| 8                                                                                                                                                                            | Section 2.3 Example of Voids and Major Damage to Property in London and Dublin | 28 and 29 | <p>In Dublin city, during the construction of the Green Luas Line of the new bus lane, construction teams broke into abandoned basements that had not been identified on Surveyors maps, on Harcourt Street. This halted works for several weeks and the basements needed to be backfilled with concrete (as above in London) before construction could recommence.</p> <p>From my own memory, there is a well underneath Prospect Way, which was part of a Monastery on Prospect Avenue. Dublin City Council demolished the monastery, church, and several houses in the 1960s, to build Prospect Way dividing Prospect Avenue in half. In regard to the hidden basements on Harcourt Street, is TII aware of this? This is one example of why a thorough survey of the immediate area (and my property) is carried out before construction begins.</p> <p>What is the likelihood of Voids appearing underneath this property or any properties in our ACA?</p> <p>As I requested above, the TII's POPS insurance must remain in place for a minimum of 10 years, after the Operational period begins. Previous to that, the Construction firm awarded the contract to construct MetroLink, which must fully ensure all properties above the tunnel.</p> | <p>Please refer to responses (1) and (6) above.</p> <p>TII thank you for this information and can confirm that additional surveys are planned and will be undertaken before the start of the construction works. These provisions are detailed in the EIAR. TII are familiar with the potential for hidden basements throughout out the city, through the delivery of previous Luas light rail infrastructure and is covered in Chapter 19 Hydrogeology, Section 19.6.2.5 and Appendix A5.1 CEMP.</p> <p>Steps that will be undertaken prior to Main Works commencement</p> <ol style="list-style-type: none"><li>1. Review historic records to identify previous land use</li><li>2. Identify risk of previous boreholes on tunnel alignment where casings may remain or not adequately backfilled</li><li>3. Identify risk of historic wells or extraction boreholes from records</li><li>4. Identify baseline conditions and inform the contractor of requirements.</li><li>5. Identify all known records in the site information supplied to contractor.</li></ol> <p>The tunnel construction methodology which will be developed by the contractor will comply with good practice and all relevant safety and technical standards. The methodology will ensure that the possibility of voids forming beneath properties will be fully mitigated. The methodology will be approved by TII before works are allowed to proceed.</p> <p>The POPS scheme is referred to in response (1).</p> |

Thorough surveys are carried out on my property before the commencement of construction, during construction and after completion.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | <p>Please refer to response (1), (6), and (8) above.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| 12                                                                                                                                                                           | Summary                                                                        | 30        | <p>Summary item 6: Representations made previously to a Oireachtas select committee hearing regarding the protection of historical houses. TII must take particular care during construction and the operation of MetroLink, to protect our properties as they have shallow foundations, if any.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | <p>TII concur and have planned on this basis. A Project Conservation Architect (PCA) has been engaged to oversee the implementation of the Project. Prior to the establishment of construction compounds, the Project Conservation Architect (PCA) will undertake Structural and Condition Surveys of any built and cultural heritage constraints that will require removal to secure storage (followed by conservation and reinstatement) or protection in-situ. The PCA will also prepare specifications for these works. A specialist Heritage Works Contractor will be appointed to remove, store and conserve these constraints. The Main Construction Works Contractors will appoint Consultant Conservation Architects to implement required preservation of in situ works. This is referenced in Chapter 5 MetroLink Construction Phase, Appendix A5.1 CEMP and Chapter 26 Architectural Heritage of the EIAR.</p> <p>At station locations mitigation measures for extant architectural heritage constraints directly impacted by the works will generally be carried out be the Project Conservation Architect (PCA). The role of the PCA, and the condition surveys and specifications they are required to undertake, is outlined listed in Appendix A25.1 Draft MetroLink Cultural Heritage Strategy.</p>                                                                                                                                                                         |

Should floating tracks not be possible, every care to maintain wheels and tracks must be taken to ensure there is no noise or vibrations felt and to commit TII's contractors to a proper standard of maintenance on the systems to ensure that this remains the case. | As response (5) above. The Operation and Maintenance is described in Chapter 6 and TII will employ a track maintenance manager, supervisors and technicians to ensure the ongoing performance of the system and minimise risk of issues arising. |

ML – P 304 M-N. |                                                |           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |  |
| 15                                                                                                                                                                           | 3. Construction of Glasnevin MetroLink Station | 31 and 32 | <p>Section 3.1 Traffic Management. Referring to figure 2.2 and 2.3 from EIAR Vol 5 App 5.5, Glasnevin Station Construction Report, section 2.2 Site Access/Egress.</p> <p>Route to exit the site and gain access to the M50 must be changed in the interest of all residents living in the vicinity of this construction site. It will be addressed in a later paragraph but it is stated that work on the construction of Glasnevin Station will be on a 24-hour-a-day, 7 days week rota and if this is allowed, HGVs will travel through a highly populated, residential area, all day every day.</p> <p>However, this is not a direct route from the construction site to the M50. Finglas Road (R135) is a direct route to the M50, without travelling through built-up residential areas, day and night. Finglas Road, to Finglas and directly onto the M50 is a dual carriage from Hart's Corner is approximately 8.8km.</p> | <p>The concerns you have raised are noted and TII note that the impact of vehicular routes have been assessed.</p> <p>While extended working hours on certain construction activities are set out in Table 5.5 of Chapter 5, regular HGV deliveries to Glasnevin will be restricted outside of standard hours. This is referred to in section Appendix 5.5, 8.6 Traffic Management. Out of hours deliveries at Glasnevin are anticipated, but these typically would be either: abnormal load deliveries requiring an Abnormal Load Permit issued by An Garda Síochána and DCC; or deliveries during any occasional weekend track possession works planned at Glasnevin.</p> <p>As referred to in Appendix A9.2 Overall Project Traffic &amp; Transport Assessment, TII have through pre-construction planning in advance of the Railway Order anticipated the implications of the planned works on the locality, particularly traffic and accordingly have provided mitigation strategies in the EIAR for the construction phase. The proposed traffic management mitigation measures during the construction phase are outlined in section 7.1.</p> <p>Appendix A9.5 provides the Scheme Traffic Management Plan, for which section 7.6 refers to Glasnevin. While the works will attract additional traffic to and from Glasnevin Station, the assessments of vehicle movement during the peak construction phase will add an average of approximately 50 additional daily movements each way to the existing traffic flows. The pre-construction planning and construction approvals process for Traffic Management at Glasnevin are set out below.</p> <p>Chapter 5 of the EIAR, MetroLink Construction Phase, explains that traffic management plans for the construction phase of the Project have been developed to minimise the impact on road users, not just specifically at Glasnevin but broadly along the whole of the MetroLink route, and to maintain access to businesses and other premises. The Scheme Traffic Management Plan Appendix A9.5 section 7.6 refers to the traffic assessment undertaken at Glasnevin Station with the route to the M50 provided on Figure 7-22.</p> <p>EIAR Chapter 9, Traffic and Transport, section 9.7.1.2 includes for a Scheme Traffic Management Plan (STMP) to manage traffic movements during the construction phase to ensure traffic congestion is minimised. The Plan will include measures such as the establishment of Local Community forums which will cover areas local to each station, where stakeholders will have an opportunity to inform the traffic management element of the project. Other measures include the control of construction vehicles in terms of their hours of operation and restrictions on vehicle size and weight.</p> <p>Chapter 9 notes that prior to implementation, all traffic management measures will be agreed with DCC and where relevant, consultation with An Garda Síochána and other statutory stakeholders will be undertaken. The design of traffic management measures and highways works is based on achieving the key objective of maintaining continual access to all properties during the works. Where necessary, a safe alternative route will be provided for pedestrians and vulnerable road users, such as children, and persons with restricted mobility, to maintain pedestrian access to premises. Where detour routes are required, these will be kept as short as possible and detour signage will be clear and easy to understand. All construction sites will be designed to be as unobtrusive as possible.</p> <p>As outlined in Appendix A5.1 Outline Construction Environmental Management Plan - CEMP, the appointed contactor(s) are required to implement the measures in relation to traffic and transportation during construction. Following the appointment, the contractor(s) will be required to develop an updated contract-specific CEMP which will detail all measures to be employed in relation to all potential impacts on traffic and transportation.</p> |  |

| 16                                                                                                                                                                           | 3. Construction of Glasnevin MetroLink Station | 37        | <p>Section 3.2 Construction Period. Referring to EIAR Vol 5 App 5.5 Glasnevin Station Construction Report.</p> <p>The time scale for the construction of Glasnevin Station is 102 months. 8 and a half years. During this construction period, it is imperative that residents are protected from noise, vibrations, and dust, and that all disturbances are kept to a minimum, for the safety, health, and well-being of all residents and that vermin are properly controlled.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | <p>TII concur. The EIAR presents the proposed environmental protection measures to be implemented during construction.</p> <p>One of the key aspects of environmental control during the construction phase is the requirement for the appointed contractor to prepare a detailed Construction Environmental Management Plan (CEMP) to ensure all environmental impacts are managed and mitigated in accordance with the EIAR and Railway Order. This detailed CEMP(s) will be provided to DCC for consultation and approval in advance of any construction works on site. An Outline CEMP is included in Appendix A5.1 of the EIAR that will be developed further by the appointed contractors. Monitoring instrumentation will also be used throughout the works to monitor potential environmental impacts to ensure that acceptable limits are not breached.</p> <p>The potential impacts associated with the construction phase activities of the proposed Project on the residences and businesses are addressed in Chapter 11 (Population &amp; Land Use) of the EIAR, with mitigation measures proposed where required. This includes potential noise and vibration impacts from construction activities as detailed in Chapter 13 (Airborne Noise &amp; Vibration) and Chapter 14 (Groundborne Noise &amp; Vibration), disturbances to the local road network as detailed in Chapter 9 (Traffic &amp; Transport), and dust risk as detailed in Chapter 16 (Air Quality).</p>                                                                                                                                                                                                                                                                                                                                                                                                                                  |  |
| 17                                                                                                                                                                           | 3. Construction of Glasnevin MetroLink Station | 37 and 38 | <p>Section 3.2 Construction Period. Referring to EIAR Vol 5 App 5.5 Glasnevin Station Construction Report. Section 7.5.6.3.1 Working Hours Page 33.</p> <p><i>"The construction working hours differ from the proposed standard working hours at this location due to the interface with existing Iarnród Eireann infrastructure and live railway line and will require working to be carried out on a 24-hour a-day, seven days a-week basis for some activities. This has been assessed within the EIAR."</i></p> <p>TII's proposed construction-working hours model is strongly opposed due to the high density of the population in the area. A 24-hour-a-day, the seven-days-a-week basis for any construction activities will cause great distress to the health, and well-being of our residents. Strict times must be adhered to, to allow all residents a quality of life to enhance their well-being rather than constant construction work day and night, seven days a week.</p> <p>Should TII be allowed to work on the construction of Glasnevin Station round the clock, it will have devastating consequences for all residents.</p> | <p>The Pre-Construction planning for the preliminary design as assessed under the EIAR has provided for the majority of the works to be undertaken during standard working hours. However, for some construction activities, 7 day (dayshift only), and 24 hour 7 day a week works are necessary, but are limited to: tunnelling; construction works associated with Iarnród Eireann Rail Track possessions or blockades; and final station fit out works. The proposed working hours and planned activities for Glasnevin are set out in Table 5.5 of Chapter 5. Any changes to the proposed working hours at Glasnevin would have significant impact on the duration of the works.</p> <p>While recognising that works carried out outside of standard hours might cause concern to residents, the impact on the human health around Glasnevin Station as a consequence of the proposed works have been assessed and mitigations considered fully in the EIAR. The relevant chapters of the EIAR, for example Airborne Noise &amp; Vibration Ch 13 and Air Quality Ch 16 provides information on the relevant assessments carried out and the impact mitigation proposed at this site. Chapter 10 of the EIAR sets out the human health impact assessment that predicts no residual effect on health at Glasnevin with the proposed mitigation measures implemented for noise (4m high hoarding).</p> <p>The Outline Construction Environmental Management Plan (Appendix A5.1) will also be used to manage the construction phase impacts. As part of the updated Construction Environmental Management Plan in advance of commencing construction, an Air Quality Management Plan and Noise and Vibration Management and Control Plan (NVMCP) will be produced to include for specific working hour measures at sensitive locations. Both of these documents shall be prepared and submitted DCC for approval.</p> |  |

ML – P 304 M-N. |                                                |           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| 18                                                                                                                                                                           | 3. Construction of Glasnevin MetroLink Station | 39 and 40 | <p>Section 3.3 Green Alternative. Vegetation and Tree Clearance</p> <p>"There are a significant number of trees that will require clearing to allow for the construction of the proposed Glasnevin station as indicated in Figure 4.1. Refer to Chapter 15 (Biodiversity) of this EIAR for an assessment of biodiversity impacts arising from vegetation and tree clearance."</p> <p>All trees removed from the station site must be reinstated and should be increased in number to reduce noise and pollution and light pollution from major transport hub. The MetroLink is purposed to be a green alternative to chronic road congestion, yet the absence of trees, vegetation, green roof, and scrubs is sadly noted. It is imperative that Glasnevin Station is heavily surrounded by trees, to reduce noise and pollution.</p> <p>TII must:</p> <ul style="list-style-type: none"><li>- Consider a living green roof on the station to soften its appearance. (Similar as shown at Dublin Airport - TII Diagram 14: AZ2 Location and Features - MetroLink Non-Technical Summary page 20 ) and use this green alternative at Glasnevin Station, to soften its metal and glass structure.</li><li>- Reconsider the design of the evacuation and ventilation Shaft and related buildings, from its Berlin Wall lookalike construction to a more Victorian model in keeping with our local heritage.</li><li>- Soften the appearance of the vast Shaft at Glasnevin Station with vegetation. Otherwise, it is an invitation for graffiti and littering.</li></ul> | <p>A total of 44 trees were recorded within the eastern section of the station boundary, where the Glasnevin Station is proposed. Within this location 15 trees need to be removal to facilitate the works . These are located adjacent to The Brian Boru public house. An Arboricultural Impact Assessment was carried out and can be viewed as Appendix 27.3 to the EIAR. This contains information on the existing tree conditions and the Arboricultural impact of the proposed Project. This is also assessed in Chapter 27 Landscape &amp; Visual (Section 27.6.1) and a number of mitigation measures to reduce impact are outlined. These measures include:</p> <ul style="list-style-type: none"><li>- Identification and retention of existing mature trees of good quality, through adjustment of the alignment, location of structures/buildings and the outline design of the proposed Project;</li><li>- Specific proposals to ensure the effective retention of existing mature trees can include:</li><li>- Protection and maintenance of tree root zones during construction;</li><li>- In sensitive locations, residual landscape and visual effects may be significantly reduced through the inclusion in the proposed planting of relatively mature specimen trees;</li><li>- Comprehensive proposals for hard and soft landscape works, including tree and hedgerow planting to offset the effects of net loss due to the proposed Project will be developed at detailed design phase.</li></ul> <p>The inclusion of measures to avoid, reduce and offset significant adverse landscape and visual effects forms an inherent part of the brief and design thinking of the various disciplines involved in the development of the design for the proposed Project. A major part of the landscape design for the project has therefore involved the identification and retention of valuable landscape assets where possible and feasible, across the proposed Project. This includes existing mature trees, historic pavings, railings and street furniture elements. These proposals include for example, the provision of tree and woodland planting which effectively replace trees unavoidably lost as a result of the alignment, design and construction of the proposed Project – this forms part of the embedded primary mitigation included within the landscape design. In most circumstances however, the designed planting as proposed is more appropriately scaled to the pertaining landscape context and is invariably more biodiverse than the baseline planting lost. These aspects of the proposed Project go beyond the requirements of mitigation and are in effect improvements over and above the baseline, which may often be referred to as "enhancements".</p> |

| 19                                                                                                                                                                           | 3. Construction of Glasnevin MetroLink Station | 41 to 44  | <p>Section 3.4 Cultural Heritage<br/>Figure 4.4: Plan Showing Properties to be Demolished and Site Area<br/>4.5 Archaeology<br/>"There are no archaeological or cultural heritage assets assessed as being of Very High importance located within the proposed station area (see Chapter 25 of this EIAR). However, there are a number of architectural heritage constraints. These are detailed in Chapter 26 of this EIAR (Architectural Heritage), along with associated mitigation measures."</p> <p>Although TII perceives The Brian Boru pub, mentioned in Ulysses, as of no cultural significance the residents of this area profoundly disagree. The building is to be compulsorily purchased for the erection of the new Glasnevin Station. The Brian Boru is part of our local and national history which will be lost forever if. It is suggested that the front facade of the building be incorporated into the glazed and metal building, (completely out of character with our Victorian architecture) as part of our shared history.<br/><a href="https://www.kingscross.co.uk/about-the-development">https://www.kingscross.co.uk/about-the-development</a> (an example provide of how the Brian Boru Facade could be incorporated into a redesigned station)</p> | <p>TII recognise the importance of the Brian Boru public house from a cultural perspective. The slight negative impact due to its demolition considering the proposed mitigation follows the guidance in Guidelines on the Information to be Contained in EIARs (EPA 2022), and Guidelines for the Assessment of Architectural Heritage Impacts of National Road Schemes (NRA 2005) as is best practice and outlined in Chapter 26, Section 26.3.7. (ALG: suggest clarifying here that the reference to "slight negative impact" is a classification in the EIAR using EIA guidelines rather than TII's subjective opinion of the loss of the Brian Boru) and also in Chapter 25 Archaeology and Cultural Heritage, Section 25.3.7.</p> <p>As part of the proposed mitigation measures detailed in Chapter 26 (Architectural Heritage), the licensed premises are to be recorded by means of photography and written description to English Heritage level 3 prior to demolition. Level 3 is an analytical record and will comprise an introductory description followed by a systemic account of the building's origins, development and use. The record will include an account of the evidence on which the analysis has been based, allowing the validity of the record to be re-examined in detail. It will also include all drawn and photographic records that may be required to illustrate the building's appearance and structure to support an historical analysis.</p> <p>From a construction perspective the retention of the Brian Boru would be problematic. Physically the station structures cut right through the building with deep diaphragm walling and secant piling through this location. Once demolished this area is the entrance and exit to and from the site. This arrangement precludes retention of the Brian Boru facade. This entrance will have to be relocated a number of times to facilitate phased working on the site. Further constraints could make this unworkable. The proposed construction site is already very constrained and in order to carry out the works, multiple phasing of activities will be required. Minimal site office and welfare complexes can be located within the site area and offsite facilities will need to be procured to allow the works. Any further reduction in available area will impact on the constructability of this station. This has been considered in a number of areas throughout the EIAR such as Chapter 5 MetroLink Construction Phase, Chapter 7 Consideration of Alternatives, Chapter 11 Population &amp; Land Use, Chapter 21 Land-Take, Chapter 25 Archaeology and Cultural Heritage, Chapter 26 Architectural Heritage and Chapter 27 Landscape</p> |
| 20                                                                                                                                                                           | 3. Construction of Glasnevin MetroLink Station | 43 and 44 | <p>Section 3.5 Safety Measure at Glasnevin Station<br/>When constructed, Glasnevin Station will incorporate three railways, under one roof that must be managed to ensure the safety and the well-being of all residents living in the area and passengers travelling on these lines daily.</p> <p>TII must set out its security plans and respond to the following questions:<br/>1. Will the station be gated or not?<br/>2. Will security staff be present on a 24-hour monitoring basis?<br/>3. How will anti-social behaviour and other safety concerns of residents in the vicinity be dealt with?<br/>4. Will CCTV monitors be in-situ?<br/>5. What are the opening and closing times of the Glasnevin Station?</p> <p>It is requested that TII should:<br/>- Put a cleaning contract in place to ensure the station and surrounding areas are free from litter and graffiti.<br/>- Look to European Metros to set out acceptable standards for the above issues.</p>                                                                                                                                                                                                                                                                                                      | <p>Safety and security is a priority for MetroLink. TII will enable safe secure, accessible and inclusive travel though the provision of transport networks, systems and services that are resilient to future change.</p> <p>Chapter 4 Description of the proposed Project and Chapter 6 Operations and Maintenance outlines how MetroLink has been designed as an open system for passengers, so that people can walk through the station and onto the platforms without obstruction. The PSDs (Platform Screen Doors) will stop people accessing the track from the stations. Station doors / gates will be closed when the station is not operational. One of the outcomes of the architectural and urban realm design is to discourage anti-social behaviour, for example through the attractive setting, use of public lighting, open sight-lines, and avoidance of areas where individuals and groups of people can hide. Vandalism and anti-social behaviour on the trains and within the stations will be observed through CCTV (Closed Circuit Television) and if required staff sent to manage the situation. The stations are not staffed 24 hours per day but the system is.</p> <p>Demand will vary through the day and week, with different service levels provided to meet varying demand. It is anticipated that services will operate between 05:30 and 00:30.</p> <p>TII will ensure stations are maintained throughout the operational phase with appropriate cleaning contracts in place. A detailed maintenance plan will be developed for the whole project by the operator, in accordance with the regulations and good industry practice, to encompass all the railway assets including the rolling stock, track, tunnel sections, stations, landscaping and boundaries.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

Construction of Glasnevin MetroLink Station | 44 and 45 | Section 3.6 Community Space within Glasnevin Station.<br>Glasnevin Station will take a minimum of 102 months to construct causing a huge negative impact on our community.<br>The Brian Boru public house is to be compulsorily purchased and demolished to make way for Glasnevin Station.<br>When the Station is complete it is, therefore, requested that TII make a community area available, within the station for residents, where they can enjoy social gatherings and a shared sense of community.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | As outlined in response 19 above, this area will be used as an access and egress into the station and as such a community space to replace the Brian Buru public house does not form part of the MetroLink Railway Order Application.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| 22                                                                                                                                                                           | 3. Construction of Glasnevin MetroLink Station | 45 and 46 | Summary:<br>The Planning officer is asked to ensure the following is observed by TII in the construction and operation of MetroLink's Glasnevin Station.<br>1. No other area will be as impacted as Glasnevin (Hart's Corner), Dalcassian Downs, Prospect ACA, and the immediate surroundings during the construction of Glasnevin Station and tunnelling underneath our ACA.<br>2. Because of the major upheaval to accommodate number 1, certain regulations must be in place to make life bearable for residents.<br>3. There will be no 24-hour-a-day work schedule at Glasnevin Station.<br>4. That the route to the M50 be changed so HGVs will not travel through residential areas but rather on a duel carriage way to reach the M50.<br>5. That during the construction period of 102 months minimum, every care is taken to reduce noise, dust and disruption to residents living in this highly populated area.<br>6. That Glasnevin Station and the Shaft, have all trees replaced and increased to reduce noise and pollution. That the Glasnevin Station roof be green, similar to Dublin Airport's Metro roof.<br>7. That the demolished Brian Boru's facade is incorporated into the ultra-modern glass and metal Station to preserve our shared history.<br>8. Glasnevin Station is the largest station on the purposed MetroLink. This station will bring three railways into one and will see thousands of passengers pass through each week. TII must ensure that all measures are taken to safeguard residents and passengers against anti-social behaviour and other problems a major railway station can attract.<br>9. A gated station is preferable with security staff employed on a 24-hour a-day, seven-days-a-week rota.<br>10. That cleaning of the station and any possible graffiti is removed immediately.<br>11. That once the station is complete, a community area is made available for residents who have lost their local public house and community accommodation, which Brian Boru catered to for many decades. | These summary issues are covered in detailed responses (1) to (21) above.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

Under the Transport (Railway Infrastructure) Act 2001 (as amended) (the 'Act') upon commencement of the Railway Order (RO), TII will be authorised to acquire compulsorily any land or rights in, under or over land or any substratum of land specified in the RO, and, for that purpose, the RO shall have effect as if it were a compulsory purchase order (as referred to in Section 10(1) of the Local Government (No.2) Act 1960 (as inserted by Section 86 of the Housing Act, 1966) which has been duly made and confirmed) with modifications. Accordingly, TII is authorised to serve a notice to treat pursuant to the provisions of the Housing Act, 1966, including Section 79 thereof. TII also has the right to enter onto other lands for the purposes of carrying out the works permitted under the RO in certain circumstances. The acquisition of the various specified rights and interests in land and property, is necessary in order to ensure the delivery of the MetroLink project in its entirety.<br><br>Further information can be obtained from the MetroLink Compulsory Purchase Order Guideline document (September 2022) which can be found on-line at: <a href="https://www.metrolink.ie/media/0jlpbyso/metrolink_cpoguideline_final_september-2022.pdf">https://www.metrolink.ie/media/0jlpbyso/metrolink_cpoguideline_final_september-2022.pdf</a> |

ML – P 304 M-N. |                                                |           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| 24                                                                                                                                                                           | Section 4. Substratum Land Take and its Impact | 48 and 49 | <p>Section 4.1 Information on Land take.<br/>Chapter 21 - EIAR Pages 50-52<br/>"Land take impacts will include the permanent and temporary acquisition of legal interest(s) in the property. All permanent and temporary land take required for the proposed Project is shown on the property drawings that accompany the RO application and on Figure 21.1. "</p> <p>On the map provided to me by TII, my property ID no. ML B5 - 002 - B120, shows the Substratum Land Take of the soil underneath my property, measuring approximately 15 meters. TII did not provide me with answers to questions emailed during this time, as to the exact depth, width, and reason why this land is required and for what purpose.</p> <p>Although TII furnished me with a simple map of the 15-meter Zone of settlement, directly underneath my property, no detailed maps have been given. The engineers assisting affected stakeholders RINA and other parties working alongside this development have been furnished with detailed maps showing possible risks to properties, soil settlement, and other impacts on property owners, while the owners themselves have received only a brief outline of the Land take and the briefs possible risk.</p> <p>TII must adhere to the legal restraints of acquiring land if they wish to acquire the privately owned Substratum land underneath my property.</p> <p>Once exact measurements are given, of the proposed land take acquisition, and detailed reasons for its use, TII must therefore offer compensation, to acquire the said Substratum land, underneath my property.</p> | <p>The substratum land take has been generated by creating a limit of deviation (LOD) ranging from 5 metres vertically upwards and 10 metres downwards to 15 metres laterally for the tunnel alignment. Substratum land take is shown on the Property Drawings submitted with the RO application and on Figure 21.1. of the EIAR Chapter 21 (Land Take). Rule 17 introduced by Section 48 of the Planning and Development (Strategic Infrastructure) Act 2006, states: 'The value of any land lying 10 metres or more below the surface of that land shall be taken to be nil, unless it is shown to be of a greater value by the claimant'.</p> <p>For MetroLink project, the depth of tunnel will vary along the route but it is expected that the average depth will be approximately 24m from ground level to track level. In the vast majority of cases the subsoil can be acquired without affecting the above ground property.</p> <p>The details requested for 48 Prospect Avenue property are shown on the individualised property details plan (please refer to Plan drawing no. ML1-JAI-BOR-ROUT_XX-DR-Y-03148, ML4M-U66):</p> <ul style="list-style-type: none"><li>•Ground level to crown of tunnel (m) - 17.2</li><li>•Ground level to track (m) - 23.9</li></ul> <p>The design includes for a limit of deviation which is required to allow for unforeseen obstructions and construction tolerances which may necessitate a change to the alignment. In the highly unlikely event that this were to occur, any resulting environmental impacts will comply with the limits set by the enforceable Railway Order.</p> <p>TII has carried out a comprehensive set of ground investigations in accordance with relevant guidelines and best practice. It has a high confidence that MetroLink can be constructed along the proposed alignment without requiring vertical or horizontal adjustment. However, in order to guard against rare and undetectable subterranean conditions that might interfere with construction, the Railway Order provides for limits of deviation (as have other railway authorisation since at least the 1840s). The impacts of potential changes within the Limits of Deviation are considered in the Wider Effects Report (Appendix A5.19).</p> <p>TII will offer compensation to property owners for land that is deemed to be acquired land in accordance with the general compulsory purchase code. Appropriate compensation will also be payable to owners of properties that are subject to short-term and or temporary acquisition.</p> <p>Compensation will be provided through the Compulsory Purchase Order (CPO) process. Details are set out in the LAS (Land Acquisition Strategy) regarding the arrangements proposed for the provision of information and assistance to owners and occupiers of land required for the construction and/or operation of the MetroLink project whether or not the occupier has any interest in the land which may be subject to a compulsorily acquisition.</p> |

| 25                                                                                                                                                                           | Section 4. Substratum Land Take and its Impact | 49 and 50 | <p>Section 4.2 EIAR Minimum information of Substratum Land take.<br/>From Chapter 21 EIAR - Land Take pages 50-52</p> <p>2. Land take:<br/>"Where it is required to make assumptions as the basis of the assessment presented here, these assumptions are based on advice from competent project designers and are clearly outlined within this Chapter.</p> <p>Land take impacts will include the permanent and temporary acquisition of legal interest(s) in the property. A permanent and temporary land take required for the proposed Project is shown on the property drawings that accompany the RO application and in Figure 21.1.</p> <p>This Chapter describes the baseline conditions associated with land take, examines the predicted impacts associated with both the construction and operation of the proposed Project and where impacts cannot be avoided, proposes mitigation measures, and identifies residual impacts following the implementation of mitigation measures."</p> <p>Although TII states in the above Chapter, that Land takes 'are clearly outlined within this Chapter', this is not the case.</p> <ul style="list-style-type: none"><li>- The charts outline the land take and possible damage to our properties starting at Whitehall and skip over all privately owned properties to Dalcassian Downs.</li><li>- There is no information regarding privately owned properties and the impact MetroLink will have.</li><li>- Although the request for information was sought from TII, none was forthcoming before the date for Submissions closed.</li></ul>                                                                                                                                                           | <p>Chapter 21 refers to Land take impacts that include the permanent and temporary acquisition of legal interest(s) in property and Section 21.3.5 refers to the Appraisal Method for the Assessment of impacts to properties. In the case of your property at 48 Prospect Ave, and whilst acknowledging its location within an Architectural Conservation Area that will require action by TII referred to elsewhere in this response, the Criteria for Baseline Categorisation assessed the property amongst others impacted by Substratum acquisition as "very low".</p> <p>All permanent and temporary land take required for the proposed Project is shown on the property drawings that accompany the RO application, and for 48 Prospect Ave this is referred to as property reference ML-4M-U66, on Plan No. ML-P 304 M-N.</p> <p>Please note that your individualised Property Pack was issued to you by letter ref CAP_ML_0107_05 by letter dated 20th Sept 2022.</p> |
| 26                                                                                                                                                                           | Section 4. Substratum Land Take and its Impact | 51 and 52 | <p>Section 4.3. Substratum Land Take - Valued at Nil<br/>21.5.2.4 Substratum Land Take<br/>The substratum land take has been generated by creating a limit of deviation (LOD) ranging from 5 metres vertically upwards and 10 metres downwards to 15 metres laterally for the tunnel alignment. The total area of substratum land take is 325,388m2. Substratum land take is shown on the Property Drawings submitted with the RO application and on Figure 21.1.</p> <p>The baseline rating for substratum land take has been considered to be 'Very Low'. Rule 17 introduced by Section 48 of the Planning and Development (Strategic Infrastructure) Act 2006, states; 'The value of any land lying 10 metres or more below the surface of that land shall be taken to be nil, unless it is shown to be of a greater value by the claimant'.</p> <p>Excavation for the tunnels and other below ground structures could potentially lead to ground movements at the surface and below ground. An assessment of the effects of ground movements and potential impacts on existing buildings has been carried out as part of the Scheme Design. This assessment is detailed in Appendix A5.17 of the EIAR (Building Damage Report) and summarised in Section 5.4.11 of Chapter 5 (MetroLink Construction Phase).</p> <p>Although TII has not informed me of the proposed LOD and valued the land 'lying 10 metres or more below the surface of that land shall be taken to be nil, unless it is shown to be of a greater value by the claimant'. The value of the land underneath my property may be valued as 'nil' by the TII however, I am the owner of the land and as such must be consulted and compensated should the land be granted acquisition.</p> | <p>Please refer to responses (1, 24 and 25) above.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| 27                                                                                                                                                                           | Section 4. Substratum Land Take and its Impact | 52        | <p>Section 4.3. Substratum Land Take - Valued at Nil<br/>21.7 Residual Impacts<br/><i>The most significant land take impacts are those associated with permanent acquisition. Although the compensation scheme for compulsory purchase will financially recompense landowners, it is recognised that the residual impact will remain profound for many owners, particularly of residential properties.</i><br/>Chapter 21 Volume 3 - Book 3. This statement must be taken into consideration during the compensation process.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | <p>Please refer to responses (1, 24) above.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

