sprayed concrete intervention tunnel construction and to ensure a safe and stable method of excavation, and minimising settlement impact, the sprayed concrete intervention tunnel construction will be undertaken 24 hours per day, seven days per week. The groundborne noise and vibration arising from mechanical excavation of the tunnel will not exceed threshold limits. During night-time support works at the surface, an acoustically clad steel framed temporary building will be used within the compound to control airborne noise breakout to surrounding sensitive properties. All concrete to support the sprayed concrete tunnel lining operation will be batched on site within the acoustic enclosure and will not require night-time delivery.</p> <p>The predicted level of groundborne noise during TBM passage is above the 45 dB LASmax threshold, resulting in a significant impact on the occupants for the relatively short 2-week duration of the TBM passage. Unfortunately there are no effective methods available to reduce groundborne noise from TBMs at source and therefore the principal mitigation measure is advance consultation and engagement to inform residents of the timing of the TBM passing to allow building occupants to prepare for the temporary elevated noise levels.</p> <p>Therefore with the exception of some temporary disturbance (c. 2 weeks) resulting from the TBM passing. All other activities are not predicted to cause significant impact at night.</p> <p>As outlined in Transport Infrastructure Ireland (TII) Airborne and Groundborne Noise Mitigation Policy (Appendix A14.6) there is a process in place whereby further mitigation measures can be implemented at individual properties should this be merited.</p> |

| 18                                                                                                      | Executive Summary<br><br>Construction Phase | 2        | <ul style="list-style-type: none"><li>The alternative construction compound has not been properly assessed and given the impacts of that proposed, it is incumbent upon TII to properly assess this and propose it as a mitigating measure.</li></ul>                             | <p>There is one construction site proposed for Charlemont Station, and that encompasses the construction footprint of the proposed Charlemont Station.</p> <p>The rationale for the location of Charlemont Station is provide in response (1) above.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| 19                                                                                                      | Executive Summary<br><br>Construction Phase | 2        | <ul style="list-style-type: none"><li>Additional traffic will be generated during construction and the rediverting of traffic will have an adverse effect upon the local road network. HGV traffic on quiet residential roads will have a severe impact upon amenities.</li></ul> | <p>Appendix A9.5 Scheme Traffic Management Plan details the proposed HGV routing associated with the construction works at Charlemont Station. Routing from the site is mainly via the R111 and R110, and routing to the site is via the R810 and R110. Alternative routing options via the R110/Kildare Road and the R110/R811 are also considered, all of which are part of the regional road network. As detailed in Appendix A9.5 Scheme Traffic Management Plan, access will be provided either from Grand Parade or from Dartmouth Road. The localised construction traffic routeing to and from the various site accesses will require consideration of the local traffic restrictions along Grand Parade and the junctions which intersect it. Due to banned movements on Grand Parade, inbound movements to the south site will need to route via the R114 gyratory to the north. When the full closure on Dartmouth Road (lasting up to 30 months) is in place, inbound and outbound traffic will route via Dartmouth Road, R138 and Grand Parade. Local modelling undertaken at this location indicates that the increased volume of traffic on Grand Parade and Northbrook Road does not translate into any significant increase in driver delay. The longest delay occurs eastbound on Dartmouth Road during the AM peak of 14 seconds.</p> <p>Model outputs indicate that there will be a moderate increase in HGV movements during construction at this location. The most significant increase, of just over 2%, will be in both directions along Ranelagh Road/Charlemont Street, which is part of the regional road network. Elsewhere in the area, including local residential streets, increases are significantly lower.</p>                                                                                                                                          |
| 20                                                                                                      | Executive Summary<br><br>Construction Phase | 2        | <ul style="list-style-type: none"><li>No local traffic modelling has been undertaken as part of the assessment and the impact upon pedestrians has not been properly assessed.</li></ul>                                                                                          | <p>This statement is incorrect, both local traffic modelling and the impact upon pedestrians has been assessed. EIAR Appendix A9.5 Scheme Traffic Management Plan presents the analysis undertaken to assess the impact of the traffic management measures on the local road network surrounding the proposed Charlemont Station during the construction phase. At the local level the following parameters have been used to assess impacts on general traffic and on pedestrians:</p> <ul style="list-style-type: none"><li>Increase in walking distance/quality of service for pedestrians (through removal of footpath, reduction of quality of service, removal of a pedestrian crossing or relocation of crossing by more than 100m);</li><li>Increase in driver delays at junctions;</li><li>Changes in traffic flows on surrounding streets; and,</li><li>Additional distance travelled due to diversions.</li></ul> <p>The analysis undertaken at this location indicates that the increased volume of traffic on Grand Parade and Northbrook Road does not translate into any significant increase in driver delay. The largest increase in driver delay of 12 seconds is registered on the westbound approach on Grand Parade to the Ranelagh Road signalised junction.</p> <p>During the construction phase, pedestrians will experience a reduction in quality of pedestrian infrastructure and space. The construction site boundary will encroach upon footways in the local area, including the northern side of Dartmouth Road, and the southern side of Grand Parade. However, a temporary signalised crossing will be provided west of the Luas to maintain pedestrian access to and from the Stop. Whilst there are partial closures on Dartmouth Road and Grand Parade, pedestrian movements will be maintained on appropriately sized footways through the area.</p> |

| Charlemont & Dartmouth Community Group MetroLink Submission - Dartmouth Road Submission 13 January 2023 |                                                                              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| 21                                                                                                      | Executive Summary<br><br>Construction Phase<br><br>Section 4.11 Human Health | 2 and 41 | <ul style="list-style-type: none"><li>There will be a severe impact upon human health which has not been properly assessed.</li></ul> <p>This is the only assessment of the impact upon human health. House nos. 32 to 35 Dartmouth Road are not even identified as very highly sensitive receptors. It appears as though this section to the EIAR has not fully reviewed or had regard to the construction phasing with night-time working, ground borne noise and vibrations and other matters raised above. This is considered to be a wholly inadequate assessment of the impact upon human health in so far as it relates to the properties on Dartmouth Road.</p> | <p>It is not correct to say "There will be a severe impact upon human health which has not been properly assessed." EIAR Chapter 10, Human Health has identified that there may some residual effects after mitigation measures due to the noise and vibration arising from mechanical excavation, TBM advancement and proposed blasting resulting in "annoyance to users, but no health effects".</p> <p>The Human Health Assessment is presented in Chapter 10 Human Health. This chapter identifies human beings as being sensitive due to their age, health status or for other reasons. But as outlined in section 10.3.4 of the Chapter 10 of the EIAR, it is neither possible or necessary to identify every sensitive receptor along the proposed alignment. The approach used in the assessment is to present residences (including the ones listed), schools, workplaces and places of worship as "highly sensitive" as identified in section 10.3.4.2. This EIAR has had full regard to the construction phasing, including night time working, and groundborne noise and vibration etc as the health assessment is based on the modelling and assessment outputs of a number of chapters (see Table 10.3). These are Chapter 9 Traffic and Transport, Chapter 11 Population and Land Use, Chapter 12 Electromagnetic Compatibility and Stray Current, Chapter 13 Airborne Noise &amp; Vibration, Chapter 14 Groundborne Noise &amp; Vibration, Chapter 16 Air Quality , Chapter 18 Hydrology, Chapter 19 Hydrogeology and Chapter 20 Soils and Geology.