## Observation details

### 5. Grounds

Please describe the grounds of your observation (planning reasons and arguments). You can type or write them in the space below. There is **no word** limit as the box expands to fit what you write.

You can also insert photographs or images in this box. (See part 6 – Supporting materials for more information).

The County Development Plan 2022-2028 was adopted to protect areas such as the proposed location of Dyrick Hill Wind Farm with much of the area defined with the Scenic Classification of 'Most Sensitive' with a 'very low capacity to absorb new development'. This proposed development would completely change the existing character and uniqueness of the area as well as having huge environmental consequences

One of my major concerns is the transportation routes of all construction materials and the negative impact this would have on a small rural area. The existing road infrastructure is not currently adequate to accommodate the transportation requirements of such a huge development. My family home and farm are within 2 kilometres of the proposed wind farm. I am concerned about the negative health implications such as the shadow flicker from the turbines, noise levels as well as the negative visual impact to such a scenic landscape. There are 112 eircodes within 2 kilometres of this proposed development which all depend on either gravity or private wells for their water supply. This could be negatively impacted by the construction of this wind farm.

If this project progresses it will have far reaching long term negative consequences for our wider community.

## 5. Grounds

## Supporting materials

6. If you wish, you can include supporting materials with your observation.

Supporting materials include:

- photographs,
- plans,