| 28                                                                                                                                                                           | Section 4. Substratum Land Take and its Impact | 52 and 53 | <p>Section 4.4. Land take CPO &amp; Compensation.</p> <p>NA29N. 314724. Page 64. of Chapter 21 - EIAR.</p> <p>TII will offer compensation to property owners for land that is deemed to be acquired land in accordance with the general compulsory purchase code. Appropriate compensation will also be payable to owners of properties that are subject to short-term and/or temporary acquisition. Compensation will be provided through the Compulsory Purchase Order (CPO) process. In exercising compulsory purchase powers, TII will need to have demonstrated to An Bord Pleanála that the extent of the compulsory acquisition is proportionate to the public interest in the scheme, that the properties in question are suitable and necessary for delivering the project, and that alternatives to the acquisition of the properties in question have been considered in accordance with the compulsory purchase code.</p> <p>Volume 3 - Book 3: Material Assets, Waste and Materials Management, Cultural Heritage, Landscape and Risk Chapter 21: Land Take.</p> <p>...reasonable steps should be taken to acquire all rights and interests in land included in the Railway Order in a fair and equitable manner. CPO powers are based on legislation enacted by the Oireachtas, such as the Housing Act 1966, and the Planning and Development Act 2000, the Planning and Development (Strategic Infrastructure) Act 2016 and legislation that predates the foundation of the state including the Land Clauses Consolidation Act 1845, 1919 Act Acquisition of Land (Assessment of Compensation). Further information can be obtained from the MetroLink Compulsory Purchase Order Guideline document (September 2020) which can be found on-line at: <a href="https://www.metrolink.ie/assets/downloads/MetroLink_CPO_Guideline_Doc_FinApp_310820.pdf">https://www.metrolink.ie/assets/downloads/MetroLink CPO Guideline Doc FinApp 310820.pdf</a></p> <p>The above, as with several other links, do not open and if they do, have no information.</p> | <p>The correct link is provided within on the MetroLink.ie site under "your property" drop down menu in the document Compulsory Purchase Order (CPO) Guidelines</p> <p>September 2022 <a href="https://www.metrolink.ie/media/0jlpbyso/metrolink_cpoguideline_final_september-2022.pdf">https://www.metrolink.ie/media/0jlpbyso/metrolink_cpoguideline_final_september-2022.pdf</a></p>                                                                                                                                                                                                                                                                                                                                                                                                                               |  |
| 29                                                                                                                                                                           | Section 4. Substratum Land Take and its Impact | 54        | <p>4.5 An Bord Pleanála Acquisition of Land.</p> <p>In regards to the proposed acquisition of the land underneath my property, An Bord Pleanála states:</p> <p>NA29N. 314724</p> <p>Compulsory acquisition of land cases under various enactments for developments which are classified as strategic infrastructure development. Any separate compulsory acquisition cases which are for the purpose of facilitating a proposed development which is a strategic infrastructure development are also classified as strategic infrastructure development (see compulsory acquisition cases above). Note that any proposals for compulsory acquisition of land for the purposes of a proposed road scheme (as defined in section 47 of the Roads Act 1993) or railway works the subject of a railway order are incorporated in the relevant road scheme approval application or the relevant railway order application.</p> <p>Claims for Costs</p> <p>The Board has the power to award a contribution towards reasonable costs incurred by any person appearing at an oral hearing, relating to compulsory acquisition of land cases by the local authority involved. The award of costs will depend on the outcome of the particular case and will generally only be paid to those who are directly affected by the compulsory acquisition of the land in question. The Board has the power to decide what costs are reasonable and can decide to award all, some or none of the costs requested by the participant.</p> <p>Before the Railway Order is permitted to run MetroLink underneath my property, full compensation must be agreed between both parties.</p>                                                                                                                                                                                                                                                                                                                                                                                                 | <p>Please refer to responses (1, 24 and 25) above.</p> <p>A Land Acquisition Strategy (LAS) has been prepared by TII. The strategy sets out the approach that MetroLink will take in order to acquire property from a freeholder/leaseholder or qualifying tenants/occupiers, together with all other land-based interests and rights for the purpose of delivering the proposed Project.</p> <p>It provides the affected parties with a clear understanding of the general approach to be adopted on compensation and sets out practical guidance together with the support that MetroLink can provide. The strategy provides information on the acquisition process for residential and commercial property owners and establishes the arrangements for communication and engagement with all affected parties.</p> |  |

| 30                                                                                                                                                                           | Section 4. Substratum Land Take and its Impact | 55        | <p>4.6 Land Acquisition Strategy.</p> <p>21.6.1.3 Land Acquisition Strategy</p> <p>A Land Acquisition Strategy (LAS) has been prepared by TII The strategy sets out the approach that MetroLink will take in order to acquire property from a freeholder/leaseholder or qualifying tenants/occupiers, together with all other land-based interests and rights for the purpose of delivering the proposed Project.</p> <p>It provides the affected parties with a dear understanding of the general approach to be adopted on compensation and sets out practical guidance together with the support that MetroLink can provide.</p> <p>The strategy provides information on the acquisition process for residential and commercial property owners and establishes the arrangements for communication and engagement with all affected parties.</p> <p>There has been no communication from TII regarding the 'acquisition process' or any 'engagement with all affected parties'.</p>                                                                                                                                                        | <p>Please note that your individualised Property Pack was issued to you by letter ref CAP_ML_0107_05 by letter dated 20th Sept 2022.</p> <p>Please refer to responses (1, 24 and 25) above.</p>                                                                                                                                                                                                                                                                        |
| 31                                                                                                                                                                           | Summary of Section 4                           | 55 and 56 | <p>- As the owner of a freehold property, by law, I own the soil beneath my property to the centre of the earth, and above my property to the sky.</p> <p>- The Planning officer is asked to observe An Bord Pleanála's own directions regarding the compulsory acquisition of land and to compensate me for any land take by TII.</p> <p>- That TII make available information outlining compensation. The link provided by TII contains no information.</p> <p><a href="https://www.metrolink.ie/assets/downloads/MetroLink_CPO_Guideline_Doc_FinApp_310820.pdf">https://www.metrolink.ie/assets/downloads/MetroLink CPO Guideline Doc FinApp 310820.pdf</a></p> <p>- That TII communicate fully with me regarding their purposed substratum land take, responding to all my questions emailed, which they never answered. These questions regard under whose Authority or Act they can CPO the land underneath my property. Also, the depth, width, and reasons for their land take.</p>                                                                                                                                                   | <p>Please refer to responses (1, 3 24) above.</p> <p>Please note <a href="https://metrolink_cpoguideline_final_september-2022.pdf">https://metrolink_cpoguideline_final_september-2022.pdf</a></p> <p>Where TII have to undertake permanent underground works to either construct the main tunnel, connection tunnels or their structures, the area of subsoil surrounding these works will need to be compulsorily acquired as referenced in Chapter 21 Land Take</p> |
| 32                                                                                                                                                                           | Section 5. Conclusion                          | 56 and 57 | <p>As the owner of the above property, inherited from my parents and grandparents before them, I ask that An Bord Pleanála put strict guidelines in place to protect my Architectural Conservation Area (ACA) property.</p> <p>Although I am not against MetroLink and welcome a green alternative to traffic congestion, I do object to MetroLink tunnelling and operating beneath my property and the properties within the ACA.</p> <p>It is imperative that all due care is given to property owners and that the POPS guarantee scheme is increased from 1 to 10 years, minimum.</p> <p>That the design of the Glasnevin Station incorporates the Brian Boru pub and that the Shaft is redesigned or softened with vegetation.</p> <p>That compensation is paid for land take and explanations given for its use.</p> <p>The Planning Officer take note that up to a week before the Observation cut off time of 25.11.22 - TII was still uploading information to its site regarding the construction and operation of MetroLink, which is grossly unfair to stakeholders who were given a mere 6 weeks to make their Observations.</p> | <p>Refer to responses above.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                       |

| Submission No.                                                                                                                          |              |          | 014                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |  |

| Ashley Ave Residents Group Appeal to "Railway (MetroLink - Estuary to Charlemont via Dublin Airport) Order, 2022 Case No. NA29N.3414724 |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |  |
| 1                                                                                                                                       | Introduction | 3        | <p>We would like at the outset for it to be noted that we clearly state as a group, we are fully supportive of the concerns, issues, and alternatives being submitted by Estuary Court and Seatown Villas given that for the most part, the matters raised as of concern are almost identical. In these areas, the Metro project proposes to do away with the current format of open spaces, not to mention the significant disruption that the project will have.</p> <p>For example, the whole question of why the proposed route is now being planned right through our estates is well raised and expanded upon within the Estuary Court submission. We fully support all submissions in every regard. As we will repeat within this document, we simply cannot understand how one can suggest to radically alter our estate in so far as safety, security and the general look and feel of it after almost 40 years not to mention the lengthy disruption that will be caused by construction.</p> | <p>Thank you for your submission and for sharing your concerns and alternative suggestions related to the Metrolink Project. We have reviewed the submission and provided responses below.</p> <p>The Preferred Route alignment runs along the eastern side of the R132 Swords Bypass and following feedback from the consultation in 2019 has been developed with more cut &amp; cover sections than were proposed in the original Preferred Route alignment outline design. The Preferred Route was chosen as it would result in significantly reduced landscape and visual impacts when compared to the options considered in the development of the Preferred Route. Any landscape and visual impacts from the Preferred Route can be mitigated through the implementation of a high-quality design with appropriate landscaping. Refer to Chapter 4 of the EIAR for details of the architectural and landscape design.</p> <p>For further detail on the process of the Preferred Route please see Chapter 7.7.9.2 of the EIAR for details of the Route Alignment along R132 Swords Bypass, with further detail available on MetroLink Website: <a href="https://www.metrolink.ie/media/vlip2lpw/metrolink_pr_design_development.pdf">https://www.metrolink.ie/media/vlip2lpw/metrolink_pr_design_development.pdf</a>. and Appendix E.</p> <p>Throughout the Swords area the landscaping proposals outlined in the EIAR and Railway Order (Chapter 27 Landscape and landscape drawings, sheet 6 of 13 from Railway Order Plans\Drawings) have been developed in consultation with Fingal County Council. The proposal aims to improve community connectivity through the development of the linear park linking all of the stations with the community in an open setting.</p> <p>In relation to safety and security concerns, the planned outcome of the Metrolink architectural and urban realm design is to discourage anti-social behaviour, through the attractive setting, use of public lighting, open sightlines, and avoidance of areas where individuals and groups of people can hide. Across the proposed MetroLink, safety and security is addressed by EIAR Chapter 6, MetroLink Operations and Maintenance. Section 6.6.5.8 specifically addresses managing the risk of ""Vandalism or Anti-Social Behaviour on the Trains or within the Stations""", and the wider chapter also addresses the broader design proposals for managing security challenges, including:</p> <ul style="list-style-type: none"><li>•The architectural and urban realm design is designed to discourage anti-social behaviour, for example through the attractive setting, use of public lighting, open sightlines, and avoidance of areas where individuals and groups of people can hide.</li><li>•The Operational Control Centre (OCC) will be the central communications and operational hub, located in the administrative building at the Dardistown Depot. The role of the OCC will include monitoring and managing passenger safety and security and antisocial behaviour. The OCC will direct and deploy staff to manage incidents when required.</li><li>•The access control and intrusion detection (ACID) system will identify intruders trying to enter locations where unauthorised access is prohibited.</li><li>•CCTV will be installed throughout the MetroLink system including at station entrances, public realm and on trains to provide general security and surveillance of all the public areas, and to inform, if required, the directing and sending of staff to manage the situation.</li><li>•There will be a MetroLink staff presence along the route for assisting passengers, security and deterring anti-social behaviour.</li></ul> |  |
| 2                                                                                                                                       | Introduction | 3        | <p>It is our hope and belief that the objections will be looked at, as a whole, and consequently we see little merit in repeating the many valid points being raised elsewhere. However, we do call upon you to consider Ashley in their own right, and as a group being fully supportive of the other submissions. One can clearly see the similar reasons for concern, and all are fully resolvable by either re-routing the track, or by returning the estates to their "as is" position. Indeed, this point of taking over the estates has been the most significant cause of concern for many, if not all residents.</p>                                                                                                                                                                                                                                                                                                                                                                           | <p>See response number (1) above</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |  |

| Ashley Ave Residents Group Appeal to "Railway (MetroLink - Estuary to Charlemont via Dublin Airport) Order, 2022 Case No. NA29N.3414724 |                                  |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                                                                                                                                                                                                                                                                                                                      |
| 4                                                                                                                                       | Introduction                     | 4        | We fully understand, and are within reason, ready to accept, that the construction phase of the project will impact significantly on our estate and the residents therein. However, for the good of the community in general, in Dublin and Fingal, we see the merit of the Metro plan, however we do have concerns about some of the proposed impacts on our estate, which we discuss in this submission                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | TII greatly appreciate that the Ashley residents see the merit of the MetroLink project and their understanding that there will inevitably be some impact during the construction phase. TII will continue to engage with the residents as the process continues to try to find acceptable outcomes for all parties. |
| 5                                                                                                                                       | Existing Condition of our estate | 5        | <p>The Ashley Estate has been in existence now for more than forty years, and in its current format, has provided a secure haven for all children to allow for play and recreation while remaining easily observable from the respective houses. Such a facility, is we would consider, of more importance these days, where even government agencies would encourage open air play and exercise as a vital element of the growth and development of young children rather than having them sitting inside in front of computers or TV's.</p> <p>As it exists today, the walkway provides for safe passage without any fear of young children accidentally gaining access to vehicular traffic along this section of the R132, as they walk their children to and from the local school (St. Colmcille's)</p>                                                                                           | See response number (1) above                                                                                                                                                                                                                                                                                        |
| 6                                                                                                                                       | Existing Condition of our estate | 6        | <p>Furthermore, as a group of residents we are extremely proud of our estate, and as can be evidenced by Fingal County Council (FCC), we have over the years actively contributed towards the tidy annual upkeep of our green with matters such as verge cutting, planting of flowers, clearing out under the footbridge over the R132 and the like. Such activities have been supported by FCC by the supply of waste bags and the removal of waste matter following such activities.</p> <p>The impact of the proposal has already had negative impact on the estate in that we do not now get the number of volunteers we routinely had coming out for the annual clean up. We would love to be able to show that the powers that be have listened to the call of all residents and safeguarded our estate into the future. This will reinvigorate the estate and the pride we feel in the area.</p> | TII have engaged with the Ashley residents on a number of occasions and will continue to do so. Your concerns are understood and appreciated and whilst it may not be possible to grant all requests in the context of the project, TII will endeavour to find compromise solutions wherever possible.               |
| 7                                                                                                                                       | Proposed plans for the estate    | 7        | <p>While there have been various iterations of the drawings we have seen for the estate, the latest ones as included in the railway order application, clearly show that despite all our discussions regarding the Metro line, our estate is being radically altered and will lose its overall look and feel and much of the existing amenity and sense of security associated with the green space, should the plan go ahead without alteration.</p> <ul style="list-style-type: none"><li>• A significant number of additional walkways are planned throughout the green area (an increase from 3 to 9 walkways) which will substantially reduce the actual useable green area.</li><li>• The volume and placement of new trees and shrubs severely impacts upon the useful play area of the estate (e.g., no adequate space for children to play football or other games).</li></ul>                 | See response number (1) above                                                                                                                                                                                                                                                                                        |

| Ashley Ave Residents Group Appeal to "Railway (MetroLink - Estuary to Charlemont via Dublin Airport) Order, 2022 Case No. NA29N.3414724 |                                          |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |  |
| 8                                                                                                                                       | Continuation from page 7, Par 2 Concerns | 8        | <ul style="list-style-type: none"><li>• The indicated number of breaks in the wall as it is to be positioned along the R1 32 has increased from the current 2, to a total of 9.</li><li>• The positioning of said wall would seem to encroach within the current boundaries of our estate further impacting on the amenity we have enjoyed and nourished for 40 plus years.</li><li>• There are also some concerns as to the type of wall that is planned to replace the existing wall and clarification on this needs to be made. We have seen differing report to suggest a low wall with railing on top to a solid wall as is the current position.</li><li>• The loss of the current footbridge over the R132 and its replacement with a new Toucan crossing which will lack the safety for the very young and the old and infirm.</li><li>• While we recognise that the R132 is to be ‘de-trafficked’ and narrowed we are also very worried that younger children especially, may be easily able to run out into the roadway, perhaps chasing a ball that might have flown through one of the many new entrances in the wall, and onto what will still be a major road. The footbridges and the completed wall provide a good level of safety for our most vulnerable residents in respect of this road</li></ul> | <p>It was originally proposed to provide Fence Type H (Residential Wall and Railing), but if agreeable to the residents TII propose to change this to a like for like replacement of the existing wall (block/rendered) through the reinstated landscaped area at Ashley Ave. Further detail can be found in the: Railway Order Plans\Drawings - Landscaping Details Fingal County Council and Dublin City Council (Sheet 6 of 13).</p> <p>The number of walkways, including the required breaks in the wall form part of the proposed Project and has been designed to take into account the R132 Connectivity Project promoted by Fingal County Council. The R132 Connectivity Project received approval by An Bord Pleanála on 20 January 2022 (planning application reference number JP06F.310145). The R132 Connectivity Project aims to improve the connectivity and safety of pedestrians and cyclists moving along, and across, the R132 and enhance facilities for all road users with particular benefits for those choosing sustainable modes of transportation such as bus users, cyclists, and pedestrians.</p> <p>As noted in Section 4.13.2, four existing footbridges over the R132 Swords Bypass will be demolished as part of the MetroLink project. These bridges will not be replaced as connectivity across the R132 road corridor is proposed to be established with the signal-controlled crossing points as part of the consented R132 Connectivity Project works.</p> <p>Noting that the adjacent R132 is "de-trafficked" and narrowed, the speed limit along the urbanised road will also be reduced appropriately in accordance with the proposed FCC R132 Connectivity Project, improving safety for all road users particularly pedestrians and cyclists.</p> |  |
| 9                                                                                                                                       | Alternatives                             | 10       | <p>We would consider little modification is required to the plans as they currently exist and indeed that our requirements will not incur any cost but rather make some additional savings for the project. The simplest solution is of course to re-route the line so that it does not pass within our estate. However, assuming that this is not possible for whatever reasons may be given.</p> <ul style="list-style-type: none"><li>• Wall and Type - Bearing in mind the type of wall. Reinstatement the boundary wall between Ashley Green and the R132 to as near the R132 as it currently exists. The green has provided a safe and secure open space for all.</li><li>• Green area - Reinstatement the green to retain the aspect that it currently has, in order to retain this highly cherished amenity value. There is no need or desire for all the planned footpaths.</li><li>• Tree planting - Replant mature trees along both sides of the reinstated boundary wall to provide sound deadening of traffic on the R132, and the visual aspect that we currently enjoy and have done for decades. Indeed, the Metro project already acknowledges that the noise endured by the residents from traffic along the R132 is loud enough even with the mature trees along the boundary.</li></ul>            | Addressed in responses number (1) and (8) above.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |  |
| 10                                                                                                                                      | Alternatives                             | 10       | <p>Cont.,,,</p> <ul style="list-style-type: none"><li>• Opening in boundary wail - Replicate the current 2 openings in said wall with one at the proposed toucan crossing along the R132, thereby retaining safe access to and from the Swords side of Chapel Lane, and one at the exit to the R132 to allow for foot traffic to access the crossing at the new junction replacing the Malahide roundabout.</li><li>• Footbridge across the R132 - While realising that there may be some engineering implications relative to the Metro line itself, we can concede that its retention on this specific basis may not be possible. However, we would suggest that the footbridge be retained as it provides a much safer access route across the R132 rather than a Toucan crossing. We say this based on consideration for the most vulnerable members of our community and indeed to retain such safety benefits for the whole community of swords that use this bridge daily.</li></ul>                                                                                                                                                                                                                                                                                                                            | Addressed in response number (8).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |  |

| Submission No.                                                                                                                          |                                                                           |          | 014                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

| Ashley Ave Residents Group Appeal to "Railway (MetroLink - Estuary to Charlemont via Dublin Airport) Order, 2022 Case No. NA29N.3414724 |                                                                           |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| 11                                                                                                                                      | Structural aspects and constructional aspects on residents and properties | 11       | <p>We would also have many concerns in respect of the proposed 'Property Owners Protection Scheme' ("POPS"), however at this time we do not have sufficient information to provide a solid and reasoned basis to form a detailed expression of appeal. However, many residents do have serious concerns in respect of the actual properties which will be included under this scheme and the duration to applied for any possible consequences and time scales that will be applied under said scheme.</p> <p>Consequently, we would wish to be assured that all measures be fully explored and explained in layman's terms in order that each resident may be fully aware of the implications for their own property and all preventative and or remedial actions that may be taken or are available.</p> | <p>The Property Owner Protection Scheme (POPS), committed to by TII, allows residential property owners to register with TII if their residential property is within thirty (30) metres of the edge of the MetroLink alignment or fifty (50) metres of station structures. The POPS comprises condition surveys of residential properties along the route of the proposed Project. The purpose of the condition surveys is to ascertain the condition of the properties before, during (if deemed necessary), and after the completion of the proposed Project to determine whether there has been any deterioration of any of the properties surveyed and whether same may be attributable to the proposed Project, and subsequently to recommend repairs as appropriate. Condition survey data gathered pre and post construction, and possibly during construction, will be used to assist the property owner and TII in swift and accurate verification of any property damage claims which may be received from property owners. The POPS is designed to cater for / address repair work which may be necessary for any damage (attributable to the proposed Project) to a qualifying residential property up to a threshold of €45,000. The POPS will be introduced by TII through public consultation and will be formally advised to eligible property owners by the Public Relations Department.</p> <p>Further information on POPS is available in Chapter 11 (Population &amp; Land Use). Useful information can also be found in the MetroLink Frequently Asked Questions document which can be found online at: <a href="https://www.metrolink.ie/en/your-property/property-owners-protection-scheme/">https://www.metrolink.ie/en/your-property/property-owners-protection-scheme/</a> , and this is where useful updates will be made available as the proposed Project progresses.</p> <p>The proposal does not require acquisition of properties belonging to Ashley estate residents.</p> |
| 12                                                                                                                                      | Structural aspects and constructional aspects on residents and properties | 11       | <p>We have also been advised that preventative / remedial measures in respect of the impact to the Estate for the duration of the construction phase are in place. Once again, we find that the details of such issues are a little vague and again do not allow for a reasoned and detailed appeal currently.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | <p>The appointed construction contractor and Metrolink operator is required to to prepare and implement a Construction Environmental Management Plan (CEMP) that includes a Health and Safety Plan to protect workers, control environmental pollution, and protect members of local communities from construction and operational activities. The contractor consults and seeks Fingal County Council approval for the CEMP prior to the commencement of any construction. An Outline CEMP has been prepared for the EIAR and can be found in Appendix A5.1.</p> <p>Detail on the mitigation measures that are linked to human health outcomes in both the Construction and Operational Phases are presented in the following EIAR chapters: Chapter 9: Traffic &amp; Transport; Chapter 11: Population &amp; Land Use; Chapter 12 (Electromagnetic Compatibility &amp; Stray Current), Chapter 13 (Airborne Noise &amp; Vibration); Chapter 14 (Groundborne Noise &amp; Vibration), Chapter 16 (Air Quality);Chapter 18 (Hydrology); Chapter 19 (Hydrogeology); Chapter 20 (Soils &amp; Geology) and Chapter 28 (Risk of Major Accidents &amp; Disasters). For the purpose of clarity, the identified mitigation proposed in the above Chapters for the impacts relevant to the human health assessment are contained in Chapter 10 (Human Health) Table 10.16.</p> <p>Furthermore, details of the Property Owner Protection Scheme (POPS) are as addressed in response number (11).</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 13                                                                                                                                      | Structural aspects and constructional aspects on residents and properties | 11       | <p>We also have some concerns about the issue of the groundwater with respect to the proposed Metro, since the method of construction will naturally introduce an artificial barrier in what is a very high-water table area, already somewhat prone to flooding</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | <p>The proposed Project will result in an increase in the area of impermeable surfaces due to the construction of the track bed, new stations, P&amp;R, depot and other associated infrastructure. To ensure no associated increase in flood risk, the proposed Project developed an overarching Drainage Strategy to ensure the implementation of Sustainable Drainage Measures (SuDS). These measures, which will be further developed through detailed design, are in line with CIRIA SuDS manual C753 (2015), Great Dublin Regional Code of Practice and associated GDSDS Technical Documents and Fingal CC Blue/Green infrastructure for Development Guidance Note. The proposed measures are designed to ensure no increase in existing runoff rates throughout the proposed new development as a consequence of the works.</p> <p>Furthermore, the MetroLink project has been designed with a number of "Drainage Wells" in the R132 area (see Railway Order Alignment Drawings for the north end of the scheme) to alleviate the barrier affect mentioned and allow ground water to continue to flow from west to east as at present.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

| 14                                                                                                                                      | Structural aspects and constructional aspects on residents and properties | 11       | The matter of the routine operation of the Metro line is also a concern to many residents as to how it may have and negative impact on the estate or properties.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | <p>Information on how the calculation of the baseline and subsequent assessment of the operational noise impact on receptors such as residents on Ashley Ave is provided in EIAR Chapters 13 and 14 . EIAR Chapter 13, section 13.5.3.4 details the criteria applied to calculate and assess the operational airborne rail noise impact. The rail noise level is added to the measured baseline noise levels deemed representative of each location to calculate a cumulative noise level. The cumulative level is compared against the baseline noise level from surveys undertaken to determine the increase in noise levels. In line with the negligible change calculated in traffic noise levels along the R132 in AZ1 (Assessment Zone 1), the measured baseline noise levels are considered to remain a valid representation of the future traffic noise level in this area.</p> <p>Operational rail airborne noise levels have been calculated at the closest noise sensitive locations (NSLs) to the above ground section of railway across the proposed Project. The route alignment running between the R132 and Ashley Avenue is positioned below ground in a cut and cover structure therefore the operational airborne rail noise does not have a significance rating of noise change from baseline. Please also refer to EIAR Chapter 13, section 13.5.3.4,Table 13.75 through to 13.78 for further information.</p> <p>Following the completion of the groundborne noise and vibration assessment, Chapter 14, Groundborne Noise &amp; Vibration section 14.6.2 confirms that there are no residual impacts applying at Ashley Ave during the operation.</p> |
| 15                                                                                                                                      | Summary                                                                   | 12       | <p>We are not against the Metro itself and understand and support the benefits arising for the general community. All we require, are:</p> <ul style="list-style-type: none"><li>•Absolute assurances regarding the overall integrity of our estate and the restoration of our estate to the condition in which it is to be found at this specific time (17th November 2022).</li><li>•The protection of all residents in respect to the structural integrity of our properties both during the construction phase and daily operation of the line. While we understand that the Property Owners Protection Scheme is tasked with addressing these issues, at this time, we do not fully understand or appreciate the wider implications of this scheme or as to how the rules may be applied.</li><li>•We reserve the right to further elaborate on these or any other issues not specifically mentioned in this appeal at the oral hearings.</li><li>•We would consider these matters to be fair and reasonable in every respect and are willing to provide any further clarification as may be requested.</li></ul>                                                                                                                                                                                                                                                                                             | <p>See also response number (1) above.</p> <p>Details of the Property Owner Protection Scheme (POPS) are as addressed in response number (11).</p> <p>A significant number of surveys have been undertaken to categorise the receiving environment for this EIAR. Further survey requirements to be undertaken during Enabling Works include further biodiversity surveys, contamination investigations, groundwater monitoring, noise and vibration monitoring and ground movement monitoring. These surveys will confirm and update the findings of surveys completed for the EIAR. In addition, they will provide further detail to allow for the most effective implementation of the mitigation and monitoring required by the RO.</p> <p>TII welcome any further engagement on any matters of concern either before, or if necessary, during the oral hearing.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| 16                                                                                                                                      | Summary                                                                   | 12       | Closing comment It should be noted that ALL residents are currently very much opposed to the project at this time however feel that the restoration of good will can be achieved by addressing the single most important issue of having the estate returned to an as is position on completion.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | See response number (1) above.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| 17                                                                                                                                      | Additional Comment                                                        | 13       | <p>Additional Comment Regarding the Application for Railway Order for Metrolink at Ashley Estate as detailed by some residents.</p> <p>I have had correspondence with the Metrolink Project for a period and I wish to advise that I have become disillusioned with the way my enquiries have been responded to, the lack of concern of the impact that the project will have in general on the living environment during its construction and during its operation</p> <p>I have asked specific questions about <u>Public Open Space, and the current Planning Designation of the area of the proposed project at Ashley Estate</u>. Enquiries regarding the <u>security of property during the construction</u> phase of the project. I sought confirmation that location of the project is in accordance with current Development Plan of Fingal Co. Council. Specifics were sought regarding <u>detail of walls and fences at Ashley Estate and Chapel Lane</u>. The detail requested was not provided.</p> <p>I have arrived at a view that whereas some people in this estate have put significant effort into communicating the concerns of various residents regarding the impact of this project on their properties and quality of life particularly during the construction phase of the project, the project team has made little effort to show how in detail these concerns are being addressed.</p> | <p>Over the last few years various meetings took place to update Ashley Avenue Estate with the design development and to obtain the feedback in order to fit the proposed design in best possible way. Numerous changes have been proposed which were presented and discussed.</p> <p>Further acknowledging your concerns, TII is committed to working with local resident’s groups to address concerns that have been expressed in relation to the loss of green space and the impact on the current boundary wall and will continue engagement with these groups in advance of oral hearing.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