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| 22                                                                                                      | Executive Summary<br><br>Amenity Impacts                                     | 2        | <ul style="list-style-type: none"><li>The operation of the trains and associated ventilation systems has the potential to adversely affect the amenities of the residents and has not been properly assessed</li></ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                  | <p>Further to response (12) above and please also refer to response (57) and (58) below.</p> <p>TII have assessed the impact of the trains and ventilation system and do not predict that amenity will be significantly impacted.</p> <p>With regards to the noise of operating rail infrastructure, EIAR Chapters 13 and 14 present a comprehensive and detailed assessment of operational airborne and groundborne noise and vibration. No residual noise impacts are identified at this location during operation. The calculated rail noise levels across the proposed Project are not significant in terms of any widespread community disturbance and result in a not significant to slight impact when added to the prevailing noise environment.</p> <p>EIAR Chapter 13, sections 13.2.3.2 and 13.5.3.2.3 recognise that ventilation systems if not designed and mitigated effectively are potential noise sources. Section 13.6.2.3 outlines the detailed considerations that will be included in the design to ensure that the ventilation systems do not exceed limits as per BS 4142, including:</p> <ul style="list-style-type: none"><li>Reduction of induct flow rates;</li><li>Reduction of elements in the airflow;</li><li>In duct attenuators;</li><li>Orientation of grilles and louvres away from sensitive receptors;</li><li>Acoustic louvres; and</li><li>Anti-vibration mountings and couplings will be incorporated into the design to control vibration.</li></ul> <p>Measures to mitigate noise from the use of public address systems is also detailed in Chapter 13 (sections 13.5.3.2.4 and 13.6.2.4). Best practice design principles will be employed to minimise noise breakout at the surface from these systems via escalators, lift shafts and stairwells.</p> <p>Mechanical elements associated with escalators are housed below ground and are fully enclosed. The operation of escalators will not generate any notable noise sources during operation and will not be audible above the prevailing noise environment.</p> <p>As noted above, with regards to stations entrances, these are transient areas for passengers entering and exiting the station. These activities are not the source of significant noise generation and form part of the existing soundscape in the existing prevailing environment. It is acknowledged footfall numbers will increase in the vicinity of the station entrance, however this activity does not translate to significant noise impacts.</p> |

| Charlemont & Dartmouth Community Group MetroLink Submission - Dartmouth Road Submission 13 January 2023 |                                                                                                          |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| 24                                                                                                      | Executive Summary<br><br>Amenity Impacts<br><br>Section 5 Operational Impacts: 5.4 Traffic and Transport | 3 and 50 | <p>No adequate drop-off pick up facilities, taxi ranks, or interchange with other services are proposed. There will be an inevitable loss of parking on Dartmouth Road.</p> <p>Section 5.4.2 Drop-Off and Pick Up<br/>There is a major station entrance onto Dartmouth Road. It has no drop- off or pick facility and inevitably there will be a loss of parking for residents along this section of Dartmouth Road as the requirement for a drop-off and pick-up facility becomes evident. Given the very low level of integration with bus services in this suburban location, there will be a significant demand for such a drop-off facility. .</p> <p>No assessment has been undertaken of the demands, requirements and impacts of such a significant interchange element. This will result in a significant loss of amenity for local residents.</p> | <p>As detailed in EIAR Chapter 6, MetroLink Operations and Maintenance, the proposed Project has been designed to ensure maximum interchange with other modes of transport, specifically more sustainable modes of transport such as walking, cycling and public transport, to discourage the use of private vehicles. The provision of drop-off facilities have been considered during the design process with such facilities only provided at locations that are less likely to encourage unnecessary short journey car trips in the local area. While a short drop off is proposed between Grand Parade for persons of restricted mobility only and the Royal Canal, along Dartmouth Road all existing street parking is reinstated on completion.</p> <p>During the operational phase, the model zones around Charlemont Station forecast a reduction in Car mode share, with a reduction of between 400 and 800 car trips over the 12hr period. With the reduced demand for car trips, it is anticipated that the demand for parking will also reduce. Transport modelling presented in EIAR Chapter 9, Traffic and Transport also indicates that the majority of passengers boarding and alighting at Charlemont will transfer from/to other forms of public transport by foot, and therefore will not require drop-off facilities or a bus interchange</p> <p>TII would note that it is not correct to say no assessment has been undertaken and that the Station is intentionally designed with only one drop-off for persons of restricted mobility only. There will be no further drop-offs provided and therefore the assertion that parking will be reduced in the future is not correct.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| 25                                                                                                      | Executive Summary<br><br>Amenity Impacts<br><br>Section 5 Operational Impacts: 5.6 General Impacts       | 3 and 53 | <p>• The overall impact of the both the construction and operational phases of the project, in terms of noise, vibration, visual impacts, traffic, HGV movement, construction activity, operational emissions, anti-social behaviour and general activity around the station will be such as to severely and permanently adversely affect the residential amenities of the residents listed in this submission. The impacts will be so severe as to evidently be in material contravention of the Dublin City Development Plan zoning objective for the area, which is Z2: "to protect and/or improve the amenities of residential conservation areas."</p>                                                                                                                                                                                                 | <p>The impacts of the proposed project, both during the construction and operational phase have been assessed in the EIAR that accompanies the Railway Order, with mitigation measures proposed where necessary and practicable, to ensure impacts are within acceptable limits, noting that there will be a temporary groundborne noise significant impact when the TBM passes for approximately 2 weeks. For the vast majority of the construction phase and all of the operational phase, the impacts of the project are consistent with the protection and improvement of the amenities of this residential conservation area. The operation of the project will improve those amenities by improving access to sustainable transport and reducing traffic.</p> <p>While TII are of the view that the construction environmental impacts can be mitigated, relocation is an available option for Dartmouth Road residents immediately adjacent to the construction site during peak construction. TII are available to discuss this option if that is something the property owner would like to explore and consider.</p> <p>The above responses to this Executive Summary have also addressed in summary the impacts raised by this observation with the exception of anti-social behaviour. In this regard, the interchange will increase the number of people passing through the area, however it is important to note that people will be using MetroLink, similar to Luas as a transport hub, moving quickly in and out of the area. The station will not be a destination attracting people to remain in the area. Further, TII have deliberately designed the Station with minimum set down space (with the exception of a drop-off on Grand Parade for persons of restricted mobility only) or room for taxi ranks so that it does not encourage the Station to be used as a terminus. Also see response (67) below. As stated in EIAR Chapter 11: Population &amp; Land Use, and in common with all other stations along the route, measures to reduce anti-social behaviour, including the provision of real time CCTV and appropriate lighting will be delivered on completion.