| 18                                                                                                                                      | Additional Comment | 14       | <p>In fact, it would appear that this project is utilising the confusion of the impact to the Fingal Co. Council R132 Project to justify their lack of addressing some of the significant issues of resident's concern and providing responses that the issues are the responsibility of Fingal Co. Council.</p> <p>Examples are: the extent of openings in the boundary wall with the R132, the loss of the Pedestrian Bridge Assess to the Western side of the Swords Bypass, the design of the final cover of the public open space.</p> <p>The Metrolink Project refers on a number of occasions to enhancement to the public open space, however other than additional unnecessary paths, additional accesses and egresses through the boundary wall (also personally considered unnecessary) and without the detail of planting and biodiversity improvement and detail with regard to future maintenance.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | Please see response number (1) & (8).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |
| 19                                                                                                                                      | Additional Comment | 14       | <p>In conclusion, I would advise that my view of this project is one of disillusionment with the process, with the project's interest only being the delivery of the targeted transport route, the lack of obvious addressing of concerns raised (with effort being made to appear on record that responses were made, as if residents' concerns are being addressed), and the resultant lack of any significant change to the proposal, to minimise the negative impact of the project on Ashley Estate and Chapel Lane.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | Please refer to response number (1), (8) & (17) above                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |
| 20                                                                                                                                      | Additional Comment | 14       | <p>We live in 43 Ashley Ave and have resided here since 1981 and we raised 2 children here. We had some great times on the green and would love to see the green put back the way it is now (Walsh Family)</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | Please see response number (1) and (8).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |  |
| 21                                                                                                                                      | Additional Comment | 15       | <p>I would like to declare my full and total support for the issues as raised within this submission. I have enjoyed the ambience and security of living here and have followed closely the debate amongst the neighbours in regard to this project over the last few years, since it first came to our attention.</p> <p>Concerns:</p> <ul style="list-style-type: none"><li>• The proximity of the line itself, being less than 30 meters from my front door, and the possibility of negative structural impact on my house.</li><li>• Notwithstanding my concerns in respect of the property, I personally have grave concerns due to my life long illness (Laryngectomy). As you can understand I therefore must make every effort to safeguard my health and would consider the project to be a probable initiator of further ill health.</li><li>• The construction phase will undoubtedly result in a lot of disruption, such as noise levels, dust, dirt, not to mention general inconvenience, and it is logical to state that a lot more besides the ones I detail here. Given there are people living in the house who are on shift patterns it is reasonable to assume that the working hours of construction will also have a serious impact in daily life.</li><li>• In addition to any of the aforementioned serious, and personal issues, I wish to state that I am in total opposition to the line being routed through our estate given that at this time the Til plan to destroy the overall feel of our estate by the creation of the linear park. I and many of our neighbours flatly.</li></ul> | <p>Further to response (14) &amp; (15) above, the appointed construction contractor and Metrolink operator will prepare and implement a Construction Environmental Management Plan (CEMP) that includes a Health and Safety Plan to protect workers, control environmental pollution, and protect members of local communities from construction and operational activities. The contractor consults and seeks Fingal County Council approval for the CEMP prior to the commencement of any construction. An Outline CEMP has been prepared for the EIAR and can be found in Appendix A5.1.</p> <p>Any structural impact on properties within 30m of the alignment will be monitored and addressed through the proposed POPS scheme. Please refer to response (11) above.</p> <p>Detail on the mitigation measures that are linked to human health outcomes in both the Construction and Operational Phases are presented in the following EIAR chapters: Chapter 9: Traffic &amp; Transport; Chapter 11: Population &amp; Land Use; Chapter 12 (Electromagnetic Compatibility &amp; Stray Current), Chapter 13 (Airborne Noise &amp; Vibration); Chapter 14 (Groundborne Noise &amp; Vibration), Chapter 16 (Air Quality);Chapter 18 (Hydrology); Chapter 19 (Hydrogeology); Chapter 20 (Soils &amp; Geology) and Chapter 28 (Risk of Major Accidents &amp; Disasters). For the purpose of clarity, the identified mitigation proposed in the above Chapters for the impacts relevant to the human health assessment are contained in Chapter 10 (Human Health) Table 10.16. No additional mitigation, over and above that outlined in the sections above, is proposed for Human Health.</p> |  |

| Ashley Ave Residents Group Appeal to "Railway (MetroLink - Estuary to Charlemont via Dublin Airport) Order, 2022 Case No. NA29N.3414724 |                    |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                         |
| 22                                                                                                                                      | Additional Comment | 16       | <p>We John and Lorraine Jones of 46 Ashley Ave, live facing directly on to the green in question. This green space, where my children and every other child in the estate has played safely over the years has become the centre of our community for nearly 40 years.</p> <p>To alter it as per your plans, would in our opinion rip the heart out of our community. We request that you would put our green back to the condition it is at present, or as close to what we have.</p> <p>We want for our grandchildren to have a safe place to play, also for our neighbours to continue to enjoy meeting on the green while outwalking dogs, exercising, or watching our children playing.</p>                  | Please see response number (1) and (8). |
| 23                                                                                                                                      | Additional Comment | 16       | <p>We live at 28 Ashley Ave facing the gorgeous green that has been our sanctuary for the last 30 years or more. We now have grandchildren who enjoy playing like their father did when he was young playing safely. We love being able to enjoy the peace and tranquillity of the space that not many other housing estates have.</p> <p>We would like to preserve what we have and by doing this we want you to put the green back the way it was.</p>                                                                                                                                                                                                                                                          | Please see response number (1) and (8). |
| 24                                                                                                                                      | Additional Comment | 17       | <p>As an estate, we are like big family where we feel safe and secure together. We share the green area where our kids play, our dogs run we all catch up.</p> <p>With your plans you are taking away our security, your taking away from our community, which we all know so little is left in our green isle.</p> <p>Your plans to open up the green area for the Luas is an injustice to our community our big family. We all live here be it young, old, single, sick, happy or sad, and support each other, mix with each other, and you're going to ruin the one area we have to congregate together. Open it up as a pass through for all sorts of opportunist that can take advantage of a community.</p> | Please see response number (1) and (8). |
| 25                                                                                                                                      | Additional Comment | 17       | <p>We live at 10 Ashley Drive; I am originally from Chapel Lane and have used the green area both as a child and now as a mother. We have two young children and a dog who utilise the green area and footbridge daily.</p> <p>The safety it offered us as parents was a big factor in our choice of home in 2018. We find the proposed drawings of numerous access points to a major and busy road quite alarming and highly irresponsible. Therefore, we request that at a minimum, the green area of Ashly / Chapel Lane be restored to its current state</p>                                                                                                                                                  | Please see response number (1) and (8). |

| Ashley Ave Residents Group Appeal to "Railway (MetroLink - Estuary to Charlemont via Dublin Airport) Order, 2022 Case No. NA29N.3414724 |                    |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                         |
| 26                                                                                                                                      | Additional Comment | 18       | It is a safe space for play, exercise and for our dogs to run. We will have to persevere through possibly years of disruption during the works and we at 56 feel that it is a relatively small ask to have the green restored to or as near as possible to what we have now.                                                                                                                                                                                                                                                                                                                        | Please see response number (1) and (8). |
| 27                                                                                                                                      | Additional Comment | 18       | It has been a relatively safe and extremely good place to raise our families. Many of us now welcome our grandchildren to experience the same freedom our children enjoyed. This would all change if this plan were to go ahead. There are lots of young families with children moving into this Estate and they need a safe space to play so we respectfully request that you revise your plans and leave our green area as it currently is.                                                                                                                                                       | Please see response number (1) and (8). |
| 28                                                                                                                                      | Additional Comment | 19       | We live in 40 Ashley Avenue, directly across from the green, our children along with all our neighbours' children grew up playing on the green, the grandchildren are now playing on it. It is a safe place, and we still use it to exercise our dog several times a day. We just want the green to be put back the way it is now                                                                                                                                                                                                                                                                   | Please see response number (1) and (8). |
| 29                                                                                                                                      | Additional Comment | 20       | One of the main selling points for us when buying our house 39 Ashley Ave was the privacy and security aspect of it. The area in the estate your team will be working, we know as The Green, it is a secure and safe area for our children to play and for our dogs to have a run around and exercise.<br><br>The plan you have put forward for The Green when your works are complete, totally run contrary to the wishes of the estate residents. To put it simply, we would like The Green put back the way it was prior to works being carried out, nothing fancy, just back to the way it was. | Please see response number (1) and (8). |
| 30                                                                                                                                      | Additional Comment | 20       | We live in 33 Chapel Lane, and object to the proposed plans for the new green area and boundary wall. We have 2 young children who love to cycle and scoot along the pathway between the boundary wall & green grass area. This is the only place for our children to play safely out on the estate. The boundary wall gives us added security, and a buffer to reduce noise from the dual carriage way. We would like it to remain as is after works are completed.                                                                                                                                | Please see response number (1) and (8). |

|                                                                                                                                         |                     |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                         |

| Ashley Ave Residents Group Appeal to "Railway (MetroLink - Estuary to Charlemont via Dublin Airport) Order, 2022 Case No. NA29N.3414724 |                     |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                         |
| 31                                                                                                                                      | Additional Comment  | 21       | My daughter loves to cycle on the path beside green. She feels safe to cycle over there. I walk and exercise over there as well. I feel the green right now is safe, secure, and peaceful. We respectfully request that keep the green the way it is right now.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | Please see response number (1) and (8). |
| 32                                                                                                                                      | Additional Comment  | 21       | We live at 45 Ashley Avenue and have done so for 25 years. Our children grew up using the green as a safe place to play with their friends and now the next generation of children & grandchildren of Ashley use the green.<br><br>We exercise our dogs there safely. The green is a great space for our estate and is used daily all year round. We would like the green to be put back exactly as it is                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | Please see response number (1) and (8). |
| 33                                                                                                                                      | Councillor response | 28       | Councillor response:<br><br>On behalf of myself and Lousie O'Reilly TD - I'm happy to confirm our continued support for the residents of Ashley Estate, Seatown Villas and Estuary Court, particularly in relation to the restoration of the boundary walls of residential estates adjacent to the R132 following works necessary for the delivery of the Metrolink. This and the installation of linear parks in their stead have been the topic of many discussions and are issues of major concern raised by residents and by myself and Deputy O'Reilly at meetings attended by the TII, residents groups, elected representatives and others.<br><br>We will continue to support the residents who have been extremely positive in their backing of the delivery of this long awaited important infrastructure for Swords, however the issues that have been raised by residents and their representatives have not been satisfactorily addressed and the reinstatement of boundary walls will not impact on the delivery of Metrolink. | Please see response number (1) and (8). |

Like you I accept that we definitely need Metro for lots of reasons but the residents here have enjoyed a quiet enclosed environment by custom and practice for 40 years. My understanding of the linear park is that it's part of the Metro plans and will be delivered by them it has not been either planned or is it being paid for by Fingal County Council.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | Please see response number (1) and (8). |
| 35                                                                                                                                      | Councillor response | 30       | Councillor Response:<br><br>I totally agree as I have said on a few occasions a united front is what is required and am happy to lend a hand and my support in any meaningful way possible to Ashley and surrounding estates.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | Please see response number (1) and (8). |

| 1                                                                                                                                            | Letter       | 1        | I am fully supportive of the development and implementation of a Metrolink project to connect the city centre and various existing transport routes to Dublin Airport. It is an essential component of a sustainable, efficient, lower-carbon transport infrastructure in the future. At the same time, we have reviewed the reports, proposals and supporting evidence and are firmly opposed to the siting of the terminus at Charlemont. | Thank you for taking the time to make a submission and your overall endorsement of the MetroLink Project with the exception of Charlemont Station. We have reviewed your submission and responded to the observations made below.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| 2                                                                                                                                            | Letter       | 1        | 1. Charlemont is the incorrect strategic location for a Terminus hub and spoke system as it is too far out along the Luas Green Line spoke and would prejudice future options for integration of networks and services.                                                                                                                                                                                                                     | <p>TII do not agree that Charlemont is the incorrect location for an interchange with the Luas Green Line or that it prejudices future options for integration with the wider transport network for the reasons set out below.</p> <p>The Board is required to have regard to the likely consequences for proper planning and sustainable development in the area in which it is proposed to carry out railway works (section 43(1) of the 2001 Act) and as such the following matters are relevant.</p> <p>The connection from St Stephens Green to Charlemont / Ranelagh is supported by the current Transport Strategy for Greater Dublin Area (2022-2042). The Transport Strategies were prepared by the National Transport Authority, scrutinised by the Joint Oireachtas Committee on Transport and approved by the Minister for Transport. It notes in section 12.3.2, "Charlemont offers the optimal location for the primary interchange with the Green Line in response to growing demand in the longer term and is an appropriate location to facilitate any potential future metro extensions to serve the south west, south or south east of the city region should sufficient demand arise."</p> <p>The Transport Strategy is "a consideration material to the proper planning and sustainable development of the area or areas in question." Development Plans are required to be consistent with the Transport Strategy. The Dublin City Development Plan 2022-2028 envisages this station at Charlemont in policy SMT22 "To support the expeditious delivery of key sustainable transport projects so as to provide an integrated public transport network with efficient interchange between transport modes, serving the existing and future needs of the city and region and to support the integration of existing public transport infrastructure with other transport modes. In particular the following projects subject to environmental requirements and appropriate planning consents being obtained: ... MetroLink from Charlemont to Swords".</p> <p>Accordingly, the location of the Charlemont station was a strategic decision made at the highest levels of transport and land use planning and such is fully consistent with the proper planning and sustainable development of the area.</p> <p>The current Transport Strategy considers a range of options for the onward extension of MetroLink to meet the demand for travel over the period of the strategy. This includes consideration of the need for the upgrade of the Luas Green Line to metro with a metro extension to Dublin south west, south or south east. Whilst the strategy envisages that further extensions will be delivered after 2042, MetroLink which terminates at Charlemont allows for the possible extension of the metro in all any of the above directions.</p> <p>The proximity of the metro to the Luas line at Charlemont provides for a positive customer experience for all users with short interchange distance and due to the proximity, clear wayfinding and high visibility of the interchange. The interchange arrangements at Charlemont provide for significantly better interchange arrangements compared to an interchange at St Stephen's Green Station.</p> |

| Re: Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022 Case Reference Number NA29N.314724 16 <sup>th</sup> January 2023 |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
|                                                                                                                                              |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | <p>The detailed analysis done for the Railway Order application further confirms that the section of MetroLink route between St Stephen's Green and Charlemont Stations contributes significantly to the overall benefits of the scheme. It serves a significant area of the south city of Dublin and offers enhanced access from the local area to the city centre and a direct connection to Dublin Airport. It serves key trip attractors including residential areas and offices / workplace locations, with high passenger boarding and alighting figures in the peak hours. During the morning peak, at Charlemont station the flows include 1,800 passengers alighting, 2,300 boarding and 1,229 passengers alighting, 2,276 boarding during the evening peak. The passenger numbers contribute significantly to the overall benefits of the scheme and the effect of these benefits outweigh the additional costs that are associated with the delivery and operation of the section from St Stephen's Green to Charlemont station. Further information is available in Chapter 7: Consideration of the Alternatives, section 7.7.8 MetroLink Southern Terminus Location.</p> <p>The location of the interchange at Charlemont does not preclude onward extension south. An interchange at Charlemont is supported by policy including the Dublin City Development Plan 2022 - 2028 and the Transport Strategy for the Greater Dublin Area.</p> <p>By extending MetroLink to Charlemont it provides for future proofing of the Green Line, bypassing the capacity constrained Luas on-street running section, and ensures potential future connectivity options are enabled, either to the Green Line or for extensions of the metro.</p> <p>The Charlemont Station interchange provides for increased passenger utilisation of the MetroLink system, thereby increasing the benefits delivered by the Project, reflected by an improved Project Benefit Cost Ration (BCR).</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| 3                                                                                                                                            | Letter       | 1        | St. Stephens Green is the most appropriate location as it provides for interchange with bus, Luas and future DART underground. The project incorrectly dismisses St. Stephens Green West as an appropriate terminal station. It only considers St. Stephens Green East and Charlemont. Furthermore, no comprehensive study or investigation has been completed by NTA/TII as part of the entire Metrolink project on the optimal location for a city-centre terminus. | <p>TII do not agree that St Stephen's Green is the most appropriate interchange location for the reasons set out by response (2) above.</p> <p>It is not correct to say that the Project "only considers St. Stephens Green East and Charlemont." A number of route options were considered in the process of identifying the Emerging Preferred Route (EPR). These route options included potential station locations on St. Stephen's Green West. St. Stephen's Green West was ruled out as the alignment between the proposed Tara Station and a station on St Stephen's Green West would result in an undesirable horizontal reverse curve and an alignment greater than a 1000m long that would necessitate an intermediate intervention shaft located somewhere between these stations to comply with the MetroLink Fire Strategy. Further, as a potential station location, St Stephen's Green West itself is a very constrained location due to the presence of buildings, Luas and St Stephen's Green Park. Maintaining the Luas operational during station construction would be complex and challenging with significant disruption expected, whilst the impacts on St Stephen's Green Park would be greater for a station in this location compared to the proposed location on St Stephen's Green East. This would be the result of; the likely need to place more of the station in the Park compared to the proposed station on St Stephen's Green East; it would impact an area of the Park that has greater amenity value than St Stephen's Green East due to the nearby Park entrance adjacent to the southern end of Grafton Street, and there would be a risk of impacting the existing Park lake. In summary, an alignment that links the proposed Tara, St Stephen's Green East and Charlemont stations is a more direct and economic alignment, does not require additional intervention infrastructure, avoids a complex engineering interface with the Luas Green Line, impacts the Park less and has less potential for disruption during the construction phase. As outlined by EIAR Chapter 3, Background to the MetroLink Project, one of the key objectives of the Project is the integration of it with the wider transport network that also includes for BusConnects and DART+ which are all included under Project Ireland 2040 and the GDA Transport Strategy 2022-2042 (section 12.3.2). Together, these projects will result in a reliable, sustainable, affordable, integrated public transport network that will support the economy, help Ireland meet its climate change targets in line with Climate Action Plan 2023 and make Dublin a more liveable and sustainable city.</p> |

| Re: Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022 Case Reference Number NA29N.314724 16 <sup>th</sup> January 2023 |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
|                                                                                                                                              |              |          | Response (3) continued.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | <p>The submission is being argued argues that Charlemont station effectively becomes a terminus station in the short to medium term. The implication is that the activities normally associated with a terminus are incompatible with the proper planning and sustainable development of this location, in particular, travel to and from the location by car at the start and end of journeys.</p> <p>In this regard, it is true to say that the Metrolink trains will terminate and turn back at Charlemont station, However, Charlemont Station does not have the associated infrastructure and services associated with a terminus location and in fact has more in common with a "system turn back location". Charlemont Station is located within an area of high public transport accessibility, linking with the Luas Green Line which offers reasonably similar levels of services and frequency for journeys to and from the south of Dublin. As such, public transport service offering is not considered to terminate, but transfers onto the similar service offered by the Luas Green Line, forming part of a transport corridor running from Cherrywood to Estuary. The associated environmental impacts for the turnback and station at Charlemont have been fully assessed in the EIAR. Additionally, there is a strong level of interchange offered throughout the corridor at locations such as Glasnevin, O'Connell Street, Tara Street and St Stephen's Green, where many journeys on the MetroLink will 'terminate'.</p> <p>The terminus station for MetroLink is located at Estuary where all of the activities normally associated with a terminus take place. Charlemont station itself was chosen on the basis of its interchange potential with Luas, as well as local bus services, as outlined above in response (2).</p> <p>If the scheme were to terminate at St Stephen's Green, it would be inconsistent with the GDA Transport Strategy 2022-2042 to locate the terminus at Charlemont.</p>                                  |
| 4                                                                                                                                            | Letter       | 1        | 2. Wasteful Duplication of Rail infrastructure: - The inclusion of an expensive and costly section between St. Stephens Green and Charlemont is strategically weak and duplicates the existing Luas Green Line services. NTA's cost estimate for this 1km section at €650M is a duplication and enormous outlay that represents very poor value-for-money, and deprives other parts of Dublin that are in immediate need of rail infrastructure to support urgently required housing and urban development. | <p>The Board is not responsible for any decisions in relation to the funding the Project. It is solely responsible for assessing whether the Project is consistent with proper planning and sustainable development and that its effects on the environment are acceptable.</p> <p>The responsibility for funding the Project lies with the NTA, the Government and ultimately the Oireachtas. It has received all necessary approvals, including under the Public Spending Code for the making of a Railway Order. It will undergo further scrutiny and approvals, including under the Public Spending Code, before it is funded. It is not appropriate for the Board to make findings in relation to value-for-money that are outside its statutory functions and would cut across those arrangements. Members of the public are entitled to make representations to their TDs in relation to the value-for-money of any element of the Project.</p> <p>In any case, TII do not agree with this statement for the reasons set out by response (2) above, noting that infrastructure is not being duplicated given the capacity of the Luas south from St. Stephen's Green is restricted due to on-street running.</p> <p>There is a limit to the potential of the Luas to provide additional capacity in the on-street non-segregated section of the Luas Green Line from Charlemont northwards through the city centre. The nature of this route and the fact that it currently crosses several road junctions (Adelaide Road, Harcourt Street / Hatch Street upper and Harcourt Street / St Stephen's Green south) limit the service to a maximum of 24 trams per hour per direction. The projected demand for this section would require a higher frequency of up to 30 trams per hour and this demand cannot be met with on-street systems (Luas / bus). The interchange between Luas and MetroLink proposed at Charlemont will provide the necessary capacity to address the demand on this corridor and reduce overall travel time for passengers.</p> |

| Re: Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022 Case Reference Number NA29N.314724 16 <sup>th</sup> January 2023 |              |          |                                                                                                                                                                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
|                                                                                                                                              |              |          |                                                                                                                                                                                                                                                                                                                                                                                              | <p>There is also high passenger demand forecast for a Metrolink station at Charlemont, including from the Ranelagh area, which would be lost if St. Stephen's Green was the MetroLink southern interchange station. The additional fare revenues collected by the Charlemont Station interchange increase the benefits delivered by the Project, reflected by an improved Project Benefit Cost Ration (BCR).</p> <p>Further, to ensure that public investment delivers value for money, the Public Spending Code sets out requirements for the evaluation, planning and management of public investment. The preparation of a Business Case is a key element of meeting these requirements. The Public Spending Code requires that both the Preliminary Business Case and Final Business Case for public investment projects are published.</p> <p>In July 2022, the Government granted Approval in Principle to the NTA to enable the submission of a railway order application by TII to An Bord Pleanála in respect of the MetroLink project (Decision Gate 1). This approval was granted after the Preliminary Business Case (PBC) had undergone significant scrutiny and challenge by bodies that are independent of TII, including DoT and DPER review (including independent review by JASPERS and the Major Projects Advisory Group (MPAG)) of the PBC around timeline, costs and benefits that were updated to inform the Government decision.</p> |
| 5                                                                                                                                            | Letter       | 1        | 3. The station box at Charlemont, as constructed in 2021/22 by the developer Hines, does not have the benefit of planning permission and has not been part of the EIA undertaken for this project. Processing the current Railway Order application, which is reliant on these preliminary and now constructed works, is legally unsafe and contravenes the provisions of the EIA Directive. | The MetroLink enabling works constructed as part of the Hines development was included in the planning application for the Hines Development and has the benefit of planning permission which was granted in April 2019.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

                                                                                                                                                                                                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| 6                                                                                                                                            | Letter       | 1        | <p>4. The station box at Charlemont will result in only one possible future tie in with the Luas Green Line to the south, which would result in an option that was previously dismissed as part of the Tie-In study from March 2017. No alternatives to the station box at Charlemont were considered as it had been fixed through the design of the overhead Hines Grand Parade commercial development.</p> <p>The implications of this new alignment are very negative for the local community as they will inevitably involve top-down construction that will only be possible when many houses on Manders Terrace, Oakley Road and Charleston Road are demolished.</p> | <p>The station box at Charlemont allows for a future tie into the Luas Green Line should it be determined in the future that through running metro services to Sandyford is the required solution to address the public transport needs to the south of the city. It is incorrect to say that the current proposal is based on an option that was previously dismissed as part of the March 2017 Green Line tie in study. The station design is in affect a modification to the preferred Green Line Tie Option 4B which was modified as result of the decision not to proceed with the upgrade of the Green Line to metro standard.</p> <p>The station box location was not fixed by the Charlemont Development. The preferred route for MetroLink was published in March 2019 following a comprehensive route options study. The preferred route was based on the emerging preferred route for the scheme which included a station at Charlemont. The Charlemont Metro Enabling Works were constructed to enable the Charlemont Development to proceed whilst simultaneously ensuring there was an option available to construct a station at Charlemont that avoided unnecessary demolition, took advantage of an available site, provided infrastructure that is integrated with planned development rather than necessitating later changes and retrospective adjustments to a new development or even possible demolition of the new development, whilst providing protected provision for the future extension of the scheme south, if required.</p> <p>It is also important to recognise that the station location at Charlemont is influenced by available vacant land and thus avoids unnecessary demolition.</p> <p>The submission seeks to portray the construction of the Metro Enabling Works as prejudicial to future decisions on proper planning and sustainable development of the area. It implies that the counterfactual would have had no effect on such decisions. That is not the case. There was a planning conflict between the EPR and the Grand Parade Development at the time the latter development was proposed. There was no resolution to that conflict that was free of implications for future decisions on the proper planning and sustainable development of the area. The Board could have refused permission for the Grand Parade Development, inevitably creating an underutilised and potentially vacant and idle site in a commercial hub location. The Board could have granted permission with no provision to facilitate a station at this location, resulting in a requirement for the railway order to provide for the demolition of a new office building. The Board's actual decision was reasonable and lawful in seeking to minimise the prejudice to an important office development and a critical piece of national infrastructure. It was also not particularly restrictive of future decisions in relation to the proper planning and sustainable development of the area. Of the three options open at the date of the Grand Parade planning application, two remain open: the Board can still require changes to the station design that require the demolition of the commercial building and it can grant an order that avoids demolition by using the Metro Enabling Works.</p> <p>It is agreed that the short-term implications for local residents will be significant as the scheme progresses through the construction stage, however the EIAR assesses the environmental impacts of the construction phase and commits to the implementation of appropriate mitigation measures that reduce the environmental impacts to not significant. The same is true of the operations phase for the project. TII will work closely with local residents to ensure the required mitigation measures are put in place.</p> <p>If in the future, the metro was extended south, this does not mean that inevitably open cut construction will be required or demolition of property will be necessary. In designing an extension, the promoter will seek to reduce the requirement for demolition by looking for tunnel launch sites at the southern extent of the scheme and, if one can be identified, driving the Tunnel Boring Machine northwards ultimately connecting into the existing tunnel. In that case, even if the new alignment were under the properties identified in the submission, the tunnel underneath them would be constructed by the Tunnel Boring Machine without the need for above ground works.</p> |

| 7                                                                                                                                            | Letter       | 2        | 5. The Environmental Impact Assessment is deficient in relation the description of development, alternatives, transport assessment, noise and the cumulative effects of the development on the Charlemont-Dartmouth Community. For a project of this size, scale, investment to date, it is inadequate to propose a Railway Order with so many important studies and analysis missing. | TII do not agree that the Environmental Impact Assessment is deficient, inadequate or missing information. The Railway Order application comprises a very detailed environmental impact assessment that has identified and assessed the potential environmental impacts of MetroLink and proposed mitigations for these impacts where necessary. TII would also draw attention to the detailed project description, construction phase description and operational phase description provided in EIAR Chapters 4 and 5 and 6, and EIAR Chapter 7 and associated appendices that present details of alternatives considered. EIAR Chapter 9 and appendices provides a detailed analysis of transport and traffic effects, and EIAR Chapters 13 Airborne Noise & Vibration, and 14 Groundborne Noise & Vibration provide a detailed assessment of potential noise and vibration effects, while Chapter 29 outlines the assessment of interactions between various environmental aspects, and Chapter 30 covers the cumulative impacts with other projects. This assessment is carried out for the full length of the alignment including relative to potential significant effects on the Charlemont-Dartmouth Community.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| 8                                                                                                                                            | Letter       | 2        | 6. The development would result in noise and disturbance during the construction and operational phases and would result in a loss of amenities for the area.                                                                                                                                                                                                                          | <p>The EIAR presents a comprehensive and detailed assessment of both groundborne and airborne noise and vibration in Chapter 13 and 14 of the EIAR. The assessments include for predictive modelling in order to identify the potential impacts on all sensitive receptors during both the construction phase and the operational phase.</p> <p>Noise and disturbance during construction:</p> <p>No profound impacts have been identified for residents and mitigation measures proposed will be effective at reducing the impacts on these properties and in general terms impacts will be associated with the construction phase only. Significant mitigation is proposed to include 4m high noise barriers and further proposed mitigation in line with the Airborne and Groundborne Noise Mitigation Policy. On the implementation of these measures the residual impacts are predicted to be moderate. However, as outlined in Transport Infrastructure Ireland (TII) Airborne and Groundborne Noise Mitigation Policy (Appendix A14.6) there is a process in place whereby further mitigation measures can be implemented at individual properties should this be merited.</p> <p>Noise and disturbance during operation:</p> <p>No residual noise impacts are identified at this location during operation. The calculated rail noise levels across the proposed Project are not significant in terms of any widespread community disturbance and results in a not significant to slight impact when added to the prevailing noise environment.</p> <p>Loss of amenity during construction:</p> <p>EIAR Chapter 11, Population &amp; Land Use provides an assessment of effects on community amenity during construction and operation, which relates to the interaction of impacts on air quality; visual amenity; traffic and transport; and noise and vibration.</p> <p>At this location during construction as outlined in Section 11.5.2 of Chapter 11, no impacts are identified on the retail sector or community and social infrastructure (e.g. schools or hospitals). Any severance/disruption to transport will be limited by site mitigation measures such as alternative routes reducing impacts to not significant.</p> |

| Re: Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022 Case Reference Number NA29N.314724 16 <sup>th</sup> January 2023 |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
|                                                                                                                                              |              |          | Response (8) continued.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | <p>Loss of amenity during operation:</p> <p>No significant residual negative impacts are anticipated on the Population and Land Use from the operation of the proposed Project, following the incorporation of the mitigation measures into the design of the proposed Project and implementation on an ongoing basis throughout the lifecycle. The residual effects that will arise during operation will be permanent and positive as detailed in EIAR Chapter 11, section 11.1.1.</p> <p>The zoning under the Dublin City Development Plan 2022 - 2027 for the residential properties in question is "Z2 Residential Neighbourhoods (Conservation Areas)" with an objective to "protect them from unsuitable new developments or works that would have a negative impact on the amenity or architectural quality of the area (See Table 3.11 of the submitted Planning Report). As outlined in Section 4.5.18.6 of the Planning Report, the element of the Project within the Z2 zoning area will affect a below ground area only and as such will not compromise the land use objective for the lands overhead. The majority of the proposed Charlemont Station and all above ground elements are located within the lands zoned Z6 with the objective "To provide for the creation and protection of enterprise and facilitate opportunities for employment creation". The Station has been designed so that it is integrated with the proposed redevelopment of this site by a third party development, and as such, demonstrates that the proposed Project is consistent with the zoning objective. The MetroLink station design does not result in any segregation of the area, with no surface barriers or walls proposed.</p> <p>See below in relation to the submission that the Traffic Study for Charlemont is inadequate because it omitted the impact of airport users from south Dublin travelling to this location.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| 9                                                                                                                                            | Letter       | 2        | <p>The Traffic Study for the local Charlemont area is wholly inadequate as it omitted the modelling of the impact of Airport users coming to the only Dublin South Metrolink station at Charlemont. The Traffic Study uses a strategic, generalised regional model that does not take local factors into account.</p> <p>Extract from observation 7) - The EIA did not properly assess the impact of additional local traffic volumes, rather they used a generalised regional model that does not take local factors into account. A key local factor at a Terminus station in Charlemont that runs to the Airport is the huge volume of anticipated airport users from Dublin South and greater Dublin/Leinster that will come to Charlemont via car or taxi with luggage for onward destination to the airport. Grand Parade and the residential area around Charlemont-Dartmouth cannot sustain the significant additional traffic volumes associated with this development.</p> | <p>MetroLink forms part of an integrated public transport network. The system is designed in an integrated manner so that people travelling from the area south of Dublin to access locations north of Charlemont, such as Dublin Airport, Mater, Swords etc. will utilise public transport to interchange with the MetroLink, or will walk or cycle to access their local station. The system is not designed to encourage people to drive to stations within the City and TII actively discourage people from doing so other than the Park &amp; Ride station at Estuary. TII therefore do not agree with the observation that there will be a "huge volume of anticipated airport users from Dublin South and greater Dublin/Leinster that will come to Charlemont via car or taxi with luggage for onward destination to the airport" as this is not borne out by our transport analysis.</p> <p>The Transport Assessment for MetroLink includes for people travelling to/from Dublin Airport from all areas within the extents of the GDA area, therefore it is incorrect to say "The Traffic Study for the local Charlemont area is wholly inadequate as it omitted the modelling of the impact of Airport users coming to the only Dublin South Metrolink station at Charlemont".</p> <p>The NTA's Eastern regional Model (ERM) incorporates a wide range of data sources, including demographic data, land use data, transportation network data, and travel survey data. The system is designed to model a variety of transportation modes, including private vehicles, public transit, walking, and cycling, and to simulate the interactions between these modes. The ERM model has been validated and calibrated using a range of localised data sources to ensure that the model can accurately represent the transport network, these include public transport and vehicle counts from the canal cordon counts. The outputs from the model have been combined with local survey data to undertake the more localised modelling, such as the pedestrian impact assessments, or the local traffic signals. This does not support the observations made "The Traffic Study uses a strategic, generalised regional model that does not take local factors into account." or "The EIA did not properly assess the impact of additional local traffic volumes, rather they used a generalised regional model that does not take local factors into account."</p> <p>Regards the observation there will be a "huge volume of anticipated airport users from Dublin South and greater Dublin/Leinster that will come to Charlemont via car or taxi with luggage for onward destination to the airport. Grand Parade and the residential area around Charlemont-Dartmouth cannot sustain the significant additional traffic volumes associated with this development", this is covered by response (10) below.</p> |

| Submission No.                                                                                                                               |              |          | 015                                                                                                                                                                                                                                                                                                                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| 10                                                                                                                                           | Letter       | 2        | 7. The development would have an adverse impact upon traffic during the construction and operational phase, and it has not been properly designed and there is poor integration with other modes of transport. Pedestrian movements in and around the station would be difficult. Grand Parade is an already heavily congested orbital route. | <p>MetroLink is designed to form part of an integrated public transport network with Charlemont selected as the preferred interchange location in order to maximise the potential interchange with the existing Luas Green Line. In overall terms, Charlemont Station will provide for improvements to the public transport network resulting in decreases in private car usage/trips, increases in public transport usages and will facilitate walking and cycling to the station, without significantly impacting on the operation of the road network in the area.</p> <p>Construction Phase:</p> <p>EIAR Appendix A9.5 Scheme Traffic Management Plan presents the analysis undertaken to assess the impact of the traffic management measures on the local road network surrounding the proposed Charlemont Station during the construction phase. At the local level the following parameters have been used to assess impacts on general traffic and on pedestrians:</p> <ul style="list-style-type: none"><li>• Increase in walking distance/quality of service for pedestrians (through removal of footpath, reduction of quality of service, removal of a pedestrian crossing or relocation of crossing by more than 100m);</li><li>• Increase in driver delays at junctions;</li><li>• Changes in traffic flows on surrounding streets; and,</li><li>• Additional distance travelled due to diversions.</li></ul> <p>The analysis undertaken at this location indicates that the increased volume of traffic on Grand Parade and Northbrook Road does not translate into any significant increase in driver delay. The largest increase in driver delay of 12 seconds is registered on the westbound approach on Grand Parade to the Ranelagh Road signalised junction.</p> <p>During the construction phase, pedestrians will experience a reduction in quality of pedestrian infrastructure and space. The construction site boundary will encroach upon footways in the local area, including the northern side of Dartmouth Road, and the southern side of Grand Parade. However, a temporary signalised crossing will be provided west of the Luas to maintain pedestrian access to and from the Stop. Whilst there are partial closures on Dartmouth Road and Grand Parade, pedestrian movements will be maintained on appropriately sized footways through the area.</p> <p>Operational Phase:</p> <p>A microsimulation VisWalk model has been developed for the immediate area surrounding Charlemont Station during the operational phase. The model covers the full extent of the publicly accessible station area, including the immediate vicinity of the station entrance at street level, the Luas stop and nearby junctions at Charlemont Bridge. In order to accommodate the forecast demand from the proposed Charlemont Station, a new staircase with 2.4m stair width is proposed at the south east corner of Charlemont Luas stop. An elevator will also be provided at this location. Both are sized for MetroLink to Luas, and Luas to MetroLink passenger numbers.</p> <p>In addition, it is proposed that the pedestrian crossing on R111 Grand Parade will be repositioned to the front of the building being developed by Hines. With this infrastructure in place, the model indicates that the R111 Grand Parade will have an acceptable level of service overall, with some reductions in service seen at the pedestrian crossing where pedestrians are required to wait for a green phase at the signals. Overall, it is considered that the model displays an acceptable level of network performance.</p> <p>The proposed pedestrian crossing on Grand Parade will have minimal impact on the traffic flow along Grand Parade and can be programmed to operate in sync with the existing signalised junction at Grand Parade /Charlemont Street to maintain the flow of traffic movements. When the Project is operational, car mode share will decrease, with a reduction of up to approximately 830 car tips to and from the zones surrounding Charlemont Station over the 12hr period in 2065. In overall terms, the Charlemont Station will provide for improvements to the public transport network resulting in decreases in private car usage/trips, increases in public transport usages and will facilitate walking and cycling to the station, without significantly impacting on the operation of the road network in the area.</p> <p>Furthermore, TII have deliberately designed the Station with minimum set down space (with the exception of a drop-off on Grand Parade for persons of restricted mobility only) or room for taxi ranks so that it does not encourage the Station to be used for a significant volume of car or taxi trips.</p> |

| Re: Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022 Case Reference Number NA29N.314724 16 <sup>th</sup> January 2023 |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| 11                                                                                                                                           | Letter       | 2        | 8. The development will have an adverse impact upon property values, particularly during the construction phase. For many houses in the area there will be a long term and permanent adverse impact upon property values from noise of the operating rail infrastructure, vents, operational noise and signals, escalators, and large traffic volumes - vehicular and pedestrian using the station 19 hours per day. The adverse impact also extends to the loss of amenity for the wider community changing a q residential neighbourhood into a noisy, busy, congested major transport hub. | Response (8) above outlines the predicted environmental impacts with regards to noise and vibration, and amenity, while responses (9) and (10) summarise the assessed traffic and pedestrian impacts. TII would note that as explained by response (10) above that in overall terms Charlemont Station will provide for improvements to the public transport network resulting in decreases in private car usage/trips. There is evidence to suggest that the introduction of a world class metro system greatly benefits established residential areas.                                                                                                                                                 |
| 12                                                                                                                                           | Letter       | 2        | Accordingly, we are requesting the following amendments of An Bord Pleanála:<br><br>1. Omit from the Railway Order the section from Tara Street Station to Charlemont Station and associated onward tunnel extension and intervention tunnel.<br><br>2. Require the submission of a Railway Order for a section from Tara Street Station to St Stephens Green which would effectively provide for a terminal hub station that can integrate with the Luas Green Line, multiple bus routes and future DART underground.                                                                        | The above responses to the observations made explain why TII do not consider it is correct or appropriate that the MetroLink alignment south of the proposed Tara Station should be omitted, and also demonstrates why the proposed Charlemont Station has been selected by TII as the preferred interchange with the Luas Green Line.<br><br>A scheme which terminates at Tara Street would not be consistent with the Transport Strategy for Greater Dublin Area (2022-2042) and would be a material contravention of the Dublin City Development Plan 2022-2027. In addition, any decision to terminate the scheme at Tara will significantly impact on the overall viability and benefits of scheme. |

| Re: Various Submissions as noted above |              |          |                                                                                                                                                                                                                                                                                                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| 1                                      | Letter       | 1        | I am in favour of the broad aim of the Metrolink project to connect Dublin's city centre to our national airport. However, as a resident living in the Dartmouth/Charlemont area, I wish to set out a number of observations for the Board regarding the proposal to locate the terminus station at Charlemont-Dartmouth. | Thank you for taking the time to make a submission and your overall endorsement of the MetroLink Project. We have reviewed your submission and responded to the observations made below.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| 2                                      | Letter       | 1        | 1. Charlemont is the incorrect strategic location for a Terminus hub and spoke system as it is too far out along the Luas Green Line spoke and would prejudice future options for integration of networks and services.                                                                                                   | <p>TII do not agree that Charlemont is the incorrect location for an interchange with the Luas Green Line or that it prejudices future options for integration with the wider transport network for the reasons set out below.</p> <p>The Board is required to have regard to the likely consequences for proper planning and sustainable development in the area in which it is proposed to carry out railway works (section 43(1) of the 2001 Act) and as such the following matters are relevant.</p> <p>The connection from St Stephens Green to Charlemont / Ranelagh is supported by the current Transport Strategy for Greater Dublin Area (2022-2042). The Transport Strategies were prepared by the National Transport Authority, scrutinised by the Joint Oireachtas Committee on Transport and approved by the Minister for Transport. It notes in section 12.3.2, "Charlemont offers the optimal location for the primary interchange with the Green Line in response to growing demand in the longer term and is an appropriate location to facilitate any potential future metro extensions to serve the south west, south or south east of the city region should sufficient demand arise."</p> <p>The Transport Strategy is "a consideration material to the proper planning and sustainable development of the area or areas in question." Development Plans are required to be consistent with the Transport Strategy. The Dublin City Development Plan 2022-2028 envisages this station at Charlemont in policy SMT22 "To support the expeditious delivery of key sustainable transport projects so as to provide an integrated public transport network with efficient interchange between transport modes, serving the existing and future needs of the city and region and to support the integration of existing public transport infrastructure with other transport modes. In particular the following projects subject to environmental requirements and appropriate planning consents being obtained: ... MetroLink from Charlemont to Swords".</p> <p>Accordingly, the location of the Charlemont station was a strategic decision made at the highest levels of transport and land use planning and such is fully consistent with the proper planning and sustainable development of the area.</p> <p>The current Transport Strategy considers a range of options for the onward extension of MetroLink to meet the demand for travel over the period of the strategy. This includes consideration of the need for the upgrade of the Luas Green Line to metro with a metro extension to Dublin south west, south or south east. Whilst the strategy envisages that further extensions will be delivered after 2042, MetroLink which terminates at Charlemont allows for the possible extension of the metro in all any of the above directions.</p> <p>The proximity of the metro to the Luas line at Charlemont provides for a positive customer experience for all users with short interchange distance and due to the proximity, clear wayfinding and high visibility of the interchange. The interchange arrangements at Charlemont provide for significantly better interchange arrangements compared to an interchange at St Stephen's Green Station.</p> <p>The detailed analysis done for the Railway Order application further confirms that the section of MetroLink route between St Stephen's Green and Charlemont Stations contributes significantly to the overall benefits of the scheme. It serves a significant area of the south city of Dublin and offers enhanced access from the local area to the city centre and a direct connection to Dublin Airport. It serves key trip attractors including residential areas and offices / workplace locations, with high passenger boarding and alighting figures in the peak hours. During the morning peak, at Charlemont station the flows include 1,800 passengers alighting, 2,300 boarding and 1,229 passengers alighting, 2,276 boarding during the evening peak. The passenger numbers contribute significantly to the overall benefits of the scheme and the effect of these benefits outweigh the additional costs that are associated with the delivery and operation of the section from St Stephen's Green to Charlemont station. Further information is available in Chapter 7: Consideration of the Alternatives, section 7.7.8 MetroLink Southern Terminus Location.</p> |

An interchange at Charlemont is supported by policy including the Dublin City Development Plan 2022 - 2028 and the Transport Strategy for the Greater Dublin Area.</p> <p>By extending MetroLink to Charlemont it provides for future proofing of the Green Line, bypassing the capacity constrained Luas on-street running section, and ensures potential future connectivity options are enabled, either to the Green Line or for extensions of the metro.</p> <p>The Charlemont Station interchange provides for increased passenger utilisation of the MetroLink system, thereby increasing the benefits delivered by the Project, reflected by an improved Project Benefit Cost Ration (BCR).</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| 3                                      | Letter       | 1        | St. Stephens Green is the most appropriate location as it provides for interchange with bus, Luas and future DART underground. The project incorrectly dismisses St. Stephens Green West as an appropriate terminal station. It only considers St. Stephens Green East and Charlemont. Furthermore, no comprehensive study or investigation has been completed by NTA/TII as part of the entire Metrolink project on the optimal location for a city-centre terminus. | <p>TII do not agree that St Stephen's Green is the most appropriate interchange location for the reasons set out by response (2) above.</p> <p>It is not correct to say that the Project "only considers St. Stephens Green East and Charlemont." A number of route options were considered in the process of identifying the Emerging Preferred Route (EPR). These route options included potential station locations on St. Stephen’s Green West.</p> <p>St. Stephen's Green West was ruled out as the alignment between the proposed Tara Station and a station on St Stephen’s Green West would result in an undesirable horizontal reverse curve and an alignment greater than a 1000m long that would necessitate an intermediate intervention shaft located somewhere between these stations to comply with the MetroLink Fire Strategy. Further, as a potential station location, St Stephen’s Green West itself is a very constrained location due to the presence of buildings, Luas and St Stephen’s Green Park. Maintaining the Luas operational during station construction would be complex and challenging with significant disruption expected, whilst the impacts on St Stephen’s Green Park would be greater for a station in this location compared to the proposed location on St Stephen’s Green East. This would be the result of; the likely need to place more of the station in the Park compared to the proposed station on St Stephen’s Green East; it would impact an area of the Park that has greater amenity value than St Stephen’s Green East due to the nearby Park entrance adjacent to the southern end of Grafton Street, and there would be a risk of impacting the existing Park lake. In summary, an alignment that links the proposed Tara, St Stephen’s Green East and Charlemont stations is a more direct and economic alignment, does not require additional intervention infrastructure, avoids a complex engineering interface with the Luas Green Line, impacts the Park less and has less potential for disruption during the construction phase.</p> <p>As outlined by EIAR Chapter 3, Background to the MetroLink Project, one of the key objectives of the Project is the integration of it with the wider transport network that also includes for BusConnects and DART+ which are all included under Project Ireland 2040 and the GDA Transport Strategy 2022-2042 (section 12.3.2). Together, these projects will result in a reliable, sustainable, affordable, integrated public transport network that will support the economy, help Ireland meet its climate change targets in line with Climate Action Plan 2023 and make Dublin a more liveable and sustainable city.</p> <p>The submission is being argued argues that Charlemont station effectively becomes a terminus station in the short to medium term. The implication is that the activities normally associated with a terminus are incompatible with the proper planning and sustainable development of this location, in particular, travel to and from the location by car at the start and end of journeys.</p> |

| Re: Various Submissions as noted above |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| 3                                      | Letter       | 1        | Response (3) continued                                                                                                                                                                                                                                                                                                                                                                                                                                                               | <p>In this regard, it is true to say that the Metrolink trains will terminate and turn back at Charlemont station, However, Charlemont Station does not have the associated infrastructure and services associated with a terminus location and in fact has more in common with a “system turn back location”. Charlemont Station is located within an area of high public transport accessibility, linking with the Luas Green Line which offers reasonably similar levels of services and frequency for journeys to and from the south of Dublin. As such, public transport service offering is not considered to terminate, but transfers onto the similar service offered by the Luas Green Line, forming part of a transport corridor running from Cherrywood to Estuary. The associated environmental impacts for the turnback and station at Charlemont have been fully assessed in the EIAR. Additionally, there is a strong level of interchange offered throughout the corridor at locations such as Glasnevin, O'Connell Street, Tara Street and St Stephen's Green, where many journeys on the MetroLink will 'terminate'.</p> <p>The terminus station for MetroLink is located at Estuary where all of the activities normally associated with a terminus take place.</p> <p>Charlemont station itself was chosen on the basis of its interchange potential with Luas, as well as local bus services, as outlined above. The section of the line between St Stephen's Green and Charlemont generates considerable benefits for the scheme in terms of increased patronage. As noted in response item (2), during the morning peak, at Charlemont station the flows include 1,800 passengers alighting, 2,300 boarding and 1,229 passengers alighting, 2,276 boarding during the evening peak. The fact that the Charlemont Station is now being referred to and considered as a “terminus station” rather than an interchange station, does not change the environmental impacts the station has on its local environment, in terms of passenger demand, airborne noise. vibration and other environmental effects.</p> <p>If the scheme were to terminate at St Stephen’s Green, it would be inconsistent with the GDA Transport Strategy 2022-2042 to locate the terminus at Charlemont.</p> |
| 4                                      | Letter       | 1        | 2. Expensive Duplication of Rail infrastructure: - The inclusion of an expensive and costly section between St. Stephens Green and Charlemont is strategically weak and duplicates the existing Luas Green Line services. NTA’s cost estimate for this 1km section at €650M is an expensive duplication and significant investment that deprives other parts of Dublin that are in immediate need of rail infrastructure to support urgently required housing and urban development. | <p>The Board is not responsible for any decisions in relation to the funding the Project. It is solely responsible for assessing whether the Project is consistent with proper planning and sustainable development and that its effects on the environment are acceptable.</p> <p>The responsibility for funding the Project lies with the NTA, the Government and ultimately the Oireachtas. It has received all necessary approvals, including under the Public Spending Code for the making of a Railway Order. It will undergo further scrutiny and approvals, including under the Public Spending Code, before it is funded. It is not appropriate for the Board to make findings in relation to value-for-money that are outside its statutory functions and would cut across those arrangements. Members of the public are entitled to make representations to their TDs in relation to the value-for-money of any element of the Project.</p> <p>In any case, TII do not agree with this statement for the reasons set out by response (2) above, noting that infrastructure is not being duplicated given the capacity of the Luas south from St. Stephen's Green is restricted due to on-street running.</p> <p>There is a limit to the potential of the Luas to provide additional capacity in the on-street non-segregated section of the Luas Green Line from Charlemont northwards through the city centre. The nature of this route and the fact that it currently crosses several road junctions (Adelaide Road, Harcourt Street / Hatch Street upper and Harcourt Street / St Stephen's Green south) limit the service to a maximum of 24 trams per hour per direction. The projected demand for this section would require a higher frequency of up to 30 trams per hour and this demand cannot be met with on-street systems (Luas / bus). The interchange between Luas and MetroLink proposed at Charlemont will provide the necessary capacity to address the demand on this corridor and reduce overall travel time for passengers.</p>                                                                                                                                                                                                                                              |

|                                        |              |          | Response (4) continued                                                                                                                                                                                                                                                                                                                                                                       | <p>There is also high passenger demand forecast for a Metrolink station at Charlemont, including from the Ranelagh area, which would be lost if St. Stephen's Green was the MetroLink southern interchange station. The additional fare revenues collected by the Charlemont Station interchange increase the benefits delivered by the Project, reflected by an improved Project Benefit Cost Ration (BCR).</p> <p>Further, to ensure that public investment delivers value for money, the Public Spending Code sets out requirements for the evaluation, planning and management of public investment. The preparation of a Business Case is a key element of meeting these requirements. The Public Spending Code requires that both the Preliminary Business Case and Final Business Case for public investment projects are published.</p> <p>In July 2022, the Government granted Approval in Principle to the NTA to enable the submission of a railway order application by TII to An Bord Pleanála in respect of the MetroLink project (Decision Gate 1). This approval was granted after the Preliminary Business Case (PBC) had undergone significant scrutiny and challenge by bodies that are independent of TII, including DoT and DPER review (including independent review by JASPERS and the Major Projects Advisory Group (MPAG)) of the PBC around timeline, costs and benefits that were updated to inform the Government decision.</p> |
| 5                                      | Letter       | 1        | 3. The station box at Charlemont, as constructed in 2021/22 by the Developer Hines, does not have the benefit of planning permission and has not been part of the EIA undertaken for this project. Processing the current Railway Order application, which is reliant on these preliminary and now constructed works, is legally unsafe and contravenes the provisions of the EIA Directive. | The MetroLink enabling works constructed as part of the Hines development was included in the planning application for the Hines Development and has the benefit of planning permission which was granted in April 2019.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

| Re: Various Submissions as noted above |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| 6                                      | Letter       | 1        | <p>4. The station box at Charlemont will result in only one possible future tie in with the Luas Green Line to the south, which would result in an option that was previously dismissed as part of the Tie-In study from March 2017. No alternatives to the station box at Charlemont were considered as it had been fixed through the design of the overhead Hines Grand Parade commercial development.</p> <p>The implications of this new alignment is very significant on our wider community as it will involve top-down construction that will only be possible when many houses on Manders Terrace, Oakley Road and Charleston Road are demolished.</p> | <p>The station box at Charlemont allows for a future tie into the Luas Green Line should it be determined in the future that through running metro services to Sandyford is the required solution to address the public transport needs to the south of the city. It is incorrect to say that the current proposal is based on an option that was previously dismissed as part of the March 2017 Green Line tie in study. The station design is in affect a modification to the preferred Green Line Tie Option 4B which was modified as result of the decision not to proceed with the upgrade of the Green Line to metro standard.</p> <p>The station box location was not fixed by the Charlemont Development. The preferred route for MetroLink was published in March 2019 following a comprehensive route options study. The preferred route was based on the emerging preferred route for the scheme which included a station at Charlemont. The Charlemont Metro Enabling Works were constructed to enable the Charlemont Development to proceed whilst simultaneously ensuring there was an option available to construct a station at Charlemont that avoided unnecessary demolition, took advantage of an available site, provided infrastructure that is integrated with planned development rather than necessitating later changes and retrospective adjustments to a new development or even possible demolition of the new development, whilst providing protected provision for the future extension of the scheme south, if required.</p> <p>It is also important to recognise that the station location at Charlemont is influenced by available vacant land and thus avoids unnecessary demolition.</p> <p>The submission seeks to portray the construction of the Metro Enabling Works as prejudicial to future decisions on proper planning and sustainable development of the area. It implies that the counterfactual would have had no effect on such decisions. That is not the case. There was a planning conflict between the EPR and the Grand Parade Development at the time the latter development was proposed. There was no resolution to that conflict that was free of implications for future decisions on the proper planning and sustainable development of the area. The Board could have refused permission for the Grand Parade Development, inevitably creating a underutilised and potentially vacant and idle site in a commercial hub location. The Board could have granted permission with no provision to facilitate a station at this location, resulting in a requirement for the railway order to provide for the demolition of a new office building. The Board's actual decision was reasonable and lawful in seeking to minimise the prejudice to an important office development and a critical piece of national infrastructure. It was also not particularly restrictive of future decisions in relation to the proper planning and sustainable development of the area. Of the three options open at the date of the Grand Parade planning application, two remain open: the Board can still require changes to the station design that require the demolition of the commercial building and it can grant an order that avoids demolition by using the Metro Enabling Works.</p> |

| Re: Various Submissions as noted above |              |          |                                                                                                                                                                                                                                                                                                                                                                                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
|                                        |              |          | Response (6) continued.                                                                                                                                                                                                                                                                                                                                                                 | <p>It is agreed that the short-term implications for local residents will be significant as the scheme progresses through the construction stage, however the EIAR assesses the environmental impacts of the construction phase and commits to the implementation of appropriate mitigation measures that reduce the environmental impacts to not significant. The same is true of the operations phase for the project. TII will work closely with local residents to ensure the required mitigation measures are put in place.</p> <p>If in the future, the metro was extended south, this does not mean that inevitably open cut construction will be required or demolition of property will be necessary. In designing an extension, the promoter will seek to reduce the requirement for demolition by looking for tunnel launch sites at the southern extent of the scheme and, if one can be identified, driving the Tunnel Boring Machine northwards ultimately connecting into the existing tunnel. In that case, even if the new alignment were under the properties identified in the submission, the tunnel underneath them would be constructed by the Tunnel Boring Machine without the need for above ground works.</p> |
| 7                                      | Letter       | 2        | 5. The Environmental Impact Assessment is inadequate in relation the description of development, alternatives, transport assessment, noise and the cumulative effects of the development on the Charlemont-Dartmouth Community. For a project of this size, scale, investment to date, it is inadequate to propose a Railway Order with so many important studies and analysis missing. | <p>TII do not agree that the Environmental Impact Assessment is deficient, inadequate or missing information. The Railway Order application comprises a very detailed environmental impact assessment that has identified and assessed the potential environmental impacts of MetroLink and proposed mitigations for these impacts where necessary. TII would also draw attention to the detailed project description, construction phase description and operational phase description provided in EIAR Chapters 4 and 5 and 6, and EIAR Chapter 7 and associated appendices that present details of alternatives considered. EIAR Chapter 9 and appendices provides a detailed analysis of transport and traffic effects, and EIAR Chapters 13 Airborne Noise &amp; Vibration, and 14 Groundborne Noise &amp; Vibration provide a detailed assessment of potential noise and vibration effects, while Chapter 29 outlines the assessment of interactions between various environmental aspects, and Chapter 30 covers the cumulative impacts with other projects. This assessment is carried out for the full length of the alignment including relative to potential significant effects on the Charlemont-Dartmouth Community.</p>  |

| Re: Various Submissions as noted above |              |          |                                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| 8                                      | Letter       | 2        | 6. The development would result in noise and disturbance during the construction and operational phases and would result in a loss of amenities for the area. | <p>The EIAR presents a comprehensive and detailed assessment of both groundborne and airborne noise and vibration in Chapter 13 and 14 of the EIAR. The assessments include for predictive modelling in order to identify the potential impacts on all sensitive receptors during both the construction phase and the operational phase.</p> <p><b>Noise and disturbance during construction:</b></p> <p>No profound impacts have been identified for residents and mitigation measures proposed will be effective at reducing the impacts on these properties and in general terms impacts will be associated with the construction phase only. Significant mitigation is proposed to include 4m high noise barriers and further proposed mitigation in line with the Airborne and Groundborne Noise Mitigation Policy. On the implementation of these measures the residual impacts are predicted to be moderate. However, as outlined in Transport Infrastructure Ireland (TII) Airborne and Groundborne Noise Mitigation Policy (Appendix A14.6) there is a process in place whereby further mitigation measures can be implemented at individual properties should this be merited.</p> <p><b>Noise and disturbance during operation:</b></p> <p>No residual noise impacts are identified at this location during operation. The calculated rail noise levels across the proposed Project are not significant in terms of any widespread community disturbance and results in a not significant to slight impact when added to the prevailing noise environment.</p> <p><b>Loss of amenity during construction:</b></p> <p>EIAR Chapter 11, Population &amp; Land Use provides an assessment of effects on community amenity during construction and operation, which relates to the interaction of impacts on air quality; visual amenity; traffic and transport; and noise and vibration.</p> <p>At this location during construction as outlined in Section 11.5.2 of Chapter 11, no impacts are identified on the retail sector or community and social infrastructure (e.g. schools or hospitals). Any severance/disruption to transport will be limited by site mitigation measures such as alternative routes reducing impacts to not significant.</p> <p><b>Loss of amenity during operation:</b></p> <p>No significant residual negative impacts are anticipated on the Population and Land Use from the operation of the proposed Project, following the incorporation of the mitigation measures into the design of the proposed Project and implementation on an ongoing basis throughout the lifecycle. The residual effects that will arise during operation will be permanent and positive as detailed in EIAR Chapter 11, section 11.1.1.</p> <p>The zoning under the Dublin City Development Plan 2022 - 2027 for the residential properties in question is "Z2 Residential Neighbourhoods (Conservation Areas)" with an objective to "protect them from unsuitable new developments or works that would have a negative impact on the amenity or architectural quality of the area (See Table 3.11 of the submitted Planning Report). As outlined in Section 4.5.18.6 of the Planning Report, the element of the Project within the Z2 zoning area will affect a below ground area only and as such will not compromise the land use objective for the lands overhead. The majority of the proposed Charlemont Station and all above ground elements are located within the lands zoned Z5 with the objective “To provide for the creation and protection of enterprise and facilitate opportunities for employment creation”. The Station has been designed so that it is integrated with the proposed redevelopment of this site by a third party development, and as such, demonstrates that the proposed Project is consistent with the zoning objective. The MetroLink station design does not result in any segregation of the area, with no surface barriers or walls proposed.</p> <p>See below in relation to the submission that the Traffic Study for Charlemont is inadequate because it omitted the impact of airport users from south Dublin travelling to this location.</p> |

| Re: Various Submissions as noted above |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| 9                                      | Letter       | 2        | <p>The Traffic Study for the local Charlemont area is wholly inadequate as it omitted the modelling of the impact of Airport users coming to the only Dublin South Metrolink station at Charlemont. The Traffic Study uses a strategic, generalised regional model that does not take local factors into account.</p> <p>Extract from observation 7) - The EIA did not properly assess the impact of additional local traffic volumes, rather they used a generalised regional model that does not take local factors into account. A key local factor at a Terminus station in Charlemont that runs to the Airport is the huge volume of anticipated airport users from Dublin South and greater Dublin/Leinster that will come to Charlemont via car or taxi with baggage for onward destination to the airport. Grand Parade and the residential area around Charlemont-Dartmouth cannot sustain the significant additional traffic volumes associated with this development.</p> | <p>The MetroLink forms part of an integrated public transport network. The system is designed in an integrated manner so that people travelling from the area south of Dublin to access locations north of Charlemont, such as Dublin Airport, Mater, Swords etc. will utilise public transport to interchange with the MetroLink, or will walk or cycle to access their local station. The system is not designed to encourage people to drive to stations within the City and TII actively discourage people from doing so other than the Park &amp; Ride station at Estuary. TII therefore do not agree with the observation that there will be a “huge volume of anticipated airport users from Dublin South and greater Dublin/Leinster that will come to Charlemont via car or taxi with luggage for onward destination to the airport” as this is not borne out by our transport analysis.</p> <p>The Transport Assessment for MetroLink includes for people travelling to/from Dublin Airport from all areas within the extents of the GDA area, therefore it is incorrect to say "The Traffic Study for the local Charlemont area is wholly inadequate as it omitted the modelling of the impact of Airport users coming to the only Dublin South Metrolink station at Charlemont”.</p> <p>The NTA's Eastern regional Model (ERM) incorporates a wide range of data sources, including demographic data, land use data, transportation network data, and travel survey data. The system is designed to model a variety of transportation modes, including private vehicles, public transit, walking, and cycling, and to simulate the interactions between these modes. The ERM model has been validated and calibrated using a range of localised data sources to ensure that the model can accurately represent the transport network, these include public transport and vehicle counts from the canal cordon counts. The outputs from the model have been combined with local survey data to undertake the more localised modelling, such as the pedestrian impact assessments, or the local traffic signals. This does not support the observations made “The Traffic Study uses a strategic, generalised regional model that does not take local factors into account.” or “The EIA did not properly assess the impact of additional local traffic volumes, rather they used a generalised regional model that does not take local factors into account.”</p> <p>Regards the observation there will be a "huge volume of anticipated airport users from Dublin South and greater Dublin/Leinster that will come to Charlemont via car or taxi with luggage for onward destination to the airport. Grand Parade and the residential area around Charlemont-Dartmouth cannot sustain the significant additional traffic volumes associated with this development", this is covered by response (10) below.</p> |

| Re: Various Submissions as noted above |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| 10                                     | Letter       | 2        | <p>7. The development would have an adverse impact upon traffic during the construction and operational phase, and it has not been properly designed and there is poor integration with other modes of transport. Pedestrian movements in and around the station would be difficult. Grand Parade is an already heavily congested orbital route.</p> <p>Note:-Submission No.83 from Elisabeth Vandenberghe, 22 November 2022, also makes a further observation at the end of the above paragraph "which I cycle along to get to work. This has been hazardous during the Hines construction period and will be even worse for the 8 years which it will take to build the Metrolink and then for ever after because of the traffic volumes. Therefore instead of making Dublin pedestrian and bike friendly this development will have the opposite effect".</p> | <p>MetroLink is designed to form part of an integrated public transport network with Charlemont selected as the preferred interchange location in order to maximise the potential interchange with the existing Luas Green Line. In overall terms, Charlemont Station will provide for improvements to the public transport network resulting in decreases in private car usage/trips, increases in public transport usages and will facilitate walking and cycling to the station, without significantly impacting on the operation of the road network in the area.</p> <p><b>Construction Phase:</b></p> <p>EIAR Appendix A9.5 Scheme Traffic Management Plan presents the analysis undertaken to assess the impact of the traffic management measures on the local road network surrounding the proposed Charlemont Station during the construction phase. At the local level the following parameters have been used to assess impacts on general traffic and on pedestrians:</p> <ul style="list-style-type: none"><li>• Increase in walking distance/quality of service for pedestrians (through removal of footpath, reduction of quality of service, removal of a pedestrian crossing or relocation of crossing by more than 100m);</li><li>• Increase in driver delays at junctions;</li><li>• Changes in traffic flows on surrounding streets; and,</li><li>• Additional distance travelled due to diversions.</li></ul> <p>The analysis undertaken at this location indicates that the increased volume of traffic on Grand Parade and Northbrook Road does not translate into any significant increase in driver delay. The largest increase in driver delay of 12 seconds is registered on the westbound approach on Grand Parade to the Ranelagh Road signalised junction.</p> <p>During the construction phase, pedestrians will experience a reduction in quality of pedestrian infrastructure and space. The construction site boundary will encroach upon footways in the local area, including the northern side of Dartmouth Road, and the southern side of Grand Parade. However, a temporary signalised crossing will be provided west of the Luas to maintain pedestrian access to and from the Stop. Whilst there are partial closures on Dartmouth Road and Grand Parade, pedestrian movements will be maintained on appropriately sized footways through the area.</p> <p>With particular regard to cycle safety, as part of the traffic assessment presented in EIAR Appendix A9.5 Scheme Traffic Management Plan, the impact on cycle safety has been considered. A two-stage screening assessment methodology has been adopted, ensuring that any reduction in quality of service for cyclists (by one level or more) has been captured, with remedial measures including the temporary installation of cycle ways where appropriate, to minimise the impact on cyclists. Where the existing level of service cannot be maintained in the vicinity of the construction sites, alternative routes will be designated to minimise the risk to vulnerable users. As such, the traffic management measures have been designed in line with the hierarchy of road users identified in the GDA Transport Strategy, giving highest preference to pedestrians and cyclists. Prior to implementation, all traffic management measures will be agreed with DCC, and where relevant, consultation with An Garda Síochána and other statutory stakeholders will be undertaken to ensure the safety of users.</p> |