</p> <p>Regards the reference to the Z2 zoning objective. The zoning under the Dublin City Development Plan 2022 - 2027 for the residential properties in question is "Z2 Residential Neighbourhoods (Conservation Areas)" with an objective to "protect them from unsuitable new developments or works that would have a negative impact on the amenity or architectural quality of the area (See Table 3.11 of the submitted Planning Report). As outlined in Section 4.5.18.6 of the Planning Report, the element of the Project within the Z2 zoning area will affect a below ground area only and will not impact on the amenities or architectural qualities of the area. The majority of the proposed Charlemont Station and all above ground elements are located within the lands zoned Z5 with the objective "To provide for the creation and protection of enterprise and facilitate opportunities for employment creation". The Station has been designed so that it is integrated with the proposed redevelopment of this site by a third party development, and as such, the Station design promotes the zoning objective. The MetroLink station design does not result in any segregation of the area, with no surface barriers or walls proposed.</p> |

| Charlemont & Dartmouth Community Group MetroLink Submission - Dartmouth Road Submission 13 January 2023 |                                          |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| 26                                                                                                      | Executive Summary<br><br>Property Issues | 3        | Property: <ul style="list-style-type: none"><li>• Houses 32-35 are the subject of sub-stratum CPO.</li><li>• The development will inevitably impact upon the value of retained land/property.</li><li>• The owners of no.35 Dartmouth Road have not been properly served with the relevant papers (to confirm).</li><li>• There will be a significant devaluation in property and the Board must refuse this element of the railway order. Owners' costs of engaging in the process should be borne by TII.</li></ul> | <p>TII can confirm sub-stratum acquisition of land is sought below properties 32-35.</p> <p>All issues in relation to compensation for lands to be acquired are a matter for negotiation and, in the absence of agreement, reference to the Property Arbitrator. They are not a matter within the jurisdiction of ABP.</p> <p>No. 35 was under construction at the time referencing was carried out and would note the property lies within the land owned by 11 Cambridge Terrace who were referenced.</p> <p>35 Dartmouth Road is a new mews residence to the rear of 11 Cambridge Terrace. The owner of 11 Cambridge Terrace was served the notice and the submission on page 15 notes the owner of 35 Dartmouth Road as one and the same. The new build was completed in Q4 2022 and remains part of the garden to the rear of 11 Cambridge Terrace until separately registered.</p> <p>A letter seeking confirmation of title pertaining to 11 Cambridge Terrace was issued on 02/02/2022, in the full knowledge that TII understood that a dwelling was currently being constructed to the rear of 11 Cambridge Terrace. A Mr John Neary responded on 09/02/2022 confirming ownership of 11 Cambridge Terrace and referring to the new dwelling being currently being constructed at the rear of 11 Cambridge Terrace.</p> <p>- At the time of the RO Application there was no change/new Folio to Land Registry boundary information to 11 Cambridge Terrace, therefore no transfer (of part) to new owners.<br/>- At the time of the RO Application there was no update to Registry of Deeds title, therefore no transfer (of part) to new owners.<br/>- At the time of the RO Application there was no update to The Property Price Register, therefore no indication of a sale.</p> <p>Accordingly, there was no new data/evidence at the time, and the understanding would have been the property (i.e. the new dwelling known as 35 Dartmouth Road) was not completed/sold prior to September 2022, at the time of the RO Application. It has not been alleged by the observer that the facts are different, but this may be clarified at oral hearing.</p> <p>From a Land Referencing perspective, TII could not done anything further to establish possible ownership/tenancy on a new build which was possibly not completed prior to the MetroLink RO. This will be subject of legal submissions at oral hearing in due course.</p> |

INTRODUCTION<br><br>1.1 Background<br><br>1.2 Strategic Planning Issues                          | 4        | 1.1 The submission is made on behalf of the residents of properties 26-28 and 32-35 Dartmouth Road<br><br>1.2 The submission concludes that the link between St. Stephens Green and Charlemont cannot be justified in planning terms. Furthermore, it undermines the business case for the entire project. For this reason the associated submission requests that the section between Tara Street and Charlemont be omitted from the Railway order and that a new railway order application for the section between Tara Street and St Stephen's Green be submitted.                                                                                                           | <p>The preliminary business case for the project is a matter for the Oireachtas, the Government, NTA and TII to be approved in accordance with the Public Spending Code. The Preliminary Business case which includes the section between St Stephen's Green and Charlemont was approved by Government in July 2021. The section of the route contributes positively to the over benefit to cost ratio (BCR ) for the scheme. It is incorrect to state that the St. Stephens Green to Charlemont section " undermines the business case for the entire project".</p> <p>ABP role is only to determine whether the project should be approved by reference to the proper planning and sustainable development of the area and the impacts of the project on the environment, including the carrying out of an EIA and AA. A scheme which terminates at Tara Street would not be consistent with the Transport Strategy for Greater Dublin Area (2022-2042).</p> <p>Tara Street and Charlemont are specifically identified as locations for stations in the GDA Transport Strategy 2022-2042. ABP is required to have regard to those requirements as policies and objectives for the time being of a public authority whose functions have a bearing of the proper planning and sustainable development of Dublin (Transport (Railway Infrastructure) Act 2001 and 143 of the Planning and Development Act 2000). The transport strategy is also a consideration material to the proper planning and sustainable development of the area (Section 31 J of the Planning and Development Act 2000).</p> <p>ABP has to give considerable weight to the GDA Transport Strategy, given its elevated role in the statutory scheme relating to proper planning and sustainable development, including that:</p> <ul style="list-style-type: none"><li>* the NTA is required to provide a report to planning authorities making regional spatial and economic strategies, development plans and local area plans ("relevant plans") with recommendations on the optimal use, location, pattern and density of new development taking account of the Transport Strategy and stating whether there is inconsistency between the relevant plan and the Transport Strategy;</li><li>* relevant plans are required to be consistent with the Transport Strategy;</li><li>* the Office of the Planning Regulator is required to evaluate relevant plans to ensure that they address consistency with the Transport Strategy;</li><li>* the Minister for Housing can direct variations to draft relevant plans to ensure that they are consistent with the Transport Strategy;</li><li>* landowners are not entitled to compensation where permission is refused due to inconsistency with the Transport Strategy.</li></ul> <p>The responses to the observations made in this submission explain why TII, by reference to Transport Strategy and project level assessment data that supports the conclusions of the Transport Strategy, do not consider it is correct or appropriate that the MetroLink alignment south of the proposed Tara Station should be omitted.</p> <p>In addition any decision to terminate the scheme at Tara will significantly impact on the overall viability and benefits of scheme.</p> |