| Re: Various Submissions as noted above |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
|                                        |              |          | (10) continued                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | <p><b>Operational Phase:</b></p> <p>A microsimulation VisWalk model has been developed for the immediate area surrounding Charlemont Station during the operational phase. The model covers the full extent of the publicly accessible station area, including the immediate vicinity of the station entrance at street level, the Luas stop and nearby junctions at Charlemont Bridge. In order to accommodate the forecast demand from the proposed Charlemont Station, a new staircase with 2.4m stair width is proposed at the south east corner of Charlemont Luas stop. An elevator will also be provided at this location. Both are sized for MetroLink to Luas, and Luas to MetroLink passenger numbers.</p> <p>In addition, it is proposed that the pedestrian crossing on R111 Grand Parade will be repositioned to the front of the building being developed by Hines. With this infrastructure in place, the model indicates that the R111 Grand Parade will have an acceptable level of service overall, with some reductions in service seen at the pedestrian crossing where pedestrians are required to wait for a green phase at the signals. Overall, it is considered that the model displays an acceptable level of network performance.</p> <p>The proposed pedestrian crossing on Grand Parade will have minimal impact on the traffic flow along Grand Parade and can be programmed to operate in sync with the existing signalised junction at Grand Parade /Charlemont Street to maintain the flow of traffic movements. When the Project is operational, car mode share will decrease, with a reduction of up to approximately 830 car tips to and from the zones surrounding Charlemont Station over the 12hr period in 2065. In overall terms, the Charlemont Station will provide for improvements to the public transport network resulting in decreases in private car usage/trips, increases in public transport usages and will facilitate walking and cycling to the station, without significantly impacting on the operation of the road network in the area.</p> <p>Furthermore, TII have deliberately designed the Station with minimum set down space (with the exception of a drop-off on Grand Parade for persons of restricted mobility only) or room for taxi ranks so that it does not encourage the Station to be used for a significant volume of car or taxi trips.</p> |
| 11                                     | Letter       | 2        | 8. The development will have an adverse impact upon property values, particularly during the construction phase. For many houses in the area there will be a long term and permanent adverse impact upon property values from noise of the operating rail infrastructure, vents, operational noise and signals, escalators, and large traffic volumes - vehicular and pedestrian using the station 19 hours per day. The adverse impact also extends to the loss of amenity for the wider community changing a residential neighbourhood into a noisy, busy, congested major transport hub. | <p>Response (8) above outlines the predicted environmental impacts with regards to noise and vibration, and amenity, while responses (9) and (10) summarise the assessed traffic and pedestrian impacts. TII would note that as explained by response (10) above that in overall terms Charlemont Station will provide for improvements to the public transport network resulting in decreases in private car usage/trips.</p> <p>TII do not agree that the development will have a long term and permanent negative affect. In fact there is strong evidence to suggest that property values will in fact increase in close proximity to public transport infrastructure and that local residents will greatly benefit from having a world class metro system providing access to the city centre, airport and north city at their door step.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| 12                                     | Letter       | 2        | <p>Accordingly, we are requesting the following amendments of An Bord Pleanála:</p> <p>1. Omit from the Railway Order the section from Tara Street Station to Charlemont Station and associated onward tunnel extension and intervention tunnel.</p> <p>2. Require the submission of a Railway Order for a section from Tara Street Station to St Stephens Green which would effectively provide for a terminal hub station that can integrate with the Luas Green Line, multiple bus routes and future DART underground.</p>                                                               | <p>The above responses to the observations made explain why TII do not consider it is correct or appropriate that the MetroLink alignment south of the proposed Tara Station should be omitted, and also demonstrates why the proposed Charlemont Station has been selected by TII as the preferred interchange with the Luas Green Line.</p> <p>A scheme which terminates at Tara Street would not be consistent with the Transport Strategy for Greater Dublin Area (2022-2042) and would be a material contravention of the Dublin City Development Plan 2022-2027. In addition, any decision to terminate the scheme at Tara will significantly impact on the overall viability and benefits of scheme.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

| 1                                                                                                                                                    | General Objection                                     | 1        | We [act on behalf of the above clients who] have been served with notice of the making of the above Railway Order Application. Having reviewed the drawings and documentation accompanying same, we [our clients have instructed us to] object to the confirmation of the Metrolink Railway Order Application and all of the supporting documentation to include the proposal Railway Works and Land Requirements, the Book of Reference, the EIAR and the Natura Impact Statement on the following grounds: | TII wish to thank you for your submission and provide the following comments in response to the matters raised.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| 2                                                                                                                                                    | 1. Project Need                                       | 1        | As currently designed, this project is excessive and is leading to a significant overspending versus alternatives. The requirement in relation to increased use of public transport could be met in alternatives ways that would have been much less costly and at the end of the day, would have been better than the Metrolink as it is currently proposed.                                                                                                                                                | <p>TII disagree and have demonstrated the benefits in both the EIAR and the approved business case for the proposed MetroLink Project.</p> <p>Chapter 03 (Background to the MetroLink Project) details the overall need for the Project, and how MetroLink will address a number of current challenges, including compact growth, sustainable mobility, enhanced regional connectivity, quality international connectivity, transition to a low carbon and climate-resilient society, enhanced amenity and heritage, maximising sustainability gains, strong economy supported by enterprise innovation and skills, access to quality childcare, education and health services, and strengthened rural economies and communities.</p> <p>Chapter 07 (Consideration of Alternatives) presents the decision-making process that has led to the development of the proposed Project, including the consideration of alternative transport options. The options assessed included for heavy rail, light rail, Bus Rapid Transit (BRT) options in addition to combination options. The short-listed options were subject to assessment by way of a Multi-Criteria Analysis (MCA) having regard to Environment, Economy, Safety, accessibility and Social Inclusion and Integration.</p> <p>The assessment, presented in section 7.3.2 of Chapter 7 (Consideration of Alternatives) identified an Optimised Metro North as the best medium-and long-term transport project for the Greater Dublin Area for the following reasons:</p> <ul style="list-style-type: none"><li>* It was the most economically advantageous scheme when compared to other options, delivering the highest benefit to cost ratio (BCR) of 1.5, almost double the BCR of the next best scheme (tunnelled Luas);</li><li>* It generated the highest level of transport benefits when compared to other options, with the highest number of additional public transport trips generated in the morning peak travel period;</li><li>* It provided a new strategic public transport corridor, avoiding reliance on either the existing heavy rail lines or the Luas Cross City line;</li><li>* It delivered a connection right into the centre of the city, serving O'Connell Street and St. Stephen's Green;</li><li>* It retained the opportunity to extend Luas Cross-City to Finglas, which would not be feasible if the tunnelled Luas options were selected, and it avoided reducing the service level on Luas Cross City to Cabra and Broombridge;</li><li>* Due to the high level of segregation, it was considered to significantly increase capacity to allow for potential future growth along the corridor, when compared to other options;</li><li>* It could potentially extend southwards in the longer term to alleviate high travel demand on the Luas Green Line and ultimately form a compete north south metro corridor traversing both the north and south city; and,</li><li>* This option delivered the highest safety benefits when compared to other options.</li></ul> <p>The business case for the Project has been Approved in Principle by Government in line with the Public Spending Code, based on economic and financial appraisals undertaken in a range of scenarios. The assessment finds that MetroLink is a very positive investment for the people of Ireland, in the country's journey to a low carbon and more sustainable transport network. TII as the Government Agency responsible for delivering MetroLink, are committed to expediting the delivery of this transformative project on receipt of an Enforceable Railway Order, to ensure the benefits of MetroLink can be realised as soon as possible.</p> |
| 3                                                                                                                                                    | 2. Economic Analysis of Metrolink Versus Alternatives | 1        | The projected total budget cost of the Metrolink Project is extremely high versus other infrastructure capital projects. Analysis is showing that alternatives would have been able to deliver a similar or higher overall benefit and at a lower cost. Therefore, the economic cost benefit analysis on the Metrolink Project should mean that the project should not be progressed in its current form.                                                                                                    | Please refer to response (2) above in relation to the consideration of alternatives, the reasons that the Proposed Project was selected as the preferred option, and the economic assessments undertaken.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |  |
| 4                                                                                                                                                    | 3. Route Selection                                | 1        | Even if one assumed that the Metrolink project was needed and it did stand up to economic analysis, the route chosen is flawed. Better alternative routes were available to the Designers.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | <p>MetroLink is needed and the economic analysis has been reviewed and approved.</p> <p>Chapter 07 (Consideration of Alternatives) presents the decision-making process that has led to the development of the proposed Project, including the route selection process. The NTA and TII commissioned an Alignment Options Study to determine the Emerging Preferred Route (EPR) for New Metro North proposed in the Transport Strategy for the GDA. The New Metro North Alignment Options Report (TII, 2018), and all relevant appendices can be reviewed at <a href="http://www.metrolink.ie">www.metrolink.ie</a>.</p> <p>The study area was based around a corridor from Swords to Dublin City Centre via Dublin Airport, in line with the Project's objective as identified in the Transport Strategy for the GDA 2016-2035. The overall study area was broken into three sections, with a number of station location options proposed within. Based on the conclusions of the multi criteria analysis, Option 9 was recommended as the Emerging Preferred Route for New Metro North for the following primary reasons: (Full details of this analysis are presented in section 7.6 of Chapter 7 (Consideration of Alternatives)).</p> <ul style="list-style-type: none"><li>* In terms of Economy, it delivers substantially more benefits than most of the options resulting in the joint highest BCR;</li><li>* It performs among the best in terms of public transport usage i.e. boardings over 24 hours;</li><li>* It integrates better with the wider transport network with better potential for seamless interchange with other modes, particularly heavy rail in the city centre and bus in Swords, than other options considered;</li><li>* It integrates better with current Land Use Policy particularly in Ballymun and Swords; and</li><li>* In terms of Environment, while there are some impacts in terms of Landscape and Visual and Archaeology, Architecture and Cultural Heritage, these impacts can largely be mitigated.</li></ul> <p>Submissions made by stakeholders and the public during the Public Consultation in 2018 on the EPR were carefully analysed. Taken together with other proposed route alignment and design improvements, design responses to consultation submissions have resulted in a number of changes to the EPR leading to a Preferred Route, including alterations to the alignment which led to alternative station locations:</p> <ul style="list-style-type: none"><li>* Realignment of the EPR at Lissenhall;</li><li>* Realignment of the EPR along the R132 Swords Bypass through Swords;</li><li>* Realignment of the EPR over the M50 Motorway and to Ballymun;</li><li>* Realignment of the EPR at O'Connell Street Station; and,</li><li>* Alignment under Trinity College Dublin (TCD).</li></ul> <p>Chapter 07 also provides an outline on a station-by-station basis of alternative station locations, layout or design changes. For full details of the analysis undertaken, please refer to the MetroLink Preferred Route Design Development Report (TII, 2019), available at <a href="http://www.metrolink.ie">www.metrolink.ie</a>.</p> |  |
| 5                                                                                                                                                    | 4. Mitigation of Impacts on the Human Environment | 1 and 2  | <p>In the case of the College Gate Apartment Complex the proposed impact mitigations put forward by the Acquiring Authority are seriously flawed and inadequate. The common areas of the complex and the overall College Gate property has been severely blighted since the route for the Metrolink project was decided and it was clear that the College Gate Complex was within the preferred route for the scheme and would have to be demolished should the scheme proceed on foot of a Railway Order as submitted. It was open to the Acquiring Authority to step forward at that stage and immediately offer to fully deal comprehensively with all of the individual owners in the complex and the Owners Management Company with a comprehensive suite of measures. These would include an offer of adequate full compensation to each owner and other measures such as immediate advance payments to the Owners Management Company to upkeep the common areas. It would have been open to owners to sell at that stage to the Acquiring Authority, if they so choose.</p> <p>This has not been forthcoming from the Acquiring Authority and the complex has remained blighted and the lives of the owners severely impacted since the route for the Metrolink was chosen. Contrary to what has been stated publicly, there is nothing in law to stop the Acquiring Authority in this case doing the right thing, that being to have stepped in immediately and dealt comprehensively with a suite of measures for the College Gate Complex including a full purchase offer for owners wishing to sell and move on with their lives.</p> <p>The early negotiations optional proposal put forward by the TII is a totally unsatisfactory proposal and is deeply flawed in many respects. It is not an adequate mitigation offer. Mitigation is critical in relation to all impacts of a scheme.</p> | <p>TII understands and acknowledges the importance for residential property owners to be able to plan their affairs with as much notice and certainty as possible. As part of our Land Acquisition Strategy, detailed in section 21.6.1.3 of Chapter 21 (Land Take), TII has introduced a discretionary scheme to encourage early engagement. Our intention is to enter into a pre-agreement with residential property owners to agree a baseline apartment price and other matters of compensation, which will be payable under the compensation code. This will be determined at an early date and provides a commitment from TII to agree terms, ahead of the statutory process, locking in a baseline apartment price, with an agreement to apply an index to reflect any future uplift. The scheme will accelerate the acquisition process following an enforceable Railway Order avoiding the potential for negotiations to be drawn out. TII advocates that residential property owners are professionally advised and as part of the process have agreed to meet all reasonable professional fees and costs in relation to the negotiation and settlement of the apartment owners legal interest. The scheme does not prejudice property owners nor are they obligated to participate. Residential property owners will continue to be responsible for discharging all contractual obligations under the terms of their long leasehold interest until the acquisition of their property interest has been completed. TII have appointed external property consultants to assist them with the implementation of the discretionary scheme. This also ensures that engagement with residential property owners continues and concerns can be addressed where practicable. Further details on TII's Land Acquisition Strategy can be viewed on the Your Property section of the MetroLink website together with a Compulsory Purchase Order (CPO) Guideline FAQ document <a href="https://www.metrolink.ie">https://www.metrolink.ie</a>.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |  |

| 6                                                                                                                                                    | 5. Time Frames and Funding | 2        | There is a lack of clarity with regard to time frames and funding for the Metrolink Project. There is no clarity with regard to the approval process and how long this will take. While this is ongoing, the severe blight on the College Gate Complex will continue and the hardship placed on the owners and the Owners Management Company will continue. This is wrong. | <p>TII as the Government Agency responsible for delivering MetroLink, are committed to expediting the delivery of this transformative project on receipt of an Enforceable Railway Order. Upon approval, the construction phase is anticipated to last approximately 9 years, with the MetroLink planned to be operational in 2035.</p> <p>In July 2022, the Government granted Approval in Principle to the NTA to enable the submission of a railway order application by TII to An Bord Pleanála in respect of the MetroLink project (Decision Gate 1). This approval was granted after the Preliminary Business Case (PBC) had undergone significant scrutiny and challenge by bodies that are independent of TII, including DoT and DPER review (including independent review by JASPERS and the Major Projects Advisory Group (MPAG)) of the PBC around timeline, costs and benefits that were updated to inform the Government decision.</p> <p>There is also an opportunity for The Board and parties who made submissions during the statutory consultation process to question TII and its specialists. Following this process, and based on information available to The Board, they will make a decision on the application.</p> <p>An Bord Pleanála have stated that an Oral Hearing will be held for MetroLink.</p> |  |
| 7                                                                                                                                                    | 6. Oral Hearing            | 2        | All of the points raised above can be fully addressed at an Oral Hearing which we request be held in relation to the Metrolink project. The above is only a basic outline of some of the points that are relevant to our clients and these points will be further elaborated on and additional points raised at the Oral Hearing, as more information becomes available.   | <p>Please refer to response item (6) above in relation to the Oral Hearing process. Further information is available at <a href="http://www.pleanala.ie/en-ie/oral-hearings">www.pleanala.ie/en-ie/oral-hearings</a></p> <p>An Bord Pleanála have confirmed that an Oral Hearing will be held for MetroLink.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |  |
| 8                                                                                                                                                    | 7. Capital Gains Tax       | 2        | The Principle of Equivalence is being severely breached in the case of apartment owners who are investors and not in occupation. This is due to the anomaly of Capital Gains Tax being payable on compensation. The Acquiring Authority are aware of this matter but have not resolved it.                                                                                 | <p>Where an entitlement to statutory compensation exists, each claim will be assessed on its own merits. The assessment of compensation and relevant heads of claim are derived from a combination of statute, case law and established practices which are referred to as the compensation code. There needs to be casual connection between the loss and the acquisition due to the scheme, which should not be remote. Claimants are expected to take reasonable steps to mitigate their loss and cannot claim any unavoidable losses. Experienced professionals should advise on the relevant heads of claim which commonly include the following: (i) value of legal interest in land e.g. freehold or leasehold (ii) severance or other injurious affection which relates to the devaluation of the retained lands (iii) disturbance and other matters including professional fees and losses sustained or expenses incurred by an owner as a result of the acquisition of land.</p>                                                                                                                                                                                                                                                                                                                                        |  |
| 9                                                                                                                                                    | Closing Objection          | 2        | We reserve the right to include other grounds of objection and to elaborate on the above listed grounds of objection and to tender these at the An Board Pleanála Oral Hearing which we request be held.                                                                                                                                                                   | <p>Please refer to response item (6) and (7) above in relation to the Oral Hearing process.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |  |

|                                                                                                                              |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                   |

| Re: Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022. Case Reference Number NA29N.314724. 14 Jan 2023 |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                   |
| 1                                                                                                                            | Letter       | 1        | I am fully supportive of the development and implementation of a Metrolink project to connect the city centre and various existing transport routes to Dublin Airport. It is an essential component of a sustainable, efficient, lower-carbon transport infrastructure in the future. At the same time, we have reviewed the reports, proposals and supporting evidence and are firmly opposed to the siting of the terminus at Charlemont. | Thank you for taking the time to make a submission and your overall endorsement of the MetroLink Project with the exception of Charlemont Station. We have reviewed your submission and responded to the observations made below. |

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| Re: Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022. Case Reference Number NA29N.314724. 14 Jan 2023 |              |          |                                                                                                                                                                                                                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| 2                                                                                                                            | Letter       | 1        | 1. Charlemont is the incorrect strategic location for a Terminus hub and spoke system as it is too far out along the Luas Green Line spoke and would prejudice future options for integration of networks and services. | <p>TII do not agree that Charlemont is the incorrect location for an interchange with the Luas Green Line or that it prejudices future options for integration with the wider transport network for the reasons set out below.</p> <p>The Board is required to have regard to the likely consequences for proper planning and sustainable development in the area in which it is proposed to carry out railway works (section 43(1) of the 2001 Act) and as such the following matters are relevant.</p> <p>The connection from St Stephens Green to Charlemont / Ranelagh is supported by the current Transport Strategy for Greater Dublin Area (2022-2042). The Transport Strategies were was prepared by the National Transport Authority, scrutinised by the Joint Oireachtas Committee on Transport and approved by the Minister for Transport. It notes in section 12.3.2, "Charlemont offers the optimal location for the primary interchange with the Green Line in response to growing demand in the longer term and is an appropriate location to facilitate any potential future metro extensions to serve the south west, south or south east of the city region should sufficient demand arise."</p> <p>The Transport Strategy is "a consideration material to the proper planning and sustainable development of the area or areas in question." Development Plans are required to be consistent with the Transport Strategy. The Dublin City Development Plan 2022-2028 envisages this station at Charlemon in policy SMT22 "To support the expeditious delivery of key sustainable transport projects so as to provide an integrated public transport network with efficient interchange between transport modes, serving the existing and future needs of the city and region and to support the integration of existing public transport infrastructure with other transport modes. In particular the following projects subject to environmental requirements and appropriate planning consents being obtained: ... MetroLink from Charlemont to Swords".</p> <p>Accordingly, the location of the Charlemont station was a strategic decision made at the highest levels of transport and land use planning and such is fully consistent with the proper planning and sustainable development of the area.</p> <p>The current Transport Strategy considers a range of options for the onward extension of MetroLink to meet the demand for travel over the period of the strategy. This includes consideration of the need for the upgrade of the Luas Green Line to metro with a metro extension to Dublin south west, south or south east. Whilst the strategy envisages that further extensions will be delivered after 2042, MetroLink which terminates at Charlemont allows for the possible extension of the metro in all any of the above directions.</p> <p>The proximity of the metro to the Luas line at Charlemont provides for a positive customer experience for all users with short interchange distance and due to the proximity, clear wayfinding and high visibility of the interchange. The interchange arrangements at Charlemont provide for significantly better interchange arrangements compared to an interchange at St Stephen's Green Station.</p> <p>The detailed analysis done for the Railway Order application further confirms that the section of MetroLink route between St Stephen's Green and Charlemont Stations contributes significantly to the overall benefits of the scheme. It serves a significant area of the south city of Dublin and offers enhanced access from the local area to the city centre and a direct connection to Dublin Airport. It serves key trip attractors including residential areas and offices / workplace locations, with high passenger boarding and alighting figures in the peak hours. During the morning peak, at Charlemont station the flows include 1,800 passengers alighting, 2,300 boarding and 1,229 passengers alighting, 2,276 boarding during the evening peak. The passenger numbers contribute significantly to the overall benefits of the scheme and the effect of these benefits outweigh the additional costs that are associated with the delivery and operation of the section from St Stephen's Green to Charlemont station.</p> <p>The location of the interchange at Charlemont does not preclude onward extension south. An interchange at Charlemont is supported by policy including the Dublin City Development Plan 2022 - 2028 and the Transport Strategy for the Greater Dublin Area.</p> <p>By extending MetroLink to Charlemont it provides for future proofing of the Green Line, bypassing the capacity constrained Luas on-street running section, and ensures potential future connectivity options are enabled, either to the Green Line or for extensions of the metro.</p> <p>The Charlemont Station interchange provides for increased passenger utilisation of the MetroLink system, thereby increasing the benefits delivered by the Project, reflected by an improved Project Benefit Cost Ration (BCR).</p> |

| Re: Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022. Case Reference Number NA29N.314724. 14 Jan 2023 |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |  |
| 3                                                                                                                            | Letter       | 1        | St. Stephens Green is the most appropriate location as it provides for interchange with bus, Luas and future DART underground. The project incorrectly dismisses St. Stephens Green West as an appropriate terminal station. It only considers St. Stephens Green East and Charlemont. Furthermore, no comprehensive study or investigation has been completed by NTA/TII as part of the entire Metrolink project on the optimal location for a city-centre terminus. | <p>TII do not agree that St Stephen's Green is the most appropriate interchange location for the reasons set out by response (2) above.</p> <p>It is not correct to say that the Project "only considers St. Stephens Green East and Charlemont." A number of route options were considered in the process of identifying the Emerging Preferred Route (EPR). These route options included potential station locations on St. Stephen's Green West, ruled out as an alignment between the proposed Tara Station and a station on St Stephen's Green West would result in an undesirable horizontal reverse curve and an alignment greater than a 1000m long that would necessitate an intermediate intervention shaft located somewhere between these stations to comply with the MetroLink Fire Strategy.</p> <p>As outlined by EIAR Chapter 3, Background to the MetroLink Project, one of the key objectives of the Project is the integration of it with the wider transport network that also includes for BusConnects and DART+ which are all included under Project Ireland 2040 and the GDA Transport Strategy 2022-2042 (section 12.3.2). Together, these projects will result in a reliable, sustainable, affordable, integrated public transport network that will support the economy, help Ireland meet its climate change targets in line with Climate Action Plan 2021 and make Dublin a more liveable and sustainable city.</p> <p>The submission is being argued argues that Charlemont station effectively becomes a terminus station in the short to medium term. The implication is that the activities normally associated with a terminus are incompatible with the proper planning and sustainable development of this location, in particular, travel to and from the location by car at the start and end of journeys.</p> <p>In this regard, it is true to say that the Metrolink trains will terminate and turn back at Charlemont station, However, Charlemont Station does not have the associated infrastructure and services associated with a terminus location and in fact has more in common with a "system turn back location". Charlemont Station is located within an area of high public transport accessibility, linking with the Luas Green Line which offers reasonably similar levels of services and frequency for journeys to and from the south of Dublin. As such, public transport service offering is not considered to terminate, but transfers onto the similar service offered by the Luas Green Line, forming part of a transport corridor running from Cherrywood to Estuary. The associated environmental impacts for the turnback and station at Charlemont have been fully assessed in the EIAR. Additionally, there is a strong level of interchange offered throughout the corridor at locations such as Glasnevin, O'Connell Street, Tara Street and St Stephen's Green, where many journeys on the MetroLink will 'terminate'.</p> <p>The terminus station for MetroLink is located at Estuary where all of the activities normally associated with a terminus take place.</p> <p>Charlemont station itself was chosen on the basis of its interchange potential with Luas, as well as local bus services, as outlined above. The section of the line between St Stephen's Green and Charlemont generates considerable benefits for the scheme in terms of increased patronage. As noted in response item (2), during the morning peak, at Charlemont station the flows include 1,800 passengers alighting, 2,300 boarding and 1,229 passengers alighting, 2,276 boarding during the evening peak. The fact that the Charlemont Station is now being referred to and considered as a "terminus station" rather than an interchange station, does not change the environmental impacts the station has on its local environment, in terms of passenger demand, airborne noise. vibration and other environmental effects.</p> <p>If the scheme were to terminate at St Stephen's Green, it would be inconsistent with the GDA Transport Strategy 2022-2042 to locate the terminus at Charlemont.</p> <p>If a decision was taken to terminate MetroLink at St Stephen's Green, significant changes would be required to the scheme. These would include design changes at St Stephen's Green station and provision of alternative turnback facilities immediately south of the station.</p> |  |

Case Reference Number NA29N.314724. 14 Jan 2023 |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |  |
| 4                                                                                                                            | Letter       | 1        | 2. Wasteful Duplication of Rail infrastructure: - The inclusion of an expensive and costly section between St. Stephens Green and Charlemont is strategically weak and duplicates the existing Luas Green Line services. NTA's cost estimate for this 1km section at €650M is a duplication and enormous outlay that represents very poor value-for-money, and deprives other parts of Dublin that are in immediate need of rail infrastructure to support urgently required housing and urban development. | <p>The Board is not responsible for any decisions in relation to the funding the Project. It is solely responsible for assessing whether the Project is consistent with proper planning and sustainable development and that its effects on the environment are acceptable.</p> <p>The responsibility for funding the Project lies with the NTA, the Government and ultimately the Oireachtas. It has received all necessary approvals, including under the Public Spending Code for the making of a Railway Order. It will undergo further scrutiny and approvals, including under the Public Spending Code, before it is funded. It is not appropriate for the Board to make findings in relation to value-for-money that are outside its statutory functions and would cut across those arrangements. Members of the public are entitled to make representations to their TDs in relation to the value-for-money of any element of the Project.</p> <p>TII do not agree with this statement for the reasons set out by response (2) above, noting that infrastructure is not being duplicated given the capacity of the Luas south from St. Stephen's Green is restricted due to on-street running.</p> <p>There is a limit to the potential of the Luas to provide additional capacity in the on-street non-segregated section of the Luas Green Line from Charlemont northwards through the city centre. The nature of this route and the fact that it currently crosses several road junctions (Adelaide Road, Harcourt Street / Hatch Street upper and Harcourt Street / St Stephen's Green south) limit the service to a maximum of 24 trams per hour per direction. The projected demand for this section would require a higher frequency of up to 30 trams per hour and this demand cannot be met with on-street systems (Luas / bus). The interchange between Luas and MetroLink proposed at Charlemont will provide the necessary capacity to address the demand on this corridor and reduce overall travel time for passengers</p> <p>There is also high passenger demand forecast for a Metrolink station at Charlemont, including from the Ranelagh area, which would be lost if St. Stephen's Green was the MetroLink southern interchange station. The additional fare revenues collected by the Charlemont Station interchange increase the benefits delivered by the Project, reflected by an improved Project Benefit Cost Ration (BCR).</p> <p>Further, to ensure that public investment delivers value for money, the Public Spending Code sets out requirements for the evaluation, planning and management of public investment. The preparation of a Business Case is a key element of meeting these requirements. The Public Spending Code requires that both the Preliminary Business Case and Final Business Case for public investment projects are published.</p> <p>In July 2022, the Government granted Approval in Principle to the NTA to enable the submission of a railway order application by TII to An Bord Pleanála in respect of the MetroLink project (Decision Gate 1). This approval was granted after the Preliminary Business Case (PBC) had undergone significant scrutiny and challenge by bodies that are independent of TII, including DoT and DPER review (including independent review by JASPERS and the Major Projects Advisory Group (MPAG)) of the PBC around timeline, costs and benefits that were updated to inform the Government decision.</p> |  |
| 5                                                                                                                            | Letter       | 1        | 3. The station box at Charlemont, as constructed in 2021/22 by the developer Hines, does not have the benefit of planning permission and has not been part of the EIA undertaken for this project. Processing the current Railway Order application, which is reliant on these preliminary and now constructed works, is legally unsafe and contravenes the provisions of the EIA Directive.                                                                                                                | The MetroLink enabling works constructed as part of the Hines development was included in the planning application for the Hines Development and has the benefit of planning permission which was granted in April 2019.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |  |

| Submission No.                                                                                                               |              |          | 018                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |  |
| Re: Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022. Case Reference Number NA29N.314724. 14 Jan 2023 |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |  |
| 6                                                                                                                            | Letter       | 1        | <p>4. The station box at Charlemont will result in only one possible future tie in with the Luas Green Line to the south, which would result in an option that was previously dismissed as part of the Tie-In study from March 2017. No alternatives to the station box at Charlemont were considered as it had been fixed through the design of the overhead Hines Grand Parade commercial development.</p> <p>The implications of this new alignment are very negative for the local community as they will inevitably involve top-down construction that will only be possible when many houses on Manders Terrace, Oakley Road and Charleston Road are demolished.</p> | <p>The station box at Charlemont allows for a future tie into the Luas Green Line should it be determined in the future that through running metro services to Sandyford is the required solution to address the public transport needs to the south of the city. It is incorrect to say that the current proposal is based on an option that was previously dismissed as part of the March 2017 Green Line tie in study. The station design is in affect a modification to the preferred Green Line Tie Option 4B which was modified as result of the decision not to proceed with the upgrade of the Green Line to metro standard.</p> <p>The station box location was not fixed by the Charlemont Development. The preferred route for MetroLink was published in March 2019 following a comprehensive route options study. The preferred route was based on the emerging preferred route for the scheme which included a station at Charlemont. The Charlemont Metro Enabling Works were constructed to enable the Charlemont Development to proceed whilst simultaneously ensuring there was an option available to construct a station at Charlemont that avoided unnecessary demolition, took advantage of an available site, provided infrastructure that is integrated with planned development rather than necessitating later changes and retrospective adjustments to a new development or even possible demolition of the new development, whilst providing protected provision for the future extension of the scheme south, if required.</p> <p>It is also important to recognise that the station location at Charlemont is influenced by available vacant land and thus avoids unnecessary demolition.</p> <p>The submission seeks to portray the construction of the Metro Enabling Works as prejudicial to future decisions on proper planning and sustainable development of the area. It implies that the counterfactual would have had no effect on such decisions. That is not the case. There was a planning conflict between the EPR and the Grand Parade Development at the time the latter development was proposed. There was no resolution to that conflict that was free of implications for future decisions on the proper planning and sustainable development of the area. The Board could have refused permission for the Grand Parade Development, inevitably creating a underutilised and potentially vacant and idle site in a commercial hub location. The Board could have granted permission with no provision to facilitate a station at this location, resulting in a requirement for the railway order to provide for the demolition of a new office building. The Board's actual decision was reasonable and lawful in seeking to minimise the prejudice to an important office development and a critical piece of national infrastructure. It was also not particularly restrictive of future decisions in relation to the proper planning and sustainable development of the area. Of the three options open at the date of the Grand Parade planning application, two remain open: the Board can still require changes to the station design that require the demolition of the commercial building and it can grant an order that avoids demolition by using the Metro Enabling Works.</p> <p>It is agreed that the short-term implications for local residents will be significant as the scheme progresses through the construction stage, however the EIAR assesses the environmental impacts of the construction phase and commits to the implementation of appropriate mitigation measures that reduce the environmental impacts to not significant. The same is true of the operations phase for the project. TII will work closely with local residents to ensure the required mitigation measures are put in place.</p> <p>If in the future, the metro was extended south, this does not mean that inevitably open cut construction will be required or demolition of property will be necessary. In designing an extension, the promoter will seek to reduce the requirement for demolition by looking for tunnel launch sites at the southern extent of the scheme and, if one can be identified, driving the Tunnel Boring Machine northwards ultimately connecting into the existing tunnel. In that case, even if the new alignment were under the properties identified in the submission, the tunnel underneath them would be constructed by the Tunnel Boring Machine without the need for above ground works.</p> |  |
| 7                                                                                                                            | Letter       | 2        | <p>5. The Environmental Impact Assessment is deficient in relation the description of development, alternatives, transport assessment, noise and the cumulative effects of the development on the Charlemont-Dartmouth Community. For a project of this size, scale, investment to date, it is inadequate to propose a Railway Order with so many important studies and analysis missing.</p>                                                                                                                                                                                                                                                                              | <p>TII do not agree that the Environmental Impact Assessment is deficient, inadequate or missing information. The Railway Order application comprises a very detailed environmental impact assessment that has identified and assessed the potential environmental impacts of MetroLink and proposed mitigations for these impacts where necessary. TII would also draw attention to the detailed project description, construction phase description and operational phase description provided in EIAR Chapters 4 and 5 and 6, and EIAR Chapter 7 and associated appendices that present details of alternatives considered. EIAR Chapter 9 and appendices provides a detailed analysis of transport and traffic effects, and EIAR Chapters 13 Airborne Noise &amp; Vibration, and 14 Groundborne Noise &amp; Vibration provide a detailed assessment of potential noise and vibration effects, while Chapter 29 outlines the assessment of interactions between various environmental aspects, and Chapter 30 covers the cumulative impacts with other projects. This assessment is carried out for the full length of the alignment including relative to potential significant effects on the Charlemont-Dartmouth Community.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |  |

| Re: Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022. Case Reference Number NA29N.314724. 14 Jan 2023 |              |          |                                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |  |
| 8                                                                                                                            | Letter       | 2        | 6. The development would result in noise and disturbance during the construction and operational phases and would result in a loss of amenities for the area. | <p>The EIAR presents a comprehensive and detailed assessment of both groundborne and airborne noise and vibration in Chapter 13 and 14 of the EIAR. The assessments include for predictive modelling in order to identify the potential impacts on all sensitive receptors during both the construction phase and the operational phase.</p> <p>Noise and disturbance during construction:</p> <p>No profound impacts have been identified for residents and mitigation measures proposed will be effective at reducing the impacts on these properties and in general terms impacts will be associated with the construction phase only. Significant mitigation is proposed to include 4m high noise barriers and further proposed mitigation in line with the Airborne and Groundborne Noise Mitigation Policy. On the implementation of these measures the residual impacts are predicted to be moderate. However, as outlined in Transport Infrastructure Ireland (TII) Airborne and Groundborne Noise Mitigation Policy (Appendix A14.6) there is a process in place whereby further mitigation measures can be implemented at individual properties should this be merited.</p> <p>Noise and disturbance during operation:</p> <p>No residual noise impacts are identified at this location during operation. The calculated rail noise levels across the proposed Project are not significant in terms of any widespread community disturbance and results in a not significant to slight impact when added to the prevailing noise environment.</p> <p>Loss of amenity during construction:</p> <p>EIAR Chapter 11, Population &amp; Land Use provides an assessment of effects on community amenity during construction and operation, which relates to the interaction of impacts on air quality; visual amenity; traffic and transport; and noise and vibration.</p> <p>At this location during construction as outlined in Section 11.5.2 of Chapter 11, no impacts are identified on the retail sector or community and social infrastructure (e.g. schools or hospitals). Any severance/disruption to transport will be limited by site mitigation measures such as alternative routes reducing impacts to not significant.</p> <p>Loss of amenity during operation:</p> <p>No significant residual negative impacts are anticipated on the Population and Land Use from the operation of the proposed Project, following the incorporation of the mitigation measures into the design of the proposed Project and implementation on an ongoing basis throughout the lifecycle. The residual effects that will arise during operation will be permanent and positive as detailed in EIAR Chapter 11, section 11.1.1.</p> <p>The zoning under the Dublin City Development Plan 2022 - 2027 for the residential properties in question is "Z2 Residential Neighbourhoods (Conservation Areas)" with an objective to "protect them from unsuitable new developments or works that would have a negative impact on the amenity or architectural quality of the area (See Table 3.11 of the submitted Planning Report). As outlined in Section 4.5.18.6 of the Planning Report, the element of the Project within the Z2 zoning area will affect a below ground area only and as such will not compromise the land use objective for the lands overhead. The majority of the proposed Charlemont Station and all above ground elements are located within the lands zoned Z5 with the objective "To provide for the creation and protection of enterprise and facilitate opportunities for employment creation". The Station has been designed so that it is integrated with the proposed redevelopment of this site by a third party development, and as such, demonstrates that the proposed Project is consistent with the zoning objective. The MetroLink station design does not result in any segregation of the area, with no surface barriers or walls proposed.</p> <p>See below in relation to the submission that the Traffic Study for Charlemont is inadequate because it omitted the impact of airport users from south Dublin travelling to this location.</p> |  |

Case Reference Number NA29N.314724. 14 Jan 2023 |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |  |
| 9                                                                                                                            | Letter       | 2        | <p>The Traffic Study for the local Charlemont area is wholly inadequate as it omitted the modelling of the impact of Airport users coming to the only Dublin South Metrolink station at Charlemont. The Traffic Study uses a strategic, generalised regional model that does not take local factors into account.</p> <p>Extract from observation 7) - The EIA did not properly assess the impact of additional local traffic volumes, rather they used a generalised regional model that does not take local factors into account. A key local factor at a Terminus station in Charlemont that runs to the Airport is the huge volume of anticipated airport users from Dublin South and greater Dublin/Leinster that will come to Charlemont via car or taxi with luggage for onward destination to the airport. Grand Parade and the residential area around Charlemont-Dartmouth cannot sustain the significant additional traffic volumes associated with this development.</p> | <p>The MetroLink forms part of an integrated public transport network. The system is designed in an integrated manner so that people travelling from the area south of Dublin to access locations north of Charlemont, such as Dublin Airport, Mater, Swords etc. will utilise public transport to interchange with the MetroLink, or will walk or cycle to access their local station. The system is not designed to encourage people to drive to stations within the City and TII actively discourage people from doing so other than the Park &amp; Ride station at Estuary. TII therefore do not agree with the observation that there will be a “huge volume of anticipated airport users from Dublin South and greater Dublin/Leinster that will come to Charlemont via car or taxi with luggage for onward destination to the airport” as this is not borne out by our transport analysis.</p> <p>The Transport Assessment for MetroLink includes for people travelling to/from Dublin Airport from all areas within the extents of the GDA area, therefore it is incorrect to say "The Traffic Study for the local Charlemont area is wholly inadequate as it omitted the modelling of the impact of Airport users coming to the only Dublin South Metrolink station at Charlemont".</p> <p>The NTA's Eastern regional Model (ERM) incorporates a wide range of data sources, including demographic data, land use data, transportation network data, and travel survey data. The system is designed to model a variety of transportation modes, including private vehicles, public transit, walking, and cycling, and to simulate the interactions between these modes. The ERM model has been validated and calibrated using a range of localised data sources to ensure that the model can accurately represent the transport network, these include public transport and vehicle counts from the canal cordon counts. The outputs from the model have been combined with local survey data to undertake the more localised modelling, such as the pedestrian impact assessments, or the local traffic signals. This does not support the observations made “The Traffic Study uses a strategic, generalised regional model that does not take local factors into account.” or “The EIA did not properly assess the impact of additional local traffic volumes, rather they used a generalised regional model that does not take local factors into account.”</p> <p>Regards the observation there will be a "huge volume of anticipated airport users from Dublin South and greater Dublin/Leinster that will come to Charlemont via car or taxi with luggage for onward destination to the airport. Grand Parade and the residential area around Charlemont-Dartmouth cannot sustain the significant additional traffic volumes associated with this development", this is covered by response (10) below.</p> |  |

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| 10                                                                                                                           | Letter       | 2        | 7. The development would have an adverse impact upon traffic during the construction and operational phase, and it has not been properly designed and there is poor integration with other modes of transport. Pedestrian movements in and around the station would be difficult. Grand Parade is an already heavily congested orbital route. | <p>The MetroLink is designed to form part of an integrated public transport network with Charlemont selected as the preferred interchange location in order to maximise the potential interchange with the existing Luas Green Line. In overall terms, Charlemont Station will provide for improvements to the public transport network resulting in decreases in private car usage/trips, increases in public transport usages and will facilitate walking and cycling to the station, without significantly impacting on the operation of the road network in the area.</p> <p>Construction Phase:</p> <p>EIAR Appendix A9.5 Scheme Traffic Management Plan presents the analysis undertaken to assess the impact of the traffic management measures on the local road network surrounding the proposed Charlemont Station during the construction phase. At the local level the following parameters have been used to assess impacts on general traffic and on pedestrians:</p> <ul style="list-style-type: none"><li>• Increase in walking distance/quality of service for pedestrians (through removal of footpath, reduction of quality of service, removal of a pedestrian crossing or relocation of crossing by more than 100m);</li><li>• Increase in driver delays at junctions;</li><li>• Changes in traffic flows on surrounding streets; and,</li><li>• Additional distance travelled due to diversions.</li></ul> <p>The analysis undertaken at this location indicates that the increased volume of traffic on Grand Parade and Northbrook Road does not translate into any significant increase in driver delay. The largest increase in driver delay of 12 seconds is registered on the westbound approach on Grand Parade to the Ranelagh Road signalised junction.</p> <p>During the construction phase, pedestrians will experience a reduction in quality of pedestrian infrastructure and space. The construction site boundary will encroach upon footways in the local area, including the northern side of Dartmouth Road, and the southern side of Grand Parade. However, a temporary signalised crossing will be provided west of the Luas to maintain pedestrian access to and from the Stop. Whilst there are partial closures on Dartmouth Road and Grand Parade, pedestrian movements will be maintained on appropriately sized footways through the area.</p> <p>Operational Phase:</p> <p>A microsimulation VisWalk model has been developed for the immediate area surrounding Charlemont Station during the operational phase. The model covers the full extent of the publicly accessible station area, including the immediate vicinity of the station entrance at street level, the Luas stop and nearby junctions at Charlemont Bridge. In order to accommodate the forecast demand from the proposed Charlemont Station, a new staircase with 2.4m stair width is proposed at the south east corner of Charlemont Luas stop. An elevator will also be provided at this location. Both are sized for MetroLink to Luas, and Luas to MetroLink passenger numbers.</p> <p>In addition, it is proposed that the pedestrian crossing on R111 Grand Parade will be repositioned to the front of the building being developed by Hines. With this infrastructure in place, the model indicates that the R111 Grand Parade will have an acceptable level of service overall, with some reductions in service seen at the pedestrian crossing where pedestrians are required to wait for a green phase at the signals. Overall, it is considered that the model displays an acceptable level of network performance.</p> <p>The proposed pedestrian crossing on Grand Parade will have minimal impact on the traffic flow along Grand Parade and can be programmed to operate in sync with the existing signalised junction at Grand Parade /Charlemont Street to maintain the flow of traffic movements. When the Project is operational, car mode share will decrease, with a reduction of up to approximately 830 car tips to and from the zones surrounding Charlemont Station over the 12hr period in 2065. In overall terms, the Charlemont Station will provide for improvements to the public transport network resulting in decreases in private car usage/trips, increases in public transport usages and will facilitate walking and cycling to the station, without significantly impacting on the operation of the road network in the area.</p> <p>Furthermore, TII have deliberately designed the Station with minimum set down space (with the exception of a drop-off on Grand Parade for persons of restricted mobility only) or room for taxi ranks so that it does not encourage the Station to be used for a significant volume of car or taxi trips.</p> |

| Re: Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022. Case Reference Number NA29N.314724. 14 Jan 2023 |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| 11                                                                                                                           | Letter       | 2        | 8. The development will have an adverse impact upon property values, particularly during the construction phase. For many houses in the area there will be a long term and permanent adverse impact upon property values from noise of the operating rail infrastructure, vents, operational noise and signals, escalators, and large traffic volumes - vehicular and pedestrian using the station 19 hours per day. The adverse impact also extends to the loss of amenity for the wider community changing a residential neighbourhood into a noisy, busy, congested major transport hub. | "Response (8) above outlines the predicted environmental impacts with regards to noise and vibration, and amenity, while responses (9) and (10) summarise the assessed traffic and pedestrian impacts. TII would note that as explained by response (10) above that in overall terms Charlemont Station will provide for improvements to the public transport network resulting in decreases in private car usage/trips.<br><br>TII do not agree that the development will have a long term and permanent negative affect. In fact there is strong evidence to suggest that property values will in fact increase in close proximity to public transport infrastructure and that local residents will greatly benefit from having a world class metro system providing access to the city centre, airport and north city at their door step. |
| 12                                                                                                                           | Letter       | 2        | The proposed development will have considerable impact on public safety. Drop off congestion on Grand Parade, even if managed, will inevitably lead to delays for emergency vehicles on a bust artery and main route for such vehicles. Apart from the priority matter of increased risk to life that this will likely pose, it will increase noise levels as emergency vehicle operators will have to revert to greater siren usage. Note also the related gaps in the EIA and Traffic Study outlined above.                                                                               | For the reasons set out by response (10) above, Charlemont Station will provide for improvements to the public transport network resulting in decreases in private car usage/trips, increases in public transport usages and will facilitate walking and cycling to the station, without significantly impacting on the operation of the road network in the area. It is therefore concluded that emergency vehicles will not be significantly delayed, and further as noted above, with the exception of a drop-off on Grand Parade for use only by persons with restricted mobility, there will be no other drop areas provided at Charlemont Station.                                                                                                                                                                                     |
| 13                                                                                                                           | Letter       | 2        | Accordingly, we are requesting the following amendments of An Bord Pleanála:<br><br>1. Omit from the Railway Order the section from Tara Street Station to Charlemont Station and associated onward tunnel extension and intervention tunnel.<br><br>2. Require the submission of a Railway Order for a section from Tara Street Station to St Stephens Green which would effectively provide for a terminal hub station that can integrate with the Luas Green Line, multiple bus routes and future DART underground.                                                                      | The above responses to the observations made explain why TII do not consider it is correct or appropriate that the MetroLink alignment south of the proposed Tara Station should be omitted, and also demonstrates why the proposed Charlemont Station has been selected by TII as the preferred interchange with the Luas Green Line<br><br>A scheme which terminates at Tara Street would not be consistent with the Transport Strategy for Greater Dublin Area (2022-2042) and would be a material contravention of the Dublin City Development Plan 2022-2027. In addition any decision to terminate the scheme at Tara will significantly impact on the overall viability and benefits of scheme.                                                                                                                                       |

| Submission No.                                                                                                                                                                             |               |          | 019                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| 1                                                                                                                                                                                          | BSTA Concerns | 3        | <p>While we anticipate that the proposed development will be a major benefit to our area we do have concerns as to how this can be achieved in an effective and timely manner with minimal disruptions on our businesses. It is inevitable that there will be major issues re. availability of parking, the disruption with the noise and vibration, access for our clients and customers to our services and businesses, the impact of dust on our premises both internal and external and hence the added expense of dealing with this issue, any potential disruption in the supply of water and electricity will require the operation to close.</p> | <p>Programme</p> <p>As detailed in EIAR Chapter 5, MetroLink Construction Phase, the programme for the construction of the proposed Project has been optimised to minimise the duration of the Construction Phase in order to lessen the duration of potential environment impacts, while ensuring that the areas surrounding the work sites remain operational and functional. Work will run concurrently at all MetroLink site locations to ensure the Project is delivered in an effective and timely manner.</p> <p>Once a contractor has been appointed, TII will seek to further optimise the programme with a view to reducing the overall duration of works at the proposed Mater Station. TII will consult with BSTA and other stakeholders on any such proposals received from the contractor.</p> <p>Traffic Management</p> <p>Chapter 5 of the EIAR, MetroLink Construction Phase, explains that traffic management plans for the construction phase of the Project have been developed to minimise the impact on road users, and to maintain access to businesses and other premises. Prior to implementation, all traffic management measures will be agreed with the relevant local authority (FCC or DCC) and where relevant, consultation with An Garda Síochána and other statutory stakeholders will be undertaken. The design of traffic management measures and highways works is based on achieving the key objective of maintaining continual access to all properties during the works. Where necessary, a safe alternative route will be provided for pedestrians and vulnerable road users, such as children, and persons with restricted mobility, to maintain pedestrian access to premises. Where detour routes are required, these will be kept as short as possible and detour signage will be clear and easy to understand. All construction sites will be designed to be as unobtrusive as possible.</p> <p>EIAR Chapter 9, Traffic and Transport, section 9.7.1.2 includes for a Scheme Traffic Management Plan (STMP) to manage traffic movements during the construction phase to ensure traffic congestion is minimised. The Plan will include measures such as the establishment of Local Community forums which will cover areas local to each station, where stakeholders will have an opportunity to inform the traffic management element of the project. Other measures include the control of construction vehicles in terms of their hours of operation and restrictions on vehicle size and weight.</p> <p>Regards parking availability, this is also covered by the EIAR in Chapter 9, section 9.6.1.2.4.5, Parking and Loading Construction Impact Assessment, with particular detail provided in EIAR Appendix A9.5 Scheme Traffic Management Plan, section 7.7:</p> <p>There will be slight impacts for loading and parking during the Enabling Works associated with Mater Station. These are in the form of a loss of parking bays for both on street loading facilities and general parking. This loss of parking will at its peak be approximately 7 parking spaces, however generally only one or two spaces will be lost through the phasing of the work. During Phase 1 of the Main Works, the Pay and Display parking spaces along the eastern side of Berkeley Road will be removed, resulting in the removal of 12 on-street parking spaces. Approximately 5 on-street Pay and Display and Resident Permit parking spaces will be removed from the western side of Berkeley Road. A temporary location for the taxi rank will be agreed with DCC.</p> <p>During Phase 2 and 3 of the Main Works at Mater Station, the Pay and Display parking spaces along the eastern side of Berkeley Road will be removed. This will result in the removal of 12 on-street parking spaces. On the west side of Berkeley Road, five on-street Pay and Display and Resident Permit parking spaces will be removed as well as a loading bay that will be relocated.</p> <p>A summary of Mitigation Measures in Construction Phase are presented in Table 9.147 of the EIAR Chapter 9 (Traffic &amp; Transport). The mitigation measure for Berkeley Road for general traffic, parking and loading is to monitor if closures are required at all stages of the construction phase, or if spaces can be reinstated temporarily throughout the works.</p> |

| On behalf of the Berkeley Road Services and Traders Association (BSTA), we would like to make the following submission identifying our concerns regarding the proposed metro link project. |              |          |                                                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|                                                                                                                                                                                            |              |          | (1) continued                                         | <p>Once MetroLink is operational, to accommodate the station entrance, the current footways and traffic lanes on Eccles Street will be realigned as part of the proposed Project. The realignment of Eccles Street, and the widening of the footway on Berkeley Road will result in the loss of on-street parking at both locations. Approximately 20 on-street parking spaces will be lost on Eccles Street, while approximately 14 spaces will be lost on Berkeley Road, due to the provision of a signalised crossing in proximity to the Station entrance. While there will be a loss of commercial and residential parking and loading infrastructure as a result of the proposed Project, the modal shift from road to public transport when the proposed Project is in place will reduce the overall demand on parking and loading facilities, thus reducing the severity of the impact.</p> <p>TII are committed to working with BSTA and the local business community to ensure that disruption to normal business operations are kept to a minimum.</p> <p>Noise and Vibration</p> <p>Potential impacts associated with noise and vibration during the construction and operational phase of MetroLink are addressed in EIAR Chapter 13, Airborne Noise &amp; Vibration, with mitigation measures proposed where required. EIAR Chapter 14, Ground-borne Noise and Vibration includes the specific control measures proposed across the Project to control vibration sources with the potential to result in disturbance to building occupants or building damage.</p> <p>In summary:</p> <p>Airborne Noise and Vibration<br/>EIAR Appendix 14.5 Groundborne Noise and Vibration Blasting Modelling Results presents predicted groundborne noise and vibration levels during the construction phase of the project for buildings on Berkeley Road.<br/>The assessment of airborne noise and vibration during the construction of Mater Station includes the consideration of a number of receptors on Berkeley Road. Table 13.64 of Chapter 13 presents the potential significant airborne noise impacts, which includes receptors on Berkeley Road with predicted Moderate to Significant, and Significant to Very Significant impacts during some of the work phases. In order to manage and mitigate airborne noise, the Contractor will be required to set this out in their Construction Environmental Management Plan (CEMP), an outline of which is included in EIAR Appendix A5.1.</p> <p>Should an Enforecable Railway Order be granted by An Bord Pleanála, maximum permissible noise levels and limits on the hours of operation may be conditioned for the construction of MetroLink. Prior to the commencement of any construction works, a detailed noise assessment for each work site will be undertaken based on the most up to date information for each site. Additionally, the contractor undertaking the construction of the works will be required to take specific noise abatement measures to the extent required and comply with the recommendations of BS 5228-1 (BSI 2014a).</p> |

| On behalf of the Berkeley Road Services and Traders Association (BSTA), we would like to make the following submission identifying our concerns regarding the proposed metro link project. |              |               |                                                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|                                                                                                                                                                                            |              | (1) continued |                                                       | <p>Groundborne Noise and Vibration</p> <p>Predicted levels of groundborne noise during TBM passage is up to 49 dB LASmax, which is above the 45 dB LASmax threshold, resulting in a significant impact during the relatively short duration of the TBM's passage.</p> <p>Predicted levels of groundborne vibration during TBM passage is 0.264 ms-1.75, which is lower than the Vibration Dose Value (VDV -which is a parameter that combines the magnitude of vibration and the time for which it occurs) Threshold Level of 1.0 ms-1.75, resulting in a not significant impact on building residents.</p> <p>Predicted levels of groundborne noise during the mechanical excavation of Mater Station is up to 35 dB LASmax, which is below the 40 dB LASmax threshold, resulting in a not significant impact.</p> <p>Predicted levels of groundborne vibration during mechanical excavation of Mater Station is 0.003 ms-1.75, which is lower than the VDV Threshold Level of 0.8 ms-1.75, resulting in a not significant impact on buildings or its residents.</p> <p>Predicted levels of vibration during blasting at Mater Station is up to 4.2 mm/s PPV, which is lower than the Threshold Level of 8 mm/s PPV, resulting in a not significant impact.</p> <p>Unfortunately, there are no effective methods available to reduce groundborne noise or vibration from the TBM at source, but noting that the duration of this impact will be temporary and of the order of up to two-weeks as the TBM passes. TII will undertake advanced consultation and stakeholder engagement to prepare people for the passing of the TBM.</p> <p>Air Quality</p> <p>EIAR Chapter 16, Air Quality, assesses the likely effects of the Project on Air Quality during the construction phase with mitigation measures proposed where required. Air Quality during the construction phase will be impacted by traffic and dust emissions resulting from construction activities at the Mater Station site from Earthworks, Construction and Trackout (Maximum Daily HGV Movements). Section 16.5.2.6, Regional Air Quality Assessment – Construction Phase Southern Peak Scenario, has assessed traffic emissions pre-mitigation as being overall Neutral, Not Significant and short-term.</p> <p>Table 16.44 presents a summary of predicted dust emission magnitudes from the main construction sites, the results for the Mater Station site being:</p> <ul style="list-style-type: none"><li>- Earthworks - Large;</li><li>- Construction - Small;</li><li>- Trackout – Large;</li></ul> <p>This has resulted in defining the site-specific mitigation level as High and thus mitigation will be required. A detailed list of Dust Mitigation Best Practice Measures for each construction activity is presented in Appendix 16.4 Dust Management Plan.</p> <p>Before commencing relevant works, an Air Quality Management Plan will be prepared, considering the air quality assessment undertaken and any conditions imposed by An Bord Pleanála, and submitted for approval to the relevant local authority, in this case DCC. The plan will include all appropriate dust and emissions mitigation measures applicable to the circumstances of the relevant site, based on the local authority requirements and industry best practices. A plan will be developed by the contractor for each worksite, including Mater.</p> <p>Strict dust prevention will be in place at all times to minimise any potential emissions and these procedures will be strictly monitored and assessed. In the event of dust nuisance occurring outside the site boundary, movements of materials likely to raise dust will be curtailed and satisfactory procedures implemented to rectify the problem before the resumption of construction operations.</p> <p>Where it is clearly demonstrated that excessive dust gathering on the external surfaces of business properties is a consequence of MetroLink works, the contractor will be required to engage with BSTA and other business representatives to affect a clean up of the affected area.</p> |

| On behalf of the Berkeley Road Services and Traders Association (BSTA), we would like to make the following submission identifying our concerns regarding the proposed metro link project. |               |          |                                                                                                                                                                                                                                                                                                                                                                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
|                                                                                                                                                                                            |               |          | (1) continued                                                                                                                                                                                                                                                                                                                                                            | <p>Utilities</p> <p>Chapter 22 of the EIAR assesses the impact of the proposed Project on Infrastructure and Utilities during the construction phase, with mitigation measures proposed where required. Construction works required to divert utilities have been detailed in Chapter 5 (MetroLink Construction Phase). Where there is interaction between the proposed Project and existing infrastructure, the locations of the interactions have been identified and planned for, and therefore the potential for service disruption is limited.</p> <p>Utility diversions and any required strengthening works will most likely be undertaken as part of the Enabling Works, prior to commencement of the Main Civil Works. In some cases, planned service disruptions will be required to facilitate the connection of existing services to the newly diverted services. In such cases, consultation with and cognisance of the requirements of those premises served by the utility will be taken in determining the type, duration and phasing of the planned disruption. The duration of service interruption will be agreed with the relevant utility provider, in accordance with their service level/business requirements, however in most cases the duration of disruption should be no more than a number of hours.</p> <p>TII/NTA do not have a policy of compensation for local business for disruption during the construction stage. As with the installation of Luas line throughout the City, TII believe that any short term disruption to businesses during the works is offset by the eventual benefits of owning and operating a business in close proximate to a Luas or in this case Metro line.</p> |
| 2                                                                                                                                                                                          | BSTA Concerns | 3        | In addition the presence of hoarding on the street while providing a function for the construction company will have an antibusiness effect which needs to be addressed. We need to ensure that our business remain viable and can survive through this period with support financially and otherwise, we are not prepared to be sacrificial lambs for the greater good. | <p>As identified in EIAR Appendix A9.5, pedestrian routes will be maintained throughout the construction period around the construction sites.</p> <p>Designated access and pedestrian routes around the construction sites, particularly at and/or along the hoarding lines will be designed so that it is not perceived as uninviting by pedestrians. The environment around the sites will be designed to ensure that pedestrians feel they are entering a safe and accessible environment. This will ensure that the impact to businesses and shops adjacent to the works areas is minimised. Temporary pathways will be installed where appropriate, and provision will be made to ensure access for persons with restricted mobility is maintained. Where the existing level of service cannot be maintained in the vicinity of a construction site, an alternative route will be provided. This route will be clearly signed, visible, and safe, and will provide a level of service (capacity) required to cater for the pedestrian demand.</p> <p>TII will work closely with local business to ensure impacts to normal business operations are minimised and to ensure access to and visibility of local businesses are maintained where practical.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

| On behalf of the Berkeley Road Services and Traders Association (BSTA), we would like to make the following submission identifying our concerns regarding the proposed metro link project. |                   |          |                                                                                                                                                                                                                                                                                                                                                                                                                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| 3                                                                                                                                                                                          | BSTA Requirements | 3        | <p>We require,</p> <p>1) Clarification on what exactly will be involved during the construction phase with its likely impact on the residences and businesses. The proposed plans to be presented in a simple non-technical manner. That our issues are addressed by planning stipulations put in place and are agreed by us. All possible remedies need to be available such as relocation or financial compensation.</p> | <p>The Non Technical Summary (submitted as part of the EIAR) provides an overview of the proposed plans in a simple non-technical manner.</p> <p>Potential impacts associated with the construction phase activities of the proposed Project on the residences and businesses are addressed in Chapter 11 (Population &amp; Land Use) of the EIAR, with mitigation measures proposed where required. The construction site will be located in Four Masters Park. This will give rise to inconveniences and disturbances affecting activities and services at a localised level and Berkeley Street in particular. This includes potential noise and vibration impacts from construction activities as detailed in Chapter 13 (Airborne Noise &amp; Vibration) and Chapter 14 (Groundborne Noise &amp; Vibration), disturbances to the local road network as detailed in Chapter 9 (Traffic &amp; Transport), and dust risk as detailed in Chapter 16 (Air Quality).</p> <p>Measures to mitigate and monitor these impacts as a result of construction activity across the proposed Project are detailed in Chapter 5 (MetroLink Construction Phase) and summarised in Chapter 31 (Summaries of the Route Wide Mitigation &amp; Monitoring Proposed). Please also refer to response (1) above that also summarises the assessed impacts and proposed mitigations.</p> <p>Additionally, the appointed contractor will prepare detailed design and construction methodologies in the form of a detailed Construction Environmental Management Plan (CEMP) to ensure all environmental impacts are managed and mitigated in accordance with the EIAR and Railway Order, assuming an Enforceable Railway Order is granted. This detailed CEMP(s) will be provided to DCC for consultation and approval in advance of any construction works on site. An Outline CEMP is included in Appendix A5.1 of the EIAR that will be developed further by the appointed contractors. Monitoring instrumentation will also be used throughout the works to monitor potential environmental impacts, including those discussed above to ensure that acceptable limits are not breached.</p> <p>TII/NTA do not have a policy of compensation for local business for disruption during the construction stage. As with the installation of Luas line throughout the City, TII believe that any short term disruption to businesses during the works is offset by the eventual benefits of owning and operating a business in close proximate to a Luas or in this case Metro line.</p> |