| 28                                                                                                      | Section 2.2.1 Operational Phase<br><br>Charlemont Station, Turnback Tunnel and Intervention Tunnel. | 9        | The City Tunnel continues southwards, terminating 360m beyond Charlemont Station to provide for a turnback facility for trains going back in a north bound direction. The reason for this 0.3km length of tunnel is not explained in the documentation. A parallel evacuation and ventilation will also be constructed alongside this section of tunnel that will connect back to Charlemont Station. Again, the rationale and justification is very limited in the documentation submitted with the Rail Order application. The full costs and benefits of alternatives, including an emergency exit emerging at the southern end of the turnback facility, is not considered. | The need for turnback's and intervention tunnels is covered by EIAR Chapter 4, Description of the MetroLink Project. This section of tunnel is required to allow for the safe and efficient operation of the turnback facility , while also facilitating the stabling of a small number of trains at this location to allow for the efficient operation of the MetroLink system. Please refer to Appendix A7.4 Charlemont Shafts Options Report where there is a review of a number of options for the proposed turnback facility and for the location of an intervention/ventilation tunnel/shaft. The intervention tunnel avoids the need for surface landtake, and the impact associated with this, to accommodate a shaft.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |

| 29                                                                                                      | Section 2.2.1<br>Operational Phase<br><br>Charlemont Station, Turnback Tunnel and Intervention Tunnel.        | 12       | The Applicant has not justified why Charlemont station, located in a residential area, is "by far the longest underground station box" in the Metrolink project. The IEE suggests that the Applicant should make efforts to produce a "more compact station design with less of an impact on Dartmouth Road".                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | The station footprint has already been designed with a key objective to minimise the station footprint in order to reduce the potential environmental effects and project costs, while ensuring that each station functions to meet the passenger requirements during the operation of the system. However this station has been amended when compared to other stations:<br>(1) To avoid a direct impact on surrounding properties including the gardens on Dartmouth Square West, which led to an increase in overall length to maintain space within the station for required functionality.<br>(2) And includes a second entrance/exit to Dartmouth Road.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 30                                                                                                      | Section 2.2.1<br>Operational Phase<br><br>Potential to reverse the orientation of the Dartmouth Road entrance | 12       | <p>The Independent Engineering Expert also draws some conclusions as follows:</p> <p><i>"We are of the view that the design of the station should be optimised to try and reduce the overall size of the station box and therefore reduce the incursion into Dartmouth Road and should this not prove practicable to utilise a construction methodology which minimises the closure time of Dartmouth Road and provides the residents full access to their properties. It is also our view that given the size and potential developments on the site it would be at the very least practicable to reverse the orientation of the entrance to face away from the street and into the site (facing the development), so although footfall might not be reduced, the residents would not at least have to be faced with continual exposure to light and noise such as that which accrues around such station entrances. Some discreet signage would be all that would be required to guide walkers to their destination.</i></p> <p><i>We are also of the view that whilst moving the second entrance, perhaps into Dartmouth Park itself, might be technically feasible it might cause as many problems as it solves."</i></p> <p>The conclusion of the IEE clearly demonstrates that the Applicant has not adequately considered alternatives to reduce the impact on the residents of Dartmouth Road and thereby the EIAR is inadequate and incomplete. We support the further investigation of a reorientation of the station entrance away from the road. This may have the potential to reduce some of the Operational Impacts outlined in section 5 below.</p> | <p>Response (29) above explains the rationale for the sizing of Charlemont Station. TII are very cognisant of the impact on Dartmouth Road and have examined the construction methodology carefully (see responses (31) and (46) below), however regrettably it is not possible to avoid a road closure given the station box will extend under Dartmouth Road. TII do not accept that the EIAR is inadequate or incomplete because it has been necessary to extend the station box under Dartmouth Road.</p> <p>The current access arrangement whereby the entrance canopy faces Dartmouth Road is the optimum design solution as it will allow passengers to exit the station and move away from the station quickly. Along with all other stations along the route, the entrance layout, structure, lighting etc is in keeping with the Architectural, Urban Realm and Landscaping Design Principles set out for MetroLink within section 4.7 of EIAR Chapter 4: Description of the MetroLink Project. The proposed architectural finish provides an open station entrance from Dartmouth Road and reduces the risk of anti-social behaviour.</p> <p>All lighting within the station and at ground level will be designed to ensure that there is no significant light spill effecting nearby residential properties. Furthermore, as outlined in responses above, noise levels from the entrance canopy are not predicted to be significant.</p> |

| Charlemont & Dartmouth Community Group MetroLink Submission - Dartmouth Road Submission 13 January 2023 |                                  |           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| 31                                                                                                      | Section 2.2.2 Construction Phase | 13 and 14 | <p>The principal access and egress to the construction compound will be from the south via Dartmouth Road. Dartmouth Road will be partially closed (one way traffic only) for 12 to 18 months for utility diversions and fully closed for between 24 and 30 months for the main station construction works.</p> <p>However, Appendix 5.2 of the EIAR outlines construction schedule and it indicates that the Charlemont Station Compound/Deep Station has a 102 month construction period from Q3 of Year 1 to Q4 of Year 9.</p>                                                                   | <p>The overall construction of the works at Charlemont Station is anticipated to be 102 weeks, see EIAR Chapter 5: MetroLink Construction Phase, Table 5.15.</p> <p>Two options have been considered in the EIAR to construct the station under Dartmouth Road. Both options utilise a top down construction method for the station, meaning that Dartmouth Road is only closed long enough to facilitate access to the site and the installation of the foundation piles and roof slab of the station, before utilities are rediverted back along Dartmouth Road and the road reinstated, with the remainder of the works continuing underneath.</p> <p>The first option considered allows for no vehicle access to Two Grand Parade, and the staging of the works for MetroLink for this option is set out within Chapter 5 MetroLink Construction Phase Appendix A5.3, Figures 8-72 to 8-78. This option results in a full closure of Dartmouth Road of up to 5 years to facilitate access (utility diversions, temporary works etc.) to the site and the installation of the foundation piles, roof slab of the station and reinstatement.</p> <p>The second option (The Developer Alternative Construction Methodolgy) considered and proposed by the RO application to maintain access to Two Grand Parade, and the staging of the works for MetroLink for this option is set out within Chapter 5 MetroLink Construction Phase Appendix A5.3, Figures 8-79 to 8-87. This option involves two stages on Dartmouth Road: a partial closure; followed immediately by a full closure of Dartmouth Road. The full duration of these consecutive activities is estimated to take 4 years.</p> <p>Partial Closure: To close Dartmouth Road for the works, the utilities have to be diverted. Subject to Statutory Undertaker approvals (ESB, Eircom etc.) this process is estimated to take up to 18 months, while access is maintained along Dartmouth Road via a proposed single lane closure.</p> <p>Full Closure: Once the utilities have been diverted, the road is then shut to through traffic (pedestrian access is maintained) and is estimated to take up to 30 months to complete the piling, and roof slab. The utilities and road will then be reinstated and road reopened.</p> <p>As referred to in response (54) below, the principal points of access to the site are from both Dartmouth Road and Grand Parade.</p> |