| On behalf of the Berkeley Road Services and Traders Association (BSTA), we would like to make the following submission identifying our concerns regarding the proposed metro link project. |                   |          |                                                                                                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |  |
| 4                                                                                                                                                                                          | BSTA Requirements | 3        | 2) A mechanism such as an intermediate to be established to allow communication between the parties where concerns can be voiced and addressed.                                                                                                                                                                                                               | It is TII's intention to continue to consult with Local Business and Residents through the establishment of local community forums for residents and local business forums for businesses.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |  |
| 5                                                                                                                                                                                          | BSTA Requirements | 3        | 3) Issues to be addressed seriously and effectively taking into consideration the concerns of the residences and businesses.                                                                                                                                                                                                                                  | TII have undertaken extensive consultation across the route of MetroLink and has listened carefully to the concerns of stakeholders and the community, as documented by EIAR Chapter 8, as well as undertaking a detailed and an extensive Environmental Impact Assessment that identifies and addresses environmental concerns as evidenced by the submitted EIAR, including proposed mitigations to reduce environmental impacts, that accompanies the MetroLink RO application.<br><br>As mentioned early it is TII's intention to continue to consult with Local Business and Residents through the establishment of local community forums for residents and local business forums for businesses.                                                                                                                                                                                                                                                                             |  |
| 6                                                                                                                                                                                          | BSTA Concerns     | 3        | To date there has been little or no attempt to involve the businesses in a manner that would allow them to fully understand the implications as to how this project is to be undertaken and the likely impact of same.                                                                                                                                        | TIII carried out extensive non statutory public consultation during the development of the Emerging Preferred and Preferred route development stage. In addition there have been several meetings with local residents during the development of preliminary design stage for the scheme.<br><br>Since the submittal of the Railway Order Application TII have engaged with the local business community and explained the sequencing of works and environmental impacts as set out in the Railway Order submission. TII are committed to addressing the concerns of the local business community that are detailed in the BSTA submission and to continue to address their concerns throughout the projects construction stage through one on one engagement and through the soon to be established local business forum.<br><br>TII confirm they will continue to liaise closely with BSTA to ensure they remain informed of MetroLink plans and disruption is kept to a minimum. |  |
| 7                                                                                                                                                                                          | BSTA Concerns     | 3        | With the publication of a voluminous technical document the planners of this undertaking appear to assume that all relevant questions would be addressed and that it could be taken as a “fait de comply”.<br><br>Hence we wish to give notice of our objection to the development until we are properly informed of the proposal and our concerns addressed. | TII would like to reassure BSTA that they do not consider this RO application a “fait de comply” and that TII respect the planning process and the need to respond to observations made against the planning application submitted. As noted by our response to (4) and (6) above, TII are committed to engaging with and listening to the views and concerns of BSTA, and working with BSTA to manage any impacts resulting from MetroLink construction.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |  |

| Observation on a Strategic Infrastructure Development Application, Railway (Metrolink - Estuary to Charlemont via Dublin Airport) Order [2022] |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |  |
| 1                                                                                                                                              | 5. Grounds   | 3        | <p>I would like to make an observation regarding the siting of the St. Stephens Green Station: namely the cut and cover works for the station location, as the project does not seem to have balanced the full range of factors that should have been taken into account. Certain pragmatic criteria have been more heavily weighted than concerns for the damage to a fine public realm and park. It appears as if the inevitable construction phase difficulties and services diversion required in siting it entirely in the existing road St Stephens Green East have made the park a softer option. The absence of good cross sections across this road is a deficiency in the application. It is troubling that any part of Dublin's best loved park could ever be considered as suitable for a major cut and cover project for the station while alongside lies an adjacent wide roadway (St. Stephens Green East) with capacity for the station, its entrances and structures, allowing for a successful and complete re-instatement after the works. I will confine the argument to the following points:</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | <p>TII wish to thank you for your submission, and acknowledge your concerns around the protection of St. Stephen's Green. Appendix A7.3 St. Stephen's Green Report presents the alternative station locations that were considered and assessed as part of the decision-making process. Following the identification of St. Stephen's Green East as the best general location for a MetroLink station, a further multi-disciplinary analysis was undertaken to identify the optimum location for a station at St. Stephen's Green East having regard to Engineering, Environmental and Economy criteria. Seven potential locations were assessed having regard to the importance of St. Stephen's Green Park as an historical public park, the architectural heritage of the area, the importance of the transport corridor on St. Stephen's Green East, the presence of multiple utilities underneath the roadway on St. Stephen's Green East, and the requirement for an intervention shaft between the St. Stephen's Green Station and Tara Street in the event that the distance between these stations is greater than 1,000m.</p> <p>The long term impacts on St. Stephen's Green Park are significantly less for Location 5 as the main surface elements of the proposed station are largely located outside of the current extent of St. Stephen's Green Park. Furthermore, the preferred location allows for the long-term impacts of the station to be significantly mitigated by replanting trees and other vegetation, and the reinstatement of existing elements of architectural heritage. The overall construction phase impacts are reduced by avoiding the requirement for an intervention shaft, significant utility diversions and retaining transport and traffic movements on St. Stephen's Green East during the construction phase. The preferred station location will have an impact on approximately 5% of the area of St Stephen's Green during the Construction Phase, however once the station is constructed, with the reinstatement of all railings, monuments, street furniture and paving stones, only 0.21% of the park area will be directly impacted.</p> <p>As such, TII do not agree with the statement that 'The absence of good cross sections across this road is a deficiency in the application'. As indicated above, a multi-disiplinary analysis has been undertaken to identify the optimum location for a station at this location, with the findings outlined above.</p> |  |
| 2                                                                                                                                              | 5. Grounds   | 3        | <p>1. Piecemeal wearing away of quality.</p> <p>While the potential of the proposal is positive in its increased ease of access to St Stephens Green and potential for urban upgrades associated with the works, it throws this opportunity away by not sufficiently acknowledging how outstanding the urban purlieus of this corner of Dublin actually is. The park could actually benefit from the additional footfall and subtle upgrades associated with the station but somehow the project concludes that its value is as an “easy to get at and dig up” site and assumes that is the way forward. There is little of recent urban design in Dublin that one can be proud of and this corner of “The Green” with the Edward Delaney sculpture of Wolfe Tone and its bravura stone backdrop and cleverly integrated entrances to the park within it, is one of just a handful of such places of this scale and era that exist in the city.</p> <p>It's an architecturally ingenious park entrance as much as a sculpture, uncluttered and spare, it is a dignified set piece read against the greenery and huge tree canopies behind. That is a successful urban composition.</p> <p>There is really nothing convincing in its proposed re-located position, rendered impotent of function and pushed back out of the way, while the station entrance, (I can't decide if it is apologetic or assertive as depicted), is just one of a series of new shaft elements that will clutter this side of the park. This process of eroding the integrity of what is already a good place by not considering its merits sufficiently means that adding new elements or siting them (the station designs seem to drive the same functional elements that extrude above ground) results in these clumsy outcomes.</p> | <p>Please refer to response (1) above in relation to the identification of the preferred station location.</p> <p>TII disagree with the statement regarding sufficient acknowledgement. Chapter 27 (The Landscape) of the EIAR considers the landscape and visual impact of the project and outlines the significance of St Stephen's Green. The proposals for the Project aim to reinstate the existing landscape faithfully as far as is practicable within the constraints which are known to apply. It is feasible to do this, however, as has been set out, it is not feasible to imbue the replacement planting with the level of maturity, the ‘weight’ or the ‘volume’ of the existing tree planting which needs to be removed. This aspect of this approach to restoration of the Park edge will take time. It may be acknowledged that the proposed works can apply a level of mitigation which would go some way to reinstating the disturbed part of ‘the Green’, however, beyond any potential for reinstatement, replacement or restoration, it would be difficult to offset impacts on the maturity and wholeness of this place.</p> <p>Similarly with regard to the architectural significance of the entrance, Chapter 25 (Archaeology &amp; Cultural Heritage) of the EIAR identifies that any negative impacts would be offset by an improvement to the current setting and appreciation of the Wolfe Tone monument. The monument would be relocated further into the park, retaining the monument’s historic setting and allowing greater and safer appreciation of the monument as a sculpture, rather than as a barrier. The existing railings and footpath floor finishes will also be preserved. Following mitigation, Chapter 26 (Architectural Heritage) of the EIAR states that “There will be no direct or indirect impacts on architectural heritage during Operational Phase in this section of the study area”.</p> <p>To ensure mitigation is appropriate, the contractor(s) will appoint Consultant Conservation Architects to implement required preservation.</p>                                                                                                                                                                                                                                                                                                                                                                                                                     |  |

| Observation on a Strategic Infrastructure Development Application, Railway (Metrolink - Estuary to Charlemont via Dublin Airport) Order [2022] |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 3                                                                                                                                              | 5. Grounds   | 4        | <p>Focusing on re-instatement of elements as they were before, (just a jiggle this way or that to make them fit around the new things) can never do that job adequately in this setting. Once the concept is lost through the modifications necessary to make the new proposals work, it is gone forever. There is a question if this piece of public realm excellence is fully understood in its complexity, this corner is a landmark, despite its sobriety and sense of calm, it skillfully resolves a new intervention (1964) in an existing historic setting in a manner that one hardly notices. Indeed, it might have served as a lesson to the more reflective members of the Metrolink design team as to working in a historic context. But if it's not recognized as such, then the other arguments around inconvenience and cost win out and the matter becomes settled for the wrong reasons.</p> <p>The overriding outcome is another diminution of an original concept of wholeness and a fragmentation of the concept behind it. Unlike the planting which is entirely another matter, the juxtaposition of the new permanent and visible project elements such as the entrances, shafts, lifts etc. tip the balance in the wrong way. Here they clutter, push more important things aside or remove them and results in a random placement and juxtaposition of new and old. In the northern and suburban parts of this scheme many of these elements, (such as well-designed entrances and considered landscape design) can improve an area and in Metrolink many do so positively. However, a special place like this is a much more difficult task, perhaps requiring more engineering ingenuity in managing the visible parts above ground and at the same time a modesty of expression if it is not to harm the space's already established attributes.</p> | <p>Please refer to response (1) above in relation to the identification of the preferred station location, and response (2) in relation to mitigations to the landscape, visual impacts, and architectural heritage.</p> <p>All station locations that have been assessed would impact on St Stephen's Green Park and on protected structures within the National Monument curtilage including the eastern perimeter fence railings, plinth wall, bollards and lampposts. Although station locations with a smaller footprint in St Stephen's Green park would have a less significant impact on the National Monument, station locations furthest east that require the diversion of the Victorian Sewer have potential to impact directly on the cellars of a number of protected buildings along the eastern side of the St Stephen's Green road.</p> <p>TII do not agree with the position regarding the design approach. The general architectural design principles for St Stephen's Green Station are to:</p> <ul style="list-style-type: none"><li>* Do the maximum to preserve the existing park;</li><li>* Preserve the existing railing and pavement finishes; and</li><li>* Provide enough soil depth over the station box where it lies under the park to be able to plant trees on top.</li></ul> <p>A key objective of the urban realm design is to maintain as much of the park as possible. This is aided by placing the station box underground, partly under the park and partly under St Stephen's Green East Road and ensuring sufficient depth of the overlying soils to allow planting of new trees. The existing railings and footpath finishes will be conserved and replaced on completion of construction. This commitment is detailed in Chapter 4 (Description of the MetroLink Project).</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| 4                                                                                                                                              | 5. Grounds   | 4        | <p>2. Better outcomes elsewhere from reinstatement perspective.</p> <p>When working on a large infrastructural project there is a forward thrusting “get it done” energy that needs to be balanced alongside the more nuanced understanding of place. You can see which prevailed here.</p> <p>In the planning report seven options are considered for this station and then in varying degrees dismissed for practical reasons. The impression given is that in certain circumstances anticipated construction problems for Metrolink are more importantly avoided than detailed consideration of the final urban outcomes. There is a sewer diversion that militates against the St. Stephens Green East roadway siting, on delay and cost grounds. There may be un-acceptable traffic delays during construction.... some protected structures may possibly be impacted. These are not insurmountable issues and the protected structure reason highly questionable. It just seems that it is never stated how important St. Stephens Green is, although perhaps this would take up an entire volume and in arguing that a little damage at one side is really nothing. A well-presented section should be provided by the applicant to include the east side from the houses and basements westwards through the park boundary, showing the entire width of the wide road and double pavement outside the park which would really be a telling drawing to combat the main concerns for pushing into the park.</p> <p>Of course, the applicant has to weigh up the practical aspects of the project, but as it is a public project, then merely capital cost considerations are not appropriate grounds alone for decisions that might impact other less tangible public benefits, especially in the longer term.</p>                                                         | <p>Please refer to response (1) in relation to the identification of the preferred location, supported by Appendix A7.3 St. Stephen's Green Report.</p> <p>The decision to locate St Stephen's Green station box at the preferred location has considered Engineering and Environmental factors, as well as Economy criteria. However, following concerns raised by the Office of Public Work and the Department of Culture Heritage and the Gaeltacht (DCHG)) with regard to potential for direct impacts on St Stephen's Green, TII undertook further analysis to identify the feasibility of constructing a station fully located outside of the area of St Stephen's Green park, as presented in Appendix A7.3 St Stephen's Green Report. The key findings of this analysis were that Station Location 5 (the proposed location) remained the preferred station location for the following reasons:</p> <ul style="list-style-type: none"><li>* A station located entirely outside of St Stephen's Green park would cost 67% more to build than the preferred station location;</li><li>* The complexity of the alternative construction methodology and the necessity to carry out extensive utility diversions would increase the overall construction programme of between 15 months and 27 months when compared to the preferred station location;</li><li>* The proximity of buildings to the construction area for the option wholly within St Stephen's Green East would make it very likely that these buildings would need to be vacated for much of the construction period. This would not be required for the preferred station location;</li><li>* The station location wholly within St Stephen's Green East will require the diversion of a significant number of critical utilities including a major Victorian sewer and a major ESB cable route. This diversion work would result in extensive disruption to services while this work will be undertaken. This disruption would be largely avoided by progressing with the preferred station location;</li><li>* The closure of St Stephens Green East and Hume Street during the Construction Phase would require the diversion of traffic, pedestrians and public transport for a number of years. These impacts would be avoided by progressing with the preferred station location;</li></ul> <p>TII consider that the above factors, combined with the mitigation proposed for the impacts on architectural and landscape importance (as presented in response item (2) above), demonstrate that a number of considerations have contributed to the decision making around location of the station box.</p> |

| 5                                                                                                                                              | 5. Grounds   | 5        | <p>The felling of trees for such projects is usually understated and in a “cut and cover” project, there are overhanging branches and adjoining roots of retained trees impacted so the neat little box is rarely the actual damage zone. Changes to hydrology locally can be detrimental to mature trees. The imbalance to the composition of the canopy within the park will be a very damaging outcome, it will be an obvious visual and ecological negative and one that can only recover over generations.</p> <p>The park is regular on plan and in every way as one looks at it, so it has to become clear in the future to anybody looking to admire it or if walking through it, that some traumatic negative event has occurred to unbalance the beautiful composition. The tree canopy cover exceeds its boundary, offering canopy covered sidewalks externally alongside the outer rows of limes and at every season one is stuck by how lucky we are to inherit such a place. While the buildings are more intact and regular on the east side of the green than any other, the significance of its canopy reading as a beautiful counterpoint and balance to them is even more intensely experienced, a sublime effect that could be lost for generations if current preoccupations prevail.</p> <p>While allowing for soil build up over the station and re-planting generously, (assuming that there won't be design constraints for loading at the detailed design stages that begin to erode that proposition) it will never be as good. A re-instatement is not always a successful replacement for the status quo. Who can set a price on the value of a sewer diversion (that we are told is a significant part of not using the carriageway as the station cut and cover site) that would leave the park intact and allow the status quo to prevail after the works? We really need to show what we value in Dublin.</p> | <p>Please refer to response (2) in relation to the proposed mitigations to landscape, visual impacts, architectural heritage.</p> <p>Mitigation measures will be implemented during construction and operation to minimise the effects of habitat loss and habitat degradation on biodiversity including trees and their root structures. These mitigation measures can be seen in Sections 15.5.1.2 and 15.5.2.2 of Chapter 15 (Biodiversity).</p> <p>TII acknowledge the importance of the landscape and sense of place with regard to St Stephen's Green Park. Chapter 27 (The Landscape) details that once the reinstatement works are completed the negative effects of construction will be partially moderated, however the edge of the park along the section of required works, will appear rather raw, small-scaled and immature, especially when directly compared with the remaining untouched sections. These contrasts will reduce over time, though it may take a significant period before they may be described as imperceptible.</p> <p>However, the mitigation proposed ensures the station box will be deep enough to guarantee the relocation of trees above, integrating the station with the park setting over time. The preferred station location will have an impact on approximately 5% of the area of St Stephen's Green during the Construction Phase, however once the station is constructed, with the reinstatement of all railings, monuments, street furniture and paving stones, only 0.21% of the park area will be directly impacted. As stated above, the contractor(s) will appoint Consultant Conservation Architects to implement required preservation of in situ works.</p> <p>With regard to hydrology, all stations feature surface drainage systems which are sustainable. Wherever possible surface drainage is conducted to swales/infiltration trenches (as appropriate) which are also integrated into the soft landscape proposals. This is presented in Chapter 18 (Hydrology). The impact of changes to hydrology on mature trees has been considered in Chapter 19 (Hydrogeology), as well as Chapter 20 (Soils and Geology).</p> |

| Re: Submission on Behalf of Bindford Limited on Proposed Scheme and CPO (Compulsory Purchase Order) of Lands |                        |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| 1                                                                                                            | ILTP Letter            | 1        | <p>Our Client is generally supportive of the proposed MetroLink scheme but are seeking clarification on the potential impacts the scheme might have on their lands.</p> <p>The proposed Metrolink includes for the temporary CPO of lands in the ownership of our client at this location, which includes part of a permitted SHD development, details of which are set out in the separated document prepared by McGill Planning who are also acting for Bindford Limited.</p> <p>Our client has been in contact with the TII (Transport Infrastructure Ireland) in respect to this matter and a Draft Statement of Common Ground (SoCG) has been exchanges between both parties.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | <p>The temporary acquisition of the lands in the ownership of Bindford Limited is required for the construction of a temporary bridge crossing of the canal and an access road to same. The road and bridge will enable vehicular access across the canal for the use of residents of Coke Oven Cottages. These works are a fundamental part of the construction methodology for the proposed Glasnevin Station. The lands will be returned to Bindford limited on completion of the station works. The impacts on the lands are as set out in the Railway Order drawings.</p> |
| 2                                                                                                            | ILTP Letter            | 1        | <p>The attached Figure A, prepared by ILTP, shows an indicative layout with reduced temporary land take which could allow for both development on the client lands and the Metrolink development to proceed either independently or in tandem.</p> <p>Further meetings are planned with TII to seek a final agreement in respect to the subject lands. Our client would like at this stage tor reserve its position pending the outcome of the further engagement with TII.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | <p>The temporary acquisition of the lands in the ownership of Bindford Limited required for the construction of a temporary bridge crossing of the canal and an access road to same. The road and bridge will enable vehicular access across the canal for the use of residents of Coke Oven Cottages. These works are a fundamental part of the construction methodology for the proposed Glasnevin Station. The lands will be returned to Bindford limited on completion of the station works.</p>                                                                           |
| 3                                                                                                            | McGill Planning Letter | 6        | <p>The Metrolink, along with BusConnects, is identified as an item to be addressed under the Traffic and Transport issues section of Dublin City Council Opinion, in sections B, C (ii), E(i) and F(ii). This requires that engagement with NTA/Metrolink is carried out and that <i>"the proposed development does not prevent the delivery of the temporary vehicular/ pedestrian/ cycle bridge over the Royal Canal proposed under the Metrolink Railway Order application"</i> . It also requires that <i>"The applicant should demonstrate the location of temporary bicycle parking provision on site, for the duration of the Metrolinks works"</i></p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | <p>TII and Bindford are in consultation regarding the impact of MetroLink works on cycling parking to be provided as part of the Bindford scheme and anticipate that the issue will be resolved through agreement in due course.</p>                                                                                                                                                                                                                                                                                                                                           |
| 4                                                                                                            | McGill Planning Letter | 6&7      | <p>As is demonstrated by drawings and report submitted by ILTP, along with the Statement of Common Ground prepared by Bindford Limited which is currently under discussion with TII, regarding the quantum of land required to deliver the temporary vehicular/ pedestrian/ cycle bridge over the Royal Canal can be accommodated without impacting on the delivery of the residential development, and vice versa.</p> <p>Bindford Limited will continue to engage further with TII in this respect, and it is expected that agreement will be reached which will allow both schemes to proceed independently or in tandem. The provision of the apartment development will not preclude the delivery of Metrolinks nor impact on any temporary works required to facilitate same.</p> <p>The area the subject of the temporary bridge will provide, if granted permission, a new communal open space area, a children's play area and cycle facilities. Both the open space and children's play area can be delivered once the bridge is removed and there are a number of options available to temporarily accommodate cycle facilities elsewhere on the site as demonstrated by OMP's drawings. Finally, it is worth noting that there is an excess provision of communal open space on this site, so even without this land, the site meets the communal open space requirements.</p> | <p>The temporary acquisition of the lands in the ownership of Binford Limited are required for the construction of a temporary bridge crossing of the canal and an access road to same. The road and bridge will enable vehicular access across the canal for the use of residents of Coke Oven Cottages. These works are a fundamental part of the construction methodology for the proposed Glasnevin Station. The lands will be returned to Bindford limited on completion of the station works.</p>                                                                        |

| RE: Submission on behalf of BORG Developments Unlimited Company and JOM Investments Unlimited Company, 15 Hogan Place, Grand Canal Street Lower, Dublin, D02 DK23 |                    |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |  |
| 1                                                                                                                                                                 | Land take          | 3        | <p>Jacobs-IDOM Drawing No. MLI-JAI-EIA-ROUT_XX-DR-Y-21152 P03 which has been included with the Railway Order application documentation indicates a significant temporary landtake within our clients lands as indicated in Figure 2 below (Figure 2 - Extract from Jacobs-IDOM Drawing No.MLI-JAI-EIA-ROUT_XX-DR-Y-21152 P03 showing proposed Metrolink Temporary Landtake).</p> <p>CPG are seeking clarification as to the purpose of this landtake area as it is not clear from the information provided with the Railway Order application. It is also noted that since initial consultations took place, CPG proposals for these lands have evolved and the proposed temporary landtake has the potential to significantly disrupt proposed future developments and the timely completion of the overall urban design for the site - refer Figure 3 below which shows the landtake area overlaid on a proposed preliminary masterplan strategy for the site (Figure 3 - Overlay of proposed Metrolink Temporary Landtake on proposed Masterplan layout for the subject site).</p>                                                                                                                                               | <p>TII acknowledge and appreciate the support shown for the Metrolink Project. With regards to the comments you have provided, we provide further clarification below.</p> <p>The temporary landtake to the east of the proposed Northwood Station is required to create a temporary road diversion to maintain access to businesses within the Gullivers Retail park as the permanent upgrade along the Old Ballymun Road is progressed in phases as the MetroLink alignment is constructed. TII's planning for the EIAR and Railway Order, including access phasing around Northwood Ave/Old Ballymun Road, was presented to Gullivers Retail Park in a Consultation meetng held on the 30 March 2021.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |  |
| 2                                                                                                                                                                 | Land take          | 4        | <p>The provision of suitable quality residential developments within mixed use areas is critical at this time and therefore Our clients are concerned that the proposed temporary landtake may impede both the development of their lands, which are zoned for '<i>high density mixed use employment generating activity and commercial development, and support the provision of an appropriate quantum of residential development</i> ', and the timely delivery of same.</p> <p>The particular concerns of our clients with respect to the proposed temporary landtake and construction of a new roundabout and access road relate to the following:</p> <p>a) The purpose of the landtake and its potential impact on proposed future developments within their site,</p> <p>b) The impact on existing and future access from the north of Gullivers retail park and Northwood Avenue</p> <p>c) The uncertainty in relation to dates and duration of the proposed temporary landtake</p> <p>d) The impact of the proposed new permanent roundabout and the new kerb line which cuts through Cosgrave site boundary - refer Figure 4 below (Figure 4 - Overlay of the proposed new permanent roundabout on the subject site)</p> | <p>With regard to these queries TII would respond as follows:-</p> <p>a) See response item number (1) above.</p> <p>b) As presented in Appendix A9.5 Scheme Traffic Management Plan, temporary traffic management measures are proposed at this location to maintain traffic flows into Northwood Ave and onto Gullivers Retail Park at all times during the construction and into the operational phase of MetroLink . The TTM proposed in the vicinity of Northwood Avenue involves alterations to the junction of R108/Northwood Avenue, however access will be maintained throughout the works.</p> <p>c) The uncertainty around dates is only linked to the date the Railway Order is granted. While maintaining access throughout the construction phase, works impacting the roads layout locally will take 5 to 6 years. These works would commence about 12-18 months after the granting of the Railway Order. The lands referred to (and specifically required to maintain access into the Gullivers Retail Park) would also be taken over circa 12 months after the granting of the RO and would be used for 3 to 4 years, before being fully reinstated and handed back.</p> <p>d) As noted in the Planning Report, while the requirement to prepare a masterplan in this area remains in the draft Fingal Development Plan, the main elements of the Masterplan are not specified, with implementation of the masterplan also not stated to occur within the lifetime of the Fingal Development Plan. Therefore the impact of a potential future roundabout at this location has not been assessed as part of the EIA.</p> <p>The lands are zoned for Metro Economic Corridor in the Fingal Development Plan 2023-2029. The potential of these lands to development to this density and mix is predicated on Metrolink.</p> |  |

| Our Reference: BovNAMA - Barrysparks Lands. Scheme Reference: Railway (Metrolink-Estuary to Charlemont via Dublin Airport) Order 2022. ABP Ref: 314724. Submission on Behalf of Bovaie ULC on Proposed Scheme and CPO. (Compulsory Purchase Order) of Lands |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| 1                                                                                                                                                                                                                                                           | Introduction | 3 & 4    | <p>The development of the lands immediately adjacent to major high capacity public transport should ideally take place in advance and in tandem with the proposed scheme as this would maximise the patronage of the Metrolink and hence its economic viability. Bringing forward lands for development in tandem with the Metrolink also accords with good planning practice.</p> <p>The lands are currently zoned as “<i>ME - Metro Economic Corridor - Facilitate opportunities for high density mixed use employment generating activity and commercial development, and support the provision of an appropriate quantum of residential development within the Metro Economic Corridor</i>” in the current Fingal County Development Plan (CDP) 2017 to 2023.</p> <p>A draft Statement of Common Ground has been prepared between TII &amp; Bovale ULC in respect to the subject lands and it is hoped that a final agreement between Til and Bovaie ULC will be in place in the coming weeks. This will, if agreed, allow for the redevelopment of the retained lands in advance of, or in tandem with, the proposed Metrolink Scheme.</p> <p>We would, therefore, hope to be able to appraise ABP further on these ongoing discussions in due course.</p> | <p>The development of the subject lands is dependent on the policies and objectives of Fingal County Council and will be independent of the Railway Order for Metrolink.</p> <p>Over the last number of years TII have held a number of constructive meetings with Bovale ULC and Balheae Properties ULC and we have confirmed our support for land adjacent to Lissenhall/Estuary Station being developed in tandem with the proposed scheme. TII will continue to engage with Bovale ULC and Balheae Properties ULC to support the proposed development of these lands in tandum with the proposed scheme on the understanding that commmencement of those works do not in any way impede TII's ability to deliver the MetroLink project in accordance with the construction programme.</p> <p>TII support will be subject to the proposed development being in accordance with proper planning and sustainable development and in compliance with the policies and objectives of Fingal County Council.</p> <p>TII can confirm that a Memorandum of Undertanding/Statement of Common Ground is in place to this effect, between the parties.</p> |

| RE: Submission on Behalf of Bovale ULC and Balheary Properties ULC on Proposed Scheme and CPO (Compulsory Purchase Order) of Lands |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| 1                                                                                                                                  | Letter       | 1        | <p>The scheme as currently submitted to An Bord Pleanala (ABP) would, if approved, mean that with the temporary and permanent land-takes proposed, little if any development could, in reality, take place on the adjacent retained lands until after the Metro is complete.</p> <p>The development of the lands immediately adjacent to major high capacity public transport should ideally take place in advance and in tandem with the proposed scheme as this would maximise the patronage of the Metrolink and hence its economic viability. Bringing forward lands for development in tandem with the Metrolink also accords with good planning practice.</p> <p>The lands are currently zoned as “<i>ME - Metro Economic Corridor - Facilitate opportunities for high density mixed use employment generating activity and commercial development, and support the provision of an appropriate quantum of residential development within the Metro Economic Corridor</i>” in the current Fingal County Development Plan (CDP) 2017 to 2023.</p> <p>We would like to bring to the attention of ABP the proposed timeline for the completion of the proposed Metrolink, which we estimate would be completed by the early 2030s at the earliest and more realistically by 2035. Therefore, it could be the mid to late 2030s before any significant development of the lands immediately adjacent to the proposed Lissenhall Metro stop without modification to the proposed scheme. Clearly this is something that is of significant concern to our client.</p> | <p>The development of the subject lands is dependent on the policies and objectives of Fingal County Council and will be independent of the Railway Order for Metrolink.</p> <p>Over the last number of years TII have held a number of constructive meetings with Bovale ULC and Balheaeey Properties ULC and we have confirmed our support for land adjacent to Lissenhall/Estuary Station being developed in tandem with the proposed scheme. TII will continue to engage with Bovale ULC and Balheaeey Properties ULC to support the proposed development of these lands in tandem with the proposed scheme on the understanding that commencement of those works do not in any way impede TII's ability to deliver the MetroLink project in accordance with the construction programme.</p> <p>TII support will be subject to the proposed development being in accordance with proper planning and sustainable development and in compliance with the policies and objectives of Fingal County Council. TII can confirm that a Memorandum of Undertanding/Statement of Common Ground is in place to this effect, between the parties.</p>                                                                                                                                                                                                                                                              |
| 2                                                                                                                                  | Letter       | 1        | <p>Figure A attached shows proposed modifications to the Metrolink scheme, which if approved by ABP would allow for the integrated development of the retained lands with the proposed Metrolink scheme. This in turn would allow for the orderly and timely delivery of appropriately development on the adjacent lands. The main changes proposed include:</p> <ul style="list-style-type: none"><li>• Allowing for the delivery of access via the Swords Western Distributor Road off the R132 to the retained lands that would facilitate appropriate development on the retained lands.</li><li>• Improved linkages (or provision for same) between the proposed Lissenhall stop and the retained lands.</li><li>• There are two areas of land included in the CPO which do not appear to be necessary or required for the proposed scheme. Our client wishes to retain control over these lands.</li></ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | <p>Regards bullet points 1) and 2), TII would note that they have provided infrastructure to facilitate the Park &amp; Ride at this location. The amendments proposed by this submission extend beyond the scope of the MetroLink Project and the remit of TII. The additional accesses and road linkage proposed therefore would need to form a separate planning application by Bovale ULC and Balheary Properties ULC and would need to be agreed with FCC. TII have had a number of meetings with Bovale ULC and Balheary Properties ULC and have expressed our support for such works to be carried out by the developer subject to those works being in accordance with proper planning and sustainable development and in compliance with the policies and objectives of Fingal County Council.</p> <p>Further consultations with the developer in relation to these proposals are required in order to ensure any access provision or modification does not compromise the construction of MetroLink Infrastructure or the operation and maintenance of the MetroLink Station, Park &amp; Ride and Railway Infrastructure generally.</p> <p>Regards bullet point 3), the areas of land referred to, as outlined in EIAR Chapters 5 (MetroLink Construction Phase) and 21 (Land Take), are required for a construction compound and logistics site to enable the construction of Estuary Station.</p> |

| RE: Submission on Behalf of Bovale ULC and Balheary Properties ULC on Proposed Scheme and CPO (Compulsory Purchase Order) of Lands |              |          |                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| 3                                                                                                                                  | Letter       | 2        | Our client also has concerns that the proposed large Multi Storey Car Park (MSCP) would not provide an appropriate frontage development to the Lissenhall lands along the section of the Swords Western Distributor Road included in the scheme. | <p>TII consider that an appropriate frontage is provided to the car park.</p> <p>The location of the Park &amp; Ride was chosen as it provides good access from the high capacity M1 junction and is located at sufficient distance from the M1 junction to enable construction of a right turn lane in the median of the R132 to allow access to the site. It is located outside the floodplain and aligns with the Fingal County Development Plan planning policy.</p> <p>The form of the car park adapts to the surrounding landscape. The building's ground level has been dropped below the track alignment level to reduce the visual impact. The building shape is a combination of three large modules separated by four vertical ramps. The use of modules facilitates a graduated increase in building height towards the centre of the structure further reducing the visual impact</p> <p>With its concrete structure and metal profiled facade that lightly and delicately clads the car park, the building takes the form of a contemporary yet highly restrained piece of infrastructure.</p> <p>The building is set back from the Swords Western Distributor Road and a landscape strategy has been developed to soften the visual impact of the building when viewed from the north. TII are therefore of the view that the structrue does provide an appropriate frontage development to the Lissenhall lands along the section of the Swords Western Distributor Road included in the scheme.</p> <p>Further details for the Park &amp; Ride can be found in EIAR Chapter 4 Description of the MetroLink Project, section 4.14.3 and the photomontages contained in EIAR Appendix A27.1.</p> |

| Submission No.                                                                                                                                             |              |          | 025                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| Letter Re: Proposed Metrolink - Mater Station (Berkeley Rd. Area) - Berkeley Road and District - A place to call home or a just somewhere to pass through? |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 1                                                                                                                                                          | Letter       | 1        | <p>The MetroLink plans would, if carried through, negatively affect the very important role St. Joseph's plays in the daily life of the area. Access by car or on foot would be severely limited. The celebration of baptisms, marriages and funerals would be almost impossible. Filipino and Syro-Malabar communities also hold ceremonies in our church. Many travel from outside Dublin. Those with cars require parking. The church is both a spiritual and a social centre for many people. Wheelchair users attend the church, as do others with limited mobility. Access is vital. The MetroLink plans appear to have been drawn up without any consideration at all for the fact that St. Joseph's is very dear to many people, both within and beyond the parish.</p> | <p>While the plans to build a station under Four Masters Park Mater next to St Joseph's Church will have an impact on the church, it is TII's intention to mitigate these impacts as much as possible such that the current day to day use of the church remains unaffected as the project is progressed.</p> <p>TII confirm that throughout MetroLink construction access will be maintained for parishioners and others to the Church building and offices. While the premises of the Parish office and the offices of the Dublin Interdiocesan Marriage Tribunal lie above the proposed route of the Metrolink tunnel, these offices will still be able to function and access will be maintained, and the Church will remain both safe and available for worship and private prayer. TII also confirm that the Church and presbyteries with offices will not be taken out of use.</p> <p>Vehicular access for funerals, weddings, emergency services and car parking for those who need mobile assistance will be maintained during construction. Vehicles will be able to access the Church via the entrance on Eccles Street. During Phase 1 construction, all traffic movements will be maintained on Berkeley Road and Eccles Street. During Phase 2 and 3, there will be restricted access to Eccles Street from Berkeley Road. Vehicles seeking to route from Berkeley Road to Eccles Street will have to divert and approach Eccles Street from the N1 via either North Circular Road or Blessington Street (EAIR Chapter, Table 9.90).</p> <p>As identified in the EIAR (Section 5.10.7), construction activity will take place in the Four Masters Park, with parts of the Church grounds also within the Project Boundary. However, pedestrian access will be maintained to St Joseph's Church from both Berkeley Road and Eccles Street throughout the duration of the construction of the Mater Station. Construction activities that may impact on places of worship (e.g. noise generation near churches) will be timed to occur outside of mass/service hours to minimise impacts.</p> <p>EIAR Appendix A9.5 section 7.7. details the construction traffic management associated with Mater Station, indicating that during the Advanced Enabling Works, there will be no diversions or road closures that will impact local access in the vicinity of the Church. Similarly, whilst footpaths will be impacted, diversions will be implemented to maintain pedestrian access.</p> <p>During the Main Works, the closure of access to Eccles Street from Berkeley Road to all traffic except for Emergency Vehicles will impact on local access, however diversions have been identified. Vehicles seeking to route from Berkeley Road to Eccles Street will be diverted and approach Eccles Street from the N1 via either North Circular Road or Blessington Street. Vehicles travelling away from Eccles Street, will be diverted southbound along Nelson Street, and from there can continue to travel along Berkeley Street, Mountjoy Street or Blessington Street. General traffic access to the Church will be maintained through the detailed diversion, including provision of reduced width access along Eccles Street for Emergency Vehicles. For pedestrians during this phase of works, appropriate signage and crossing facilities will be put in place to navigate around the site footprint.</p> <p>When the station is completed and operational, it will provide better connectivity for the church and the broader community. As detailed in the EIAR Chapter 11 (Population &amp; Land Use ) - Section 11.5.3 Operational Phase, the proposed underground Mater Station shall facilitate high quality public transport access to the hospital and surrounding area and provide for the reinstatement of an improved public realm. There will be one entrance to Mater Station, situated at the northwest corner of the park and close to the Hospital access, which is conveniently located to walk to Mater Hospital, St Joseph's Church and Berkeley Road. The station location will also connect with bus services to and from Dublin City Centre, with bus stops on Berkeley Road.</p> |

| Letter Re: Proposed Metrolink - Mater Station (Berkeley Rd. Area) - Berkeley Road and District - A place to call home or a just somewhere to pass through? |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| 2                                                                                                                                                          | Letter       | 2        | Noise, too, is a major issue. Will the peaceful atmosphere of St. Joseph's be shattered by the sound of machinery? Will the noise of tunnelling drown out the ceremonies?                                                                                                                                                                                                                                               | <p>Potential impacts associated with noise and vibration during the construction and operational phase of MetroLink are addressed in EIAR Chapter 13 (Airborne Noise &amp; Vibration), with mitigation measures proposed where required. EIAR Chapter 14 (Ground-borne Noise and Vibration) includes the specific control measures proposed across the Project to control vibration sources with the potential to result in disturbance to building occupants or building damage.</p> <p>Airborne Noise &amp; Vibration impacts<br/>EIAR Chapter 13.5.2.6.6 Mater Station sets out the assessment of airborne noise and vibration during the construction of Mater Station and includes the consideration of a number of receptors on Berkeley Road, including St Joseph's Church.</p> <p>In order to manage and mitigate airborne noise, the Contractor will be required to set out their proposals in the Construction Environmental Management Plan (CEMP), an outline of which is included in EIAR Appendix A5.1. The Construction noise threshold will be mandated to the contractors and enshrined in the Railway Order. Before commencing works, Contractors will then need to provide best practice mitigation to reduce the impacts. If the Contractor is unable to reduce the impacts sufficiently, and the residual levels are such that widespread community disturbance or interference with sleep is likely to occur, TII will consider whether the provision of further mitigations would be appropriate. Please refer to the TII Airborne and Groundborne Noise Mitigation Policy (Appendix A14.6).</p> <p>Groundborne Noise &amp; Vibration<br/>The predicted groundborne noise and vibration during tunnelling is set out in Tables 14.32 and 14.33 of EIAR Chapter 14.4.1.9 AZ4 and in Table 14.29 of EIAR Chapter 14.4.1.1.8. The predicted groundborne noise during TBM passage is 49 dB which is above the Threshold Level of 40 dB indicating a significant adverse impact for the short-term duration of up to 2-weeks. Predicted vibration during TBM passage is presented in Table 14.32 which shows a not-significant level of 0.265 ms-1.75 at St Joseph's Church, below the threshold level of 1.6 ms-1.75 VDV.</p> <p>Unfortunately, there are no effective methods available to reduce groundborne noise or vibration from TBMs at source. The principal mitigation measures aimed at minimising impacts are as follows:</p> <ul style="list-style-type: none"><li>• Advance public consultation and stakeholder engagement can greatly reduce the significance of groundborne noise effects during construction, as building occupants would be prepared for the passage of the TBM and resultant elevated noise and vibration levels.</li><li>• TII will accept and consider applications for additional measures on a case-by case basis, in accordance with its Noise and Vibration Mitigation Policy (see Appendix A14.6).</li></ul> |
| 3                                                                                                                                                          | Letter       | 2        | It is crucial, too, that the structure of the church be protected. The building dates from 1880 (the belfry was added 10 years later). Inside, the church is bright, filled with light streaming in through stained glass windows (some by Harry Clarke). What guarantee is there that if tunnelling goes ahead, the church won't be affected or made unsafe? This is a big concern to all who care about St. Joseph's. | <p>EIAR Appendix A 5.17 Building Damage Report covers the assessed impacts of construction generated ground movements and settlement on property. Table 5.2 of this report shows that St Joseph's Church has been assessed as falling within the 'slight damage' category currently, an explanation for which can be found in Table 4-4 of the aforementioned report. TII would also like to confirm that the assessment undertaken takes account of the fact the Church structure extends below ground level. Recognising the cultural and historical significance of the building, it has been designated as "special" and hence a further Stage 3 refined assessment will be undertaken that will take account of final design and construction methodology details most likely utilising advanced numerical modelling techniques and further surveys of the building. The results of this refined assessment typically show that earlier assessments are conservative and over estimate the likely impact of construction generated ground movements.</p> <p>St Joseph's Church has also been identified as a location where pre-construction condition surveys will be undertaken, subject to the property owners permission, and any required pre-construction repair work identified and undertaken. Monitoring instrumentation will also be installed to monitor the performance of the works and potential environmental impacts, including those discussed above to ensure that acceptable limits are not breached.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

| Letter Re: Proposed Metrolink - Mater Station (Berkeley Rd. Area) - Berkeley Road and District - A place to call home or a just somewhere to pass through? |              |          |                                                                                                                                                                                                                                                                                                                                                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| 4                                                                                                                                                          | Letter       | 2        | <p>Adjacent to the church is the lovely Mater Park. The park is home also to other wildlife, such as foxes and squirrels. We cannot allow this precious ecosystem to be destroyed. If that happens, part of ourselves will die too.</p> <p>Sadly, Dublin City Council, for whatever reason (the prospect of MetroLink?) no longer maintain the park.</p> | <p>TII acknowledge the local importance of the Mater Park. The Mater Park is classified as having two primary habitat types; Amenity Grassland (Improved) (GA2) and Scattered Trees and Parkland (WD5). Scattered Trees and Parkland is a locally important (higher value) habitat type and is relatively species-rich in the context of surrounding habitats (Section 15.3.4.25, Chapter 15 Biodiversity). Construction of the Mater Station will have a likely significant effect at a local geographic scale, however measures will be implemented to reduce the scale of habitat loss during construction. Trees that lie within or along the project boundary that are not directly impacted by the project will be retained. Where suitable, trees will be fenced off at the outset of works and for the duration of construction to avoid structural damage to the trunk, branches or root systems of the trees (Section 15.5.1.2.1).</p> <p>Mitigation measures will also be implemented during construction to mitigate the mortality risk and the effects of habitat loss and disturbance to breeding birds, which will ensure that there is not a likely significant negative residual effect on any breeding bird population (Section 15.6.6.1).</p> <p>TII acknowledge that the construction of the proposed project will result in the loss of mammal habitat within the boundary of the proposed project, however given the low number of red squirrels and foxes that are likely to be affected and alternative suitable habitat available locally, the effects of habitat loss associated with construction works are unlikely to affect the long term viability of their local populations. Therefore, habitat loss during construction is unlikely to affect the species' conservation status or result in a significant negative effect, at any geographic scale (Section 15.4.2.4.4).</p> <p>Following completion of the Mater Station, the park will be reinstated, allowing for the re-establishment and re-use of wildlife. MetroLink has no involvement in the current maintenance or access to the park, however on completion of construction works. To confirm, TII will own and maintain the park.</p> |
| 5                                                                                                                                                          | Letter       | 2        | <p>For patients and for local residents, fresh air and light are as essential as ever, but do not appear to be taken into account on the MetroLink plans.</p>                                                                                                                                                                                            | <p>Chapter 16 of the EIAR (Air Quality) assesses the likely effects of the proposed Project on Air Quality during the construction phase with mitigation measures proposed where required. Mater Hospital and residential properities are classified as high sensitivity receptors with respect to human health within the assessment.</p> <p>Strict dust prevention will be in place at all times to minimise any potential emissions and these procedures will be strictly monitored and assessed. In the event of dust nuisance occurring outside the site boundary, movements of materials likely to raise dust will be curtailed and satisfactory procedures implemented to rectify the problem before the resumption of construction operations. In relation to aspergillus, survey and prevention works will take place before construction commences by a competent contractor in proximity to any sensitive buildings and in particular in proximity to the Mater Hopsital site which utilises passive ventilation on Eccles Street. The prevention works will involve sealing the windows to the facades that are in close proximity to the hospital; these measures will also prevent fugitive dust entering the hospital through windows.</p> <p>Before commencing relevant works, an Air Quality Management Plan shall be prepared and submitted for approval to the relevant planning authority. The plan must include all appropriate dust and emissions mitigation measures applicable to the circumstances of the relevant site, based on the local authority requirements and industry best practices.</p> <p>It is not anticipated that there will be impacts to natural light at Mater Hospital. It is acknowledged that the proximity of hoardings will have the effect of reducing light to residential properties and as such TII will be engaging with the owners and occupiers of the effected properties to arrive at appropriate alternative arrangements to mitigate these construction phase effects.</p>                                                                                                                                                                                              |

| Letter Re: Proposed Metrolink - Mater Station (Berkeley Rd. Area) - Berkeley Road and District - A place to call home or a just somewhere to pass through? |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 6                                                                                                                                                          | Letter       | 3        | Situated in the Mater Park, near Berkeley Road/Eccles Street intersection is the Four Masters Cross (1876) by James Cahill, commissioned by Sir William Wilde (father of Oscar). This monument was erected in 1876 in honour of four Franciscan Friars who preserved the Ancient Annals of Ireland from destruction. It would be an act of cultural vandalism to remove this cross, erected in 1876, and which is of such historic and aesthetic significance. | <p>EIAR Chapter 26 (Architectural Heritage) assesses the impact of the MetroLink Project on Architectural Heritage during the Construction Phase and Operational Phase and Table 26.18 presents the Architectural Heritage Constraints at Mater Station, including the Four Masters Cross.</p> <p>The cross will be removed into safe storage by a specialist heritage contractor prior to the construction of the station and removed to a place of secure storage in accordance with a conservation method statement to be provided by the Project Conservation Architect and it is to receive necessary conservation and repairs. On completion of the construction of the station the cross is to be returned to the park and re-erected in a place to be agreed as part of the landscaping design of the park and this is to be carried out in accordance with a conservation method statement to be prepared by the PCA.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| 7                                                                                                                                                          | Letter       | 3        | Austin Clarke mentions the Mater Park in his memoir “Twice Around the Black Church”. With its natural beauty, an oasis in a grey cityscape, and its artistic and literary connections, how can anyone even contemplate “removing” the Mater Park?                                                                                                                                                                                                              | <p>TII fully recognise that Four Masters Park has very important heritage and architectural connnotations and the station urban realm design principles to reinstate the area reflects this:</p> <ul style="list-style-type: none"><li>* Realignment of the Four Masters Memorial;</li><li>* Rearranging the footpath to provide enough pedestrian space for the main entrance;</li><li>* Reinstatement with enhanced planting of the Four Masters Park and its existing railings; and</li><li>* Replacement of existing trees.</li></ul> <p>The construction of Mater Station in the Four Masters Park will affect the park itself, both Eccles Street and Berkeley Road, and St Joseph’s Church, requiring stringent environmental management measures during construction and restoration of the urban realm. Design changes that were introduced to reduce impacts on heritage include the following: prior to the construction phase the railings, gates, plinth walls, Healing hands sculpture and Celtic cross at Four Masters Park (RPS, Reference 737) will be removed, stored carefully and reinstated following the completion of construction of the proposed Mater Station.</p> <p>Following the completion of the station box, the Park will be reinstated on the surface to a shape and form similar to the existing Park with updated planting, including new trees along each side of the triangle. The railings and gates, the Four Masters Cross and the sculpture will all be reinstated to slightly amended alignment and locations. The existing garden and grotto adjoining and within the grounds of St Joseph’s Church will also be reinstated on the existing footprint and in similar style to the Four Masters Park proposals with proposed trees. This allows the accommodation of the introduced elements of the station which will now be expressed at surface level. It also ties in with the axial elements related to the original Mater building and which will be expressed in the proposed shared surface at its front.</p> |

| Letter Re: Proposed Metrolink - Mater Station (Berkeley Rd. Area) - Berkeley Road and District - A place to call home or a just somewhere to pass through? |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| 8                                                                                                                                                          | Letter       | 3        | <p>Also, what of the businesses along Berkeley Road, e.g. two chemists' shops, photography studio, cafes, flower shop, dry cleaners etc.? How will they manage if Berkeley Road is closed to traffic and buses rerouted for any length of time? The danger is that they will close, and we will have even more derelict buildings. The village-like character of the road will be gone for ever. What will come in its place? Noise, dirt and pollution, of which we have more than enough already.</p> | <p>TII plans for the construction of the Station under Four Masters Park do not involve closing Berkeley Road. Although a section of Berkeley Road is diverted for a short duration and there is a loss of some parking as the works progress, TII will work with local businesses and community groups to limit impact and maintain accesses to businesses and properties at all times along Berkeley Road.</p> <p>EIAR Chapter 5, MetroLink Construction Phase, section 5.4.12 Traffic Works explains that traffic management plans for the construction phase of the Project have been developed to minimise the impact on road users, and to maintain access to businesses and other premises. Prior to implementation, all traffic management measures will be agreed with Dublin City Council and where relevant, consultation with An Garda Síochána and other statutory stakeholders will be undertaken. The design of traffic management measures and highways works is based on achieving the key objective of maintaining continual access to all properties during the works. Where necessary, a safe alternative route will be provided for pedestrians and vulnerable road users, such as children, and persons with restricted mobility, to maintain pedestrian access to premises. Where detour routes are required, these will be kept as short as possible and detour signage will be clear and easy to understand. All construction sites will be designed to be as unobtrusive as possible.</p> <p>Impact on parking, particularly on Berkeley Road has been considered with a summary of mitigation measures in Construction Phase are presented in Table 9.147 of the EIAR Chapter 9 (Traffic &amp; Transport). The mitigation measure for Berkeley Road for general traffic, parking and loading is to monitor if closures are required at all stages of the construction phase, or if spaces can be reinstated temporarily throughout the works.</p> <p>Further details on the traffic management plans providing details of proposed: construction traffic routes; traffic diversions; and parking impacts, together with a full impact assessment around the proposed Mater Station are provided in Section 7.7 of Appendix 9.5 Scheme Traffic Management Plan.</p> <p>Please refer to response item (2) in relation to predicted impacts of noise and vibration at this location. Please refer to response item (5) in relation to impacts to air quality.</p> |
| 9                                                                                                                                                          | Letter       | 5        | <p>Also, any closure of Berkeley Road would severely affect Public Health Nurses and others (e.g. Drivers who deliver “Meals on Wheels”) as they carry out their very important work in the parish. They are a lifeline to many ill and elderly people, allowing them to remain in their own homes for as long as possible. Access to Berkeley Road, and the roads leading from it, is essential for these vital services.</p>                                                                          | <p>Please refer to response (8) above in relation to the proposed traffic management associated with Mater Station construction.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

| Letter Re: Proposed Metrolink - Mater Station (Berkeley Rd. Area) - Berkeley Road and District - A place to call home or a just somewhere to pass through? |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| 10                                                                                                                                                         | Letter       | 3        | <p>We accept that this area has a very large transient population e.g. many people travel from all over the country to the Mater Hospital. We do not wish to see these people discommoded. However, many of those coming to the hospital from the country (my own relatives included) would rather travel by car rather than risk the vagaries of public transport, particularly when a person is ill and frail. Secure parking, at a reasonable rate, should be provided by the hospital for patients and for staff.</p> | <p>As presented by EIAR Appendix A9.5, Figure 7.32, general traffic access to the hospital will be maintained through the detailed diversion, i.e. Eccles Street will not be closed in its entirety, access will be facilitated for all traffic as far as the area of reduced width, which will be used for Emergency Vehicles only. Therefore, there should be minimal impact on the Hospital's operations throughout the works.</p> <p>Access to the hospital is maintained at all times for staff, patients, patient visitors, suppliers and goods and services vehicles. Similarly, access to the emergency department and underground car park is maintained, and can be accessed from Eccles Street via the N1.</p> <p>TII will continue to work closely with Mater Hosptial throughout the duration of the construction works to ensure minimal impact to the delivery of the new Major Trauma Centra, which is of national importance. TII will closely monitor all closures to determine if they are required at all points of the works, or if they can be reinstated temporarily. As noted, access to Eccles Street will be maintained from the N1 direction, with the closure only impacting on the western junction with Berkeley Road. All diversions and closures will be displayed on appropriate signage, and a comprehensive publicity and information campaign will take place prior to the commencement of the Construction Phase. A Project Construction Traffic Forum will be formed, including representatives from key stakeholders such as Mater Hospital to ensure any issues or concerns can be addressed quickly and efficiently.</p> <p>On street parking availability is covered by the EIAR in Chapter 9, section 9.6.1.2.4.5, Parking and Loading Construction Impact Assessment, with particular detail provided in EIAR Appendix A9.5 Scheme Traffic Management Plan, section 7.7 relating to Mater Station.</p> <p>There will be slight impacts for on-street loading and parking during the Enabling Works associated with Mater Station. These are in the form of a loss of parking bays for both on street loading facilities and general parking. This loss of parking will at its peak be approximately 7 parking spaces, however generally only one or two spaces will be lost through the phasing of the work.</p> <p>During Phase 1 of the Main Works, the Pay and Display parking spaces along the eastern side of Berkeley Road will be removed, resulting in the removal of 12 on-street parking spaces. Approximately 5 on-street Pay and Display and Resident Permit parking spaces will be removed from the western side of Berkeley Road. A temporary location for the taxi rank will be agreed with DCC.</p> <p>During Phase 2 and 3 of the Main Works at Mater Station, the Pay and Display parking spaces along the eastern side of Berkeley Road will be removed. This will result in the removal of 12 on-street parking spaces. On the west side of Berkeley Road, five on-street Pay and Display and Resident Permit parking spaces will be removed as well as a loading bay that will be relocated.</p> <p>A summary of Mitigation Measures in Construction Phase are presented in Table 9.147 of the EIAR Chapter 9 (Traffic &amp; Transport). The mitigation measure for Berkeley Road for general traffic, parking and loading is to monitor if closures are required at all stages of the construction phase, or if spaces can be reinstated temporarily throughout the works.</p> <p>Once MetroLink is operational, to accommodate the station entrance, the current footways and traffic lanes on Eccles Street will be realigned as part of the proposed Project. The realignment of Eccles Street, and the widening of the footway on Berkeley Road will result in the loss of on-street parking at both locations. Approximately 20 on-street parking spaces will be lost on Eccles Street, while approximately 14 spaces will be lost on Berkeley Road, due to the provision of a signalised crossing in proximity to the station entrance. While there will be a loss of commercial and residential parking and loading infrastructure as a result of the proposed Project, the modal shift from road to public transport when the proposed Project is in place will reduce the overall demand on parking and loading facilities, thus reducing the severity of the impact.</p> |

| Letter Re: Proposed Metrolink - Mater Station (Berkeley Rd. Area) - Berkeley Road and District - A place to call home or a just somewhere to pass through? |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| 11                                                                                                                                                         | Letter       | 3        | However, by situating the MetroLink station at Mater Park and having the line run under St. Joseph's Church, these oases of peace would be lost or changed for ever.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | <p>Mater Station is within the functional area of DCC and is zoned in the current DCDP 2016-2022 and the Draft DCDP 2022-2028 as follows:</p> <p>* Z9 – 'To preserve, provide and improve recreational amenity and open space and green networks.'; and</p> <p>* Z2 – 'To protect and/or improve the amenities of residential conservation areas'.</p> <p>The areas required for construction are a larger land take, albeit for a temporary period. The lands affected also comprise the same land use zoning objectives as the permanent works area.</p> <p>The station and ancillary elements, as a Public Service Installation is Permissible on lands zoned Z9 on the condition that it "would not be detrimental to the amenity of Z9 zoned lands."</p> <p>On completion of the station box, the existing Four Master Park and its surface features will be substantially reinstated with the visual amenity of the area largely restored, much to its existing condition and improved in respect of the shared space to the front of the original hospital building, the refinement of the park layout and the tree and plant species selection. Overall, the predicted effects on the visual environment and on visual amenity when the station is operational will, in the longer term be significant and positive.</p> <p>As a result, it is considered that the works "would not be detrimental to the amenity of Z9 zoned lands" and would therefore be compliant with the Z9 zoning objective.</p> <p>As noted in reponse item (4) above, TII will own and maintain the park.</p> |
| 12                                                                                                                                                         | Letter       | 4        | <p>Is it possible that the Luas Finglas extension could be extended further to Dublin Airport? Surely it would be less invasive and less expensive than what is proposed in the Metrolink plans. The plans for Luas Finglas read as follows: "Luas Finglas will be constructed mostly in grass track, an attractive innovation in Ireland, while a cycle and pedestrian path will be constructed along much of the line, providing family-friendly, sustainable, convenient access between northside communities and the city centre". (National Transport Authority).</p> <p>Surely, this sounds a better option than what is "coming down the track" to Berkeley Road and other areas along the MetroLink route? It would be a better option too for passengers, a safer, more comfortable journey with air and natural daylight. In the unfortunate event of an accident, or a terrorist incident, emergency services could access the scene more easily if the vehicle was travelling above ground. Just because other cities have metro systems, do we have to blindly follow suit? Please think again about extending the Luas.</p> | <p>MetroLink is provided for in the previous Transport Strategy for Greater Dublin Area (2016-2035) and the current Transport Strategy for Greater Dublin Area (2022-2042) and as supported by the Dublin City Development Plan 2022 - 2028. TII's role is to deliver the MetroLink project as provided for in policy. Although policy is not a matter for TII, in the Fingal North Dublin Transport Study, alternative options were considered including several light rail options. Extending the Luas line from Broombridge to Finglas (LR2) and on to Dublin Airport and Swords was considered, however it was eliminated from further consideration as the journey time for this option would be longer than other options.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| 13                                                                                                                                                         | Letter       | 4        | Finally, the Berkeley Road area is a place where people live and do business. We do not want to see it turned for years into a construction site, to emerge finally as a mere staging post on the MetroLink line. No metro is worth the air pollution, noise and chaos indicated by these plans. If there is money available, let it be spent on housing and health, instead of sending our young people off to the airport in underground trains to live abroad. Put simply, for this area, MetroLink spells longterm pain, with no gain at all.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | The need and background to the Proposed Project are set out in full in section 3 of Chapter 3: Background to the MetroLink Project and outlines the anticipated Environmental, Economic and Social benefits that the Proposed Project will bring to Swords, Dublin Airport and City Centre Corridor and the Greater Dublin area. As indicated in the responses above, with the proposed appropriate mitigations, the severity of impacts to noise, air quality and traffic will be greatly reduced.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| 14                                                                                                                                                         | Letter       | 4        | We wish to keep our church, our beautiful park, our shops and our services. This is an old and historic area, with great literary and artistic heritage. We are proud of it. We do not want to lose it. It is home.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | Thank you for your submission. We have reviewed your submission and provided responses for the observations/concerns raised in detail above.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

| Letter Re: Proposed Development of Metro [District 7] OBJECTION |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| 1                                                               | Letter       | 1        | On first hearing about the proposed Metrolink I was delighted as it would provide a service for the public and help bring custom to the area, however on further examination it appears to have the potential to be a total nightmare with possible severe negative impacts during its development and construction phases, for me and my, very specific location, should such development not be done sympathetically regarding my business, my customers and my renters. | <p>Thank you for your submission and for sharing your observations with regards to the MetroLink project to which we have responded below. TII acknowledge your concerns around the short-term impacts that may arise as a result of the Project's construction. Where significant impacts have been identified, appropriate mitigation measures have been proposed to reduce the severity of the impact. Please refer to the responses below in relation to mitigation measures to reduce the impacts of traffic, noise and vibration, air quality, and building damage.</p> <p>Chapter 3 (Background to the MetroLink Project) details the strategic need for the Project, highlighting the national, regional and local challenges that will be addressed through its delivery. MetroLink will positively contribute to addressing challenges of compact growth, sustainable mobility, enhanced regional connectivity, quality international connectivity, transition to a low carbon and climate-resilient society, enhanced amenity and heritage, maximising sustainability gains, strong economy supported by enterprise innovation and skills, access to quality childcare, education and health services, and strengthened rural economies and communities.</p> <p>It is anticipated that once operational, the stations will attract a wide range of businesses keen to take advantage of the projected footfall. This will help to boost economic activity and generate an improvement to the urban public realm. This will see uplifts in office and retail rental values, declines in vacancy rates and boosts to walking behaviour. Heavy traffic can make it harder to access services such as pharmacies, especially when roads need to be crossed. This can influence social inclusion within the community and particularly more vulnerable groups that may not have access to private vehicles. Whilst TII understand that the temporary impacts associated with the construction of MetroLink may be significant in some cases, the long term benefits that will be delivered once the Project is operational will be greater.</p> |

| Letter Re: Proposed Development of Metro [District 7] OBJECTION |              |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| 2                                                               | Letter       | 1        | <p>At no time has anyone approached me as to how the construction program is going to be undertaken and what potential impact this process is likely to have on my business concerns. It was only on close examination of a graphic on the technical document provided on the internet that I could see that the pharmacy and apartments were effectively positioned in a building or structure, presumably to protect somebody from something, for an undefined period and cordoned off by a 10ft high hoarding which completely obstructs the view anyone may have of the pharmacy. No-one has outlined what this is about, the purpose of same or the possible impact on access and egress regarding 18 Berkeley Road. The graphics now available online show the hoarding mentioned above effectively abutting my property which would be totally unacceptable for any length of time!</p> | <p>TII have undertaken extensive consultation across the route of MetroLink and have listened carefully to the concerns of stakeholders and the community, as documented by EIAR Chapter 8 (Consultation). It is TII's intention to continue to consult with the community through the establishment of local community forums for local business and residents throughout both the construction and operational phases of the Project.</p> <p>TII acknowledge the concerns you have around the proximity of your property to the construction site at Mater Station. Potential impacts associated with the construction phase activities of the proposed Project on the residences and businesses are addressed in Chapter 11 (Population &amp; Land Use) of the EIAR, with mitigation measures proposed where required. The construction site will be located in Four Masters Park, but with a proportion of the works also to be undertaken under Berkeley Road. This will give rise to inconveniences and disturbances affecting activities and services at a localised level and on Berkeley Road and in particular outside properties 18 to 22. The potential noise and vibration impacts from construction activities are detailed in Chapter 13 (Airborne Noise &amp; Vibration) and Chapter 14 (Groundborne Noise &amp; Vibration), while disturbances to the local road network are detailed in Chapter 9 (Traffic &amp; Transport), and dust risk as detailed in Chapter 16 (Air Quality).</p> <p>Measures to mitigate and monitor these impacts as a result of construction activity across the proposed Project are detailed in Chapter 5 (MetroLink Construction Phase) and summarised in Chapter 31 (Summaries of the Route Wide Mitigation &amp; Monitoring Proposed).</p> <p>Additionally, the appointed contractor will prepare detailed design and construction methodologies in the form of a detailed Construction Environmental Management Plan (CEMP) to ensure all environmental impacts are managed and mitigated in accordance with the EIAR and Railway Order, assuming an Enforceable Railway Order is granted. This detailed CEMP(s) will be provided to DCC for consultation and approval in advance of any construction works on site. An Outline CEMP is included in Appendix A5.1 of the EIAR that will be developed further by the appointed contractors. Monitoring instrumentation will also be used throughout the works to monitor potential environmental impacts, including those discussed above to ensure that acceptable limits are not breached.</p> <p>TII confirm that on the western side of Berkeley Road and north of the junction with Sarsfield Street, a ventilation shaft will be constructed as part of the Mater Station under Berkeley Road, and in front of No 18 and 19. The footpath will be reinstated on completion, but the existing parking at this location will be removed.</p> <p>Ideally, and like the vast majority of the MetroLink deep stations, the ventilation shaft would be an integral part of the main structure. However, with limited space to build the station under the park and surrounding roads, a ventilation shaft located on the north west corner of the structure would protrude up into Berkeley Road, and therefore would require the road to be diverted permanently around it where there is limited space to do so. Its proposed location, whilst not ideal from the prospective of the impact on your property during construction and loss of a parking bay, will in the long term be a preferred location as it allows the streetscape to be returned to its pre-construction layout upon completion.</p> |

| Submission No.                                                  |                                  |          | 026                                                                                                                                                                                                                                                                                                                                                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