| 32                                                                                                      | 3.3.1 (P.A Reg. Ref: 2373/17)    | 17        | It also emerged during the course of considering the alignment and required depth of the track, that previous studies had failed to have due regards to the main east west sewer along Grand Canal, which the top of the tunnel had to pass under.                                                                                                                                                                                                                                                                                                                                                  | <p>The observation is not correct as TII were aware of the sewer, however, as is natural for any design being developed, further information was sought to refine the design development. Specific surveys of this sewer were undertaken over July/August 2018 (ie after publication of the EPR but prior to publication of the Preferred Route) to ascertain its precise location. This detailed information was then utilised to refine the ongoing preliminary design development of the tunnel alignment and adjacent Charlemont Station layout to ensure the sewer would be avoided.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| 33                                                                                                      | 3.3.1 (P.A Reg. Ref: 2373/17)    | 17        | The resulting station box that was incorporated into the commercial development was also on a different alignment and angled relative to the existing Luas line, passing under houses on Dartmouth Square West. The alignment of the line also meant that any future tie-in with the Luas Green line to the south would have to pass through existing built areas, including a significant amount of demolition within the Ranelagh area (Mander's Terrace), before tying in and replacing the Luas Green line to the south. The revised station box in the planning application is detailed below. | <p>Neither the alignment at Emerging Preferred Route (EPR) or Preferred Route (PR) stage passed underneath the houses on Dartmouth Square West.</p> <p>If in the future, MetroLink was extended south, this does not mean that inevitably open cut construction will be required or demolition of property will be necessary. It is possible that in the event of a tunnel being constructed to connect to Charlemont Station that the TBM would be launched from a site further south.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| 34                                                                                                      | 3.3.1 (P.A Reg. Ref: 2373/17)    | 18        | Note that it would appear that line of the piled wall to the east is straight and differs significantly from the revised station box drawing that is contained in the planning application.                                                                                                                                                                                                                                                                                                                                                                                                         | The section of piled wall shown as straight is in accordance with what is shown on the Railway Order application drawings.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

| Charlemont & Dartmouth Community Group MetroLink Submission - Dartmouth Road Submission 13 January 2023 |                                                 |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| 35                                                                                                      | 4. CONSTRUCTION IMPACTS<br><br>4.1 Introduction | 20       | <p>The construction impacts for the residents who are represented in this submission will be very severe.....</p> <p>While further mitigation is proposed, this is wholly without prejudice to our fundamental point that the Charlemont Station, tunnel for the turnback facility and the intervention tunnel should not form part of the Railway Order. The requested omission of the section of Metro from St. Stephen's Green to Charlemont is to safeguard amenities, ensure an economically and cost effective scheme, and provide for the proper strategic planning of public transport, all of which is in the common good.</p> | <p>Please refer to response (1) above that explains the reasons for why a station is proposed at Charlemont and that while TII are of the view that the construction environmental impacts can be mitigated with the exception of short-term temporary disturbance during the passage of the TBM, relocation is an available option for Dartmouth Road residents immediately adjacent to the construction site during peak construction. TII are available to discuss this option if that is something the property owner would like to explore and consider.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| 36                                                                                                      | Section 4.2.2 Airborne Noise and Vibrations     | 24       | <p>".....it is unclear as to where the monitoring was undertaken for Dartmouth Road in the baseline report. In the case of station piling, there is a significant discrepancy between Table 13.68 of the EIAR and Appendix 13.7. The former gives a predicted impact of 71-80 dB, while the actual appendix indicates significantly higher levels of between 78 and 83.</p>                                                                                                                                                                                                                                                             | <p>Baseline noise monitoring along Dartmouth Road (ATT 72) was measured along the footpath, outside property Number 33 Dartmouth Road. Attended monitoring Location ATT71, was measured along Dartmouth Place. The unattended monitoring location UT51 was measured within the proposed Charlemont compound adjacent to the Luas Line, and monitoring location UT52 was measured to the rear of properties within Dartmouth Square.</p> <p>In relation to Table 13.68, values for Station Piling Works: South are correct within Appendix 13.7 which are in the range of 78 to 83 at receivers 39 to 40, representing properties on Dartmouth Road. Whilst the values in Table 13.68 of the EIAR are incorrectly transcribed as marginally lower, the specific impact ratings are correctly quoted as 'Significant to Very Significant' without mitigation. Post mitigation, a marginal exceedance of the adopted threshold is identified, resulting in a residual effect of 'Moderate to Significant' during this particular phase at properties 32 -34 Dartmouth Road. The values are below the upper threshold of 75 dB LAeq,T.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| 37                                                                                                      | Section 4.2.2 Airborne Noise and Vibrations     | 25       | <p>We would contend that the impacts identified above on very sensitive residential receptors are profound and not merely significant</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | <p>Please refer to response (14) above.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| 38                                                                                                      | Section 4.2.2 Airborne Noise and Vibration      | 25       | <p>Critically, the EIAR does not assess the night time impacts of the construction compound, notwithstanding the fact that the EIAR itself as highlighted above, indicates that it will be operating on a 24/7 basis. This in itself would trigger a profound impact which has not been assessed. The EIAR is therefore fundamentally inadequate.</p>                                                                                                                                                                                                                                                                                   | <p>Both Chapter 13 Airborne Noise and Vibration and Chapter 14 Ground-borne Noise &amp; Vibration have assessed 24 hour working during the construction phase where relevant.</p> <p>The TBM will operate on a 24-hour basis, and this has been considered within Chapter 14 Groundborne Noise and Vibration for the construction phase. When the TBM is in operation then some support activities will also need to occur at the tunnel portals at Northwood and DASP , which have been assessed in Chapter 13 Airborne Noise and Vibration. Other activities such as some track laying activities are required to occur outside of daytime working hours, including night-time, and this has been assessed in Section 13.5.2.3 of Chapter 13. The final paragraph of Section 13.5.2.6.6 also discusses noise impacts during the night-time for works at Charlemont Station.</p> <p>Owing to the nature of the tunnelling works and to ensure a safe and stable method of excavation, and minimising settlement impact, the intervention tunnel construction will be undertaken 24 hours per day, seven days per week and this has been assessed in Chapter 14 Ground-borne Noise and Vibration. It is proposed that during sprayed concrete night-time support works, an acoustically clad steel framed temporary building will be used within the compound to control airborne noise breakout to surrounding sensitive properties and so there will be no significant impact as outlined in Chapter 13 Airborne Noise and Vibration.</p> <p>Please also refer to response (7) above.</p> |

| Charlemont & Dartmouth Community Group MetroLink Submission - Dartmouth Road Submission 13 January 2023 |                                                |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |  |
| 39                                                                                                      | Section 4.2.2 Airborne Noise and Vibration     | 25       | Table 13.90 of the EIAR refers to the impacts upon certain properties including ID 34-35 (10-11 Cambridge Square). This reference to this property is wholly misleading. This mews house at 35 Dartmouth Road was constructed in the rear garden of Nos.11 Cambridge Terrace (not Cambridge Square). The Eircode for 35 Dartmouth Square is D06 P6Y1. This property is not properly referenced in the EIAR.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | The residual noise levels in Table 13.90 relate to the rear façade of properties along Cambridge Terrace (it is noted this is incorrectly referred to as Cambridge Square in the EIAR) Figure 13.2, Sheet 30 illustrates the assessment locations. When read together, the clerical error is apparent and the meaning of the EIAR is clear. The residual noise levels at receptor 34 and 35 (10-11 Cambridge Terrace) relates to the upper floors of these residential buildings which are 3 stories in height. The adjacent properties along Dartmouth Road are two story properties and the calculated residual noise levels at these floor levels benefit to a greater extent from the enhanced 4m noise hoarding around the compound. Noise levels at receptor 39 are representative of the mews building at 35 Dartmouth Square. TII therefore consider, notwithstanding the observation regards referencing, that the assessment undertaken is correct.                                                                         |  |
| 40                                                                                                      | Section 4.2.2 Airborne Noise and Vibration     | 25       | Construction Noise Levels at No's 10 & 11 Cambridge Square are calculated to exceed the NI trigger value.....<br><br>The mitigating measures in the EIAR must be deemed inadequate in relation to the detail provided. It is inconceivable that the properties next door (i.e. nos. 32, 33 and 34 Dartmouth Road) would not experience the same or very similar residual impacts, given they have effectively the same relationship with the site compound and the station works as no.35 Dartmouth Road (specified as 10-11 Cambridge Square)                                                                                                                                                                                                                                                                                                                                                                                                   | Numbers 32 to 34 Dartmouth Road (Receptor ID 's 40 and 41) have a predicted magnitude of impact of 'significant to very significant' before the implementation of mitigation measures. This is the same magnitude of impact as 10 and 11 Cambridge Terrace (receptor ID 34) as outlined in Table 13.68, which outlines potential significant construction noise impacts.<br><br>Table 13.90 provides the significant residual noise impacts (after the implementation of mitigation) at 10-11 Cambridge Terrace (incorrectly called up as Cambridge Square) due to fact that these buildings are 3 stories in height and so noise barriers are not effective at mitigating noise on the third floor the houses. Therefore application of the Airborne and Groundborne Noise mitigation policy is proposed for these receptors. This policy document outlines a procedure to allow TII to work with affected properties in order to identify the most appropriate mitigation.                                                          |  |
| 41                                                                                                      | Section 4.2.3 Ground-borne Noise and Vibration | 26       | The EIAR takes Dartmouth Square West as the location for this element of the assessment. However, the tunnel and works associated with it, do not pass under the houses on Dartmouth Square West. The main tunnel and indeed the intervention tunnel do however, pass under directly 32 to 34 Dartmouth Road. This is a significant inadequacy in this part of the EIAR. Effectively the EIAR fails to assess the very significant potential impacts upon our clients' properties, amenities and human health.                                                                                                                                                                                                                                                                                                                                                                                                                                   | The reference to "Dartmouth Square West" in Table 14.29 refers to the location where the highest modelled noise value was predicted in this general area (17 Dartmouth Square West). However it is not true to say that the analysis did not include for the properties on Dartmouth Road. These have been fully assessed with results presented in Appendix A14.5 and on Figure 14.2. For clarity a number of properties in the Dartmouth Square/Dartmouth Road area will experience temporary exceedances for approximately 2 weeks in groundborne noise levels during the passage of the TBM as per the results presented in Appendix A14.5. (Unfortunately there are no effective methods available to reduce groundborne noise from TBMs at source and therefore the principal mitigation measure is advance consultation and engagement to inform residents of the timing of the TBM passing to allow building occupants to prepare for the temporary elevated noise levels and potentially relocation where this is requested. |  |
| 42                                                                                                      | Section 4.2.3 Ground-borne Noise and Vibration | 27       | The impact of ground borne noise and vibration for each of the project elements listed above was assessed, but only in relation to Dartmouth Square West.....<br><br>The assessment of the impacts of the intervention tunnel have not been undertaken. Table 14.13 assumes that the construction methodology for the intervention tunnel will be "Drill-and-blast". The impacts associated with either blasting or drilling of this 360m tunnel, which passes under the properties at Dartmouth Road, have not been assessed.<br><br>Table 14.11 of the EIAR indicates that the construction of the intervention tunnel is assessed under airborne impacts in Chapter 13, notwithstanding that the construction method would be blasting (i.e. Air overpressure). Both Figures 14.4 and 14.5 (extracts above) clearly do not assess the impacts of this intervention tunnel on any properties on Dartmouth Road or further south into Ranelagh. | Please refer to response (41) with regard to the reference to the assessment at Dartmouth Square West only. Please refer to responses (8) and (15) above that explains that drill and blast will not be used to construct the intervention tunnel.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |  |

| 43                                                                                                      | Section 4.2.4 Mitigation                      | 27       | <p>Given the deficiencies in the EIAR, it is impossible to judge whether the mitigation measures are adequate. There is little that can be done in terms of mitigation to render the impacts non-significant, particularly where these have not been identified in the first instance.....</p> <p>In addition, the interaction of noise effects will be significant. Only 6 locations have been identified for pre-construction surveys in relation to noise and vibration arising from the project. While the Charlemont station new oversite development is identified, the properties on Dartmouth Road are not.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | <p>TII have responded to all observations made on the EIAR by the respondent. TII do not agree with the respondents opinion that there are deficiencies in the EIAR.</p> <p>In terms of the potential for (N&amp;V) mitigation measures to be effective, in Chapter 13, modelling has been undertaken of the potential effects with no mitigation in place and then with mitigation in place where it is required, thereby demonstrating the effectiveness of the proposals. The only exceedances of criteria identified for Groundborne Noise and Vibration relate to the passage of the TBM and as highlighted in section 14.5.1.1 of that chapter there are no effective ways of reducing the groundborne noise and vibration associated with this short term activity (predicted to occur for up to two weeks) at source. Therefore the principal mitigation measure is advance consultation and engagement to inform residents of the timing of the TBM passing to allow building occupants to prepare for the temporary elevated noise levels.</p> <p>In addition TII will accept and consider applications for additional measures on a case-by case basis, in accordance with its Noise and Vibration Mitigation Policy (see Appendix A14.6). This could for example include relocation during peak construction for residents significantly affected by the works.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| 44                                                                                                      | Section 4.3.2 Tunnel Driving and Secant Walls | 29       | <p>The 30m deep excavation will be within the boundary thus described. This secant wall, and very deep excavation proposed, will be within 14m of the rear walls of three storey Victorian houses on Dartmouth Square West, and within 8m of the front elevations of Victorian two/three storey houses n Dartmouth Road. It is a mere 2m from the front elevation of No. 35 Dartmouth Road.</p> <p>Following completion of the station box, it is proposed to drive a TBM through the north east end of the box, and exiting through the south west corner, continue the tunnel boring activity for 350m further south, to behind Ranelagh Village.</p> <p>Ground settlement following the construction of both secant walls and TBM tunnelling is inevitable. it is unavoidable, and it will occur. It will occur to varying degrees, across a settlement zone around the excavation of the tunnel centre line, and behind all the secant walls.</p> <p>Compounding the alarming settlement projections of between 35mm and 45mm caused by deep secant wall, and subsequent excavations, wall deformations, and disturb the water table, the whole of the residential stock within the established slump zone will be subjected to further compounding settlement disruptions with the arrival, and departure, of the TBM tunnelling process, some two years later.</p> <p>Engineering research experience has shown that projection of accurate expected settlement is usually unreliable, and results usually fall within certain ranges above or below expected. This is an important point in the consideration of settlement impacts associated with the proposed development.</p> | <p>EIAR Appendix 5.17, section 4.2 explains the methodology, empirically based and industry recognised approach to estimate the predicted ground movements generated by tunnel, and cut and cover construction, taking account of the design, construction methods and ground conditions. Both cut and cover, and tunnelling generated construction ground movements have been taken account of at this location. TII agree with the observation that ground movements can be challenging to predict and hence the parameters used by TII to predict ground movements are intentionally conservative, and are based on documented empirical data.</p> <p>Settlement and horizontal movements for retaining wall construction and bulk excavation associated with the station box and retaining walls have been undertaken based on the case history data documented in CIRIA Report C760 "Embedded retaining walls – guidance for economic design", taking account of the ground conditions, proposed design and construction methodology. Further details for which can be found in EIAR Appendix 5.17, section 4.2.5.</p> <p>The TBM will be of the type that maintains positive pressure to the face and surrounding ground while the segmental tunnel lining is installed, thereby allowing ground movements to be closely controlled and minimised. TII would also note that TBM entry and exit from the station box will be sealed, with possible ground treatment to further stabilise the ground if required, to manage ground movements within acceptable limits.</p> <p>The prediction of tunnelling generated ground movements has been undertaken in accordance with the volume loss methodology outlined in CIRIA PR 30. This is an empirical method based on the percentage of tunnel volume excavated that is over and above that required for the tunnel itself. The calculation of the resultant settlement trough requires the derivation of a number of ground factors, these are explained in EIAR Appendix 5.17, sections 4.2.2. to 4.2.4. Similar to the cut and cover ground movement predictions, conservative volume and trough width parameters have been selected to ensure the ground movements predictions at this stage are robust.</p> <p>Please also refer to response (10) above that summarises the results of the construction generated ground movement impact assessment.</p> |

| Charlemont & Dartmouth Community Group MetroLink Submission - Dartmouth Road Submission 13 January 2023 |                                 |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| 45                                                                                                      | Section 4.6 Phasing & Programme | 30       | <p>.....the construction period for Charlemont Station is 102 months, or 8.5 years.</p> <p>It is quite clear that this station box which has already been constructed constitutes main works that form part of the first stage of the MetroLink project. They do not relate to the commercial office development.</p> <p>The length of time that the residents of Dartmouth Road have to endure is not temporary with reference to the EIAR Guidelines (EPA 2022). The EIA Directive requires a project to describe the likely significant effects, including the duration and frequency of effects. Table 3.4 of the EIAR Guidelines sets out definitions, which the introduction and project description suggests have been used.</p> <p>It is clear the duration of the impacts fall within a medium term effect as they last between seven to fifteen years. This is length of time is intolerable for any resident on Dartmouth Road.</p> <p>We also contend that this is a significant inadequacy in the EIAR. The duration of the effects in accordance with the guidelines are not given in any of the relevant chapters in so far as they relate to Dartmouth Road.</p> | <p>Regards the observation "that this station box which has already been constructed constitutes main works that form part of the first stage of the MetroLink project. They do not relate to the commercial office development." please refer to response (2) above.</p> <p>TII do not agree that the duration of impacts have not been assessed. As described elsewhere, the works are undertaken in a series of stages to construct the station, while reducing the impact on residents along Dartmouth Road and elsewhere at Charlemont. The assessment undertaken in the relevant chapters of the EIAR is detailed and comprehensive and reflects the different stages of construction and the effects resulting. As a result, effects are described in terms of the duration of these effects, rather than an overall duration for the whole of the construction phase which would be inaccurate. The most impactful construction activities at Charlemont in terms of settlement, noise, vibration and traffic (piling, station build and excavation) will occur in the first 4 to 5 years of the scheme and therefore TII do not agree that the "duration of the impacts fall within a medium term effect as they last between seven to fifteen years". All of these impacts, including the planned closure to vehicle traffic along Dartmouth Road have been assessed and mitigation proposed in the EIAR.</p> <p>Please note that for each of the impact assessment chapters in the EIAR, the likely significant effects, including the duration of these effects are presented as per the EIAR Guidelines definitions. Further descriptors of the works, including a programme of the construction phase for each construction compound is presented in Appendix A5.2.</p> |

| Charlemont & Dartmouth Community Group MetroLink Submission - Dartmouth Road Submission 13 January 2023 |                                 |           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| 46                                                                                                      | Section 4.6 Phasing & Programme | 32 and 33 | <p>3. Length of Closure of Dartmouth Road</p> <p>It is the view of the IEE, that even if it proves impossible or impracticable to move back the D-wall line from the far kerb line (see above) in any event there is no good engineering or planning reason to close Dartmouth Road for this extremely extended period. There are a number of alternate construction approaches, widely used, which would enable Dartmouth Road, which is quite narrow, to reopen after a matter of several weeks or a very few months two of which we outline below.</p> <p>i) Top down Construction</p> <p>ii) Temporary over decking with a steel 'umbrella' or bridge.</p> | <p>TII disagree that the works under Dartmouth Road could be completed and the road reopened “after a matter of several weeks or a very few months” with either of the methods described. One of these methods, Top-Down construction is proposed for all deep station construction on MetroLink and is as set out in the EIAR Chapter 5, section 5.5.9, Underground Stations.</p> <p>Top-down Construction:</p> <p>This methodology will assist to minimise the duration of the proposed closures on Dartmouth Road. Chapter 5, section 5.10.13 Charlemont Station sets out the outline sequence proposed for a consecutive partial and full closure along Dartmouth Road, further described below as follows:</p> <ul style="list-style-type: none"><li>• Commence utility diversions – Dartmouth Road partially open to through traffic and partial parking suspensions (Estimated duration: 12 to 18 months).</li><li>• Dartmouth Road Closed (Estimated duration: 24 to 30 months):<ul style="list-style-type: none"><li>- Site established, hoarding and protection works.</li><li>- Complete final utility diversions.</li><li>- Prepare and install DWall.</li><li>- Excavate and construct roof slab under Dartmouth Road.</li><li>- Reinstate Dartmouth Road, including utilities.</li><li>- Reopen for through traffic and local parking.</li></ul></li></ul> <p>Therefore, the total duration of works on Dartmouth Road is estimated to be between 36 to 48 months, with the road closed to traffic and parking for up to 30 months during this period.</p> <p>Once Dartmouth Road is reopened the remainder of the works will continue to completion below ground without any further major impact on the roadway and parking above.</p> <p>Temporary Over decking/Bridge:</p> <p>While feasible, it is TII's view that a solution to create the station box under Dartmouth Road using temporary over decking would add further unnecessary complexity to the construction sequence with no tangible impact improvement for residents. While traffic could be facilitated through Dartmouth Road across the temporary decking or bridge, residents parking would remain impacted for the duration that the decking/bridge is in place. Dartmouth Road would then have to be closed again to remove the temporary decking and to reinstate the utilities and the road before it is fully restored for both traffic and parking. The duration of such a scheme is likely to be longer than the Top-down option assessed in the EIAR.</p> <p>Therefore, the assessment presented in the EIAR (Top-down construction) is a credible robust scenario in terms of the durations of proposed road closures on Dartmouth Road.</p> |
| 47                                                                                                      | Section 4.7 Working Hours       | 36        | <p>It is quite evident that the works undertaken outside of this standard work week is going to be extensive and ongoing given the extent of works required in relation to the station construction, site clearance, tunnel construction and MEP station works. This is effectively going to (be) a 24/7 construction (site) for a significant period of time over the 9 years of the project.</p> <p>.....this will be an intolerable level of interference in amenities with a loss of sleep, general disturbance and psychological impacts resulting in a detriment to human health.</p>                                                                    | <p>Please Refer to responses (7), (15), (17) and (21).</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

| 48                                                                                                      | Section 4.8 Construction Compound | 38       | Access to the houses on Dartmouth Road is going to be severely restricted for 9 years. All on-street parking is removed.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | <p>The duration of the works impacting Dartmouth Road is set out in Chapter 5, section 5.10.13. While acknowledging that restrictions to Dartmouth Road properties will be significant, the duration of those restrictions will not be the full 9 years of the construction works at Charlemont Station.</p> <p>Pedestrian access to the houses along Dartmouth Road will be maintained at all times. During the 18 months of the utility diversions works along Dartmouth Road, through traffic and on street parking can be maintained along one side of the street, alternating between sides to suit the utility diversion works. Following the completion of the utility diversions, Dartmouth Road will be shut for through Traffic and Parking for up to 30 months, while pedestrian access will be maintained. This will impact on street parking between, 35 (the property at the rear of 11 Cambridge Terrace) through to 29 Dartmouth Road (south) and 28 to 26 Dartmouth Road (north). On completion of these works, the hoarding will be moved back to the other side of Dartmouth Road, the road reopened and parking reinstated.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| 49                                                                                                      | Section 4.8 Construction Compound | 36       | A 'Developer Alternative' for the sequencing is outlined in Appendix A5.3. This is evidently much better than the main sequencing presented in the Appendix, as it allows for Dartmouth Road to be retained as a functioning road for a longer period of time and the construction compound is set back from the nos.32-35. However, it is unclear what the status of this alternative is. It is not referred to in Chapter 7 relating to Alternatives. The only reference to alternative assessment of compounds is in Table 7-19 where it indicates that no alternatives were considered as the compound had to centre on the station box. indeed, this is a further demonstration of how the commercial development at Two Grand Parade has prejudiced the entire EIA process, as it has not been possible to properly consider alternative construction compounds and station locations as this was previously determined by TII in advance of any rail order application. | <p>The rationale for the location of Charlemont Station is provide in response (1) above. Chapter 7: Consideration of Alternative Construction Compounds, section 7.8.3 Location of Construction Compounds, references the selection and assessments of the proposed construction compounds along the MetroLink Alignment.</p> <p>In the majority of cases, including Charlemont it is not possible to consider an alternative site for a construction compound as the site is the location of the construction works for the MetroLink Station at Charlemont. Table 7-19 also refers.</p> <p>The commercial development that has been developed on the site did not in any way preclude alternative construction methods that would potentially reduce the duration of closure on Dartmouth Road. In so far as there are any constraints at this location, they are due to the construction of the principal development at Two Grand Parade, not the incorporation of a roof slab to facilitate the construction of a station. The incorporation of a roof slab reduces constraints in this area, promoting the objectives of the EIA Directive. The only alternative with fewer constraints would have been if ABP had refused permission for Two Grand Parade, sterilising the site, and frustrating the achievement of the zoning objective (which is set out in a Development Plan that had been subject to SEA).</p> <p>The site and thus location of the proposed Charlemont Station is constrained on all four sides of the site while response (29) above explains the rationale for the sizing of Charlemont Station, and hence the need to extend out under Dartmouth Road. However regrettably, it is not possible to avoid a road closure.</p> <p>TII are very cognisant of the impact on residents of Dartmouth Road from a road closure and have examined the construction methodology carefully, with two options presented in Appendix A5.3 and assessed in the EIAR. As referred to in response (31) above, one option included the completion of a review with the Developer of Two Grand Parade of an alternative construction sequences referred to as the “Developer Alternative Construction Methodology”. The outcome of this review led to the possibility of reducing the duration of the road closure on Dartmouth Road, which has been outlined in response (46) above.</p> <p>The assessment presented in the EIAR is a credible robust worst-case scenario in terms of the proposed road closures, but it may be possible for the contractor to propose another alternative solution to reduce the duration of the periods of the road closure further, as long as any changes proposed do not result in any additional environmental effects.</p> |
